ceded by a certain consciousness of the necessary resources. This consciousness, in the case of America, was wanting. Our colonial relation to Great Britain had filled us with a feeling of intellectual dependence, of which our success in shaking off her political dominion had in no respect relieved us. We had not then, and, indeed, have not entirely to this day, arrived at any just idea of the inevitable connexion between any ability to maintain ourselves in arts as well as in arms—the ability in both cases arising only from our intellectual resources, and a manly reliance upon the just origin of national strength,—Self-dependence! To Mr. Cooper the merit is due, of having first awakened us to this self-reference,—to this consciousness of mental resources, of which our provincialism dealt, not only in constant doubts, but in constant denials. The first step is half the march, as in ordinary cases, the first blow is half the battle. With what rapidity after that did the American press operate! How many new writers rose up suddenly, the moment that their neighbours had made the discovery that there were such writers—that such writers should be. Every form of fiction, the legend, tale, novel and romance—the poem, narrative and dramatic—were poured out with a prolific abundance, which proved the possession, not only of large resources of thought, but of fancy, and of an imagination equal to every department of creative fiction. It will not matter to show that a great deal of this was crude, faulty, undigested—contracted and narrow in design, and spasmodic in execution. The demand of the country called for no more. The wonder was that, so suddenly, and at such short notice, such resources could be found as had not before been imagined. The sudden rise and progress of German literature seems to have been equally surprising and sudden—equally the result of a national impulse, newly moved in a novel and unexpected direction. The wonderful birth and progress of American letters in the last twenty years—and in every depart-

ment of thought, art and science, so far from discouraging, because of its imperfections, holds forth the most signal encouragement to industry and hope—showing most clearly, that the deficiency was not in the resource but in the demand, not in the inferior quality, or limited quantity, but in the utter indifference of our people to the possession of the material.

THE PILOT AND LEATHERSTOCKING

THE VERY isolation to which, in the most successful of his stories, Mr. Cooper subjects his favourite personages, is, alone, a proof of his strength and genius. While the ordinary writer, the man of mere talent, is compelled to look around him among masses for his material, he contents himself with one man, and flings him upon the wilderness. The picture then, which follows, must be one of intense individuality. Out of this one man's nature, his moods and fortunes, he spins his story. The agencies and dependencies are few. With the self-reliance which is only found in true genius, he goes forward into the wilderness, whether of land or ocean, and the vicissitudes of either region, acting upon the natural resources of one man's mind, furnish the whole material of his work-shop. This mode of performance is highly dramatic, and thus it is that his scout, his trapper, his hunter, his pilot, all live to our eyes and thoughts, the perfect ideals of moral individuality. For this we admire them—love them we do not—they are objects not made to love—they do not appeal to our affections so much as to our minds. We admire their progress through sea and forest—their strange ingenuity, the skill with which they provide against human and savage enemies, against cold and hunger, with the same sort of admiration which we feel at watching any novel progress in arts or arms—a noble ship darting like a bird over the deep, unshivering, though the storm threatens to shiver every thing else around it—a splendid piece of machinery which works to the

most consummate ends by a *modus operandi*, which we yet fail to detect—any curious and complex invention which dazzles our eyes, confounds our judgment, and mocks the search which would discover its secret principles. Take, for example, the character of the "Pilot," in the rapid and exciting story of that name. Here is a remarkable instance of the sort of interest which Mr. Cooper's writings are chiefly calculated to inspire. Marble could not be more inflexible than this cold, immovable pulseless personage. He says nothing, shows nothing, promises nothing. Yet we are interested in his very first appearance. Why and how? Naturally enough by the anxiety with which he is sought and looked for,—by the fact that he promises nothing, yet goes to work, without a word, in a manner that promises every thing. We feel, at a glance, that if any mortal man can save the ship, he is the man. Why is this? Simply because he goes to work, without a word, as if it was in him to do so,—as if a calm consciousness of power was his possession, as if he knew just where to lay his hands, and in what direction to expend his strength. He shows *the capacity for work*, and thus constitutes the sort of manhood upon which all men rely in moments of doubt or danger. Yet he gives you no process of reasoning—he has no word save that which commands obedience,—he neither storms, implores, nor threatens—he has no books,—he deals in no declamation. He is the ideal of an abstract but innate power, which we acknowledge and perhaps fear, but cannot fathom. All is hidden within himself, and, except when at work, he is nothing—he might as well be stone. Yet, around him,—such a man—a wonderful interest gathers like a halo—bright and inscrutable,—which fills us with equal curiosity and reverence. With him, a man of whom we know nothing,—whom we see now for the first time,—whom we may never see again,—whom we cannot love—whom we should never seek, and with his ship,—timbers, tackle, ropes, spars and cordage,—a frail fabric, such as goes

to and fro along our shores, in our daily sight, without awakening a single thought or feeling,—with ship and man we grow fascinated beyond all measure of ordinary attraction. In his hands the ship becomes a being, instinct with life, beauty, sentiment—in danger, and to be saved,—and our interest in her fate, grows from our anxiety to behold the issue, in which human skill, courage and ingenuity, are to contend with storm and sea, rocks and tempest—as it were, man against omnipotence. Our interest springs from our curiosity rather than from our affections. We do not care a straw for the inmates of the vessel. They are very ordinary persons, that one man excepted—and *he* will not suffer us to love him. But *manhood*, true manhood, is a sight, always, of wondrous beauty and magnificence. The courage that looks steadily on the danger, however terrible, the composure that never swerves from its centre under the pressure of unexpected misfortune, the knowledge that can properly apply its strength, and the adroitness and energy, which, feeling the force of a manly will, flies to their task, in instant and hearty obedience, these form a picture of singular beauty, and must always rivet the admiration of the spectator. We regard Mr. Cooper's "Pilot"—breasting the storm, tried by, and finally baffling all its powers, as the Prometheus in action—inflexible, ready to endure,—isolated, but still human in a fond loyalty to all the great hopes and interests of humanity.

Hawkeye, the land sailor of Mr. Cooper, is, with certain suitable modifications, the same personage. We see and admire, in him, the qualities of hardihood and endurance, coolness, readiness of resource, keen, clear sighted observation, just reflection, and a sincere, direct, honest heart. He is more human than the other, since, naturally of gentler temperament, the life-conflict has not left upon his mind so many traces of its volcanic fires. He has had more patience, been more easily persuaded, has endured with less struggle if not more

fortitude, and, in his greater pliancy, has escaped the greater force of the tempest. But he is, in all substantial respects, the same personage, and inspires us with like feelings. In the hour of danger,—at midnight,—in the green camp of the hunter,—trembling women, timid men, and weeping children, grouped together in doubt,—all eyes turn to him, as, on the sea, in storm, all eyes address themselves to the "Pilot." If any one can save them he is the man. Meanwhile, the shouts of savages are heard on every side,—the fearful whoop of slaughter,—as, on the sea, the wind howls through the ship's cordage, and the storm shrieks a requiem, in anticipation of ultimate triumph, around the shivering inmates. It is only upon true manhood that man can rely, and these are genuine men—not blocks, not feathers—neither dull, nor light of brain,—neither the stubbornly stupid, nor the frothily shallow. Now, as nothing in nature is more noble than a noble-minded, whole-souled man,—however ignorant, however poor, however deficient in imposing costume or imposing person,—so nothing, in nature, is better calculated to win the homage and command the obedience of men, than the presence of such a person in their moments of doubt and danger. It is inevitable, most usually, that such a man will save them, if they are to be saved by human agency. To Mr. Cooper we owe several specimens of this sort of moral manhood. It does not qualify our obligation to him, that they have their little defects,—that he has sometimes failed to hit the true line that divides the simplicity of nature, from the puerility of ignorance or childhood. His pictures are as perfect, of their kind, as the artist of fiction has ever given us.

THE SATIRES²

IT MAY be urged that Mr. Cooper had no design in "*Home as Found*," to make his satire general,—that his home, as found, was meant to be the small province in which his domestic gods were set up; and

that his satire was purely local, instead of general. Unhappily, then, he has so managed his work, that his censure sweeps every thing before it. This is the great danger in the preparation of such works. It is difficult to say where the line is to be drawn which limits the application of the satire. One is scarcely prepared, in the first place, to believe that a man of genius and judgment is willing to expend so much thunder on so diminutive an object. The foreigner certainly does not believe it, and for us at home, we are apprehensive that, in the hurry of Mr. Cooper's indignation, and the warmth of his anger, he confounded with his particular enemies the whole American people, and made common war against them. It is in the nature of such a mind as Mr. Cooper's to do heartily, as well as hurriedly, whatever he undertakes. He is apt to generalize too much from small beginnings. His "*Travelling Bachelor*" was full of proofs to this effect. That was published as "*Notions of the Americans*." It was very evident that the work should have been called, "*Notions of the New Yorkers and New Englanders*." It showed very little acquaintance with the South and West. "*Homeward Bound*" and "*Home as Found*," were no doubt true to a certain extent. We do not speak of them as such. They were truthful, so far as the satire was confined to certain classes and circles. They were false, so far as they were made to apply to the characteristics of the American people. It was Mr. Cooper's error to have written these books in a moment of great personal feeling—when the freshness of provocation was stirring in his mind,—when, suffering from injustice, his anger was naturally without measure. There was unquestionably much that deserved the keenest satire and the severest censure. The chief cities were diseased to an enormous extent. Their evil influences were spreading to the country. The rankness of trade and speculation had overrun

² See the introductory essay on Cooper, and the selection from *Home as Found*.

the land, its vices were fast usurping the place of virtues—fraud was a bold politician, prescribing laws for the people, and matters for government, as if the propriety of his existence were no longer matter of dispute, bankruptcy was the most profitable of all pursuits—labour was every where driven out of sight as too base for toleration, and sleight-of-hand was the great principle which determined the degrees of eminence and the rewards of service. The most dextrous was the best man, and his profits were assigned accordingly. Verily, a censor was needed, a terrible censor, dreadful in rebuke, armed with a flail of thunder, for the work of retribution. It was not in the power of an ordinary satirist to do this work. Long impunity, and constantly increasing numbers, had made the criminals bold and reckless. They laughed at ordinary reproof, they mocked at wisdom, and despised censure. Mr. Cooper would have written in vain, as others did, but that providence works out the good of man by laws, which, however natural, are not so obvious to him in the blindness of his passion, or the greedy hurry of his avarice. A terrible punishment was preparing for the excesses of our people,—unhappily, a fate which has made the innocent pay the debts of the guilty,—which has swept all with a common besom. The laws of industry, common sense and common honesty, are not to be long outraged with impunity, and the recoil came and the retribution,—and we are—what need not be said—what we are now, and—so far as mere social prosperity is concerned—what, it is feared, we must very long remain. In morals, we trust there is improvement. God works out his purposes to this end, and he does not often work in vain. We are pleased to think, and somewhat proud to say, that, touched by adversity, scourged by the just judgments of Heaven, we are an improving people. Vice is less audacious,—pride less boastful,—labour more honourable,—truth better esteemed, if not yet wholly triumphant.

Mr. Cooper committed two errors when

he wrote his satires—the one much more decided than the other. He wrote them at the wrong time, and he wrote them in the wrong spirit. Vanity listens to no homily in the full sunshine of its day. Pride hears no warning, when the homage of vulgar admiration fills its ears. Trade hearkens to no admonitions of prudence, or of principle, in the full tide of a seemingly successful speculation. Mr. Cooper wrote the books which proved so offensive to the American people, at a time when an angel from heaven would have spoken to them in vain,—when, besotted with the boldest dreams of fortune that ever diseased the imagination of avarice, they seemed to have lost the usual faculties of thought, prudence and observation—when, they appeared to think, they had but to will, and *presto*, they won—to lift a finger, and, as at the wand of a magician, the waters flowed with sparkling treasures, and the sands glittered with the precious metal. The Spaniards in Peru or Mexico were never half so bedevilled with their own imaginings, as were the people of our trading cities within our recent remembrance. Our merchants assumed the port of princes, and the Merchant-Princes of the Adriatic never loomed out with a more dazzling and determined ostentation.

Was it likely, that, swollen with pride, gloating over their imaginary treasures, and swaggering with the affectations of fashion, borrowed from the old fools—and young ones—of older countries, they should listen to any censor, receive any counsel, tolerate with patience any rebuke? The attempt of Mr. Cooper was unseasonable, and only vexed them. They wished praise only,—nothing more,—praise from any quarter,—they had stomachs for no stronger aliment. They had flattered the foreigner to secure this praise. They had run with headlong speed to hail the advent of English Lord and English Lady,—had spread their dinner cloths, and thrown wide their saloons and ball-rooms and theatres—asking only for praise. That their own countryman should withhold the precious condi-

ment—should, like the foreigner, find fault only—was an offence not to be forgiven. Nay, there was some reason for their anger. The censure of Mr. Cooper was not expressed in the right spirit. The tone of "Homeward Bound," and "Home as Found," was bad. It expressed the language of querulousness and distaste, if not disgust. It was written less in sorrow than in anger, as if the writer took a malicious delight in singling out the sore spots, which it had been the better purpose of the patriot to hide if he could not heal. He showed himself more disposed to revenge

his own hurts and injuries than to amend the faults of his countrymen. Besides, as we have already said, he was unjust because too sweeping in his condemnation. This was the consequence of writing in his anger. Passion has no powers of discrimination, and the wilful mind will exercise none. But if Mr. Cooper's censure had been just in all respects, and in its entire application, it must have failed of any good result at the time of its utterance. It was unseasonable, and therefore impolitic and unwise.

1807 ~ *Henry Wadsworth Longfellow* ~ 1882

DURING much of his life Longfellow was the most popular living poet not only of his own country but of the world, his work known and loved in twenty languages. In America the critical attacks of Poe and a few others rather enhanced than weakened his hold on the affections and respect of the great majority of readers. The popular estimate of Longfellow, and at least part of the basis for it, was set forth by the woman journalist, Grace Greenwood, in a comment in which, after disparaging the poet who lived in a garret and starved for his art, she declared exultantly of Longfellow, "Our poet is a gentleman!" and went on to praise his taste in dress and his habit of taking his wife to the opera.

Longfellow's popularity was not limited to those whose standards followed Grace Greenwood's, of course. Scholars in the fields of both modern and classical literature, historians, critics and men of letters generally—with but few exceptions—gave him praise and honor exceeding that accorded to any other American poet of his generation. But after 1900—though people still bought his books in surprising numbers—critical estimation of Longfellow swiftly declined, to reach an excess of censure and ridicule in the decade of the 20's. Now, more than a century since he became famous, it should be possible to re-evaluate his work with some justice.

Longfellow wrote a handful of sonnets that rank close to the best in the language, and a similarly small group of lyrics perennially satisfying for their completely organic fusion of feeling and expression. Through his narrative poems he made a contribution second only to Cooper's to the formation of an American tradition. Americans needed a sense of their past in his day as now, and *Evangeline*, *Hwathwa*, and *The Courtship of Miles Standish* provided for

Longfellow's generation accessible and acceptable images and symbols on which that sense could feed. Finally, Longfellow's work in his translations and paraphrases, in his prose and in many of his own poems, provided the main channel, shallow but broad, through which the stream of European literature flowed into the American culture of his time.

Of Longfellow's evident limitations—limitations which must be frankly acknowledged in any attempt at just appraisal—perhaps the most decisive was his life-long and almost total separation from the real America of his times. The social and economic turmoil of his century, the rise of industrialism and the conflicts of labor and capital, the impact of immigration and the growth of the cities, struggles for reform, the great scientific and religious changes, found and left him not so much indifferent as unaware. His world was one of books, not of life, and even in that world his limitations were profound. His sense of the past was not critical or acute, but vague and sentimental. Much of the greatest in literature perplexed and embarrassed him; much he missed altogether. A major labor of his life was his verse translation of Dante, a labor of love and of many years, but there are heights and depths in Dante of which he remained wholly unaware.

Longfellow's family was old and distinguished, his father a prominent and prosperous lawyer, his boyhood home in the beautiful and thriving town of Portland, Maine, one of comfort and culture. His college career at rural Bowdoin was brilliant, but his college years were one long battle between his father's determination that he should become a lawyer and his own desire to write—a battle made more painful by the strong affection between father and son. Teaching was a compromise. Longfellow pioneered in the field of modern languages, first at Bowdoin and later at Harvard, producing in rapid succession needed textbooks in French, Spanish, and Italian, and writing scholarly articles. From reading and travel during two protracted periods of study in Europe he drew the materials of his two first books of creative prose, *Outre-Mer* (1835) and *Hyperion* (1839), rather desultory expressions of conventional Romantic attitudes. But his first volume of poems, *Voices of the Night*, also published in 1839, was immediately successful. Thereafter, except for the slight novel *Kavanagh* (1849), he recognized poetry as his medium, and advanced steadily both in its mastery and in public recognition. Though he used materials derived from his European experiences and studies in many of his books—notably in *The Spanish Student* (1843) and *The Belfry of Bruges and Other Poems* (1845), the first two decades of Longfellow's mature life as a poet were primarily devoted to poetic recreations of the American past. In *Ballads and Other Poems* (1841), in part, *Evangeline* (1847), *The Song of Hiawatha* (1855), *The Courtship of Miles Standish* (1858). Only in the slender and feeble volume of *Poems on Slavery* (1842) did he give brief attention to the national problems of these years. In 1854 he resigned his professorship at Harvard in

order to devote his whole time to poetry. By 1857 his American publishers alone had sold more than 300,000 copies of his books.

Except for his unsuccessful experiments with the dramatic form in the *New England Tragedies* (1868), Longfellow's work after 1854 contained relatively little purely American material. He devoted the years to his verse translation of Dante, published in 1867, to the varied and often delightful narratives of the two series of *Tales of a Wayside Inn* (1863 and 1874), and to the more serious project of *Christus* (1872), a poetic account of the history of Christianity, and he wrote some of his finest sonnets and lyrics for the final volumes *Keamos and Other Poems* (1874), *Ultima Thule* (1880), *In the Harbor* (1882). With wealth, leisure, honors at home and abroad, the affection of millions of readers around the world, Longfellow's last years were in harmony with his whole decorous life as a gentleman of letters.

Yet there is a genuine and appealing human being behind his Victorian gentility—glimpsed in the flashy waistcoats he affected as a young professor, reflected in the devotion of such varied friends as Charles Sumner, the abolitionist politician, Louis Agassiz, the scientist, and Charles Eliot Norton, the editor, and a real poet behind the elaborate and often artificial façade of his work, to be found by the modern reader in parts of *Evangeline* and *Hiawatha* and in a very few of his most personal poems.

[Herman S. Gorman's *A Victorian American Henry Wadsworth Longfellow* (New York, 1926) and Lawrance Thompson's *Young Longfellow, 1807-1843* (New York, 1938) are both reliable biographies. Odell Shepard's *Longfellow* (New York, 1934) in the American Writers Series contains a good critical introduction. See also H. M. Jones' essay in *American Writers on American Literature* (New York, 1931), edited by John Macy, and W. P. Trent's *Longfellow and Other Essays* (New York, 1910).]

A PSALM OF LIFE

WHAT THE HEART OF THE YOUNG MAN
SAID TO THE PSALMIST

Not enjoyment, and not sorrow,
Is our destined end or way, 10
But to act, that each to-morrow
Find us farther than to-day

[1839 (1838)]

Tell me not, in mournful numbers,
Life is but an empty dream!—
For the soul is dead that slumbers,
And things are not what they seem

Art is long, and Time is fleeting,
And our hearts, though stout and brave,
Still, like muffled drums, are beating 15
Funeral marches to the grave

Life is real! Life is earnest!
And the grave is not its goal;
Dust thou art, to dust returnest,
Was not spoken of the soul

5 In the world's broad field of battle,
In the bivouac of Life,
Be not like dumb, driven cattle!
Be a hero in the strife! 20

Trust no Future, howe'er pleasant!
 Let the dead Past bury its dead!
 Act,—act in the living Present!
 Heart within, and God o'erhead!

Lives of great men all remind us
 We can make our lives sublime,
 And, departing, leave behind us
 Footprints on the sands of time,

Footprints, that perhaps another,
 Sailing o'er life's solemn main,
 A forlorn and shipwrecked brother,
 Seeing, shall take heart again

Let us, then, be up and doing,
 With a heart for any fate,
 Still achieving, still pursuing,
 Learn to labor and to wait

HYMN TO THE NIGHT [1839]

I heard the trailing garments of the Night
 Sweep through her marble halls!
 I saw her sable skirts all fringed with light
 From the celestial walls!

I felt her presence, by its spell of might, 5
 Stoop o'er me from above,
 The calm, majestic presence of the Night,
 As of the one I love

I heard the sounds of sorrow and delight,
 The manifold, soft chimes, 10
 That fill the haunted chambers of the
 Night,
 Like some old poet's rhymes

From the cool cisterns of the midnight air
 My spirit drank repose,
 The fountain of perpetual peace flows
 there,— 15
 From those deep cisterns flows

O holy Night! from thee I learn to bear
 What man has borne before!
 Thou layest thy finger on the lips of Care,
 And they complain no more 20

Peace! Peace! Orestes-like I breathe this
 prayer!

Descend with broad-winged flight,
 The welcome, the thrice-prayed for, the
 most fair,
 The best-beloved Night!

THE ARSENAL AT SPRINGFIELD [1846 (1844)]

This is the Arsenal From floor to ceiling,
 Like a huge organ, rise the burnished
 arms,
 But from their silent pipes no anthem
 pealing
 Startles the villages with strange alarms

Ah! what a sound will rise, how wild and
 dreary, 5
 When the death-angel touches those swift
 keys!
 What loud lament and dismal Misereere
 Will mingle with their awful sympho-
 nies!

I hear even now the infinite fierce chorus,
 The cries of agony, the endless groan, 10
 Which, through the ages that have gone
 before us,
 In long reverberations reach our own

On helm and harness rings the Saxon
 hammer,
 Through Cimbric forest roars the Norse-
 man's song,
 And loud, amid the universal clamor, 15
 O'er distant deserts sounds the Tartar
 gong

I hear the Florentine, who from his palace
 Wheels out his battle-bell with dreadful
 din,
 And Aztec priests upon their teocallis
 Beat the wild war-drums made of ser-
 pent's skin; 20

The tumult of each sacked and burning
 village;
 The shout that every prayer for mercy
 drowns,

The soldiers' revels in the midst of pillage,
The wail of famine in beleaguered
towns,

The bursting shell, the gateway wrenched
asunder, 25

The rattling musketry, the clashing
blade,

And ever and anon, in tones of thunder,
The diapason of the cannonade

Is it, O man, with such discordant noises,
With such accursed instruments as
these, 30

Thou drownest Nature's sweet and kindly
voices,

And jarrest the celestial harmonies?

Were half the power, that fills the world
with terror,

Were half the wealth, bestowed on camps
and courts,

Given to redeem the human mind from
error, 35

There were no need of arsenals or forts

The warrior's name would be a name ab-
horred!

And every nation, that should lift again
Its hand against a brother, on its forehead
Would wear forevermore the curse of
Cam! 40

Down the dark future, through long gen-
erations,

The echoing sounds grow fainter and
then cease,

And like a bell, with solemn, sweet vibra-
tions,

I hear once more the voice of Christ say,
"Peace!"

Peace! and no longer from its brazen
portals 45

The blast of War's great organ shakes
the skies!

But beautiful as songs of the immortals,
The holy melodies of love arise.

THE DAY IS DONE
[1846 (1844)]

The day is done, and the darkness
Falls from the wings of Night,
As a feather is wafted downward
From an eagle in his flight

I see the lights of the village 5
Gleam through the rain and the mist,
And a feeling of sadness comes o'er me
That my soul cannot resist

A feeling of sadness and longing, 10
That is not akin to pain,
And resembles sorrow only
As the mist resembles the rain

Come, read to me some poem,
Some simple and heartfelt lay,
That shall soothe this restless feeling, 15
And banish the thoughts of day

Not from the grand old masters,
Not from the bards sublime,
Whose distant footsteps echo
Through the corridors of Time 20

For, like strains of martial music,
Their mighty thoughts suggest
Life's endless toil and endeavor,
And to-night I long for rest

Read from some humbler poet, 25
Whose songs gushed from his heart,
As showers from the clouds of summer,
Or tears from the eyelids start;

Who, through long days of labor,
And nights devoid of ease, 30
Still heard in his soul the music
Of wonderful melodies

Such songs have power to quiet
The restless pulse of care,
And come like the benediction 35
That follows after prayer

Then read from the treasured volume
 The poem of thy choice,
 And lend to the rhyme of the poet
 The beauty of thy voice 40

And the night shall be filled with music,
 And the cares, that infest the day,
 Shall fold their tents, like the Arabs,
 And as silently steal away

MY LOST YOUTH

[1858]

Often I think of the beautiful town¹
 That is seated by the sea,
 Often in thought go up and down
 The pleasant streets of that dear old town,
 And my youth comes back to me 5
 And a verse of a Lapland song
 Is haunting my memory still
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

I can see the shadowy lines of its trees, 10
 And catch, in sudden gleams,
 The sheen of the far-surrounding seas,
 And islands that were the Hesperides
 Of all my boyish dreams
 And the burden of that old song, 15
 It murmurs and whispers still
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

I remember the black wharves and the
 slips,
 And the sea-tides tossing free, 20
 And Spanish sailors with bearded lips,
 And the beauty and mystery of the ships,
 And the magic of the sea
 And the voice of that wayward song
 Is singing and saying still 25
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

I remember the bulwarks by the shore,
 And the fort upon the hill;

The sunrise gun, with its hollow roar, 30
 The drum-beat repeated o'er and o'er,
 And the bugle wild and shrill
 And the music of that old song
 Throbs in my memory still
 'A boy's will is the wind's will, 35
 And the thoughts of youth are long, long
 thoughts'

I remember the sea-fight² far away,
 How it thundered o'er the tide'
 And the dead captains, as they lay
 In their graves, o'erlooking the tranquil
 bay, 40
 Where they in battle died
 And the sound of that mournful song
 Goes through me with a thrill
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts' 45

I can see the breezy dome of groves,
 The shadows of Deering's Woods,
 And the friendships old and the early loves
 Come back with a Sabbath sound, as of
 doves
 In quiet neighborhoods 50
 And the verse of that sweet old song,
 It flutters and murmurs still
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

I remember the gleams and glooms that
 dart 55
 Across the school-boy's brain,
 The song and the silence in the heart,
 That in part are prophecies, and in part

¹ Portland, Maine, Longfellow's home during his boyhood. For a thorough discussion of this poem and its relation to the source from which Longfellow adapted the refrain, see James Taft Hatfield's article, "Longfellow's Lapland Song," *Publications of the Modern Language Association*, XLV, 1188 ff.

² The *Enterprise* captured the British brig *Boxer* and brought it into Portland harbor in 1813. The captains of both vessels were killed in the engagement, and Longfellow was present at their funeral.

Are longings wild and vain
 And the voice of that fitful song 60
 Sings on, and is never still
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

There are things of which I may not speak,
 There are dreams that cannot die, 65
 There are thoughts that make the strong
 heart weak,
 And bring a pallor into the cheek,
 And a mist before the eye,
 And the words of that fatal song
 Come over me like a chill 70
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts'

Strange to me now are the forms I meet
 When I visit the dear old town,
 But the native air is pure and sweet, 75
 And the trees that o'ershadow each well-
 known street,
 As they balance up and down,
 Are singing the beautiful song,
 Are sighing and whispering still
 'A boy's will is the wind's will, 80
 And the thoughts of youth are long, long
 thoughts'

And Deering's Woods are fresh and fair,
 And with joy that is almost pain
 My heart goes back to wander there,
 And among the dreams of the days that
 were, 85
 I find my lost youth again
 And the strange and beautiful song,
 The groves are repeating it still
 'A boy's will is the wind's will,
 And the thoughts of youth are long, long
 thoughts' 90

HAWTHORNE

MAY 23, 1864

[1866 (1864)]

How beautiful it was, that one bright day
 In the long week of rain!
 Though all its splendor could not chase
 away
 The omnipresent pain

The lovely town¹ was white with apple-
 blooms, 5
 And the great elms o'erhead
 Dark shadows wove on their aerial looms
 Shot through with golden thread

Across the meadows, by the gray old
 manse,²
 The historic river flowed 10
 I was as one who wanders in a trance,
 Unconscious of his road

The faces of familiar friends seemed
 strange,
 Their voices I could hear,
 And yet the words they uttered seemed to
 change 15
 Their meaning to my ear

For the one face I looked for was not
 there,
 The one low voice was mute,
 Only an unseen presence filled the air,
 And baffled my pursuit 20

Now I look back, and meadow, manse,
 and stream
 Dimly my thought defines,
 I only see—a dream within a dream—
 The lull-top hearsed with pines

I only hear above his place of rest 25
 Their tender undertone,
 The infinite longings of a troubled breast,
 The voice so like his own

There in seclusion and remote from men
 The wizard hand lies cold, 30
 Which at its topmost speed let fall the pen,
 And left the tale half told³

¹ Concord, Massachusetts, where Hawthorne's funeral was held, May 23, 1864

² Hawthorne's home, 1842-46. See the introductory essay on Hawthorne, in this volume

³ Probably Longfellow refers to *The Dolliver Romance*, serial publication of which in the *Atlantic Monthly* was interrupted by Hawthorne's illness and death

Ah! who shall lift that wand of magic
 power,
 And the lost clew regain?
 The unfinished window in Aladdin's
 tower
 Unfinished must remain!

Ah! from what agonies of heart and brain,
 What exultations trampling on despair,
 What tenderness, what tears, what hate
 of wrong,
 What passionate outcry of a soul in pain,
 Uprose this poem of the earth and air,
 This mediæval miracle of song!

DIVINA COMMEDIA

[1867 (1864-1867)]

I

Of have I seen at some cathedral door
 A laborer, pausing in the dust and heat,
 Lay down his burden, and with reverent
 feet
 Enter, and cross himself, and on the
 floor
 Kneel to repeat his paternoster o'er,
 Far off the noises of the world retreat,
 The loud vociferations of the street
 Become an undistinguishable roar
 So, as I enter here from day to day,
 And leave my burden at this minster
 gate,
 Kneeling in prayer, and not ashamed
 to pray,
 The tumult of the time disconsolate
 To inarticulate murmur dies away,
 While the eternal ages watch and wait

II

How strange the sculptures that adorn
 these towers!
 This crowd of statues, in whose folded
 sleeves
 Birds build their nests, while canopied
 with leaves
 Parvis and portal bloom like trellised
 bowers,
 And the vast minster seems a cross of
 flowers!
 But fiends and dragons on the gargoyle'd
 eaves
 Watch the dead Christ between the living
 thieves,
 And, underneath, the traitor Judas
 lowers!

III

I enter, and I see thee in the gloom
 Of the long aisles, O poet saturnine!
 And strive to make my steps keep pace
 with thine
 The air is filled with some unknown
 perfume,
 The congregation of the dead make room
 For thee to pass, the votive tapers
 shine,
 Like looks that haunt Ravenna's groves
 of pine
 The hovering echoes fly from tomb to
 tomb
 From the confessionals I hear arise
 Rehearsals of forgotten tragedies,
 And lamentations from the crypts be-
 low,
 And then a voice celestial, that begins
 With the pathetic words, "Although
 your sins
 As scarlet be," and ends with "as the
 snow"

IV

With snow-white veil and garments as of
 flame,
 She¹ stands before thee, who so long ago
 Filled thy young heart with passion and
 the woe
 From which thy song and all its splen-
 dors came,
 And while with stern rebuke she speaks
 thy name,
 The ice about thy heart melts as the
 snow

¹ Beatrice Portinari (1266-1290), loved by Dante in youth. In the *Divina Commedia* he makes her his guide through Paradise.

On mountain heights, and in swift over-
flow
Comes gushing from thy lips in sobs
of shame
Thou makest full confession, and a gleam,
As of the dawn on some dark forest east,
Seems on thy lifted forehead to increase,
Lethe and Eunoe ²—the remembered dream
And the forgotten sorrow—bring at last
That perfect pardon which is perfect
peace

v.

I lift mine eyes, and all the windows blaze
With forms of saints and holy men who
died,
Here martyred and hereafter glorified,
And the great Rose upon its leaves dis-
plays
Christ's Triumph, and the angelic rounde-
lays,
With splendor upon splendor multiplied,
And Beatrice again at Dante's side
No more rebukes, but smiles her words
of praise
And then the organ sounds, and unseen
choirs
Sing the old Latin hymns of peace and
love,
And benedictions of the Holy Ghost,
And the melodious bells among the spires
O'er all the house-tops and through
heaven above
Proclaim the elevation of the Host!

vi.

O star of morning and of liberty!
O bringer of the light, whose splendor
shines
Above the darkness of the Apennines,
Forerunner of the day that is to be!
The voices of the city and the sea,
The voices of the mountains and the
pines,
Repeat thy song, till the familiar lines
Are footpaths for the thought of Italy!
Thy fame is blown abroad from all the
heights,

Through all the nations, and a sound
is heard,
As of a mighty wind, and men devout,
Strangers of Rome, and the new proselytes,
In their own language hear thy wondrous
word,
And many are amazed and many doubt

A NAMELESS GRAVE

[1874]

"A soldier of the Union mustered out,"
Is the inscription on an unknown grave
At Newport News, beside the salt-sea
wave,
Nameless and dateless, sentinel or scout
Shot down in skirmish, or disastrous rout
Of battle, when the loud artillery drove
Its iron wedges through the ranks of
brave
And doomed battalions, storming the
redoubt
Thou unknown hero sleeping by the sea
In thy forgotten grave! with secret shame
I feel my pulses beat, my forehead burn,
When I remember thou hast given for me
All that thou hadst, thy life, thy very
name,
And I can give thee nothing in return

NATURE

[1877]

As a fond mother, when the day is o'er,
Leads by the hand her little child to bed,
Half willing, half reluctant to be led,
And leave his broken playthings on the
floor,
Still gazing at them through the open door,
Nor wholly reassured and comforted
By promises of others in their stead,
Which, though more splendid, may not
please him more,

² Rivers of the underworld The water
of Lethe gave the drinker forgetfulness of
the past, while that of Eunoe made the
mind recall all the good deeds and experi-
ences of life

So Nature deals with us, and takes away
Our playthings one by one, and by the
hand

Leads us to rest so gently, that we go
Scarcely knowing if we wish to go or stay,
Being too full of sleep to understand
How far the unknown transcends the
what we know

THE HERONS OF ELMWOOD
[1878 (1877)]

Warm and still is the summer night,
As here by the river's brink I wander,
White overhead are the stars, and white
The glimmering lamps on the hillside
yonder

Silent are all the sounds of day, 5
Nothing I hear but the chirp of crickets,
And the cry of the herons winging their
way
O'er the poet's house in the Elmwood¹
thickets

Call to him, herons, as slowly you pass
To your roosts in the haunts of the
exiled thrushes, 10
Sing him the song of the green morass,
And the tides that water the weeds and
rushes

Sing him the mystical Song of the Heron,
And the secret that baffles our utmost
seeking,
For only a sound of lament we discern, 15
And cannot interpret the words you are
speaking.

Sing of the air, and the wild delight
Of wings that uplift and winds that up-
hold you,
The joy of freedom, the rapture of flight
Through the drift of the floating mists
that unfold you, 20

Of the landscape lying so far below,
With its towns and rivers and desert
places,

And the splendor of light above, and the
glow

Of the limitless, blue, ethereal spaces

Ask him if songs of the Troubadours, 25
Or of Minne-singers in old black-letter,
Sound in his ears more sweet than yours,
And if yours are not sweeter and wilder
and better

Sing to him, say to him, here at his gate,
Where the boughs of the stately elms are
meeting, 30

Some one hath lingered to meditate,
And send him unseen this friendly greet-
ing,

That many another hath done the same,
Though not by a sound was the silence
broken,

The surest pledge of a deathless name 35
Is the silent homage of thoughts un-
spoken

THE THREE SILENCES OF
MOLINOS²

TO JOHN GREENLEAF WHITTIER

[1878]

Three Silences there are the first of
speech,

The second of desire, the third of
thought,

This is the lore a Spanish monk, dis-
traught

With dreams and visions, was the first
to teach

These Silences, commingling each with
each,

Made up the perfect Silence, that he
sought

And prayed for, and wherein at times
he caught

¹ Home of James Russell Lowell

² Spanish priest and mystic of the 17th
century

Mysterious sounds from realms beyond
 our reach
 O thou, whose daily life anticipates
 The life to come, and in whose thought
 and word
 The spiritual world preponderates,
 Hermit of Amesbury!³ thou too hast heard
 Voices and melodies from beyond the
 gates,
 And speakest only when thy soul is
 stirred!

AUTUMN WITHIN
 [1882 (1874)]

It is autumn, not without,
 But within me is the cold
 Youth and spring are all about,
 It is I that have grown old

Birds are darting through the air,
 Singing, building without rest,
 Life is stirring everywhere,
 Save within my lonely breast

There is silence the dead leaves
 Fall and rustle and are still;
 Beats no flail upon the sheaves,
 Comes no murmur from the mill

THE CROSS OF SNOW⁴
 [1886 (1879)]

In the long, sleepless watches of the night,
 A gentle face—the face of one long
 dead—
 Looks at me from the wall, where round
 its head
 The night-lamp casts a halo of pale
 light.
 Here in this room she died, and soul more
 white
 Never through martyrdom of fire was
 led
 To its repose, nor can in books be read
 The legend of a life more benedict
 There is a mountain in the distant West,
 That, sun-defying, in its deep ravines
 Displays a cross of snow upon its side

Such is the cross I wear upon my breast
 These eighteen years, through all the
 changing scenes
 And seasons, changeless since the day
 she died

From
 EVANGELINE¹
 [1847]

IV

Far in the West there lies a desert land,
 where the mountains
 Lie, through perpetual snows, their lofty
 and luminous summits
 Down from their jagged, deep ravines,
 where the gorge, like a gateway,
 Opens a passage rude to the wheels of the
 emigrant's wagon,
 Westward the Oregon flows and the Walle-
 way and Owyhee 5
 Eastward, with devious course, among the
 Wind-river Mountains,
 Through the Sweet-water Valley precipi-
 tate leaps the Nebraska,
 And to the south, from the Fontaine-qui-
 bout and the Spanish series,
 Fretted with sands and rocks, and swept
 by the wind of the desert,

³ Massachusetts town which was Whit-
 tier's home, except for brief intervals,
 from 1840 until his death in 1892. See
 the introductory essay on Whittier in this
 volume

⁴ Frances Appleton, Longfellow's sec-
 ond wife, died on July 10, 1861, from the
 effects of burns caused by an accidental
 fire in the library of Craigie House, the
 Longfellows' home

¹ The French inhabitants of rural Acadia
 or Acadie (now known as Nova Scotia)
 were expelled from their homes by the
 British in 1755, as an incident of the
 French and Indian War, and widely dis-
 persed. A considerable number of them
 found refuge in Louisiana. The story of
 one of these exiles, Evangeline Bellefon-
 taine, who was separated from her be-
 trothed, Gabriel Lajeunesse, and sought
 him for many years, was given to Long-
 fellow by Hawthorne, who had received it
 from a Boston clergyman

Numberless torrents, with ceaseless sound,
 descend to the ocean, 10
 Like the great chords of a harp, in loud
 and solemn vibrations
 Spreading between these streams are the
 wondrous, beautiful prairies,
 Billowy bays of grass ever rolling in
 shadow and sunshine,
 Bright with luxuriant clusters of roses and
 purple amorphas
 Over them wandered the buffalo herds, and
 the elk and the roebuck; 15
 Over them wandered the wolves, and herds
 of riderless horses,
 Fires that blast and blight, and winds that
 are weary with travel,
 Over them wander the scattered tribes of
 Ishmael's children,
 Staining the desert with blood, and above
 their terrible war-trails
 Cruels and sails aloft, on pinions majestic,
 the vulture, 20
 Like the implacable soul of a chieftain
 slaughtered in battle,
 By invisible stairs ascending and scaling
 the heavens
 Here and there rise smokes from the camps
 of these savage marauders,
 Here and there rise groves from the mar-
 gins of swift-running rivers,
 And the grim, taciturn bear, the anchorite
 monk of the desert, 25
 Climbs down their dark ravines to dig for
 roots by the brook-side,
 And over all is the sky, the clear and
 crystalline heaven,
 Like the protecting hand of God inverted
 above them

Into this wonderful land, at the base of
 the Ozark Mountains,
 Gabriel far had entered, with hunters and
 trappers behind him 30
 Day after day, with their Indian guides,
 the maiden and Basil²
 Followed his flying steps, and thought each
 day to o'ertake him
 Sometimes they saw, or thought they saw,
 the smoke of his camp-fire

Rise in the morning and from the distant
 plain, but at nightfall,
 When they had reached the place, they
 found only embers and ashes 35
 And though their hearts were sad at times
 and their bodies were weary,
 Hope still guided them on, as the magic
 Fata Morgana
 Showed them her lakes of light, that re-
 treated and vanished before them

Once, as they sat by their evening fire,
 there silently entered
 Into the little camp an Indian woman,
 whose features 40
 Wore deep traces of sorrow, and patience
 as great as her sorrow
 She was a Shawnee woman returning home
 to her people,
 From the far-off hunting-grounds of the
 cruel Comanches,
 Where her Canadian husband, a *coureur-
 des-bois*,³ had been murdered
 Touched were their hearts at her story, and
 warmest and friendliest welcome 45
 Gave they, with words of cheer, and she
 sat and feasted among them
 On the buffalo-meat and the venison cooked
 on the embers
 But when their meal was done, and Basil
 and all his companions,
 Worn with the long day's march and the
 chase of the deer and the bison,
 Stretched themselves on the ground, and
 slept where the quivering fire-light 50
 Flashed on their swarthy cheeks, and their
 forms wrapped up in their blankets,
 Then at the door of Evangeline's tent she
 sat and repeated
 Slowly, with soft, low voice, and the charm
 of her Indian accent,
 All the tale of her love, with its pleasures,
 and pains, and reverses
 Much Evangeline wept at the tale, and to
 know that another 55

² Gabriel's father, whom Evangeline had found in Louisiana.

³ French-Canadian name for a hunter and trapper

Hapless heart like her own had loved and
 had been disappointed
 Moved to the depths of her soul by pity
 and woman's compassion,
 Yet in her sorrow pleased that one who had
 suffered was near her,
 She in turn related her love and all its
 disasters
 Mute with wonder the Shawnee sat, and
 when she had ended 60
 Still was mute, but at length, as if a
 mysterious horror
 Passed through her brain, she spake, and
 repeated the tale of the Mowis,
 Mowis, the bridegroom of snow, who won
 and wedded a maiden,
 But, when the morning came, arose and
 passed from the wigwam,
 Fading and melting away and dissolving
 into the sunshine, 65
 Till she beheld him no more, though she
 followed far into the forest
 Then, in those sweet, low tones, that seemed
 like a weird incantation,
 Told she the tale of the fair Lilinau, who
 was wooed by a phantom,
 That, through the pines o'er her father's
 lodge, in the hush of the twilight,
 Breathed like the evening wind, and whis-
 pered love to the maiden, 70
 Till she followed his green and waving
 plume through the forest,
 And nevermore returned, nor was seen
 again by her people
 Silent with wonder and strange surprise,
 Evangeline listened
 To the soft flow of her magical words, till
 the region around her
 Seemed like enchanted ground, and her
 swarthy guest the enchantress. 75
 Slowly over the tops of the Ozark Moun-
 tains the moon rose,
 Lighting the little tent, and with a mys-
 terious splendor
 Touching the sombre leaves, and embrac-
 ing and filling the woodland
 With a delicious sound the brook rushed
 by, and the branches
 Swayed and sighed overhead in scarcely
 audible whispers. 80

Filled with the thoughts of love was Evan-
 geline's heart, but a secret,
 Subtile sense crept in of pain and indefi-
 nite terror,
 As the cold, poisonous snake creeps into
 the nest of the swallow
 It was no earthly fear A breath from the
 region of spirits
 Seemed to float in the air of night, and
 she felt for a moment 85
 That, like the Indian maid, she, too, was
 pursuing a phantom
 With this thought she slept, and the fear
 and the phantom had vanished

Early upon the morrow the march was
 resumed, and the Shawnee
 Said, as they journeyed along,—“On the
 western slope of these mountains
 Dwells in his little village the Black Robe
 chief of the Mission 90
 Much he teaches the people, and tells them
 of Mary and Jesus,
 Loud laugh their hearts with joy, and weep
 with pain, as they hear him ”
 Then, with a sudden and secret emotion,
 Evangeline answered,
 “Let us go to the Mission, for there good
 tidings await us !”
 Thither they turned their steeds, and be-
 hind a spur of the mountains, 95
 Just as the sun went down, they heard a
 murmur of voices,
 And in a meadow green and broad, by the
 bank of a river,
 Saw the tents of the Christians, the tents
 of the Jesuit Mission
 Under a towering oak, that stood in the
 midst of the village,
 Knelt the Black Robe chief with his chil-
 dren A crucifix fastened 100
 High on the trunk of the tree, and over-
 shadowed by grapevines,
 Looked with its agonized face on the multi-
 tude kneeling beneath it
 This was their rural chapel Aloft, through
 the intricate arches
 Of its aerial roof, arose the chant of their
 vespers,
 Mingling its notes with the soft susurrus

and sighs of the branches 105
 Silent, with heads uncovered, the travellers,
 nearer approaching,
 Knelt on the swarded floor, and joined in
 the evening devotions
 But when the service was done, and the
 benediction had fallen
 Forth from the hands of the priest, like
 seed from the hands of the sower,
 Slowly the reverend man advanced to the
 strangers and bade them 110
 Welcome, and when they replied, he smiled
 with benignant expression,
 Hearing the homelike sounds of his mother-
 tongue in the forest,
 And, with words of kindness, conducted
 them into his wigwam
 There upon mats and skins they reposed,
 and on cakes of the maize-car
 Feasted, and slaked their thirst from the
 water-gourd of the teacher 115
 Soon was their story told, and the priest
 with solemnity answered,—
 “Not six suns have risen and set since
 Gabriel, seated
 On this mat by my side, where now the
 maiden reposes,
 Told me this same sad tale; then arose and
 continued his journey!”
 Soft was the voice of the priest, and he
 spoke with an accent of kind-
 ness; 120
 But on Evangeline’s heart fell his words as
 in winter the snow-flakes
 Fall into some lone nest from which the
 birds have departed
 “Far to the north he has gone,” continued
 the priest; “but in autumn,
 When the chase is done, will return again
 to the Mission”
 Then Evangeline said, and her voice was
 meek and submissive, 125
 “Let me remain with thee, for my soul is
 sad and afflicted”
 So seemed it wise and well unto all; and
 betimes on the morrow,
 Mounting his Mexican steed, with his In-
 dian guides and companions,
 Homeward Basil returned, and Evangeline
 stayed at the Mission.

Slowly, slowly, slowly the days succeeded
 each other,— 130
 Days and weeks and months, and the
 fields of maize that were springing
 Green from the ground when a stranger
 she came, now waving about her,
 Lifted their slender shafts, with leaves in-
 terlacing, and forming
 Cloisters for mendicant crows and gran-
 aries pillaged by squirrels
 Then in the golden weather the maize was
 husked, and the maidens 135
 Blushed at each blood-red ear, for that
 betokened a lover,
 But at the crooked laughed, and called it
 a thief in the corn-field
 Even the blood-red ear to Evangeline
 brought not her lover
 “Patience!” the priest would say, “have
 faith, and thy prayer will be an-
 swered!
 Look at this vigorous plant that lifts its
 head from the meadow, 140
 See how its leaves are turned to the north,
 as true as the magnet,
 This is the compass-flower, that the finger
 of God has planted
 Here in the houseless wild, to direct the
 traveller’s journey
 Over the sea-like, pathless, limitless waste
 of the desert
 Such in the soul of man is faith The blos-
 soms of passion, 145
 Gay and luxuriant flowers, are brighter and
 fuller of fragrance,
 But they beguile us, and lead us astray,
 and their odor is deadly
 Only this humble plant can guide us here,
 and hereafter
 Crown us with asphodel flowers, that are
 wet with the dews of nepenthe”

So came the autumn, and passed, and the
 winter,—yet Gabriel came not, 150
 Blossomed the opening spring, and the
 notes of the robin and bluebird
 Sounded sweet upon wold and in wood, yet
 Gabriel came not
 But on the breath of the summer winds a
 rumor was wafted

Sweeter than song of bird, or hue or odor
 of blossom
 Far to the north and east, it said, in the
 Michigan forests, 155
 Gabriel had his lodge by the banks of the
 Saginaw River
 And, with returning guides, that sought the
 lakes of St Lawrence,
 Saying a sad farewell, Evangeline went
 from the Mission
 When over weary ways, by long and peril-
 ous marches,
 She had attained at length the depths of
 the Michigan forests, 160
 Found she the hunter's lodge deserted and
 fallen to ruin!

Thus did the long sad years glide on,
 and in seasons and places
 Divers and distant far was seen the wander-
 ing maiden,—
 Now in the Tents of Grace of the meek
 Moravian Missions,
 Now in the noisy camps and the battle-
 fields of the army, 165
 Now in secluded hamlets, and towns and
 populous cities
 Like a phantom she came, and passed away
 unremembered
 Fair was she and young, when in hope
 began the long journey,
 Faded was she and old, when in disap-
 pointment it ended
 Each succeeding year stole something away
 from her beauty, 170
 Leaving behind it, broader and deeper, the
 gloom and the shadow
 Then there appeared and spread faint
 streaks of gray o'er her forehead,
 Dawn of another life, that broke o'er her
 earthly horizon,
 As in the eastern sky the first faint streaks
 of the morning

V

In that delightful land which is washed
 by the Delaware's waters, 175
 Guarding in sylvan shades the name of
 Penn the apostle,

Stands on the banks of its beautiful stream
 the city he founded
 There all the air is balm, and the peach
 is the emblem of beauty,
 And the streets still reecho the names of
 the trees of the forest,
 As if they fain would appease the Dryads
 whose haunts they molested 180
 There from the troubled sea had Evange-
 line landed, an exile,
 Finding among the children of Penn a
 home and a country
 There old René Leblanc⁴ had died, and
 when he departed,
 Saw at his side only one of all his hundred
 descendants
 Something at least there was in the friendly
 streets of the city, 185
 Something that spake to her heart, and
 made her no longer a stranger,
 And her ear was pleased with the Thee
 and Thou of the Quakers,
 For it recalled the past, the old Acadian
 country,
 Where all men were equal, and all were
 brothers and sisters
 So, when the fruitless search, the disap-
 pointed endeavor, 190
 Ended, to recommence no more upon earth,
 uncomplaining,
 Thither, as leaves to the light, were turned
 her thoughts and her footsteps
 As from a mountain's top the rainy mists
 of the morning
 Roll away, and afar we behold the land-
 scape below us,
 Sun-illumined, with shining rivers and cities
 and hamlets, 195
 So fell the mists from her mind, and she
 saw the world far below her,
 Dark no longer, but all illumined with love,
 and the pathway
 Which she had climbed so far, lying smooth
 and fair in the distance
 Gabriel was not forgotten. Within her heart
 was his image,

⁴ The "worthy notary" who recorded the betrothal of Evangeline and Gabriel before the exile

Clothed in the beauty of love and youth,
 as last she beheld him, 200
 Only more beautiful made by his deathlike
 silence and absence
 Into her thoughts of him time entered not,
 for it was not
 Over hun years had no power, he was not
 changed, but transfigured,
 He had become to her heart as one who is
 dead, and not absent,
 Patience and abnegation of self, and devo-
 tion to others, 205
 This was the lesson a life of trial and sor-
 row had taught her
 So was her love diffused, but, like to some
 odorous spices,
 Suffered no waste nor loss, though filling
 the air with aroma
 Other hope had she none, nor wish in life,
 but to follow,
 Meekly, with reverent steps, the sacred feet
 of her Saviour 210
 Thus many years she lived as a Sister of
 Mercy, frequenting
 Lonely and wretched roofs in the crowded
 lanes of the city,
 Where distress and want concealed them-
 selves from the sunlight,
 Where disease and sorrow in garrets lan-
 guished neglected
 Night after night when the world was
 asleep, as the watchman repeated 215
 Loud, through the gusty streets, that all
 was well in the city,
 High at some lonely window he saw the
 light of her taper
 Day after day, in the gray of the dawn,
 as slow through the suburbs
 Plodded the German farmer, with flowers
 and fruits for the market,
 Met he that meek, pale face, returning
 home from its watchings 220

Then it came to pass that a pestilence⁵
 fell on the city,
 Presaged by wondrous signs, and mostly by
 flocks of wild pigeons,
 Darkening the sun in their flight, with
 naught in their claws but an acorn

And, as the tides of the sea arise in the
 month of September,
 Flooding some silver stream, till it spreads
 to a lake in the meadow, 225
 So death flooded life, and, o'erflowing its
 natural margin,
 Spread to a blackish lake the silver stream
 of existence
 Wealth had no power to bribe, nor beauty
 to charm the oppressor,
 But all perished alike beneath the scourge
 of his anger,—
 Only, alas! the poor, who had neither
 friends nor attendants, 230
 Crept away to die in the almshouse, home
 of the homeless
 Then in the suburbs it stood, in the midst
 of meadows and woodlands,—
 Now the city surrounds it, but still, with
 its gateway and wicket
 Meek, in the midst of splendor, its humble
 walls seem to echo
 Softly the words of the Lord—"The poor
 ye always have with you" 235
 Thither, by night and by day, came the
 Sister of Mercy The dying
 Looked up into her face, and thought, in-
 deed, to behold there
 Gleams of celestial light encircle her fore-
 head with splendor,
 Such as the artist paints o'er the brows
 of saints and apostles,
 Or such as hangs by night o'er a city seen
 at a distance 240
 Unto their eyes it seemed the lamps of the
 city celestial,
 Into whose shining gates ere long their
 spirits would enter

Thus, on a Sabbath morn, through the
 streets, deserted and silent,
 Wending her quiet way, she entered the
 door of the almshouse
 Sweet on the summer air was the odor of
 flowers in the garden, 245
 And she paused on her way to gather the
 fairest among them,

⁵ The epidemic of yellow fever in Philadelphia, 1793.

That the dying once more might rejoice
in their fragrance and beauty
Then, as she mounted the stairs to the
corridors, cooled by the east-wind,
Distant and soft on her ear fell the chimes
from the belfry of Christ Church,
While, intermingled with these, across the
meadows were wafted 250
Sounds of psalms, that were sung by the
Swedes in their church at Wicaco
Soft as descending wings fell the calm of
the hour on her spirit,
Something within her said, "At length thy
trials are ended,"
And, with light in her looks, she entered
the chambers of sickness
Noiselessly moved about the assiduous, care-
ful attendants, 255
Moistening the feverish lip, and the aching
brow, and in silence
Closing the sightless eyes of the dead, and
concealing their faces,
Where on their pallets they lay, like drifts
of snow by the roadside
Many a languid head, upraised as Evan-
geline entered,
Turned on its pillow of pain to gaze while
she passed, for her presence 260
Fell on their hearts like a ray of the sun
on the walls of a prison
And, as she looked around, she saw how
Death, the consoler,
Laying his hand upon many a heart, had
healed it forever.
Many familiar forms had disappeared in
the night time,
Vacant their places were, or filled already
by strangers 265

Suddenly, as if arrested by fear or a
feeling of wonder,
Still she stood, with her colorless lips apart,
while a shudder
Ran through her frame, and, forgotten, the
flowerets dropped from her fingers,
And from her eyes and cheeks the light
and bloom of the morning
Then there escaped from her lips a cry of
such terrible anguish, 270

That the dying heard it, and started up
from their pillows
On the pallet before her was stretched the
form of an old man
Long, and thin, and gray were the locks
that shaded his temples,
But, as he lay in the morning light, his
face for a moment
Seemed to assume once more the forms of
its earlier manhood, 275
So are wont to be changed the faces of
those who are dying
Hot and red on his lips still burned the
flush of the fever,
As if life, like the Hebrew, with blood had
besprinkled its portals,
That the Angel of Death might see the
sign, and pass over
Motionless, senseless, dying, he lay, and
his spirit exhausted 280
Seemed to be sinking down through infinite
depths in the darkness,
Darkness of slumber and death, forever
sinking and sinking
Then through those realms of shade, in
multiplied reverberations,
Heard he that cry of pain, and through
the hush that succeeded
Whispered a gentle voice, in accents tender
and saint-like, 285
"Gabriel! O my beloved!" and died away
into silence
Then he beheld, in a dream, once more the
home of his childhood,
Green Acadian meadows, with sylvan rivers
among them,
Village, and mountain, and woodlands, and,
walking under their shadow,
As in the days of her youth, Evangeline
rose in his vision 290
Tears came into his eyes, and as slowly
he lifted his eyelids,
Vanished the vision away, but Evangeline
knelt by his bedside.
Vainly he strove to whisper her name, for
the accents unuttered
Died on his lips, and their motion revealed
what his tongue would have spoken
Vainly he strove to rise; and Evangeline,
kneeling beside him, 295

Kissed his dying lips, and laid his head
on her bosom
Sweet was the light of his eyes, but it
suddenly sank into darkness,
As when a lamp is blown out by a gust of
wind at a casement

All was ended now, the hope, and the
fear, and the sorrow,
All the aching of heart, the restless, un-
satisfied longing, 300
All the dull, deep pain, and constant an-
guish of patience!
And, as she pressed once more the lifeless
head to her bosom,
Meekly she bowed her own, and mur-
mured, "Father, I thank thee!"

Still stands the forest primeval, but far
away from its shadow,
Side by side, in their nameless graves, the
lovers are sleeping 305
Under the humble walls of the little
Catholic churchyard,
In the heart of the city, they lie, unknown
and unnoticed
Daily the tides of life go ebbing and flow-
ing beside them,
Thousands of throbbing hearts, where theirs
are at rest and forever,
Thousands of aching brains, where theirs
no longer are busy, 310
Thousands of toiling hands, where theirs
have ceased from their labors,
Thousands of weary feet, where theirs have
completed their journey!

Still stands the forest primeval, but
under the shade of its branches
Dwells another race, with other customs
and language
Only along the shore of the mournful and
misty Atlantic 315
Linger a few Acadian peasants, whose
fathers from exile
Wandered back to their native land to die
in its bosom
In the fisherman's cot the wheel and the
loom are still busy,

Maidens still wear then Norman caps and
their kirtles of homespun,
And by the evening fire repeat Evangeline's
story, 320
While from its rocky caverns the deep-
voiced, neighboring ocean
Speaks, and in accents disconsolate an-
swers the wail of the forest

From

THE SONG OF HIAWATHA¹ [1855]

INTRODUCTION

Should you ask me, whence these stories?
Whence these legends and traditions,
With the odors of the forest,
With the dew and damp of meadows,
With the curling smoke of wigwams, 5
With the rushing of great rivers,
With their frequent repetitions,
And their wild reverberations,

¹ *The Song of Hiawatha*—This Indian Edda—if I may so call it—is founded on a tradition prevalent among the North American Indians, of a personage of miraculous birth, who was sent among them to clear their rivers, forests, and fishing-grounds, and to teach them the arts of peace. He was known among different tribes by the several names of Michabou, Chiabo, Manabozo, Tarenawagon, and Hiawatha. Mr. Schoolcraft gives an account of him in his *Algonic Researches*, Vol. I, p. 134, and in his *History, Condition, and Prospects of the Indian Tribes of the United States*, Part III, p. 314, may be found the Iroquois form of the tradition, derived from the verbal narrations of an Onondaga chief.

Into this old tradition I have woven other curious Indian legends, drawn chiefly from the various and valuable writings of Mr. Schoolcraft, to whom the literary world is greatly indebted for his indefatigable zeal in rescuing from oblivion so much of the legendary lore of the Indians.

The scene of the poem is among the Ojibways on the southern shore of Lake Superior, in the region between the Pictured Rocks and the Grand Sable—Longfellow's note

As of thunder in the mountains?		In the vale of Tawasentha,	
I should answer, I should tell you,	10	In the green and silent valley	
"From the forests and the prairies,		"There he sang of Hiawatha,	60
From the great lakes of the Northland,		Sang the Song of Hiawatha,	
From the land of the Ojibways,		Sang his wondrous birth and being,	
From the land of the Dakotahs,		How he prayed and how he fasted,	
From the mountains, moors, and fen-		How he lived, and toiled, and suffered	
lands,	15	That the tribes of men might prosper,	65
Where the heron, the Shuh-shuh-gah		That he might advance his people!"	
Feeds among the reeds and rushes		Ye who love the haunts of Nature,	
I repeat them as I heard them		Love the sunshine of the meadow,	
From the lips of Nawadaha,		Love the shadow of the forest,	
The musician, the sweet singer "	20	Love the wind among the branches,	70
Should you ask where Nawadaha		And the rain-shower and the snow-storm,	
Found these songs so wild and wayward,		And the rushing of great rivers	
Found these legends and traditions,		Through their palisades of pine-trees,	
I should answer, I should tell you,		And the thunder in the mountains,	
"In the bird's-nests of the forest,	25	Whose innumerable echoes	75
In the lodges of the beaver,		Flap like eagles in their eyries,—	
In the hoof-prints of the bison,		Listen to these wild traditions,	
In the eyry of the eagle'		To this Song of Hiawatha'	
"All the wild-fowl sang them to him,		Ye who love a nation's legends,	
In the moorlands and the fen-lands,	30	Love the ballads of a people,	80
In the melancholy marshes,		That like voices from afar off	
Chetowawk, the plover, sang them,		Call to us to pause and listen,	
Mahn, the loon, the wild goose, Wawa,		Speak in tones so plain and childlike,	
The blue heron, the Shuh-shuh-gah,		Scarcely can the ear distinguish	
And the grouse, the Mushkodasa!"	35	Whether they are sung or spoken,—	85
If still further you should ask me,		Listen to this Indian Legend,	
Saying, "Who was Nawadaha?		To this Song of Hiawatha'	
Tell us of this Nawadaha,"		Ye whose hearts are fresh and simple,	
I should answer your inquiries		Who have faith in God and Nature,	
Straightway in such words as follow	40	Who believe that in all ages	90
"In the Vale of Tawasentha," ²		Every human heart is human,	
In the green and silent valley,		That in even savage bosoms	
By the pleasant water-courses,		There are longings, yearnings, strivings	
Dwelt the singer Nawadaha		For the good they comprehend not,	
Round about the Indian village	45	That the feeble hands and helpless,	95
Spread the meadows and the cornfields,		Groping blindly in the darkness,	
And beyond them stood the forest,		Touch God's right hand in that darkness	
Stood the groves of singing pine-trees,		And are lifted up and strengthened,—	
Green in Summer, white in Winter,		Listen to this simple story,	
Ever sighing, ever singing	50	To this song of Hiawatha'	100
"And the pleasant water-courses,		Ye who sometimes, in your rambles	
You could trace them through the valley,		Through the green lanes of the country,	
By the rushing in the Spring-time,		Where the tangled barberry-bushes	
By the alders in the Summer,		Hang their tufts of crimson berries	
By the white fog in the Autumn,	55		
By the black line in the Winter,			
And beside them dwelt the singer,			

² Now known as Norman's Kill, in Albany County, New York

Over stone walls gray with mosses, 105
 Pause by some neglected graveyard,
 For a while to muse, and ponder
 On a half-effaced inscription,
 Written with little skill of song-craft,
 Homely phrases, but each letter 110
 Full of hope and yet of heart-break,
 Full of all the tender pathos
 Of the Here and the Hereafter,—
 Stay and read this rude inscription,
 Read this song of Hiawatha! 115

HIAWATHA'S FASTING

You shall hear how Hiawatha
 Prayed and fasted in the forest,
 Not for greater skill in hunting,
 Not for greater craft in fishing,
 Not for triumphs in the battle,
 And renown among the warriors,
 But for profit of the people,
 For advantage of the nations
 First he built a lodge for fasting,
 Built a wigwam in the forest, 10
 By the shining Big-Sea-Water,
 In the blithe and pleasant Spring-time,
 In the Moon of Leaves he built it,
 And, with dreams and visions many,
 Seven whole days and nights he fasted 15
 On the first day of his fasting
 Through the leafy woods he wandered,
 Saw the deer start from the thicket,
 Saw the rabbit in his burrow,
 Heard the pheasant, Bena, drumming,
 Heard the squirrel, Adjidaumo,
 Rattling in his hoard of acorns,
 Saw the pigeon, the Omeme,
 Building nests among the pine-trees,
 And in flocks the wild goose, Wawa, 25
 Flying to the fen-lands northward,
 Whirling, wailing far above him
 "Master of Life!" he cried, desponding,
 "Must our lives depend on these things?"
 On the next day of his fasting 30
 By the river's brink he wandered,
 Through the Muskoday, the meadow,
 Saw the wild rice, Mahnomonee,
 Saw the blueberry, Meenahga,
 And the strawberry, Odahmin, 35
 And the gooseberry, Shahbomun,

And the grape-vine, the Bemahgut,
 Trailing o'er the alder-branches,
 Filling all the air with fragrance!
 "Master of Life!" he cried, desponding, 40
 "Must our lives depend on these things?"
 On the third day of his fasting
 By the lake he sat and pondered,
 By the still, transparent water,
 Saw the sturgeon, Nahma, leaping, 45
 Scattering drops like beads of wampum,
 Saw the yellow perch, the Sahwa,
 Like a sunbeam in the water,
 Saw the pike, the Maskenozha,
 And the herring, Okahahwis, 50
 And the Shawgashee, the craw-fish!
 "Master of Life!" he cried, desponding,
 "Must our lives depend on these things?"
 On the fourth day of his fasting
 In his lodge he lay exhausted, 55
 From his couch of leaves and branches
 Gazing with half-open eyelids,
 Full of shadowy dreams and visions,
 On the dizzy, swimming landscape,
 On the gleaming of the water, 60
 On the splendor of the sunset
 And he saw a youth approaching,
 Dressed in garments green and yellow,
 Coming through the purple twilight,
 Through the splendor of the sunset, 65
 Plumes of green bent o'er his forehead,
 And his hair was soft and golden
 Standing at the open doorway,
 Long he looked at Hiawatha,
 Looked with pity and compassion 70
 On his wasted form and features,
 And, in accents like the sighing
 Of the South-Wind in the tree-tops,
 Said he, "O my Hiawatha!
 All your prayers are heard in heaven, 75
 For you pray not like the others,
 Not for greater skill in hunting,
 Not for greater craft in fishing,
 Not for triumph in the battle,
 Nor renown among the warriors, 80
 But for profit of the people,
 For advantage of the nations
 "From the Master of Life descending,
 I, the friend of man, Mondamin,
 Come to warn you and instruct you, 85
 How by struggle and by labor

You shall gain what you have prayed for
 Rise up from your bed of branches,
 Rise, O youth, and wrestle with me!"

Faint with famine, Hiawatha 90
 Started from his bed of branches,
 From the twilight of his wigwam
 Forth into the flush of sunset
 Came, and wrestled with Mondamin,
 At his touch he felt new courage 95
 Throbbing in his brain and bosom,
 Felt new life and hope and vigor
 Run through every nerve and fibre
 So they wrestled there together
 In the glory of the sunset, 100
 And the more they strove and struggled,
 Stronger still grew Hiawatha,
 Till the darkness fell around them,
 And the heron, the Shuh-shuh-gah,
 From her nest among the pine-trees, 105
 Gave a cry of lamentation,
 Gave a scream of pain and famine
 " 'Tis enough!" then said Mondamin,
 Smiling upon Hiawatha,
 "But to-morrow, when the sun sets, 110
 I will come again to try you "
 And he vanished, and was seen not,
 Whether sinking as the rain sinks,
 Whether rising as the mists rise,
 Hiawatha saw not, knew not, 115
 Only saw that he had vanished,
 Leaving him alone and fainting,
 With the misty lake below him,
 And the reeling stars above him
 On the morrow and the next day, 120
 When the sun through heaven descending,
 Like a red and burning cinder
 From the hearth of the Great Spirit,
 Fell into the western waters,
 Came Mondamin for the trial, 125
 For the strife with Hiawatha,
 Came as silent as the dew comes,
 From the empty air appearing,
 Into empty air returning,
 Taking shape when earth it touches 130
 But invisible to all men
 In its coming and its going
 Thrice they wrestled there together
 In the glory of the sunset,
 Till the darkness fell around them, 135
 Till the heron, the Shuh-shuh-gah,

From her nest among the pine-trees,
 Uttered her loud cry of famine,
 And Mondamin paused to listen
 Tall and beautiful he stood there, 140
 In his garments green and yellow,
 To and fro his plumes above him
 Waved and nodded with his breathing,
 And the sweat of the encounter
 Stood like drops of dew upon him 145
 And he cried, "O Hiawatha!
 Bravely have you wrestled with me,
 Thrice have wrestled stoutly with me,
 And the Master of Life, who sees us,
 He will give to you the triumph!" 150
 Then he smiled and said "To-morrow
 Is the last day of your conflict,
 Is the last day of your fasting
 You will conquer and o'ercome me,
 Make a bed for me to lie in, 155
 Where the rain may fall upon me,
 Where the sun may come and warm me,
 Strip these garments, green and yellow,
 Strip this nodding plumage from me,
 Lay me in the earth and make it 160
 Soft and loose and light above me
 "Let no hand disturb my slumber,
 Let no weed nor worm molest me,
 Let not Kahgahgee, the raven,
 Come to haunt me and molest me, 165
 Only come yourself to watch me,
 Till I wake, and start, and quicken,
 Till I leap into the sunshine"
 And thus saying, he departed;
 Peacefully slept Hiawatha, 170
 But he heard the Wawonaissa,
 Heard the whippoorwill complaining,
 Perched upon his lonely wigwam,
 Heard the rushing Sebowisha,
 Heard the rivulet rippling near him, 175
 Talking to the darksome forest,
 Heard the sighing of the branches,
 As they lifted and subsided
 At the passing of the night-wind,
 Heard them, as one hears in slumber 180
 Far-off murmurs, dreamy whispers.
 Peacefully slept Hiawatha
 On the morrow came Nokomis,¹

¹ Hiawatha's grandmother and foster parent

On the seventh day of his fasting,
 Came with food for Hiawatha, 185
 Came imploring and bewailing,
 Lest his hunger should o'ercome him,
 Lest his fasting should be fatal
 But he tasted not, and touched not,
 Only said to her, "Nokomis, 190
 Wait until the sun is setting,
 Till the darkness falls around us,
 Till the heron, the Shuh-shuh-gah,
 Crying from the desolate marshes,
 Tells us that the day is ended" 195
 Homeward weeping went Nokomis,
 Sorrowing for her Hiawatha,
 Fearing lest his strength should fail him,
 Lest his fasting should be fatal
 He meanwhile sat weary waiting 200
 For the coming of Mondamin,
 Till the shadows, pointing eastward,
 Lengthened over field and forest,
 Till the sun dropped from the heaven,
 Floating on the waters westward, 205
 As a red leaf in the Autumn
 Falls and floats upon the water,
 Falls and sinks into its bosom
 And behold! the young Mondamin,
 With his soft and shining tresses, 210
 With his garments green and yellow,
 With his long and glossy plumage,
 Stood and beckoned at the doorway
 And as one in slumber walking,
 Pale and haggard, but undaunted, 215
 From the wigwam Hiawatha
 Came and wrestled with Mondamin
 Round about him spun the landscape,
 Sky and forest reeled together,
 And his strong heart leaped within him, 220
 As the sturgeon leaps and struggles
 In a net to break its meshes
 Like a ring of fire around him
 Blazed and flared the red horizon,
 And a hundred suns seemed looking 225
 At the combat of the wrestlers
 Suddenly upon the greensward
 All alone stood Hiawatha,
 Panting with his wild exertion,
 Palpitating with the struggle; 230
 And before him, breathless, lifeless,
 Lay the youth, with hair dishevelled,
 Plumage torn, and garments tattered,
 Dead he lay there in the sunset
 And victorious Hiawatha 235
 Made the grave as he commanded,
 Stripped the garments from Mondamin,
 Stripped his tattered plumage from him,
 Laid him in the earth, and made it
 Soft and loose and light above him, 240
 And the heron, the Shuh-shuh-gah,
 From the melancholy moorlands,
 Gave a cry of lamentation,
 Gave a cry of pain and anguish!
 Homeward then went Hiawatha 245
 To the lodge of old Nokomis,
 And the seven days of his fasting
 Were accomplished and completed
 But the place was not forgotten
 Where he wrestled with Mondamin, 250
 Not forgotten nor neglected
 Was the grave where lay Mondamin,
 Sleeping in the rain and sunshine,
 Where his scattered plumes and garments
 Faded in the rain and sunshine 255
 Day by day did Hiawatha
 Go to wait and watch beside it,
 Kept the dark mould soft above it,
 Kept it clean from weeds and insects,
 Drove away, with scoffs and shoutings, 260
 Kahgahgee, the king of ravens
 Till at length a small green feather
 From the earth shot slowly upward,
 Then another and another,
 And before the Summer ended 265
 Stood the maize in all its beauty,
 With its shining robes about it,
 And its long, soft, yellow tresses,
 And in rapture Hiawatha
 Cried aloud, "It is Mondamin!" 270
 Yes, the friend of man, Mondamin!"
 Then he called to old Nokomis
 And Iagoo, the great boaster,
 Showed them where the maize was growing
 Told them of his wondrous vision, 275
 Of his wrestling and his triumph,
 Of this new gift to the nations,
 Which should be their food forever
 And still later, when the Autumn
 Changed the long, green leaves to yel-
 low, 280
 And the soft and juicy kernels
 Grew like wampum hard and yellow,

Then the ripened ears he gathered,
Stripped the withered husks from off them,
As he once had stripped the wrestler, 285
Gave the first Feast of Mondamin,
And made known unto the people
This new gift of the Great Spirit

From
TALES OF A WAYSIDE INN
[1863]

THE SICILIAN'S TALE

KING ROBERT OF SICILY

Robert of Sicily, brother of Pope Urbane
And Valmond, Emperor of Allemaigne,
Appareled in magnificent attire,
With retinue of many a knight and squire,
On St John's eve, at vespers, proudly
sat 5
And heard the priests chant the Magnificat
And as he listened, o'er and o'er again
Repeated, like a burden or refrain,
He caught the words, "*Deposuit potentes*
De sede, et exaltavit humiles", 10
And slowly lifting up his kingly head
He to a learned clerk beside him said,
"What mean these words?" The clerk made
answer meet,
"He has put down the mighty from their
seat,
And has exalted them of low degree" 15
Thereat King Robert muttered scornfully,
"'Tis well that such seditious words are
sung
Only by priests and in the Latin tongue,
For unto priests and people be it known,
There is no power can push me from my
throne!" 20
And leaning back, he yawned and fell
asleep,
Lulled by the chant monotonous and deep

When he awoke, it was already night,
The church was empty, and there was no
light,
Save where the lamps, that glimmered few
and faint, 25
Lighted a little space before some saint

He started from his seat and gazed around,
But saw no living thing and heard no
sound
He groped towards the door, but it was
locked,
He cried aloud, and listened, and then
knocked, 30
And uttered awful threatenings and com-
plaints,
And imprecations upon men and saints
The sounds echoed from the roof and
walls
As if dead priests were laughing in their
stalls'

At length the sexton, hearing from with-
out 35
The tumult of the knocking and the shout,
And thinking thieves were in the house of
prayer,
Came with his lantern, asking, "Who is
there?"
Half choked with rage, King Robert fierce-
ly said,
"Open 'tis I, the King! Art thou
afraid?" 40
The frightened sexton, muttering, with a
curse,
"This is some drunken vagabond, or
worse!"
Turned the great key and flung the portal
wide,
A man rushed by him at a single stride,
Haggard, half naked, without hat or
cloak, 45
Who neither turned, nor looked at him, nor
spoke,
But leaped into the blackness of the night,
And vanished like a specter from his sight

Robert of Sicily, brother of Pope Urbane
And Valmond, Emperor of Allemaigne, 50
Despoiled of his magnificent attire,
Bareheaded, breathless, and besprent with
mire,
With sense of wrong and outrage desperate,
Strode on and thundered at the palace
gate,
Rushed through the courtyard, thrusting
in his rage 55

To right and left each seneschal and page,
 And hurried up the broad and sounding
 stair
 His white face ghastly in the torches' glare
 From hall to hall he passed with breathless
 speed,
 Voices and cries he heard, but did not
 heed, 60
 Until at last he reached the banquet-room,
 Blazing with light, and breathing with per-
 fume

There on the dais sat another king,
 Wearing his robes, his crown, his signet-
 ring,
 King Robert's self in features, form, and
 height, 65
 But all transfigured with angelic light!
 It was an Angel, and his presence there
 With a divine effulgence filled the air,
 An exaltation, piercing the disguise,
 Though none the hidden Angel recog-
 nize 70

A moment speechless, motionless, amazed,
 The throneless monarch on the Angel
 gazed,
 Who met his looks of anger and surprise
 With the divine compassion of his eyes,
 Then said, "Who art thou? and why com'st
 thou here?" 75
 To which King Robert answered with a
 sneer,
 "I am the King, and come to claim my own
 From an impostor, who usurps my throne!"
 And suddenly, at these audacious words,
 Up sprang the angry guests, and drew their
 swords, 80
 The Angel answered, with unruffled brow,
 "Nay, not the King, but the King's Jester,
 thou
 Henceforth shalt wear the bells and scal-
 loped cape,
 And for thy counselor shalt lead an ape,
 Thou shalt obey my servants when they
 call, 85
 And wait upon my henchmen in the hall!"

Deaf to King Robert's threats and cries
 and prayers,

They thrust him from the hall and down
 the stairs,
 A group of tittering pages ran before,
 And as they opened wide the folding-
 door, 90
 His heart failed, for he heard, with strange
 alarms,
 The boisterous laughter of the men-at-arms,
 And all the vaulted chamber roar and ring
 With the mock plaudits of "Long live the
 King!"

Next morning, waking with the day's first
 beam, 95
 He said within himself, "It was a dream!"
 But the straw rustled as he turned his head,
 There were the cap and bells beside his bed,
 Around him rose the bare, discolored walls,
 Close by, the steeds were champing in their
 stalls, 100
 And in the corner, a revolting shape,
 Shivering and chattering sat the wretched
 ape
 It was no dream, the world he loved so
 much
 Had turned to dust and ashes at his touch!

Days came and went, and now returned
 again 105
 To Sicily the old Saturnian reign,
 Under the Angel's governance benign
 The happy island danced with corn and
 wine,
 And deep within the mountain's burning
 breast
 Enceladus,¹ the giant, was at rest 110
 Meanwhile King Robert yielded to his fate,
 Sullen and silent and disconsolate
 Dressed in the motley garb that Jesters
 wear,
 With look bewildered and a vacant stare,
 Close shaven above the ears, as monks are
 shorn, 115
 By courtiers mocked, by pages laughed to
 scorn,
 His only friend the ape, his only food

¹ Leader of the giants who conspired against Zeus, Enceladus was imprisoned under Mount Etna, in Sicily

What others left,—he still was unsubdued
And when the Angel met him on his way,
And half in earnest, half in jest, would
say, 120
Sternly, though tenderly, that he might
feel

The velvet scabbard held a sword of steel,
“Art thou the King?” the passion of his
woe

Burst from him in resistless overflow,
And, lifting high his forehead, he would
fling 125
The haughty answer back, “I am, I am the
King!”

Almost three years were ended, when there
came

Ambassadors of great repute and name
From Valmond, Emperor of Allemaigne,
Unto King Robert, saying that Pope Vi-
bane 130

By letter summoned them forthwith to
come

On Holy Thursday to his city of Rome
The Angel with great joy received his
guests,

And gave them presents of embroidered
vests,
And velvet mantles with rich ermine
lined, 135

And rings and jewels of the rarest kind
Then he departed with them o’er the sea
Into the lovely land of Italy,
Whose loveliness was more resplendent
made

By the mere passing of that cavalcade, 140
With plumes, and cloaks, and housings,
and the stir

Of jeweled bridle and of golden spur
And lo! among the menials, in mock state,
Upon a piebald steed, with shambling gait,
His cloak of foxtails flapping in the
wind, 145

The solemn ape demurely perched behind,
King Robert rode, making huge merriment
In all the country towns through which
they went

The Pope received them with great pomp,
and blare

Of bannered trumpets, on Saint Peter’s
square, 150

Giving his benediction and embrace,
Fervent, and full of apostolic grace
While with congratulations and with
prayers

He entertained the Angel unawares,
Robert, the Jester, bursting through the
crowd, 155

Into their presence rushed, and cried aloud,
“I am the King! Look, and behold in me
Robert, your brother, King of Sicily!
This man, who wears my semblance to your
eyes,

Is an impostor in a King’s disguise 160
Do you not know me? does no voice within
Answer my cry, and say we are akin?”

The Pope in silence, but with troubled
men,

Gazed at the Angel’s countenance serene,
The Emperor, laughing, said, “It is strange
sport 165

To keep a madman for thy Fool at court!”
And the poor, baffled Jester in disgrace
Was hustled back among the populace

In solemn state the Holy Week went by,
And Easter Sunday gleamed upon the
sky, 170

The presence of the Angel, with its light,
Before the sun rose, made the city bright,
And with new fervor filled the hearts of
men,

Who’ felt that Christ indeed had risen
again

Even the Jester, on his bed of straw, 175
With haggard eyes the unwonted splendor
saw,

He felt within a power unfelt before,
And, kneeling humbly on his chamber floor,
He heard the rushing garments of the
Lord

Sweep through the silent air, ascending
heavenward 180

And now the visit ending, and once more
Valmond returning to the Danube’s shore,
Homeward the Angel journeyed, and again
The land was made resplendent with his
train,

Flashing along the towms of Italy 185
 Unto Salerno, and from there by sea
 And when once more within Palermo's wall,
 And, seated on the throne in his great hall,
 He heard the Angelus from convent towers,
 As if the better world conversed with
 ours, 190
 He beckoned to King Robert to draw
 nigher,
 And with a gesture bade the rest retire;
 And when they were alone, the Angel said,
 "Art thou the King?" Then bowing down
 his head,
 King Robert crossed both hands upon his
 breast, 195
 And meekly answered him "Thou knowest
 best!"
 My sins as scarlet are, let me go hence,
 And in some cloister's school of penitence,
 Across those stones, that pave the way to
 heaven,
 Walk barefoot, till my guilty soul be
 shriven!" 200

 The Angel smiled, and from his radiant
 face
 A holy light illumined all the place,
 And through the open window, loud and
 clear,
 They heard the monks chant in the chapel
 near,
 Above the stir and tumult of the street 205
 "He has put down the mighty from their
 seat,
 And has exalted them of low degree!"
 And through the chant a second melody
 Rose like the throbbing of a single string
 "I am an Angel, and thou art the
 King!" 210

 King Robert, who was standing near the
 throne,
 Lifted his eyes, and lo! he was alone!
 But all appareled as in days of old,
 With ermined mantle and with cloth of
 gold,
 And when his courtiers came, they found
 him there 215
 Kneeling upon the floor, absorbed in silent
 prayer

THE MUSICIAN'S TALE

THE SAGA OF KING OLAF

THE CHALLENGE OF THOR

I am the God Thor,
 I am the War God,
 I am the Thunderer!
 Here in my Northland,
 My fastness and fortress, 5
 Reign I forever!

Here amid icebergs
 Rule I the nations,
 This is my hammer,
 Mjolner the mighty, 10
 Giants and sorcerers
 Cannot withstand it!

These are the gauntlets
 Wherewith I wield it,
 And hurl it afar off, 15
 This is my girdle,
 Whenever I brace it,
 Strength is redoubled!

The light thou beholdest
 Stream through the heavens, 20
 In flashes of crimson,
 Is but my red beard
 Blown by the night-wind,
 Affrighting the nations!

Jove is my brother, 25
 Mine eyes are the lightning,
 The wheels of my chariot
 Roll in the thunder,
 The blows of my hammer
 Ring in the earthquake! 30

Force rules the world, still,
 Has ruled it, shall rule it;
 Meekness is weakness,
 Strength is triumphant
 Over the whole earth 35
 Still is it Thor's-Day!

Thou art a God too,
O Galilean!
And thus single-handed
Unto the combat,
Gauntlet or Gospel,
Here I defy thee!

HYPERION
[1839]

GOETHE

WHAT most interested our travellers in the ancient city of Frankfort was neither the opera nor the *Ariadne* of Dannecker,¹ but the house in which Goethe was born, and the scenes he frequented in his childhood and remembered in his old age. Such, for example, are the walks around the city, outside the moat, the bridge over the Maine, with the golden cock on the cross, which the poet beheld and marvelled at when a boy, the cloister of the Barefooted Friars, through which he stole with mysterious awe to sit by the oilcloth-covered table of old Rector Albrecht, and the garden in which his grandfather walked up and down among fruit-trees and rose-bushes, in long morning-gown, black velvet cap, and the antique leather gloves, which he annually received as Mayor on Pipers Doomsday, representing a kind of middle personage between Alcinous and Laertes.² Thus, O Genius! are thy footprints hal-
lowed, and the star shines forever over the place of thy nativity.

"Your English critics may rail as they list," said the Baron,³ while he and Flemming⁴ were returning from a stroll in the leafy gardens outside the moat, "but, after all, Goethe was a magnificent old fellow. Only think of his life, his youth of passion, alternately aspiring and desponding, stormy, impetuous, headlong,—his romantic manhood, in which passion assumes the form of strength, assiduous, careful, toiling, without haste, without rest,—and his sublime old age,—the age of serene and classic repose, where he stands like Atlas,

as Claudian⁵ has painted him in the Battle of the Giants, holding the world aloft upon his head, the ocean-streams hard frozen in his hoary locks."

"A good illustration of what the world calls his indifferentism."

"And do you know I rather like this indifferentism? Did you never have the misfortune to live in a community, where a difficulty in the parish seemed to announce the end of the world? or to know one of the benefactors of the human race, in the very 'storm and pressure' period of his indiscreet enthusiasm? If you have, I think you will see something beautiful in the calm and dignified attitude which the old philosopher assumes."

"It is a pity that his admirers had not a little of this philosophic coolness. It amuses me to read the various epithets which they apply to him—The Dean, dear Man! The Life-enjoying Man! The All-sided One! The Representative of Poetry upon Earth! The Many-sided Master-Mind of Germany! His enemies rush to the other extreme, and hurl at him the fierce names of Old Humbug! and Old Heathen! which hit like pistol-bullets."

"I confess, he was no saint."

"No, his philosophy is the old ethnic philosophy. You will find it all in a convenient and concentrated portable form in Horace's beautiful Ode to Thaliaicus. What I most object to in the old gentleman is his sensuality."

"O, nonsense! Nothing can be purer than the *Iphigenia*,⁶ it is as cold and passionless as a marble statue."

"Very true, but you cannot say the same of some of the Roman Elegies, and

of that monstrous book, the *Elective Affinities*?"

"Ah, my friend, Goethe is an artist, and looks upon all things as objects of art merely. Why should he not be allowed to copy in words what painters and sculptors copy in colors and in marble?"

"The artist shows his character in the choice of his subject. Goethe never sculptured an Apollo, nor painted a Madonna. He gives us only sinful Magdalens and rampant Fauns. He does not so much idealize as realize."

"He only copies nature."

"So did the artists who made the bronze lamps of Pompeii. Would you hang one of those in your hall? To say that a man is an artist and copies nature is not enough. There are two great schools of art, the imitative and the imaginative. The latter is the most noble, and the most enduring, and Goethe belonged rather to the former. Have you read Mensel's attack upon him?"

"It is truly ferocious. The Silesian hews into him lustily. I hope you do not take sides with him?"

"By no means. He goes too far. He blames the poet for not being a politician. He might as well blame him for not being a missionary to the Sandwich Islands."

"And what do you think of Eckerman?"

"I think he is a kind of German Boswell. Goethe knew he was drawing his portrait, and sat for it accordingly. He works very hard to make a Saint Peter out of an old Jupiter, as the Catholics did at Rome."

"Well, call him Old Humbug, or Old Heathen, or what you please, I maintain, that, with all his errors and short-comings, he was a glorious specimen of a man."

"He certainly was. Did it ever occur to you that he was in some points like Ben Franklin,—a kind of rhymed Ben Franklin? The practical tendency of his mind was the same, his love of science was the same, his benignant, philosophic spirit was the same, and a vast number of his little poetic maxims and soothsayings seem nothing more than the worldly wisdom of Poor Richard, versified."

"What most offends me is, that now every German jackass must have a kick at the dead lion."

"And every one who passes through Weimar must throw a book upon his grave, as travellers did of old a stone upon the grave of Manfredi, at Benevento. But, of all that has been said or sung, what most pleases me is Heine's Apologetic, if I may so call it, in which he says, that the minor poets, who flourished under the imperial reign of Goethe, 'resemble a young forest, where the trees first show their own magnitude after the oak of a hundred years, whose branches had towered above and overshadowed them, has fallen. There was not wanting an opposition that strove against Goethe, this majestic tree. Men of the most warring opinions united themselves for the contest. The adherents of the old faith, the orthodox, were vexed that in the trunk of the vast tree no niche with its holy image was to be found, nay, that even the naked Dryads of paganism were permitted to play their witchery there, and gladly, with consecrated axe, would they have imitated the holy Boniface,⁹ and levelled the enchanted oak to the ground. The followers of the new faith, the apostles of Liberalism, were vexed, on the other hand, that the tree could not serve as a Liberty Tree, or, at any rate, as a barricade. In fact, the tree was too high, no one could plant the red cap upon its summit, or dance the Carmagnole¹⁰ beneath its branches. The multitudes, however, venerated this tree for the very reason that it reared itself with such independent grandeur, and so

¹⁰ Revolutionary dance.

graciously filled the world with its odor, while its branches, streaming magnificently toward heaven, made it appear as if the stars were only the golden fruit of its wondrous limbs' Do you not think that beautiful?"

"Yes, very beautiful And I am glad to see that you can find something to admire in my favorite author, notwithstanding his frailties, or, to use an old German saying, that you can drive the hens out of the garden without trampling down the beds"

"Here is the old gentleman himself!" exclaimed Flemming

"Where?" cried the Baron, as if for the moment he expected to see the living figure of the poet walking before them

"Here at the window,—that full-length cast Excellent,—is it not?" He is dressed, as usual, in his long yellow nankeen sur-tout, with a white cravat crossed in front What a magnificent head! and what a posture! He stands like a tower of strength And, by heavens! he was nearly eighty years old, when that was made"

"How do you know?"

"You can see by the date on the pedestal"

"You are right And yet how erect he stands, with his square shoulders braced back, and his hands behind him! He looks as if he were standing before the fire I feel tempted to put a live coal in his hand, it lies so invitingly half-open Gleim's¹¹ description of him, soon after he went to Weimar, is very different from this Do you recollect it?"

"No, I do not"

"It is a story which good old father Gleim used to tell with great delight He was one evening reading the Gottingen Musen-Almanach in a select society at Weimar, when a young man came in, dressed in a short, green shooting-jacket, booted and spurred, and having a pair of brilliant, black, Italian eyes He, in turn, offered to read, but finding, probably, the poetry of the Musen-Almanach of that year rather too insipid for him, he soon began to improvise the wildest and most

fantastic poems imaginable, and in all possible forms and measures, pretending all the while to read from the book 'That is either Goethe or the Devil,' said good old father Gleim to Wieland,¹² who sat near him To which the 'Great I of Osmannstadt' replied,—'It is both, for he has the Devil in him tonight, and at such times he is like a wanton colt, that flings out before and behind, and you will do well not to go too near him!'"

"Very good!"

"And now that noble figure is but mould Only a few months ago, those majestic eyes looked for the last time on the light of a pleasant spring morning Calm, like a god, the old man sat, and with a smile seemed to bid farewell to the light of day, on which he had gazed for more than eighty years Books were near him, and the pen which had just dropped, as it were, from his dying fingers 'Open the shutters, and let in more light' were the last words that came from those lips Slowly stretching forth his hand, he seemed to write in the air, and, as it sank down again and was motionless, the spirit of the old man departed"

"And yet the world goes on. It is strange how soon, when a great man dies, his place is filled, and so completely, that he seems no longer wanted But let us step in here I wish to buy that cast"

knock at the street-door, which stood wide open, announced a visitor. Unluckily, the study-door was likewise open, and consequently, being in full view, he found it impossible to refuse himself, nor, in fact, would he have done so, had all the doors been shut and bolted,—the art of refusing one's self being at that time but imperfectly understood in Fairmeadow.² Accordingly, the visitor was shown in.

He announced himself as Mr Hathaway. Passing through the village, he could not deny himself the pleasure of calling on Mr Churchill, whom he knew by his writings in the periodicals, though not personally. He wished, moreover, to secure the cooperation of one, already so favorably known to the literary world, in a new Magazine he was about to establish, in order to raise the character of American literature, which, in his opinion, the existing reviews and magazines had entirely failed to accomplish. A daily increasing want of something better was felt by the public, and the time had come for the establishment of such a periodical as he proposed. After explaining, in rather a florid and exuberant manner, his plan and prospects, he entered more at large into the subject of American literature, which it was his design to foster and patronize.

"I think, Mr Churchill," said he, "that we want a national literature commensurate with our mountains and rivers,—commensurate with Niagara, and the Alleghanies, and the Great Lakes!"

"Oh!"

"We want a national epic that shall correspond to the size of the country, that shall be to all other epics what Banvard's Panorama³ of the Mississippi is to all other paintings,—the largest in the world!"

"Ah!"

"We want a national drama in which scope enough shall be given to our gigantic ideas, and to the unparalleled activity and progress of our people!"

"Of course."

"In a word, we want a national literature altogether shaggy and unshorn, that shall

shake the earth, like a herd of buffaloes thundering over the prairies!"

"Precisely," interrupted Mr Churchill, "but excuse me!—are you not confounding things that have no analogy? Great has a very different meaning when applied to a river, and when applied to a literature. Large and shallow may perhaps be applied to both. Literature is rather an image of the spiritual world, than of the physical, is it not?—of the internal, rather than the external. Mountains, lakes, and rivers are, after all, only its scenery and decorations, not its substance and essence. A man will not necessarily be a great poet because he lives near a great mountain. Nor, being a poet, will he necessarily write better poems than another, because he lives nearer Niagara."

"But, Mr Churchill, you do not certainly mean to deny the influence of scenery on the mind?"

"No, only to deny that it can create genius. At best, it can only develop it. Switzerland has produced no extraordinary poet, nor, as far as I know, have the Andes, or the Himalaya mountains, or the Mountains of the Moon in Africa."

"But, at all events," urged Mr Hathaway, "let us have our literature national. If it is not national, it is nothing."

"On the contrary, it may be a great deal. Nationality is a good thing to a certain extent, but universality is better. All that

² New England village in which the events of the novel occur.

³ The "panorama," which may be regarded as an ancestral form of the motion picture, was a popular form of public entertainment in the mid-nineteenth century. It consisted of a series of related pictures painted on a roll of canvas, so that they could be viewed in steady succession as the canvas was unrolled. John Banvard (1815-91), American painter, made the largest and most famous of the panoramas, portraying the Mississippi River from its source to its mouth on three miles of canvas. Longfellow drew details for river scenes in *Evangeline* from Banvard's work. See also Hawthorne's story "Ethan Brand," elsewhere in this volume.

is best in the great poets of all countries is not what is national in them, but what is universal. Their roots are in their native soil, but their branches wave in the unpatriotic air, that speaks the same language unto all men, and their leaves shine with the illimitable light that pervades all lands. Let us throw all the windows open, let us admit the light and air on all sides, that we may look towards the four corners of the heavens, and not always in the same direction."

"But you admit nationality to be a good thing?"

"Yes, if not carried too far, still, I confess, it rather limits one's views of truth. I prefer what is natural. Mere nationality is often ridiculous. Every one smiles when he hears the Icelandic proverb, 'Iceland is the best land the sun shines upon.' Let us be natural, and we shall be national enough. Besides, our literature can be strictly national only so far as our character and modes of thought differ from those of other nations. Now, as we are very like the English,—are, in fact, English under a different sky,—I do not see how our literature can be very different from theirs. Westward from hand to hand we pass the lighted torch, but it was lighted at the old domestic fireside of England."

"Then you think our literature is never to be anything but an imitation of the English?"

"Not at all. It is not an imitation, but, as some one has said, a continuation."

"It seems to me that you take a very narrow view of the subject."

"On the contrary, a very broad one. No literature is complete until the language in which it is written is dead. We may well be proud of our task and of our position. Let us see if we can build in any way worthy of our forefathers."

"But I insist upon originality."

"Yes, but without spasms and convulsions. Authors must not, like Chinese soldiers, expect to win victories by turning somersets in the air."

"Well, really, the prospect from your point of view is not very brilliant. Pray, what do you think of our national literature?"

"Simply, that a national literature is not the growth of a day. Centuries must contribute their dew and sunshine to it. Our own is growing slowly but surely, striking its roots downward, and its branches upward, as is natural, and I do not wish, for the sake of what some people call originality, to invert it, and try to make it grow with its roots in the air. And as for having it so savage and wild as you want it, I have only to say, that all literature, as well as all art, is the result of culture and intellectual refinement."

"Ah! we do not want art and refinement, we want genius,—untutored, wild, original, free."

"But, if this genius is to find any expression, it must employ art, for art is the external expression of our thoughts. Many have genius, but, wanting art, are forever dumb. The two must go together to form the great poet, painter, or sculptor."

"In that sense, very well."

"I was about to say also that I thought our literature would finally not be wanting in a kind of universality. As the blood of all nations is mingling with our own, so will their thoughts and feelings finally mingle in our literature. We shall draw from the Germans, tenderness, from the Spaniards, passion, from the French, vivacity,—to mingle more and more with our English solid sense. And this will give us universality, so much to be desired."

American Literature 1800-1860

II

THE FRONTIER, WEST AND SOUTH

1785 ~ John James Audubon ~ 1851

AUDUBON was born in Haiti and educated in France, he came to America at the age of 18. In 1808 he followed the westward tide to Kentucky, keeping stores and operating a mill before he found his true vocation as student and painter of American birds. His writing was incidental to these interests, but his autobiographical sketches and his journals afford some of our clearest and most readable accounts of frontier settlements and the wilderness.

[Audubon's grand-daughter, Maria R. Audubon, edited his journals and presented these with a brief biography in *Audubon and His Journals* (2 vols., New York, 1897). Recently renewed interest in Audubon has resulted in biographies by Constance Rourke and others. Donald Culross Peattie's *Audubon's America* (Boston, 1942) presents selections from his writings with general comment.]

A WILD HORSE¹

[1837]

WHILE residing at Henderson in Kentucky, I became acquainted with a gentleman who had returned from the country in the neighbourhood of the head waters of the Arkansas River, where he had purchased a newly caught "Wild Horse," a descendant of some of the horses originally bought from Spain, and set at liberty in the vast prairies of the Mexican lands. The animal was by no means handsome—he had a large head, with a considerable prominence in its frontal region, his thick and unkempt mane hung along his neck to the breast, and his tail, too scanty to be called flowing, almost reached the ground. But his chest was broad, his legs clean and sinewy, and his eyes and nostrils indicated spirit, vigour, and endurance. He had never been shod, and although he had been ridden hard, and had performed a long journey, his black hoofs had suffered no damage. His colour inclined to bay, the legs of a deeper tint, and gradually darkening below until they became nearly black. I inquired what might be the value of such an animal among the Osage Indians, and was answered, that the horse being only

four years old, he had given for him, with the tree and buffalo tug fastened to his head, articles equivalent to about thirty-five dollars. The gentleman added, that he had never mounted a better horse, and had very little doubt, that if well fed, he could carry a man of ordinary weight from thirty-five to forty miles a-day, for a month, as he had travelled at that rate upon him, without giving him any food other than the grass of the prairies, or the canes of the bottom lands, until he had crossed the Mississippi at Natchez, when he fed him with corn. Having no farther use for him, now that he had ended his journey, he said he was anxious to sell him, and thought he might prove a good hunting horse for me, as his gaits were easy, and he stood fire as well as any charger he had seen. Having some need of a horse possessed of qualities similar to those represented as belonging to the one in question, I asked if I might be allowed to try him. "Try him, Sir, and welcome, nay, if you will agree

¹ This is one of the articles of a general nature introduced by Audubon into his *Ornithological Biography* (Edinburgh, 1831-39), and reprinted in *Delineations of American Scenery and Character* (New York, 1926).

to feed him and take care of him, you may keep him for a month, if you choose" So I had the horse taken to the stable and fed

About two hours afterwards, I took my gun, mounted the prairie nag, and went to the woods. I was not long in finding him very sensible to the spur, and as I observed that he moved with great ease both to himself and his rider, I thought of leaping over a log several feet in diameter, to judge how far he might prove serviceable in deer-driving or bear-hunting. So I gave him the reins, and pressed my legs to his belly without using the spur, on which, as if aware that I wished to try his mettle, he bounded off and cleared the log as lightly as an elk. I turned him, and made him leap the same log several times, which he did with equal ease, so that I was satisfied of his ability to clear any impediment in the woods. I next determined to try his strength, for which purpose I took him to a swamp, which I knew was muddy and tough. He entered it with his nose close to the water, as if to judge of its depth, at which I was pleased, as he thus evinced due caution. I then rode through the swamp in different directions, and found him prompt, decided, and unflinching. Can he swim well? thought I,—for there are horses, which, although excellent, cannot swim at all, but will now and then lie on their side, as if contented to float with the current, when the rider must either swim and drag them to the shore, or abandon them. To the Ohio then I went, and rode into the water. He made off obliquely against the current, his head well raised above the surface, his nostrils expanded, his breathing free, and without any of the grunting noise emitted by many horses on such occasions. I turned him down the stream, then directly against it, and finding him quite to my mind, I returned to the shore, on reaching which he stopped of his own accord, spread his legs, and almost shook me off my seat. After this I put him to a gallop, and returning home through the woods, shot from the saddle a turkey-cock, which he afterwards approached as

if he had been trained to the sport, and enabled me to take it up without dismounting.

As soon as I reached the house of Dr Rankin, where I then resided, I sent word to the owner of the horse that I should be glad to see him. When he came, I asked him what price he would take, he said, fifty dollars in silver was the lowest. So I paid the money, took a bill of sale, and became master of the horse. Then Doctor, who was an excellent judge, said smiling to me, "Mr Audubon, when you are tired of him, I will refund you the fifty dollars, for depend upon it he is a capital horse." The mane was trimmed, but the tail left untouched, the Doctor had him shod "all round," and for several weeks he was ridden by my wife, who was highly pleased with him.

Business requiring that I should go to Philadelphia, Barrio (he was so named after his former owner) was put up for ten days and well attended to. The time of my departure having arrived, I mounted him, and set off at the rate of four miles an hour,—but here I must give you the line of my journey, that you may, if you please, follow my course on some such map as that of Tanner's. From Henderson through Russellville, Nashville, and Knoxville, Abington in Virginia, the Natural Bridge, Harrisonburgh, Winchester and Harper's Ferry, Frederick and Lancaster to Philadelphia. There I remained four days, after which I returned by way of Pittsburgh, Wheeling, Zanesville, Chillicothe, Lexington, and Louisville to Henderson. But the nature of my business was such as to make me deviate considerably from the main roads, and I computed the whole distance at nearly two thousand miles, the post roads being rather more than sixteen hundred. I travelled not less than forty miles a-day, and it was allowed by the Doctor that my horse was in as good condition on my return as when I set out. Such a journey on a single horse may seem somewhat marvellous in the eyes of a European, but in those days almost every

merchant had to perform the like, some from all parts of the western country, even from St. Louis on the Missouri, although the travellers not unfrequently, on their return, sold their horses at Baltimore, Philadelphia, or Pittsburgh, at which latter place they took boat. My wife rode on a single horse from Henderson to Philadelphia, travelling at the same rate. The country was then comparatively new, few coaches travelled, and in fact the roads were scarcely fit for carriages. About twenty days were considered necessary for performing a journey on horseback from Louisville to Philadelphia, whereas now the same distance may be travelled in six or seven days, or even sometimes less, thus depending on the height of the water in the Ohio.

It may be not uninteresting to you to know the treatment which the horse received on these journeys. I rose every morning before day, cleaned my horse, pressed his back with my hand, to see if it had been galled, and placed on it a small blanket folded double, in such a manner that when the saddle was put on, half of the cloth was turned over it. The surcingle, beneath which the saddle-bags were placed, confined the blanket to the seat, and to the pad behind was fastened the great coat or cloak, tightly rolled up. The bridle had a snaffle bit, a breastplate was buckled in front to each skirt, to render the seat secure during an ascent, but my horse required no crupper, his shoulders being high and well-formed. On starting he trotted off at the rate of four miles an hour, which he continued. I usually travelled from fifteen to twenty miles before breakfast, and after the first hour allowed my horse to drink as much as he would. When I halted for breakfast, I generally stopped two hours, cleaned the horse, and gave him as much corn blades as he could eat. I then rode on until within half an hour of sunset, when I watered him well, poured a bucket of cold water over his back, had his skin well rubbed, his feet examined and cleaned. The rack was filled with blades,

the trough with corn, a good-sized pumpkin or some hens' eggs, whenever they could be procured, were thrown in, and if oats were to be had, half a bushel of them was given in preference to corn, which is apt to heat some horses. In the morning, the nearly empty trough and rack afforded sufficient evidence of the state of his health.

I had not ridden him many days before he became so attached to me that on coming to some limpid stream, in which I had a mind to bathe, I could leave him at liberty to graze, and he would not drink if told not to do so. He was ever sure-footed, and in such continual good spirits, that now and then, when a turkey happened to rise from a dusting place before me, the mere inclination of my body forward was enough to bring him to a smart canter, which he would continue until the bird left the road for the woods, when he never failed to resume his usual trot. On my way homewards I met at the crossings of the Juniata River a gentleman from New Orleans whose name is Vincent Nolte. He was mounted on a superb horse, for which he had paid three hundred dollars, and a servant on horseback led another as a change. I was then an utter stranger to him, and as I approached and praised his horse, he not very courteously observed that he wished I had as good a one. Finding that he was going to Bedford to spend the night, I asked him at what hour he would get there. "Just soon enough to have some trouts ready for our supper, provided you will join when you get there." I almost imagined that Barro understood our conversation, he pricked up his ears, and lengthened his pace, on which Mr. Nolte cantered his horse, and then put him to a quick trot, but all in vain, for I reached the hotel nearly a quarter of an hour before him, ordered the trouts, saw to the putting away of my good horse, and stood at the door ready to welcome my companion. From that day Vincent Nolte has been a friend to me. It was from him I received letters of introduction to the Rathbones of Liverpool, for which I shall ever be grate-

ful to him. We rode together as far as Shippingport, where my worthy friend Nicholas Berthoud, Esq. resided, and on parting with me he repeated what he had many times said before, that he had never seen so serviceable a creature as Bario.

If I recollect rightly, I gave a short verbal account of this journey, and of the good qualities of my horse, to my learned friend J. Skinner, Esq. of Baltimore, who I believe has noticed them in his excellent

Sporting Magazine. We agreed that the importation of horses of this kind from the Western Prairies might improve our breeds generally, and judging from those which I have seen, I am inclined to think that some of them may prove fit for the course. A few days after reaching Henderson, I parted with Bario, not without regret, for a hundred and twenty dollars.

1786 ~ *David Crockett* ~ 1836

NOTHING in his background or early life distinguished Crockett from many other frontiersmen of his time. He served under Andrew Jackson in the Creek War, and gradually thereafter, in the settlements of Western Tennessee, built up a reputation as a marksman and story-teller which sent him to the state legislature. His political independence and integrity, and the confidence that he was one of their own kind, led the pioneers to elect him to the federal Congress, 1827-31 and 1833-35.

Finding the frontiersman anything but subservient to his old chief, Jackson, in Washington, Whig propagandists fostered Crockett's popular reputation. His autobiography, the *Narrative of the Life of David Crockett, of the State of Tennessee* (1834), was called forth by a spurious autobiographical book published under Crockett's name the year before. Though doubtless Crockett had assistance in its writing, the *Narrative* carries conviction as a personal expression.

When his constituents failed to return him to Congress in 1836, Crockett led a small party of Tennessee hunters to the support of the new Republic of Texas in its fight for independence, and died at the Alamo. This circumstance contributed to the rapid growth of a Crockett legend, in which the real man and his actual deeds were interwoven with folk tales and fantasies of the frontier.

[The complete *Narrative* and parts of other Crockett books are available, with an introduction by Hamlin Garland, in *The Autobiography of David Crockett* (Modern Student's Library, New York, 1923). The best account of Crockett as man and writer is contained in Constance Rourke's *Davy Crockett* (New York, 1934). The background of the Crockett legend is interestingly explored in *Mike Fink, King of Mississippi Keelboatmen*, by Walter Blair and Franklin J. Meine (New York, 1933).]

From
A NARRATIVE OF THE LIFE OF
DAVID CROCKETT, OF THE
STATE OF TENNESSEE
[1834]

ELECTIONEERING ¹

I HAD on hand a great many skins, and so, in the month of February, I packed a horse with them, and taking my eldest son along with me, cut out for a little town called Jackson, situated about forty miles off. We got there well enough, and I sold my skins, and bought me some coffee, and sugar, powder, lead, and salt. I packed them all up in readiness for a start, which I intended to make early next morning. Morning came, but I concluded, before I started, I would go and take a horn ² with some of my old fellow-soldiers that I had met with at Jackson.

I did so, and while we were engaged in this, I met with three candidates for the Legislature, a Doctor Butler, who was, by marriage, a nephew to General Jackson, a Major Lynn, and a Mr McEver, all first-rate men. We all took a horn together, and some person present said to me, "Crockett, you must offer for the Legislature." I told him I lived at least forty miles from any white settlement, and had no thought of becoming a candidate at that time. So we all parted and I and my little boy went on home.

It was about a week or two after this, that a man came to my house and told me I was a candidate. I told him not so. But he took out a newspaper from his pocket, and show'd me where I was announced. I said to my wife that this was all a burlesque on me, but I was determined to make it cost the man who had put it there at least the value of the printing, and of the fun he wanted at my expense. So I hired a young man to work in my place on my farm, and turned out myself electioneering. I hadn't been out long, before I found the people began to talk very much about the bear hunter, the man from the

cane, and the three gentlemen, who I have already named, soon found it necessary to enter into an agreement to have a sort of caucus at their March court, to determine which of them was the strongest, and the other two was to withdraw and support him. As the court came on, each one of them spread himself, to secure the nomination, but it fell on Dr Butler, and the rest backed out. The doctor was a clever fellow, and I have often said he was the most talented man I ever run against for any office. His being related to Gen'l Jackson also helped him on very much, but I was in for it, and I was determined to push ahead and go through, or stick. Their meeting was held in Madison county, which was the strongest in the representative district, which was composed of eleven counties, and they seemed bent on having the member from there.

At this time Col Alexander ³ was a candidate for Congress, and attending one of his public meetings one day, I walked to where he was treating the people, and he gave me an introduction to several of his acquaintances, and informed them that I was out electioneering. In a little time my competitor, Doctor Butler, came along, he passed by without noticing me, and I suppose, indeed, he did not recognise me. But I hailed him, as I was for all sorts of fun, and when he turned to me, I said to him, "Well, doctor, I suppose they have weighed you out to me, but I should like to know why they fixed your election for *March* instead of *August*? This is," said I, "a branfire new way of doing business, if a caucus is to make a representative for the people!" He now discovered who I was, and cried out, "D——n it, Crockett, is that you?"—"Be sure it is," said I, "but I don't want it understood that I have come electioneering. I have just crept out of the cane, to see what discoveries I could make among the white folks." I told him that

¹ Title supplied by the present editors

² A drink

³ Adam Rankin Alexander, who served in Congress, 1823-24

when I set out electioneering, I would go prepared to put every man on as good footing when I left him as I found him on. I would therefore have me a large buckskin hunting-shirt made, with a couple of pockets holding about a peck each, and that in one I would carry a great big twist of tobacco, and in the other my bottle of liquor, for I knowed when I met a man and offered him a dram, he would throw out his quid of tobacco to take one, and after he had taken his horn, I would out with my twist and give him another chew. And in this way he would not be worse off than when I found him, and I would be sure to leave him in a first-rate humour. He said I could beat him electioneering all hollow. I told him I would give him better evidence of that before August, notwithstanding he had many advantages over me, and particularly in the way of money, but I told him that I would go on the products of the country, that I had industrious children, and the best of coon dogs, and they would hunt every night till midnight to support my election, and when the coon fur wa'n't good, I would myself go a wolfing, and shoot down a wolf, and skin his head, and his scalp would be good to me for three dollars, in our state treasury money,⁴ and in this way I would get along on the big string. He stood like he was both amused and astonished, and the whole crowd was in a roar of laughter. From this place I returned home, leaving the people in a first-rate way, and I was sure I would do a good business among them. At any rate, I was determined to stand up to my hek-log,⁵ salt or no salt.

In a short time there came out two other candidates, a Mr. Shaw and a Mr. Brown. We all ran the race through, and when the election was over, it turned out that I beat them all by a majority of two hundred and forty-seven votes, and was again returned as a member of the Legislature from a new region of the country, without losing a session. This reminded me of the old saying—"A fool for luck, and a poor man for children."

I now served two years in that body from my new district, which was the years 1823 and '24. At the session of 1823, I had a small trial of my independence, and whether I would forsake principle for party, or for the purpose of following after big men.

The term of Col. John Williams had expired, who was a senator in Congress from the state of Tennessee. He was a candidate for another election, and was opposed by Pleasant M. Miller, Esq., who, it was believed, would not be able to beat the colonel. Some two or three others were spoken of, but it was at last concluded that the only man who could beat him was the present "government," General Jackson. So, a few days before the election was to come on, he was sent for to come and run for the senate. He was then in nomination for the presidency, but sure enough he came, and did run as the opponent of Colonel Williams, and beat him too, but not by my vote. The vote was, for Jackson, *thirty-five*, for Williams, *twenty-five*. I thought the colonel had honestly discharged his duty, and even the mighty name of Jackson couldn't make me vote against him.

But voting against the old chief was found a mighty uphill business to all of them except myself. I never would, nor never did, acknowledge I had voted wrong, and I am more certain now that I was right than ever.

I told the people it was the best vote I ever gave, that I had supported the public interest, and cleared my conscience in giving it, instead of gratifying the private ambition of a man.

I let the people know as early as then, that I wouldn't take a collar around my neck with the letters engraved on it,

MY DOG

Andrew Jackson

⁴ The state paid a bounty on wolves killed.

⁵ Cattle belonging to the settlers, which roamed at large, were given salt on logs or stumps.

1812 ~ *William Tappan Thompson* ~ 1882

IN HIS early twenties Ohio-born William Tappan Thompson was associated with Augustus Baldwin Longstreet in conducting at Atlanta, Georgia, a newspaper called the *States Rights Sentinel*. Shortly he turned to magazine journalism, and wrote the first of his "Major Jones" sketches for the *Family Companion and Ladies' Mirror*, which he edited. After editing other magazines in Philadelphia and Baltimore, Thompson returned to Georgia and in 1850 established the *Savannah Morning News*, which he edited until his death, making it one of the most influential newspapers of the state.

[J. H. Nelson wrote the article about Thompson in the *Dictionary of American Biography*. Walter Blair treats some of his work in *Native American Humor (1800-1900)* (New York, 1937).]

From
MAJOR JONES'S COURTSHIP
[1843]

MAJOR JONES POPS THE QUESTION

Pineville, December 27, 1842

TO Mr. Thompson—*Dear Sir*—Crismus is over, and the thing is done did! You know I told you in my last letter I was gwine to bring Miss Mary up to the chalk on Crismus. Well, I done it, shek as a whistle, though it come mighty nigh bein a serious business. But I'll tell you all about the whole circumstance.

The fact is, I's made my mind up more'n twenty times to jest go and come right out with the whole business, but whenever I got whar she was, and whenever she looked at me with her witchun eyes, and kind o' blushed at me, I always felt sort o' skeered and fainty, and all what I made up to tell her was forgot, so I couldn't think of it to save me. But you's a married man, Mr. Thompson, so I couldn't tell you nothin about poppin the question, as they call it. It's a mighty grate favour to ax of a pretty gall, and to people what aint used to it, it goes monstrous hard, don't it? They say widders don't mind it no more'n nothin.

But I'm makin a transgression, as the preacher ses.

Crismus eve I put on my new suit, and shaved my face as slick as a smoothin iron, and after tea went over to old Miss Stalhuses. As soon as I went into the parlor whar they was all settin round the fire, Miss Carline and Miss Kesiah both laughed right out.

"There! there!" ses they, "I told you so! I know'd it would be Joseph."

"What's I done, Miss Carline?" ses I.

"You come under little sister's chicken bone, and I believe she know'd you was comin when she put it over the door."

"No, I didn't—I didn't no such thing, now," ses Miss Mary, and her face blushed red all over.

"Oh, you needn't deny it," ses Miss Kesiah. "You belong to Joseph now, jest as sure as ther's any chaim in chicken bones."

I know'd that was a first rate chance to say something, but the dear little creeeter looked so sorry and kep blushin so, I couldn't say nothin zaetly to the pint! so I tuck a chair and reached up and tuck down the bone and put it in my pocket.

"What are you gwine to do with that old chicken bone now, Majer?" ses Miss Mary.

"I'm gwine to keep it as long as I live," ses I, "as a Crismus present from the handsomest gall in Georgia"

When I sed that, she blushed worse and worse

"Aint you shamed, Majer?" ses she

"Now you ought to give her a Crismus gift, Joseph, to keep all her life," sed Miss Carline

"Ah," ses old Miss Stallins, "when I was a gall we used to hang up our stockins——"

"Why, mother!" ses all of 'em, "to say stockins right before——"

Then I felt a little streaked too, cause they was all blushin as hard as they could

"Highty-tity!" ses the old lady—"what monstrous 'finement to be shore! I'd like to know what harm ther is in stockins

People now-a-days is gitting so mealy-mouthed they can't call nothing by its right name, and I don't see as they's any better than the old time people was When I was a gall like you, child, I used to hang up my stockins and git 'em full of presents"

The galls kep laughin and blushin

"Never mind," ses Miss Mary, "Majer's got to give me a Crismus gift—won't you, Majer?"

"Oh, yes," ses I, "you know I promised you one"

"But I didn't mean that," ses she

"I've got one for you, what I want you to keep all your life, but it would take a two bushel bag to hold it," ses I.

"Oh, that's the kind," ses she

"But will you promise to keep it as long as you live?" ses I

"Certainly I will, Majer"

—"Monstrous 'finement now-a-days—old people don't know nothin about perliteness," said old Miss Stallins, jest gwine to sleep with her nittin in her lap

"Now you hear that, Miss Carline," ses I "She ses she'll keep it all her life"

"Yes, I will," ses Miss Mary—"but what is it?"

"Never mind," ses I, "you hang up a bag big enough to hold it and you'll find out what it is, when you see it in the mornin"

Miss Carline winked at Miss Kesiah, and then whispered to her—then they both laughed and looked at me as mischievous as they could They 'spicioned something

"You'll be shore to give it to me now, if I hang up a bag," ses Miss Mary

"And promise to keep it," ses I

"Well, I will, cause I know that you wouldn't give me nothing that wasn't worth keepin"

They all agreed they would hang up a bag for me to put Miss Mary's Crismus present in, on the back porch, and about ten o'clock I told 'em good evenin and went home

I sot up till mid-night, and when they was all gone to bed I went softly into the back gate, and went up to the porch, and thar, shore enough, was a great big meal-bag hangin to the jice It was monstrous unhandy to git to it, and I was termed not to back out So I sot some chairs on top of a bench and got hold of the rope and let myself down into the bag, but jest as I was gittin in, it swung agin the chairs, and down they went with a terrible racket, but nobody didn't wake up but Miss Stallinses old cur dog, and here he come rippin and tearin through the yard like rath, and round and round he went tryin to find what was the matter I scrooch'd down in the bag and didn't breathe louder nor a kitten, for fear he'd find me out, and after awhile he quit barkin

The wind begun to blow bominable cold, and the old bag kep turnin round and swingin so it made me sea-sick as the mischief I was afraid to move for fear the rope would break and let me fall, and thar I sot with my teeth rattlin like I had a ager It seemed like it would never come daylight, and I do believe if I didn't love Miss Mary so powerful I would froze to death, for my heart was the only spot that felt warm, and it didn't beat more'n two heks a minit, only when I thought how she would be suprised in the mornin, and then it went in a canter Bimeby the cussed old dog come up on the porch and begun to smell about the bag, and then he barked

like he thought he'd treed something "Bow! wow! wow!" ses he Then he'd smell agin, and try to git up to the bag "Git out!" ses I, very low, for fear the galls mought hear me "Bow! wow!" ses he "Be gone! you bomnable fool," ses I, and I felt all over in spots, for I spected every minit he'd nip me, and what made it worse, I didn't know whar abouts he'd take hold "Bow! wow! wow!" Then I tried coaxin—"Come here, good fellow," ses I, and whistled a little to him, but it wasn't no use Thar he stood and kep up his everlastin whinin and barkin, all night I couldn't tell when daylight was breakin, only by the chickens crowin, and I was monstrous glad to hear 'em, for if I'd had to stay thar one hour more, I don't believe I'd ever got out of that bag alive

Old Miss Stallins come out fust, and as soon as she seed the bag, ses she,

"What upon veath has Joseph went and put in that bag for Mary? I'll lay its a yearlin or some live animal, or Bruin wouldn't bark at it so "

She went in to call the galls, and I sot thar, shiverin all over so I couldn't hardly speak if I tried to—but I didn't say nothin Bimeby they all come runnin out on the porch

"My goodness! what is it?" ses Miss Mary

"Oh, it's alive!" ses Miss Kesiah, "I seed it move "

"Call Cato, and make him cut the rope," ses Miss Carlina, "and lets see what it is Come here, Cato, and git this bag down "

"Don't hurt it for the world," ses Miss Mary

Cato untied the rope that was round the jice, and let the bag down easy on the floor, and I tumbled out all covered with corn meal, from head to foot

"Goodness gracious!" ses Miss Mary, "if it aint the Majer himself!"

"Yes," ses I, "and you know you promised to keep my Crismus present as long as you lived "

The galls laughed themselves almost to death, and went to brushin off the meal as

fast as they could, saying they was gwine to hang that bag up every Crismus till they got husbands too Miss Mary—bless her bight eyes—she blushed as beautiful as a morning-gloiy, and sed she'd stick to her word She was right out of bed, and her hair wasn't komed, and her dress wasn't fix'd at all, but the way she looked pretty was real distractin I do believe if I was froze stiff, one look at her sweet face, as she stood thar lookin down to the floor with her roguish eyes, and her bight curls fallin all over her snowy neck, would have foted me to I tell you what, it was worth hanging in a meal bag from one Crismus to another to feel as happy as I have ever sense

I went home after we had the laugh out, and sot by the fire till I got thawed In the forenoon all the Stallinses come over to our house and we had one of the greatest Crismus dinners that ever was seed in Georgia, and I don't believe a happier company ever sot down to the same table Old Miss Stallins and mother settled the match, and talked over every thing that ever happened in ther families, and laughed at me and Mary, and cied about ther dead husbands, cause they wasn't alive to see ther children married

It's all settled now, 'cept we haint sot the weddin day I'd like to have it all over at once, but young galls always like to be engaged a while, you know, so I spose I must wait a month or so Mary (she ses I mustn't call her Miss Mary now) has been a good deal of trouble and botheration to me, but if you could see her you wouldn't think I ought to grudge a little sufferin to git sich a sweet little wife

You must come to the weddin if you possibly kin, I'll let you know when No more from

Your friend, till death,

Jos Jones

NB I like to forgot to tell you about cousin Pete He got snapt on egnog when he heard of my ingagement, and he's been as meller as hoss-apple ever sense

From
 MAJOR JONES'S SKETCHES
 OF TRAVEL
 [1847]

THE HOOSIER AND THE SALT PILE

IT IS very refreshin in these days of progress, after rattlin over the country for days and nights, at the rate of twenty miles a ower in a railroad car—with your mouth full of dust and smoke, and with such a everlastin clatter in your ears that you can't hear yourself think—to git into a good, old-fashioned stage-coach. Ther's something sociable and cosey in stage-coach travellin, so different from the bustle and confusion of a railroad, whar people are whirled along "slam bang to eternal smash," like they wei so many bales and boxes of dry-goods and groceries, without so much as a chance of seen whar they're gwine, or of takin any interest in their feller sufferers. I love to hear the pop of the whip and the interestin conversation between the driver and his horses, and I like the constant variation in the motion of the stage, the rattle of the wheels over the stones, the stillness of the diag through the heavy sand, the lunging and pitching into the ruts and gulches, the slow pull up the steep hills, the rush down agin, and the splashin of the horses' feet and the wheels in the water and mud. And then one has time to see the country he's passin through, to count the rails in the panels of the fences, and the wimmen and children in the doors of the houses, to notice the appearance of the crops and the condition of the stock on the farms, and now and then to say a word to the people on the roadside. All these things is plea-ant, after a long voyage on the railroad. But what's still more agreeable about stage-coach travelin, is that we have a opportunity of makin the acquaintance of our teller passengers, of conversin with 'em and studdyn their traits of character, which from the stikin contrast they often pre-

sent, never fail to amuse if they don't interest our mind.

Some years ago I had a tolerably fair specimen of a stage-coach ride from Warrenton to Milledgeville. The road wasn't the best in the world, and didn't run through the most interestin part of Georgia, but we had a good team, a good stage, and a first-rate driver, what could sing like a camp-meetin and whistle like a locomotive, and the company was jest about as good a one as could be jumped up for sich a occasion. Ther was nine of us besides the driver, and I don't believe ther ever was a crowd of the same number that presented a greater variety of characters. Ther was a old gentleman in black, with big round spectacles, and a gold headed cane, a dandy gambler, with a big diamond breast-pin and more gold chains hangin round him than would hang him, a old hardshell preacher, as they call 'em in Georgia, with the biggest mouth and the ugliest teeth I ever seed, a circus clown, whose breath smelled strong enough of whiskey to upset the stage, a cross old maid, as ugly as a tar-bucket, a butiful young school-gall, with rosy cheeks and mischevous bright eyes, a cattle-drover from Indiany, who was gwine to New Orleans to git a army contract for beef, and myself.

For a while after we started from Warrenton nobody didn't have much to say. The young lady put her green vail over her face and leaned her head back in the corner, the old maid, after a row with the driver about her band-boxes, sot up straight in her seat and looked as sharp as a steel-trap, the old gentleman with the spectacles drummed his fingers on his cane and looked out of the coach-winder, the circus-man tried to look interestin, the gambler went to sleep, the preacher looked solemn, and the hoosier stuck his head out of the winder on his side to look at the cattle what we passed every now and then.

"This aint no great stock county," ses he to the old gentleman with the speers.

"No, sir," ses the old gentleman. "There's

very little grazing here. The range in these parts is pretty much worn out."

Then there was nothing said for some time. Bimeby the hoosier opened agin

"It's the d——st place for 'simmon-trees and turkey-buzzards I ever did see."

The old gentleman didn't say nothin, and the preacher fetched a long groan. The young lady smiled through her veil, and the old maid snapped her eyes and looked sideways at the speaker.

"Don't make much beef down here, I reckon," ses the hoosier.

"No," ses the old gentleman.

"Well, I don't see how in the h——l they manage to live in a country whar there aint no ranges, and they don't make no beef. A man aint considered worth a cuss in Indiany whar hasn't got his brand on a hundred head or so of cattle."

"Your's is a great beef country, I believe," ses the old gentleman.

"Well, sir, it aint nothing else. A man that's got sense enough to foller his own cow-bell, with us, aint no danger of starvin. I'm gwine down to Orleans to see if I can't git a contract out of Uncle Sam, to feed the boys whar's been hekin them infernal Mexicans so bad. I spose you've seed them cussed hes whar's been in the newspapers about the Indiany boys at Bona Vista?"¹

"I've read some accounts of the battle," ses the old gentleman, "that didn't give a very flattering account of the conduct of some of our troops."

With that, the Indiany man went into a full explanation of the affair, and gittin warmed up as he went along, begun to cuss and swear like he'd been through a dozen campaigns himself.

The old preacher listened to him with evident signs of displeasure, twistin and groanin every time he uttered a big oath, until he couldn't stand it no longer.

"My friend," ses he, "you must excuse me, but your conversation would be a great deal more interestin to me, and I'm sure it would please the company much better, if you wouldn't swear so terribly. It's

very wicked to swear so, and I hope you'll have respect for our religious feelins, if you han't got no respect for your Maker."

If the hoosier had been struck with a clap of thunder and lightning he couldn't have been more completely tuck abaek. He shut his mouth right in the middle of what he was sayin, and looked at the preacher, while his face got as red as fire.

"Swearin," continued the old hardshell, "is a terrible bad praetise, and there aint no use in it no how. The Bible says 'swear not at all,' and I spose you know the commandments about taking the Lord's name in vain."

The hoosier didn't open his mouth.

"I know," ses the old preacher, "a great many people swear without thinkin, and that some people don't believe in the Bible."

And then he went on to preach a regular sermon agin, and to quote the Scripture like he knowed the whole Bible by heart. In the course of his argyments he undertook to prove the Scriptures to be true, and told us all about the miracles and prophecies and their fulfillment. The old gentleman with the cane tuck a part in the conversation, and the hoosier listened without ever once openin his head.

"I've jest heard of a gentleman," sed the preacher, "what has been to the Holy Land, and went all over the Bible country. It's astomishin what wonderful things he seed thar. He was at Sodom and Gomorrow, and seed the place whar Lot's wife fell!"

"Ah?" ses the old gentleman with the spees.

"Yes," ses the preacher. "He went to the very spot, and what's the most remarkablest thing of all, he seed the pillar of salt what she was turned into."

"Is it possible?" ses the old gentleman.

The hoosier's countenance all at once brightened up, and he opened his mouth wide.

¹ Battle of Buena Vista, Feb 22-23, 1847

"Yes, sir, he seed the salt standin thar to this day"

The hoosier's curiosity was raised to a pint beyond endurance

"What!" ses he, "real genewine good salt?"

"Yes, sir, a pillar of salt jest as it was when that wicked woman was punished for her disobedience"

All but the gambler, who was snoozin in the corner of the coach, looked at the

preacher—the hoosier with an expression of countenance that plainly told that his mind was powerfully convicted of a important fact

"Standin right out in the open air?" he axed

"Yes, sir,—right out in the open field where she fell"

"Well," ses the hoosier, "all I've got to say is, if she'd drap'd in Indriany, the cattle would lick'd her up long ago!"

1815 ~ Thomas Bangs Thorpe ~ 1878

THORPE'S story "The Big Bear of Arkansas" is the most notable monument of a man of singular diversity of talent and occupation

Thorpe was born in Massachusetts, the son of a clergyman, and showed precocious ability in painting. At sixteen he painted a picture which illustrated one of Irving's stories and was exhibited at the New York Academy of Fine Arts and later hung in Irving's home at Sunnyside. At eighteen he entered college, but left shortly to go to Louisiana because of his health.

Thorpe remained in the Southwest for twenty years, working as painter, editor, and writer. He became widely known in the region for his pictorial studies of prairie life and his portraits of such celebrated persons as Jenny Lind and Zachary Taylor. He had a share in the editing of at least five newspapers. His stories were printed in *The Spirit of the Times*, and other periodicals, praised in England, and translated in Europe. He was attached to Taylor's staff during the Mexican War, and wrote three books based on that experience. He later attempted novels, but none of his works of book length was equal in merit to some of his early short stories.

[Note F. J. Meine's article on Thorpe in *Dictionary of American Biography*, and that of A. N. De Menil in *The Literature of Louisiana Territory* (St. Louis, 1904), pp. 138-139.]

THE BIG BEAR OF ARKANSAS [1845 (1841)]

A STEAMBOAT on the Mississippi frequently, in making her regular trips, carries between places varying from one to two thousand miles apart, and as these boats advertise to land passengers and freight at "all intermediate landings," the heterogeneous character of the passengers of one of these up-country boats can

scarcely be imagined by one who has never seen it with his own eyes. Starting from New Orleans in one of these boats, you will find yourself associated with men from every state in the Union, and from every portion of the globe, and a man of observation need not lack for amusement or instruction in such a crowd, if he will take the trouble to read the great book of character so favourably opened before him. Here may be seen jostling together the

wealthy Southern planter, and the pedler of tin-ware from New England—the Northern merchant, and the Southern jockey—a venerable bishop, and a desperate gambler—the land speculator, and the honest farmer—professional men of all creeds and characters—Wolvereens, Suckers, Hoosiers, Buckeyes, and Cornercrackers, beside a “plentiful sprinkling” of the half-horse and half-alligator species of men, who are peculiar to “old Mississippi,” and who appear to gain a livelihood simply by going up and down the river. In the pursuit of pleasure or business, I have frequently found myself in such a crowd.

On one occasion, when in New Orleans, I had occasion to take a trip of a few miles up the Mississippi, and I hurried on board the well-known “high-pressure-and-beat-every-thing” steamboat “Invincible,” just as the last note of the last bell was sounding, and when the confusion and bustle that is natural to a boat’s getting under way had subsided, I discovered that I was associated in as heterogeneous a crowd as was ever got together. As my trip was to be of a few hours’ duration only, I made no endeavours to become acquainted with my fellow passengers, most of whom would be together many days. Instead of this, I took out of my pocket the “latest paper,” and more critically than usual examined its contents, my fellow passengers at the same time disposed themselves in little groups. While I was thus busily employed in reading, and my companions were more busily still employed in discussing such subjects as suited their humours best, we were startled most unexpectedly by a loud Indian whoop, uttered in the “social hall,” that part of the cabin fitted off for a bar, then was to be heard a loud crowing, which would not have continued to have interested us—such sounds being quite common in that *place of spirits*—had not the hero of these windy accomplishments stuck his head into the cabin and hallooed out, “Hurra for the Big Bar of Arkansaw!” and then might be heard a confused hum of voices, unintelligi-

ble, save in such broken sentences as “hoise,” “screamer,” “lightning is slow,” &c. As might have been expected, this continued interruption attracted the attention of every one in the cabin, all conversation dropped, and in the midst of this surprise the “Big Bar” walked into the cabin, took a chair, put his feet on the stove, and looking back over his shoulder, passed the general and familiar salute of “Strangers, how are you?” He then expressed himself as much at home as if he had been at “the Forks of Cypress,” and “perhaps a little more so.” Some of the company at this familiarity looked a little angry, and some astonished, but in a moment every face was wreathed in a smile. There was something about the intruder that won the heart on sight. He appeared to be a man enjoying perfect health and contentment; his eyes were as sparkling as diamonds, and good-natured to simplicity. Then his perfect confidence in himself was irresistibly droll. “Perhaps,” said he, “gentlemen,” running on without a person speaking, “perhaps you have been to New Orleans often, I never made *the first visit before*, and I don’t intend to make another in a crow’s life. I am thrown away in that ar place, and useless, that ar a fact. Some of the gentlemen thar called me *green*—well, perhaps I am, said I, *but I arn’t so at home*, and if I aint off my trail much, the heads of them perlite chaps themselves weren’t much the hardest, for according to my notion, they were *real know-nothings*, green as a pumpkin-vine—couldn’t, in farming, I’ll bet, raise a crop of turnips. And as for shooting, they’d miss a barn if the door was swinging, and that, too, with the best rifle in the country. And then they talked to me ’bout hunting, and laughed at my calling the principal game in Arkansaw poker, and high-low-jack. ‘Perhaps,’ said I, ‘you prefer chickens and rolette’, at this they laughed harder than ever, and asked me if I hved in the woods, and didn’t know what *game* was? At this I rather think I laughed. ‘Yes,’ I roared, and says, ‘Strangers, if you’d asked me *how we got our*

meat in Arkansaw, I'd a told you at once, and given you a list of varmints that would make a caravan, beginning with the bar, and ending off with the cat, that's *meat* though, not game' Game, indeed, that's what city folks call it, and with them it means chuppen-birds and shite-pokes, maybe such trash live in my diggins, but I arn't noticed them yet a bird any way is too trifling I never did shoot at but one, and I'd never forgiven myself for that, had it weighed less than forty pounds I wouldn't draw a rifle on any thing less than that, and when I meet with another wild turkey of the same weight I will diap him "

"A wild turkey weighing forty pounds " exclaimed twenty voices in the cabin at once.

"Yes, strangers, and wasn't it a whopper? You see, the thing was so fat that it couldn't fly far, and when he fell out of the tree, after I shot him, on striking the ground he bust open behind, and the way the pound gobs of tallow rolled out of the opening was perfectly beautiful "

"Where did all that happen?" asked a cymical-looking Hoosier.

"Happen' happened in Arkansaw where else could it have happened, but in the creation state, the finishing-up country—a state where the *sile* runs down to the centie of the 'arth, and government gives you a title to every inch of it? Then its airs—just breathe them, and they will make you snort like a horse It's a state without a fault, it is "

"Excepting mosquitoes," cried the Hoosier.

"Well, stranger, except them, for it ar a fact that they are rather *enormous*, and do push themselves in somewhat troublesome But, stranger, they never stick twice in the same place, and give them a fair chance for a few months, and you will get as much above noticing them as an alligator. They can't hurt my feelings, for they lay under the skin, and I never knew but one case of injury resulting from them, and that was to a Yankee and they take voise to foreigners, any how, than they do

to natives But the way they used that fellow up' first they punched him until he swelled up and busted, then he sup-per-ated, as the doctor called it, until he was as raw as beef, then he took the ager, owing to the warm weather, and finally he took a steamboat and left the country He was the only man that ever took mosquitoes to heart that I know of But mosquitoes is natur, and I never find fault with her If they ar large, Arkansaw is large, her varmints ar large, her trees ar large, her rivers ar large, and a small mosquito would be of no more use in Arkansaw than preaching in a cane-brake "

This knock-down argument in favour of big mosquitoes used the Hoosier up, and the logician started on a new track, to explain how numerous bear were in his "diggins," where he represented them to be "about as plenty as blackberries, and a little plentifuler "

Upon the utterance of this assertion, a timid little man near me inquired if the bear in Arkansaw ever attacked the settlers in numbers.

"No," said our hero, warming with the subject, "no, stranger, for you see it an't the natur of bar to go in droves, but the way they squander about in pairs and single ones is edifying And then the way I hunt them—the old black rascals know the crack of my gun as well as they know a pig's squealing They grow thin in our parts, it frightens them so, and they do take the noise dreadfully, poor things That gun of mine is a perfect *epidemic among bar* if not watched closely, it will go off as quick on a warm scent as my dog Bowie-knife will and then that dog—whew! why the fellow thinks that the world is full of bar, he finds them so easy It's lucky he don't talk as well as think, for with his natural modesty, if he should suddenly learn how much he is acknowledged to be ahead of all other dogs in the universe, he would be astonished to death in two minutes Stranger, that dog knows a bar's way as well as a horse-jockey knows a woman's he always barks at the right

time, bites at the exact place, and whips without getting a scratch. I never could tell whether he was made expressly to hunt bar, or whether bar was made expressly for him to hunt. Any way, I believe they were ordained to go together as naturally as Squire Jones says a man and woman is, when he moralizes in marrying a couple. In fact, Jones once said, said he, 'Marriage according to law is a civil contract of divine origin, it's common to all countries as well as Arkansaw, and people take to it as naturally as Jim Doggett's Bowie-knife takes to bar.'

"What season of the year do your hunts take place?" inquired a gentlemanly foreigner, who, from some peculiarities of his baggage, I suspected to be an Englishman, on some hunting expedition, probably at the foot of the Rocky Mountains.

"The season for bar hunting, stranger," said the man of Arkansaw, "is generally all the year round, and the hunts take place about as regular. I read in history that varmints have their fat season, and their lean season. That is not the case in Arkansaw, feeding as they do upon the *spontaneous* productions of the soil, they have one continued fat season the year round, though in winter things in this way is rather more greasy than in summer, I must admit. For that reason bar with us run in warm weather, but in winter they only waddle. Fat, fat! it's an enemy to speed, it tames every thing that has plenty of it. I have seen wild turkeys, from its influence, as gentle as chickens. Run a bar in this fat condition, and the way it improves the critter for eating is amazing, it sort of mixes the ile up with the meat, until you can't tell t'other from which I've done this often. I recollect one perty morning in particular, of putting an old he fellow on the stretch, and considering the weight he carried, he run well. But the dogs soon tired him down, and when I came up with him wasn't he in a beautiful sweat—I might say fever, and then to see his tongue sticking out of his mouth a feet, and his sides sinking and opening like a

bellows, and his cheeks so fat he couldn't look cross. In this fix I blazed at him, and pitch me naked into a briar patch if the steam didn't come out of the bullet-hole ten foot in a straight line. The fellow, I reckon, was made on the high-pressure system, and the lead sort of bust his boiler."

"That column of steam was rather curious, or else the bear must have been *warm*," observed the foreigner with a laugh.

"Stranger, as you observe, that bar was warm, and the blowing off of the steam show'd it, and also how hard the varmint had been run. I have no doubt if he had kept on two miles farther his insides would have been stewed, and I expect to meet with a varmint yet of extra bottom, who will run himself into a skinfull of bar's grease. It is possible, much onliker things have happened."

"Whereabouts are these bears so abundant?" inquired the foreigner, with increasing interest.

"Why, stranger, they inhabit the neighbourhood of my settlement, one of the prettiest places on old Mississippi—a perfect location, and no mistake, a place that had some defects until the river made the 'cut-off' at 'Shirt-tail bend,' and that remedied the evil, as it brought my cabin on the edge of the river—a great advantage in wet weather, I assure you, as you can now roll a barrel of whiskey into my yard in high water from a boat, as easy as falling off a log. It's a great improvement, as toting it by land in a jug, as I used to do, *evaporated* it too fast, and it became expensive. Just stop with me, stranger, a month or two, or a year if you like, and you will appreciate my place. I can give you plenty to eat, for beside hog and hominy, you can have bar-ham, and bar-sausages, and a mattress of bar-skins to sleep on, and a wildeat-skin, pulled off hull, stuffed with corn-shucks, for a pillow. That bed would put you to sleep if you had the rheumatics in every joint in your body. I call that ar bed a *quietus*. Then look at my land—the government ain't got another such a piece to dispose of. Such timber, and

such bottom land, why you can't preserve any thing natural you plant in it unless you pick it young, things thar will grow out of shape so quick I once planted in those diggins a few potatoes and beets they took a fine start, and after that an ox team couldn't have kept them from growing. About that time I went off to old Kentuck on business, and did not hear from them things in three months, when I accidentally stumbled on a fellow who had stopped at my place, with an idea of buying me out "How did you like things?" said I 'Pretty well,' said he, 'the cabin is convenient, and the timber land is good, but that bottom land ain't worth the first red cent' 'Why?' said I "'Cause,' said he "'Cause what?" said I "'Cause it's full of cedar stumps and Indian mounds,' said he, 'and *it can't be cleared*' 'Lord,' said I, 'them ar "cedar stumps" is beets, and them ar "Indian mounds" ar tater hills' As I expected, the crop was overgrown and useless the sile is too rich, *and planting in Arkansaw is dangerous* I had a good-sized sow killed in that same bottom land The old thief stole an ear of corn, and took it down where she slept at night to eat Well, she left a grain or two on the ground, and lay down on them before morning the corn shot up, and the percussion killed her dead I don't plant any more natur intended Aikansaw for a hunting ground, and I go according to natur"

The questioner who thus elicited the description of our hero's settlement, seemed to be perfectly satisfied, and said no more, but the "Big Bar of Arkansaw" rambled on from one thing to another with a volubility perfectly astonishing, occasionally disputing with those around him, particularly with a "live Sucker" from Illinois, who had the daring to say that our Aikansaw friend's stories "smelt rather tall"

In this manner the evening was spent, but conscious that my own association with so singular a personage would probably end before morning, I asked him if he would not give me a description of some particular bear hunt, adding, that I took

great interest in such things, though I was no sportsman The desire seemed to please him, and he squared himself round towards me, saying, that he could give me an idea of a bar hunt that was never beat in this world, or in any other His manner was so singular, that half of his story consisted in his excellent way of telling it, the great peculiarity of which was, the happy manner he had of emphasizing the prominent parts of his conversation As near as I can recollect, I have italicized them, and given the story in his own words

"Stranger," said he, "in bar hunts *I am numerous*, and which particular one, as you say, I shall tell, puzzles me There was the old she devil I shot at the Hurricane last fall—then there was the old hog thief I popped over at the Bloody Crossing, and then—Yes, I have it! I will give you an idea of a hunt, in which the greatest bar was killed that ever lived, *none excepted*, about an old fellow that I hunted, more or less, for two or three years, and if that ain't a *particular bar hunt*, I ain't got one to tell But in the first place, stranger, let me say, I am pleased with you, because you ain't ashamed to gain information by asking, and listening, and that's what I say to Countess's pups every day when I'm home, and I have got great hopes of them ar pups, because they are continually *nosing* about, and though they stick it sometimes in the wrong place, they gain experience any how, and may learn something useful to boot Well, as I was saying about this big bar, you see when I and some more first settled in our region, we were driven to hunting naturally, we soon liked it, and after that we found it an easy matter to make the thing our business One old chap who had pioneered 'afore us, gave us to understand that we had settled in the right place He dwelt upon its merits until it was affecting, and showed us, to prove his assertions, more marks on the sassafras trees that I ever saw on a tavern door 'lection time 'Who keeps that ar reckoning?' said I 'The bar,' said he 'What for?' said I, 'Can't tell,' said he, 'but so it

is the bar bite the bark and wood too, at the highest point from the ground they can reach, and you can tell, by the marks,' said he, 'the length of the bar to an inch' 'Enough,' said I, 'I've learned something here a'ready, and I'll put it in practice'

"Well, stranger, just one month from that time I killed a bar, and told its exact length before I measured it, by those very marks, and when I did that, I swelled up considerable—I've been a prouder man ever since. So I went on, larning something every day, until I was reckoned a buster, and allowed to be decidedly the best bar hunter in my district, and that is a reputation as much harder to earn than to be reckoned first man in Congress, as an iron ramrod is harder than a toad-stool. Did the varmints grow over-cunning by being fooled with by green-horn hunters, and by this means get troublesome, they send for me as a matter of course, and thus I do my own hunting, and most of my neighbours' I walk into the varmints though, and it has become about as much the same to me as drinking. It is told in two sentences—a bar is started, and he is killed. The thing is somewhat monotonous now—I know just how much they will run, where they will tire, how much they will growl, and what a thundering time I will have in getting them home. I could give you this history of the chase with all the particulars at the commencement, I know the signs so well—*Stranger, I'm certain*. Once I met with a match though, and I will tell you about it, for a common hunt would not be worth relating.

"On a fine fall day, long time ago, I was trailing about for bar, and what should I see but fresh marks on the sassafras trees, about eight inches above any in the forests that I knew of. Says I, 'them marks is a hoax, or it indicates the d——t bar that was ever grown.' In fact, stranger, I couldn't believe it was real, and I went on. Again I saw the same marks, at the same height, and I *knew the thing lived*. That conviction came home to my soul like an earthquake. Says I, 'here is something

a-purpose for me that bar is mine, or I give up the hunting business.' The very next morning what should I see but a number of buzzards hovering over my corn field. 'The rascal has been there,' said I, 'for that sign is certain' and, sure enough, on examining, I found the bones of what had been as beautiful a hog the day before, as was ever raised by a Buckeye. Then I tracked the critter out of the field to the woods, and all the marks he left behind, showed me that he was *the bar*.

"Well, stranger, the first fair chase I ever had with that big critter, I saw him no less than three distinct times at a distance—the dogs run him over eighteen miles and broke down, my horse gave out, and I was as nearly used up as a man can be, made on *my* principle, *which is patent*. Before this adventure, such things were unknown to me as possible, but, strange as it was, that bar got me used to it before I was done with him, for he got so at last, that he would leave me on a long chase *quite easy*. How he did it, I never could understand. That a bar runs at all, is puzzling, but how this one could tire down and bust up a pack of hounds and a horse, that were used to overhauling everything they started after in no time, was past my understanding. Well, stranger, that bar finally got so sassy, that he used to help himself to a hog off my premises whenever he wanted one, the buzzards followed after what he left, and so, between *bar and buzzard*, I rather think I was *out of pork*.

"Well, missing that bar so often took hold of my vitals, and I wasted away. The thing had been carried too far, and it reduced me in flesh faster than an ager. I would see that bar in every thing I did *he hunted me*, and that, too, like a devil, which I began to think he was. While in this fix, I made preparations to give him a last brush, and be done with it. Having completed every thing to my satisfaction, I started at sunrise, and to my great joy, I discovered from the way the dogs run, that they were near him, finding his trail was nothing, for that had become as plain

to the pack as a turnpike road. On we went, and coming to an open country, what should I see but the bar very leisurely ascending a hill, and the dogs close at his heels, either a match for him this time in speed, or else he did not care to get out of their way—I don't know which. But wasn't he a beauty, though? I loved him like a brother.

"On he went, until he came to a tree, the limbs of which formed a crotch about six feet from the ground. Into this crotch he got and seated himself, the dogs yelling all around it, and there he sat eyeing them as quiet as a pond in low water. A green-horn friend of mine, in company, reached shooting distance before me, and blazed away, hitting the critter in the centre of his forehead. The bar shook his head as the ball struck it, and then walked down from that tree as gently as a lady would from a carriage. 'Twas a beautiful sight to see him do that—he was in such a rage that he seemed to be as little afraid of the dogs as if they had been sucking pigs, and the dogs wasn't slow in making a ring around him at a respectful distance, I tell you, even Bowie-knife, himself, stood off. Then the way his eyes flashed—why the fire of them would have singed a cat's hair, in fact that bar was in a *wrath all over*. Only one pup came near him, and he was brushed out so totally with the bar's left paw, that he entirely disappeared, and that made the old dogs more cautious still. In the mean time, I came up, and taking deliberate aim as a man should do, at his side, just back of his foreleg, *if my gun did not snap*, call me a coward, and I won't take it personal. Yes, stranger, *it snapped*, and I could not find a cap about my person. While in this predicament, I turned round to my fool friend—says I, 'Bill,' says I, 'you're an ass—you're a fool—you might as well have tried to kill that bar by barking the tree under his belly, as to have done it by hitting him in the head. Your shot has made a tiger of him, and blast me, if a dog gets killed or wounded when they come to blows, I will

stick my knife into your liver, I will'—my wiath was up. I had lost my caps, my gun had snapped, the fellow with me had fired at the bar's head, and I expected every moment to see him close in with the dogs, and kill a dozen of them at least. In this thing I was mistaken, for the bar leaped over the ring formed by the dogs, and giving a fierce growl, was off—the pack, of course, in full cry after him. The run this time was short, for coming to the edge of a lake the varmint jumped in, and swam to a little island in the lake, which it reached just a moment before the dogs. 'I'll have him now,' said I, for I had found my caps in the *huing of my coat*—so, rolling a log into the lake, I paddled myself across to the island, just as the dogs had cornered the bar in a thicket. I rushed up and fired—at the same time the critter leaped over the dogs and came within three feet of me, running like mad, he jumped into the lake, and tried to mount the log I had just deserted, but every time he got half his body on it, it would roll over and send him under, the dogs, too, got around him, and pulled him about, and finally Bowie-knife clenched with him, and they sunk into the lake together. Stranger, about this time I was excited, and I stripped off my coat, drew my knife, and intended to have taken a part with Bowie-knife myself, when the bar rose to the surface. But the varmint staid under—Bowie-knife came up alone, more dead than alive, and with the pack came ashore. 'Thank God,' said I, 'the old villain has got his deserts at last.' Determined to have the body, I cut a grape-vine for a rope, and dove down where I could see the bar in the water, fastened my queer rope to his leg, and fished him, with great difficulty, ashore. Stranger, may I be chewed to death by young alligators, if the thing I looked at wasn't *a she bar*, and not the old critter after all. The way matters got mixed on that island was on-accountably curious, and thinking of it made me more than ever convinced that I was hunting the devil himself. I went home that night and took to my bed—the thing

was killing me. The entire team of Arkansas saw in bar-hunting, acknowledged himself used up, and the fact sunk into my feelings like a snagged boat will in the Mississippi. I grew as cross as a bar with two cubs and a sore tail. The thing got out 'mong my neighbours, and I was asked how come on that individ-u-al that never lost a bar when once started? And if that same individ-u-al didn't wear telescopes when he turned a she bar, of ordinary size, into an old he one, a little larger than a horse? 'Perhaps,' said I, 'friends'—getting wrathful—'perhaps you want to call somebody a liar.' 'Oh, no,' said they, 'we only heard such things as being *rather common* of late, but we don't believe one word of it, oh, no,'—and then they would ride off and laugh like so many hyenas over a dead nigger. It was too much, and I determined to catch that bar, go to Texas, or die,—and I made my preparations accordin'. I had the pack shut up and rested. I took my rifle to pieces, and iled it. I put caps in every pocket about my person, *for fear of the lining*. I then told my neighbours, that on Monday morning—naming the day—I would start THAT BAR, and bring him home with me, or they might divide my settlement among them, the owner having disappeared. Well, stranger, on the morning previous to the great day of my hunting expedition, I went into the woods near my house, taking my gun and Bowie-knife along, just *from habit*, and there sitting down also from habit, what should I see, getting over my fence, but *the bar*! Yes, the old varmint was within a hundred yards of me, and the way he walked *over that fence*—stranger, he loomed up like a *black mist*, he seemed so large, and he walked right towards me. I raised myself, took deliberate aim, and fired. Instantly the varmint wheeled, gave a yell, and *walked through the fence* like a falling tree would through a cobweb. I started after, but was tripped up by my inexpressibles, which either from habit, or the excitement of the moment, were about my heels, and before I had really gathered myself up, I heard the old

varmint groaning in a thicket near by, like a thousand sunners, and by the time I reached him he was a corpse. Stranger, it took five niggers and myself to put that carcase on a mule's back, and old long-ears waddled under his load, as if he was foundered in every leg of his body, and with a common whopper of a bar, he would have trotted off, and enjoyed himself. 'Twould astonish you to know how big he was. I made a *bed-spread of his skin*, and the way it used to cover my bar mattress, and leave several feet on each side to tuck up, would have delighted you. It was in fact a creation bar, and if it had lived in Samson's time, and had met him, in a fair fight, it would have licked him in the twinkling of a dice-box. But, stranger, I never liked the way I hunted him, *and missed him*. There is something curious about it, I could never understand,—and I never was satisfied at his giving in so *easy at last*. Perhaps, he had heard of my preparations to hunt him the next day, so he just come in, like Capt. Scott's coon, to save his wind to grunt with in dying, but that ain't likely. My private opinion is, that that bar was an *unhunnable bar, and died when his time come*."

When the story was ended, our hero sat some minutes with his auditors in a grave silence, I saw there was a mystery to him connected with the bear whose death he had just related, that had evidently made a strong impression on his mind. It was also evident that there was some superstitious awe connected with the affair,—a feeling common with all "children of the wood," when they meet with any thing out of their everyday experience. He was the first one, however, to break the silence, and jumping up, he asked all present to "liquor" before going to bed,—a thing which he did, with a number of companions, evidently to his heart's content.

Long before day, I was put ashore at my place of destination, and I can only follow with the reader, in imagination, our Arkansas friend, in his adventures at the "Forks of Cypress" on the Mississippi.

III

HUMANITARIANISM IN NEW ENGLAND

1811 ~ *Horace Greeley* ~ 1872

A MAN who had left school at fourteen to earn his own living, after a lonely boyhood on a poverty-stricken New England farm, and who had apprenticed himself to a New York printer at twenty, for twenty-five dollars a month, was qualified to understand the social phenomena of unemployment and destitution in the metropolis in 1837. Greeley had come to New York in 1830. He spent ten years in building the modest capital and reputation which he risked in founding the *New York Tribune* in 1841. In another ten years he had attained relative wealth and wide influence with the *Tribune's* development as one of the most successful of American newspapers and a major force in national life.

Economic radicalism and leadership in many reforms marked the *Tribune's* policy. The paper was Greeley's personal organ—though he was markedly successful in choosing able associates—and it expressed the moral earnestness and passionate social concern of the man himself.

In the late 1850's the weekly edition of the *Tribune* had attained a circulation of 200,000—very large for those days—and was the political Bible of the West and upstate New York. But Greeley lost prestige during the Civil War through his vacillation in support of Lincoln and his demands for peace. The end of his life was tragic. Unfortunatly persuaded by politicians and his own ambition to run for president in 1872, he was defeated by Grant in all but six states. Greeley's wife died on the eve of the election, and Greeley himself a few weeks thereafter.

[*The Autobiography of Horace Greeley, or Recollections of a Busy Life* (New York, 1868), is for the most part candid in its account of Greeley's own career, and shrewd in its comment on men and events. The general development of newspaper journalism and the part newspapers played in the controversies of the period are surveyed in Frank Luther Mott's *American Journalism* (New York, 1941). The best biography of Greeley is that by Don C. Seitz (Indianapolis, 1926), though the more recent one by H. L. Stoddard (New York, 1946) adds some important material.]

From
THE AUTOBIOGRAPHY OF
HORACE GREELEY
[1868]

SOCIALISM

THE WINTER of 1837-38, though happily mild and open till far into January, was

one of pervading destitution and suffering in our city,¹ from paralysis of business and consequent dearth of employment. The liberality of those who could and would give was heavily taxed to save from famishing the tens of thousands who, being

¹ New York City.

needy and unable to find employment, first ran into debt so far as they could, and thenceforth must be helped or starve. For, in addition to all who may be said to belong here, legions of laborers, servants, etc., are annually dismissed in Autumn from the farms, country-seats, and watering-places of the suburban districts, and drift down to the city, whence they were mainly hired, vaguely hoping to find work here, which a small part of them do. They rest live on the good-nature of relatives, if such they have here, or on credit from boarding-houses, landlords, or grocers, so long as they can, and then make their choice between idleness and beggary, or change from this to that, or take them mixed, as chance may dictate. Since the general diffusion of railroads and the considerable extension of our manufacturing industry, business is far more equable than it was, even in prosperous times, thirty years ago, but Winter is still a season of privation and suffering to many thousands who live in tolerable comfort through the warmer seasons. To say that ten thousand young persons here annually take their first lessons in debauchery and crime would be to keep quite within the truth, and, while passion, ignorance, and miseducation ruin their thousands, I judge that destitution flowing from involuntary idleness sends more men and women to perdition, in this city, than any other cause,—intemperance possibly excepted.

I lived that Winter in the Sixth Ward,—then, as now, eminent for filth, squalor, rags, dissipation, want, and misery. A public meeting of its citizens was duly held early in December, and an organization formed thereat, by which committees were appointed to canvass the Ward from house to house, collect funds from those who could and would spare anything, ascertain the nature and extent of the existing destitution, and devise ways and means for its systematic relief. Very poor myself, I could give no money, or but a mite, so I gave time instead, and served, through several days, on one of the visiting com-

mittees. I thus saw extreme destitution more closely than I had ever before observed it, and was enabled to scan its repulsive features intelligently. I saw two families, including six or eight children, burrowing in one cellar under a stable,—a prey to famine on the one hand, and to vermin and cutaneous maladies on the other, with sickness adding its horrors to those of a polluted atmosphere and a wintry temperature. I saw men who each, somehow, supported his family on an income of \$5 per week or less, yet who cheerfully gave something to mitigate the sufferings of those who were *really* poor. I saw three widows, with as many children, living in an attic on the profits of an apple-stand which yielded less than \$3 per week, and the landlord came in for a full third of that. But worst to bear of all was the pitiful plea of stout, resolute young men and young women: "We do not want alms, we are not beggars, we hate to sit here day by day idle and useless, help us to work,—we want no other help. Why is it that we can have nothing to do?"

I pondered these scenes at intervals throughout the next two or three years, and was impelled thereby to write for *The New-Yorker*—I think, in the Winter of 1839-40—a series of articles entitled, "What shall be done for the Laborer?" I believe these attracted the attention of Mr. Albert Brisbane, a young man of liberal education and varied culture, a native of Batavia, N. Y., which he still regarded as his home, but who had travelled widely and observed thoughtfully, making the acquaintance in Paris of the school of Socialists called (after their founder)² St. Simonians, and that also of Charles Fourier,³ the founder of a different school, which had been distinguished by his name Robert Owen,⁴ by his experiments at New Lanark and his "New Views of Society," was the first in

² Claude Henri, Count de Saint-Simon, (1760-1825), French soldier and social philosopher

³ French socialist (1772-1837)

⁴ British social reformer (1771-1858)

this century to win public attention to Socialism, though (I believe) Fourier had not only speculated, but written, before either of his co-laborers. But Owen was an extensive and successful manufacturer, St Simon was a soldier, and the heir of a noble family, while Fourier was a poor clerk, reserved and taciturn, whose hard, dogmatic, algebraic style seemed expressly calculated to discourage readers and repel adherents, so that his disciples were few indeed, down to the date of his death in 1837. Mr Brisbane,⁵ returning not long afterward from Europe, prepared and published his first work—which was an exposition and commendation of Fourier's industrial system—in 1840. My acquaintance with the author and his work commenced soon afterward.

I sum up these three competing projects of Social Reform as follows —

Owen—Place human beings in proper relations, under favoring circumstances (among which I include Education and Intelligence), and they will do right rather than wrong. Hitherto, the heritage of the great majority has been filth, squalor, famine, ignorance, superstition, and these have impelled many to indolence and vice, it not to crime. Make their external conditions what they should be, and these will give place to industry, sobriety, and virtue.

St Simon—"Love is the fulfilling of the law." Secure to every one opportunity, let each do whatever he can do best, and the highest good of the whole will be achieved and perpetuated.

Fourier—Society, as we find it, is organized rapacity. Half of its force is spent in repressing or resisting the jealousies and rogueries of its members. We need to organize Universal Justice based on Science. The true Eden lies before, not behind us. We may so provide that Labor, now repulsive, shall be attractive, while its efficiency in production shall be increased by the improvement of machinery and the extended use of natural forces, so as to secure abundance, education, and elegant luxury, to all. What is needed is to

provide all with homes, employment, instruction, good living, the most effective implements, machinery, etc., securing to each the fair and full recompense of his achievement, and this can best be attained through the association of some four to five hundred families in a common household, and in the ownership and cultivation of a common domain, say of 2,000 acres, or about one acre to each person living thereon.

I accept, unreservedly, the views of no man, dead or living. "The master has said it," was never conclusive with me. Even though I have found him right nine times, I do not take his tenth proposition on trust, unless that also be proved sound and rational, I reject it. But I am convinced, after much study and reflection, that the Social Reformers are right on many points, even when clearly wrong on others, and I deem Fourier—though in many respects erratic, mistaken, visionary—the most suggestive and practical among them. I accept nothing on his authority, for I find many of his speculations fantastic, erroneous, and (in my view) pernicious, but on many points he commands my unreserved concurrence. Yet I prefer to set forth my own Social creed rather than his, even wherein mine was borrowed from his teachings, and mine is, briefly, as follows —

I believe that there need be, and should be, no paupers who are not infantile, idiotic, or disabled, and that civilized society pays more for the support of able-bodied pauperism than the necessary cost of its extirpation.

II I believe that they babble idly and libel Providence who talk of surplus Labor, or the inadequacy of Capital to supply employment to all who need it. Labor is often most required and best paid where

⁵ Albert Brisbane (1809-90) published his *Social Destiny of Man* (based on the teachings of Fourier) in 1840. In the years immediately following he wrote a column for Greeley's *Tribune*.

Capital is scarcest (as was shown in California in 1849-50), and there is always—even in China—far more work than hands, provided the ability to devise and direct be not wanting. Where Labor stands idle, save in the presence of some great public calamity, there is a demonstrated deficiency, not of Capital, but of brains.

III I believe that the efficiency of human effort is enormously, ruinously diminished by what I term Social Anarchy. That is to say. We spend half our energies in building fences and providing safeguards against each other's roguery, while our labor is rendered inefficient and inadequately productive by bad management, imperfect implements, a deficiency of power (animal or steam), and the inability of our producers to command and wield the most effective machinery. It is quite within the truth to estimate the annual product of our National Industry at less than one half what it might be if better applied and directed.

IV Inefficiency in production is paralleled by waste in consumption. Insects and vermin devour at least one fourth of the farmer's harvests, which inadequate fertilizing and unskilful cultivation have already reduced far below the proper aggregate. A thousand cooks are required, and a thousand fires maintained, to prepare badly the food of a township, when a dozen fires and a hundred cooks might do it far better, and with a vast saving in quantity as well as improvement in quality. [I judge that the cooks of Paris would subsist One Million persons on the food consumed or wasted by Six Hundred Thousand in this city, feeding them better than they are now fed, and prolonging their lives by an average of five years.]

V Youth should be a season of instruction in Industry and the Useful Arts, as well as in Letters and the Sciences mastered by their aid. Each child should be trained to skill and efficiency in productive Labor. The hours of children should be alternately devoted to Labor, Study, and Recreation,—say, two hours to each before, and a

like allotment after, dinner each secular day. Thus each child would grow up an adept, not merely in letters, but in arts,—a skilful worker as well as a proficient in the lessons of the school-room,—able to do well, not one thing only, but many things—familiar with mechanical as well as agricultural processes, and acquainted with the use of steam and the direction of machinery. Not till one has achieved the fullest command, the most varied use, of *all* his faculties and powers, can he be properly said to be educated.

VI Isolation is at war with efficiency and with progress. As "Iron sharpeneth iron," so are man's intellectual and inventive faculties stimulated by contact with his fellow-men. A nation of herdsmen, dwelling in movable tents, invents little or nothing, and makes no progress, or next to none. Serfdom was the general condition of the laboring class in Europe, until aggregation in cities and manufactories, diffusing intelligence, and nourishing aspiration, wrought its downfall.

VII The poor work at perpetual disadvantage in isolation, because of the inadequacy of their means. Let us suppose that four or five hundred heads of families propose to embark in Agriculture. Each buys his little farm, his furniture, his implements, animals, seeds, fertilizers, etc., and—though he has purchased nothing that he does not urgently need—he finds his means utterly exhausted, and his farm and future exertions heavily burdened by debt. He hopes and labors to clear off the mortgage, but flood and drought, frost and fire, work against him, his poverty compels him to do without many implements, and to plough or team with inadequate force, he runs up an account at the store, and pays twenty percent extra for his goods, because others, who buy on credit, fail to pay at all, and so he struggles on, till his strength fails, and he dies oppressed with debt. Such is the common lot.

VIII Association would have these unite to purchase, inhabit, and cultivate a common domain,—say of two thousand acres,

—whereby these advantages over the isolated system would be realized —

1 One fourth (at most) of the land required under the old system would be found abundant

2 It could be far better allotted and appropriated to Grain, Grass, Fruits, Forest, Garden, etc

3 The draught animals that were far too few, when dispersed among five hundred owners, on so many different farms, would be amply sufficient for a common domain

4 Steam or water power could now be economically employed for a hundred purposes—cutting and sawing timber, threshing and grinding grain, ploughing the soil, and for many household uses—where the small farmer could not think of employing it

5 Industry would find new and powerful incentives in the observation and praise or censure of the entire community, uniforms, banners, and music, with rivalry of bands of competing workers, would provoke emulation and lighten labor, while such recreations as dramas, concerts, readings, etc,

—now utterly beyond the reach of rural workers,—would give a new zest to life At present, our youth escape from rural industry when they can,—not that they really hate work, but that they find their leisure hours even duller and less endurable than those they give to rugged toil

I must devote another chapter to a narration of my experiences as an advocate of the views above set forth, and a brief account of the efforts made within my knowledge to give them practical exemplification That these efforts resulted in failures the world already knows I will endeavor to set forth the facts dispassionately, so as to afford fair grounds for judgment as to how far these failures are due to circumstances, and how far they may be fairly charged to the system itself I shall endeavor to lay little of the blame on well-abused Human Nature, since, if any system be ill adapted to Man as we find him, it may be excellently calculated for use on some other planet, but not on this one

1803 ~ Orestes A. Brownson ~ 1876

LIKE Greeley left fatherless at an early age, growing up as a foster child in the household of dour and hardworking New England farmers, apprenticed as a boy of fourteen and thenceforth making his own way, Brownson too became a journalist and a reformer While Greeley was observing the effects of the panic of 1837 in New York and preparing himself to become a great editor, Brownson was undergoing a similar tutelage in Boston He had been active earlier in trying to establish a “workingman’s party” in politics, and had edited a radical newspaper

But Brownson’s logical mind required him to look to the inner life of men for the sources of real reforms, and religious interests, which had dominated the years of his early manhood, again assumed primary importance In Boston he became a popular minister of no denomination, and was closely associated with George Ripley, Theodore Parker, and William Ellery Channing the elder, less closely with Emerson and Bronson Alcott His *Boston Quarterly Review*

(1838-42) was the medium for the expression of his personal views, and a markedly influential magazine

In 1844 Brownson became a Roman Catholic. His search for a positive religious faith had previously led him from Presbyterianism to Universalism, and then through agnosticism to his own conception of the "Church of the Future," and to Unitarianism. There was no more wandering, through the medium of *Brownson's Quarterly Review*, which he edited (1844-64 and 1872-75), Brownson became the most influential Catholic layman of his generation in America.

[Brownson's own account of his religious experience, *The Convert* (1857) is his most important book. Much of Brownson's literary criticism appears in vol. XIX of *Works* (20 vols., Detroit, 1882-87), edited by his son, Henry F. Brownson. Recent belated recognition of Brownson's place in our intellectual and literary history has led to the appearance of biographical and critical studies by Arthur M. Schlesinger, Jr., *Orestes A. Brownson—A Pilgrim's Progress* (Boston, 1939), Doran Whalen, *Giant for God's House* (New York, 1943), and Theodore Maynard, *Orestes Brownson* (New York, 1944).]

THE LABORING CLASSES¹

[1882 (1840)]

NO ONE can observe the signs of the times with much care, without perceiving that a crisis as to the relation of wealth and labor is approaching. It is useless to shut our eyes to the fact, and like the ostrich fancy ourselves secure because we have so concealed our heads that we see not the danger. We or our children will have to meet this crisis. The old war between the King and the Barons is well nigh ended, and so is that between the Barons and the Merchants and Manufacturers,—landed capital and commercial capital. The business man has become the peer of my Lord. And now commences the new struggle between the operative and his employer, between wealth and labor. Every day does this struggle extend further and wax stronger and fiercer, what or when the end will be God only knows.

In this coming contest there is a deeper question at issue than is commonly imagined, a question which is but remotely touched in your controversies about United States Banks and Sub Treasuries, chartered Banking and free Banking, free

trade and corporations, although these controversies may be paving the way for it to come up. We have discovered no presentment of it in any king's or queen's speech, nor in any president's message. It is embraced in no popular political creed of the day, whether christened Whig or Tory, *Juste-milieu* or Democratic. No popular senator, or deputy, or peer seems to have any glimpse of it, but it is working in the hearts of the million, is struggling to shape itself, and one day it will be uttered, and in thunder tones. Well will it be for him, who, on that day, shall be found ready to answer it.

What we would ask is, throughout the Christian world, the actual condition of the laboring classes, viewed simply and exclusively in their capacity of laborers.² They constitute at least a moiety of the human race. We exclude the nobility, we exclude also the middle class, and include only actual laborers, who are laborers and not proprietors, owners of none of the funds of production, neither houses, shops, nor lands, nor implements of labor, being

¹ The text has been abridged from that of an article first published in the *Boston Quarterly Review*.

therefore solely dependent on their hands. We have no means of ascertaining their precise proportion to the whole number of the race, but we think we may estimate them at one half. In any contest they will be as two to one, because the large class of proprietors who are not employers, but laborers on their own lands or in their own shops will make common cause with them.

Now we will not so belie our acquaintance with political economy, as to allege that these alone perform all that is necessary to the production of wealth. We are not ignorant of the fact, that the merchant, who is literally the common carrier and exchange dealer, performs a useful service, and is therefore entitled to a portion of the proceeds of labor. But make all necessary deductions on his account, and then ask what portion of the remainder is retained, either in kind or in its equivalent, in the hands of the original producer, the workingman? All over the world this fact states us in the face, the workingman is poor and depressed, while a large portion of the non-workingmen, in the sense we now use the term, are wealthy. It may be laid down as a general rule, with but few exceptions, that men are rewarded in an inverse ratio to the amount of actual service they perform. Under every government on earth the largest salaries are annexed to those offices, which demand of their incumbents the least amount of actual labor either mental or manual. And this is in perfect harmony with the whole system of repartition of the fruits of industry, which obtains in every department of society. Now here is the system which prevails, and here is its result. The whole class of simple laborers are poor, and in general unable to procure anything beyond the bare necessities of life.

In regard to labor two systems obtain, one that of slave labor, the other that of free labor. Of the two, the first is, in our judgment, except so far as the feelings are concerned, decidedly the least oppressive. If the slave has never been a free man,

we think, as a general rule, his sufferings are less than those of the free laborer at wages. As to actual freedom one has just about as much as the other. The laborer at wages has all the disadvantages of freedom and none of its blessings, while the slave, if denied the blessings, is freed from the disadvantages. We are no advocates of slavery, we are as heartily opposed to it as any modern abolitionist can be, but we say frankly that, if there must always be a laboring population distinct from proprietors and employers, we regard the slave system as decidedly preferable to the system at wages. It is no pleasant thing to go days without food, to lie idle for weeks, seeking work and finding none, to rise in the morning with a wife and children you love, and know not where to procure them a breakfast, and to see constantly before you no brighter prospect than the alms-house. Yet these are no unfrequent incidents in the lives of our laboring population. Even in seasons of general prosperity, when there was only the ordinary cry of "hard times," we have seen hundreds of people in a not very populous village, in a wealthy portion of our common country, suffering for want of the necessities of life, willing to work, and yet finding no work to do. Many and many is the application of a poor man for work, merely for his food, we have seen rejected. These things are little thought of, for the applicants are poor, they fill no conspicuous place in society, and they have no biographers. But their wrongs are chronicled in heaven. It is said there is no want in this country. There may be less than in some other countries. But death by actual starvation in this country is, we apprehend, no uncommon occurrence. The sufferings of a quiet, unassuming but useful class of females in our cities, in general sempstresses, too proud to beg or to apply to the alms-house, are not easily told. They are industrious, they do all that they can find to do, but yet the little there is for them to do, and the miserable pittance they receive for it, is hardly sufficient to keep

soul and body together. And yet there is a man who employs them to make shirts, trousers, etc., and grows rich on their labors. He is one of our respectable citizens, perhaps is praised in the newspapers for his liberal donations to some charitable institution. He passes among us as a pattern of morality, and is honored as a worthy Christian. And why should he not be, since our *Christian* community is made up of such as he, and since our clergy would not dare question his piety, lest they should incur the reproach of infidelity, and lose their standing, and their salaries? Nay, since our clergy are raised up, educated, fashioned, and sustained by such as he? Not a few of our churches rest on Mammon for their foundation. The basement is a trader's shop.

We pass through our manufacturing villages, most of them appear neat and flourishing. The operatives are well dressed, and we are told, well paid. They are said to be healthy, contented, and happy. This is the fair side of the picture, the side exhibited to distinguished visitors. There is a dark side, moral as well as physical. Of the common operatives, few, if any, by their wages, acquire a competence. A few of what Carlyle terms not inaptly the *body-servants* are well paid, and now and then an agent or an overseer rides in his coach. But the great mass wear out their health, spirits, and morals, without becoming one whit better off than when they commenced labor. The bills of mortality in these factory villages are not striking, we admit, for the poor girls when they can toil no longer go home to die. The average life, working life we mean, of the girls that come to Lowell, for instance, from Maine, New Hampshire, and Vermont, we have been assured, is only about three years. What becomes of them then? Few of them ever marry, fewer still ever return to their native places with reputations unimpaired. "She has worked in a Factory," is almost enough to damn to infamy the most worthy and virtuous girl. We know no sadder sight on earth than one of our factory villages

presents, when the bell at break of day, or at the hour of breakfast, or dinner, calls out its hundreds or thousands of operatives. We stand and look at these hard-working men and women hurrying in all directions, and ask ourselves, where go the proceeds of their labors? The man who employs them, and for whom they are toiling as so many slaves, is one of our city nabobs, revelling in luxury, or he is a member of our legislature, enacting laws to put money in his own pocket, or he is a member of Congress, contending for a high Tariff to tax the poor for the benefit of the rich, or in these times he is shedding crocodile tears over the deplorable condition of the poor laborer, while he docks his wages twenty-five per cent, building miniature log cabins, shouting Harrison and "hard cider." And this man too would fain pass for a Christian and a republican. He shouts for liberty, stickles for equality, and is horrified at a Southern planter who keeps slaves.

One thing is certain, that of the amount actually produced by the operative, he retains a less proportion than it costs the master to feed, clothe, and lodge his slave. Wages is a cunning device of the devil, for the benefit of tender consciences, who would retain all the advantages of the slave system, without the expense, trouble, and odium of being slave-holders.

Messrs. Thome and Kimball, in their account of emancipation in the West Indies, establish the fact that the employer may have the same amount of labor done, twenty-five per cent cheaper than the master. What does this fact prove, if not that wages is a more successful method of taxing labor than slavery? We really believe our Northern system of labor is more oppressive, and even more mischievous to morals, than the Southern. We, however, war against both. We have no toleration for either system. We would see the slave a man, but a free man, not a mere operative at wages. Thus he would not be were he now emancipated. Could the abolitionists effect all they propose, they would do

the slave no service Should emancipation work as well as they say, still it would do the slave no good He would be a slave still, although with the title and cares of a freeman If then we had no constitutional objections to abolitionism, we could not, for the reason here implied, be abolitionists

The slave system, however, in name and form, is gradually disappearing from Christendom It will not subsist much longer But its place is taken by the system of labor at wages, and this system, we hold, is no improvement upon the one it supplants Nevertheless the system of wages will triumph It is the system which in name sounds honester than slavery, and in substance is more profitable to the master It yields the wages of iniquity, without its opprobrium It will therefore supplant slavery, and be sustained—for a time

Now, what is the prospect of those who fall under the operation of this system? We ask, is there a reasonable chance that any considerable portion of the present generation of laborers, shall ever become owners of a sufficient portion of the funds of production, to be able to sustain themselves by laboring on their own capital, that is, as independent laborers? We need not ask this question, for everybody knows there is not Well, is the condition of a laborer at wages the best that the great mass of the working people ought to be able to aspire to? Is it a condition,—nay can it be made a condition,—with which a man should be satisfied, in which he should be contented to live and die?

In our own country this condition has existed under its most favorable aspects, and has been made as good as it can be It has reached all the excellence of which it is susceptible It is now not improving but growing worse The actual condition of the workingman to-day, viewed in all its bearings, is not so good as it was fifty years ago If we have not been altogether misinformed, fifty years ago health and industrious habits constituted no mean stock

in trade, and with them almost any man might aspire to competence and independence But it is so no longer The wilderness has receded, and already the new lands are beyond the reach of the mere laborer, and the employer has him at his mercy If the present relation subsist, we see nothing better for him in reserve than what he now possesses, but something altogether worse

We are not ignorant of the fact that men born poor become wealthy, and that men born to wealth become poor, but this fact does not necessarily diminish the numbers of the poor, nor augment the numbers of the rich The relative numbers of the two classes remain, or may remain, the same But be this as it may, one fact is certain, no man born poor has ever, by his wages, as a simple operative, risen to the class of the wealthy Rich he may have become, but it has not been by his own manual labor He has in some way contrived to tax for his benefit the labor of others He may have accumulated a few dollars which he has placed at usury, or invested in trade, or he may, as a master workman, obtain a premium on his journeymen, or he may have from a clerk passed to a partner, or from a workman to an overseer The simple market wages for ordinary labor, has never been adequate to raise him from poverty to wealth This fact is decisive of the whole controversy, and proves that the system of wages must be supplanted by some other system, or else one half of the human race must forever be the virtual slaves of the other.

Now the great work for this age and the coming, is to raise up the laborer, and to realize in our own social arrangements and in the actual condition of all men, that equality between man and man, which God has established between the rights of one and those of another In other words, our business is to emancipate the proletaries, as the past has emancipated the slaves This is our work. There must be no class of our fellow men doomed to toil through life as mere workmen at wages If wages are tolerated it must be, in the case of the

individual operative, only under such conditions that by the time he is of a proper age to settle in life, he shall have accumulated enough to be an independent laborer

on his own capital,—on his own farm or in his own shop Here is our work How is it to be done?

1810 ~ *Margaret Fuller* ~ 1850

MARGARET FULLER received an exceptional education through the perhaps excessive attention of her father, a lawyer and member of Congress, and was compelled to use it for financial ends when her father's death left her partially responsible for the support of the family She became a protégé of Emerson's, and at his suggestion edited the magazine of the Transcendentalists, the *Dial*, 1840-42 She gave "conversations" for the women of Boston, following Bronson Alcott in this modification of the popular institution of the public lecture In 1844 Horace Greeley hired her for his *New York Tribune*, and her best writing was done for its columns Books based on her *Tribune* contributions were *A Summer on the Lakes* (1844), a highly readable account of a journey to Illinois and Michigan, and *Woman in the Nineteenth Century* (1845), in which she stated her arguments for increased rights and opportunities for women

In 1846 Greeley sent his brilliant young columnist to Europe to write a series of articles on the status of women in various countries there In Italy she met a young Italian patriot of noble family, Count Ossoli, fell in love with him, married him secretly, and participated with him in the Italian revolution of 1848 Compelled by financial distress to return to America with her husband and child on a small freighter, she was drowned off Fire Island, New York, in the great storm of July, 1850

[Shortly after Margaret Fuller's death, Emerson and others collaborated in bringing out *Memours of Margaret Fuller Ossoli* (2 vols, Boston, 1852) Her brother, Arthur B Fuller, collected many of her writings in *At Home and Abroad* (Boston, 1856) and *Life Without and Life Within* (Boston, 1869) Thomas Wentworth Higginson wrote a sympathetic biography (Boston, 1884) Modern biographies have been written by Margaret Bell, Katharine Anthony, and others]

From
WOMAN IN THE NINETEENTH
CENTURY
[1845]

THE PRINCIPLE OF LIBERTY

IT SHOULD be remarked that as the principle of liberty is better understood,

and more nobly interpreted, a broader protest is made in behalf of Woman As men become aware that few men have had a fair chance, they are inclined to say that no women have had a fair chance The French Revolution, that strangely disguised angel, bore witness in favor of Woman, but interpreted her claims no less ignorantly than those of Man Its idea of happiness did not

use beyond outward enjoyment, unobstructed by the tyranny of others. The title it gave was *citoyen*, *citoyenne*, and it is not unimportant to Woman that even this species of equality was awarded her. Before, she could be condemned to perish on the scaffold for treason, not as a citizen but as a subject. The right with which this title then invested a human being was that of bloodshed and license. The Goddess of Liberty was impure. As we read the poem addressed to her not long since by Béranger, we can scarcely refrain from tears as painful as the tears of blood that flowed when "such crimes were committed in her name." Yes! Man, born to purify and animate the unintelligent and the cold, can in his madness degrade and pollute no less the fair and the chaste. Yet truth was prophesied in the ravings of that hideous fever caused by long ignorance and abuse. Europe is conning a valued lesson from the bloodstained page. The same tendencies further unfolded will bear good fruit in this country.

Yet by men in this country, as by the Jews when Moses was leading them to the promised land, everything has been done that inherited depravity could do to hinder the promise of Heaven from its fulfillment. The cross, here as elsewhere, has been planted only to be blasphemed by cruelty and fraud. The name of the Prince of Peace has been profaned by all kinds of injustice toward the Gentile whom he said

he came to save. But I need not speak of what has been done toward the Red Man, the Black Man. Those deeds are the scoff of the world, and they have been accompanied by such pious words that the gentlest would not dare to intercede with, "Father, forgive them, for they know not what they do."

Here as elsewhere the gain of creation consists always in the growth of individual minds, which live and aspire as flowers bloom and birds sing in the midst of morasses, and in the continual development of that thought, the thought of human destiny, which it is given to eternity adequately to express, and which ages of failure only seemingly impede. Only seemingly, and whatever seems to the contrary, this country is as surely destined to elucidate a great moral law as Europe was to promote the mental culture of Man.

Though the national independence be blurred by the servility of individuals, though freedom and equality have been proclaimed only to leave room for a monstrous display of slavedealing with slave-keeping, though the free American so often feels himself free, like the Roman, only to pamper his appetites and his indolence through the misery of his fellow-beings, still it is not in vain that the verbal statement has been made, "All men are born free and equal." There it stands, a golden certainty wherewith to encourage the good, to shame the bad.

1807 ~ *John Greenleaf Whittier* ~ 1892

A FOND sister and an alert editor share immediate responsibility for the initiation of the literary career of Whittier. His people had been New Englanders since 1638, and were notably devout and industrious, they were also poor and obscure. John had attended a few brief terms of a country school, worked too hard at chores and in the fields for his weak body's well-being, read such books as the household afforded—chiefly lives of prominent Quakers—

and as he could borrow Surely many another New England youngster had discovered Burns at fourteen or so, and tried to write verses like his

This one, however, had a sister who, believing in his talent, secretly sent his poems to the editor of a local paper, and the editor, little older than the poet, warmed generously to their meager talent, printed them, and made a horse-and-buggy journey to the Whittier farm to see the author His name was William Lloyd Garrison

That visit was a turning-point in Whittier's life In from the field to meet Garrison came the tall, slender youth, barefoot, in work-stained homespun shirt and pants He went back to the field an hour or so later—but with his father's reluctant promise that he could attend the new academy at nearby Haverhill that winter if he earned his own way, and with his feet firmly set on the road that was to bring him the love of millions of readers and the hatred of other millions, as well as a sure place at last in the history of his country's literature

He earned the money for the academy by making shoes, and the shoemaker's trade helped at other times in the many lean years that followed, between school-teaching, more farming, and various editorial jobs Garrison got him the jobs, at first Very soon they came unsought, and preferment of other kinds as well There was rare metal in the tall young Quaker with the steady eyes and quiet voice and the alert and searching mind—a quality that led his neighbors to elect him to the State Legislature at 30, and again the following year

The second time he did not serve He had another job, and to the prompting of his inner light a greater one John Whittier had become an abolitionist A majority of the most active abolitionists were Quakers, the Society of Friends had renounced slavery half a century before, under the leadership of John Woolman The friendly influence of Garrison might not have been needed to bring Whittier into the movement of which Garrison was already the spearhead But it was thanks in part to Garrison, surely, that his part in it became so prominent so early

In 1833 Whittier was a delegate from Massachusetts to the history-making first convention of the American Anti-Slavery Society He was a member of Garrison's committee that drafted the famous resolutions of that convention, and one of the signers Thirty years later, when the objective of emancipation had been won, Whittier declared that his signature to those resolutions meant more to him than his name on the title-page of any book

His biography for those thirty years is largely the story of the abolition movement His first wide fame as a poet came from his contributions to Garrison's *Liberator*, *The National Era* (which also published *Uncle Tom's Cabin* serially), and other abolitionist periodicals, these poems were collected in 1846 under the title *Voices of Freedom* Though Bryant, Emerson, Longfellow, and Lowell

wrote anti-slavery poems during this period, Whittier surpassed them all in the volume and the vigor of his work and came to be generally recognized as the foremost literary spokesman of the movement

Pushed aside during the three decades of his devotion to abolitionism, but never completely abandoned, was Whittier's more individual creative vision and purpose as a writer—the reflection and expression of the rural New England in which he spent all but a year or two of his long life. He struck out this field in his first volume, *Legends of New England* (1831), and cultivated it further in *Moll Pitcher* (1832) and *Mogg Megone* (1836). In the period during which his poetry was still devoted largely to the battle against slavery, this other interest found expression in prose, which has lasting interest and value and has been unduly neglected by most critics and little known to the general reader. First place in the small body of this creative prose belongs to the brief historical novel, *Margaret Smith's Journal* (1849). Rich in authentic atmosphere and sound in characterization, quiet but genuinely dramatic, this story of a young girl fresh from England in Puritan Massachusetts, in the early days of the colony, remains one of the finest of all fictional recreations of the American past. It is a not unworthy companion to Hawthorne's greater romance, *The Scarlet Letter*, published the following year. Also still vital for the modern reader is the volume of essays called *Literary Recreations and Miscellanies* (1854). A delightful individual piece is "My Summer with Dr. Singletary."

Once the battle against slavery was won, Whittier's regionalism came swiftly to its most mature expression. *Snow-Bound* (1866) is by far his most important poem. It is wholly representative of Whittier's best qualities as a writer in its simple music, homely concreteness, and warm sincerity, and it stands supreme among literary expressions of rural New England life.

For twenty-six years Whittier continued to publish occasional small volumes, the best of the poems they contain are briefer treatments of New England farm and village life. Living nearly all of his many years in small Massachusetts towns, travelling little, knowing no wide circle of friends, Whittier was the most parochial of distinguished American writers. Only two fields received his full creative effort—abolitionism, and past and present rural New England. Of his achievement in the first of these fields, the social historian may be a better judge than the literary critic. Of his achievement in the second there can be no doubt.

[Whitman Bennett's *Whittier, Bard of Freedom* (Chapel Hill, 1941) is a good biography. H. H. Clark's *Whittier* has been announced for early publication in the American Writers Series. G. R. Carpenter's *John Greenleaf Whittier* (Boston, 1903), in the American Men of Letters Series, is a readable sequence of biographical and critical essays. A more extended biographical study is that of S. T. Pickard, *The Life and Letters of John Greenleaf Whittier*, 2 vols (Boston, 1894, revised edit., 1907).]

IN THE EVIL DAYS
[1850]

The evil days have come, the poor
Are made a prey,
Bar up the hospitable door,
Put out the fire-lights, point no more
The wanderer's way 5

For Pity now is crime, the chain
Which binds our States
Is melted at her hearth in twain,
Is rusted by her tears' soft rain
Close up her gates 10

Our Union, like a glacier stirred
By voice below,
On bell of knee, on wing of bird,
A beggar's crust, a kindly word
May overthrow! 15

Poor, whispering tremblers! yet we boast
Our blood and name,
Bursting its century-bolted frost,
Each gray cairn on the Northman's coast
Cries out for shame! 20

Oh for the open firmament,
The prairie free,
The desert hillside, cavern-rent,
The Pawnee's lodge, the Arab's tent,
The Bushman's tree! 25

Than web of Persian loom most rare,
Or soft divan,
Better the rough rock, bleak and bare,
Or hollow tree, which man may share
With suffering man 30

I hear a voice "Thus saith the Law,
Let Love be dumb,
Clasping her liberal hands in awe,
Let sweet-lipped Charity withdraw
From hearth and home," 35

I hear another voice "The poor
Are thine to feed,
Turn not the outcast from thy door,
Nor give to bonds and wrong once more
Whom God hath freed " 40

Dear Lord! between that law and Thee
No choice remains,
Yet not untrue to man's decree,
Though spurning its rewards, is he
Who bears its pains 45

Not mine Sedition's trumpet-blast
And threatening word,
I read the lesson of the Past
That firm endurance wins at last
More than the sword 50

O clear-eyed Faith, and Patience thou
So calm and strong!
Lend strength to weakness, teach us how
The sleepless eyes of God look through
This night of wrong! 55

THE FAREWELL
OF A VIRGINIA SLAVE MOTHER
TO HER DAUGHTERS SOLD INTO
SOUTHERN BONDAGE
[1841 (1838)]

Gone, gone,—sold and gone,
To the rice-swamp dank and lone
Where the slave-whip ceaseless swings,
Where the noisome insect stings,
Where the fever demon strews 5
Poison with the falling dews,
Where the sickly sunbeams glare
Through the hot and musty air,
Gone, gone,—sold and gone,
To the rice-swamp dank and lone, 10
From Virginia's hills and waters,
Woe is me, my stolen daughters!

Gone, gone,—sold and gone,
To the rice-swamp dank and lone.
There no mother's eye is near them, 15
There no mother's ear can hear them,
Never, when the torturing lash
Seams their back with many a gash,
Shall a mother's kindness bless them,

Or a mother's arms caress them
Gone, gone,—sold and gone,
To the rice-swamp dank and lone,
From Virginia's hills and waters,
Woe is me, my stolen daughters!

Gone, gone,—sold and gone,
To the rice-swamp dank and lone
Oh, when weary, sad, and slow,
From the fields at night they go,
Faint with toil, and racked with pain,
To their cheerless homes again,

There no brother's voice shall greet them,
There no father's welcome meet them
Gone, gone,—sold and gone,
To the rice-swamp dank and lone,
From Virginia's hills and waters,
Woe is me, my stolen daughters!

Gone, gone,—sold and gone,
To the rice-swamp dank and lone
From the tree whose shadow lay
On their childhood's place of play,
From the cool spring where they drank,
Rock, and hill, and rivulet bank,
From the solemn house of prayer,
And the holy counsels there,
Gone, gone,—sold and gone,
To the rice-swamp dank and lone,
From Virginia's hills and waters,
Woe is me, my stolen daughters!

Gone, gone,—sold and gone,
To the rice-swamp dank and lone;
Toiling through the weary day,
And at night the spoiler's prey.
Oh, that they had earlier died,
Sleeping calmly, side by side,
Where the tyrant's power is o'er,
And the fetter galls no more!
Gone, gone,—sold and gone
To the rice-swamp dank and lone;
From Virginia's hills and waters,
Woe is me, my stolen daughters!

Gone, gone,—sold and gone,
To the rice-swamp dank and lone.
By the holy love He beareth,
By the bruised reed He spareth,
Oh, may He, to whom alone

20 All then cruel wrongs are known,
Still their hope and refuge prove,
With a more than mother's love
Gone, gone,—sold and gone,
To the rice-swamp dank and lone,
From Virginia's hills and waters,
Woe is me, my stolen daughters!

ICHABOD¹
[1850]

So fallen! So lost! the light withdrawn
Which once he wore!
The glory from his gray hairs gone
Forevermore!

Revile him not, the Tempter hath
A snare for all,

¹This poem was the outcome of the surprise and grief and forecast of evil consequences which I felt on reading the seventh of March speech of Daniel Webster in support of the "compromise," and the Fugitive Slave Law. No partisan or personal enmity dictated it. On the contrary my admiration of the splendid personality and intellectual power of the great Senator was never stronger than when I laid down his speech, and, in one of the saddest moments of my life, penned my protest I saw, as I wrote, with painful clearness its sure results,—the Slave Power arrogant and defiant, strengthened and encouraged to carry out its scheme for the extension of its baleful system, or the dissolution of the Union, the guarantees of personal liberty in the free States broken down, and the whole country made the hunting-ground of slave-catchers. In the horror of such a vision, so soon fearfully fulfilled, if one spoke at all, he could only speak in tones of stern and sorrowful rebuke.

But death softens all resentments, and the consciousness of a common inheritance of frailty and weakness modifies the severity of judgment. Years after, in *The Lost Occasion*, I gave utterance to an almost universal regret that the great statesman did not live to see the flag which he loved trampled under the feet of Slavery, and, in view of this desecration, make his last days glorious in defence of "Liberty and Union, one and inseparable"—Whittier's note

And pitying tears, not scorn and wrath,
Beft his fall!

The solid earth beneath my feet
Reeled fluid as the sea

Oh, dumb be passion's stormy rage,
When he who might 10
Have lighted up and led his age,
Falls back in night

I felt a sense of bitter loss,—
Shame, tearless grief, and stifling
wrath, 10
And loathing fear, as if my path
A serpent stretched across

Scorn! would the angels laugh to mark
A bright soul driven,
Fiend-goaded, down the endless dark, 15
From hope and heaven!

All love of home, all pride of place,
All generous confidence and trust,
Sank smothering in that deep disgust 15
And anguish of disgrace

Let not the land once proud of him
Insult him now,
Nor brand with deeper shame his dim,
Dishonored brow

Down on my native hills of June,
And home's green quiet, hiding all,
Fell sudden darkness like the fall
Of midnight upon noon! 20

But let its humbled sons, instead,
From sea to lake,
A long lament, as for the dead,
In sadness make

And Law, an unloosed maniac, strong,
Blood-drunk, through the blackness
trod,
Hoarse-shouting in the ear of God
The blasphemy of wrong

Of all we loved and honored, naught 25
Save power remains,
A fallen angel's pride of thought,
Still strong in chains

"O Mother, from thy memories proud, 25
Thy old renown, dear Commonwealth,
Lend this dead air a breeze of health,
And smite with stars this cloud

All else is gone, from those great eyes
The soul has fled
When faith is lost, when honor dies,
The man is dead!

"Mother of Freedom, wise and brave,
Rise awful in thy strength," I said, 30
Ah me! I spake but to the dead,
I stood upon her grave!

Then, pay the reverence of old days
To his dead fame,
Walk backward, with averted gaze, 35
And hide the shame!

THE RENDITION¹ [1854]

I heard the train's shrill whistle call,
I saw an earnest look beseech,
And rather by that look than speech
My neighbor told me all

And, as I thought of Liberty 5
Marched handcuffed down that swarded
street,

¹ On the 2d of June, 1854, Anthony Burns, a fugitive slave from Virginia, after being under arrest for ten days in the Boston Court House, was remanded to slavery under the Fugitive Slave Act, and taken down State Street to a steamer chartered by the United States Government, under guard of United States troops and artillery, Massachusetts militia, and Boston police. Public excitement ran high, a futile attempt to rescue Burns having been made during his confinement, and the streets were crowded with tens of thousands of people of whom many came from other towns and cities of the State to witness the humiliating spectacle.—Whittier's note

SKIPPER IRESON'S RIDE¹

[1860 (1857)]

Of all the rides since the birth of time,
Told in story or sung in rhyme,—
On Apuleus's Golden Ass,
On one-eyed Calendar's horse of brass,
Witch astride of a human back, 5
Islam's prophet on Al-Borák,—
The strangest ride that ever was sped
Was Ireson's, out from Marblehead!

Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a
cart 10
By the women of Marblehead!

Body of turkey, head of owl,
Wings a-droop like a rained-on fowl,
Feathered and ruffled in every part,
Skipper Ireson stood in the cart 15
Scores of women, old and young,
Strong of muscle, and glib of tongue,
Pushed and pulled up the rocky lane,
Shouting and singing the shrill refrain
"Here's Flud Oirson, fur his horrd
horrt, 20
Torr'd an' futherr'd an' corr'd in a
corrt
By the women o' Morble'ead!"

Wrinkled scold with hands on hips,
Girls in bloom of cheek and lips,
Wild-eyed, free-limbed, such as chase 25
Bacchus round some antique vase,
Brief of skirt, with ankles bare,
Loose of kerchief and loose of hair,
With conch-shells blowing and fish-horns'
twang,
Over and over the Maenads sang 30
"Here's Flud Oirson, for his horrd horrt,
Torr'd an' futherr'd an' corr'd in a corrt
By the women o' Morble'ead!"

Small pity for him—He sailed away
From a leaking ship in Chaleur Bay,— 35
Sailed away from a sinking wreck,

With his own town's-people on her deck!
"Lay by! Lay by!" they called to him
Back he answered, "Sink or swim!"
Biag of your catch of fish again!" 40
And off he sailed through the fog and
rain!

Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a
cart
By the women of Marblehead!

Fathoms deep in dark Chaleur 45
That wreck shall lie forevermore
Mother and sister, wife and maid,
Looked from the rocks of Marblehead
Over the moaning and rainy sea,—
Looked for the coming that might not
be! 50
What did the winds and the sea-birds say
Of the cruel captain who sailed away—
Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a
cart
By the women of Marblehead! 55

Through the street, on either side,
Up flew windows, doors swung wide,
Sharp-tongued spinsters, old wives gray,
Treble lent the fish-horn's bray
Sea-worn grandsires, cripple-bound, 60
Hulks of old sailors run aground,
Shook head, and fist, and hat, and cane,
And cracked with curses the hoarse refrain
"Here's Flud Oirson, fur his horrd horrt,
Torr'd an' futherr'd an' corr'd in a
corrt 65
By the women o' Marble'ead!"

Sweetly along the Salem road
Bloom of orchard and lilac showed.

¹ Whittier based this poem on an old Marblehead ballad, but did not adhere fully to the facts of the incident. James Russell Lowell, as editor of the *Atlantic Monthly* (in which the poem was first published) suggested the use of dialect for the refrain.

Little the wicked skipper knew
 Of the fields so green and the sky so
 blue 70
 Riding there in his sorry trim,
 Like an Indian idol glum and grim,
 Scarcely he seemed the sound to hear
 Of voices shouting, far and near
 "Here's Flud Onson, fur his horrd
 horrt, 75
 Torr'd an' futherr'd an' corr'd in a
 corrt
 By the women o' Marblehead!"

"Hear me, neighbors" at last he cried,—
 "What to me is this noisy ride?
 What is the shame that clothes the skin 80
 To the nameless horror that lives within?
 Waking or sleeping, I see a wreck,
 And hear a cry from a reeling deck!
 Hate me and curse me,—I only dread
 The hand of God and the face of the
 dead!" 85
 Said old Floyd Ireson, for his hard
 heart,
 Tarred and feathered and carried in a
 cart
 By the women of Marblehead!

Then the wife of the skipper lost at sea
 Said, "God has touched him! Why should
 we!" 90
 Said an old wife mourning her only son,
 "Cut the rogue's tether and let him run!"
 So with soft relentings and rude excuse,
 Half scorn, half pity, they cut him loose,
 And gave him a cloak to hide him in, 95
 And left him alone with his shame and
 sin
 Poor Floyd Ireson, for his hard heart,
 Tarred and feathered and carried in a
 cart
 By the women of Marblehead!

TELLING THE BEES¹ [1860 (1858)]

Here is the place, right over the hill
 Runs the path I took,

You can see the gap in the old wall still,
 And the stepping-stones in the shallow
 brook

There is the house, with the gate red-
 barred, 5
 And the poplars tall,
 And the barn's brown length, and the
 cattle-yard,
 And the white horns tossing above the
 wall .

There are the beehives ranged in the sun,
 And down by the brink 10
 Of the brook are her poor flowers, weed
 o'errun,
 Pansy and daffodil, rose and pink

A year has gone, as the tortoise goes,
 Heavy and slow,
 And the same rose blows, and the same
 sun glows, 15
 And the same brook sings of a year ago.

There's the same sweet clover-smell in the
 breeze
 And the June sun warm
 Tangles his wings of fire in the trees,
 Setting, as then, over Fernside farm 20

I mind me how with a lover's care
 From my Sunday coat
 I brushed off the burrs, and smoothed my
 hair,
 And cooled at the brookside my brow and
 throat

Since we parted, a month had passed,— 25
 To love, a year,

¹ A remarkable custom, brought from the Old Country, formerly prevailed in the rural districts of New England. On the death of a member of the family, the bees were at once informed of the event, and their hives dressed in mourning. This ceremonial was supposed to be necessary to prevent the swarms from leaving their hives and seeking a new home—Whittier's note

Down through the beeches I looked at last
On the little red gate and the well-
sweep near

And the song she was singing ever since
In my ear sounds on —
"Stay at home, pretty bees, fly not
hence!" 55
Mistress Mary is dead and gone!"

I can see it all now,—the slantwise rain
Of light through the leaves, 30
The sundown's blaze on her window-pane,
The bloom of her roses under the eaves

THE TRAILING ARBUTUS

[1881 (1879)]

Just the same as a month before,—
The house and the trees,
The barn's brown gable, the vine by the
door,— 35
Nothing changed but the hive of bees

I wandered lonely where the pine-trees
made
Against the bitter East their barricade,
And, guided by its sweet
Perfume, I found, within a narrow dell,
The trailing spring flower tinted like a
shell 5
Amid dry leaves and mosses at my feet

Before them, under the garden wall,
Forward and back,
Went drearily singing the chore-girl small,
Draping each hive with a shred of
black 40

From under dead boughs, for whose loss
the pines
Moaned ceaseless overhead, the blossoming
vines

Trembling, I listened the summer sun
Had the chill of snow,
For I knew she was telling the bees of one
Gone on the journey we all must go!

Lifted their glad surprise,
While yet the bluebird smoothed in leaf-
less trees 10
His feathers ruffled by the chill sea-breeze,
And snow-drifts lingered under April
skies

Then I said to myself, "My Mary weeps 45
For the dead to-day
Haply her blind old grandsire sleeps
The fret and the pain of his age away"

As, pausing, o'er the lonely flower I bent,
I thought of lives thus lowly, clogged and
pent,

But her dog whined low, on the doorway
sill,
With his cane to his chin, 50
The old man sat, and the chore-girl still
Sung to the bees stealing out and in

Which yet find room, 15
Through care and cumber, coldness and
decay,
To lend a sweetness to the ungenial day,
And make the sad earth happier for their
bloom

SNOW-BOUND A WINTER IDYL¹
[1866]

TO THE MEMORY OF THE HOUSEHOLD IT
DESCRIBES, THIS POEM IS DEDICATED
BY THE AUTHOR

"As the Spirits of Darkness be stronger
in the dark, so good Spirits which be
Angels of Light are augmented not only by
the Divine light of the Sun, but also by
our common Wood Fire and as the Celestial
Fire drives away dark spirits, so
also this our Fire of Wood doth the same"
(COR AGRIPPA, *Occult Philosophy*, book 1,
chap v)

"Announced by all the trumpets of the sky,
Arrives the snow, and, driving o'er the
fields,
Seems nowhere to alight, the whited air
Hides hills and woods, the river and the
heaven,
And veils the farm-house at the garden's
end

¹ The inmates of the family at the Whittier homestead who are referred to in the poem were my father, mother, my brother and two sisters, and my uncle and aunt, both unmarried. In addition, there was the district school-master, who boarded with us. The "not unfear'd, half-welcome guest" was Harriet Livermore, daughter of Judge Livermore, of New Hampshire, a young woman of fine natural ability, enthusiastic, eccentric, with slight control over her violent temper, which sometimes made her religious profession doubtful. She was equally ready to exhort in school-house prayer-meetings and dance in a Washington ball-room, while her father was a member of Congress. She early embraced the doctrine of the Second Advent, and felt it her duty to proclaim the Lord's speedy coming. With this message she crossed the Atlantic and spent the greater part of a long life in travelling over Europe and Asia. She lived some time with Lady Hester Stanhope, a woman as fantastic and mentally strained as herself, on the slope of Mt Lebanon, but finally quarrelled with her in regard to two white horses with red marks on their backs which suggested the idea of saddles, on which her titled hostess expected to ride into Jerusalem with the Lord. A friend of mine found her, when quite an old woman, wandering in Syria with a tribe of Arabs,

The sled and traveller stopped, the courier's
feet
Delayed, all friends shut out, the house-
mates sit
Around the radiant fireplace, enclosed
In a tumultuous privacy of storm"
(EMERSON, *The Snow-Storm*)

The sun that brief December day
Rose cheerless over hills of gray,
And, darkly circled, gave at noon
A sadder light than waning moon
Slow tracing down the thickening sky 5
Its mute and ominous prophecy,
A portent seeming less than threat,
It sank from sight before it set
A chill no coat, however stout,
Of homespun stuff could quite shut out, 10
A hard, dull bitterness of cold,
That checked, mid-vein, the curling race
Of life-blood in the sharpened face,
The coming of the snow-storm told

who with the Oriental notion that madness is inspiration, accepted her as their prophetess and leader. At the time referred to in *Snow-Bound* she was boarding at the Rocks Village, about two miles from us.

In my boyhood, in our lonely farmhouse, we had scanty sources of information, few books and only a small weekly newspaper. Our only annual was the *Almanac*. Under such circumstances story-telling was a necessary resource in the long winter evenings. My father when a young man had traversed the wilderness to Canada, and could tell us of his adventures with Indians and wild beasts and of his sojourn in the French villages. My uncle was ready with his record of hunting and fishing and, it must be confessed, with stories which he at least half believed, of witchcraft and apparitions. My mother, who was born in the Indian-haunted region of Somersworth, New Hampshire, between Dover and Portsmouth, told us of the inroads of the savages, and the narrow escape of her ancestors. She described strange people who lived on the Piscataqua and Coheco, among whom was Bantam the sorcerer. I have in my possession the wizard's "conjuring book," which he solemnly opened when consulted. It is a copy of Cornelius Agrippa's *Magie* printed in 1651. —Whittier's note

The wind blew east, we heard the roar 15
 Of Ocean on his wintry shore,
 And felt the strong pulse throbbing there
 Beat with low rhythm our inland air
 Meanwhile we did our nightly chores,—
 Brought in the wood from out of doors, 20
 Littered the stalls, and from the mows
 Raked down the herd's-grass for the cows
 Heard the horse whinnying for his corn,
 And, sharply clashing horn on horn,
 Impatient down the stanchion rows 25
 The cattle shake their walnut bows,
 While, peering from his early perch
 Upon the scaffold's pole of birch,
 The cock his crested helmet bent
 And down his querulous challenge sent 30
 Unwarmed by any sunset light
 The gray day darkened into night,
 A night made hoary with the swarm
 And whirl-dance of the blinding storm,
 As zigzag waving to and fro 35
 Crossed and recrossed the winged snow
 And ere the early bedtime came
 The white drift piled the window-frame,
 And through the glass the clothes-line posts
 Looked in like tall and sheeted ghosts 40

So all night long the storm roared on
 The morning broke without a sun,
 In tiny spherule traced with lines
 Of Nature's geometric signs,
 In starry flake and pellicle 45
 All day the hoary meteor fell,
 And, when the second morning shone,
 We looked upon a world unknown,
 On nothing we could call our own
 Around the glistening wonder bent 50
 The blue walls of the firmament,
 No cloud above, no earth below,—
 A universe of sky and snow!
 The old familiar sights of ours
 Took marvellous shapes, strange domes
 and towers 55
 Rose up where sty or corn-crib stood,
 Or garden-wall or belt of wood,
 A smooth white mound the brush-pile
 showed,
 A fenceless drift what once was road,
 The bridle-post an old man sat 60
 With loose-flung coat and high cocked hat;

The well-curb had a Chinese roof,
 And even the long sweep, high aloof,
 In its slant splendor, seemed to tell
 Of Pisa's leaning miracle 65

A prompt, decisive man, no breath
 Our father wasted "Boys, a path!"
 Well pleased, (for when did farmer boy
 Count such a summons less than joy?)
 Our buskins on our feet we drew, 70
 With mittened hands, and caps drawn
 low,

To guard our necks and ears from snow,
 We cut the solid whiteness through,
 And, where the drift was deepest, made
 A tunnel walled and overlaid 75
 With dazzling crystal we had read
 Of rare Aladdin's wondrous cave,
 And to our own his name we gave,
 With many a wish the luck were ours
 To test his lamp's supernal powers 80
 We reached the barn with merry din,
 And roused the prisoned brutes within
 The old horse thrust his long head out,
 And grave with wonder gazed about,
 The cock his lusty greeting said, 85
 And forth his speckled harem led,
 The oxen lashed their tails, and hooked,
 And mild reproach of hunger looked,
 The horned patriarch of the sheep,
 Like Egypt's Amun² roused from sleep, 90
 Shook his sage head with gesture mute,
 And emphasized with stamp of foot

All day the gusty north-wind bore
 The loosening drift its breath before,
 Low circling round its southern zone, 95
 The sun through dazzling snow-mist shone
 No church-bell lent its Christian tone
 To the savage air, no social smoke
 Curled over woods of snow-hung oak
 A solitude made more intense 100
 By dreary-voiced elements,
 The shrieking of the mindless wind,
 The moaning tree-boughs swaying blind,
 And on the glass the unmeaning beat
 Of ghostly finger-tips of sleet 105

² Amen or Amon, ram-headed deity of life and reproduction

Beyond the circle of our hearth
 No welcome sound of toil or mirth
 Unbound the spell, and testified
 Of human life and thought outside
 We minded that the sharpest ear 110
 The buried brooklet could not hear,
 The music of whose liquid lip
 Had been to us companionship,
 And, in our lonely life, had grown
 To have an almost human tone 115

As night drew on, and, from the crest
 Of wooded knolls that ridged the west,
 The sun, a snow-blown traveller, sank
 From sight beneath the smothering bank,
 We piled with care our nightly stack 120
 Of wood against the chimney-back,—
 The oaken log, green, huge, and thick,
 And on its top the stout backstick,
 The knotty forestack laid apart,
 And filled between with curious art 125
 The ragged brush, then, hovering near,
 We watched the first red blaze appear,
 Heard the sharp crackle, caught the gleam
 On whitewashed wall and sagging beam,
 Until the old, rude-furnished room 130
 Burst, flower-like, into rosy bloom,
 While radiant with a mimic flame
 Outside the sparkling drift became,
 And through the bare-boughed hlae-tree
 Our own warm hearth seemed blazing
 free 135
 The crane and pendent trammels showed,
 The Turks' heads on the andirons glowed,
 While childish fancy, prompt to tell
 The meaning of the miracle,
 Whispered the old rhyme "*Under the*
tree" 140
When fire outdoors burns merrily,
There the witches are making tea"

The moon above the eastern wood
 Shone at its full, the hill-range stood
 Transfigured in the silver flood, 145
 Its blown snows flashing cold and keen,
 Dead white, save where some sharp ravine
 Took shadow, or the sombre green
 Of hemlocks turned to pitchy black
 Against the whiteness at their back 150
 For such a world and such a night

Most fitting that unwarming light,
 Which only seemed where'er it fell
 To make the coldness visible

Shut in from all the world without, 155
 We sat the clean-winged hearth about,
 Content to let the north-wind roar
 In baffled rage at pane and door,
 While the red logs before us beat
 The frost-line back with tropic heat, 160
 And ever, when a louder blast
 Shook beam and rafter as it passed,
 The merrier up its roaring draught
 The great throat of the chimney laughed,
 The house-dog on his paws outspread 165
 Laid to the fire his drowsy head,
 The cat's dark silhouette on the wall
 A couchant tiger's seemed to fall,
 And, for the winter fireside meet,
 Between the andirons' straddling feet, 170
 The mug of cider summered slow,
 The apples sputtered in a row,
 And, close at hand, the basket stood
 With nuts from brown October's wood

What matter how the night behaved? 175
 What matter how the north-wind raved?
 Blow high, blow low, not all its snow
 Could quench our hearth-fire's ruddy glow
 O Time and Change!—with hair as gray
 As was my sire's that winter day, 180
 How strange it seems, with so much gone
 Of life and love, to still live on!
 Ah, brother!³ only I and thou
 Are left of all that circle now,—
 The dear home faces whereupon 185
 That fitful firelight paled and shone
 Henceforward, listen as we will,
 The voices of that hearth are still,
 Look where we may, the wide earth o'er,
 Those lighted faces smile no more 190
 We tread the paths their feet have worn,
 We sit beneath their orchard trees,
 We hear, like them, the hum of bees
 And rustle of the bladed corn,
 We turn the pages that they read, 195
 Their written words we linger o'er,

³ Matthew, Whittier's younger brother, who died in 1883 at the age of 71

But in the sun they cast no shade,
 No voice is heard, no sign is made,
 No step is on the conscious floor!
 Yet Love will dream and Faith will
 trust 200
 (Since He who knows our need is just)
 That somehow, somewhere, meet we must
 Alas for him who never sees
 The stars shine through his cypress-trees!
 Who, hopeless, lays his dead away, 205
 Nor looks to see the breaking day
 Across the mournful marbles play!
 Who hath not learned, in hours of faith,
 The truth to flesh and sense unknown,
 That Life is ever lord of Death, 210
 And Love can never lose its own!

We sped the time with stories old,
 Wrought puzzles out, and riddles told,
 Or stammered from our school-book lore
 "The chief of Gambia's golden shore" * 215
 How often since, when all the land
 Was clay in Slavery's shaping hand,
 As if a far-blown trumpet stirred
 The languorous, sin-sick air, I heard
 "Does not the voice of reason cry, 220
 Claim the first right which Nature gave,
 From the red scourge of bondage fly
 Nor deign to live a burdened slave!"
 Our father rode again his ride
 On Memphremagog's wooded side, 225
 Sat down again to moose and samp
 In trapper's hut and Indian camp,
 Laved o'er the old idyllic ease
 Beneath St François' hemlock trees,
 Again for him the moonlight shone 230
 On Norman cap and bodiced zone,
 Again he heard the violin play
 Which led the village dance away,
 And mingled in its merry whirl
 The grandam and the laughing girl 235
 Or, nearer home, our steps he led
 Where Salisbury's level marshes spread
 Mile-wide as flies the laden bee,
 Where merry mowers, hale and strong,
 Swept, scythe on scythe, their swaths
 along 240
 The low green prairies of the sea
 We shared the fishing off Boar's Head,

And round the rocky Isles of Shoals
 The hake-broil on the driftwood coals,
 The chowder on the sand-beach made, 245
 Dipped by the hungry, steaming hot,
 With spoons of clam-shell from the pot
 We heard the tales of witchcraft old,
 And dream and sign and marvel told
 To sleepy listeners as they lay 250
 Stretched idly on the salted hay,
 Adrift along the winding shores,
 When favoring breezes deigned to blow
 The square sail of the gundalow,⁵
 And idle lay the useless oars 255

Our mother, while she turned her wheel
 Or run the new-knit stocking-heel,
 Told how the Indian hordes came down
 At midnight on Cochecho town,
 And how her own great-uncle bore 260
 His cruel scalp-mark to fourscore
 Recalling, in her fitting phrase,
 So rich and picturesque and free
 (The common unrhymed poetry
 Of simple life and country ways), 265
 The story of her early days,—
 She made us welcome to her home,
 Old hearths grew wide to give us room,
 We stole with her a frightened look
 At the gray wizard's conjuring-book,⁶ 270
 The fame whereof went far and wide
 Through all the simple country-side,
 We heard the hawks at twilight play,
 The boat-horn on Piscataqua,⁷
 The loon's weird laughter far away, 275
 We fished her little trout-brook, knew
 What flowers in wood and meadow grew,
 What sunny hillsides autumn-brown
 She climbed to shake the ripe nuts down,
 Saw where in sheltered cove and bay 280

* This line, and the four quoted just below, are from "The African Chief," by Sarah Wentworth Morton (1759-1846), American poetess. The poem was a favorite selection in school readers.

⁵ Local name, variant of "gondola," for small craft used in New England rivers and coastal waters.

⁶ See the account in Whittier's essay on "Magicians and Witch Folk," the second selection following.

⁷ River of New Hampshire.

The ducks' black squadron anchored lay,
And heard the wild geese calling loud
Beneath the gray November cloud

Then, haply, with a look more grave,
And somberer tone, some tale she gave 285
From painful Sewel's ancient tome,⁸
Beloved in every Quaker home,
Of faith fire-winged by martyrdom,
Or Chalkley's Journal,⁹ old and quaint,—
Gentlest of skippers, rare sea-saint!— 290
Who, when the dreary calms prevailed,
And water-butt and bread-cask failed,
And cruel, hungry eyes pursued
His portly presence, mad for food,
With dark hints muttered under breath 295
Of casting lots for life or death,
Offered, if Heaven withheld supplies,
To be himself the sacrifice
Then, suddenly, as if to save
The good man from his living grave, 300
A ripple on the water grew,
A school of porpoise flashed in view
"Take, cat," he said, "and be content,
These fishes in my stead are sent
By Him who gave the tangled ram ¹⁰ 305
To spare the child of Abraham"

Our uncle, innocent of books,
Was rich in lore of fields and brooks,
The ancient teachers never dumb
Of Nature's unhoused lyceum 310
In moons and tides and weather wise,
He read the clouds as prophecies,
And foul or fair could well divine,
By many an occult hint and sign,
Holding the cunning-warded keys 315
To all the woodcraft mysteries;
Himself to Nature's heart so near
That all her voices in his ear
Of beast or bird had meanings clear,
Like Apollonius ¹¹ of old, 320
Who knew the tales the sparrows told,
Or Hermes,¹² who interpreted
What the sage cranes of Nilus said:
A simple, guileless, childlike man,
Content to live where life began; 325
Strong only on his native grounds,
The little world of sights and sounds
Whose girdle was the parish bounds,

Whereof his fondly partial pride
The common features magnified, 330
As Surrey hills to mountains grew
In White ¹³ of Selborne's loving view,—
He told how teal and loon he shot,
And how the eagle's eggs he got,
The feats on pond and river done, 335
The prodigies of rod and gun,
Till, warming with the tales he told,
Forgotten was the outside cold,
The bitter wind unheeded blew,
From ripening corn the pigeons flew, 340
The partridge drummed i' the wood, the
mink
Went fishing down the river-bank
In fields with bean or clover gay,
The woodchuck, like a hermit gray,
Peered from the doorway of his cell, 345
The muskrat phied the mason's trade,
And tier by tier his mud-walls laid,
And from the shagbark overhead
The grizzled squirrel dropped his shell

Next, the dear aunt, whose smile of
cheer 350
And voice in dreams I see and hear,—
The sweetest woman ever Fate
Perverse denied a household mate,
Who, lonely, homeless, not the less

⁸ William Sewel's *History of the Rise, Increase and Progress of the People Called Quakers*. Originally written in Low Dutch and published at Amsterdam in 1717, it was translated into English by the author, published at London in 1722 and at Philadelphia in 1728, and became a Quaker classic

⁹ Thomas Chalkley, (1675-1741), Quaker manner and missionary, kept a journal of trading voyages and preaching tours, which was published at Philadelphia in 1747. Whittier follows closely his account of this incident

¹⁰ Genesis 23 13.

¹¹ Greek seer and wonder-worker

¹² Hermes Trismegistus, Greek name for the Egyptian god Thoth, master of occult wisdom

¹³ Gilbert White (1720-93), British clergyman and naturalist, whose *Natural History and Antiquities of Selborne* (1789) describes the region where he spent most of his life

Found peace in love's unselfishness, 355
 And welcome whereso'er she went,
 A calm and gracious element,
 Whose presence seemed the sweet income
 And womanly atmosphere of home,—
 Called up her girlhood memories, 360
 The huskings and the apple-bees,
 The sleigh-rides and the summer sails,
 Weaving through all the poor details
 And homespun warp of circumstance
 A golden wool-thread of romance 365
 For well she kept her genial mood
 And simple faith of maidenhood,
 Before her still a cloud-land lay,
 The mirage loomed across her way,
 The morning dew, that dried so soon 370
 With others, glistened at her noon,
 Through years of toil and soil and care,
 From glossy tress to thin gray hair,
 All unprofaned she held apart
 The virgin fancies of the heart 375
 Be shame to him of woman born
 Who had for such but thought of scorn

There, too, our elder sister plied
 Her evening task the stand beside,
 A full, rich nature, free to trust, 380
 Truthful and almost sternly just,
 Impulsive, earnest, prompt to act,
 And make her generous thought a fact,
 Keeping with many a light disguise
 The secret of self-sacrifice 385
 O heart sore-tried! thou hast the best
 That Heaven itself could give thee,—rest,
 Rest from all bitter thoughts and things!
 How many a poor one's blessing went
 With thee beneath the low green tent 390
 Whose curtain never outward swings!

As one who held herself a part
 Of all she saw, and let her heart
 Against the household bosom lean,
 Upon the motley-braided mat 395
 Our youngest and our dearest sat,
 Lifting her large, sweet, asking eyes,
 Now bathed within the fadeless green
 And holy peace of Paradise¹⁴
 Oh, looking from some heavenly hill, 400
 Or from the shade of saintly palms,
 Or silver reach of river calms,

Do those large eyes behold me still?
 With me one little year ago —
 The chill weight of the winter snow 405
 For months upon her grave has lain,
 And now, when summer south-winds blow
 And brier and harebell bloom again,
 I tread the pleasant paths we trod,
 I see the violet-sprinkled sod, 410
 Whereon she leaned, too frail and weak
 The hillside flowers she loved to seek,
 Yet following me where'er I went
 With dark eyes full of love's content
 The birds are glad, the brier-rose fills 415
 The air with sweetness, all the hills
 Stretch green to June's unclouded sky,
 But still I wait with ear and eye
 For something gone which should be nigh,
 A loss in all familiar things, 420
 In flower that blooms, and bird that sings
 And yet, dear heart! remembering thee,
 Am I not richer than of old?
 Safe in thy immortality,
 What change can reach the wealth I
 hold? 425
 What chance can mar the pearl and gold
 Thy love hath left in trust with me?
 And while in life's late afternoon,
 Where cool and long the shadows grow,
 I walk to meet the night that soon 430
 Shall shape and shadow overflow,
 I cannot feel that thou art far,
 Since near at need the angels are,
 And when the sunset gates unbar,
 Shall I not see thee waiting stand, 435
 And, white against the evening star,
 The welcome of thy beckoning hand?

Brisk wielder of the birch and rule,
 The master of the district school
 Held at the fire his favored place, 440
 Its warm glow lit a laughing face
 Fresh-hued and fair, where scarce appeared
 The uncertain prophecy of beard
 He teased the mitten-blinded cat,
 Played cross-pins on my uncle's hat, 445
 Sang songs, and told us what befalls
 In classic Dartmouth's college halls

¹⁴ Elizabeth, Whittier's younger sister, died in 1864, the year before *Snow-Bound* was written

Born the wild Northern hills among,
 From whence his yeoman father wrung
 By patient toil subsistence scant, 450
 Not competence and yet not want,
 He early gained the power to pay
 His cheerful, self-reliant way,
 'Could doff at ease his scholar's gown
 To peddle wares from town to town, 455
 Or through the long vacation's reach
 In lonely lowland districts teach,
 Where all the droll experience found
 At stranger hearths in boarding round,
 The moonlit skater's keen delight, 460
 The sleigh-drive through the frosty night,
 The rustic party, with its rough
 Accompaniment of blind-man's-buff,
 And whirling plate, and forfeits paid,
 His winter task a pastime made 465
 Happy the snow-locked homes wherein
 He tuned his merry violin,
 Or played the athlete in the barn,
 Or held the good dame's winding-yarn,
 On mirth-provoking versions told 470
 Of classic legends rare and old,
 Wherein the scenes of Greece and Rome
 Had all the commonplace of home,
 And little seemed at best the odds
 'Twixt Yankee pedlers and old gods, 475
 Where Pindus-born Arachthus¹⁵ took
 The guise of any grist-mill brook,
 And dread Olympus at his will
 Became a huckleberry hill

A careless boy that night he seemed, 480
 But at his desk he had the look
 And air of one who wisely schemed,
 And hostage from the future took
 In trained thought and lore of book
 Large-brained, clear-eyed,—of such as
 he 485
 Shall Freedom's young apostles be,
 Who, following in War's bloody trail,
 Shall every lingering wrong assail,
 All chains from limb and spirit strike,
 Uplift the black and white alike, 490
 Scatter before their swift advance
 The darkness and the ignorance,
 The pride, the lust, the squalid sloth,
 Which nurtured Treason's monstrous
 growth,

Made murder pastime, and the hell 495
 Of prison-torture possible,
 The cruel he of caste refute,
 Old forms remould, and substitute
 For Slavery's lash the freeman's will,
 For blind routine, wise-handed skill, 500
 A school-house plant on every hill,
 Stretching in radiate nerve-lines thence
 The quick wires of intelligence,
 Till North and South together brought
 Shall own the same electric thought, 505
 In peace a common flag salute,
 And, side by side in labor's free
 And unresentful rivalry,
 Harvest the fields wherein they fought

Another guest that winter night 510
 Flashed back from lustrous eyes the light
 Unmarked by time, and yet not young,
 The honeyed music of her tongue
 And words of meekness scarcely told
 A nature passionate and bold, 515
 Strong, self-concentred, spurning guide,
 Its milder features dwarfed beside
 Her unbent will's majestic pride
 She sat among us, at the best,
 A not unfear'd, half-welcome guest, 520
 Rebuking with her cultured phrase
 Our homeliness of words and ways
 A certain pard-like, treacherous grace
 Swayed the lithe limbs and dropped the
 lash,
 Lent the white teeth their dazzling
 flash, 525
 And under low brows, black with night,
 Rayed out at times a dangerous light,
 The sharp heat-lightnings of her face
 Presaging ill to him whom Fate
 Condemned to share her love or hate 530
 A woman tropical, intense
 In thought and act, in soul and sense,
 She blended in a like degree
 The vixen and the devotee,
 Revealing with each freak or feint 535
 The temper of Petruchio's Kate,¹⁶

¹⁵ River rising in the Pindus mountains of northwestern Greece

¹⁶ Heroine of Shakespeare's *The Taming of the Shrew*

The raptures of Siena's saint¹⁷
 Her tapering hand and rounded wrist
 Had facile power to form a fist,
 The warm, dark languish of her eyes 540
 Was never safe from wrath's surprise
 Brows saintly calm and lips devout
 Knew every change of scowl and pout,
 And the sweet voice had notes more high
 And shrill for social battle-cry 545

Since then what old cathedral town
 Has missed her pilgrim staff and gown,
 What convent-gate has held its lock
 Against the challenge of her knock!
 Through Smyrna's plague-hushed thorough-
 fares, 550
 Up sea-set Malta's rocky stairs,
 Gray olive slopes of hills that hem
 Thy tombs and shrines, Jerusalem,
 Or startling on her desert throne
 The crazy Queen of Lebanon 555
 With claims fantastic as her own,
 Her tireless feet have held their way,
 And still, unrestful, bowed, and gray,
 She watches under Eastern skies,
 With hope each day renewed and
 fresh, 560
 The Lord's quick coming in the flesh,
 Whereof she dreams and prophecies!

Where'er her troubled path may be,
 The Lord's sweet pity with her go!
 The outward wayward life we see, 565
 The hidden springs we may not know
 Nor is it given us to discern
 What threads the fatal sisters spun,
 Through what ancestral years has run
 The sorrow with the woman born, 570
 What forged her cruel chain of moods,
 What set her feet in solitudes,
 And held the love within her mute,
 What mingled madness in the blood,
 A lifelong discord and annoy, 575
 Water of tears with oil of joy,
 And hid within the folded bud
 Perversities of flower and fruit
 It is not ours to separate
 The tangled skein of will and fate, 580
 To show what metes and bounds should
 stand

Upon the soul's debatable land
 And between choice and Providence
 Divide the circle of events,
 But He who knows our frame is just, 585
 Merciful and compassionate,
 And full of sweet assurances
 And hope for all the language is,
 That He remembereth we are dust!

At last the great logs, crumbling low, 590
 Sent out a dull and duller glow,
 The bull's-eye watch that hung in view,
 Ticking its weary circuit through,
 Pointed with mutely-warning sign
 Its black hand to the hour of nine 595
 That sign the pleasant circle broke
 My uncle ceased his pipe to smoke,
 Knocked from its bowl the refuse gray,
 And laid it tenderly away,
 Then roused himself to safely cover 600
 The dull red brands with ashes over
 And while, with care, our mother laid
 The work aside, her steps she stayed
 One moment, seeking to express
 Her grateful sense of happiness 605
 For food and shelter, warmth and health,
 And love's contentment more than wealth,
 With simple wishes (not the weak,
 Vain prayers which no fulfilment seek,
 But such as warm the generous heart, 610
 O'er-prompt to do with Heaven its part)
 That none might lack, that bitter night,
 For bread and clothing, warmth and light

Within our beds awhile we heard
 The wind that round the gables roared, 615
 With now and then a ruder shock,
 Which made our very bedsteads rock
 We heard the loosened clapboards tost,
 The board-nails snapping in the frost,
 And on us, through the unplastered
 wall, 620
 Felt the light-sifted snow-flakes fall,
 But sleep stole on, as sleep will do
 When hearts are light and life is new,
 Faint and more faint the murmurs grew,
 Till in the summer-land of dreams 625

¹⁷ Saint Catherine of Siena, famed for her gentleness.

They softened to the sound of streams,
 Low stir of leaves, and dip of oars,
 And lapping waves on quiet shores

Next morn we wakened with the shout
 Of merry voices high and clear, 630
 And saw the teamsters drawing near
 To break the drifted highways out
 Down the long hillside treading slow
 We saw the half-buried oxen go,
 Shaking the snow from heads uptost, 635
 Their straining nostrils white with frost
 Before our door the straggling train
 Diew up, an added team to gain
 The elders threshed their hands a-cold,
 Passed, with the cider-mug, their
 jokes 640
 From lip to lip, the younger folks
 Down the loose snow-banks, wrestling,
 rolled,
 Then toiled again the cavalcade
 O'er windy hill, through clogged ravine,
 And woodland paths that wound be-
 tween 645
 Low drooping pine-boughs winter-weighted
 From every barn a team afoot,
 At every house a new recruit,
 Where, drawn by Nature's subtlest law,
 Haply the watchful young men saw 650
 Sweet doorway pictures of the curls
 And curious eyes of merry girls,
 Lifting their hands in mock defence
 Against the snow-balls' compliments,
 And reading in each missive tost 655
 The charm with Eden never lost

We heard once more the sleigh-bells' sound,
 And, following where the teamsters led,
 The wise old Doctor went his round,
 Just pausing at our door to say 660
 In the brief autocratic way
 Of one who, prompt at Duty's call,
 Was free to urge her claim on all,
 That some poor neighbor sick abed
 At night our mother's aid would need 665
 For, one in generous thought and deed,
 What mattered in the sufferer's sight
 The Quaker matron's inward light,
 The Doctor's mail of Calvin's creed?
 All hearts confess the saints elect 670

Who, twain in faith, in love agree,
 And melt not in an acid sect
 The Christian pearl of charity!

So days went on a week had passed
 Since the great world was heard from
 last 675
 The Almanac we studied o'er,
 Read and reread our little store
 Of books and pamphlets, scarce a score,
 One harmless novel, mostly hid
 From younger eyes, a book forbid, 680
 And poetry, (or good or bad,
 A single book was all we had,)
 Where Ellwood's¹⁸ meek, drab-skirted
 Muse,
 A stranger to the heathen Nine,
 Sang, with a somewhat nasal whine, 685
 The wars of David and the Jews
 At last the floundering carrier bore
 The village paper to our door
 Lo' broadening outward as we read,
 To warmer zones the horizon spread, 690
 In panoramic length unrolled
 We saw the marvel that it told¹⁹
 Before us passed the painted Creeks,
 And daft McGregor on his raids
 In Costa Rica's everglades 695
 And up Taygetus winding slow
 Rode Ypsilanti's Mamote Greeks,
 A Turk's head at each saddle bow!
 Welcome to us its week-old news,
 Its corner for the rustic Muse, 700
 Its monthly gauge of snow and rain,
 Its record, mingling in a breath
 The wedding bell and dirge of death
 Jest, anecdote, and love-lorn tale,

¹⁸ Thomas Ellwood (1639-1714), English poet who became a Quaker, friend of Milton and author of *Daviders*

¹⁹ The news items mentioned by Whittier place the period of *Snow-Bound* in 1821, the year of the removal of the Creek Indians to the Indian Territory, or in 1822, when Sir Gregor McGregor was attempting to found a colony in Costa Rica. The "Mamote Greeks" were pirate bands who joined in the Greek war for independence from Turkey, 1821-29. Demetrios Ypsilanti (1793-1832) was a leader in the revolutionary movement, which won much sympathy in the United States.

The latest culprit sent to jail, 705
 Its hue and cry of stolen and lost,
 Its vendue sales and goods at cost,
 And traffic calling loud for gain
 We felt the stir of hall and street,
 The pulse of life that round us beat, 710
 The chill embargo of the snow
 Was melted in the genial glow,
 Wide swung again our ice-locked door,
 And all the world was ours once more!

Clasp, Angel of the backward look 715
 And folded wings of ashen gray
 And voice of echoes far away,
 The brazen covers of thy book,
 The wend palimpsest old and vast,
 Wherein thou hid'st the spectral past, 720
 Where, closely mingling, pale and glow
 The characters of joy and woe,
 The monographs of outlived years,
 Or smile-illumed or dim with tears,
 Green hills of life that slope to death, 725
 And haunts of home, whose vistaed trees
 Shade off to mournful cypresses

With the white amarantus underneath
 Even while I look, I can but heed
 The restless sands' incessant fall, 730
 Importunate hours that hours succeed,
 Each clamorous with its own sharp need,
 And duty keeping pace with all
 Shut down and clasp the heavy lids,
 I hear again the voice that bids 735
 The dreamer leave his dream midway
 For larger hopes and graver fears
 Life greatens in these later years,
 The century's aloe flowers to-day!

Yet, haply, in some lull of life, 740
 Some Truce of God which breaks the strife,
 The worldling's eyes shall gather dew,
 Dreaming in throngful city ways
 Of winter joys his boyhood knew,
 And dear and early friends—the few 745
 Who yet remain—shall pause to view
 These Flemish pictures of old days,
 Sit with me by the homestead hearth,
 And stretch the hands of memory forth
 To warm them at the wood-fire's
 blaze! 750
 And thanks untraced to lips unknown

Shall greet me like the odors blown
 From unseen meadows newly mown,
 Or lilies floating in some pond,
 Wood-fringed, the wayside gaze be-
 yond, 755
 The traveller owns the grateful sense
 Of sweetness near, he knows not whence,
 And, pausing, takes with forehead bare
 The benediction of the air

 LITERARY RECREATIONS AND
 MISCELLANIES

THE LIGHTING UP
 [1854 (1845)]

"He spak to the spynnsters to spynnen
 it oute"

—*Piers Ploughman*

THIS evening, the 20th of the ninth
 month, is the time fixed upon for lighting
 the mills for night labor, and I have just
 returned from witnessing for the first
 time the effect of the new illumination

Passing over the bridge, nearly to the
 Dracut shore, I had a fine view of the
 long line of mills, the city beyond, and the
 broad sweep of the river from the falls
 The light of a tranquil and gorgeous sun-
 set was slowly fading from river and sky,
 and the shadows of the trees on the Dracut
 slopes were blending in dusky indistinct-
 ness with the great shadow of night Sud-
 denly gleams of light broke from the black
 masses of masonry on the Lowell bank,
 at first feeble and scattered, flitting from
 window to window, appearing and disap-
 pearing, like will-o'-wispes in a forest or
 fireflies in a summer's night Anon tier
 after tier of windows became radiant, until
 the whole vast wall, stretching far up the
 river, from basement to roof, became check-
 ered with light reflected with the starbeams
 from the still water beneath With a little
 effort of fancy, one could readily trans-
 form the huge mills, thus illuminated, into
 palaces lighted up for festival occasions,

and the figures of the workers, passing to and fro before the windows, into forms of beauty and fashion, moving in graceful dances

Alas! this music of the shuttle and the daylong dance to it are not altogether of the kind which Milton speaks of when he invokes the "soft Lydian airs"¹ of voluptuous leisure. From this time henceforward for half a weary year, from the bell-call of morning twilight to half-past seven in the evening, with brief intermissions for two hasty meals, the operatives will be confined to their tasks. The proverbial facility of the Yankees in despatching their dinners in the least possible time seems to have been taken advantage of and reduced to a system on the Lowell corporations. Strange as it may seem to the uninitiated, the workmen and women here continue to repair to their lodgings, make the necessary preliminary ablutions, devour their beef and pudding, and hurry back to their looms and jacks in the brief space of half an hour. In this way the working-day in Lowell is eked out to an average throughout the year of twelve and a half hours. This is a serious evil, demanding the earnest consideration of the humane and philanthropic. Both classes—the employer and the employed—would in the end be greatly benefited by the general adoption of the "ten-hour system," although the one might suffer a slight diminution in daily wages and the other in yearly profits. Yet it is difficult to see how this most desirable change is to be effected. The stronger and healthier portion of the operatives might themselves object to it as strenuously as the distant stockholder who looks only to his semi-annual dividends. Health is too often a matter of secondary consideration. Gain is the great, all-absorbing object. Very few, comparatively, regard Lowell as their "continuing city." They look longingly back to green valleys of Vermont, to quiet farm-houses on the head-waters of the Connecticut and Merrimac, and to old familiar homes along the breezy seaboard of New England, whence

they have been urged by the knowledge that here they can earn a larger amount of money in a given time than in any other place or employment. They come here for gain, not for pleasure, for high wages, not for the comforts that cluster about home. Here are poor widows toiling to educate their children, daughters hoarding their wages to redeem mortgaged paternal homesteads or to defray the expenses of sick and infirm parents, young betrothed girls, about to add their savings to those of their country lovers. Others there are, of maturer age, lonely and poor, impelled hither by a proud unwillingness to test to its extent the charity of friends and relatives, and a strong yearning for the "glorious privilege of being independent." All honor to them! Whatever may have closed against them the gates of matrimony, whether their own obduracy or the faithlessness or indifference of others, instead of shutting themselves up in a nunnery or taxing the good nature of their friends by perpetual demands for sympathy and support, like weak vines, putting out their feelers in every direction for something to twine upon, is it not better and wiser for them to go quietly at work, to show that woman has a self-sustaining power, that she is something in and of herself, that she, too, has a part to bear in life, and, in common with the self-elected "lords of creation," has a direct relation to absolute being? To such the factory presents the opportunity of taking the first and essential step of securing, within a reasonable space of time, a comfortable competency.

There are undoubtedly many evils connected with the working of these mills, yet they are partly compensated by the fact that here, more than in any other mechanical employment, the labor of woman is placed essentially upon an equality with that of man. Here, at least, one of the many social disabilities under which woman as a distinct individual, unconnected with the other sex, has labored in all time, is

¹ "L'Allegro," line 136

removed, the work of her hands is adequately rewarded, and she goes to her daily task with the consciousness that she is not "spending her strength for naught"

The *Lowell Offering*,² which has been for the last four years published monthly in this city, consisting entirely of articles written by females employed in the mills, has attracted much attention and obtained a wide circulation. This may be in part owing to the novel circumstances of its publication, but it is something more and better than a mere novelty. In its volumes may be found sprightly delineations of home scenes and characters, highly wrought imaginative pieces, tales of genuine pathos and humor, and pleasing fairy stories and fables. The *Offering* originated in a reading society of the mill girls, which, under the name of the Improvement Circle, was convened once in a month. At its meetings, pieces written by its members and dropped secretly into a sort of "lion's mouth," provided for the purpose of insuring the authors from detection, were read for the amusement and criticism of the company. This circle is still in existence, and I owe to my introduction to it some of the most pleasant hours I have passed in Lowell.

The manner in which the *Offering* has been generally noticed in this country has not, to my thinking, been altogether in accordance with good taste or self-respect. It is hardly excusable for men, who, whatever may be their present position, have, in common with all of us, brothers, sisters, or other relations busy in workshop and dairy, and who have scarcely washed from their own professional hands the soil of labor, to make very marked demonstrations of astonishment at the appearance of a magazine whose papers are written by factory girls. As if the compatibility of mental cultivation with bodily labor and the equality and brotherhood of the human family were still open questions, depending for their decision very much on the production of positive proof that essays may be written and carpets woven by the same set of fingers!

The truth is, our democracy lacks calmness and solidity, the repose and self-reliance which come of long habitude and settled conviction. We have not yet learned to wear its simple truths with the graceful ease and quiet air of unsolicitous assurance with which the titled European does his social fictions. As a people, we do not feel and live out our great Declaration. We lack faith in man,—confidence in simple humanity, apart from its environments.

"The age shows, to my thinking, more infidels to Adam,

Than directly, by profession, simple infidels to God"³

MAGICIANS AND WITCH FOLK [1854 (1847)]

"FASCINATION," said Henry Cornelius Agrippa, in the fiftieth chapter of his first book on Occult Philosophy,¹ "is a binding which comes of the spirit of the witch through the eyes of him that is bewitched, entering to his heart, for the eye being opened and intent upon any one, with a strong imagination doth dart its beams, which are the vehiculum of the spirit, into the eyes of him that is opposite to her, which tender spirit strikes his eyes, stuns up and wounds his heart, and infects his spirit. Whence Apuleius saith, 'Thy eyes, sliding down through my eyes into my inmost heart, striketh up a most vehement burning.' And when eyes are reciprocally intent upon each other, and when rays are joined to rays, and lights to lights, then the spirit of the one is joined to that of the other, so are strong ligations made and vehement loves inflamed." Taking this defi-

³ Elizabeth B. Browning—Whittier's note.

¹ See quotation from this book at the beginning of *Snow-Bound*. Agrippa (1486?-1535) was a German physician, theologian, and student of the occult.

dition of witchcraft, we sadly fear it is still practised to a very great extent among us. The best we can say of it is, that the business seems latterly to have fallen into younger hands, its victims do not appear to regard themselves as especial objects of compassion, and neither church nor state seems inclined to interfere with it.

As might be expected in a shrewd community like ours, attempts are not unfrequently made to speculate in the supernatural—to “make gain of sooth-saying.” In the autumn of last year a “wise woman” dreamed, or somnambulized, that a large sum of money, in gold and silver coin, lay buried in the centre of the great swamp in Poplin, New Hampshire, whereupon an immediate search was made for the precious metal. Under the bleak sky of November, in biting frost and sleet rain, some twenty or more grown men, graduates of our common schools, and liable, every mother’s son of them, to be made deacons, squares, and general court members, and such other drill officers as may be requisite in the march of mind, might be seen delving in grim earnest, breaking the frozen earth, uprooting swamp-maples and hemlocks, and waking, with sledge and crowbar, unwonted echoes in a solitude which had heretofore only answered to the woodman’s axe or the scream of the wild fowl. The snows of December put an end to their labors, but the yawning excavation still remains, a silent but somewhat expressive commentary upon the age of progress.

Still later, in one of our Atlantic cities, an attempt was made, partially at least successful, to form a company for the purpose of digging for money in one of the desolate sand-keys of the West Indies. It appears that some mesmerized “subject,” in the course of one of those somnambulant voyages of discovery in which the traveller, like Satan in chaos²,—

“O’er bog, o’er steep, through straight,
rough, dense, or rare,
With head, hands, wings, or feet, pursues
his way,

And swims, or sinks, or wades, or creeps,
or flies,”—

while peering curiously into the earth’s mysteries, chanced to have his eyes gladdened by the sight of a huge chest packed with Spanish coins, the spoil, doubtless, of some rich-freighted argosy, or Carthagena galleon, in the rare days of Queen Elizabeth’s Christian buccaneers.

During the last quarter of a century, a colored woman in one of the villages on the southern border of New Hampshire has been consulted by hundreds of anxious inquirers into the future. Long experience in her profession has given her something of that ready estimate of character, that quick and keen appreciation of the capacity, habits, and wishes of her visitors, which so remarkably distinguished the late famous Madame Le Normand, of Paris, and if that old squalid sorceress, in her cramped Parisian attic, redolent of garlic and bestrewn with greasy implements of sorry house-wifery, was, as has been affirmed, consulted by such personages as the fair Josephine Beauharnais, and the “man of destiny,” Napoleon himself, is it strange that the desire to lift the veil of the great mystery before us should overcome in some degree our peculiar and most republican prejudice against color, and reconcile us to the disagreeable necessity of looking at futurity through a black medium?

Some forty years ago, on the banks of the pleasant little creek separating Berwick, in Maine, from Somersworth, in New Hampshire, within sight of my mother’s home, dwelt a plain, sedate member of the society of Friends, named Bantum. He passed throughout a circle of several miles as a conjurer and skilful adept in the art of magic. To him resorted farmers who had lost their cattle, matrons whose household gear, silver spoons, and table linen had

² Milton’s *Paradise Lost*, Book II, lines 948-50

been stolen, or young maidens whose lovers were absent, and the quiet, meek-spirited old man received them all kindly, put on his huge iron-rimmed spectacles, opened his "conjuring book," which my mother describes as a large clasped volume in strange language and black-letter type, and after due reflection and consideration gave the required answers without money and without price. The curious old volume is still in the possession of the conjurer's family. Apparently inconsistent as was this practice of the black art with the simplicity and truthfulness of his religious profession, I have not been able to learn that he was ever subjected to censure on account of it. It may be that our modern conjurer defended himself on grounds similar to those assumed by the celebrated knight of Nettesheim, in the preface to his first Book of Magic. "Some," says he, "may crie oute that I teach forbidden arts, sow the seed of heresies, offend pious ears, and scandalize excellent wits, that I am a sorcerer, superstitious and devilish, who indeed am a magician. To whom I answer, that a magician doth not among learned men signifie a sorcerer or one that is superstitious or devilish, but a wise man, a priest, a prophet, and that the sibyls prophesied most clearly of Christ, that magicians, as wise men, by the wonderful secrets of the world, knew Christ to be born, and came to worship him, first of all, and that the name of magicke is received by philosophers, commended by divines, and not unacceptable to the Gospel."

The study of astrology and occult philosophy, to which many of the finest minds of the Middle Ages devoted themselves without molestation from the Church, was never practised with impunity after the Reformation. The Puritans and Presbyterians, taking the Bible for their rule, "suffered not a witch to live," and, not content with burning the books of those who "used curious arts" after the manner of the Ephesians, they sacrificed the students themselves on the same pile. Hence we hear little of learned and scientific wizards in

New England. One remarkable character of this kind seems, however, to have escaped the vigilance of our modern Doctors of the Mosaic Law. Dr. Robert Child came to this country about the year 1644, and took up his residence in the Massachusetts colony. He was a man of wealth, and owned plantations at Nashaway, now Lancaster, and at Saco, in Maine. He was skilful in mineralogy and metallurgy, and seems to have spent a good deal of money in searching for mines. He is well known as the author of the first decided movement for liberty of conscience in Massachusetts, his name standing at the head of the famous petition of 1646 for a modification of the laws in respect to religious worship, and complaining in strong terms of the disfranchisement of persons not members of the Church. A tremendous excitement was produced by this remonstrance, clergy and magistrates joined in denouncing it, Dr. Child and his associates were arrested, tried for contempt of government, and heavily fined. The Court, in passing sentence, assured the Doctor that his crime was only equalled by that of Korah³ and his troop, who rebelled against Moses and Aaron. He resolved to appeal to the Parliament of England, and made arrangements for his departure, but was arrested, and ordered to be kept a prisoner in his own house until the vessel in which he was to sail had left Boston. He was afterwards imprisoned for a considerable length of time, and on his release found means to return to England. The Doctor's trunks were searched by the Puritan authorities while he was in prison, but it does not appear that they detected the occult studies to which he was addicted, to which lucky circumstance it is doubtless owing that the first champion of religious liberty in the New World was not hung for a wizard.

Dr. Child was a graduate of the renowned University of Padua, and had travelled extensively in the Old World. Prob-

³ Numbers, chap. 16

ably, like Michael Scott,⁴ he had

"Learned the art of glammarye"⁵

In Padua, beyond the sea,"

for I find in the dedication of an English translation of a Continental work on astrology and magic, printed in 1651 "at the sign of the Three Bibles," that his "sublime hermeticall and theomagicall lore" is compared to that of Hermes and Agrippa. He is complimented as a master of the mysteries of Rome and Germany, and as one who had pursued his investigations among the philosophers of the Old World and the Indians of the New, "leaving no stone unturned, the turning whereof might conduce to the discovery of what is occult."

There was still another member of the Friends' society in Vermont, of the name of Austin, who, in answer, as he supposed, to prayer and a long-cherished desire to benefit his afflicted fellow-creatures, received, as he believed, a special gift of healing. For several years applicants from nearly all parts of New England visited him with the story of their sufferings and praying for a relief, which, it is averred, was in many instances really obtained. Letters from the sick who were unable to visit him, describing their diseases, were sent him, and many are yet living who believe that they were restored miraculously at the precise period of time when Austin was engaged in reading their letters. One of my uncles was commissioned to convey to him a large number of letters from sick persons in his neighborhood. He found the old man sitting in his plain parlor in the simplest garb of his sect—grave, thoughtful, venerable—a drab-coated Prince Hohenlohe.⁶ He received the letters in silence, read them slowly, casting them one after another upon a large pile of similar epistles in a corner of the apartment.

Half a century ago nearly every neighborhood in New England was favored with one or more reputed dealers in magic. Twenty years later there were two poor old sisters who used to frighten school urchins and "children of a larger growth" as they

rode down from New Hampshire on their gaunt skeleton horses, strung over with baskets for the Newburyport market. They were aware of the popular notion concerning them, and not unfrequently took advantage of it to levy a sort of blackmail upon their credulous neighbors. An attendant at the funeral of one of these sisters, who when living was about as unsubstantial as Ossian's⁷ ghost, through which the stars were visible, told me that her coffin was so heavy that four stout men could barely lift it.

One of my earliest recollections is that of an old woman, residing about two miles from the place of my nativity, who for many years had borne the unenviable reputation of a witch. She certainly had the look of one—a combination of form, voice, and features which would have made the fortune of an English witch finder in the days of Matthew Paris⁸ or the Sir John Podgers of Dickens,⁹ and insured her speedy conviction in King James's High Court of Justiciary. She was accused of divers ill-doings,—such as preventing the cream in her neighbor's churn from becoming butter, and snuffing out candles at huskings and quilting-parties.

⁴ Michael Scot (1175?-1234?) was a mediæval scholar who translated Aristotle and introduced the study of his work at Oxford in 1230. He was also famed for occult wisdom, and figures in this connection in Dante's *Inferno* and in Scott's *Lay of the Last Minstrel*.

⁵ A Scotch variant of "glammarye," referring here to magic. Compare Scott's lines in Canto First of *Lay of the Last Minstrel*.

"He learned the art, that none may name,
In Padua, far beyond the sea."

⁶ Alexander Leopold, prince of Hohenlohe-Waldenburg-Schillingsfurst, (1794-1849), who became a Roman Catholic priest and monk, and gained a reputation as a miracle-worker.

⁷ Legendary Irish hero and bard.

⁸ English chronicler (1200?-1259), a monk of St. Albans.

⁹ See *Master Humphrey's Clock*, chapter 111.

"She roamed the country far and near,

Bewitched the children of the peasants,
Dried up the cows, and lamed the deer,
And sucked the eggs, and killed the
pheasants "

The poor old woman was at length so sadly annoyed by her unfortunate reputation that she took the trouble to go before a justice of the peace, and made solemn oath that she was a Christian woman, and no witch

Not many years since a sad-visaged, middle-aged man might be seen in the streets of one of our sea-board towns at times suddenly arrested in the midst of a brisk walk and fixed motionless for some minutes in the busy thoroughfare. No effort could induce him to stir until, in his opinion, the spell was removed and his invisible tormentor suffered him to proceed. He explained his singular detention as the act of a whole family of witches whom he had unfortunately offended during a visit down East. It was rumored that the offence consisted in breaking off a matrimonial engagement with the youngest member of the family—a sorceress, perhaps, in more than one sense of the word, like that "winsome wench and wale" in Tam O'Shanter's witch-dance at Kirk Alloway. His only hope was that he should outlive his persecutors, and it is said that at the very hour in which the event took place he exultingly assured his friends that the spell was forever broken, and that the last of the family of his tormentors was no more.

When a boy, I occasionally met, at the house of a relative in an adjoining town, a stout, red-nosed old farmer of the neighborhood. A fine tableau he made of a winter's evening, in the red light of a birch-log fire, as he sat for hours watching its progress, with sleepy, half-shut eyes, changing his position only to reach the cider-mug on the shelf near him. Although he seldom opened his lips save to assent to some remark of his host or to answer a direct question, yet at times, when the cider-mug got the better of his taciturnity, he would amuse us with interesting details

of his early experiences in "the Ohio country."

There was, however, one chapter in these experiences which he usually held in reserve, and with which "the stranger intermeddled not." He was not willing to run the risk of hearing that which to him was a frightful reality turned into ridicule by scoffers and unbelievers. The substance of it, as I received it from one of his neighbors, forms as clever a tale of witchcraft as modern times have produced.

It seems that when quite a young man he left the homestead, and, strolling westward, worked his way from place to place until he found himself in one of the old French settlements on the Ohio River. Here he procured employment on the farm of a widow, and being a smart, active fellow, and proving highly serviceable in his department, he rapidly gained favor in the eyes of his employer. Ere long, contrary to the advice of the neighbors, and in spite of somewhat discouraging hints touching certain matrimonial infelicities experienced by the late husband, he resolutely stepped into the dead man's shoes. The mistress became the wife, and the servant was legally promoted to the head of the household.

For a time matters went on cosily and comfortably enough. He was now lord of the soil, and, as he laid in his crops of corn and potatoes, salted down his pork, and piled up his wood for winter's use, he naturally enough congratulated himself upon his good fortune and laughed at the sinister forebodings of his neighbors. But with the long winter months came a change over his "love's young dream." An evil and mysterious influence seemed to be at work in his affairs. Whatever he did after consulting his wife or at her suggestion resulted favorably enough, but all his own schemes and projects were unaccountably marred and defeated. If he bought a horse, it was sure to prove spavined or wind-broken. His cows either refused to give down their milk, or giving it, perversely kicked it over. A fine sow which he had

bargained for repaid his partialty by devoting, like Saturn, her own children By degrees a dark thought forced its way into his mind Comparing his repeated mischances with the ante-nuptial warnings of his neighbors, he at last came to the melancholy conclusion that his wife was a witch The victim in Motherwell's⁹ ballad of the Demon Lady, or the poor fellow in the Arabian tale who discovered that he had married a ghoul in the guise of a young and blooming princess, was scarcely in a more sorrowful predicament He grew nervous and fretful Old dismal nursery stories and all the witch lore of boyhood came back to his memory, and he crept to his bed like a criminal to the gallows, half afraid to fall asleep lest his mysterious companion should take a fancy to transform him into a horse, get him shod at the smithy, and ride him to a witch-meeting And, as if to make the matter worse, his wife's affection seemed to increase just in proportion as his troubles thickened upon him She aggravated him with all manner of caresses and endearments This was the drop too much The poor husband recoiled from her as from a waking nightmare His thoughts turned to New England, he longed to see once more the old homestead, with its tall well-sweep and butter-nut-trees by the roadside, and he sighed amidst the rich bottom-lands of his new home for his father's rocky pasture, with its crop of stunted mulleins So one cold November day, finding himself out of sight and hearing of his wife, he summoned courage to attempt an escape, and resolutely turning his back on the West, plunged into the wilderness towards the sunrise After a long and hard journey he reached his birthplace, and was kindly welcomed by his old friends Keeping a close mouth with respect to his unlucky adventure in Ohio, he soon after married one of his schoolmates, and, by dint of persevering industry and economy, in a few years found himself in possession of a comfortable home.

But his evil star still lingered above the

horizon One summer evening, on returning from the hayfield, who should meet him but his witch wife from Ohio! She came riding up the street on her old white horse, with a pillion behind the saddle Accosting him in a kindly tone, yet not without something of gentle reproach for his unhandsome desertion of her, she informed him that she had come all the way from Ohio to take him back again

It was in vain that he pleaded his later engagements, it was in vain that his new wife raised her shrillest remonstrances, not unmingled with expressions of vehement indignation at the revelation of her husband's real position, the witch wife was inexorable, go he must, and that speedily Fully impressed with a belief in her supernatural power of compelling obedience, and perhaps dreading more than witchcraft itself the effects of the unlucky disclosure on the temper of his New England helpmate, he made a virtue of the necessity of the case, bade farewell to the latter amidst a perfect hurricane of reproaches, and mounted the white horse, with his old wife on the pillion behind him Of that ride Burger¹⁰ might have written a counterpart to his ballad—

"Tramp, tramp, along the shore they ride,
Splash, splash, along the sea"

Two or three years had passed away, bringing no tidings of the unfortunate husband, when he once more made his appearance in his native village He was not disposed to be very communicative, but for one thing, at least, he seemed willing to express his gratitude His Ohio wife, having no spell against intermittent fever, had paid the debt of nature, and had left him free, in view of which, his surviving wife, after manifesting a due degree of resentment, consented to take him back to her bed and board, and I could never learn that she had cause to regret her clemency

From
 THE CONFLICT WITH SLAVERY
 [1889 (1843)]

DEMOCRACY AND SLAVERY

THE great leader of American Democracy, Thomas Jefferson, was an ultra-abolitionist in theory, while from youth to age a slave-holder in practice. With a zeal which never abated, with a warmth which the frost of years could not chill, he urged the great truths, that each man should be the guardian of his own weal, that one man should never have absolute control over another. He maintained the entire equality of the race, the inherent right of self-ownership, the equal claim of all to a fair participation in the enactment of the laws by which they are governed.

He saw clearly that slavery, as it existed in the South and on his own plantation, was inconsistent with this doctrine. His early efforts for emancipation in Virginia failed of success, but he next turned his attention to the vast northwestern territory, and laid the foundation of that ordinance of 1787, which, like the flaming sword of the angel at the gates of Paradise, has effectually guarded that territory against the entrance of slavery. Nor did he stop here. He was the friend and admirer of the ultra-abolitionists of revolutionary France, he warmly urged his British friend, Dr. Price,¹ to send his anti-slavery pamphlets into Virginia, he omitted no opportunity to protest against slavery as anti-democratic, unjust, and dangerous to the common welfare, and in his letter to the territorial governor of Illinois, written in old age, he bequeathed, in earnest and affecting language, the cause of negro emancipation to the rising generation. "This enterprise," said he, "is for the young, for those who can carry it forward to its consummation. It shall have all my prayers, and these are the only weapons of an old man."

Such was Thomas Jefferson, the great founder of American Democracy, the ad-

vocate of the equality of human rights, irrespective of any conditions of birth, or climate, or color. His political doctrines, it is strange to say, found their earliest recipients and most zealous admirers in the slave states of the Union. The privileged class of slave-holders, whose rank and station "supersede the necessity of an order of nobility," became earnest advocates of equality among themselves—the democracy of aristocracy. With the misery and degradation of servitude always before them, in the condition of their own slaves, an intense love of personal independence, and a haughty impatience of any control over their actions, prepared them to adopt the democratic idea, so far as it might be applied to their own order. Of that enlarged and generous democracy, the love, not of individual freedom alone, but of the rights and liberties of all men, the unselfish desire to give to others the privileges which all men value for themselves, we are constrained to believe the great body of Thomas Jefferson's slave-holding admirers had no adequate conception. They were just such democrats as the patricians of Rome and the aristocracy of Venice, lords over their own plantations, a sort of "holy alliance" of planters, admitting and defending each other's divine right of mastership.

Still, in Virginia, Maryland, and in other sections of the slave states, truer exponents and exemplifiers of the idea of democracy, as it existed in the mind of Jefferson, were not wanting. In the debate on the memorials presented to the first Congress of the United States, praying for the abolition of slavery, the voice of the Virginia delegation in that body was unanimous in deprecation of slavery as an evil, social, moral, and political. In the Virginia constitutional convention of 1829 there were men who had the wisdom to perceive and the firmness to declare that slavery was not only incompatible with the honor and

¹ Richard Price (1723-1791), Welsh moral and political philosopher, and Unitarian minister in London.

prosperity of the state, but wholly indefensible on any grounds which could be consistently taken by a republican people. In the debate on the same subject in the legislature in 1832, universal and impartial democracy found utterance from eloquent lips. We might say as much of Kentucky, the child of Virginia. But it remains true that these were exceptions to the general rule. With the language of universal liberty on their lips, and moved by the most zealous spirit of democratic propagandism, the greater number of the slave-holders of the Union seem never to have understood the true meaning, or to have measured the length and breadth of that doctrine which they were the first to adopt, and of which they have claimed all along to be the peculiar and chosen advocates.

The Northern States were slow to adopt the Democratic creed. The oligarchy of New England, and the rich proprietors and landholders of the Middle States, turned with alarm and horror from the levelling doctrines urged upon them by the "liberty and equality" propagandists of the South. The doctrines of Virginia were quite as unpalatable to Massachusetts at the beginning of the present century as those of Massachusetts now are to the Old Dominion. Democracy interfered with old usages and time-honored institutions, and threatened to plough up the very foundations of the social fabric. It was zealously opposed by the representatives of New England in Congress and in the home legislatures, and in many pulpits hands were lifted to God in humble entreaty that the curse and bane of democracy, an offshoot of the rabid Jacobinism of revolutionary France, might not be permitted to take root and overshadow the goodly heritage of Puritanism. The alarmists of the South, in their most feigned pictures of the evils to be apprehended from the prevalence of anti-slavery doctrines in their midst, have drawn nothing more fearful than the visions of such "Prophets of war and harbingers of ill" as Fisher Ames in the forum and Parish² in the desk, when contemplating the inroads

of Jeffersonian democracy upon the politics, religion, and property of the North.

But great numbers of the free laborers of the Northern States, the mechanics and small farmers, took a very different view of the matter. The doctrines of Jefferson were received as their political gospel. It was in vain that federalism denounced with indignation the impertinent inconsistency of slave-holding interference in behalf of liberty in the free states. Come the doctrine from whom it might, the people felt it to be true. State after state revolted from the ranks of federalism, and enrolled itself on the side of democracy. The old order of things was broken up, equality before the law was established, religious tests and restrictions of the right of suffrage were abrogated. Take Massachusetts, for example. There the resistance to democratic principles was the most strenuous and longest continued. Yet, at this time, there is no state in the Union more thorough in its practical adoption of them. No property qualifications or religious tests prevail, all distinctions of sect, birth, or color, are repudiated, and suffrage is universal. The democracy, which in the South has only been held in a state of gaseous abstraction, hardened into concrete reality in the cold air of the North. The ideal became practical, for it had found lodgment among men who were accustomed to act out their convictions and test all their theories by actual experience.

While thus making a practical application of the new doctrine, the people of the free states could not but perceive the incongruity of democracy and slavery.

Selleck Osborn,³ who narrowly escaped the honor of a Democratic martyr in Connecticut, denounced slave-holding, in com-

² Ames and Parish were prominent Federalists, the former a lawyer and member of Congress, the latter a clergyman.

³ Selleck Osborn, editor of the *Litchfield, Conn., Witness*, was imprisoned on conviction for libel in 1806. Joel Barlow published his *Columbiad* in 1807. General William Eaton was active in freeing the Algerine captives in 1805.

mon with other forms of oppression Barlow, fresh from communion with Giegoue, Brissot, and Robespierre, devoted to negro slavery some of the most vigorous and truthful lines of his great poem Eaton, returning from his romantic achievements in Tunis for the deliverance of white slaves, improved the occasion to read a lecture to his countrymen on the inconsistency and guilt of holding blacks in servitude In the Missouri struggle of 1819-20, the people of the free states, with a few ignoble exceptions, took issue with the South against the extension of slavery Some ten years later, the present anti-slavery agitation commenced It originated, beyond a question, in the democratic element With the words of Jefferson on their lips, young, earnest, and enthusiastic men called the attention of the community to the moral wrong and political reproach of slavery In the name and spirit of democracy, the moral and political powers of the people were invoked to limit, discountenance, and put an end to a system so manifestly subversive of its foundation principles It was a revival of the language of Jefferson and Page and Randolph, an echo of the voice of him who penned the Declaration of Independence and originated the ordinance of 1787

Meanwhile the South had wellnigh forgotten the actual significance of the teachings of its early political prophets, and their renewal in the shape of abolitionism was, as might have been expected, strange and unwelcome Pleasant enough it had been to hold up occasionally these demo-

cratic abstractions for the purpose of challenging the world's admiration and cheaply acquiring the characters of lovers of liberty and equality Frederick of Prussia, apostrophizing the shades of Cato and Brutus,⁴

"Vous de la liberté héros que je révère," while in the full exercise of his despotic power, was quite as consistent as these democratic slave-owners, whose admiration of liberty increased in exact ratio with its distance from their own plantations They had not calculated upon seeing their doctrine clothed with life and power, a practical reality, pressing for application to their slaves as well as to themselves They had not taken into account the beautiful ordination of Providence, that no man can vindicate his own rights, without directly or impliedly including in that vindication the rights of all other men The haughty and oppressive barons who wrung from their reluctant monarch the Great Charter at Runnymede, acting only for themselves and their class, little dreamed of the universal application which has since been made of their guaranty of rights and liberties As little did the nobles of the parliament of Paris, when strengthening themselves by limiting the kingly prerogative, dream of the emancipation of their own serfs, by a revolution to which they were blindly giving the first impulse God's truth is universal, it cannot be monopolised by selfishness

⁴ "You heroes of liberty whom I revere."

1819 ~ *James Russell Lowell* ~ 1891

LOWELL began his career by giving up the law for literature, publishing a volume of poems (*A Year's Life*, 1841) and founding a literary magazine. How fully he was Emerson's disciple, at least in his faith in the possibilities of American literature, is revealed by the prospectus in which he and young Robert Carter, his co-editor, announced their purpose for the new magazine:

" to furnish the intelligent and reflecting portion of the Reading Public with a rational substitute for the enormous quantity of thrice-diluted trash, in the shape of namby-pamby love tales and sketches, which is monthly poured out to them by many of our popular magazines,—and to offer instead thereof, a healthy and manly Periodical Literature, whose perusal will not necessarily involve a loss of time and deterioration of every moral and intellectual faculty "

The high-minded *Pioneer* expired after three issues, leaving Lowell eighteen hundred dollars in debt, but his enthusiasm was undiminished and his courage unbroken. He was in love with Maria White, herself a writer, possessed of a slender but genuine poetic talent. In 1844 they were married, and shortly both young writers were identified with abolitionism and other reform movements. Lowell wrote steadily and matured rapidly, reaching a climax of production in 1848. In that year he published four books: *Poems*, a collection of his recent serious work in verse, *A Fable for Critics*, a brilliant rhymed survey of contemporary American literature in which the promise of the founder of *The Pioneer* that "opinions of merit and demerit will be candidly and fearlessly expressed" was finally made good, *The Vision of Sir Launfal*, the Arthurian narrative which is so widely recognized as an indirect contribution to the anti-slavery cause, and the first series of *The Biglow Papers*.

The Biglow Papers were direct and outspoken in their opposition to slavery. They were written for the columns of a Boston newspaper during the Mexican war, which Lowell like many others saw as a maneuver for the extension of slavery. Ostensibly they were the work of a rural rhymester, a young farmer named Hosea Biglow, who wrote in Yankee dialect. As collected in book form, the poems were supplemented with crude letters from Hosea's father, transmitting them to the editor, and with formal and pedantic notes by the Rev. Homer Wilbur, supposedly the scholarly minister of Hosea's mythical town of Jaalam,

and his poetic mentor In *The Biglow Papers* Lowell for the first time achieved genuine originality, and corresponding impact on the thought of his times They had immediate and powerful appeal for readers of their day, and still hold abundant intrinsic value beyond their interest as documents in social history

In 1853 Maria White Lowell died His writing for the time interrupted, Lowell turned to teaching, following Longfellow as Smith Professor of Modern Languages at Harvard after study in Europe In 1857 he entered upon a second venture in literary journalism, this time under happier stars He became the first editor of *The Atlantic Monthly*, and the extraordinary richness of its first volumes is due in large part to his skill and enthusiasm The coming of the Civil War called forth a second series of *Biglow Papers* In the judgment of many critics, Lowell's achievement as a poet reached its highest level in the "Commemoration Ode," which he read at Harvard University's memorial service for its Civil War dead in 1866, just midway of his career

By this time Lowell had left *The Atlantic Monthly* for the more bookish and conservative *North American Review* From his reviews for its pages and from the fruits of his college teaching he assembled the literary essays which made up the most popular books of his later years, *Among My Books*, two series, (1870, 1876) and *My Study Windows* (1871) He was appointed United States Minister to Spain in 1877, to England in 1880 He continued to live much in England after his appointment ended in 1885, and was widely honored on both sides of the Atlantic A few later poems were collected in a volume called *Heartsease and Rue* in 1888, two volumes of his essays on political subjects appeared in 1887 and 1888, and other gatherings of his papers were published at intervals from the year of his death until 1920

It has been customary to base Lowell's claim to a major position in our literature chiefly on his criticism, some modern readers will find adequate basis for the claim in his best essays They are bright in detail and tone, witty, and usually urbane, often warmly appreciative or broadly informing Occasionally, as in "Rousseau and the Sentimentalists," they transcend academic impressionism to anticipate the judgments and points of view of the later Neo-Humanists, Irving Babbitt and Paul Elmer More From most of them the reader gains knowledge of literature and familiarity with it, rather than insight In the political writing of his later years Lowell is a less integrated and forceful thinker Of all Lowell's essays those likely to prove most satisfactory to modern taste are such personal and retrospective pieces as "Emerson the Lecturer" and "Cambridge Thirty Years Ago"

If we turn to Lowell's verse, we can hardly hold that his best achievement as a serious poet, limited to the "Commemoration Ode" and a very few other pieces, entitles him to a place of the first rank He served well as editor and teacher, but America has had greater editors and greater teachers We are forced back to that part of his work for which Lowell himself perhaps would least

wish to be remembered, *The Biglow Papers*. In these his achievement is individual, historically significant, and lastingly alive

[H E Scudder's *James Russell Lowell* (Boston, 1901) is still the standard biography R C Beatty's study (Nashville, 1942) presents adverse critical views Norman Foerster and H H Clark have edited *Lowell* (New York, 1947) for the American Writers Series]

STANZAS ON FREEDOM¹
[1843]

MEN! whose boast it is that ye
Come of fathers brave and free,
If there breathe on earth a slave,
Are ye truly free and brave?
If ye do not feel the chain,
When it works a brother's pain,
Are ye not base slaves indeed,
Slaves unworthy to be freed?

Women! who shall one day bear
Sons to breathe New England air,
If ye hear, without a blush,
Deeds to make the roused blood rush
Like red lava through your veins,
For your sisters now in chains,—
Answer! are ye fit to be
Mothers of the brave and free?

Is true Freedom but to break
Fetters for our own dear sake,
And, with leathern hearts, forget
That we owe mankind a debt?
No! true freedom is to share
All the chains our brothers wear,
And, with heart and hand, to be
Earnest to make others free!

They are slaves who fear to speak
For the fallen and the weak,
They are slaves who will not choose
Hatred, scoffing, and abuse,
Rather than in silence shrink
From the truth they needs must think,
They are slaves who dare not be
In the right with two or three

ON THE CAPTURE OF FUGITIVE
SLAVES NEAR WASHINGTON
[1848 (1845)]

Look on who will in apathy, and stifle they
who can,

The sympathies, the hopes, the words, that
make man truly man,
Let those whose hearts are dungeoned up
with interest or with ease
Consent to hear with quiet pulse of loath-
some deeds like these!

5 I first drew in New England's air, and from
her hardy breast 5
Sucked in the tyrant-hating milk that will
not let me rest,
And if my words seem treason to the dull-
ard and the tame,
10 'Tis but my Bay-State dialect,—our fathers
spake the same!

Shame on the costly mockery of piling
stone on stone
To those who won our liberty, the heroes
dead and gone, 10
While we look coldly on and see law-
shielded ruffians slay
The men who fain would win their own,
20 the heroes of to-day!

Are we pledged to craven silence? O, fling
it to the wind,
The parchment wall that bars us from the
least of human kind,
That makes us cringe and temporize, and
dumbly stand at rest, 15
While Pity's burning flood of words is
red-hot in the breast!

Though we break our fathers' promise, we
have nobler duties first,
The traitor to Humanity is the traitor most
accursed,

¹ Written for an anti-slavery meeting on the anniversary of West Indian emancipation, this poem was originally entitled "Song Sung at an Anti-Slavery Picnic"

Man is more than Constitutions, better
 rot beneath the sod,
 Than be true to Church and State while
 we are doubly false to God! 20

We owe allegiance to the State, but deeper,
 truer, more,
 To the sympathies that God hath set within
 our spirit's core,
 Our country claims our fealty, we grant
 it so, but then
 Before Man made us citizens, great Nature
 made us men

He's true to God who's true to man, wher-
 ever wrong is done, 25
 To the humblest and the weakest, 'neath
 the all-beholding sun,
 That wrong is also done to us, and they
 are slaves most base,
 Whose love of right is for themselves, and
 not for all their race

God works for all Ye cannot hem the hope
 of being free
 With parallels of latitude, with mountain-
 range or sea 30
 Put golden padlocks on Truth's lips, be
 callous as ye will,
 From soul to soul, o'er all the world, leaps
 one electric thrill

Chain down your slaves with ignorance, ye
 cannot keep apart,
 With all your craft of tyranny, the human
 heart from heart
 When first the Pilgrims landed on the Bay
 State's iron shore, 35
 The word went forth that slavery should
 one day be no more

Out from the land of bondage 'tis decreed
 our slaves shall go,
 And signs to us are offered, as erst to
 Pharaoh,

If we are blind, then exodus, like Israel's
 of yore,
 Though a Red Sea is doomed to be, whose
 surges are of gore 40

'T is ours to save our brethren, with peace
 and love to win
 Then darkened hearts from error, ere
 they harden it to sin,
 But if before his duty man with listless
 spirit stands,
 Erelong the Great Avenger takes the work
 from out his hands

 THE BIGLOW PAPERS

FIRST SERIES

[1848 (1846)]

THE RECRUITING ¹

Thrash away, you'll hev to rattle
 On them kittle-drums o' yourn,—
 'Taint a knowin' kind o' cattle
 Thet is ketched with mouldy corn,
 Put in stiff, you fifer feller, 5
 Let folks see how spry you be,—
 Guess you'll toot till you are yellor
 'Fore you'll git ahold o' me!
 Thet air flag's a leetle rotten,
 Hope it aint your Sunday's best,— 10
 Fact' it takes a sight o' cotton
 To stuff out a soger's chest

¹ Titles for this selection and the one which follows have been supplied by the present editors, and the accompanying prose communications have been omitted

In introducing *The Biglow Papers Second Series* (1867), Lowell discussed his purpose and method Portions of that introduction follow

When, more than twenty years ago, I wrote the first of the series, I had

no definite plan and no intention of ever writing another Thinking the Mexican war, as I think it still, a national crime committed in behoof of Slavery, our common sin, and wishing to put the feeling of those who thought as I did in a way that would tell, I imagined to myself such an upcountry man as I had often seen at antislavery gatherings, capable of distinct-school English, but always instinc-

<p>Sence we fainers hev to pay fer 't, Et you must wear humps like these, Sposin' you should try salt hay fer 't, 15 It would du ez shek ez grease</p> <p>'Twould n't suit them Southun fellers, They're a drefle graspin' set, We must ollers blow the bellers Wen they want their irons het, 20 May be it's all right ez preachin', But <i>my</i> narves it kind o' grates, Wen I see the overreachin' O' them nigger-drivin' States</p> <p>Them thet rule us, them slave-traders, 25 Haunt they cut a thundein' swarth (Helped by Yankee renegaders), Thru the vertu o' the North'</p>	<p>We begin to think it's nater To take sarse an' not be iled,— 30 Who'd expect to see a tater All on eend at bein' biled?</p> <p>Ez fer war, I call it murder,— There you hev it plain an' flat, I don't want to go no funder 35 Than my Testymt fer that, God hez sed so plump an' fairly, It's ez long ez it is broad, An' you've gut to git up airly Ef you want to take in God 40</p> <p>'Tant your eppyletts an' feathers Make the thing a grain more right, 'Tant afollerin' your bell-wethers Will excuse ye in His sight,</p>
--	---

tively falling back into the natural stronghold of his homely dialect when heated to the point of self-forgetfulness

In choosing the Yankee dialect, I did not act without forethought. It had long seemed to me that the great vice of American writing and speaking was a studied want of simplicity, that we were in danger of coming to look on our mother-tongue as a dead language, to be sought in the grammar and dictionary rather than in the heart, and that our only chance of escape was by seeking it at its living sources among those who were, as Scottowe says of Major-General Gibbons, 'divinely illiterate.' President Lincoln, the only really great public man whom these latter days have seen, was great also in this, that he was master—witness his speech at Gettysburg—of a truly masculine English, classic because it was of no special period, and level at once to the highest and lowest of his countrymen. I learn from the highest authority that his favorite reading was in Shakespeare and Milton, to which, of course, the Bible should be added. But whoever should read the debates in Congress might fancy himself present at a meeting of the city council of some city of Southern Gaul in the decline of the Empire, where barbarians with a Latin varnish emulated each other in being more than Ciceronian. Whether it be want of culture, for the highest outcome of that is simplicity, or for whatever reason, it is certain that very few American writers or speakers wield their native language with the directness, precision, and force that

are common as the day in the mother country. We use it like Scotsmen, not as if it belonged to us, but as if we wished to prove that we belonged to it, by showing our intimacy with its written rather than with its spoken dialect. And yet all the while our popular idiom is *lacy* with life and vigor and originality, buxsome (as Milton used the word) to our new occasions, and proves itself no mere graft by sending up new suckers from the old root in spite of us. It is only from its roots in the living generations of men that a language can be reinforced with fresh vigor for its needs, what may be called a *literate* dialect grows ever more and more pedantic and foreign, till it becomes at last as unfitting a vehicle for living thought as monkish Latin. That we should all be made to talk like books is the danger with which we are threatened by the Universal Schoolmaster, who does his best to enslave the minds and memories of his victims to what he esteems the best models of English composition, that is to say, to the writers whose style is faultily correct and has no blood-warmth in it. No language after it has faded into *diction*, none that cannot suck up the feeding juices secreted for it in the rich mother-earth of common folk, can bring forth a sound and lusty book. True vigor and heartiness of phrase do not pass from page to page, but from man to man, where the brain is kindled and the lips supplied by downright living interests and by passion in its very throes.

- Ef you take a sward an' dror it,
 An' go stick a feller thru,
 Guv'ment ant to answer for it,
 God'll send the bill to you
- Wut's the use o' meetin'-gom'
 Every Sabbath, wet or dry,
 Ef it's right to go amowin'
 Feller-men like oats an' rye?
 I dunno but wut it's pooty
 Trainin' round in bobtail coats,—
 But it's curus Christian dooty
 This 'ere cuttin' folks's throats
- They may talk o' Freedom's airy
 Tell they're pupple in the face,—
 It's a grand giet cemetary
 Fer the baithrights of our race,
 They jest want this Calitoiny
 So's to lug new slave-states in
 To abuse ye, an' to scorn ye,
 An' to plunder ye like sin
- Ant it cute to see a Yankee
 Take sech everlastin' pains,
 All to git the Devil's thankee
 Helpin' on 'em weld their chains?
 Wy, it's jest ez clear ez figgers,
 Clear ez one an' one make two,
 Chaps that make black slaves o' niggers
 Want to make wite slaves o' you
- Tell ye jest the eend I've come to
 Arter cipherin' plaguy smart,
 An' it makes a handy sum, tu,
 Any gump could larn by heart,
 Laborin' man an laborin' woman
 Hev one glory an' one shame
 Ev'y thin' thet's done inhuman
 Injers all on 'em the same
- 'Tant by turnin' out to hack folks
 You're agoin' to git your right,
 Nor by lookin' down on black folks
 Coz you're put upon by wite,
 Slavery ant o' nary color,
 'Tant the hide thet makes it wus,
 All it keers fer in a feller
 'S jest to make him fill its pus
- 45 Want to tackle *me* in, du ye?
 I expect you'll hev to wait,
 Wen cold lead puts daylight thru ye
 You'll begin to kal'late,
 S'pose the crows wun't fall to pickin'
 All the carkiss from your bones,
 50 Coz you helped to give a liekin'
 To them poor half-Spanish diones?
- 55 Jest go home an' ask our Naney
 Wether I'd be sech a goose
 Ez to jine ye,—guess you'd fancy
 The etarnal bung wuz loose!
 100 She wants me fer home consumption,
 Let alone the hay's to mow,—
 Ef you're arter folks o' gumption,
 You've a darned long row to hoe
- 60 Take them editois thet's crowin'
 Like a cockerel three months old,—
 Don't ketch any on 'em gom',
 Though they *be* so blasted bold,
 65 *Aunt* they a prime lot o' fellers?
 'Fore they think on't guess they'll
 sprout
 110 (Like a peach thet's got the yellers),
 With the meanness bustin' out
- 70 Wal, go 'long to help 'em stealin'
 Bigger pens to cram with slaves,
 Help the men thet's ollers dealin'
 115 Insults on your fathers' graves,
 Help the strong to grind the feeble,
 75 Help the many agin the few,
 Help the men thet call your people
 Witewashed slaves an' peddlin' crew!
 120
- 80 Massachusetts, God forgive her,
 She's akneelin' with the rest,²
 She, thet ough' to ha' clung ferever
 In her grand old eagle-nest,
 She thet ough' to stand so fearless
 125 Wile the wracks are round her hurled,
 Holdn'-up a beacon peerless
 85 To the oppressed of all the world!

² The governor of Massachusetts issued a call for volunteers, May 26, 1846

Ha'n't they sold your colored seamen?³
 Ha'n't they made your env'ys⁴ w'iz? 130
 Wut'll make ye act like freemen?
 Wut'll git your dander rized?
 Come, I'll tell ye wut I'm thinkin'
 Is our dooty in this fix,
 They'd ha' done 't ez quick ez winkin' 135
 In the days o' seventy-six

Clang the bells in every steeple,
 Call all true men to disown
 The tradooceers of our people,
 The enslavers o' their own, 140
 Let our dear old Bay State proudly
 Put the trumpet to her mouth,
 Let her ring this messidge loudly
 In the ears of all the South —

"I'll return ye good fer evil 145
 Much ez we frail mortils can,
 But I wun't go help the Devil
 Makin' man the cus o' man,
 Call me coward, call me traiter,
 Jest ez suits your mean idees,— 150
 Here I stand a tyrant-hater,
 An' the friend o' God an' Peace!"

Ef I'd *my* way I hed ruther
 We should go to work an' part,—
 They take one way, we take t' other,— 155
 Guess it wouldn't break my heart,
 Man hed ough' to put asunder
 Them thet God has noways jined
 An' I shouldn't gretly wonder
 Ef there's thousands o' my mind 160

THE DEBATE IN THE SENATE¹
 [1848]

"Here we stan' on the Constitution, by
 thunder!
 It 's a fact o' wich ther's bushils o'
 proofs,
 Fer how could we trample on 't so, I
 wonder,
 Ef 't worn't thet it's ollers under our
 hoofs?"
 Sez John C Calhoun, sez he; 5
 "Human rights haint no more
 Right to come on this floor,
 No more 'n the man in the moon,"
 sez he.

"The North haint no kind o' bisness with
 nothin',
 An' you 've no idee how much bother it
 saves, 10
 We aint none riled by then flectin' an'
 frothin'
 We're *used* to layin' the string on our
 slaves,"
 Sez John C Calhoun, sez he,—
 Sez Mister Foote,
 "I should like to shoot 15
 The holl gang, by the gret horn
 spoon!" sez he
 "Freedom's Keystone is Slavery, thet
 ther 's no doubt on,
 It's suthin' thet's—wha' d' ye call it?—
 divine,—
 An' the slaves thet we ollers *make* the most
 out on
 Air them north o' Mason an' Dixon's
 line," 20
 Sez John C Calhoun, sez he,—
 "Fer all thet," sez Mangum,
 "T would be better to hang 'em,
 An' so git red on 'em soon," sez he

³ Free colored men in the naval service of the United States had been arrested, when visiting Southern states, and sold as slaves

⁴ Samuel Hoar, sent to Charleston, S C, to negotiate concerning legal rights of Negro citizens of Massachusetts, and George Hubbard, sent to New Orleans on a similar mission, had been expelled from those cities

¹ This debate was on the resolution introduced in the United States Senate April 20, 1848, by Senator John P Hale (N H), declaring sympathy with the 77 slaves kidnapped from Washington by Drayton and Sayers and later recaptured Senator John C Calhoun (S C) led the attack on the resolution on the ground of property rights guaranteed by the Constitution Other speakers mentioned by Lowell are Senators Henry S Foote (Miss), Willie P Mangum (N C), Lewis Cass (Ohio), Jefferson Davis (Miss, later president of the Confederacy), Edward A Hannegan (Ind), Spencer Jarnagin (Tenn), Charles G Atherton (N H), Walter T Colquitt (Ga), Henry Johnson (La), James D Westcott (Fla), and Dixon H Lewis (Ala).

"The mass ough' to labor an' we lay on
 soffies, 25
 Thet's the reason I want to spread Free-
 dom's aree,
 It puts all the cunnest on us in office,
 An' reehses our Maker's orig'nal idee,"
 Sez John C Calhoun, sez he,—
 "Thet's ez plain," sez Cass, 30
 "Ez thet some one's an ass,
 It's ez clear ez the sun is at noon," sez
 he
 "Now don't go to say I'm the friend of
 oppression,
 But keep all you spare breath fer coolin'
 your broth,
 Fer I ollers hev strove (at least thet's my
 impression) 35
 To make cussed free with the rights o'
 the North,"
 Sez John C Calhoun, sez he,—
 "Yes," sez Davis o' Miss,
 "The perfection o' bliss
 Is in skinnin' thet same old coon,"
 sez he 40
 "Slavery's a thing thet depends on com-
 plexion,
 It's God's law thet fetters on black
 skins don't chafe,
 Ef brains wuz to settle it (horrid reflec-
 tion!)
 Wich of our onnable body'd be safe?"
 Sez John C Calhoun, sez he,— 45
 Sez Mister Hannegan,
 Afore he began again,
 "Thet exception is quite opportoon,"
 sez he
 "Gen'le Cass, Sir, you need n't be
 twitchin' your collar,
 Your merit's quite clear by the dut on
 your knees, 50
 At the North we don't make no distine-
 tions o' color,
 You can all take a lick at our shoes wen
 you please,"
 Sez John C Calhoun, sez he,—
 Sez Mister Jarnagin,
 "They wunt hev to larn again, 55

Thev all on 'em know the old toon,"
 sez he
 "The slavery question aint no ways be-
 wilderin'
 North an' South hev one int'rest, it's
 plain to a glance,
 No'thern men, like us patriarchs, don't sell
 their childrin,
 But they *du* sell themselves, ef they git
 a good chance," 60
 Sez John C Calhoun, sez he,—
 Sez Atherton here,
 "Thus is gittin' severe,
 I wish I could live like a loon," sez he
 "It 'll break up the Union, this talk
 about freedom, 65
 An' your fact'ry gals (soon ez we split)
 'll make head,
 An' gittin' some Miss chief or other to
 lead 'em
 'll go to work raisin' permisscoous Ned,"
 Sez John C Calhoun, sez he,—
 "Yes, the North," sez Colquitt, 70
 "Ef we Southerners all quit,
 Would go down like a busted balloon,"
 sez he
 "Jest look wut is doin', wut annyky's
 brewin'
 In the beautiful clime o' the olive an'
 vine,
 All the wise aris toxy's a tumbhn' to
 ruin, 75
 An' the sankylots drorin' an' drinkin'
 then wine,"
 Sez John C Calhoun, sez he,—
 "Yes," sez Johnson, "in France
 They're beginnin' to dance
 Beelzebub's own rigadoon," sez he 80
 "The South's safe enough, it don't feel
 a mite skeery,
 Our slaves in their darkness an' dut air
 tu blest
 Not to welcome with proud hallyluyers the
 ery
 Wen our eagle kicks youn from the
 naytional nest,"

- Sez John C Calhoun, sez he,— 85
 "O," sez Westcott o' Florida,
 "Wut treason is horrid
 Then our priv'leges tryin' to proon?"
 sez he
- "It's 'coz they're so happy, thet, wen
 crazy saipents
 Stick their nose in our bizness, we git
 so darned riled, 90
 We think it's our dooty to give pooty
 sharp hints,
 Thet the last crumb of Edin on airth
 sha'n't be spiled,"
 Sez John C Calhoun, sez he,—
 "Ah," sez Dixon H Lewis,
 "It perfectly true is 95
 Thet slavery's airth's grettest boon,"
 sez he
- From*
 THE BIGLOW PAPERS
 SECOND SERIES
 [1867 (1848)]
 THE COURTIN'¹
- God makes sech nights, all white an still
 Fur 'z you can look or listen,
 Moonshine an' snow on field an' hull,
 All silence an' all glisten
- Zekle crep' up quite unbeknown 5
 An' peeked in thru' the winder,
 An' there sot Huldy all alone,
 'ith no one nigh to hender
- A fireplace filled the room's one side
 With half a cord o' wood in— 10
 There warn't no stoves (tell comfort died)
 To bake ye to a puddin'
- The wa'nut logs shot sparkles out
 Towards the pootiest, bless her,
 An' leetle flames danced all about 15
 The chimy on the dresser
- Agin the chumbley crook-necks hung,
 An' in amongst 'em rusted
 The ole queen's-arm thet gran'ther Young
 Fetched back from Concord busted 20
- The very room, coz she was in,
 Seemed warm from floor to ceiln',
 An' she looked full ez rosy agin
 Ez the apples she was peelin'
- 'Twas kin' o' kingdom-come to look 25
 On sech a blessed cretur,
 A dogrose blushin' to a brook
 Ain't modester nor sweeter
- He was six foot o' man, A I,
 Clear grit an' human natur', 30
 None could n't quicker pitch a ton,
 Nor dror a furrei straighter
- He'd sparked it with full twenty gals,
 Hed squied 'em, danced 'em, druve 'em,
 Fust this one, an' then thet, by spells— 35
 All is, he could n't love 'em
- But long o' her his veins 'ould run
 All crinkly like culed maple,
 The side she breshed felt full o' sun
 Ez a south slope in Ap'il 40
- She thought no v'ice hed sech a swing
 Ez hisn in the choir,
 My' when he made Ole Hundred ring,
 She *knowed* the Lord was nigher
- An' she'd blush scarlit, right in prayer, 45
 When her new meetin'-bunnet
 Felt somehow thru' its crown a pair
 O' blue eyes sot upon it
- Thet night, I tell ye, she looked *some'*
 She seemed to 've gut a new soul, 50
 For she felt sartin-sure he'd come,
 Down to her very shoe-sole
- She heered a foot, an' knowed it tu,
 A-raspin' on the scraper,—
 All ways to once her feelin's flew 55
 Like sparks in burnt-up paper
- He kin' o' l'itered on the mat,
 Some doubtfle o' the sekle,
 His heart kep' gon' pity-pat,
 But hern went pity Zekle 60

¹ This poem appeared in a briefer form
 in the First Series of *The Biglow Papers*

An' yit she gin her cheer a jerk
 Ez though she wished him furdier,
 An' on her apples kep' to work,
 Parin' away like murder

"You want to see my Pa, I s'pose?" 65
 "Wal no I come dasignin'"—
 "To see my Ma? She's sprinklin' clo'es
 Agin to-morrier's i'nin'"

To say why gals acts so or so,
 Or don't, 'ould be presumin', 70
 Mebby to mean *yes* an' say *no*
 Comes nateral to women

He stood a spell on one foot fust,
 Then stood a spell on t' other,
 An' on which one he felt the wust 75
 He could n't ha' told ye nuther

Says he, "I'd better call agin",
 Says she, "Think likely, Mister"
 Thet last word pricked him like a pin,
 An' Wal, he up an' kist her 80

When Ma bimeby upon 'em slips,
 Huldy sot pale ez ashes,
 All kin' o' smily roun' the lips
 An' teary roun' the lashes

For she was jes' the quiet kind 85
 Whose naturs never vary,
 Like streams that keep a summer mind
 Snowhid in Jenooary

The blood clost roun' her heart felt glued 90
 Too tight for all expressin',
 Tell mother see how metters stood,
 An' gin 'em both her blessin'

Then her red come back like the tide
 Down to the Bay o' Fundy,
 An' all I know is they was cried²
 In meetin' come nex' Sunday.

A NATION SAVED¹
 [1867 (1865)]

But I ain't made upon a plan
 Thet knows wut's comin', gall or honey 5
 Ther' 's times the world does look so queer,
 Odd fancies come afore I call 'em,
 An' then agin, for half a year,
 No preacher 'thout a call 's more solemn

You're 'n want o' sunthin' light an' cute, 10
 Rattlin' an' shrewd an' kin' o' jungleish,
 An' wish, pervidin' it 'ould suit,
 I'd take an' citify my English
 I *ken* write long-tailed, ef I please,—
 But when I'm jokin', no, I thankee, 15
 Then, 'fore I know it, my idees
 Run helter-skelter into Yankee

Sence I begun to scribble rhyme,
 I tell ye wut, I hain't ben foolin',
 The parson's books, life, death, an' time 20
 Hev took some trouble with my schoolin',
 Nor th' airth don't git put out with me,
 Thet love her 'z though she wuz a
 woman,
 Why, th' ain't a bird upon the tree
 But half forgives my bein' human 25

An' yit I love th' unhighschool'd way
 Ol' farmers hed when I wuz younger.
 Their talk was meatier, an' 'ould stay,
 While book-froth seems to whet your
 hunger,
 For puttin' in a downright lick 30
 'twixt Humbug's eyes, ther' 's few can
 metch it,
 An' then it helves my thoughts ez slick
 Ez stret-grained hickory doos a hetchet

But when I can't, I can't, thet's all,
 For Natur' won't put up with gullin', 35
 Idees you hev to shove an' haul
 Like a druv pig an't wuth a mullein
 Live thoughts an't sent for, thru all rifts
 O' sense they pour an' resh ye onwards,
 Like rivers when south-lyin' drifts 40
 Feel thet th' old arth's a-wheelin' sun-
 wards

DEAR SIR,—Your letter come to han'
 Requestin' me to please be funny,

² Their marriage banns were announced

¹ Title supplied by the present editors

Time wuz, the rhymes come crowdin' thick
 Ez office-seekers arter 'lection,
 An' into any place 'ould stick
 Without no bother nor objection, 45
 But sence the wai my thoughts hang back
 Ez though I wanted to enlist 'em,
 An' substitutes,—*they* don't never lack,
 But then they'll slope afore you've mist
 'em

Nothin' don't seem like wut it wuz, 50
 I can't see wut there is to hender,
 An' yit my brains jes' go buzz, buzz,
 Like bumblebees agin a winder,
 'fore these times come, in all an'th's row,
 Ther' wuz one quiet place, my head
 in, 55
 Where I could hide an' thunk,—but now
 It's all one teeter, hopin', dreadin'

Where's Peace? I start, some clear-blown
 night,
 When gaunt stone walls grow numb an'
 number,
 An', creakin' 'cross the snow-crus' white, 60
 Walk the col' starlight into summer,
 Up grows the moon, an' swell by swell
 Thru the pale pasturs silvers dimmer
 Than the last smile thet stives to tell
 O' love gone heavenward in its shim-
 mer 65

I hev ben gladder o' sech things
 Than cocks o' spring or bees o' clover,
 They filled my heart with livin' springs,
 But now they seem to freeze 'em over,
 Sights innercent ez babes on knee, 70
 Peaceful ez eyes o' pastur'd cattle,
 Jes' coz they be so, seem to me
 To rile me more with thoughts o' battle

In-doors an' out by spells I try,
 Ma'am Natur' keeps her spin-wheel
 goin', 75
 But leaves my natur' stiff and dry
 Ez fiel's o' clover arter mowin',
 An' her jes' keepin' on the same,
 Calmer 'n a clock, an' never carin',
 An' findin' nary thing to blame, 80
 Is wus than ef she took to swearin'.

Snow-flakes come whisperin' on the pane
 The charm makes blazin' logs so pleasant,
 But I can't hark to wut they 're say'n',
 With Grant or Sherman ollers pres-
 ent, 85
 The chumblays shudder in the gale,
 Thet hulls, then suddin takes to flappin'
 Like a shot hawk, but all 's ez stale
 To me ez so much sperit-rappin' ²

Under the yaller-pines I house, 90
 When sunslune makes 'em all sweet-
 scented,
 An' hear among then funny boughs
 The baskin' west-wind puri contented,
 While 'way o'erhead, ez sweet an' low
 Ez distant bells thet ring for meetin' 95
 The wedged wil' geese their bugles blow,
 Further an' further South retreatin'

Or up the shippery knob I strain
 An' see a hundred hills like islan's
 Lift their blue woods in broken chain 100
 Out 'o the sea o' snowy silence,
 The farm-smokes, sweetes' sight on airth,
 Slow thru the winter air a-shrinkin'
 Seem kin' o' sad, an' roun' the hearth
 Of empty places set me thinkin' 105

Beaver roars hoarse with meltin' snows,
 An' rattles di'mon's from his granite,
 Time wuz, he snatched away my prose,
 An' into psalms or satires ran it,
 But he, nor all the rest thet once 110
 Started my blood to country-dancees,
 Can't set me goin' more 'n a dunce
 Thet hain't no use for dreams an' fancies

Rat-tat-tat-tattle thru the street
 I hear the drummers makin' riot, 115
 An' I set thinkin' o' the feet
 Thet follered once an' now are quiet,³—

² Lowell's long poem, "The Unhappy Lot of Mr Knott," is one of the best satirical treatments of the popular interest in spiritism in the mid-nineteenth century

³ Three nephews of Lowell—William Lowell Putnam, James Jackson Lowell, and Charles Russell Lowell—were killed in the Civil War.

White feet ez snowdrops innercent,
 Thet never knowed the paths o' Satan,
 Whose comin' step ther' 's ears thet
 won't, 120
 No, nor lifelong, leave off awaitin'

Why, han't I held 'em on my knee?
 Didn't I love to see 'em growin',
 Three likely lads as wal could be,
 Hahnsome an' brave an' not tu
 knowin'? 125

I set an' look into the blaze
 Whose natur', jes' like theinn, keeps
 clumbin',
 Ez long 'z it lives, in shinin' ways,
 An' half despise myself for rhymin'

Wut's words to them whose faith an'
 truth 130

On Wai's red techstone rang true metal
 Who ventered life an' love an' youth
 For the gret prize o' death in battle?
 To him⁴ who, deadly hurt, agen
 Flashed on afore the charge's thun-
 der, 135

Tippin' with fire the bolt of men
 Thet rived the Rebel line asunder?

'Tain't right to hev the young go fust,
 All throbbin' full o' gifts an' graces,
 Leavin' life's paupers dry ez dust 140
 To try an' make b'lieve fill their places
 Nothin' but tells us wut we miss,
 Ther' 's gaps our lives can't never fay
 in,
 An' *thet* world seems so fur from this
 Lef' for us loafers to grow gray in' 145

My eyes cloud up for rain, my mouth
 Will take to twitchin' roun' the corners,
 I pity mothers, tu, down South,
 For all they sot among the scoiners
 I'd sooner take my chance to stan' 150
 At Jedgment where your meanest slave
 is,
 Than at God's bar hol' up a han'
 Ez drippin' red ez yourn, Jeff Davis!

Come, Peace! not like a mourner bowed
 For honor lost an' dear ones wasted, 155

But proud, to meet a people proud,
 With eyes thet tell o' triumph tasted!
 Come, with han' grippin' on the hilt,
 An' step thet proves ye Victory's daugh-
 ter!
 Longin' for you, our sperits wilt 160
 Like shipwrecked men's on raf's for
 water

Come, while our country feels the lift
 Of a gret instinct shoutin' forwards,
 An' knows thet freedom ain't a gift
 Thet tarnes long in han's o' cowards! 165
 Come, sech ez mothers prayed for, when
 They kissed their cross with lips thet
 quivered,
 An' bring fair wages for brave men,
 A nation saved, a race delivered!

ODE RECITED AT THE HARVARD
 COMMEMORATION¹
 [1865]

I

Weak-winged is song,
 Nor aims at that clear-ethered height
 Whither the brave deed climbs for light
 We seem to do them wrong,
 Bringing our robin's-leaf to deck their
 hearse 5
 Who in warm life-blood wrote their nobler
 verse,
 Our trivial song to honor those who come
 With ears attuned to strenuous tramp and
 drum,
 And shaped in squadron-strophes their
 desire,
 Live battle-odes whose lines were steel and
 fire 10

⁴ General Charles Russell Lowell, at the
 Battle of Cedar Creek

¹ Lowell wrote to Richard Watson Gil-
 der (January 16, 1886) that this ode was
 "an improvisation. Two days before the
 Commemoration I had told my friend
 Child that it was impossible—that I was
 dull as a door-mat. But the next day
 something gave me a jog and the whole
 thing came out with a rush. I sat up all
 night writing it out clear."

Yet sometimes feathered words are
strong,
A gracious memory to buoy up and save
From Lethe's dreamless ooze, the common
grave
Of the unventurous throng

II

To-day our Reverend Mother welcomes
back 15
Her wisest Scholars, those who under-
stood
The deeper teaching of her mystic tome,
And offered their fresh lives to make it
good
No lore of Greece or Rome,
No science peddling with the names of
things, 20
Or reading stars to find inglorious fates,
Can lift our life with wings
Far from Death's idle gulf that for the
many waits,
And lengthen out our dates
With that clear fame whose memory
sings 25
In many hearts to come, and nerves them
and dilates
Nor such thy teaching, Mother of us all!
Not such the trumpet-call
Of thy diviner mood,
That could thy sons entice 30
From happy homes and toils, the fruitful
nest
Of those half-virtues which the world calls
best,
Into War's tumult rude,
But rather far that stern device
The sponsors chose that round thy cradle
stood 35
In the dim, unventured wood,
The VERITAS² that lurks beneath
The letter's unprolific sheath,
Life of whate'er makes life worth living,
Seed-grain of high emprise, immortal
food, 40
One heavenly thing whereof earth hath
the giving

III

Many loved Truth, and lavished life's best
oil
Amid the dust of books to find her,
Content at last, for guerdon of their toil,
With the cast mantle she hath left behind
her 45
Many in sad faith sought for her,
Many with crossed hands sighed for
her,
But these, our brothers, fought for
her,
At life's dear peril wrought for her,
So loved her that they died for her, 50
Tasting the raptured fleetness
Of her divine completeness
Their higher instinct knew
Those love her best who to themselves are
true,
And what they dare to dream of, dare to
do, 55
They followed her and found her
Where all may hope to find,
Not in the ashes of the burnt-out mind,
But beautiful, with danger's sweetness
round her
Where faith made whole with deed 60
Breathes its awakening breath
Into the lifeless creed,
They saw her plumed and mailed,
With sweet, stern face unveiled,
And all-repaying eyes, look proud on them
in death 65

IV

Our slender life runs rippling by, and
glides
Into the silent hollow of the past,
What is there that abides
To make the next age better for the last?
Is earth too poor to give us 70
Something to live for here that shall
outlive us?
Some more substantial boon
Than such as flows and ebbs with Fortune's
fickle moon?
The little that we see

² Motto on the Harvard seal

From doubt is never free, 75
 The little that we do
 Is but half-nobly true,
 With our laborious living
 What men call treasure, and the gods call
 dross,
 Life seems a jest of Fate's contriving, 80
 Only secure in every one's conniving,
 A long account of nothings paid with loss,
 Where we poor puppets, jerked by unseen
 wires,
 After our little hour of strut and rave,
 With all our pasteboard passions and de-
 sires, 85
 Loves, hates, ambitions, and immortal fires,
 Are tossed pell-mell together in the
 grave
 But stay! no age was e'er degenerate,
 Unless men held it at too cheap a rate,
 For in our likeness still we shape our
 fate 90
 Ah, there is something here
 Unfathomed by the cynic's sneer,
 Something that gives our feeble light
 A high immunity from Night,
 Something that leaps life's narrow
 bars 95
 To claim its buthright with the hosts of
 heaven,
 A seed of sunshine that can leaven
 Our earthly dullness with the beams of
 stars,
 And glorify our clay
 With light from fountains elder than
 the Day, 100
 A conscience more divine than we,
 A gladness fed with secret tears,
 A vexing, forward-reaching sense
 Of some more noble permanence,
 A light across the sea, 105
 Which haunts the soul and will not let
 it be,
 Still beaconing from the heights of unde-
 generate years

V

Whither leads the path
 To ampler fates that leads?
 Not down through flowery meads,

To reap an aftermath 110
 Of youth's vainglorious weeds,
 But up the steep, amid the wrath
 And shock of deadly-hostile creeds,
 Where the world's best hope and stay 115
 By battle's flashes gropes a desperate way,
 And every turf the fierce foot clings to
 bleeds
 Peace hath her not ignoble wreath
 Ere yet the sharp, decisive word
 Light the black lips of cannon, and the
 sword 120
 Dreams in its easeful sheath,
 But some day the live coal behind the
 thought,
 Whether from Baal's stone obscene,
 Or from the shine serene
 Of God's pure altar brought, 125
 Bursts up in flame, the war of tongue and
 pen
 Leans with what deadly purpose it was
 fraught,
 And, helpless in the fiery passion caught,
 Shakes all the pillared state with shock of
 men
 Some day the soft Ideal that we wooed 130
 Confronts us fiercely, foe-beset, pursued,
 And eyes reproachful "Was it, then, my
 praise,
 And not myself was loved? Prove now thy
 truth,
 I claim of thee the promise of thy youth,
 Give me thy life, or cower in empty
 phrase, 135
 The victim of thy genius, not its mate!"
 Life may be given in many ways,
 And loyalty to Truth be sealed
 As bravely in the closet as the field,
 So bountiful is Fate, 140
 But then to stand beside her,
 When craven churl- decide her,
 To front a lie in arms and not to yield,
 This shows, methinks, God's plan
 And measure of a stalwart man, 145
 Limbed like the old heroic breeds,
 Who stands self-poised on manhood's
 solid earth,
 Not forced to frame excuses for his birth,
 Fed from within with all the strength he
 needs

VI³

Such was he, our Martyr-Chief, 150
 Whom late the Nation he had led,
 With ashes on her head,
 Wept with the passion of an angry grief
 Forgive me, if from present things I turn
 To speak what in my heart will beat and
 burn, 155
 And hang my wreath on his world-honored
 urn
 Nature, they say, doth dote,
 And cannot make a man
 Save on some worn-out plan,
 Repeating us by rote 160
 For him her Old-World moulds aside she
 threw,
 And, choosing sweet clay from the
 breast
 Of the unexhausted West,
 With stuff untainted shaped a hero new,
 Wise, steadfast in the strength of God, and
 true 165
 How beautiful to see
 Once more a shepherd of mankind indeed,
 Who loved his charge, but never loved to
 lead,
 One whose meek flock the people joyed to
 be,
 Not lured by any cheat of birth, 170
 But by his clear-grained human worth,
 And brave old wisdom of sincerity!
 They knew that outward grace is dust,
 They could not choose but trust
 In that sure-footed mind's unfaltering
 skill, 175
 And supple-tempered will
 That bent like perfect steel to spring again
 and thrust
 His was no lonely mountain-peak of
 mind,
 Thrusting to thin air o'er our cloudy
 bars,
 A sea-mark now, now lost in vapors
 blind, 180
 Broad prairie rather, genial, level-
 lined,
 Fruitful and friendly for all human
 kind,

Yet also nigh to heaven and loved of
 loftiest stars
 Nothing of Europe here,
 Or, then, of Europe fronting mornward
 still, 185
 Ere any names of Serf and Peer
 Could Nature's equal scheme deface
 And thwart her genial will,
 Here was a type of the true elder race,
 And one of Plutarch's men talked with us
 face to face 190
 I praise him not, it were too late,
 And some innate weakness there must be
 In him who condescends to victory
 Such as the Present gives, and cannot wait,
 Safe in himself as in a fate 195
 So always firmly he
 He knew to bide his time,
 And can his fame abide,
 Still patient in his simple faith sublime,
 Till the wise years decide 200
 Great captains, with their guns and
 drums,
 Disturb our judgment for the hour,
 But at last silence comes,
 These all are gone, and, standing like a
 tower,
 Our children shall behold his fame 205
 The kindly-earnest, brave, foreseeing
 man,
 Sagacious, patient, dreading praise, not
 blame,
 New birth of our new soil, the first
 American

VII

Long as man's hope insatiate can discern
 Or only guess some more inspiring
 goal 210
 Outside of Self, enduring as the pole,
 Along whose course the flying axles burn
 Of spirits bravely-pitched, earth's man-
 her brood,
 Long as below we cannot find
 The meed that stills the inexorable
 mind, 215

³ This section, referring to Lincoln, was not included in the ode as read at the Commemoration exercises, but was added immediately afterward.

So long this faith to some ideal Good,
Under whatever mortal names it masks,
Freedom, Law, Country, this ethereal
mood

That thanks the Fates for their severer
tasks,

Feeling its challenged pulses leap, 220
While others skulk in subterfuges cheap,
And, set in Danger's van, has all the boon
it asks,

Shall win man's praise and woman's love,
Shall be a wisdom that we set above
All other skills and gifts to culture
dear, 225

A virtue round whose forehead we in-
wreathe

Laurels that with a living passion
breathe

When other crowns grow, while we twine
them, sear

What brings us thronging these high
rites to pay,

And seal these hours the noblest of our
year, 230

Save that our brothers found this better
way?

VIII

We sit here in the Promised Land
That flows with Freedom's honey and
milk,

But 'twas they won it, sword in hand,
Making the nettle danger soft for us as
silk 235

We welcome back our bravest and our
best,—

Ah me! not all! some come not with the
rest,

Who went forth brave and bright as any
here!

I strive to mix some gladness with my
strain,

But the sad strings complain, 240
And will not please the ear.

I sweep them for a pæan, but they wane
Again and yet again

Into a dirge, and die away, in pain
In these brave ranks I only see the

gaps, 245

Thinking of dear ones whom the dumb turf
wraps,
Dark to the triumph which they died to
gain

Fither may others greet the living,
For me the past is unforgiving,

I with uncovered head 250
Salute the sacred dead,

Who went, and who return not—Say not
so!

'Tis not the grapes of Canaan⁴ that repay,
But the high faith that failed not by the
way,

Virtue treads paths that end not in the
grave, 255

No ban of endless night exiles the brave,
And to the saner mind

We rather seem the dead that stayed be-
hind

Blow, trumpets, all your exultations blow!
For never shall their aureoled presence
lack 260

I see them muster in a gleaming row,
With ever-youthful brows that nobler
show,

We find in our dull road their shining
track,

In every nobler mood

We feel the orient of their spirit glow, 265
Part of our life's unalterable good,

Of all our saintlier aspiration,
They come transfigured back,

Secure from change in their high-hearted
ways,

Beautiful evermore, and with the rays 270
Of morn on their white Shields of Expec-

tation!

IX

But is there hope to save
Even this ethereal essence from the
grave?

What ever 'scaped Oblivion's subtle
wrong

Save a few clarion names, or golden threads
of song? 275

Before my musing eye

⁴ Numbers 13 23

The mighty ones of old sweep by,
 Disvoiced now and insubstantial things,
 As noisy once as we, poor ghosts of
 kings,
 Shadows of empire wholly gone to
 dust, 280
 And many races, nameless long ago,
 To darkness driven by that imperious
 gust
 Of ever-rushing Time that here doth
 blow
 O visionary world, condition strange,
 Where naught abiding is but only
 Change, 285
 Where the deep-bolted stars themselves still
 shift and range!
 Shall we to more continuance make pre-
 tence?
 Renown builds tombs, a life-estate is Wit,
 And, bit by bit,
 The cunning years steal all from us but
 woe, 290
 Leaves are we, whose decays no harvest
 sow
 But, when we vanish hence,
 Shall they be forceless in the dark be-
 low,
 Save to make green their little length of
 sods,
 Or deepen pansies for a year or two, 295
 Who now to us are shining-sweet as
 gods?
 Was dying all they had the skill to do?
 That were not fruitless but the Soul
 resents
 Such short-lived service, as if blind
 events
 Ruled without her, or earth could so
 endure, 300
 She claims a more divine investiture
 Of longer tenure than Fame's airy rents,
 Whate'er she touches doth her nature
 share,
 Her inspiration haunts the ennobled an,
 Gives eyes to mountains blind, 305
 Ears to the deaf earth, voices to the wind,
 And her clear trump sings succor every-
 where
 By lonely bivouacs to the wakeful mind,
 For soul inherits all that soul could dare

Yea, Manhood hath a wider
 span 310
 And larger privilege of life than man
 The single deed, the private sacrifice,
 So radiant now through proudly-hidden
 tears,
 Is covered up erelong from mortal eyes
 With thoughtless drift of the deciduous
 years, 315
 But that high privilege that makes all
 men peers,
 That leap of heart whereby a people rise
 Up to a noble anger's height,
 And, flamed on by the Fates, not shrink,
 but grow more bright,
 That swift validity in noble veins, 320
 Of choosing danger and disdaining
 shame,
 Of being set on flame
 By the pure fire that flies all contact
 base,
 But wraps its chosen with angelic might,
 These are imperishable gains, 325
 Sure as the sun, medicinal as light,
 These hold great futures in their lusty
 reins
 And certify to earth a new imperial race

X

Who now shall sneer?
 Who dare again to say we trace 330
 Our lines to a plebeian race?
 Roundhead and Cavalier!
 Dumb are those names erewhile in battle
 loud,
 Dream-footed as the shadow of a cloud,
 They flit across the ear 335
 That is best blood that hath most iron in't,
 To edge resolve with, pouring without stint
 For what makes manhood dear
 Tell us not of Plantagenets,
 Hapsburgs, and Guelfs, whose thin bloods
 crawl 340
 Down from some victor in a border-brawl!
 How poor their outworn coronets,
 Matched with one leaf of that plain civic
 wreath
 Our brave for honor's blazon shall be-
 queath,

Through whose desert a rescued Nation
sets 345
Her heel on treason, and the trumpet hears
Shout victory, tingling Europe's sullen ears,
With vain resentments and more vain
regrets!

XI

Not in anger, not in pride,
Pure from passion's mixture rude 350
Ever to base earth allied,
But with far-heard gratitude,
Still with heart and voice renewed,
To heroes living and dear martyrs dead,
The strain should close that consecrates our
brave 355
Lift the heart and lift the head!
Lofty be its mood and grave,
Not without a martial ring,
Not without a prouder tread
And a peal of exultation 360
Little right has he to sing
Through whose heart in such an hour
Beats no march of conscious power,
Sweeps no tumult of elation!
'Tis no Man we celebrate, 365
By his country's victories great,
A hero half, and half the whim of Fate,
But the pith and marrow of a Nation
Drawing force from all her men,
Highest, humblest, weakest, all, 370
For her time of need, and then
Pulsing it again through them,
Till the basest can no longer cower,
Feeling his soul spring up divinely tall,
Touched but in passing by her mantle-
hem 375
Come back, then, noble pride, for 'tis
her dower!
How could poet ever tower,
If his passions, hopes, and fears,
If his triumphs and his tears,
Kept not measure with his people? 380
Boom, cannon, boom to all the winds and
waves!
Clash out, glad bells from every rocking
steeple!
Banners, advance with triumph, bend your
staves!

And from every mountain-peak
Let beacon-fire to answering beacon
speak, 385
Katahdin tell Monadnock, Whiteface⁵
he,
And so leap on in light from sea to sea,
Till the glad news be sent
Across a kindling continent,
Making earth feel more firm and air
breathe braver 390
"Be proud! for she is saved, and all have
helped to save her!"
She that lifts up the manhood of the
poor,
She of the open soul and open door,
With room about her hearth for all
mankind!
The fire is dreadful in her eyes no
more, 395
From her bold front the helm she doth
unbind,
Sends all her handmaid armies back to
spin,
And bids her navies, that so lately
hurled
Their crashing battle, hold their thun-
ders in,
Swimming like birds of calm along the
unharmful shore 400
No challenge sends she to the elder
world,
That looked askance and hated, a light
scorn
Plays o'er her mouth, as round her
mighty knees
She calls her children back, and waits
the morn
Of nobler day, enthroned between her sub-
ject seas" 405

XII

Bow down, dear Land, for thou hast found
release!
Thy God, in these distempered days,
Hath taught thee the sure wisdom of His
ways,

⁵ Mountain peaks of Maine (Katahdin),
New Hampshire (Monadnock), and New
York (Whiteface)

And through thine enemies hath wrought
thy peace'

Bow down in prayer and praise' 410

No poorest in thy borders but may now
Lift to the juster skies a man's enfran-
chised brow

O Beautiful! my Country! ours once more!
Smoothing thy gold of war-dishevelled hair
O'er such sweet brows as never other

wore, 415

And letting thy set lips,

Freed from wrath's pale eclipse,

The rosy edges of their smile lay bare,

What words divine of lover or of poet

Could tell our love and make thee

know it, 420

Among the Nations bright beyond com-
pare?

What were our lives without thee?

What all our lives to save thee?

We reckon not what we gave thee,

We will not dare to doubt thee, 425

But ask whatever else, and we will dare!

POETRY AND NATIONALITY¹

[1920 (1868)]

ONE of the dreams of our earlier hor-
oscope-mongers was, that a poet should
come out of the West, fashioned on a scale
somewhat proportioned to our geographical
pretensions. Our rivers, forests, mountains,
cataracts, prairies, and inland seas were to
find in him their antitype and voice. Shaggy
he was to be, brown-fisted, careless
of proprieties, unhampered by tradition,
his Pegasus of the half-horse, half-alligator
breed. By him at last the epos of the New
World was to be fitly sung, the great tragi-
comedy of democracy put upon the stage
for all time. It was a cheap vision, for it
cost no thought, and, like all judicious
prophecy, it muffled itself from criticism
in the loose drapery of its terms. Till the
advent of this splendid apparition, who
should dare affirm positively that he would
never come? that, indeed, he was impossi-
ble? And yet his impossibility was de-
monstrable, nevertheless.

Supposing a great poet to be born in
the West, though he would naturally levy
upon what had always been familiar to his
eyes for his images and illustrations, he
would almost as certainly look for his ideal
somewhere outside of the life that lay
immediately about him. Life in its large
sense, and not as it is temporarily modified
by manners or politics, is the only subject
of the poet, and though its elements lie
always close at hand, yet in its unity it
seems always infinitely distant, and the
difference of angle at which it is seen in
India and in Minnesota is almost inap-
preciable. Moreover, a rooted discontent
seems always to underlie all great poetry,
if it be not even the motive of it. The
Iliad and the Odyssey paint manners that
are only here and there incidentally true
to the actual, but which in their larger
truth had either never existed or had long
since passed away. Had Dante's scope been
narrowed to contemporary Italy, the "Di-
vina Commedia" would have been a pic-
turebook merely. But his theme was Man,
and the vision that inspired him was of an
Italy that never was nor could be, his
political theories as abstract as those of
Plato or Spinoza. Shakespeare shows us
less of the England that then was than any
other considerable poet of his time. The
struggle of Goethe's whole life was to
emancipate himself from Germany, and
fill his lungs for once with a more universal
air.

Yet there is always a flavor of the cli-
mate in these rare fruits, some gift of the
sun peculiar to the region that ripened
them. If we are ever to have a national
poet, let us hope that his nationality will
be of this subtle essence, something that
shall make him unspeakably nearer to us,
while it does not provincialize him for

¹ This selection is a portion of a re-
view of a book of poems by John James
Piatt, published in the *North American
Review*, October, 1868. It is included in
*The Function of the Poet and Other Es-
says* (Boston and New York, 1920), ed-
ited by Albert Mordell, who made the
abridgment and supplied the present title.

the rest of mankind. The popular recipe for compounding him would give us, perhaps, the most sublimely furnished bore in human annals. The novel aspects of life under our novel conditions may give some freshness of color to our literature, but democracy itself, which many seem to regard as the necessary *Lucina*² of some new poetic birth, is altogether too abstract an influence to serve for any such purpose. If any American author may be looked on as in some sort the result of our social and political ideal, it is Emerson, who, in his emancipation from the traditional, in the irresponsible freedom of his speculation, and his faith in the absolute value of his own individuality, is certainly, to some extent, typical, but if ever author was inspired by the past, it is he, and he is as far as possible from the shaggy hero of prophecy. Of the sham-shaggy, who have tried the trick of Jacob³ upon us, we have had quite enough, and may safely doubt whether this satyr of masquerade is to be our representative singer. Were it so, it would not be greatly to the credit of democracy as an element of aesthetics. But we may safely hope for better things.

The themes of poetry have been pretty much the same from the first, and if a man should ever be born among us with a great imagination, and the gift of the right word,—for it is these, and not sublime spaces, that make a poet,—he will be original rather in spite of democracy than in consequence of it, and will owe his inspiration quite as much to the accumulations of the Old World as to the promises of the New. But for a long while yet the proper conditions will be wanting, not, perhaps, for the birth of such a man, but for his development and culture. At present, with the largest reading population in the world, perhaps no country ever offered less encouragement to the higher forms of art or the more thorough achievements of scholarship. Even were it not so, it would be idle to expect us to produce any literature so peculiarly our own as was the natural growth of ages less communicative,

less open to every breath of foreign influence. Literature tends more and more to become a vast commonwealth, with no dividing lines of nationality. Any more *Cids*, or *Songs of Roland*, or *Nibelungen*, or *Kalevalas* are out of the question,—nay, anything at all like them, for the necessary insulation of race, of country, of religion, is impossible, even were it desirable. Journalism, translation, criticism, and facility of intercourse tend continually more and more to make the thought and turn of expression in cultivated men identical all over the world. Whether we like it or not, the costume of mind and body is gradually becoming of one cut.

EMERSON THE LECTURER¹

[1868 (1861)]

IT IS a singular fact that Mr Emerson is the most steadily attractive lecturer in America. Into that somewhat cold-waterish region adventurers of the sensational kind come down now and then with a splash, to become disregarded King Logs² before the next season. But Mr Emerson always draws. A lecturer now for something like a third of a century, one of the pioneers of the lecturing system, the charm of his voice, his manner, and his matter has never lost its power over his earlier hearers, and continually winds new ones in its enchanting meshes. What they do not fully understand they take on trust, and listen, saying

² Roman goddess of childbirth

³ Genesis 27 16, 23. Lowell probably is referring here to Whitman.

¹ This essay appeared in the *Atlantic Monthly*, February, 1861, as a review of Emerson's *The Conduct of Life*, and was revised in 1868.

² A reference to Aesop's fable of the log, given by Jupiter to the frogs as a king when they asked him for a ruler, and at first accepted as wholly satisfactory, but later rejected when its true nature was discovered.

to themselves, as the old poet ³ of Sir Philip Sidney,—

"A sweet, attractive, kind of grace,
A full assurance given by looks,
Continual comfort in a face,
The lineaments of gospel books"

We call it a singular fact, because we Yankees are thought to be fond of the spread-eagle style, and nothing can be more remote from that than his. We are reckoned a practical folk, who would rather hear about a new airtight stove than about Plato, yet our favorite teacher's practicality is not in the least of the Poor Richard variety. If he have any Buncombe constituency, it is that unrealized commonwealth of philosophers which Plotinus proposed to establish, and if he were to make an almanac, his directions to farmers would be something like this "OCTOBER *Indian Summer*, now is the time to get in your early Vedas." What, then, is his secret? Is it not that he out-Yankees us all? that his range includes us all? that he is equally at home with the potato-disease and original sin, with pegging shoes and the Over-Soul? that, as we try all trades, so has he tried all cultures? and above all, that his mysticism gives us a counterpoise to our super-practicality?

There is no man living to whom, as a writer, so many of us feel and thankfully acknowledge so great an indebtedness for ennobling impulses,—none whom so many cannot abide. What does he mean? ask these last. Where is his system? What is the use of it all? What the deuce have we to do with Brahma? I do not propose to write an essay on Emerson at this time. I will only say that one may find grandeur and consolation in a starlit night without caring to ask what it means, save grandeur and consolation, one may like Montaigne, as some ten generations before us have done, without thinking him so systematic as some more eminently tedious (or shall we say tediously eminent?) authors, one may think roses as good in their way as cabbages, though the latter would make a better show in the witness-box, if cross-

examined as to their usefulness, and as for Brahma, why, he can take care of himself, and won't bite us at any rate.

The bother with Mr Emerson is, that, though he writes in prose, he is essentially a poet. If you undertake to paraphrase what he says, and to reduce it to words of one syllable for infant minds, you will make as sad work of it as the good monk with his analysis of Homer in the *Epistolæ Obscurorum Virorum*.⁴ We look upon him as one of the few men of genius whom our age has produced, and there needs no better proof of it than his masculine faculty of fecundating other minds. Search for his eloquence in his books and you will perchance miss it, but meanwhile you will find that it has kindled all your thoughts. For choice and pith of language he belongs to a better age than ours, and might rub shoulders with Fuller and Browne,—though he does use that abominable word *reliable*. His eye for a fine, telling phrase that will carry true is like that of a backwoodsman for a rifle, and he will dredge you up a choice word from the mud of Cotton Mather himself. A diction at once so rich and so homely as his I know not where to match in these days of writing by the page, it is like homespun cloth-of-gold. The many cannot miss his meaning, and only the few can find it. It is the open secret of all true genius. It is wholesome to angle in those profound pools, though one be rewarded with nothing more than the leap of a fish that flashes his freckled side in the sun and as suddenly absconds in the dark and dreamy waters again. There is keen excitement, though there be no ponderable acquisition. If we carry nothing home in our baskets, there is ample gain in dilated lungs and stimulated blood. What does he mean, quotha? He means inspiring

³ Matthew Roydon. His "Elegie" on Sidney, published in *The Phoenix Nest*, a poetical miscellany, in 1593, is quoted by Lowell again at the end of this essay.

⁴ "Letters of Obscure Men," a sixteenth century book of uncertain authorship.

hunts, a divining-rod to your deeper nature. No doubt, Emerson, like all original men, has his peculiar audience, and yet I know none that can hold a promiscuous crowd in pleased attention so long as he. As in all original men, there is something for every palate. "Would you know," says Goethe, "the ripest cherries? Ask the boys and the blackbirds."

The announcement that such a pleasure as a new course of lectures by him is coming, to people as old as I am, is something like those forebodings of spring that prepare us every year for a familiar novelty, none the less novel, when it arrives, because it is familiar. We know perfectly well what we are to expect from Mr. Emerson, and yet what he says always penetrates and stirs us, as is apt to be the case with genius, in a very unlooked-for fashion. Perhaps genius is one of the few things which we gladly allow to repeat itself,—one of the few that multiply rather than weaken the force of their impression by iteration? Perhaps some of us hear more than the mere words, are moved by something deeper than the thoughts? If it be so, we are quite right, for it is thirty years and more of "plain living and high thinking"⁵ that speak to us in this altogether unique lay-preacher. We have shared in the beneficence of this varied culture, this fearless impartiality in criticism and speculation, this masculine sincerity, this sweetness of nature which rather stimulates than cloy, for a generation long. If ever there was a standing testimonial to the cumulative power and value of Character (and we need it sadly in these days), we have it in this gracious and dignified presence. What an antiseptic is a pure life! At sixty-five (or two years beyond his grand climacteric, as he would prefer to call it) he has that privilege of soul which abolishes the calendar, and presents him to us always the unwasted contemporary of his own prime. I do not know if he seem old to his younger hearers, but we who have known him so long wonder at the tenacity with which he maintains himself

even in the outposts of youth. I suppose it is not the Emerson of 1868 to whom we listen. For us the whole life of the man is distilled in the clear drop of every sentence, and behind each word we divine the force of a noble character, the weight of a large capital of thinking and being. We do not go to hear what Emerson says so much as to hear Emerson. Not that we perceive any falling-off in anything that ever was essential to the charm of Mr. Emerson's peculiar style of thought or phrase. The first lecture, to be sure, was more disjointed even than common. It was as if, after vainly trying to get his paragraphs into sequence and order, he had at last tried the desperate expedient of *shuffling* them. It was chaos come again, but it was a chaos full of shooting-stars, a jumble of creative forces. The second lecture, on "Criticism and Poetry," was quite up to the level of old times, full of that power of strangely subtle association whose indirect approaches startle the mind into almost painful attention, of those flashes of mutual understanding between speaker and hearer that are gone ere one can say it lightens. The vice of Emerson's criticism seems to be, that while no man is so sensitive to what is poetical, few men are less sensible than he of what makes a poem. He values the solid meaning of thought above the subtler meaning of style. He would prefer Donne, I suspect, to Spenser, and sometimes mistakes the queer for the original.

To be young is surely the best, if the most precarious, gift of life, yet there are some of us who would hardly consent to be young again, if it were at the cost of our recollection of Mr. Emerson's first lectures during the consulate of Van Buren. We used to walk in from the country to the Masonic Temple (I think it was), through the crisp winter night, and listen to that thrilling voice of his, so charged with subtle meaning and subtle music, as ship-

⁵ From Wordsworth's sonnet, "Written in London, September, 1802."

wrecked men on a raft to the hail of a ship that came with unhopèd-for food and rescue. Cynics might say what they liked. Did our own imaginations transfigure dry remainder-biscuit into ambrosia? At any rate, he brought us *life*, which, on the whole, is no bad thing. Was it all transcendentalism? magic-lantern pictures on mist? As you will. Those, then, were just what we wanted. But it was not so. The delight and the benefit were that he put us in communication with a larger style of thought, sharpened our wits with a more pungent phrase, gave us ravishing glimpses of an ideal under the dry husk of our New England, made us conscious of the supreme and everlasting originality of whatever bit of soul might be in any of us, freed us, in short, from the stocks of prose in which we had sat so long that we had grown well-nigh contented in our cramps. And who that saw the audience will ever forget it, where every one still capable of fire, or longing to renew in himself the half-forgotten sense of it, was gathered? Those faces, young and old, agleam with pale intellectual light, eager with pleased attention, flash upon me once more from the deep recesses of the years with an exquisite pathos. Ah, beautiful young eyes, brimming with love and hope, wholly vanished now in that other world we call the Past, or peering doubtfully through the pensive gloaming of memory, your light impoverishes these cheaper days! I hear again that rustle of sensation, as they turned to exchange glances over some pithier thought, some keener flash of that humor which always played about the horizon of his mind like heat-lightning, and it seems now like the sad whisper of the autumn leaves that are whirling around me. But would my picture be complete if I forgot that ample and vegete countenance of Mr R—— of W——,—how, from its regular post at the corner of the front bench, it turned in ruddy triumph to the profaner audience as if he were the inexplicably appointed fugleman of appreciation? I was reminded of him by those

hearty cherubs in Titian's Assumption that look at you as who should say, "Did you ever see a Madonna like *that*? Did you ever behold one hundred and fifty pounds of womanhood mount heavenward before like a rocket?"

To some of us that long-past experience remains as the most marvellous and fruitful we have ever had. Emerson awakened us, saved us from the body of this death. It is the sound of the trumpet that the young soul longs for, careless what breath may fill it. Sidney heard it in the ballad of "Chevy Chase,"⁶ and we in Emerson. Nor did it blow retreat, but called to us with assurance of victory. Did they say he was disconnected? So were the stars, that seemed larger to our eyes, still keen with that excitement, as we walked homeward with prouder stride over the creaking snow. And were *they* not knit together by a higher logic than our mere sense could master? Were we enthusiasts? I hope and believe we were, and am thankful to the man who made us worth something for once in our lives. If asked what was left? what we carried home? we should not have been careful for an answer. It would have been enough if we had said that something beautiful had passed that way. Or we might have asked in return what one brought away from a symphony of Beethoven? Enough that he had set that ferment of wholesome discontent at work in us. There is one, at least, of those old hearers, so many of whom are now in the fruition of that intellectual beauty of which Emerson gave them both the desire and the foretaste, who will always love to repeat —

"Che in la mente m' è fitta, ed or m'
accuora

La cara e buona immagine paterna

⁶ Sidney wrote of this ballad, in his *Defence of Poesie* (1598) "I never heard the old song of Percy and Douglas that I found not my heart moved more than by a trumpet."

Di voi, quando nel mondo ad ora ad ora
M' insegnavaste come l' uom s' eterna "7

I am unconsciously thinking, as I write, of the third lecture of the present course, in which Mr Emerson gave some delightful reminiscences of the intellectual influences in whose movement he had shared. It was like hearing Goethe read some passages of the *Wahrheit aus seinem Leben*.⁸ Not that there was not a little *Dichtung*, too, here and there, as the lecturer built up so lofty a pedestal under certain figures as to lift them into a prominence of obscurity, and seem to masthead them there. Everybody was asking his neighbor who this or that recondite great man was, in the faint hope that somebody might once have heard of him. There are those who call Mr Emerson cold. Let them revise their judgment in presence of this loyalty of his that can keep warm for half a century, that never forgets a friendship, or fails to pay even a fancied obligation to the uttermost farthing. This substantiation of shadows was but incidental, and pleasantly characteristic of the man to those who know and love him. The greater part of the lecture was devoted to reminiscences of things substantial in themselves. He spoke of Everett, fresh from Greece and Germany, of Channing, of the translations of Margaret Fuller, Ripley, and Dwight, of the *Dial* and Brook Farm. To what he said of the latter an undertone of good-humored irony gave special zest. But what every one of his hearers felt was that the protagonist in the drama was left out. The lecturer was no Æneas to babble the *quorum magna pars fui*,⁹ and, as one of his listeners, I cannot help wishing to say how each of them was commenting the story as it went along, and filling up the necessary gaps in it from his own private store of memories. His younger hearers could not know how much they owed to the benign impersonality, the quiet scorn of everything ignoble, the never-sated hunger of self-culture, that were personified in the man before them. But the older knew how much the coun-

try's intellectual emancipation was due to the stimulus of his teaching and example, how constantly he had kept burning the beacon of an ideal life above our lower region of turmoil. To him more than to all other causes together did the young martyrs of our civil war owe the sustaining strength of thoughtful heroism that is so touching in every record of their lives. Those who are grateful to Mr Emerson, as many of us are, for what they feel to be most valuable in their culture, or perhaps I should say their impulse, are grateful not so much for any direct teachings of his as for that inspiring lift which only genius can give, and without which all doctrine is chaff.

This was something like the *caret* which some of us older boys wished to fill up on the margin of the master's lecture. Few men have been so much to so many, and through so large a range of aptitudes and temperaments, and this simply because all of us value manhood beyond any or all other qualities of character. We may suspect in him, here and there, a certain thinness and vagueness of quality, but let the waters go over him as they list, this masculine fibre of his will keep its lively color and its toughness of texture. I have heard some great speakers and some accomplished orators, but never any that so moved and persuaded men as he. There is a kind of undertow in that rich baritone of his that sweeps our minds from their foothold into deeper waters with a drift we cannot and would not resist. And how artfully (for

⁷ Dante's *Inferno*, XV, 82-85

"For in my mind is fixed, and touches now
My heart, the dear and good paternal
image

Of you, when in the world from hour to
hour

You taught me how a man becomes
eternal"

—Longfellow's translation

⁸ Lowell refers to Goethe's famous autobiographical work, *Aus Memem Leben, Dichtung und Wahrheit—Out of My Life, Poetry and Truth*—which was published in four parts, 1811-33

⁹ Vergil's *Æneid*, II, 6 "Of which things I was a great part."

Emerson is a long-studied artist in these things) does the deliberate utterance, that seems waiting for the fit word, appear to admit us partners in the labor of thought and make us feel as if the glance of humor were a sudden suggestion, as if the perfect phrase lying written there on the desk were as unexpected to him as to us! In that closely filed speech of his at the Burns centenary dinner,¹⁰ every word seemed to have just dropped down to him from the clouds. He looked far away over the heads of his hearers, with a vague kind of expectation, as into some private heaven of invention, and the winged period came at last obedient to his spell "My dainty Ariel!"¹¹ he seemed murmuring to himself as he cast down his eyes as if in deprecation of the frenzy of approval and caught another sentence from the Sibylline leaves that lay before him, ambushed behind a dish of fruit and seen only by nearest neighbors. Every sentence brought down the house, as I never saw one brought down before,—and it is not so easy to hit Scotsmen with a sentiment that has no hint of native brogue in it. I watched, for it was an interesting study, how the quick sympathy ran flashing from face to face down the long tables, like an electric spark thrilling as it went, and then exploded in a thunder of plaudits. I watched till tables and faces vanished, for I, too, found myself caught up in the common enthusiasm, and my excited fancy set me under the *bema* listening to him who fulminated over Greece. I can never help applying to him what Ben Jonson said of Bacon: "There happened in my time one noble speaker, who was full of gravity in his speaking. His language was nobly censorious. No man ever spake more neatly, more pressly, more weightily, or suffered less emptiness, less idleness, in what he uttered. No member of his speech but consisted of his own graces. His hearers could not cough, or look aside from him, without loss. He commanded where he spoke." Those who heard him while their natures were yet plastic, and their mental nerves trembled

under the slightest breath of divine air, will never cease to feel and say —

"Was never eye did see that face,
Was never ear did hear that tongue,
Was never mind did mind his grace,
That ever thought the travail long,
But eyes, and ears, and every thought,
Were with his sweet perfections caught."

CAMBRIDGE THIRTY YEARS AGO¹ [1864 (1853)]

THE SEAT of the oldest college in America, it had, of course, some of that cloistered quiet which characterizes all university towns. Even now delicately-thoughtful A. H. C.² tells me that he finds in its intellectual atmosphere a repose which recalls that of grand old Oxford. But underlying this, it had an idiosyncrasy of its own. Boston was not yet a city, and Cambridge was still a country village, with its own habits and traditions, not yet feeling too strongly the force of suburban gravitation. Approaching it from the west by what was then called the New Road (it is called so no longer, for we change our names whenever we can, to the great detriment of all historical association), you would pause on the brow of Symonds' Hill to enjoy a view singularly soothing and placid. In front of you lay the town, tufted with elms, lindens, and horse-chestnuts, which had seen Massa-

¹⁰ At Boston, January 25, 1859. Holmes wrote a poem for this celebration, at which Emerson was the chief speaker.

¹¹ Shakespeare's *The Tempest*, V, 1.95.

¹ This selection is an abridgement by the present editors of Lowell's essay published in 1853, descriptive of the Cambridge of his boyhood.

² Arthur Hugh Clough, English poet and Oxford graduate, whom Lowell met in England and who crossed the Atlantic with Lowell and Thackeray. Clough lived in Cambridge, Mass., for some months in 1852.

achusetts a colony, and were fortunately unable to emigrate with the Tories by whom, or by whose fathers, they were planted. Over it rose the noisy belfry of the College, the square, brown tower of the church, and the slim, yellow spire of the parish meeting-house, by no means ungraceful, and then an invariable characteristic of New England religious architecture. On your right, the Charles slipped smoothly through green and purple salt-meadows, darkened, here and there, with the blossoming black-grass as with a stranded cloud-shadow. Over these marshes, level as water, but without its glare, and with softer and more soothing gradations of perspective, the eye was carried to a horizon of softly-rounded hills. To your left hand, upon the Old Road, you saw some half-dozen dignified old houses of the colonial time, all comfortably fronting southward. If it were early June, the rows of horse-chestnuts along the fronts of these houses showed, through every crevice of their dark heap of foliage, and on the end of every drooping limb, a cone of pearly flowers, while the hill behind was white or rosy with the crowding blooms of various fruit-trees. There is no sound, unless a horseman clatters over the loose planks of the bridge, while his antipodal shadow glides silently over the mirrored bridge below.

Such was the charmingly rural picture which he who, thirty years ago, went eastward over Symonds' Hill had given him for nothing, to hang in the Gallery of Memory. But we are a city now, and Common Councils have yet no notion of the truth (learned long ago by many a European hamlet) that picturesqueness adds to the actual money value of a town. To save a few dollars in gravel, they have cut a kind of dry ditch through the hill, where you suffocate with dust in summer, or flounder through wastdeep snow-drifts in winter, with no prospect but the crumbling earth-walls on either side. The landscape was carried away cart-load by cart-load, and, dumped down on the roads, forms a

part of that unfathomable pudding, which has, I fear, driven many a teamster and pedestrian to the use of phrases not commonly found in English dictionaries.

We called it "the Village" then (I speak of Old Cambridge), and it was essentially an English village, quiet, unspeculative, without enterprise, sufficing to itself, and only showing such differences from the original type as the public school and the system of town government might superinduce. A few houses, chiefly old, stood around the bare Common, with ample elbow-room, and old women, capped and spectacled, still peered through the same windows from which they had watched Lord Percy's³ artillery rumble by to Lexington, or caught a glimpse of the handsome Virginia General⁴ who had come to wield our homespun Saxon chivalry. People were still living who regretted the late unhappy separation from the mother island, who had seen no gentry since the Vassalls⁵ went, and who thought that Boston had ill kept the day of her patron saint, Botolph, on the 17th of June, 1775. The hooks were to be seen from which had swung the hammocks of Burgoyne's captive redecoats. If memory does not deceive me, women still washed clothes in the town spring, clear as that of Bandusia⁶. One coach sufficed for all the travel to the metropolis. Commencement had not ceased to be the great holiday of the Puritan Commonwealth, and a fitting one it was,—the festival of Santa Scholastica,⁷ whose triumphal path one may conceive strewn with leaves of spelling-book instead of bay. The students (scholars they were called

⁷ "Saint Scholarship."

then) wore their sober uniform, not ostentatiously distinctive or capable of rousing democratic envy, and the old lines of caste were blurred rather than rubbed out, as servitor was softened into beneficiary. The Spanish king was sure that the gesticulating student was either mad or reading Don Quixote, and if, in those days, you met a youth swinging his arms and talking to himself, you might conclude that he was either a lunatic or one who was to appear in a "part" at the next Commencement. A favorite place for the rehearsal of these orations was the retired amphitheatre of the Gravel-pit, perched unregarded on whose dizzy edge, I have heard many a burst of *plusquam Ciceronian*⁸ eloquence, and (often repeated) the regular *saluto vos, præstantissimæ*⁹ &c, which every year (with a glance at the gallery) causes a flutter among the fans innocent of Latin, and delights to applauses of conscious superiority the youth almost as innocent as they. It is curious, by the way, to note how plainly one can feel the pulse of self in the plaudits of an audience. At a political meeting, if the enthusiasm of the heges hang fire, it may be exploded at once by an allusion to their intelligence or patriotism, and at a literary festival, the first Latin quotation draws the first applause, the clapping of hands being intended as a tribute to our own familiarity with that sonorous tongue, and not at all as an approval of the particular sentiment conveyed in it. For if the orator should say, "Well has Tacitus remarked, *Americam omnes quâdam in naturâ furcâ dignissimam*,"¹⁰ it would be all the same. But the Gravel-pit was patient, if irresponsible, nor did the declaimer always fail to bring down the house, bits of loosened earth falling now and then from the precipitous walls, their cohesion perhaps overcome by the vibrations of the voice, and happily satiating the effect of most popular discourses, which prevail rather with the earthy than the spiritual part of the hearer. Was it possible for us in those days to conceive of a greater potentate than the President of the

University, in his square doctor's cap, that still filially recalled Oxford and Cambridge? If there was a doubt, it was suggested only by the Governor, and even by him on artillery-election days alone, superbly martial with epaulets and buckskin breeches, and bestiding the war-horse, promoted to that solemn duty for his tameness and steady habits.

Thirty years ago, the town had indeed a character. Railways and omnibuses had not rolled flat all little social prominences and peculiarities, making every man as much a citizen everywhere as at home. No Charlestown boy could come to our annual festival without fighting to avenge a certain traditional porcine imputation against the inhabitants of that historic locality, and to which our youth gave vent in fanciful imitations of the dialect of the sty, or derisive shouts of "Charlestown hogs!" The penny newspaper had not yet silenced the tripod of the barber, oracle of news. Everybody knew everybody, and all about everybody, and village wit, whose high 'change was around the little market-house in the town square, had labelled every more marked individuality with nicknames that clung like burs. Things were established then, and men did not run through all the figures on the dial of society so swiftly as now, when hurry and competition seem to have quite unhung the modulating pendulum of steady thrift and competent training. Some slow-minded persons even followed their father's trade,—a humiliating spectacle, rarer every day. We had our established loafers, toppers, proverb-mongers, barber, parson, nay, postmaster, whose tenure was for life. The great political engine did not then come down at regular quadrennial intervals, like a nail-cutting machine, to make all official lives of a standard length, and to generate lazy and intriguing expectancy. Life flowed in recognized channels, narrower

⁹ "I salute you, most excellent ones."

¹⁰ "All Americans are by nature most worthy to be hanged."

perhaps, but with all the more individuality and force

There was but one white-and-yellow-washer, whose own cottage, fresh-gleaming every June through grapevine and creeper, was his only sign and advertisement. He was said to possess a secret, which died with him like that of Luca della Robbia,¹¹ and certainly conceived all colors but white and yellow to savor of savagery, civilizing the stems of his trees annually with liquid lime, and meditating how to extend that candent baptism even to the leaves. His *pie-plants* (the best in town), compulsory monastics, blanched under barrels, each in his little hermitage, a vegetable Certosa.¹² His fowls, his ducks, his geese, could not show so much as a gray feather among them, and he would have given a year's earnings for a white peacock. The flowers which decked his little *door-yard* were whitest China-asters and goldenest sun-flowers, which last, backsliding from their traditional Paisee faith, used to puzzle us much more not a little by staining brazenly every way except towards the sun. Celery, too, he raised, whose virtue is its paleness, and the silvery onion, and turnip, which, though outwardly conforming to the green heresies of summer, nourish a purer faith subteraneously, like early Christians in the catacombs. In an obscure corner grew the sanguine beet, tolerated only for its usefulness in allaying the asperities of Saturday's salt-fish. He loved winter better than summer, because Nature then played the whitewasher, and challenged with her snows the scarce inferior purity of his overalls and neck-cloth. I fancy that he never rightly liked Commencement, for bringing so many black coats together. He founded no school. Others might essay his art, and were allowed to try their prentice hands on fences and the like coarse subjects, but the ceiling of every housewife waited on the leisure of Newman (*schneumon* the students called him for his diminutiveness), nor would consent to other brush than his. There was also but one brewer,—Lewis, who made the village beer,

both spruce and ginger, a grave and amiable Ethiopian, making a discount always to the boys, and wisely, for they were his chiefest patrons. He wheeled his whole stock in a white-roofed handcart, on whose front a sign-board presented at either end an insurrectionary bottle, yet insurgent after no mad Gallic fashion, but soberly and Saxonly discharging itself into the restraining formulary of a tumbler, symbolic of orderly prescription. The artist had struggled manfully with the difficulties of his subject, but had not succeeded so well that we did not often debate in which of the twin bottles Spruce was typified, and in which Ginger. We always believed that Lewis mentally distinguished between them, but by some peculiarity occult to exoteric eyes. This ambulatory chapel of the Bacchus that gives the colic, but not inebriates, only appeared at the Commencement holidays, and the lad who bought of Lewis laid out his money well, getting respect as well as beer, three *sis* to every glass,—“Beer, sir? yes, sir spruce or ginger, sir?” I can yet recall the innocent pride with which I walked away after that somewhat risky ceremony, (for a bottle sometimes blew up,) dilated not alone with carbonic acid gas, but with the more ethereal fixed air of that titular flattery. Nor was Lewis proud. When he tried his fortunes in the capital on Election days, and stood amid a row of rival venders in the very flood of custom, he never forgot his small fellow-citizens, but welcomed them with an assuring smile, and served them with the first.

The barber's shop was a museum, scarce second to the larger one of Greenwood in the metropolis. The boy who was to be clipped there was always accompanied to the sacrifice by troops of friends, who thus inspected the curiosities *gratis*. While the watchful eye of R. wandered to keep in check these rather unscrupulous explorers, the unpausing shears would sometimes

¹² A Carthusian monastery.

overstep the boundaries of strict tonsorial prescription, and make a notch through which the phrenological developments could be distinctly seen. As Michael Angelo's design was modified by the shape of his block, so R, rigid in artistic proprieties, would contrive to give an appearance of design to this aberration, by making it the keynote to his work, and reducing the whole head to an appearance of premature baldness. What a charming place it was,—how full of wonder and delight! The sunny little room, fronting southwest upon the Common, rang with canaries and Java sparrows, nor were the familiar notes of robin, thrush, and bobolink wanting. A large white cockatoo harangued vaguely, at intervals, in what we believed (on R's authority) to be the Hottentot language. He had an unvarnished air, but what inventions of former grandeur he was indulging in, what sweet South-African Argos he was remembering, what tropical heats and giant trees by un conjectured rivers, known only to the wallowing hippopotamus, we could only guess at. The walls were covered with curious old Dutch prints, beaks of albatross and penguin, and whales' teeth fantastically engraved. There was Frederick the Great, with head drooped plotingly, and keen side-long glance from under the three-cornered hat. There hung Bonaparte, too, the long-haired, haggard general of Italy, his eyes sombre with prefigured destiny, and there was his island grave,—the dream and the fulfilment. Good store of sea-fights there was also, above all, Paul Jones in the *Bonhomme Richard*, the smoke rolling courteously to leeward, that we might see him dealing thunderous wreck to the two

hostile vessels, each twice as large as his own, and the reality of the scene corroborated by streaks of red paint leaping from the mouth of every gun. Suspended over the fireplace, with the curling-tongs, were an Indian bow and arrows, and in the corners of the room stood New Zealand paddles and war-clubs, quaintly carved. The model of a ship in glass we variously estimated to be worth from a hundred to a thousand dollars, R rather favoring the higher valuation, though never distinctly committing himself. Among these wonders, the only suspicious one was an Indian tomahawk, which had too much the peaceful look of a shingling-hatchet. Did any rarity enter the town, it gravitated naturally to these walls, to the very nail that waited to receive it, and where, the day after its accession, it seemed to have hung a lifetime. We always had a theory that R was immensely rich, (how could he possess so much and be otherwise?) and that he pursued his calling from an amiable eccentricity. He was a conscientious artist, and never submitted it to the choice of his victim whether he would be perfumed or not. Faithfully was the bottle shaken and the odoriferous mixture rubbed in, a fact redolent to the whole school-room in the afternoon. Sometimes the persuasive tonsor would impress one of the attendant volunteers, and reduce his poll to shoe-brush crispness, at cost of the reluctant ninepence hoarded for Fresh Pond, and the next half-holiday. So purely indigenous was our population then, that R had a certain exotic charm, a kind of game flavor, by being a Dutchman.

American Literature 1800-1860

IV

TRANSCENDENTALISM

I

YOUNG men and women who are stirred by strong ideas must always come together in groups for discussion and argument. Collegians in their sessions," artists and littérateurs in the "salons" of Paris and other capitals, and those literary clubs which have often been important in the development of American writing and publishing are all results of the urge to get together and discuss stimulating new ideas. Sometimes in such informal meetings are born movements and schools in literature, art, and politics.

So it was with the New England Transcendentalists of the 1830's. Emerson speaks of the "loneliness" of these young idealists, perhaps that was one thing that drew them together. But primarily it was their common enthusiasm for the "new views" which had come upon them so suddenly, as it seemed, from certain German writers, from Coleridge, more recently from the thunder and lightning of Carlyle, and now from their own neighbor Emerson. The oldest of this New England group was A. Bronson Alcott, who was not yet forty, but who seemed a venerable sage to the others. Ralph Waldo Emerson, their leader, was thirty-three, but most of the group were in their twenties.

It was in September of 1836 Emerson's *Nature*, his first book and the manifesto of his leading ideas, was just out, Carlyle's *Sartor Resartus* was being issued by Boston publishers at Emerson's urging (not until two years later was it published in book form in England), Coleridge had died recently, and his *Literary Remains* were just coming from the press. So one day in that month Emerson, George Ripley, and Frederick H. Hedge happened to meet in Boston, and it was suggested that they and some others interested in the exciting new ideas should get together some evening and talk about them. "Come to my house," said Ripley, and an evening the following week was set. This meeting proved so satisfactory that it was repeated the next week, and an even larger group met at Emerson's house in Concord later in that same month. The club thus formed had no official name, no set programs, no officers, but it did have something to talk about, and this is what its members wanted to do. It lasted for several years and came to be called informally "The Transcendental Club."

No reporter with an eye for picturesque detail has given us an account of any of these meetings. One can imagine without difficulty, however, the tall, blonde Alcott, with his mild blue eyes and gentle manners, discoursing easily and at length, if sometimes not quite comprehensibly, in Emerson's parlor, the group about him listening respectfully. A similar dignity, almost a nobility, seemed to rest upon Emerson, the host and the newly found spokesman of these young intellectuals. "Serene" was the word for him, his disciples

always felt his quiet, illumined, masterful serenity. Then there was young Theodore Parker, big and strong in body as in intellect, just beginning a career in theology and preaching that was to make him famous. The mystical poet Jones Very was there, tall, never at ease, with eyes too bright and burning. Margaret Fuller was quite able to hold her own with all these men, and delighted to do so, ugly, perhaps (if you noticed it) and short and plump, she never troubled to conceal her frankly passionate nature, or that direct, driving mind that sometimes disconcerted Emerson. Thoreau sat in a corner, more roughly dressed than these Bostonians, his long curved nose shadowing his mouth, saying little but not unready with a caustic remark that could stop the whole conversation for a moment. The leonine Orestes Augustus Brownson, "Father" Taylor with his flowing beard, and the learned Hedge were often at these meetings.

Talk goes on and on—the doctrine of innate ideas, idealism, the highest aim, indifference of the churches. "These talkers who talk the sun and moon away," Emerson called them. Finally apples from the Emerson orchard are passed about on plates, and all ends with the munching of Russets and Roman-Stems.

II

Emerson's paternal ancestors for six generations back were, with one exception, clergymen. They were no men of the cloister, however, they fought the Indians and the redcoats as well as the Devil, and were the leaders that Puritan congregations expected their ministers to be in the eighteenth century. Emerson's essential Americanism, as well as his tradition of Puritanism, came to him as a natural heritage.

Ralph Waldo, the second son of the Rev. William Emerson, a brilliant and highly regarded Unitarian clergyman, was born in 1803, his father died eight years later, leaving a widow and five young sons unprovided with cash. Young Waldo learned to do his part in a family which lived frugally but cheerfully with those familiar angels—as he said many years later in his lecture on "Domestic Life"—Toil and Want, Truth and Mutual Faith. Waldo drove the family cow to pasture on Boston Common, sometimes played hooky from school and went swimming in the harbor, read and committed to memory much poetry and oratory. Education was more highly thought of in the Emerson family than food and clothes. Aunt Mary Moody, that witty and extraordinary member of the household (born in 1775, she said she was in arms at the Concord battle), contended that the Emerson boys "were born to be educated."

Waldo owed a great deal to this "aunt of genius," as he called her. She was little more than a dwarf in stature, measuring but four feet, three inches in height, but she carried herself erectly, and her blue eyes flashed with a bold spirit. A student and a wide reader, she was a great letter writer. She always

had something to say and she said it remarkably well. Her very talk was challenging and inspirational; her nephew could compare it only to "the march of the mountain winds, the waving of flowers, or the flight of birds." Among the influences that made a writer of Ralph Waldo Emerson, his Aunt Mary must be ranked very high. But she probably did even more than that, her own combination of unswerving Calvinistic vigor and Yankee shrewdness and self-reliance left its impress on the nephews whom she loved as though they were her own children.

Waldo entered Harvard in 1817 at the age of fourteen—not an unusual age for matriculation—and was graduated four years later at about the middle rank in his class, he was chosen class poet only after seven others had declined the honor. There followed some years of school-teaching, study for the ministry (part of it at the Harvard Divinity School), and travel in the South for the sake of his health.

Emerson became minister of the Second Church (Unitarian) of Boston in 1829. He married that same year, but his wife died of tuberculosis less than eighteen months later. Though his pastoral work was successful, Emerson grew increasingly dissatisfied with church rituals and churchly thought. When he resigned in 1832, he gave as his chief reason his lack of sympathy with the rite of the Lord's Supper. He was not hostile to it, he said, he was merely not interested in it.

But his difficulty was more extensive than that; he felt that the church imposed upon his speculation and action bonds which he could not tolerate. Especially was he concerned with the church's hostility to science. His reading for the previous year had been largely in scientific literature. It was just before he made his decision to break with the ministry that he entered this declaration in his journal: "The Religion that is afraid of science dishonours God and commits suicide."

Partly for reasons of health and partly because he craved contact with some of the great minds with whose work he had long been familiar, Emerson traveled in Europe in 1832-33. In England he met many great men, including Landor, Coleridge, and Wordsworth, but, on the whole and in general, he was disappointed in all of them. In the home of the Carlyles at Craigenputtock, however, he made a short visit which was memorable chiefly because it was the beginning of a life-long friendship.

But he returned to Boston confirmed in his own self-reliance, convinced that the work he was to do must be done independently. He began preaching here and there, on invitation, fell in with the lecture system which was becoming important in New England, and did more writing. He married again in 1835, and moved to Concord, Massachusetts, which was to be his home for the remainder of his life. From this time forward, his energies were devoted to writing and lecturing.

His lecture tours took Emerson to many parts of the country and taught him at first hand much about the America of which he became, more than we sometimes realize, the spokesman and prophet. He crossed and recrossed the Mississippi on the ice, to speak in Iowa towns. His stage was upset in a snow-bank when he was journeying to a lecturing engagement in Maine. He escaped from a burning hotel at Niagara. His letters and journals are full of the details of these trips.

When he was seventeen years old and a junior at Harvard, Emerson had begun to keep a regular journal, as young men of a literary turn often do today. But this diary of thoughts (for it contains little of the conventionally biographical) was kept up for more than fifty years and is today a fascinating record of the day-by-day activity of a great mind. Here we find jottings of ideas, analogies, figures of speech, flashes of poetry, which were later to be worked into essays, lectures, finished poems. The reader who is familiar with the great essays of Emerson is delighted to discover them in the journals in a "state of becoming"—fragmentary, thrown off in the play of an active intelligence, but often more stimulating by reason of their very lack of integration.

The student of the journals is amazed at the breadth of reading evident in them. If anyone is tempted to think that Emerson belongs to some neat pattern or sequence—say Kant, Novalis, Carlyle, Emerson—here is complete refutation. His constant reading in Greek philosophy, mysticism, and ethics was important—Plato, of course, Plotinus, to whom he owed a debt beyond computation, Plutarch, his frequent companion. The English philosophers and historians—Bacon, Locke, Priestley, Gibbon, Hume, and many others—he read to good purpose. Coleridge and Wordsworth were major influences upon him. The Germans he read in translation—Kant, Schelling, Fichte, Goethe, and the rest. Two of the chief gods in his literary Pantheon were Shakespeare and Montaigne. But such a short list gives little notion of the scope of Emerson's reading and study. He had a special liking for the seventeenth century English poets, and he read Scott's novels with unfailing interest.

III

Emerson's own essays are easy to read,—even for the beginner, if he approaches them properly. They have an oratorical flair, and a play of fancy essentially poetical, which make them a delight to many readers. The analogies, the succinct quality, the figures of speech, the neat quotability of so many sentences help to characterize a style which successive generations of readers have found admirable. What makes Emerson hard for some is that they approach him with minds so filled with the thinking of a materialistic civilization that they allow no opening for spiritual ideas. Emerson himself saw both sides, and he is continually emphasizing the two phases of existence. It was a "game" with him to see both sides. In his essay on Montaigne he wrote

Every fact is related on one side to sensation, and on the other to morals. The game of thought is, on the appearance of one of these sides, to find the other. This head and tail are called, in the language of philosophy, Infinite and Finite, Relative and Absolute, Apparent and Real, and many fine names besides. Each man is born with a predisposition to one or the other of these sides of nature, and it will easily happen that men will be found devoted to one or the other. One class has the perception of difference, and is conversant with facts and surfaces, cities and persons, and the bringing of certain things to pass—men of talent and action. Another class have the perception of identity, and are men of faith and philosophy, men of genius.

Emerson belongs to the second class, but can share the point of view of the first. He sees both sides and also the whole which they make. Some philosophical critics have regarded him as a "dualist," but his dualism has a habit of dissolving into an all-inclusive monism. When he claims that his spiritual perceptions (he often calls them intuitions) are "facts" just as much as are the facts which are measurable by science, when he views the subjective and objective as two facets of the same coin and describes life as "sensations *and* states of mind" (as in his essay on "Experience"), he anticipates the Pragmatism of a later school, the philosophy which conceives experience, in William James' term, as a "double-barreled fact." If the beginning reader of Emerson will keep in mind this two-sidedness that is at the same time a perception of oneness or wholeness, and will accept the premise that a spiritual universe envelops, fuses with, and unifies the world of sense and science, he will get along well with his author.

It will be further helpful to watch for the reiterated ideas in Emerson. His paramount principles are, after all, comparatively few, though they are illuminated by countless suggestions from the streets and farms of America, from history, from poetry and philosophy. These few ideas are repeated again and again in different terms, in a hundred shapes and guises, in the essays and in the poems. This repetition is the effort of a sincere teacher to make himself understood. It may be helpful to list those ideas here. They may be grouped in various ways, and of course the list may be extended, but we shall place four in each of two classes—those dealing with Self-Reliance, and those dealing with Nature.

The foundation of the Self-Reliance group is (1) the primary Transcendental doctrine that each and every man and woman possesses a native, innate faculty for knowing called by Emerson *Intuition*. This faculty, he tells us,

is the fountain of action and of thought. Here are the lungs of that inspiration which giveth man wisdom and which cannot be denied without impiety and atheism. We lie in the lap of immense intelligence, which makes us receivers of its truth and organs of its activity. When we discern justice, when we discern truth, we do nothing of ourselves but allow a passage to its beams.

Because we are the agents of this divine intelligence, (2) we have, each of us, a great importance and authority in ourselves, therefore each of us ought to be *independent*, and to stand on the knowledge of his own native worth

A great man is coming to eat at my house I do not wish to please him, I wish that he should wish to please me I will stand here for humanity, and though I would make it kind, I would make it true The fact which is the upshot of all history is that there is a great responsible Thinker and Actor working wherever a man works

Being independent, Emerson proceeds, (3) a man should not concede too much to customs and systems devised of old time "The world is his who can see through its pretension What deafness, what stone-blind custom, what overgrown error you behold is only there by sufferance—by your sufferance" This is a doctrine of change, of *revolution*, or at least evolution, and it is one of the ideas which make Emerson essentially a young man's writer

Closely connected with all this insistence on the paramount importance of the individual consciousness is (4) a prevailing *optimism* No worldly misfortune, says Emerson, is sufficient to overcome the fortified mind,

For well the soul, if stout within,
Can arm impregnably the skin

After all, the whole self-reliant philosophy is optimistic "Give me health and a day, and I will make the pomp of emperors ridiculous"

In the Nature group of ideas, (1) the Over-Soul or God as a *transcendent* power that must also be *immanent* is essentially a part of the doctrine placed first in the other group It is expressed in this sentence from *Nature* "There seems to be a necessity in Spirit to manifest itself in material forms, and day and night, river and storm, beast and bird, acid and alkali, preexist in necessary Ideas in the mind of God, and are what they are by virtue of affections in the world of spirit A Fact is the end or last issue of spirit"

If we accept that doctrine, we are more easily led to another—(2) the idea of the *microcosm* If the same spirit runs through all natural phenomena, each particle reflects all of that spirit "The world globes itself in a drop of dew" Emerson makes the most of this each-in-all and all-in-each conception, so common in the mysticism of the ages "When me they fly, I am the wings," exults Brahma

It is all a matter of (3) the *unity* of man and nature, which is also a unity with God Our author writes.

In the woods we return to reason and faith There I feel that nothing can befall me in life—no disgrace, no calamity, which nature cannot repair

Standing on the bare ground, my head bathed by the blithe air, and uplifted into infinite space, all mean egotism vanishes. I become a transparent eyeball. I am nothing, I see all, the currents of the Universal Being circulate through me, I am part or particle of God.

And so God speaks through the poet or artist:

Not from a vain or shallow thought
His awful Jove young Phidias brought
Himself from God he could not free,
He builded better than he knew
The conscious stone to beauty grew

Intimately connected with this concept of the art process is the idea of (4) *beauty as created by the imagination*. "Nothing is beautiful alone," beauty is in the eye of the beholder, whether artist, critic, or amateur.

Though we travel the world over to find the beautiful, we must carry it with us, or we find it not. The best of beauty is a finer charm than skill in surfaces, in outlines, or rules of art can never teach, namely, a radiation from the work of art of human character,—a wonderful expression through stone, or canvas, or musical sound, of the deepest and simplest attributes of our nature, and therefore most intelligible at last to those souls which have these attributes.

It takes little thought to discover how closely knit together are all these ideas. They are all in and of the pattern that was Emerson. Their spiritual power, and their direct applicability to the daily life not only of the author's own day but of ours as well, give them a perennial vitality.

IV

Emerson's first small book, "the little azure-colored *Nature*," as Carlyle called it, is an intense and often lyrical exposition of his thought. Here the ideas which have just been noted as belonging to the second group find fresh and striking expression, often lapsing into pure poetry. He takes up separately four uses of nature—four classes of the effects of nature upon the soul—discussing them in chapters entitled "Commodity," "Beauty," "Language," and "Discipline." In the first of these he talks about the utilities and comforts which nature furnishes to man. The chapter on beauty shows the lyrical essayist at his highest flight, and the reader who yields to its persuasion shares a rapture and emotional fervour which are essentially religious.

The chapter on "Language" has analogies with *Sartor Resartus*. Words, which are symbols of things, are also symbols of spirit because things them-

selves are symbols of spirit. Thus the use of metaphor, accompaniment of deep feeling, indicates man's instinctive idealism.

In the final chapters on "Idealism," "Spirit," and "Prospects," the author becomes more abstract. His dualism is apparent when he says of traditional idealistic philosophy

Let it stand then, in the present state of our knowledge, merely as a useful introductory hypothesis, serving to apprise us of the eternal distinction between the soul and the world.

But this dualism quickly dissolves into an all-inclusive monism as he emphasizes the working of the Over-Soul.

We learn that the highest is present to the soul of man, that the dread universal essence, which is not wisdom, or love, or beauty, or power, but all in one, and each entirely, is that for which all things exist, and that by which they are, that spirit creates, that behind nature, throughout nature, spirit is present, one and not compound; it does not act upon us from without, that is, in space and time, but spiritually, or through ourselves; therefore, that spirit, that is, the Supreme Being, does not build up nature around us, but puts it forth through us, as the life of the tree puts forth new branches and leaves through the pores of the old. As a plant upon the earth, so a man rests upon the bosom of God; he is nourished by unfailing fountains, and draws at his need inexhaustible power. Who can set bounds to the possibilities of man? Once inhale the upper air, being admitted to behold the absolute natures of justice and truth, and we learn that man has access to the entire mind of the Creator, is himself the creator in the finite.

By his creative activity man can contribute to the unification of reality.

Empirical science is apt to cloud the sight, and by the very knowledge of functions and processes to bereave the student of the manly contemplation of the whole. The reason why the world lacks unity, and lies broken and in heaps, is because man is disunited with himself. Nature is not fixed but fluid. Spirit alters, moulds, makes it. Build therefore your own world.

The publication of *Nature* made Emerson immediately the chief spokesman of the "new views" and won him a small but enthusiastic following, but it also marked him in the minds of many as a dangerous radical.

The next year the Phi Beta Kappa Society of Harvard asked him to deliver its annual address. The result was "The American Scholar." Years later, Lowell wrote of the occasion of its delivery.

It was an event without any former parallel in our literary annals, a scene to be always treasured in the memory for its picturesqueness and its inspiration. What crowded and breathless aisles, what windows clustering with eager heads, what enthusiasm of approval, what grim silence of foregone dissent!

Many others who sat in that crowded assembly have testified similarly to the intense interest in the address. Central in it is the emphasis on Man Thinking and the necessity for the scholar in America to be self-reliant and bold and free of bondage to tradition. "Free should the scholar be—free and brave."

The next year, invited by a committee of students, Emerson delivered before the senior class of Harvard's Divinity School an address which shocked the orthodox by its insistence on independence in religious thought. In the winter of 1838-39 he gave a series of ten lectures at the Masonic Hall in Boston, and the following winter ten more. These and other addresses were eventually worked into the essays as we have them in his works. It was Emerson's common practice to jot his reflections down in his journal, later to work the journal entries out in lectures, and finally to prepare the lectures for publication in series of essays. This was by no means an invariable literary process with him, however, and "The American Scholar," the Divinity School address, and several other early lectures to academic organizations were published separately immediately after delivery.

In 1841 in a volume called *Essays*, later entitled *Essays First Series*, Emerson presented the work which was to form the chief basis of his fame at home and abroad. Here were twelve essays in which the author set forth the main principles of his thought. They include "Self-Reliance," "Compensation," "The Over-Soul," "History," and "Art." In his noble and challenging "Self-Reliance," Emerson wove together passages from various addresses he had been making, giving us the definitive pattern of his thinking on this, one of the major subjects which had employed his mind for many years. Its freshness, zest, and fighting challenge have moved many readers, its tonic quality has not weakened with age. "Compensation" has been scarcely less popular. The application of the idea of the compensations in nature to the spiritual world made attractive speculation, and if the result was an optimistic view of life, that seemed to many readers pure gain. It brought the realistic critics down upon Emerson, however, as did the mystical metaphysics of "The Over-Soul."

Essays Second Series appeared three years later. It began with "The Poet," one of the most enthusiastic eulogies of the poet's office ever penned, and ended with "New England Reformers," an essay containing much sound sense about classical education and a good deal of skepticism about reforms and reformers. On the whole, these nine pieces seem a little below the level of the twelve in the *First Series*, but they were better received by the public.

V

The history of Emerson's reputation in America shows a gradual increase of respect on the part of the more thoughtful, and a growing popular acceptance

of the Concord philosopher Edward Everett Hale, writing of his own early years, said that in 1837 it was considered "good form" to ridicule Emerson, and it was in the following year that the *Christian Examiner* referred to the "Divinity School Address" as "the latest form of infidelity." But steady and equable writing and living and lecturing on his own high plane gradually brought a change in the general attitude toward Emerson. This was signalized in 1844, when the *Examiner* printed a favorable review of his second series of *Essays* from the pen of that ardent Transcendentalist, F. H. Hedge. In the *Harbinger* of 1846, W. W. Story noted that "Emerson has become the fashion, or rather the fashion has become him. His admirers have gradually become the public." About the same time, the *Whig Review* pointed out that while the Transcendental movement had declined, Emerson had increased in reputation and was now writing and speaking to a larger audience than ever before. This was chiefly because his profound sympathy with basic American ideals lifted him above the position of mere spokesman for a movement.

In 1842-44 Emerson edited *The Dial*, a quarterly journal designed as the organ of the Boston Transcendental group. Margaret Fuller (assisted by George Ripley) had been editor of the first two annual volumes, and Emerson undertook the work with reluctance when Miss Fuller's health forced her to give it up. The magazine was in many ways an excellent production, though Emerson begrudged it the time and effort as well as the money he put into it. It was suspended at the end of its fourth volume.

Emerson's *Poems* were published late in 1846, though the title-page date is 1847. It was his own theory that the poet was chiefly seer. "It is not metres, but a metre-making argument, that makes a poem." Emerson's verse has been condemned for its forced rhymes, its perverse inversions, its carelessness, but the author's originality, his comparative freedom from conventional forms, his sincerity, and the force of his ideas give to many of his poems a high degree of power and beauty. They must be read in conjunction with the essays, nor is it always easy to say when the prose is poetry or the poetry prose. Certainly there are some short flights of Emerson's verse that soar very high indeed, and a surprising proportion of the *Poems* and their sequel *May-Day* (1867) is worth reading over and over, from year to year, until it becomes a part of one's own anthology of well-loved verse.

In 1847 Emerson made a second visit to Europe, lectured in London, and was stimulated by contacts with the leading men of England. He deeply enjoyed his visit to Carlyle in Chelsea. By this time his fame had spread over Europe. One admirer may be quoted. Nietzsche said of Emerson, "He simply does not know how old he is, or how young he yet will be."

The books he published in the years which followed his return to Concord—*Representative Men*, *English Traits*, *Conduct of Life*—brought a great increase in his popular following. In *Representative Men* Emerson applies the

basic theories of his philosophy to six great men—Plato, Swedenborg, Montaigne, Shakespeare, Napoleon, and Goethe. The essayist's powers are nowhere better shown than in this volume, which is perhaps a more suitable "introduction" to the author than *Nature*, which stands first chronologically. Here are all the zest, incisiveness, homely sense, and soaring idealism which characterize Emerson at his best. *English Traits*, product of his second visit overseas, is one of Emerson's easiest books. Whether one agrees with its attitudes and conclusions or not, one is sure to find its admiration of English strength of character, as well as the richness and serenity of the book as a whole, interesting and enjoyable. *The Conduct of Life*, with its nine essays on such topics as fate, beauty, and illusions, might have been titled "Essays Third Series." Close study of it will confirm the view of Professor Henry A. Pochmann that "Emerson's philosophy, far from being a haphazard affair of whim, rags and patches, and irreconcilable contrarieties, followed a course of consecutive development." The same point may be made concerning *Society and Solitude* (1870) which came ten years later, shortly before the author's breakdown. The essays of this book are more informal and anecdotal—occasionally like the fireside chat of an old man. *Letters and Social Aims*, prepared for the press by a friend who was later his biographer, James Elliot Cabot, was Emerson's last book to be published during his own lifetime, though other works, including the voluminous journals, were gathered up and published later.

Emerson was reading proofs on *Society and Solitude* when his house in Concord was burned to the ground, and he suffered injuries to his health at that time that could never be repaired. He was urged to make another visit abroad in search of healing for body and mind, and he accordingly made the grand tour through England, France, Italy and Egypt, meeting many famous men and regaining something of his old energy and ambition. When he got back to Concord in May, 1873, the whole village turned out to meet him and escort him to his house, which had been rebuilt and restored in his absence by the generosity of friends and neighbors. Many of the contributors to this gracious project were readers and admirers who were quite unknown to him personally.

Emerson's last years were serene and untroubled by financial cares, but he was unable to concentrate on literary work and his mental powers declined. He died peacefully on April 27, 1882. Shortly before his death, *Harper's Weekly* declared that there was a popular "respect and affection" for him such as "few men have ever enjoyed." The writer continued, "It is a feeling which has grown constantly for more than forty years, and it is deeper, stronger, and more universal than ever."

In the seventies a cheap publishing mania invaded the book industry of the United States, brought on by economic conditions and technological changes. Among other effects of this phenomenon was the production of Emerson's *Essays* in paper-bound volumes at ten and twenty cents for popular sale. The early

essays had recently emerged from copyright and were at the mercy of scores of cheap publishers. For thirty years or more following the mid-seventies, Emerson's writings, in many forms, were sold in both paper and cloth at prices under a dollar to a vast popular audience. The *Essays* and *Representative Men* enjoyed an aggregate sale which ran probably to over half a million.

Today Emerson's leading essays seem often to have a singularly contemporary meaning and force. We do not know "how young he yet will be."

[The authorized biography is James Elliot Cabot's *A Memoir of Ralph Waldo Emerson* in two volumes (Boston, 1887). Oscar W. Firkins' *Ralph Waldo Emerson* (Boston, 1915) is a stimulating critical and biographical study. A short and easy biography is that of Oliver Wendell Holmes in the American Men of Letters series (Boston, 1884), while George E. Woodberry's study in the English Men of Letters series (New York, 1907) is chiefly criticism and interpretation, brilliant but scarcely sympathetic. Van Wyck Brooks' *The Life of Emerson* (New York, 1932) is a vivid and often picturesque presentation of Emerson and his circle. But perhaps the best book to read for an understanding of Emerson's personality is the book of selections from his journal edited by Bliss Perry and called *The Heart of Emerson's Journals* (Boston, 1926). Perry's own book, *Emerson Today* (Princeton, 1931) helps recreate Emerson as a human being with something to say to modern readers. *The Journals of Ralph Waldo Emerson*, in ten volumes (Boston, 1909-1914) and *The Letters of Ralph Waldo Emerson*, edited by R. L. Rusk in six volumes (New York, 1939) are indispensable sources for the scholar. Valuable essays on Emerson may be found in J. W. Beach's *The Concept of Nature in Nineteenth-Century English Poetry* (New York, 1936), W. C. Brownell's *American Prose Masters* (New York, 1909), H. S. Canby's *Classic Americans* (New York, 1931), F. I. Carpenter's *Emerson* (New York, 1934) in American Writers Series, J. J. Chapman's *Emerson and Other Essays* (New York, 1898), Norman Foerster's *American Criticism* (Boston, 1928), F. O. Matthiessen's *American Renaissance* (New York, 1941), S. P. Sherman's *Americans* (New York, 1922). H. A. Pochmann's "The Emerson Canon" in *University of Toronto Quarterly* XII (July, 1943), 476-484, is an important discussion of the state of Emerson scholarship. Kenneth Walter Cameron's *Emerson the Essayist*, in two volumes (Raleigh, N. C., 1946) is an exhaustive storehouse of materials on his development through 1836.]

CONCORD HYMN¹
[1846 (1837)]

By the rude bridge that arched the flood,
Their flag to April's breeze unfurled,
Here once the embattled farmers stood
And fired the shot heard round the
world

The foe long since in silence slept, 5
Alike the conqueror silent sleeps,
And Time the ruined bridge has swept
Down the dark stream which seaward
creeps

¹ "Sung at the completion of the Battle Monument, July 4, 1837."

On this green bank, by this soft stream,
 We set to-day a votive stone, 10
 That memory may their deed redeem,
 When, like our sires, our sons are gone

At the sophist schools and the learned clan,
 For what are they all, in their high conceit,
 When man in the bush with God may
 meet? 30

Spirit, that made those heroes dare
 To die, and leave their children free,
 Bid Time and Nature gently spare 15
 The shaft we raise to them and thee

EACH AND ALL

[1846 (1839)]

GOOD-BYE¹

[1846 '(1839)]

Good-bye, proud world! I'm going home
 Thou art not my friend, and I'm not thine
 Long through thy weary crowds I roam,
 A river-ark on the ocean brine,
 Long I've been tossed like the driven
 foam, 5
 But now, proud world! I'm going home

Good-bye to Flattery's fawning face,
 To Grandeur with his wise grimace,
 To upstart Wealth's averted eye,
 To supple Office, low and high, 10
 To crowded halls, to court and street,
 To frozen hearts and hasting feet,
 To those who go, and those who come,
 Good-bye, proud world! I'm going home

I am going to my own hearth-stone, 15
 Bosomed in yon green hills alone,—
 A secret nook in a pleasant land,
 Whose groves the frolic fairies planned,
 Where arches green, the livelong day,
 Echo the blackbird's roundelay, 20
 And vulgar feet have never trod
 A spot that is sacred to thought and God

O, when I am safe in my sylvan home,
 I tread on the pride of Greece and Rome,
 And when I am stretched beneath the
 pines, 25
 Where the evening star so holy shines,
 I laugh at the lore and the pride of man,

Little thinks, in the field, yon red-cloaked
 clown

Of thee from the hill-top looking down,
 The heifer that lows in the upland farm,
 Far-heard, lows not thine ear to charm,
 The sexton, tolling his bell at noon, 5
 Deems not that great Napoleon
 Stops his horse, and lists with delight,
 Whilst his files sweep round yon Alpine
 height,²

Not knowest thou what argument
 Thy life to thy neighbor's creed has lent 10
 All are needed by each one,
 Nothing is fair or good alone
 I thought the sparrow's note from heaven,
 Singing at dawn on the alder bough,
 I brought him home, in his nest, at even, 15
 He sings the song, but it cheers not now,
 For I did not bring home the river and
 sky,—

He sang to my ear,—they sang to my eye
 The delicate shells lay on the shore,
 The bubbles of the latest wave 20
 Fresh pearls to their enamel gave,
 And the bellowing of the savage sea
 Greeted their safe escape to me
 I wiped away the weeds and foam,
 I fetched my sea-born treasures home, 25

¹ In sending this poem to James Freeman Clarke for publication in the *Western Examiner*, of Cincinnati, the author wrote "They were written sixteen years ago, when I kept a school in Boston, and lived in a corner of Roxbury called Canterbury. They have a slight misanthropy, a shade deeper than belongs to me."

² "Bonaparte was sensible to the music of bells. Hearing the bell of a parish church, he would pause, and his voice faltered as he said, 'Ah, that reminds me of the first years I spent at Brienne, I was then happy.'"—Emerson's *Journals*, 1844

But the poor, unsightly, noisome things
 Had left their beauty on the shore
 With the sun and the sand and the wild
 uproar³

The lover watched his graceful maid,
 As 'mid the virgin train she strayed, 30
 Nor knew her beauty's best attire
 Was woven still by the snow-white choir
 At last she came to his hermitage,
 Like the bird from the woodlands to the
 cage,—

The gay enchantment was undone, 35
 A gentle wife, but fairy none
 Then I said, "I covet truth,
 Beauty is unripe childhood's cheat,
 I leave it behind with the games of
 youth"—

As I spoke, beneath my feet 40
 The ground-pine curled its pretty wreath,
 Running over the club-moss burrs,
 I inhaled the violet's breath,
 Around me stood the oaks and firs,
 Pine-cones and acorns lay on the
 ground, 45
 Over me soared the eternal sky,
 Full of light and of deity,
 Again I saw, again I heard,
 The rolling river, the morning bird,—
 Beauty through my senses stole, 50
 I yielded myself to the perfect whole

THE RHODORA
 ON BEING ASKED, WHENCE
 IS THE FLOWER?
 [1846 (1839)]

In May, when sea-winds pierced our soli-
 tudes,
 I found the fresh Rhodora in the woods,
 Spreading its leafless blooms in a damp
 nook,
 To please the desert and the sluggish brook,
 The purple petals, fallen in the pool, 5
 Made the black water with their beauty
 gay,
 Here might the red-bird come his plumes
 to cool,
 And court the flower that cheapens his
 array.

Rhodora! if the sages ask thee why
 This charm is wasted on the earth and
 sky, 10
 Tell them, dear, that if eyes were made for
 seeing,
 Then Beauty is its own excuse for being
 Why thou wert there, O rival of the rose!
 I never thought to ask, I never knew
 But, in my simple ignorance, suppose 15
 The self-same Power that brought me there
 brought you

THE HUMBLE-BEE⁴
 [1846 (1839)]

Burly, dozing humble-bee,
 Where thou art is clime for me
 Let them sail for Porto Rique,
 Far-off heats through seas to seek,
 I will follow thee alone, 5
 Thou animated torrid-zone!
 Zigzag steerer, desert cheerer,
 Let me chase thy waving lines,
 Keep me nearer, me thy hearer,
 Singing over shrubs and vines 10
 Insect lover of the sun,
 Joy of thy dominion!
 Sailor of the atmosphere,
 Swimmer through the waves of air,
 Voyager of light and noon, 15
 Epicurean of June,

³ "I remember when I was a boy going upon the beach and being charmed with the colors and forms of the shells I picked up many and put them in my pocket When I got home I could find nothing that I gathered—nothing but some dry, ugly mussel and snail shells Thence I learned that Composition was more important than the beauty of individual forms to Effect On the shore they lay wet and social, by the sea and under the sky"—Emerson's *Journals*, May 16, 1834

⁴ "Yesterday in the woods I followed the fine humble-bee with rhymes and fancies fine The humble-bee and pine-warbler seem to me the proper objects of attention in these disastrous times"—Emerson's *Journals*, 1837 This was a year of financial panic

Wait, I prithee, till I come
 Within earshot of thy hum,—
 All without is martyrdom

WOODNOTES I
 [1846 (1840)]

1

When the south wind, in May days, 20
 With a net of shining haze
 Silvers the horizon wall,
 And with softness touching all,
 Tints the human countenance
 With a color of romance, 25
 And infusing subtle heats,
 Turns the sod to violets,
 Thou, in sunny solitudes,
 Rover of the underwoods,
 The green silence dost displace 30
 With thy mellow, breezy bass

Hot midsummer's petted crone,
 Sweet to me thy drowsy tone
 Tells of countless sunny hours,
 Long days, and solid banks of flowers, 35
 Of gulfs of sweetness without bound
 In Indian wildernesses found,
 Of Syrian peace, immortal leisure,
 Firmest cheer, and bird-like pleasure
 Aught unsavory or unclean 40
 Hath my insect never seen,
 But violets and billberry bells,
 Maple-sap and daffodils,
 Grass with green flag half-mast high, 45
 Succory to match the sky,
 Columbine with horn of honey,
 Scented fern, and agrimony,
 Clover, catchfly, adder's-tongue
 And brier-roses, dwelt among,
 All beside was unknown waste, 50
 All was picture as he passed.

Wiser far than human seer,
 Yellow-breeched philosopher!
 Seeing only what is fair,
 Sipping only what is sweet, 55
 Thou dost mock at fate and care,
 Leave the chaff, and take the wheat
 When the fierce northwestern blast
 Cools sea and land so far and fast,
 Thou already slumberest deep,
 Woe and want thou canst outsleep,
 Want and woe, which torture us,
 Thy sleep makes ridiculous.

When the pine tosses its cones
 To the song of its waterfall tones,
 Who speeds to the woodland walks?
 To birds and trees who talks?
 Cæsar of his leafy Rome, 5
 There the poet is at home
 He goes to the river-side,—
 Not hook nor line hath he,
 He stands in the meadows wide,— 10
 Nor gun nor scythe to see
 Sure some god his eye enchants
 What he knows nobody wants
 In the wood he travels glad,
 Without better fortune had,
 Melancholy without bad 15
 Knowledge this man prizes best
 Seems fantastic to the rest.
 Pondering shadows, colors, clouds,
 Grass-buds and caterpillar-shrouds,
 Boughs on which the wild bees settle, 20
 Tints that spot the violet's petal,
 Why Nature loves the number five,
 And why the star-form she repeats
 Lover of all things alive,
 Wonderer at all he meets, 25
 Wonderer chiefly at himself,
 Who can tell him what he is?
 Or how meet in human elf
 Coming and past eternities?

2

And such I knew, a forest seer,¹ 30
 A minstrel of the natural year,
 Foreteller of the vernal ides,
 Wise harbinger of spheres and tides,
 A lover true, who knew by heart 55
 Each joy the mountain dales impart; 35

¹ Though E. W. Emerson, in his *Emerson in Concord* (Boston, 1890), p. 111, says that these lines were written before their author knew Thoreau, he admits that Thoreau "fills the portrait", and the lines have generally been accepted as a sketch of Thoreau. Cf. Emerson's prose essay on his friend and neighbor.

It seemed that Nature could not raise
 A plant in any secret place,
 In quaking bog, on snowy hill,
 Beneath the grass that shades the rill,
 Under the snow, between the rocks, 40
 In damp fields known to bird and fox,
 But he would come in the very hour
 It opened in its virgin bower,
 As if a sunbeam showed the place,
 And tell its long-descended race 45
 It seemed as if the breezes brought him,
 It seemed as if the sparrows taught him,
 As if by secret sight he knew
 Where, in far fields, the orchis grew
 Many haps fall in the field 50
 Seldom seen by wishful eyes
 But all her shows did Nature yield,
 To please and win this pilgrim wise
 He saw the partridge drum in the woods,
 He heard the woodcock's evening hymn, 55
 He found the tawny thrushes' broods,
 And the shy hawk did wait for him,
 What others did at distance hear,
 And guessed within the thicket's gloom,
 Was shown to this philosopher, 60
 And at his bidding seemed to come

3

In unploughed Maine he sought the lum-
 berers' gang
 Where from a hundred lakes young rivers
 sprang,
 He trode the unplanted forest floor,
 whereon
 The all-seeing sun for ages hath not
 shone, 65
 Where feeds the moose, and walks the
 surly bear,
 And up the tall mast runs the woodpecker
 He saw beneath dim aisles, in odorous beds,
 The slight Linnæa hang its twin-born heads,
 And blessed the monument of the man of
 flowers,² 70
 Which breathes his sweet fame through
 the northern bowers
 He heard, when in the grove, at intervals,
 With sudden roar the aged pine-tree
 falls,—
 One crash, the death-hymn of the perfect
 tree,

Declares the close of its green century 75
 Low lies the plant to whose creation went
 Sweet influence from every element,
 Whose living towers the years conspired to
 build,
 Whose giddy top the morning loved to gild
 Through these green tents, by eldest Nature
 dressed, 80
 He roamed, content alike with man and
 beast
 Where darkness found him he lay glad at
 night,
 There the red morning touched him with its
 light
 Three moons his great heart him a hermit
 made,
 So long he roved at will the boundless
 shade 85
 The timid it concerns to ask their way,
 And fear what foe in caves and swamps
 can stray,
 To make no step until the event is known,
 And ills to come as evils past bemoan
 Not so the wise, no coward watch he
 keeps 90
 To spy what danger on his pathway
 creeps,
 Go where he will, the wise man is at home,
 His hearth the earth,—his hall the azure
 dome,
 Where his clear spirit leads him, there's his
 road
 By God's own light illumined and fore-
 showed 95

4

'T was one of the charmed days
 When the genius of God doth flow,
 The wind may alter twenty ways,
 A tempest cannot blow,
 It may blow north, it still is warm, 100
 Or south, it still is clear,
 Or east, it smells like a clover-farm,
 Or west, no thunder fear
 The musing peasant, lowly great,
 Beside the forest water sate, 105
 The rope-like pine-roots crosswise grown

² Carl von Linné (Carolus Linnaeus),
 Swedish botanist (1707-1778)

Composed the network of his throne,
The wide lake, edged with sand and grass,
Was burnished to a floor of glass,
Painted with shadows green and proud 110
Of the tree and of the cloud
He was the heart of all the scene,
On him the sun looked more serene,
To hill and cloud his face was known,—
It seemed the likeness of their own, 115
They knew by secret sympathy
The public child of earth and sky
“You ask,” he said, “what guide
Me through trackless thickets led,
Through thick-stemmed woodlands rough
and wide 120
I found the water’s bed
The watercourses were my guide,
I travelled grateful by their side,
Or through their channel dry,
They led me through the thicket damp, 125
Through brake and fern, the beavers’ camp,
Through beds of granite cut my road,
And their resistless friendship showed
The falling waters led me,
The foodful waters fed me, 130
And brought me to the lowest land,
Unerring to the ocean sand
The moss upon the forest bark
Was pole-star when the night was dark,
The purple berries in the wood 135
Supplied me necessary food,
For Nature ever faithful is
To such as trust her faithfulness
When the forest shall mislead me,
When the night and morning lie, 140
When sea and land refuse to feed me,
’T will be time enough to die,
Then will yet my mother yield
A pillow in her greenest field,
Nor the June flowers scorn to cover 145
The clay of their departed lover ”

Whether is better, the gift or the donor?
Come to me,'
Quoth the pine-tree,
'I am the giver of honor
My garden is the cloven rock, 5
And my manure the snow,
And drifting sand-heaps feed my stock,
In summer's scorching glow
He is great who can live by me
The rough and bearded forester 10
Is better than the lord,
God fills the scrip and canister,
Sm piles the loaded board
The lord is the peasant that was,
The peasant the lord that shall be, 15
The lord is hay, the peasant grass,
One dry, and one the living tree
Who liveth by the ragged pine
Foundeth a heroic line,
Who liveth in the palace hall 20
Waneth fast and spendeth all
He goes to my savage haunts,
With his chariot and his care,
My twilight realm he disenchants,
And finds his prison there 25

'What prizes the town and the tower?
Only what the pine-tree yields,
Smew that subdued the fields,
The wild-eyed boy, who in the woods
Chants his hymn to hills and floods, 30
Whom the city's poisoning spleen
Made not pale, or fat, or lean,
Whom the rain and the wind purgeth,
Whom the dawn and the day-star ugeth,
In whose cheek the rose-leaf blusheth, 35
In whose feet the lion rusheth,
Iron arms, and non mould,
That know not fear, fatigue, or cold
I give my rafters to his boat,
My bullets to his boiler's throat, 40
And I will swim the ancient sea
To float my child to victory,

WOODNOTES II ¹

[1846 (1841)]

*As sunbeams stream through liberal space
And nothing jostle or displace,
So waved the pine-tree through my thought
And fanned the dreams it never brought*

1 "All my thoughts are foresters I have scarce a day-dream on which the breath of the pines has not blown, and their shadows waved Shall I not therefore call my little book *Forest Essays*?"—Emerson's *Journals*, January, 1841 But the "little book" was called simply *Essays*.

And grant to dwellers with the pine
 Dominion o'er the palm and vine
 Who leaves the pine-tree, leaves his
 friend, 45
 Unnerves his strength, invites his end
 Cut a bough from my parent stem,
 And dip it in thy porcelain vase,
 A little while each russet gem
 Will swell and rise with wonted grace, 50
 But when it seeks enlarged supplies,
 The orphan of the forest dies
 Whoso walks in solitude
 And inhabiteth the wood,
 Choosing light, wave, rock and bird, 55
 Before the money-loving herd,
 Into that forester shall pass,
 From these companions, power and grace
 Clean shall he be, without, within,
 From the old adhering sin, 60
 All ill dissolving in the light
 Of his triumphant piercing sight
 Not vain, sour, nor frivolous,
 Not mad, athirst, nor garrulous,
 Grave, chaste, contented, though retired, 65
 And of all other men desired
 On him the light of star and moon
 Shall fall with purer radiance down,
 All constellations of the sky
 Shed their virtue through his eye 70
 Him Nature giveth for defence
 His formidable innocence,
 The mounting sap, the shells, the sea,
 All spheres, all stones, his helpers be,
 He shall meet the speeding year, 75
 Without wailing, without fear,
 He shall be happy in his love,
 Like to like shall joyful prove,
 He shall be happy whilst he wooes,
 Muse-born, a daughter of the Muse 80
 But if with gold she bind her hair,
 And deck her breast with diamond,
 Take off thine eyes, thy heart forbear,
 Though thou be alone on the ground.

 'Heed the old oracles, 85
 Ponder my spells;
 Song wakes in my pinnacles
 When the wind swells
 Soundeth the prophetic wind,
 The shadows shake on the rock behind, 90

And the countless leaves of the pine are
 strings
 Tuned to the lay the wood-god sings
 Hearken! Hearken!
 If thou wouldst know the mystic song
 Chanted when the sphere was young 95
 Aloft, abroad, the paean swells,
 O wise man! hear'st thou half it tells?
 O wise man! hear'st thou the least part?
 'T is the chronicle of art
 To the open ear it sings 100
 Sweet the genesis of things,
 Of tendency through endless ages,
 Of star-dust, and star-pilgrimages,
 Of rounded worlds, of space and time,
 Of the old flood's subsiding slime, 105
 Of chemie matter, force and form,
 Of poles and powers, cold, wet, and warm
 The rushing metamorphosis
 Dissolving all that fixture is,
 Melts things that be to things that
 seem, 110
 And solid nature to a dream
 O, listen to the undersong,
 The ever old, the ever young,
 And, far within those cadent pauses,
 The chorus of the ancient Causes! 115
 Delights the dreadful Destiny
 To fling his voice into the tree,
 And shock thy weak ear with a note
 Breathed from the everlasting throat
 In music he repeats the pang 120
 Whence the fair flock of Nature sprang
 O mortal! thy ears are stones,
 These echoes are laden with tones
 Which only the pure can hear,
 Thou canst not catch what they recite 125
 Of Fate and Will, of Want and Right,
 Of man to come, of human life,
 Of Death and Fortune, Growth and Strife'

Once again the pine-tree sung —
 'Speak not thy speech my boughs
 among' 130
 Put off thy years, wash in the breeze;
 My hours are peaceful centuries
 Talk no more with feeble tongue,
 No more the fool of space and time,
 Come weave with mine a nobler rhyme. 135
 Only thy Americans

Can read thy line, can meet thy glance,
 But the runes that I rehearse
 Understands the universe,
 The least breath my boughs which
 tossed 140
 Brings again the Pentecost,
 To every soul resounding clear
 In a voice of solemn cheer,—
 "Am I not thine? Are not these thine?"
 And they reply, "Forever mine" 145
 My branches speak Italian,
 English, German, Basque, Castilian,
 Mountain speech to Highlanders,
 Ocean tongues to islanders,
 To Fin and Lap and swart Malay, 150
 To each his bosom-secret say

 'Come learn with me the fatal song
 Which knits the world in music strong,
 Come lift thine eyes to lofty rhymes,
 Of things with things, of times with
 times, 155
 Primal chimes of sun and shade,
 Of sound and echo, man and maid,
 The land reflected in the flood,
 Body with shadow still pursued
 For Nature beats in perfect tune, 160
 And rounds with rhyme her every rune,
 Whether she work in land or sea,
 Or hide underground her alchemy
 Thou canst not wave thy staff in air,
 Or dip the paddle in the lake, 165
 But it carves the bow of beauty there,
 And the ripples in rhymes the oar forsake
 The wood is wiser far than thou,
 The wood and wave each other know
 Not unrelated, unaffied, 170
 But to each thought and thing allied,
 Is perfect Nature's every part,
 Rooted in the mighty Heart
 But thou, poor child' unbound, unrhymed,
 Whence camest thou, misplaced, mis-
 timed, 175
 Whence, O thou orphan and defrauded?
 Is thy land peeled, thy realm marauded?
 Who thee divorced, deceived and left?
 Thee of thy faith who hath bereft,
 And torn the ensigns from thy brow, 180
 And sunk the immortal eye so low?
 Thy cheek too white, thy form too slender,

Thy gait too slow, thy habits tender
 For royal man,—they thee confess
 An exile from the wilderness,— 185
 The hills where health with health agrees,
 And the wise soul expels disease
 Hark' in thy ear I will tell the sign
 By which thy hurt thou may'st divine
 When thou shalt climb the mountain
 cliff, 190
 Or see the wide shore from thy skiff,
 To thee the horizon shall express
 But emptiness on emptiness,
 There lives no man of Nature's worth
 In the circle of the earth, 195
 And to thine eye the vast skies fall,
 Dire and satirical,
 On clucking hens and prating fools,
 On thieves, on drudges and on dolls
 And thou shalt say to the Most High, 200
 "Godhead! all this astronomy,
 And fate and practice and invention,
 Strong art and beautiful pretension,
 This radiant pomp of sun and star,
 Throes that were, and worlds that are, 205
 Behold! were in vain and in vain,—
 It cannot be,—I will look again
 Surely now will the curtain rise,
 And earth's fit tenant me surprise,—
 But the curtain does *not* rise, 210
 And Nature has miscarried wholly
 Into failure, into folly"

 'Alas! thine is the bankruptcy,
 Blessed Nature so to see
 Come, lay thee in my soothing shade, 215
 And heal the hurts which sin has made
 I see thee in the crowd alone;
 I will be thy companion.
 Quit thy friends as the dead in doom,
 And build to them a final tomb, 220
 Let the starred shade that nightly falls
 Still celebrate their funerals,
 And the bell of beetle and bee
 Knell their melodious memory
 Behind thee leave thy merchandise, 225
 Thy churches and thy charities,
 And leave thy peacock wit behind;
 Enough for thee the primal mind
 That flows in streams, that breathes in
 wind

Leave all thy pedant lore apart, 230
 God had the whole world in thy heart
 Love shuns the sage, the child it crowns,
 Gives all to them who all renounce
 The rain comes when the wind calls,
 The river knows the way to the sea, 235
 Without a pilot it runs and falls,
 Blessing all lands with its charity,
 The sea tosses and foams to find
 Its way up to the cloud and wind,
 The shadow sits close to the flying ball, 240
 The date fails not on the palm-tree tall,
 And thou,—go burn thy wormy pages,—
 Shalt outsee seers, and outwit sages
 Oft didst thou thread the woods in vain
 To find what bird had piped the
 strain — 245
 Seek not, and the little eremite
 Flies gayly forth and sings in sight

 ‘Hearken once more!’
 I will tell thee the mundane lore
 Older am I than thy numbers wot, 250
 Change I may, but I pass not
 Hitherto all things fast abide,
 And anchored in the tempest ride
 Trenchant time behoves to hurry
 All to yean and all to bury 255
 All the forms are fugitive,
 But the substances survive
 Ever fresh the broad creation,
 A divine improvisation,
 From the heart of God proceeds, 260
 A single will, a million deeds
 Once slept the world an egg of stone,
 And pulse, and sound, and light was none,
 And God said, “Throb!” and there was
 motion
 And the vast mass became vast ocean 265
 Onward and on, the eternal Pan,
 Who layeth the world’s incessant plan,
 Halteth never in one shape,
 But forever doth escape,
 Like wave or flame, into new forms 270
 Of gem, and air, of plants, and worms
 I, that to-day am a pine,
 Yesterday was a bundle of grass
 He is free and libertine,
 Pouring of his power the wine 275
 To every age, to every race,

 Unto every race and age
 He emptieth the beverage,
 Unto each, and unto all,
 Maker and original 280
 The world is the ring of his spells,
 And the play of his miracles
 As he giveth to all to drink,
 Thus or thus they are and think
 With one drop sheds form and feature, 285
 With the next a special nature,
 The third adds heat’s indulgent spark,
 The fourth gives light which eats the dark,
 Into the fifth himself he flings,
 And conscious Law is King of kings 290
 As the bee through the garden ranges,
 From world to world the godhead changes,
 As the sheep go feeding in the waste,
 From form to form He maketh haste,
 This vault which glows immense with
 light 295
 Is the inn where he lodges for a night
 What seeks such Traveller if the bowers
 Which bloom and fade like meadow flowers
 A bunch of fragrant lilies be,
 Or the stars of eternity? 300
 Ahke to him the better, the worse,—
 The glowing angel, the outcast corse
 Thou metest him by centuries,
 And lo! he passes like the breeze,
 Thou seek’st in globe and galaxy, 305
 He hides in pure transparency,
 Thou askest in fountains and in fires,
 He is the essence that inquires
 He is the axis of the star,
 He is the sparkle of the spar, 310
 He is the heart of every creature,
 He is the meaning of each feature,
 And his mind is the sky,
 Than all it holds more deep, more high’

THE SNOW-STORM

[1846 (1841)]

Announced by all the trumpets of the sky,
 Arrives the snow, and, driving o’er the
 fields,
 Seems nowhere to alight the whited air
 Hides hills and woods, the river, and the
 heaven,

And veils the farm-house at the garden's
end 5
The sled and traveller stopped, the courier's
feet
Delayed, all friends shut out, the house-
mates sit
Around the radiant fireplace, enclosed
In a tumultuous privacy of storm

Come see the north wind's masonry 10
Out of an unseen quarry evermore
Furnished with tile, the fierce artificer
Curves his white bastions with projected
roof
Round every windward stake, or tree, or
door
Speeding, the myriad-handed, his wild
work 15
So fanciful, so savage, nought cares he
For number or proportion Mockingly,
On coop or kennel he hangs Parian
wreaths,
A swan-like form invests the hidden thorn,
Fills up the farmer's lane from wall to
wall, 20
Maugre the farmer's sighs, and at the
gate
A tapering turret overtops the work
And when his hours are numbered, and the
world
Is all his own, retiring, as he were not,
Leaves, when the sun appears, astonished
Art 25
To mimic in slow structures, stone by stone,
Built in an age, the mad wind's nightwork,
The frolic architecture of the snow.

FORBEARANCE

[1846 (1842)]

Hast thou named all the birds without a
gun?
Loved the wood-rose, and left it on its
stalk?
At rich men's tables eaten bread and pulse?
Unarmed, faced danger with a heart of
trust?
And loved so well a high behavior,

In man or maid, that thou from speech
refrained,
Nobility more nobly to repay?
O, be my friend, and teach me to be thine!

FORERUNNERS¹

[1846]

Long I followed happy guides,
I could never reach their sides,
Their step is forth, and, ere the day
Breaks up their leagues, and away
Keen my sense, my heart was young, 5
Right good-will my sinews strung,
But no speed of mine avails
To hunt upon their shining trails
On and away, their hasting feet
Make the morning proud and sweet, 10
Flowers they strew,—I catch the scent.
Or tone of silver instrument
Leaves on the wind melodious trace,
Yet I could never see their face
On eastern hills I see their smokes, 15
Mixed with mist by distant lochs
I met many travellers
Who the road had surely kept,
They saw not my fine revellers,—
These had crossed them while they slept 20
Some had heard their fair report,
In the country or the court
Fleetest couriers alive
Never yet could once arrive,
As they went or they returned, 25
At the house where these sojourned
Sometimes their strong speed they slacken,
Though they are not overtaken,
In sleep their jubilant troop is near,—
I tuneful voices overhear, 30
It may be in wood or waste,—
At unawares 't is come and past
Their near camp my spirit knows
By signs gracious as rainbows
I thenceforward and long after 35
Listen for their harp-like laughter,
And carry in my heart, for days,
Peace that hallows rudest ways

¹ Cf. Whittier's "The Vanshiers," Lowell's "Envoy, To the Muse," and Emerson's own treatment of this theme in the latter part of his essay on "Nature" in *Essays, Second Series*.

TO J W¹
[1846]

Set not thy foot on graves,
Hear what wine and roses say,
The mountain chase, the summer waves,
The crowded town, thy feet may well delay

Set not thy foot on graves, 5
Nor seek to unwind the shroud
Which charitable Time
And Nature have allowed
To wrap the errors of a sage sublime

Set not thy foot on graves, 10
Care not to strip the dead
Of his sad ornament,
His myrrh, and wine, and rings,

His sheet of lead,
And trophies buried 15
Go, get them where he earned them when
alive,
As resolutely dig or dive

Life is too short to waste
In critic peep or cynic bark,
Quarrel or reprimand 20
'T will soon be dark,
Up! mind thine own aim, and
God speed the mark!

HAMATREYA²
[1846]

Bulkeley, Hunt, Willard, Hosmer, Meriam,
Flint,³
Possessed the land which rendered to their
toil
Hay, corn, roots, hemp, flax, apples, wool
and wood
Each of these landlords walked amidst his
farm,
Saying, "'T is mine, my children's and my
name's 5
How sweet the west wind sounds in my
own trees!
How graceful climb those shadows on my
hill!

I fancy these pure waters and the flags
Know me, as does my dog we sympathize,
And, I affirm, my actions smack of the
soil" 10

Where are these men? Asleep beneath their
grounds

And strangers, fond as they, their furrows
plough

Earth laughs in flowers, to see her boastful
boys

Earth-proud, proud of the earth which is
not theirs,

Who steer the plough, but cannot steer
their feet 15

Clear of the grave
They added ridge to valley, brook to pond,
And sighed for all that bounded their do-
main,

"This suits me for a pasture, that's my
park,

We must have clay, lime, gravel, granite-
ledge, 20

And misty lowland, where to go for peat
The land is well,—lies fairly to the south

'T is good, when you have crossed the sea
and back,

To find the sitfast acres where you left
them "

Ah! the hot owner sees not Death, who
adds 25

Him to his land, a lump of mould the more
Hear what the Earth says —

EARTH-SONG

"Mine and yours,
Mine, not yours
Earth endures, 30
Stars abide—
Shine down in the old sea,

¹ Addressed to John Weiss, scholar and reformer, who was then pastor of a Unitarian church at Watertown, Mass. He had recently published an attack on Goethe

² This poem is based on a passage in the dialogue between Vishnu and Maitreya in the Hindu work known as *Vishnu Purana*

³ Early settlers in the town of Concord

Old are the shores,
But where are old men?
I who have seen much,
Such have I never seen

To occupy my place
If I'm not so large as you,
35 You are not so small as I,
And not half so spry
I'll not deny you make 15
A very pretty squirrel track,
Talents differ, all is well and wisely put,
If I cannot carry forests on my back,
40 Neither can you crack a nut "

"The lawyer's deed
Ran sure,
In tail,
To them, and to their heirs
Who shall succeed,
Without fail,
Forevermore

GIVE ALL TO LOVE
[1846]

"Here is the land,
Shaggy with wood,
With its old valley,
Mound and flood
But the heirs—
Fled like the flood's foam
The lawyer, and the laws,
And the kingdom,
Clean swept herefrom

45 Give all to love,
Obey thy heart,
Friends, kindred, days,
Estate, good-fame, 5
Plans, credit and the Muse,—
50 Nothing refuse

"They called me theirs,
Who so controlled me,
Yet every one
Wished to stay, and is gone,
How am I theirs,
If they cannot hold me,
But I hold them?"

'T is a brave master,
Let it have scope
Follow it utterly,
Hope beyond hope 10
High and more high
It dives into noon,
With wing unspent,
Untold intent,
But it is a god, 15
Knows its own path
And the outlets of the sky.

When I heard the Earth-song,
I was no longer brave,
My avarice cooled
Like lust in the chill of the grave

60 It was never for the mean,
It requireth courage stout
Souls above doubt, 20
Valor unbending,
It will reward,—
They shall return
More than they were,
And ever ascending 25

FABLE
[1846]

The mountain and the squirrel
Had a quarrel,
And the former called the latter "Little
Png,"
Bun replied,
"You are doubtless very big, 5
But all sorts of things and weather
Must be taken in together,
To make up a year
And a sphere
And I think it no disgrace 10

Leave all for love,
Yet, hear me, yet,
One word more thy heart behaved,
One pulse more of firm endeavor,—
Keep thee to-day, 30
To-morrow, forever,
Free as an Arab
Of thy beloved

Cling with life to the maid,
 But when the surprise, 35
 First vague shadow of surmise
 Flits across her bosom young,
 Of a joy apart from thee,
 Free be she, fancy-free,
 Nor thou detain her vesture's hem, 40
 Nor the palest rose she flung
 From her summer diadem

Though thou loved her as thyself,
 As a self of purer clay,
 Though her parting dims the day, 45
 Stealing grace from all alive,
 Heartily know,
 When half-gods go,
 The gods arrive

THE APOLOGY [1846]

Think me not unkind and rude
 That I walk alone in grove and glen;
 I go to the god of the wood
 To fetch his word to men

Tax not my sloth that I 5
 Fold my arms beside the brook,
 Each cloud that floated in the sky
 Writes a letter in my book

Chide me not, laborious band,
 For the idle flowers I brought, 10
 Every aster in my hand
 Goes home loaded with a thought

There was never mystery
 But 't is figured in the flowers,
 Was never secret history 15
 But birds tell it in the bowers

One harvest from thy field
 Homeward brought the oxen strong,
 A second crop thine acres yield
 Which I gather in a song 20

BRAHMA ¹

[1867 (1857)]

If the red slayer think he slays,
 Or if the slain think he is slain,
 They know not well the subtle ways
 I keep, and pass, and turn again

Far or forgot to me is near, 5
 Shadow and sunlight are the same,
 The vanished gods to me appear,
 And one to me are shame and fame

They reckon ill who leave me out,
 When me they fly, I am the wings, 10
 I am the doubter and the doubt,
 And I the hymn the Brahmin sings

The strong gods pine for my abode,
 And pine in vain the sacred Seven,
 But thou, meek lover of the good! 15
 Find me, and turn thy back on heaven

DAYS

[1867 (1857)]

Daughters of Time, the hypocritic Days,
 Muffled and dumb like barefoot dervishes,
 And marching single in an endless file,
 Bring diadems and fagots in their hands
 To each they offer gifts after his will,
 Bread, kingdoms, stars, and sky that holds
 them all

I, in my pleached garden, watched the
 pomp,
 Forgot my morning wishes, hastily
 Took a few herbs and apples, and the Day
 Turned and departed silent I, too late,
 Under her solemn fillet saw the scorn

¹ Cf Krishna's song in the *Bhagavat-Gita* (Arnold's translation)

He who shall say, "Lo, I have slain a
 man,"

He who shall think, "Lo, I am slain!"
 those both

Know naught! Life cannot slay Life is
 not slain!

This was one of four poems which Emerson
 contributed to the first number of the *At-
 lantic Monthly*

BOSTON HYMN¹

[1867]

The word of the Lord by night
To the watching Pilgrims came,
As they sat by the seaside,
And filled their hearts with flame

God said, I am tired of kings,
I suffer them no more,
Up to my ear the morning brings
The outrage of the poor

Think ye I made this ball
A field of havoc and war, 10
Where tyrants great and tyrants small
Might harry the weak and poor?

My angel,—his name is Freedom,—
Choose him to be your king,
He shall cut pathways east and west 15
And fend you with his wing

Lo! I uncover the land
Which I hid of old time in the West,
As the sculptor uncovers the statue
When he has wrought his best, 20

I show Columbia, of the rocks
Which dip their foot in the seas
And soar to the air-borne flocks
Of clouds and the boreal fleece

I will divide my goods, 25
Call in the wretch and slave
None shall rule but the humble,
And none but Toil shall have

I will have never a noble,
No lineage counted great, 30
Fishers and choppers and ploughmen
Shall constitute a state

Go, cut down trees in the forest
And trim the straightest boughs,
Cut down trees in the forest
And build me a wooden house. 35

Call the people together,
The young men and the sires,
The digger in the harvest field,
Hireling and him that hires, 40

And here in a pine state-house
They shall choose men to rule
In every needful faculty,
In church and state and school

Lo, now! if these poor men 45
Can govern the land and sea
And make just laws below the sun,
As planets faithful be

And ye shall succor men,
'T is nobleness to serve, 50
Help them who cannot help again
Beware from right to swerve

I break your bonds and masterships,
And I unchain the slave
Free be his heart and hand henceforth 55
As wind and wandering wave

I cause from every creature
His proper good to flow
As much as he is and doeth,
So much he shall bestow 60

But, laying hands on another
To coin his labor and sweat,
He goes in pawn to his victim
For eternal years in debt

To-day unbind the captive, 65
So only are ye unbound,
Lift up a people from the dust,
Trump of their rescue, sound!

Pay ransom to the owner
And fill the bag to the brim 70
Who is the owner? The slave is owner,
And ever was Pay him

¹ Read in Boston Music Hall, January 1, 1863, the day on which the Emancipation Proclamation became effective

O North! give him beauty for rags,
And honor, O South! for his shame,
Nevada! com thy golden crags
With Freedom's image and name

Up! and the dusky race
That sat in darkness long,—
Be swift their feet as antelopes,
And as behemoth strong

Come, East and West and North,
By races, as snow-flakes,
And carry my purpose forth,
Which neither halts nor shakes

My will fulfilled shall be,
For, in daylight or in dark,
My thunderbolt has eyes to see
His way home to the mark

TERMINUS [1867]

It is time to be old,
To take in sail —
The god of bounds,
Who sets to seas a shore,
Came to me in his fatal rounds,
And said "No more!
No farther shoot
Thy broad ambitious branches, and thy
root
Fancy departs no more invent,
Contract thy firmament
To compass of a tent
There's not enough for this and that,
Make thy option which of two,
Economize the failing river,
Not the less revere the Giver,
Leave the many and hold the few
Timely wise accept the terms,
Softens the fall with wary foot,
A little while
Still plan and smile,
And,—fault of novel germs,—
Mature the unfallen fruit
Curse, if thou wilt, thy sires,
Bad husbands of their fires,
Who, when they gave thee breath,
Failed to bequeath

The needful sinew stark as once,
The Baresark marrow to thy bones,
But left a legacy of ebbing veins,
Inconstant heat and nerveless reins,—
Amid the Muses, left thee deaf and dumb,
Amid the gladiators, halt and numb "

As the bird trims her to the gale,
I trim myself to the storm of time,
I man the rudder, reef the sail,
Obey the voice at eve obeyed at prime
"Lowly faithful, banish fear,
Right onward drive unharmed,
The port, well worth the cruise, is near,
And every wave is charmed "

THE PAST [1867]

The debt is paid,
The verdict said,
The Furies laid,
The plague is stayed,
All fortunes made,
Turn the key and bolt the door,
Sweet is death forevermore
Nor haughty hope, nor swart chagrin,
Nor murdering hate, can enter in
All is now secure and fast;
Not the gods can shake the Past,
Flies to the adamant door
Bolted down forevermore
None can reenter there,—
No thief so politic,
No Satan with a royal trick
Steal in by window, chink, or hole,
To bind or unbind, add what lacked,
Insert a leaf, or forge a name,
New-face or finish what is packed,
Alter or mend eternal Fact

THE AMERICAN SCHOLAR¹ [1837]

20 *Mr President and Gentlemen*
I greet you on the recommencement of
our literary year Our anniversary is one

25 ¹"An Oration delivered before the Phi
Beta Kappa Society, at Cambridge, Au-
gust 31, 1837" Immediately printed, it
sold five hundred copies within a month.

of hope, and, perhaps, not enough of labor. We do not meet for games of strength or skill, for the recitation of histories, tragedies, and odes, like the ancient Greeks, for parliaments of love and poesy, like the Troubadours, nor for the advancement of science, like our contemporaries in the British and European capitals. Thus far, our holiday has been simply a friendly sign of the survival of the love of letters amongst a people too busy to give to letters any more. As such it is precious as the sign of an indestructible instinct. Perhaps the time is already come when it ought to be, and will be, something else, when the sluggish intellect of this continent will look from under its iron lids and fill the postponed expectation of the world with something better than the exertions of mechanical skill. Our day of dependence, our long apprenticeship to the learning of other lands, draws to a close. The millions that around us are rushing into life, cannot always be fed on the sere remains of foreign harvests. Events, actions arise, that must be sung, that will sing themselves. Who can doubt that poetry will revive and lead in a new age, as the star in the constellation Harp, which now flames in our zenith, astronomers announce, shall one day be the pole-star for a thousand years?

In this hope I accept the topic which not only usage but the nature of our association seem to prescribe to this day,—the AMERICAN SCHOLAR. Year by year we come up hither to read one more chapter of his biography. Let us inquire what light new days and events have thrown on his character and his hopes.

It is one of those fables which out of an unknown antiquity convey an unlooked-for wisdom, that the gods, in the beginning, divided Man into men, that he might be more helpful to himself, just as the hand was divided into fingers, the better to answer its end.

The old fable covers a doctrine ever new and sublime, that there is One Man,—present to all particular men only partially, or through one faculty, and that you must

take the whole society to find the whole man. Man is not a farmer, or a professor, or an engineer, but he is all. Man is priest, and scholar, and statesman, and producer, and soldier. In the *divided* or social state these functions are parcelled out to individuals, each of whom aims to do his stint of the joint work, whilst each other performs his. The fable implies that the individual, to possess himself, must sometimes return from his own labor to embrace all the other laborers. But, unfortunately, this original unit, this fountain of power, has been so distributed to multitudes, has been so minutely subdivided and peddled out, that it is spilled into drops, and cannot be gathered. The state of society is one in which the members have suffered amputation from the trunk, and strut about so many walking monsters,—a good finger, a neck, a stomach, an elbow, but never a man.

Man is thus metamorphosed into a thing, into many things. The planter, who is Man sent out into the field to gather food, is seldom cheered by any idea of the true dignity of his ministry. He sees his bushel and his cart, and nothing beyond, and sinks into the farmer, instead of Man on the farm. The tradesman scarcely ever gives an ideal worth to his work, but is ridden by the routine of his craft, and the soul is subject to dollars. The priest becomes a form, the attorney a statute-book, the mechanic a machine, the sailor a rope of the ship.

In this distribution of functions the scholar is the delegated intellect. In the right state he is *Man Thinking*. In the degenerate state, when the victim of society, he tends to become a mere thinker, or still worse, the parrot of other men's thinking.

In this view of him, as *Man Thinking*, the theory of his office is contained. Him Nature solicits with all her placid, all her monitory pictures, him the past instructs, him the future invites. Is not indeed every man a student, and do not all things exist for the student's behoof? And, finally, is

not the true scholar the only true master? But the old oracle said, "All things have two handles beware of the wrong one" In life, too often, the scholar errs with mankind and forfeits his privilege Let us see him in his school, and consider him in reference to the main influences he receives

I The first in time and the first in importance of the influences upon the mind is that of nature Every day, the sun, and, after sunset, Night and her stars Ever the winds blow, ever the grass grows Every day, men and women, conversing—beholding and beholden The scholar is he of all men whom this spectacle most engages He must settle its value in his mind What is nature to him? There is never a beginning, there is never an end, to the inexplicable continuity of this web of God, but always circular power returning into itself Therein it resembles his own spirit, whose beginning, whose ending, he never can find,—so entire, so boundless Far too as her splendors shine, system on system shooting like rays, upward, downward, without centre, without circumference,—in the mass and in the particle, Nature hastens to render account of herself to the mind Classification begins To the young mind every thing is individual, stands by itself By and by, it finds how to join two things and see in them one nature, then three, then three thousand, and so, tyrannized over by its own unifying instinct, it goes on tying things together, diminishing anomalies, discovering roots running under ground whereby contrary and remote things cohere and flower out from one stem It presently learns that since the dawn of history there has been a constant accumulation and classifying of facts But what is classification but the perceiving that these objects are not chaotic, and are not foreign, but have a law which is also a law of the human mind? The astronomer discovers that geometry, a pure abstraction of the human mind, is the measure of planetary motion The chemist finds proportions and intelligible method throughout matter, and

science is nothing but the finding of analogy, identity, in the most remote parts The ambitious soul sits down before each refractory fact, one after another reduces all strange constitutions, all new powers, to their class and then law, and goes on forever to animate the last fibre of organization, the outskirts of nature, by insight

Thus to him, to this schoolboy under the bending dome of day, is suggested that he and it proceed from one root, one is leaf and one is flower, relation, sympathy, stirring in every vein And what is that root? Is not that the soul of his soul? A thought too bold, a dream too wild Yet when this spiritual light shall have revealed the law of more earthly natures,—when he has learned to worship the soul, and to see that the natural philosophy that now is, is only the first gropings of its gigantic hand, he shall look forward to an ever expanding knowledge as to a becoming creator He shall see that nature is the opposite of the soul, answering to it part for part One is seal and one is print Its beauty is the beauty of his own mind Its laws are the laws of his own mind Nature then becomes to him the measure of his attainments So much of nature as he is ignorant of, so much of his own mind does he not yet possess And, in fine, the ancient precept, "Know thyself," and the modern precept, "Study nature," become at last one maxim

II The next great influence into the spirit of the scholar is the mind of the Past,—in whatever form, whether of literature, of art, of institutions, that mind is inscribed Books are the best type of the influence of the past, and perhaps we shall get at the truth,—learn the amount of this influence more conveniently,—by considering their value alone

The theory of books is noble The scholar of the first age received into him the world around, brooded thereon, gave it the new arrangement of his own mind, and uttered it again It came into him life, it went out from him truth It came to him short-lived

actions, it went out from him immortal thoughts. It came to him business, it went from him poetry. It was dead fact, now, it is quick thought. It can stand, and it can go. It now endures, it now flies, it now inspires. Precisely in proportion to the depth of mind from which it issued, so high does it soar, so long does it sing.

Or, I might say, it depends on how far the process had gone, of transmuting life into truth. In proportion to the completeness of the distillation, so will the purity and imperishableness of the product be. But none is quite perfect. As no air-pump can by any means make a perfect vacuum, so neither can any artist entirely exclude the conventional, the local, the perishable from his book, or write a book of pure thought, that shall be as efficient, in all respects, to a remote posterity, as to contemporaries, or rather to the second age. Each age, it is found, must write its own books, or rather, each generation for the next succeeding. The books of an older period will not fit this.

Yet hence arises a grave mischief. The sacredness which attaches to the act of creation, the act of thought, is transferred to the record. The poet chanting was felt to be a divine man; henceforth the chant is divine also. The writer was a just and wise spirit; henceforward it is settled the book is perfect, as love of the hero corrupts into worship of his statue. Instantly the book becomes noxious: the guide is a tyrant. The sluggish and perverted mind of the multitude, slow to open to the incursions of Reason, having once so opened, having once received this book, stands upon it, and makes an outcry if it is disparaged. Colleges are built on it. Books are written on it by thinkers, not by Man Thinking, by men of talent, that is, who start wrong, who set out from accepted dogmas, not from their own sight of principles. Meek young men grow up in libraries, believing it their duty to accept the views which Cicero, which Locke, which Bacon, have given, forgetful that Cicero, Locke, and Bacon were only young

men in libraries when they wrote these books.

Hence, instead of Man Thinking, we have the bookworm. Hence the book-learned class, who value books, as such, not as related to nature and the human constitution, but as making a sort of Third Estate with the world and the soul. Hence the restorers of readings, the emendators, the bibliomaniacs of all degrees.

Books are the best of things, well used, abused, among the worst. What is the right use? What is the one end which all means go to effect? They are for nothing but to inspire. I had better never see a book than to be warped by its attraction clean out of my own orbit, and made a satellite instead of a system. The one thing in the world, of value, is the active soul. This every man is entitled to, this every man contains within him, although in almost all men obstructed and as yet unborn. The soul active sees absolute truth and utters truth, or creates. In this action it is genius, not the privilege of here and there a favorite, but the sound estate of every man. In its essence it is progressive. The book, the college, the school of art, the institution of any kind, stop with some past utterance of genius. This is good, say they,—let us hold by this. They pin me down. They look backward and not forward. But genius looks forward: the eyes of man are set in his forehead, not in his hindhead. man hopes: genius creates. Whatever talents may be, if the man create not, the pure efflux of the Deity is not his,—embers and smoke there may be, but not yet flame. There are creative manners, there are creative actions, and creative words, manners, actions, words, that is, indicative of no custom or authority, but springing spontaneous from the mind's own sense of good and fair.

On the other part, instead of being its own seer, let it receive from another mind its truth, though it were in torrents of light, without periods of solitude, inquest, and self-recovery, and a fatal disservice is done. Genius is always sufficiently the en-

omy of genius by over-influence. The literature of every nation bears me witness. The English dramatic poets have Shakspearized now for two hundred years.

Undoubtedly there is a right way of reading, so it be sternly subordinated. Man Thinking must not be subdued by his instruments. Books are for the scholar's idle times. When he can read God directly, the hour is too precious to be wasted in other men's transcripts of their readings. But when the intervals of darkness come, as come they must,—when the sun is hid and the stars withdraw their shining,—we repair to the lamps which were kindled by their ray, to guide our steps to the East again, where the dawn is. We hear, that we may speak. The Arabian proverb says, "A fig tree, looking on a fig tree, becometh fruitful."

It is remarkable, the character of the pleasure we derive from the best books. They impress us with the conviction that one nature wrote and the same reads. We read the verses of one of the great English poets, of Chaucer, of Marvell, of Dryden, with the most modern joy,—with a pleasure, I mean, which is in great part caused by the abstraction of all *time* from their verses. There is some awe mixed with the joy of our surprise, when this poet, who lived in some past world, two or three hundred years ago, says that which lies close to my own soul, that which I also had well-nigh thought and said. But for the evidence thence afforded to the philosophical doctrine of the identity of all minds, we should suppose some preestablished harmony, some foresight of souls that were to be, and some preparation of stores for their future wants, like the fact observed in insects, who lay up food before death for the young grub they shall never see.

I would not be hurried by any love of system, by any exaggeration of instincts, to underrate the Book. We all know, that as the human body can be nourished on any food, though it were boiled grass and the broth of shoes, so the human mind can be fed by any knowledge. And great and

heroic men have existed who had almost no other information than by the printed page. I only would say that it needs a strong head to bear that diet. One must be an inventor to read well. As the proverb says, "He that would bring home the wealth of the Indies, must carry out the wealth of the Indies." There is then creative reading as well as creative writing. When the mind is braced by labor and invention, the page of whatever book we read becomes luminous with manifold allusion. Every sentence is doubly significant, and the sense of our author is as broad as the world. We then see, what is always true, that as the seer's hour of vision is short and rare among heavy days and months, so is its record, perchance, the least part of his volume. The discerning will read, in his Plato or Shakspeare, only that least part,—only the authentic utterances of the oracle,—all the rest he rejects, were it never so many times Plato's and Shakspeare's.

Of course there is a portion of reading quite indispensable to a wise man. History and exact science he must learn by laborious reading. Colleges, in like manner, have their indispensable office,—to teach elements. But they can only highly serve us when they aim not to drill, but to create, when they gather from far every ray of various genius to their hospitable halls, and by the concentrated fires, set the hearts of their youth on flame. Thought and knowledge are natures in which apparatus and pretension avail nothing. Gowns and pecuniary foundations, though of towns of gold, can never countervail the least sentence or syllable of wit. Forget this, and our American colleges will recede in their public importance, whilst they grow richer every year.

III. There goes in the world a notion that the scholar should be a recluse, a valetudinarian,—as unfit for any handiwork or public labor as a penknife for an axe. The so-called "practical men" sneer at speculative men, as if, because they

speculate or *see*, they could do nothing I have heard it said that the clergy,—who are always, more universally than any other class, the scholars of their day,—are addressed as women, that the rough, spontaneous conversation of men they do not hear, but only a mincing and diluted speech. They are often virtually disfranchised, and indeed there are advocates for their celibacy. As far as this is true of the studious classes, it is not just and wise. Action is with the scholar subordinate, but it is essential. Without it he is not yet man. Without it thought can never ripen into truth. Whilst the world hangs before the eye as a cloud of beauty, we cannot even see its beauty. Inaction is cowardice, but there can be no scholar without the heroic mind. The preamble of thought, the transition through which it passes from the unconscious to the conscious, is action. Only so much do I know, as I have lived. Instantly we know whose words are loaded with life, and whose not.

The world,—this shadow of the soul, or *other me*,—lies wide around. Its attractions are the keys which unlock my thoughts and make me acquainted with myself. I run eagerly into this resounding tumult. I grasp the hands of those next me, and take my place in the ring to suffer and to work, taught by an instinct that so shall the dumb abyss be vocal with speech. I pierce its order, I dissipate its fear, I dispose of it within the circuit of my expanding life. So much only of life as I know by experience, so much of the wilderness have I vanquished and planted, or so far have I extended my being, my dominion. I do not see how any man can afford, for the sake of his nerves and his nap, to spare any action in which he can partake. It is pearls and rubies to his discourse. Drudgery, calamity, exasperation, want, are instructors in eloquence and wisdom. The true scholar grudges every opportunity of action past by, as a loss of power. It is the raw material out of which the intellect moulds her splendid products. A strange process too, this by which experience is

converted into thought, as a mulberry leaf is converted into satin. The manufacture goes forward at all hours.

The actions and events of our childhood and youth are now matters of calmest observation. They lie like fair pictures in the air. Not so with our recent actions,—with the business which we now have in hand. On this we are quite unable to speculate. Our affections as yet circulate through it. We no more feel or know it than we feel the feet, or the hand, or the brain of our body. The new deed is yet a part of life,—remains for a time immersed in our unconscious life. In some contemplative hour it detaches itself from the life like a ripe fruit, to become a thought of the mind. Instantly it is raised, transfigured, the corruptible has put on incorruption. Henceforth it is an object of beauty, however base its origin and neighborhood. Observe too the impossibility of antedating this act. In its grub state, it cannot fly, it cannot shine, it is a dull grub. But suddenly, without observation, the selfsame thing unfurls beautiful wings, and is an angel of wisdom. So is there no fact, no event, in our private history, which shall not, sooner or later, lose its adhesive, inert form, and astonish us by soaring from our body into the empyrean. Cradle and infancy, school and playground, the fear of boys, and dogs, and ferules, the love of little maids and berries, and many another fact that once filled the whole sky, are gone already, friend and relative, profession and party, town and country, nation and world, must also soar and sing.

Of course, he who has put forth his total strength in fit actions has the richest return of wisdom. I will not shut myself out of this globe of action, and transplant an oak into a flower-pot, there to hunger and pine, nor trust the revenue of some single faculty, and exhaust one vein of thought, much like those Savoyards, who, getting their livelihood by carving shepherds, shepherdesses, and smoking Dutchmen, for all Europe, went out one day to the mountain to find stock, and discovered

that they had whittled up the last of their pine trees. Authors we have, in numbers, who have written out their vein, and who, moved by a commendable prudence, sail for Greece or Palestine, follow the trapper into the prairie, or ramble round Algiers, to replenish their merchantable stock.

If it were only for a vocabulary, the scholar would be covetous of action. Life is our dictionary. Years are well spent in country labors, in town, in the insight into trades and manufactures, in frank intercourse with many men and women, in science, in art, to the one end of mastering in all their facts a language by which to illustrate and embody our perceptions. I learn immediately from any speaker how much he has already lived, through the poverty or the splendor of his speech. Life lies behind us as the quarry from whence we get tiles and copestones for the masonry of to-day. This is the way to learn grammar. Colleges and books only copy the language which the field and the work-yard made.

But the final value of action, like that of books, and better than books, is that it is a resource. That great principle of Undulation in nature, that shows itself in the inspiring and expiring of the breath, in desire and satiety, in the ebb and flow of the sea, in day and night, in heat and cold, and, as yet more deeply ingrained in every atom and every fluid, is known to us under the name of Polarity,—these “fits of easy transmission and reflection,” as Newton called them, are the law of nature because they are the law of spirit.

The mind now thinks, now acts, and each fit reproduces the other. When the artist has exhausted his materials, when the fancy no longer paints, when thoughts are no longer apprehended and books are a weariness,—he has always the resource *to live*. Character is higher than intellect. Thinking is the function. Living is the functionary. The stream retreats to its source. A great soul will be strong to live, as well as strong to think. Does he lack organ or medium to impart his truths? He

can still fall back on this elemental force of living them. This is a total act. Thinking is a partial act. Let the grandeur of justice shine in his affairs. Let the beauty of affection cheer his lowly roof. Those “far from fame,” who dwell and act with him, will feel the force of his constitution in the doings and passages of the day better than it can be measured by any public and designed display. Time shall teach him that the scholar loses no hour which the man lives. Herein he unfolds the sacred germ of his instinct, screened from influence. What is lost in seemliness is gained in strength. Not out of those on whom systems of education have exhausted their culture, comes the helpful giant to destroy the old or to build the new, but out of unhand-sold savage nature, out of terrible Druids and Berserkers come at last Alfred and Shakespeare.

I hear therefore with joy whatever is beginning to be said of the dignity and necessity of labor to every citizen. There is virtue yet in the hoe and the spade, for learned as well as for unlearned hands. And labor is everywhere welcome, always we are invited to work, only be this limitation observed, that a man shall not for the sake of wider activity sacrifice any opinion to the popular judgments and modes of action.

I have now spoken of the education of the scholar by nature, by books, and by action. It remains to say somewhat of his duties.

They are such as become Man Thinking. They may all be comprised in self-trust. The office of the scholar is to cheer, to raise, and to guide men by showing them facts amidst appearances. He plies the slow, unhonored, and unpaid task of observation. Flamsteed and Herschel,² in their

² John Flamsteed (1646-1719) was the first Astronomer Royal of England. Sir William Herschel (1738-1822) was the discoverer of the planet Uranus, his son, Sir John (1792-1871), was attracting attention by his astronomical observations at the time Emerson wrote this essay.

glazed observatories, may catalogue the stars with the praise of all men, and the results being splendid and useful, honor is sure. But he, in his private observatory, cataloguing obscure and nebulous stars of the human mind, which as yet no man has thought of as such,—watching days and months sometimes for a few facts, correcting still his old records,—must relinquish display and immediate fame. In the long period of his preparation he must betray often an ignorance and shiftlessness in popular arts, incurring the disdain of the able who shoulder him aside. Long he must stammer in his speech, often forego the living for the dead. Worse yet, he must accept—how often!—poverty and solitude. For the ease and pleasure of treading the old road, accepting the fashions, the education, the religion of society, he takes the cross of making his own, and, of course, the self-accusation, the faint heart, the frequent uncertainty and loss of time, which are the nettles and tangling vines in the way of the self-relying and self-directed, and the state of virtual hostility in which he seems to stand to society, and especially to educated society. For all this loss and scorn, what offset? He is to find consolation in exercising the highest functions of human nature. He is one who raises himself from private considerations and breathes and lives on public and illustrious thoughts. He is the world's eye. He is the world's heart. He is to resist the vulgar prosperity that retrogrades ever to barbarism, by preserving and communicating heroic sentiments, noble biographies, melodious verse, and the conclusions of history. Whatsoever oracles the human heart, in all emergencies, in all solemn hours, has uttered as its commentary on the world of actions,—these he shall receive and impart. And whatsoever new verdict Reason from her inviolable seat pronounces on the passing men and events of to-day,—this he shall hear and promulgate.

These being his functions, it becomes him to feel all confidence in himself, and to defer never to the popular cry. He and

he only knows the world. The world of any moment is the merest appearance. Some great decorum, some fetish of a government, some ephemeral trade, or war, or man, is cried up by half mankind and cried down by the other half, as if all depended on this particular up or down. The odds are that the whole question is not worth the poorest thought which the scholar has lost in listening to the controversy. Let him not quit his belief that a popgun is a popgun, though the ancient and honorable of the earth affirm it to be the crack of doom. In silence, in steadiness, in severe abstraction, let him hold by himself, add observation to observation, patient of neglect, patient of reproach, and bide his own time,—happy enough if he can satisfy himself alone that this day he has seen something truly. Success treads on every right step. For the instinct is sure, that prompts him to tell his brother what he thinks. He then learns that in going down into the secrets of his own mind he has descended into the secrets of all minds. He learns that he who has mastered any law in his private thoughts, is master to that extent of all men whose language he speaks, and of all into whose language his own can be translated. The poet, in utter solitude remembering his spontaneous thoughts and recording them, is found to have recorded that which men in crowded cities find true for them also. The orator distrusts at first the fitness of his frank confessions, his want of knowledge of the persons he addresses, until he finds that he is the complement of his hearers,—that they drink his words because he fulfils for them their own nature, the deeper he dives into his privatest, secretest presentiment, to his wonder he finds this is the most acceptable, most public, and universally true. The people delight in it, the better part of every man feels, This is my music, this is myself.

In self-trust all the virtues are comprehended. Free should the scholar be,—free and brave. Free even to the definition of freedom, “without any hindrance that

does not arise out of his own constitution " Brave, for fear is a thing which a scholar by his very function puts behind him Fear always springs from ignorance It is a shame to him if his tranquillity, amid dangerous times, arise from the presumption that like children and women his is a protected class, or if he seek a temporary peace by the diversion of his thoughts from politics or vexed questions, hiding his head like an ostrich in the flowering bushes, peeping into microscopes, and turning rhymes, as a boy whistles to keep his courage up So is the danger a danger still, so is the fear worse Manlike let him turn and face it Let him look into its eye and search its nature, inspect its origin,—see the whelping of this lion,—which lies no great way back, he will then find in himself a perfect comprehension of its nature and extent, he will have made his hands meet on the other side, and can henceforth defy it and pass on superior The world is his who can see through its pretension What deafness, what stone-blind custom, what overgrown error you behold is there only by sufferance,—by your sufferance See it to be a lie, and you have already dealt it its mortal blow

Yes, we are the cowed,—we the trustless It is a mischievous notion that we are come late into nature, that the world was finished a long time ago As the world was plastic and fluid in the hands of God, so it is ever to so much of his attributes as we bring to it To ignorance and sin, it is flint They adapt themselves to it as they may, but in proportion as a man has any thing in him divine, the firmament flows before him and takes his signet and form Not he is great who can alter matter, but he who can alter my state of mind They are the kings of the world who give the color of their present thought to all nature and all art, and persuade men by the cheerful serenity of their carrying the matter, that this thing which they do is the apple which the ages have desired to pluck, now at last ripe, and inviting nations to the harvest. The great

man makes the great thing Wherever Macdonald sits, there is the head of the table Linnæus makes botany the most alluring of studies, and wins it from the farmer and the herb-woman, Davy, chemistry, and Cuvier, fossils The day is always his who works in it with serenity and great aims The unstable estimates of men crowd to him whose mind is filled with a truth, as the heaped waves of the Atlantic follow the moon

For this self-trust, the reason is deeper than can be fathomed,—darker than can be enlightened I might not carry with me the feeling of my audience in stating my own belief But I have already shown the ground of my hope, in adverting to the doctrine that man is one I believe man has been wronged, he has wronged himself He has almost lost the light that can lead him back to his prerogatives Men are become of no account Men in history, men in the world of to-day, are bugs, are spawn, and are called "the mass" and "the herd" In a century, in a millennium, one or two men, that is to say, one or two approximations to the right state of every man All the rest behold in the hero or the poet their own green and crude being,—ripened, yes, and are content to be less, so *that* may attain to its full stature What a testimony, full of grandeur, full of pity, is borne to the demands of his own nature, by the poor clansman, the poor partisan, who rejoices in the glory of his chief The poor and the low find some amends to their immense moral capacity, for their acquiescence in a political and social inferiority They are content to be brushed like flies from the path of a great person, so that justice shall be done by him to that common nature which it is the dearest desire of all to see enlarged and glorified They sun themselves in the great man's light, and feel it to be their own element They cast the dignity of man from their down-trod selves upon the shoulders of a hero, and will perish to add one drop of blood to make that great heart beat, those giant sinews combat and con-

quer He lives for us, and we live in him

Men, such as they are, very naturally seek money or power, and power because it is as good as money,—the “spoils,” so called, “of office” And why not? for they aspire to the highest, and this, in their sleep-walking, they dream is highest Wake them and they shall quit the false good and leap to the true, and leave governments to clerks and desks This revolution is to be wrought by the gradual domestication of the idea of Culture The main enterprise of the world for splendor, for extent, is the upbuilding of a man Here are the materials strewn along the ground The private life of one man shall be a more illustrious monarchy, more formidable to its enemy, more sweet and serene in its influence to its friend, than any kingdom in history For a man, rightly viewed, comprehendeth the particular natures of all men Each philosopher, each bard, each actor has only done for me, as by a delegate, what one day I can do for myself The books which once we valued more than the apple of the eye, we have quite exhausted What is that but saying that we have come up with the point of view which the universal mind took through the eyes of one scribe, we have been that man, and have passed on First, one, then another, we drain all cisterns, and waxing greater by all these supplies, we crave a better and more abundant food The man has never lived that can feed us ever The human mind cannot be enshrined in a person who shall set a barrier on any one side to this unbounded, unboundable empire It is one central fire, which, flaming now out of the lips of Etna, lightens the capes of Sicily, and now out of the throat of Vesuvius, illuminates the towers and vineyards of Naples It is one light which beams out of a thousand stars It is one soul which animates all men.

But I have dwelt perhaps tediously upon this abstraction of the Scholar I ought not to delay longer to add what I have to say

of nearer reference to the time and to this country

Historically, there is thought to be a difference in the ideas which predominate over successive epochs, and there are data for marking the genius of the Classic, of the Romantic, and now of the Reflective or Philosophical age With the views I have intimated of the oneness or the identity of the mind through all individuals, I do not much dwell on these differences In fact, I believe each individual passes through all three The boy is a Greek, the youth, romantic, the adult, reflective I deny not, however, that a revolution in the leading idea may be distinctly enough traced

Our age is bewailed as the age of Introversion Must that needs be evil? We, it seems, are critical, we are embarrassed with second thoughts, we cannot enjoy any thing for hankering to know whereof the pleasure consists, we are lined with eyes, we see with our feet, the time is infected with Hamlet's unhappiness,—

“Sicklied o'er with the pale cast of
thought”³

It is so bad then? Sight is the last thing to be pitied Would we be blind? Do we fear lest we should outsee nature and God, and drink truth dry? I look upon the discontent of the literary class as a mere announcement of the fact that they find themselves not in the state of mind of their fathers, and regret the coming state as untried, as a boy dreads the water before he has learned that he can swim If there is any period one would desire to be born in, is it not the age of Revolution, when the old and the new stand side by side and admit of being compared, when the energies of all men are searched by fear and by hope, when the historic glories of the old can be compensated by the rich possibilities of the new era? This time, like all times, is a very good one, if we but know what to do with it

I read with some joy of the auspicious

³ *Hamlet*, Act III, scene 1

signs of the coming days, as they glimmer already through poetry and art, through philosophy and science, through church and state

One of these signs is the fact that the same movement which effected the elevation of what was called the lowest class in the state, assumed in literature a very marked and as benign an aspect. Instead of the sublime and beautiful, the near, the low, the common, was explored and poetized. That which had been negligently trodden under foot by those who were harnessing and provisioning themselves for long journeys into far countries, is suddenly found to be richer than all foreign parts. The literature of the poor, the feelings of the child, the philosophy of the street, the meaning of household life, are the topics of the time. It is a great stride. It is a sign—is it not?—of new vigor when the extremities are made active, when currents of warm life run into the hands and the feet. I ask not for the great, the remote, the romantic, what is doing in Italy or Arabia, what is Greek art, or Provencal minstrelsy,⁴ I embrace the common, I explore and sit at the feet of the familiar, the low. Give me insight into to-day, and you may have the antique and future worlds. What would we really know the meaning of? The meal in the flask, the milk in the pan, the ballad in the street, the news of the boat, the glance of the eye, the form and the gait of the body,—show me the ultimate reason of these matters, show me the sublime presence of the highest spiritual cause lurking, as always it does lurk, in these suburbs and extremities of nature, let me see every trifle bristling with the polarity that ranges it instantly on an eternal law, and the shop, the plough, and the ledger referred to the like cause by which light undulates and poets sing,—and the world has no longer a dull miscellany and lumber-room, but has form and order, there is no trifle, there is no puzzle, but one design unites and animates the farthest pinnacle and the lowest trench.

This idea has inspired the genius of Goldsmith, Burns, Cowper, and, in a newer time, of Goethe, Wordsworth, and Carlyle. This idea they have differently followed and with various success. In contrast with their writing, the style of Pope, of Johnson, of Gibbon, looks cold and pedantic. This writing is blood-warm. Man is surprised to find that things near are not less beautiful and wondrous than things remote. The near explains the far. The drop is a small ocean. A man is related to all nature. This perception of the worth of the vulgar is fruitful in discoveries. Goethe, in this very thing the most modern of the moderns, has shown us, as none ever did, the genius of the ancients.

There is one man of genius who has done much for this philosophy of life, whose literary value has never yet been rightly estimated,—I mean Emanuel Swedenborg.⁵ The most imaginative of men, yet writing with the precision of a mathematician, he endeavored to engraft a purely philosophical Ethics on the popular Christianity of his time. Such an attempt of course must have difficulty which no genius could surmount. But he saw and showed the connection between nature and the affections of the soul. He pierced the emblematic or spiritual character of the visible, audible, tangible world. Especially did his shade-loving muse hover over and interpret the lower parts of nature, he showed the mysterious bond that allies moral evil to the foul material forms, and has given in epical parables a theory of insanity, of beasts, of unclean and fearful things.

Another sign of our times, also marked by an analogous political movement, is the new importance given to the single person. Every thing that tends to insulate the individual,—to surround him with barriers

⁴ The lyric poetry of southern France, in what is known as the Provencal dialect. It flourished especially in the 12th, 13th, and 14th centuries.

⁵ Emerson later wrote an essay on Swedenborg, the famous Swedish mystic and theologian (1688-1772).

of natural respect, so that each man shall feel the world is his, and man shall treat with man as a sovereign state with a sovereign state,—tends to true union as well as greatness “I learned,” said the melancholy Pestalozzi,⁶ “that no man in God’s wide earth is either willing or able to help any other man” Help must come from the bosom alone The scholar is that man who must take up into himself all the ability of the time, all the contributions of the past, all the hopes of the future He must be an university of knowledges If there be one lesson more than another which should pierce his ear, it is, The world is nothing, the man is all, in yourself is the law of all nature, and you know not yet how a globule of sap ascends, in yourself slumbers the whole of Reason, it is for you to know all, it is for you to dare all Mr President and Gentlemen, this confidence in the unsearched might of man belongs, by all motives, by all prophecy, by all preparation, to the American Scholar We have listened too long to the courtly muses of Europe The spirit of the American free-man is already suspected to be timid, imitative, tame Public and private avarice make the air we breathe thick and fat The scholar is decent, indolent, complaisant See already the tragic consequence The mind of this country, taught to aim at low objects, eats upon itself There is no work for any but the decorous and the complaisant Young men of the fairest promise, who begin life upon our shores, inflated by the mountain winds, shined upon by all the stars of God, find the earth below not in unison with these, but are hindered from action by the disgust which the principles on which business is managed inspire, and turn drudges, or die of disgust, some of them suicides What is the remedy? They did not yet see, and thousands of young men as hopeful now crowding to the bairners for the career do not yet see, that if the single man plant himself indomitably on his instincts, and there abide, the huge world will come round to him Patience,—patience, with the shades

of all the good and great for company, and for solace the perspective of your own infinite life, and for work the study and the communication of principles, the making those instincts prevalent, the conversion of the world Is it not the chief disgrace in the world, not to be an unit,—not to be reckoned one character,—not to yield that peculiar fruit which each man was created to bear, but to be reckoned in the gross, in the hundred, or the thousand, of the party, the section, to which we belong, and our opinion predicted geographically, as the north, or the south? Not so, brothers and friends—please God, ours shall not be so We will walk on our own feet, we will work with our own hands, we will speak our own minds The study of letters shall be no longer a name for pity, for doubt, and for sensual indulgence The dread of man and the love of man shall be a wall of defence and a wreath of joy around all A nation of men will for the first time exist, because each believes himself inspired by the Divine Soul which also inspires all men

SELF-RELIANCE

[1841]

“Ne te quæsisseris extra”¹

“Man is his own star, and the soul that can
Render an honest and a perfect man
Commands all light, all influence, all fate,
Nothing to him falls early or too late
Our acts our angels are, or good or ill,
Our fatal shadows that walk by us still”

—Epilogue to Beaumont and

Fletcher’s *Honest Man’s Fortune*

Cast the bantering on the rocks,
Suckle him with the she-wolf’s teat,
Wintered with the hawk and fox,
Power and speed be hands and feet

⁶ Johann Heinrich Pestalozzi (1746-1827), famous Swiss writer and educator

¹ Seek not outside thyself

I read the other day some verses written by an eminent painter² which were original and not conventional. The soul always hears an admonition in such lines, let the subject be what it may. The sentiment they instil is of more value than any thought they may contain. To believe your own thought, to believe that what is true for you in your private heart is true for all men,—that is genius. Speak your latent conviction, and it shall be the universal sense, for the inmost in due time becomes the outmost, and our first thought is rendered back to us by the trumpets of the Last Judgment. Familiar as the voice of the mind is to each, the highest merit we ascribe to Moses, Plato and Milton is that they set at naught books and traditions, and spoke not what men, but what *they* thought. A man should learn to detect and watch that gleam of light which flashes across his mind from within, more than the lustre of the firmament of bards and sages. Yet he dismisses without notice his thought, because it is his. In every work of genius we recognize our own rejected thoughts, they come back to us with a certain alienated majesty. Great works of art have no more affecting lesson for us than this. They teach us to abide by our spontaneous impression with good-humored inflexibility then most when the whole cry of voices is on the other side. Else to-morrow a stranger will say with masterly good sense precisely what we have thought and felt all the time, and we shall be forced to take with shame our own opinion from another.

There is a time in every man's education when he arrives at the conviction that envy is ignorance, that imitation is suicide, that he must take himself for better for worse as his portion, that though the wide universe is full of good, no kernel of nourishing corn can come to him but through his toil bestowed on that plot of ground which is given to him to till. The power which resides in him is new in nature, and none but he knows what that is which he can do, nor does he know until

he has tried. Not for nothing one face, one character, one fact, makes much impression on him, and another none. This sculpture in the memory is not without preestablished harmony. The eye was placed where one ray should fall, that it might testify of that particular ray. We but half express ourselves, and are ashamed of that divine idea which each of us represents. It may be safely trusted as proportionate and of good issues, so it be faithfully imparted, but God will not have his work made manifest by cowards. A man is relieved and gay when he has put his heart into his work and done his best, but what he has said or done otherwise shall give him no peace. It is a deliverance which does not deliver. In the attempt his genius deserts him, no muse befriends, no invention, no hope.

Trust thyself: every heart vibrates to that iron string. Accept the place the divine providence has found for you, the society of your contemporaries, the connection of events. Great men have always done so, and confided themselves childlike to the genius of their age, betraying their perception that the absolutely trustworthy was seated at their heart, working through their hands, predominating in all their being. And we are now men, and must accept in the highest mind the same transcendent destiny, and not mirrors and invalids in a protected corner, not cowards fleeing before a revolution, but guides, redeemers and benefactors, obeying the Almighty effort and advancing on Chaos and the Dark.

What pretty oracles nature yields us on this text in the face and behavior of children, babes, and even brutes! That divided and rebel mind, that distrust of a sentiment because our arithmetic has computed the strength and means opposed to our purpose, these have not. Their mind being whole, their eye is as yet unconquered, and when we look in their faces we are

² Washington Allston (1779-1843), American painter and author.

disconcerted Infancy conforms to nobody, all conform to it, so that one babe commonly makes four or five out of the adults who prattle and play to it. So God has armed youth and puberty and manhood no less with its own piquancy and charm, and made it enviable and gracious and its claims not to be put by, if it will stand by itself. Do not think the youth has no force, because he cannot speak to you and me. Haik! in the next room his voice is sufficiently clear and emphatic. It seems he knows how to speak to his contemporaries. Bashful or bold then, he will know how to make us seniors very unnecessary.

The nonchalance of boys who are sure of a dinner, and would disdain as much as a lord to do or say aught to conciliate one, is the healthy attitude of human nature. A boy is in the parlor what the pit is in the playhouse, independent, irresponsible, looking out from his corner on such people and facts as pass by, he tries and sentences them on their merits, in the swift, summary way of boys, as good, bad, interesting, silly, eloquent, troublesome. He cumber himself never about consequences, about interests, he gives an independent, genuine verdict. You must court him, he does not court you. But the man is as it were clapped into jail by his consciousness. As soon as he has once acted or spoken with *éclat* he is a committed person, watched by the sympathy or the hatred of hundreds, whose affections must now enter into his account. There is no Lethe for this. Ah, that he could pass again into his neutrality! Who can thus avoid all pledges and, having observed, observe again from the same unaffected, unbiased, unbribable, unaffrighted innocence,—must always be formidable. He would utter opinions on all passing affairs, which being seen to be not private but necessary, would sink like darts into the ear of men and put them in fear.

These are the voices which we hear in solitude, but they grow faint and inaudible as we enter into the world. Society everywhere is in conspiracy against the man-

hood of every one of its members. Society is a joint-stock company, in which the members agree, for the better securing of his bread to each shareholder, to surrender the liberty and culture of the eater. The virtue in most request is conformity. Self-reliance is its aversion. It loves not realities and creators, but names and customs.

Whoso would be a man, must be a non-conformist. He who would gather immortal palms must not be hindered by the name of goodness, but must explore if it be goodness. Nothing is at last sacred but the integrity of your own mind. Absolve you to yourself, and you shall have the suffrage of the world. I remember an answer which when quite young I was prompted to make to a valued adviser who was wont to importune me with the dear old doctrines of the church. On my saying, "What have I to do with the sacredness of traditions, if I live wholly from within?" my friend suggested,—“But these impulses may be from below, not from above.” I replied, “They do not seem to me to be such, but if I am the Devil’s child, I will live then from the Devil.” No law can be sacred to me but that of my nature. Good and bad are but names very readily transferable to that or this, the only right is what is after my constitution, the only wrong what is against it. A man is to carry himself in the presence of all opposition as if every thing were titular and ephemeral but he. I am ashamed to think how easily we capitulate to badges and names, to large societies and dead institutions. Every decent and well-spoken individual affects and sways me more than is right. I ought to go upright and vital, and speak the rude truth in all ways. If malice and vanity wear the coat of philanthropy, shall that pass? If an angry bigot assumes this bountiful cause of Abolition, and comes to me with his last news from Barbadoes,³ why should I not say to him, “Go love thy infant, love thy wood-chopper, be good-na-

³ Slavery was abolished in this island of the British West Indies in 1834.

tured and modest, have that grace, and never vainish your hard, uncharitable ambition with this incredible tenderness for black folk a thousand miles off. Thy love afar is spite at home." Rough and graceless would be such greeting, but truth is handsomer than the affectation of love. Your goodness must have some edge to it, —else it is none. The doctrine of hatred must be preached, as the counteraction of the doctrine of love, when that pules and whines. I shun father and mother and wife and brother when my genius calls me. I would write on the lintels of the door-post, *Whim*. I hope it is somewhat better than *whim* at last, but we cannot spend the day in explanation. Expect me not to show cause why I seek or why I exclude company. Then again, do not tell me, as a good man did to-day, of my obligation to put all poor men in good situations. Are they *my* poor? I tell thee, thou foolish philanthropist, that I grudge the dollar, the dime, the cent I give to such men as do not belong to me and to whom I do not belong. There is a class of persons to whom by all spiritual affinity I am bought and sold, for them I will go to prison if need be, but your miscellaneous popular charities, the education at college of fools, the building of meeting-houses to the vain end to which many now stand, alms to sots, and the thousand-fold Relief Societies,—though I confess with shame I sometimes succumb and give the dollar, it is a wicked dollar, which by and by I shall have the manhood to withhold.

Virtues are, in the popular estimate, rather the exception than the rule. There is the man *and* his virtues. Men do what is called a good action, as some piece of courage or charity, much as they would pay a fine in expiation of daily non-appearance on parade. Their works are done as an apology or extenuation of their living in the world,—as invalids and the insane pay a high board. Their virtues are penances. I do not wish to expiate, but to live. My life is for itself and not for a spectacle. I much prefer that it should be of a lower

strain, so it be genuine and equal, than that it should be glittering and unsteady. I wish it to be sound and sweet, and not to need diet and bleeding. I ask primary evidence that you are a man, and refuse this appeal from the man to his actions. I know that for myself it makes no difference whether I do or forbear those actions which are reckoned excellent. I cannot consent to pay for a privilege where I have intrinsic right. Few and mean as my gifts may be, I actually am, and do not need for my own assurance or the assurance of my fellows any secondary testimony.

What I must do is all that concerns me, not what the people think. This rule, equally arduous in actual and in intellectual life, may serve for the whole distinction between greatness and meanness. It is the harder because you will always find those who think they know what is your duty better than you know it. It is easy in the world to live after the world's opinion, it is easy in solitude to live after our own, but the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of solitude.

The objection to conforming to usages that have become dead to you is that it scatters your force. It loses your time and blurs the impression of your character. If you maintain a dead church, contribute to a dead Bible-society, vote with a great party either for the government or against it, spread your table like base housekeepers,—under all these screens I have difficulty to detect the precise man you are—and of course so much force is withdrawn from your proper life. But do your work, and I shall know you. Do your work, and you shall reinforce yourself. A man must consider what a blind-man's-buff is this game of conformity. If I know your sect I anticipate your argument. I hear a preacher announce for his text and topic the expediency of one of the institutions of his church. Do I not know beforehand that not possibly can he say a new and spontaneous word? Do I not know that with all this ostentation of examining the

grounds of the institution he will do no such thing? Do I not know that he is pledged to himself not to look but at one side, the permitted side, not as a man, but as a parish minister? He is a retained attorney, and these airs of the bench are the emptiest affectation. Well, most men have bound their eyes with one or another handkerchief, and attached themselves to some one of these communities of opinion. This conformity makes them not false in a few particulars, authors of a few lies, but false in all particulars. Their every truth is not quite true. Their two is not the real two, their four not the real four, so that every word they say chagrins us and we know not where to begin to set them right. Meantime nature is not slow to equip us in the prison-uniform of the party to which we adhere. We come to wear one cut of face and figure, and acquire by degrees the gentlest assinine expression. There is a mortifying experience in particular, which does not fail to wreak itself also in the general history, I mean "the foolish face of praise,"* the forced smile which we put on in company where we do not feel at ease, in answer to conversation which does not interest us. The muscles, not spontaneously moved but moved by a low usurping wilfulness, grow tight about the outline of the face, with the most disagreeable sensation.

For nonconformity the world whips you with its displeasure. And therefore a man must know how to estimate a sour face. The by-standers look askance on him in the public street or in the friend's parlor. If this aversion had its origin in contempt and resistance like his own he might well go home with a sad countenance, but the sour faces of the multitude, like their sweet faces, have no deep cause, but are put on and off as the wind blows and a newspaper directs. Yet is the discontent of the multitude more formidable than that of the senate and the college. It is easy enough for a firm man who knows the world to brook the rage of the cultivated classes. Their rage is decorous and prudent, for

they are timid, as being very vulnerable themselves. But when to their feminine rage the indignation of the people is added, when the ignorant and the poor are aroused, when the unintelligent brute force that lies at the bottom of society is made to growl and howl, it needs the habit of magnanimity and religion to treat it godlike as a trifle of no concernment.

The other terror that scares us from self-trust is our consistency, a reverence for our past act or word because the eyes of others have no other data for computing our orbit than our past acts, and we are loth to disappoint them.

But why should you keep your head over your shoulder? Why drag about this corpse of your memory, lest you contradict somewhat you have stated in this or that public place? Suppose you should contradict yourself, what then? It seems to be a rule of wisdom never to rely on your memory alone, scarcely even in acts of pure memory, but to bring the past for judgment into the thousand-eyed present, and live ever in a new day. In your metaphysics you have denied personality to the Deity, yet when the devout motions of the soul come, yield to them heart and life, though they should clothe God with shape and color. Leave your theory, as Joseph his coat in the hand of the harlot, and flee.

A foolish consistency is the hobgoblin of little minds, adored by little statesmen and philosophers and divines. With consistency a great soul has simply nothing to do. He may as well concern himself with his shadow on the wall. Speak what you think now in hard words and to-morrow speak what to-morrow thinks in hard words again, though it contradict every thing you said to-day—"Ah, so you shall be sure to be misunderstood."—Is it so bad then to be misunderstood? Pythagoras was misunderstood, and Socrates, and Jesus, and Luther, and Copernicus, and Galileo, and Newton, and every pure and wise spirit

* Quoted from Alexander Pope's *Epistle to Dr Arbuthnot*, in the satire on Addison.

that ever took flesh. To be great is to be misunderstood

I suppose no man can violate his nature All the sallies of his will are rounded in by the law of his being, as the inequalities of Andes and Himmaleh are insignificant in the curve of the sphere Nor does it matter how you gauge and try him A character is like an acrostic or Alexandrian stanza, —read it forward, backward, or across, it still spells the same thing In this pleasing contrite wood-life which God allows me, let me record day by day my honest thought without prospect or retrospect, and, I cannot doubt, it will be found symmetrical, though I mean it not and see it not My book should smell of pines and resound with the hum of insects The swallow over my window should interweave that thread or straw he carries in his bill into my web also We pass for what we are Character teaches above our wills Men imagine that they communicate their virtue or vice only by overt actions, and do not see that virtue or vice emit a breath every moment

There will be an agreement in whatever variety of actions, so they be each honest and natural in their hour For of one will, the actions will be harmonious, however unlike they seem These varieties are lost sight of at a little distance, at a little height of thought One tendency unites them all The voyage of the best ship is a zigzag line of a hundred tacks See the line from a sufficient distance, and it strengthens itself to the average tendency Your genuine action will explain itself and will explain your other genuine actions Your conformity explains nothing Act singly, and what you have already done singly will justify you now Greatness appeals to the future If I can be firm enough to-day to do right and scorn eyes, I must have done so much right before as to defend me now Be it how it will, do right now Always scorn appearances and you always may The force of character is cumulative All the foregone days of virtue work their health into this What makes the majesty of the heroes of the senate and the field,

which so fills the imagination? The consciousness of a train of great days and victories behind They shed a united light on the advancing actor He is attended as by a visible escort of angels That is it which throws thunder into Chatham's voice, and dignity into Washington's port, and America into Adams's eye Honor is venerable to us because it is no ephemera It is always ancient virtue We worship it to-day because it is not of to-day We love it and pay it homage because it is not a trap for our love and homage, but is self-dependent, self-derived, and therefore of an old immaculate pedigree, even if shown in a young person

I hope in these days we have heard the last of conformity and consistency Let the words be gazetted and ridiculous henceforward Instead of the gong for dinner, let us hear a whistle from the Spartan fife Let us never bow and apologize more A great man is coming to eat at my house I do not wish to please him, I wish that he should wish to please me I will stand here for humanity, and though I would make it kind, I would make it true Let us affront and reprimand the smooth mediocrity and squalid contentment of the times, and hurl in the face of custom and trade and office, the fact which is the upshot of all history, that there is a great responsible Thinker and Actor working wherever a man works, that a true man belongs to no other time or place, but is the centre of things Where he is, there is nature He measures you and all men and all events Ordinarily, every body in society reminds us of somewhat else, or of some other person Character, reality, reminds you of nothing else, it takes place of the whole creation The man must be so much that he must make all circumstances indifferent Every true man is a cause, a country, and an age, requires infinite spaces and numbers and time fully to accomplish his design,—and posterity seem to follow his steps as a train of clients A man Cæsar is born, and for ages after we have a Roman Empire Christ is born,

and millions of minds so grow and cleave to his genius that he is confounded with virtue and the possible of man. An institution is the lengthened shadow of one man, as, Monachism, of the Hermit Antony,⁵ the Reformation, of Luther, Quakerism, of Fox, Methodism, of Wesley, Abolition, of Clarkson⁶ Scipio, Milton called "the height of Rome," and all history resolves itself very easily into the biography of a few stout and earnest persons.

Let a man then know his worth, and keep things under his feet. Let him not peep or steal, or skulk up and down with the air of a charity-boy, a bastard, or an interloper in the world which exists for him. But the man in the street, finding no worth in himself which corresponds to the force which built a tower or sculptured a marble god, feels poor when he looks on these. To him a palace, a statue, or a costly book have an alien and forbidding air, much like a gay equipage, and seem to say like that, "Who are you, Sir?" Yet they all are his, suitors for his notice, petitioners to his faculties that they will come out and take possession. The picture waits for my verdict, it is not to command me, but I am to settle its claims to praise. That popular fable of the sot who was picked up dead-drunk in the street, carried to the duke's house, washed and dressed and laid in the duke's bed, and, on his waking, treated with all obsequious ceremony like the duke, and assured that he had been insane, owes its popularity to the fact that it symbolizes so well the state of man, who is in the world a sort of sot, but now and then wakes up, exercises his reason and finds himself a true prince.⁷

Our reading is mendicant and sycophantic. In history our imagination plays us false. Kingdom and lordship, power and estate, are a gaudier vocabulary than private John and Edward in a small house and common day's work, but the things of life are the same to both, the sum total of both is the same. Why all this deference to Alfred and Scanderbeg⁸ and Gus-

tavus?⁹ Suppose they were virtuous, did they wear out virtue? As great a stake depends on your private act to-day as followed their public and renowned steps. When private men shall act with original views, the lustre will be transferred from the actions of kings to those of gentlemen.

The world has been instructed by its kings, who have so magnetized the eyes of nations. It has been taught by this colossal symbol the mutual reverence that is due from man to man. The joyful loyalty with which men have everywhere suffered the king, the noble, or the great proprietor to walk among them by a law of his own, make his own scale of men and things and reverse theirs, pay for benefits not with money but with honor, and represent the law in his person, was the hieroglyphic by which they obscurely signified their consciousness of their own right and comeliness, the right of every man.

The magnetism which all original action exerts is explained when we inquire the reason of self-trust. Who is the Trustee? What is the aboriginal Self, on which a universal reliance may be grounded? What is the nature and power of that science-baffling star, without parallax, without calculable elements, which shoots a ray of beauty even into trivial and impure actions, if the least mark of independence appear? The inquiry leads us to that source, at once the essence of genius, of virtue, and of life, which we call Spontaneity or Instinct. We denote this primary

⁵ St Anthony (c. 250-350), first Christian monk.

⁶ Thomas Clarkson (1760-1846), English crusader against slavery and the slave trade.

⁷ See the "Induction" of Shakespeare's *The Taming of the Shrew*.

⁸ Iskander Bey (1403-1468), Albanian general who led the defence of his country against the Turks.

⁹ This probably refers to Gustavus Adolphus (1594-1632), Swedish king, or possibly his grandfather Gustavus Vasa (1496-1560).

wisdom as Intuition, whilst all later teachings are tuition. In that deep force, the last fact behind which analysis cannot go, all things find their common origin. For the sense of being which in calm hours arises, we know not how, in the soul, is not diverse from things, from space, from light, from time, from man, but one with them and proceeds obviously from the same source whence then life and being also proceed. We first share the life by which things exist and afterwards see them as appearances in nature and forget that we have shared their cause. Here is the fountain of action and of thought. Here are the lungs of that inspiration which giveth man wisdom and which cannot be denied without impiety and atheism. We lie in the lap of immense intelligence, which makes us receivers of its truth and organs of its activity. When we discern justice, when we discern truth, we do nothing of ourselves, but allow a passage to its beams. If we ask whence this comes, if we seek to pry into the soul that causes, all philosophy is at fault. Its presence or its absence is all we can affirm. Every man discriminates between the voluntary acts of his mind and his involuntary perceptions, and knows that to his involuntary perceptions a perfect faith is due. He may err in the expression of them, but he knows that these things are so, like day and night, not to be disputed. My wilful actions and acquisitions are but roving,—the idlest reverie, the faintest native emotion, command my curiosity and respect. Thoughtless people contradict as readily the statement of perceptions as of opinions, or rather much more readily, for they do not distinguish between perception and notion. They fancy that I choose to see this or that thing. But perception is not whimsical, but fatal. If I see a trait, my children will see it after me, and in course of time all mankind,—although it may chance that no one has seen it before me. For my perception of it is as much a fact as the sun.

The relations of the soul to the divine

spirit are so pure that it is profane to seek to interpose helps. It must be that when God speaketh he should communicate, not one thing, but all things, should fill the world with his voice, should scatter forth light, nature, time, souls, from the centre of the present thought, and new date and new create the whole. Whenever a mind is simple and receives a divine wisdom, old things pass away,—means, teachers, texts, temples fall, it lives now, and absorbs past and future into the present hour. All things are made sacred by relation to it,—one as much as another. All things are dissolved to their centre by their cause, and in the universal miracle petty and particular miracles disappear. If therefore a man claims to know and speak of God and carries you backward to the phraseology of some old mouldered nation in another country, in another world, believe him not. Is the acorn better than the oak which is its fulness and completion? Is the parent better than the child into whom he has cast his ripened being? Whence then this worship of the past? The centuries are conspirators against the sanity and authority of the soul. Time and space are but physiological colors which the eye makes, but the soul is light where it is, is day, where it was, is night, and history is an impertinence and an injury if it be any thing more than a cheerful apologue or parable of my being and becoming.

Man is timid and apologetic, he is no longer upright, he dares not say "I think," "I am," but quotes some saint or sage. He is ashamed before the blade of grass or the blowing rose. These roses under my window make no reference to former roses or to better ones, they are for what they are, they exist with God to-day. There is no time to them. There is simply the rose, it is perfect in every moment of its existence. Before a leaf-bud has burst, its whole life acts, in the full-blown flower there is no more, in the leafless root there is no less. Its nature is satisfied and it satisfies nature in all moments alike. But

man postpones or remembers, he does not live in the present, but with reverted eye laments the past, or, heedless of the riches that surround him, stands on tiptoe to foresee the future. He cannot be happy and strong until he too lives with nature in the present, above time.

This should be plain enough. Yet see what strong intellects dare not yet hear God himself unless he speak the phraseology of I know not what David, or Jeremiah, or Paul. We shall not always set so great a price on a few texts, on a few lives. We are like children who repeat by rote the sentences of grandames and tutors, and, as they grow older, of the men of talents and character they chance to see, —painfully recollecting the exact words they spoke, afterwards, when they come into the point of view which those had who uttered these sayings, they understand them and are willing to let the words go, for at any time they can use words as good when occasion comes. If we live truly, we shall see truly. It is as easy for the strong man to be strong, as it is for the weak to be weak. When we have new perception, we shall gladly disburden the memory of its hoarded treasures as old rubbish. When a man lives with God, his voice shall be as sweet as the murmur of the brook and the rustle of the corn.

And now at last the highest truth on this subject remains unsaid, probably cannot be said, for all that we say is the far-off remembering of the intuition. That thought by what I can now nearest approach to say it, is this. When good is near you, when you have life in yourself, it is not by any known or accustomed way, you shall not discern the footprints of any other, you shall not see the face of man, you shall not hear any name,—the way, the thought, the good, shall be wholly strange and new. It shall exclude example and experience. You take the way from man, not to man. All persons that ever existed are its forgotten ministers. Fear and hope are alike beneath it. There is somewhat low even in hope. In the hour

of vision there is nothing that can be called gratitude, nor properly joy. The soul raised over passion beholds identity and eternal causation, perceives the self-existence of Truth and Right, and calms itself with knowing that all things go well. Vast spaces of nature, the Atlantic Ocean, the South Sea, long intervals of time, years, centuries, are of no account. This which I think and feel underlay every former state of life and circumstances, as it does underlie my present, and what is called life and what is called death.

Life only avails, not the having lived. Power ceases in the instant of repose, it resides in the moment of transition from a past to a new state, in the shooting of the gulf, in the darting to an aim. This one fact the world hates, that the soul *becomes*, for that forever degrades the past, turns all riches to poverty, all reputation to a shame, confounds the saint with the rogue, shoves Jesus and Judas equally aside. Why then do we prate of self-reliance? Inasmuch as the soul is present there will be power not confident but agent. To talk of reliance is a poor external way of speaking. Speak rather of that which relies because it works and is. Who has more obedience than I master me, though he should not raise his finger. Round him I must revolve by the gravitation of spirits. We fancy it rhetoric when we speak of eminent virtue. We do not yet see that virtue is Height, and that a man or a company of men, plastic and permeable to principles, by the law of nature must overpower and ride all cities, nations, kings, rich men, poets, who are not.

This is the ultimate fact which we so quickly reach on this, as on every topic, the resolution of all into the ever-blessed ONE. Self-existence is the attribute of the Supreme Cause, and it constitutes the measure of good by the degree in which it enters into all lower forms. All things real are so by so much virtue as they contain. Commerce, husbandry, hunting, whaling, war, eloquence, personal weight, are some-

what, and engage my respect as examples of its presence and impure action I see the same law working in nature for conservation and growth Power is, in nature, the essential measure of right Nature suffers nothing to remain in her kingdoms which cannot help itself The genesis and maturation of a planet, its poise and orbit, the bended tree recovering itself from the strong wind, the vital resources of every animal and vegetable, are demonstrations of the self-sufficing and therefore self-relying soul

Thus all concentrates let us not rove, let us sit at home with the cause Let us stun and astonish the intruding rabble of men and books and institutions by a simple declaration of the divine fact Bid the invaders take the shoes from off their feet, for God is here within Let our simplicity judge them, and our docility to our own law demonstrate the poverty of nature and fortune beside our native riches

But now we are a mob Man does not stand in awe of man, nor is his genius admonished to stay at home, to put itself in communication with the internal ocean, but it goes abroad to beg a cup of water of the urns of other men We must go alone I like the silent church before the service begins, better than any preaching How far off, how cool, how chaste the persons look, begirt each one with a precinct or sanctuary! So let us always sit Why should we assume the faults of our friend, or wife, or father, or child, because they sit around our hearth, or are said to have the same blood? All men have my blood and I all men's. Not for that will I adopt their petulance or folly, even to the extent of being ashamed of it But your isolation must not be mechanical, but spiritual, that is, must be elevation At times the whole world seems to be in conspiracy to importune you with emphatic trifles Friend, child, sickness, fear, want, charity, all knock at once at thy closet door and say,—“Come out unto us” But keep thy state; come not into their confusion The

power men possess to annoy me I give them by a weak curiosity No man can come near me but through my act “What we love that we have, but by desire we bereave ourselves of the love”

If we cannot at once rise to the sanctities of obedience and faith, let us at least resist our temptations, let us enter into the state of war and wake Thor and Woden, courage and constancy, in our Saxon breasts This is to be done in our smooth times by speaking the truth Check this lying hospitality and lying affection Have no longer to the expectation of these deceived and deceiving people with whom we converse Say to them, “O father, O mother, O wife, O brother, O friend, I have lived with you after appearances hitherto Henceforward I am the truth's Be it known unto you that henceforward I obey no law less than the eternal law I will have no covenants but proximities I shall endeavor to nourish my parents, to support my family, to be the chaste husband of one wife,—but these relations I must fill after a new and unprecedented way I appeal from your customs I must be myself I cannot break myself any longer for you, or you If you can love me for what I am, we shall be the happier If you cannot, I will still seek to deserve that you should I will not hide my tastes or aversions I will so trust that what is deep is holy, that I will do strongly before the sun and moon whatever inwardly rejoices me and the heart appoints If you are noble, I will love you, if you are not, I will not hurt you and myself by hypocritical attentions If you are true, but not in the same truth with me, cleave to your companions, I will seek my own I do this not selfishly but humbly and truly It is alike your interest, and mine, and all men's, however long we have dwelt in lies, to live in truth Does this sound harsh to-day? You will soon love what is dictated by your nature as well as mine, and if we follow the truth it will bring us out safe at last”—But so may you give these friends pain Yes, but I cannot sell my liberty and my power, to save their

sensibility Besides, all persons have their moments of reason, when they look out into the region of absolute truth, then will they justify me and do the same thing

The populace think that your rejection of popular standards is a rejection of all standard, and mere antinomianism, and the bold sensualist will use the name of philosophy to gild his crimes But the law of consciousness abides There are two confessionals, in one or the other of which we must be shriven You may fulfil your round of duties by clearing yourself in the *direct*, or in the *reflex* way Consider whether you have satisfied your relations to father, mother, cousin, neighbor, town, cat and dog—whether any of these can upbraid you But I may also neglect this reflex standard and absolve me to myself I have my own stern claims and perfect circle It denies the name of duty to many offices that are called duties But if I can discharge its debts it enables me to dispense with the popular code If any one imagines that this law is lax, let him keep its commandment one day

And truly it demands something godlike in him who has cast off the common motives of humanity and has ventured to trust himself for a taskmaster High be his heart, faithful his will, clear his sight, that he may in good earnest be doctrine, society, law, to himself, that a simple purpose may be to him as strong as iron necessity is to others!

If any man consider the present aspects of what is called by distinction *society*, he will see the need of these ethics The sinew and heart of man seem to be drawn out, and we are become timorous, desponding whimperers We are afraid of truth, afraid of fortune, afraid of death, and afraid of each other Our age yields no great and perfect persons We want men and women who shall renovate life and our social state, but we see that most natures are insolvent, cannot satisfy their own wants, have an ambition out of all proportion to their practical force and do lean and beg day and night continually.

Our housekeeping is mendicant, our arts, our occupations, our marriages, our religion we have not chosen, but society has chosen for us We are pailor soldiers We shun the rugged battle of fate, where strength is born

If our young men miscarry in their first enterprises they lose all heart If the young merchant fails, men say he is *ruined* If the finest genius studies at one of our colleges and is not installed in an office within one year afterwards in the cities or suburbs of Boston or New York, it seems to his friends and to himself that he is right in being disheartened and in complaining the rest of his life A study lad from New Hampshire or Vermont, who in turn tries all the professions, who *teams it, farms it, peddles*, keeps a school, preaches, edits a newspaper, goes to Congress, buys a township, and so forth, in successive years, and always like a cat falls on his feet, is worth a hundred of these city dolls He walks abreast with his days and feels no shame in not "studying a profession," for he does not postpone his life, but lives already He has not one chance, but a hundred chances Let a Stoic open the resources of man and tell men they are not leaning willows, but can and must detach themselves, that with the exercise of self-trust, new powers shall appear, that a man is the word made flesh, born to shed healing to the nations, that he should be ashamed of our compassion, and that the moment he acts from himself, tossing the laws, the books, idolatries and customs out of the window, we pity him no more but thank and revere him,—and that teacher shall restore the life of man to splendor and make his name dear to all history

It is easy to see that a greater self-reliance must work a revolution in all the offices and relations of men, in their religion, in their education, in their pursuits, their modes of living, their association, in their property, in their speculative views

1. In what prayers do men allow themselves! That which they call a holy office is not so much as brave and manly Prayer

looks abroad and asks for some foreign addition to come through some foreign virtue, and loses itself in endless mazes of natural and supernatural, and mediatorial and miraculous Prayer that craves a particular commodity, anything less than all good, is vicious Prayer is the contemplation of the facts of life from the highest point of view It is the soliloquy of a beholding and jubilant soul It is the spirit of God pronouncing his works good But prayer as a means to effect a private end is meanness and theft It supposes dualism and not unity in nature and consciousness As soon as the man is at one with God, he will not beg He will then see prayer in all action The prayer of the farmer kneeling in his field to weed it, the prayer of the rower kneeling with the stroke of his oar, are true prayers heard throughout nature, though for cheap ends Caratach, in Fletcher's "Bonduca," when admonished to inquire the mind of the god Andate,¹⁰ replies,—

"His hidden meaning lies in our endeavors,
Our valors are our best gods"

Another sort of false prayers are our regrets Discontent is the want of self-reliance it is infirmity of will Regret calamities if you can thereby help the sufferer, if not, attend your own work and already the evil begins to be repaired Our sympathy is just as base We come to them who weep foolishly and sit down and cry for company, instead of imparting to them truth and health in rough electric shocks, putting them once more in communication with their own reason The secret of fortune is joy in our hands Welcome evermore to gods and men is the self-helping man For him all doors are flung wide, him all tongues greet, all honors crown, all eyes follow with desire Our love goes out to him and embraces him because he did not need it We solicitously and apologetically caress and celebrate him because he held on his way and scorned our disapprobation. The gods love him because men hated him. "To the persevering mortal,"

said Zoroaster, "the blessed Immortals are swift"

As men's prayers are a disease of the will, so are then creeds a disease of the intellect They say with those foolish Israelites, "Let not God speak to us, lest we die Speak thou, speak any man with us, and we will obey"¹¹ Everywhere I am hindered of meeting God in my brother, because he has shut his own temple doors and recites fables merely of his brother's, or his brother's brother's God Every new mind is a new classification If it prove a mind of uncommon activity and power, a Locke, a Lavoisier, a Hutton, a Bentham, a Fourier,¹² it imposes its classification on other men, and lo! a new system In proportion to the depth of the thought, and so to the number of the objects it touches and brings within reach of the pupil, is his complacency But chiefly is this apparent in creeds and churches, which are also classifications of some powerful mind acting on the elemental thought of duty and man's relation to the Highest Such is Calvinism, Quakerism, Swedenborgism The pupil takes the same delight in subordinating every thing to the new terminology as a girl who has just learned botany in seeing a new earth and new seasons thereby It will happen for a time that the pupil will find his intellectual power has grown by the study of his master's mind But in all unbalanced minds the classification is idolized, passes for the end and not for a

¹⁰ Andate, or Andraste, a Celtic deity The quotation from Beaumont and Fletcher's *Bonduca* actually begins "Her hidden meaning" Act III, scene 1

¹¹ Deuteronomy, v 25-27

¹² John Locke (1632-1704), often referred to by Emerson, was the father of English empiricism, Antoine Laurent Lavoisier (1743-1794) was the father of modern chemistry, James Hutton (1726-1797), Scottish geologist, was the originator of the theory of uniformitarianism, Jeremy Bentham (1748-1832) was a leading exponent of utilitarianism, François Marie Charles Fourier (1772-1837) was the founder of a social cooperative system named after him.

speedily exhaustible means, so that the walls of the system blend to their eye in the remote horizon with the walls of the universe, the luminaries of heaven seem to them hung on the arch their master built. They cannot imagine how you aliens have any right to see,—how you can see, “It must be somehow that you stole the light from us.” They do not yet perceive that light, unsystematic, indomitable, will break into any cabin, even into theirs. Let them chirp awhile and call it their own. If they are honest and do well, presently their neat new pincfold will be too strait and low, will crack, will lean, will rot and vanish, and the immortal light, all young and joyful, million-orbed, million-colored, will beam over the universe as on the first morning.

2 It is for want of self-culture that the superstition of Travelling, whose idols are Italy, England, Egypt, retains its fascination for all educated Americans. They who made England, Italy, or Greece venerable in the imagination, did so by sticking fast where they were, like an axis of the earth. In manly hours we feel that duty is our place. The soul is no traveller, the wise man stays at home, and when his necessities, his duties, on any occasion call him from his house, or into foreign lands, he is at home still and shall make men sensible by the expression of his countenance that he goes, the missionary of wisdom and virtue, and visits cities and men like a sovereign and not like an interloper or a valet.

I have no childish objection to the circumnavigation of the globe for the purposes of art, of study, and benevolence, so that the man is first domesticated, or does not go abroad with the hope of finding somewhat greater than he knows. He who travels to be amused, or to get somewhat which he does not carry, travels away from himself, and grows old even in youth among old things. In Thebes, in Palmyra, his will and mind have become old and dilapidated as they. He carries ruins to ruins.

Travelling is a fool's paradise. Our first journeys discover to us the indifference of

places. At home I dream that at Naples, at Rome, I can be intoxicated with beauty and lose my sadness. I pack my trunk, embrace my friends, embark on the sea, and at last wake up in Naples, and there beside me is the stern fact, the sad self, unrelenting, identical, that I fled from. I seek the Vatican and the palaces. I affect to be intoxicated with sights and suggestions, but I am not intoxicated. My giant goes with me wherever I go.

3 But the rage of travelling is a symptom of a deeper unsoundness affecting the whole intellectual action. The intellect is vagabond, and our system of education fosters restlessness. Our minds travel when our bodies are forced to stay at home. We imitate, and what is imitation but the travelling of the mind? Our houses are built with foreign taste, our shelves are garnished with foreign ornaments, our opinions, our tastes, our faculties lean, and follow the Past and the Distant. The soul created the arts wherever they have flourished. It was in his own mind that the artist sought his model. It was an application of his own thought to the thing to be done and the conditions to be observed. And why need we copy the Doric or the Gothic model? Beauty, convenience, grandeur of thought and quaint expression are as near to us as to any, and if the American artist will study with hope and love the precise thing to be done by him, considering the climate, the soil, the length of the day, the wants of the people, the habit and form of the government, he will create a house in which all these will find themselves fitted, and taste and sentiment will be satisfied also.

Insist on yourself, never imitate. Your own gift you can present every moment with the cumulative force of a whole life's cultivation, but of the adopted talent of another you have only an extemporaneous half possession. That which each can do best, none but his Maker can teach him. No man yet knows what it is, nor can, till that person has exhibited it. Where is the master who could have taught Shakspeare? Where

is the master who could have instructed Franklin, or Washington, or Bacon, or Newton? Every great man is a unique. The Scipionism of Scipio is precisely that part he could not borrow. Shakspeare will never be made by the study of Shakspeare. Do that which is assigned you, and you cannot hope too much or dare too much. There is at this moment for you an utterance brave and grand as that of the colossal chisel of Phidias, or tréwel of the Egyptians, or the pen of Moses or Dante, but different from all these. Not possibly will the soul, all rich, all eloquent, with thousand-cloven tongue, deign to repeat itself, but if you can hear what these patriarchs say, surely you can reply to them in the same pitch of voice, for the ear and the tongue are two organs of one nature. Abide in the simple and noble regions of thy life, obey thy heart, and thou shalt reproduce the Foreworld again.

4 As our Religion, our Education, our Art look abroad, so does our spirit of society. All men plume themselves on the improvement of society, and no man improves.

Society never advances. It recedes as fast on one side as it gains on the other. It undergoes continual changes, it is barbarous, it is civilized, it is christianized, it is rich, it is scientific, but this change is not amelioration. For every thing that is given something is taken. Society acquires new arts and loses old instincts. What a contrast between the well-clad, reading, writing, thinking American, with a watch, a pencil and a bill of exchange in his pocket, and the naked New Zealander, whose property is a club, a spear, a mat and an undivided twentieth of a shed to sleep under! But compare the health of the two men and you shall see that the white man has lost his aboriginal strength. If the traveller tell us truly, strike the savage with a broad-axe and in a day or two the flesh shall unite and heal as if you struck the blow into soft pitch, and the same blow shall send the white to his grave.

The civilized man has built a coach, but

has lost the use of his feet. He is supported on crutches, but lacks so much support of muscle. He has a fine Geneva watch, but he fails of the skill to tell the hour by the sun. A Greenwich nautical almanac he has, and so being sure of the information when he wants it, the man in the street does not know a star in the sky. The solstice he does not observe, the equinox he knows as little, and the whole bright calendar of the year is without a dial in his mind. His note-books impair his memory, his libraries overload his wit, the insurance-office increases the number of accidents, and it may be a question whether machinery does not encumber, whether we have not lost by refinement some energy, by a Christianity, entrenched in establishments and forms, some vigor of wild virtue. For every Stoic was a Stoic, but in Christendom where is the Christian?

There is no more deviation in the moral standard than in the standard of height or bulk. No greater men are now than ever were. A singular equality may be observed between the great men of the first and of the last ages, nor can all the science, art, religion, and philosophy of the nineteenth century avail to educate greater men than Plutarch's heroes, three or four and twenty centuries ago. Not in time is the race progressive. Phocion, Socrates, Anaxagoras, Diogenes,¹³ are great men, but they leave no class. He who is really of their class will not be called by their name, but will be his own man, and in his turn the founder of a sect. The arts and inventions of each period are only its costume and do not invigorate men. The harm of the improved machinery may compensate its good. Hudson and Behring accomplished so much in their fishing-boats as to astonish Parry and Franklin,¹⁴ whose equipment exhausted

¹³ Named as types of Greek philosophers.

¹⁴ Henry Hudson (d. 1611) and Vitus Berling (1680-1741) were older navigators, Sir William Edward Parry (1790-1855) and Sir John Franklin (1786-1847) were arctic explorers of Emerson's time.

the resources of science and art. Galileo, with an opera-glass, discovered a more splendid series of celestial phenomena than any one since Columbus found the New World in an undecked boat. It is curious to see the periodical disuse and perishing of means and machinery which were introduced with loud laudation a few years or centuries before. The great genius returns to essential man. We reckoned the improvements of the art of war among the triumphs of science, and yet Napoleon conquered Europe by the bivouac, which consisted of falling back on naked valor and disencumbering it of all aids. The Emperor held it impossible to make a perfect army, says Las Cases, "without abolishing our arms, magazines, commissaries and carriages, until, in imitation of the Roman custom, the soldier should receive his supply of corn, grind it in his hand-mill and bake his bread himself."¹⁵

Society is a wave. The wave moves onward, but the water of which it is composed does not. The same particle does not rise from the valley to the ridge. Its unity is only phenomenal. The persons who make up a nation to-day, next year die, and their experience dies with them.

And so the reliance on Property, including the reliance on governments which protect it, is the want of self-reliance. Men have looked away from themselves and at things so long that they have come to esteem the religious, learned and civil institutions as guards of property, and they deprecate assaults on these, because they feel them to be assaults on property. They measure their esteem of each other by what each has, and not by what each is. But a cultivated man becomes ashamed of his property, out of new respect for his nature. Especially he hates what he has if he see that it is accidental,—came to him by inheritance, or gift, or crime, then he feels that it is not having, it does not belong to him, has no root in him and merely lies there because no revolution or no robber takes it away. But that which a man is, does always by necessity acquire,

and what the man acquires, is living property, which does not wait the beck of rulers, or mobs, or revolutions, or fire, or storm, or bankruptcies, but perpetually renews itself wherever the man breathes. "Thy lot or portion of life," said the Caliph Ali, "is seeking after thee, therefore be at rest from seeking after it."¹⁶ Our dependence on these foreign goods leads us to our slavish respect for numbers. The political parties meet in numerous conventions, the greater the concourse and with each new uproar of announcement, The delegation from Essex! The Democrats from New Hampshire! The Whigs of Maine! the young patriot feels himself stronger than before by a new thousand of eyes and arms. In like manner the reformers summon conventions and vote and resolve in multitude. Not so, O friends! will the God deign to enter and inhabit you, but by a method precisely the reverse. It is only as a man puts off all foreign support and stands alone that I see him to be strong and to prevail. He is weaker by every recruit to his banner. Is not a man better than a town? Ask nothing of men, and, in the endless mutation, thou only firm column must presently appear the upholder of all that surrounds thee. He who knows that power is inborn, that he is weak because he has looked for good out of him and elsewhere, and, so perceiving, throws himself unhesitatingly on his thought, instantly rights himself, stands in the erect position, commands his limbs, works miracles, just as a man who stands on his feet is stronger than a man who stands on his head.

So use all that is called Fortune. Most men gamble with her, and gain all, and lose all, as her wheel rolls. But do thou leave as unlawful these winnings, and deal with Cause and Effect, the chancellors of God. In the Will work and acquire, and

¹⁵ From *Mémorial de Ste Hélène*, by Comte Emmanuel Augustin Dieudonné, Marquis de Las Cases, Napoleon's Boswell.

¹⁶ From the *Maxims* of the Caliph Ali, son-in-law of Mohammed.

thou hast chained the wheel of Chance, and shalt sit hereafter out of fear from her rotations. A political victory, a rise of rents, the recovery of your sick or the return of your absent friend, or some other favorable event raises your spirits, and you think good days are preparing for you. Do not believe it. Nothing can bring you peace but yourself. Nothing can bring you peace but the triumph of principles.

THE POET

[1844]

A moody child and wildly wise
Pursued the game with joyful eyes,
Which chose, like meteors, their way,
And lived the dark with private ray
They overleapt the horizon's edge,
Searched with Apollo's privilege,
Through man, and woman, and sea, and
star
Saw the dance of nature forward far,
Through worlds, and races, and terms, and
times
Saw musical order, and pairing rhymes

Olympian bards who sung
Divine ideas below,
Which always find us young,
And always keep us so ¹

Those who are esteemed umpires of taste are often persons who have acquired some knowledge of admired pictures or sculptures, and have an inclination for whatever is elegant, but if you inquire whether they are beautiful souls, and whether their own acts are like fair pictures, you learn that they are selfish and sensual. Their cultivation is local, as if you should rub a log of dry wood in one spot to produce fire, all the rest remaining cold. Their knowledge of the fine arts is some study of rules and particulars, or some limited judgment of color or form, which is exercised for amusement or for show. It is a proof of the shallowness of the doctrine of beauty as it lies in the minds of our amateurs, that

men seem to have lost the perception of the instant dependence of form upon soul. There is no doctrine of forms in our philosophy. We were put into our bodies, as fire is put into a pan to be carried about, but there is no accurate adjustment between the spirit and the organ, much less is the latter the germination of the former. So in regard to other forms, the intellectual men do not believe in any essential dependence of the material world on thought and volition. Theologians think it a pretty air-castle to talk of the spiritual meaning of a ship or a cloud, of a city or a contract, but they prefer to come again to the solid ground of historical evidence, and even the poets are contented with a civil and conformed manner of living, and to write poems from the fancy, at a safe distance from their own experience. But the highest minds of the world have never ceased to explore the double meaning, or shall I say the quadruple or the centuple or much more manifold meaning, of every sensuous fact, Orpheus, Empedocles, Heraclitus, Plato, Plutarch, Dante, Swedenborg, and the masters of sculpture, picture and poetry. For we are not pans and barrows, nor even porters of the fire and torch-bearers, but children of the fire, made of it, and only the same divinity transmuted and at two or three removes, when we know least about it. And this hidden truth, that the fountains whence all this river of Time and its creatures floweth are intrinsically ideal and beautiful, draws us to the consideration of the nature and functions of the Poet, or the man of Beauty, to the means and materials he uses, and to the general aspect of the art in the present time.

The breadth of the problem is great, for the poet is representative. He stands among partial men for the complete man, and apprises us not of his wealth, but of the common wealth. The young man reveres men of genius, because, to speak truly, they are more himself than he is. They

¹ As in this case, Emerson often wrote his own epigraphs.

receive of the soul as he also receives, but they more Nature enhances her beauty, to the eye of loving men, from their belief that the poet is beholding her shows at the same time. He is isolated among his contemporaries by truth and by his art, but with this consolation in his pursuits, that they will draw all men sooner or later. For all men live by truth and stand in need of expression. In love, in art, in avarice, in politics, in labor, in games, we study to utter our painful secret. The man is only half himself, the other half is his expression.

Notwithstanding this necessity to be published, adequate expression is rare. I know not how it is that we need an interpreter, but the great majority of men seem to be minors, who have not yet come into possession of their own, or mutes, who cannot report the conversation they have had with nature. There is no man who does not anticipate a supersensual utility in the sun and stars, earth and water. These stand and wait to render him a peculiar service. But there is some obstruction or some excess of phlegm in our constitution, which does not suffer them to yield the due effect. Too feeble fall the impressions of nature on us to make us artists. Every touch should thrill. Every man should be so much an artist that he could report in conversation what had befallen him. Yet, in our experience, the rays or appulses have sufficient force to arrive at the senses, but not enough to reach the quick and compel the reproduction of themselves in speech. The poet is the person in whom these powers are in balance, the man without impediment, who sees and handles that which others dream of, traverses the whole scale of experience, and is representative of man, in virtue of being the largest power to receive and to impart.

For the Universe has three children, born at one time, which reappear under different names in every system of thought, whether they be called cause, operation and effect, or, more poetically, Jove, Pluto, Neptune; or, theologically, the Father, the

Spirit and the Son, but which we will call here the Knower, the Doer and the Sayer. These stand respectively for the love of truth, for the love of good, and for the love of beauty. These three are equal. Each is that which he is, essentially, so that he cannot be surmounted or analyzed, and each of these three has the power of the others latent in him, and his own patent.

The poet is the sayer, the namer, and represents beauty. He is a sovereign, and stands on the centre. For the world is not painted or adorned, but is from the beginning beautiful, and God has not made some beautiful things, but Beauty is the creator of the universe. Therefore the poet is not any permissive potentate, but is emperor in his own right. Criticism is infested with a cant of materialism, which assumes that manual skill and activity is the first merit of all men, and disparages such as say and do not, overlooking the fact that some men, namely poets, are natural sayers, sent into the world to the end of expression, and confounds them with those whose province is action but who quit it to imitate the sayers. But Homer's words are as costly and admirable to Homer as Agamemnon's victories are to Agamemnon. The poet does not wait for the hero or the sage, but, as they act and think primarily, so he writes primarily what will and must be spoken, reckoning the others, though primaries also, yet, in respect to him, secondaries and servants, as sitters or models in the studio of a painter, or as assistants who bring building-materials to an architect.

For poetry was all written before time was, and whenever we are so finely organized that we can penetrate into that region where the air is music, we hear those primal warblings and attempt to write them down, but we lose ever and anon a word or a verse and substitute something of our own, and thus miswrite the poem. The men of more delicate ear write down these cadences more faithfully, and these transcripts, though imperfect, become the songs of the nations. For nature is as truly beautiful

as it is good, or as it is reasonable, and must as much appear as it must be done, or be known. Words and deeds are quite indifferent modes of the divine energy. Words are also actions, and actions are a kind of words.

The sign and credentials of the poet are that he announces that which no man foretold. He is the true and only doctor, he knows and tells, he is the only teller of news, for he was present and privy to the appearance which he describes. He is a beholder of ideas and an utterer of the necessary and causal. For we do not speak now of men of poetical talents, or of industry and skill in metric, but of the true poet. I took part in a conversation the other day concerning a recent writer of lyrics, a man of subtle mind, whose head appeared to be a music-box of delicate tunes and rhythms, and whose skill and command of language we could not sufficiently praise. But when the question arose whether he was not only a lyricist but a poet, we were obliged to confess that he is plainly a contemporary, not an eternal man. He does not stand out of our low limitations, like a Chimborazo² under the line, running up from a torrid base through all the climates of the globe, with belts of the herbage of every latitude on its high and mottled sides, but this genius is the landscape-garden of a modern house, adorned with fountains and statues, with well-bred men and women standing and sitting in the walks and terraces. We hear, through all the varied music, the ground-tone of conventional life. Our poets are men of talents who sing, and not the children of music. The argument is secondary, the finish of the verses is primary.

For it is not metres, but a metre-making argument that makes a poem,—a thought so passionate and alive that like the spirit of a plant or an animal it has an architecture of its own, and adorns nature with a new thing. The thought and the form are equal in the order of time, but in the order of genesis the thought is prior to the form. The poet has a new thought; he

has a whole new experience to unfold, he will tell us how it was with him, and all men will be the richer in his fortune. For the experience of each new age requires a new confession, and the world seems always waiting for its poet. I remember when I was young how much I was moved one morning by tidings that genius had appeared in a youth who sat near me at table. He had left his work and gone rambling; none knew whither, and had written hundreds of lines, but could not tell whether that which was in him was therein told, he could tell nothing but that all was changed,—man, beast, heaven, earth and sea. How gladly we listened! how credulous! Society seemed to be compromised. We sat in the aurora of a sunrise which was to put out all the stars. Boston seemed to be at twice the distance it had the night before, or was much farther than that Rome,—what was Rome? Plutarch and Shakspeare were in the yellow leaf, and Homer no more should be heard of. It is much to know that poetry has been written this very day, under this very roof, by your side. What! that wonderful spirit has not expired! These stony moments are still sparkling and animated! I had fancied that the oracles were all silent, and nature had spent her fires, and behold! all night, from every pore, these fine auro-ras have been streaming. Every one has some interest in the advent of the poet, and no one knows how much it may concern him. We know that the secret of the world is profound, but who or what shall be our interpreter, we know not. A mountain ramble, a new style of face, a new person, may put the key into our hands. Of course the value of genius to us is in the veracity of its report. Talent may frolic and juggle, genius realizes and adds. Mankind in good earnest have availed so far in understanding themselves and their work, that the foremost watchman on the peak announces his news. It is the

² One of the highest mountains of the Andes, situated in Ecuador, latitude 1° 30' S.

truest word ever spoken, and the phrase will be the fittest, most musical, and the unerring voice of the world for that time

All that we call sacred history attests that the birth of a poet is the principal event in chronology. Man, never so often deceived, still watches for the arrival of a brother who can hold him steady to a truth until he has made it his own. With what joy I begin to read a poem which I confide in as an inspiration! And now my chains are to be broken, I shall mount above these clouds and opaque airs in which I live,—opaque, though they seem transparent,—and from the heaven of truth I shall see and comprehend my relations. That will reconcile me to life and renovate nature, to see trifles animated by a tendency, and to know what I am doing. Life will no more be a noise, now I shall see men and women, and know the signs by which they may be discerned from fools and satans. This day shall be better than my birthday: then I became an animal, now I am invited into the science of the real. Such is the hope, but the fruition is postponed. Oftener it falls that this winged man, who will carry me into the heaven, whirls me into mists, then leaps and frisks about with me as it were from cloud to cloud, still affirming that he is bound heavenward, and I, being myself a novice, am slow in perceiving that he does not know the way into the heavens, and is merely bent that I should admire his skill to use like a fowl or a flying fish, a little way from the ground or the water, but the all-piercing, all-feeding and ocular air of heaven that man shall never inhabit. I tumble down again soon into my old nooks, and lead the life of exaggerations as before, and have lost my faith in the possibility of any guide who can lead me thither where I would be.

But, leaving these victims of vanity, let us, with new hope, observe how nature, by worthier impulses, has insured the poet's fidelity to his office of announcement and affirming, namely by the beauty of things, which becomes a new and higher beauty

when expressed. Nature offers all her creatures to him as a picture-language. Being used as a type, a second wonderful value appears in the object, far better than its old value, as the carpenter's stretched cord, if you hold your ear close enough, is musical in the breeze. "Things more excellent than every image," says Jamblichus,³ "are expressed through images." Things admit of being used as symbols because nature is a symbol, in the whole, and in every part. Every line we can draw in the sand has expression, and there is no body without its spirit or genius. All form is an effect of character, all condition, of the quality of the life, all harmony, of health, and for this reason a perception of beauty should be sympathetic, or proper only to the good. The beautiful rests on the foundations of the necessary. The soul makes the body, as the wise Spenser teaches —

"So every spirit, as it is more pure,
And hath in it the more of heavenly light,
So it the fairer body doth procure
To habit in, and it more fairly dight,
With cheerful grace and amiable sight
For, of the soul, the body form doth take,
For soul is form, and doth the body
make" ⁴

Here we find ourselves suddenly not in a critical speculation but in a holy place, and should go very warily and reverently. We stand before the secret of the world, there where Being passes into Appearance and Unity into Variety.

The Universe is the externization of the soul. Wherever the life is, that bursts into appearance around it. Our science is sensual, and therefore superficial. The earth and the heavenly bodies, physics and chemistry, we sensually treat, as if they were self-existent, but these are the retinue of that Being we have "The mighty heaven," said Proclus, "exhibits, in its transfiguration—

³ Jamblichus, Greek philosopher and exponent of Syrian Neoplatonism.

⁴ From Edmund Spenser's "An Hymne in Honour of Beautie."

tions, clear images of the splendor of intellectual perceptions, being moved in conjunction with the unapparent periods of intellectual natures." Therefore science always goes abreast with the just elevation of the man, keeping step with religion and metaphysics, or the state of science is an index of our self-knowledge. Since every thing in nature answers to a moral power, if any phenomenon remains brute and dark it is because the corresponding faculty in the observer is not yet active.

No wonder then, if these waters be so deep, that we hover over them with a religious regard. The beauty of the fable proves the importance of the sense, to the poet, and to all others, or, if you please, every man is so far a poet as to be susceptible of these enchantments of nature, for all men have the thoughts whereof the universe is the celebration. I find that the fascination resides in the symbol. Who loves nature? Who does not? Is it only poets, and men of leisure and cultivation, who live with her? No, but also hunters, farmers, grooms and butchers, though they express their affection in their choice of life and not in their choice of words. The writer wonders what the coachman or the hunter values in riding, in horses and dogs. It is not superficial qualities. When you talk with him he holds these at as slight a rate as you. His worship is sympathetic, he has no definitions, but he is commanded in nature by the living power which he feels to be there present. No imitation or playing of these things would content him, he loves the earnest of the north wind, of rain, of stone and wood and iron. A beauty not explicable is dearer than a beauty which we can see to the end of. It is nature the symbol, nature certifying the supernatural, body overflowed by life which he worships with coarse but sincere rites.

The inwardness and mystery of this attachment drive men of every class to the use of emblems. The schools of poets and philosophers are not more intoxicated with their symbols than the populace with theirs. In our political parties, compute the power

of badges and emblems. See the great ball which they roll from Baltimore to Bunker Hill! In the political processions, Lowell goes in a loom, and Lynn in a shoe, and Salem in a ship. Witness the cider-barrel, the log-cabin, the hickory-stick, the palmetto, and all the cognizances of party. See the power of national emblems. Some stags, lilies, leopards, a crescent, a lion, an eagle, or other figure which came into credit. God knows how, on an old rag of bunting, blowing in the wind on a fort at the ends of the earth, shall make the blood tingle under the rudest or the most conventional exterior. The people fancy they hate poetry, and they are all poets and mystics!

Beyond this universality of the symbolic language, we are apprised of the divineness of this superior use of things, whereby the world is a temple whose walls are covered with emblems, pictures and commandments of the Deity,—in this, that there is no fact in nature which does not carry the whole sense of nature, and the distinctions which we make in events and in affairs, of low and high, honest and base, disappear when nature is used as a symbol. Thought makes everything fit for use. The vocabulary of an omniscient man would embrace words and images excluded from polite conversation. What would be base, or even obscene, to the obscene, becomes illustrious, spoken in a new connection of thought. The piety of the Hebrew prophets purges their grossness. The circumcision is an example of the power of poetry to raise the low and offensive. Small and mean things serve as well as great symbols. The meaner the type by which a law is expressed, the more pungent it is, and the more lasting in the memories of men, just as we choose the smallest box or case in which any needful utensil can be carried. Bare lists of words are found suggestive to an imaginative and excited mind, as it is related of Lord Chatham that he was accustomed to read in Bailey's Dictionary⁵ when he was prepar-

⁵ The fourth edition of Nathan Bailey's dictionary (1728) was long the only one in general use in England.

ing to speak in Parliament The poorest experience is rich enough for all the purposes of expressing thought Why covet a knowledge of new facts? Day and night, house and garden, a few books, a few actions, serve us as well as would all trades and all spectacles We are far from having exhausted the significance of the few symbols we use We can come to use them yet with a terrible simplicity It does not need that a poem should be long Every word was once a poem Every new relation is a new word Also we use defects and deformities to a sacred purpose, so expressing our sense that the evils of the world are such only to the evil eye In the old mythology, mythologists observe, defects are ascribed to divine natures, as lameness to Vulcan, blindness to Cupid, and the like,—to signify exuberances⁶

For as it is dislocation and detachment from the life of God that makes things ugly, the poet, who re-attaches things to nature and the Whole,—re-attaching even artificial things and violation of nature, to nature, by a deeper insight,—disposes very easily of the most disagreeable facts Readers of poetry see the factory-village and the railway, and fancy that the poetry of the landscape is broken up by these, for these works of art are not yet consecrated in their reading, but the poet sees them fall within the great Order not less than the beehive or the spider's geometrical web Nature adopts them very fast into her vital circles, and the gliding train of cars she loves like her own Besides, in a centred mind, it signifies nothing how many mechanical inventions you exhibit Though you add millions, and never so surprising, the fact of mechanics has not gained a grain's weight The spiritual fact remains unalterable, by many or by few particulars, as no mountain is of any appreciable height to break the curve of the sphere A shrewd country-boy goes to the city for the first time, and the complacent citizen is not satisfied with his little wonder It is not that he does not see all the fine houses and know that he never saw such

before, but he disposes of them as easily as the poet finds place for the railway The chief value of the new fact is to enhance the great and constant fact of Life, which can dwarf any and every circumstance, and to which the belt of wampum and the commerce of America are alike

The world being thus put under the mind for verb and noun, the poet is he who can articulate it For though life is great, and fascinates and absorbs, and though all men are intelligent of the symbols through which it is named, yet they cannot originally use them We are symbols and inhabit symbols, workmen, work, and tools, words and things, birth and death, all are emblems, but we sympathize with the symbols, and being infatuated with the economical uses of things, we do not know that they are thoughts The poet, by an ulterior intellectual perception, gives them a power which makes their old use forgotten, and puts eyes and a tongue into every dumb and inanimate object He perceives the independence of the thought on the symbol, the stability of the thought, the accidentancy and fugacity of the symbol As the eyes of Lynceus were said to see through the earth, so the poet turns the world to glass, and shows us all things in their right series and procession For through that better perception he stands one step nearer to things, and sees the flowing or metamorphosis, perceives that thought is multiform, that within the form of every creature is a force impelling it to ascend into a higher form, and following with his eyes the life, uses the forms which express that life, and so his speech flows with the flowing of nature. All the facts of the animal economy, sex, nutriment, gestation, birth, growth, are symbols of the passage of the world into the soul

⁶ The reader will find in this paragraph, as well as in other parts of the essay, a foreshadowing of the work of Walt Whitman, who freely acknowledged, in the early years of his work as a poet, the influence of Emerson

of man, to suffer there a change and reappear a new and higher fact. He uses forms according to the life, and not according to the form. This is true science. The poet alone knows astronomy, chemistry, vegetation and animation, for he does not stop at these facts, but employs them as signs. He knows why the plain or meadow of space was strown with these flowers we call suns and moons and stars, why the great deep is adorned with animals, with men, and gods, for in every word he speaks he rides on them as the horses of thought.

By virtue of this science the poet is the Name- or Language-maker, naming things sometimes after their appearance, sometimes after their essence, and giving to every one its own name and not another's, thereby rejoicing the intellect, which delights in detachment or boundary. The poets made all the words, and therefore language is the archives of history, and, if we must say it, a sort of tomb of the muses. For though the origin of most of our words is forgotten, each word was at first a stroke of genius, and obtained currency because for the moment it symbolized the world to the first speaker and to the hearer. The etymologist finds the deadest word to have been once a brilliant picture. Language is fossil poetry. As the limestone of the continent consists of infinite masses of the shells of animalcules, so language is made up of images or tropes, which now, in their secondary use, have long ceased to remind us of their poetic origin. But the poet names the thing because he sees it, or comes one step nearer to it than any other. This expression or naming is not art, but a second nature, grown out of the first, as a leaf out of a tree. What we call nature is a certain self-regulated motion or change, and nature does all things by her own hands, and does not leave another to baptize her but baptizes herself, and this through the metamorphosis again. I remember that a certain poet described it to me thus.—

Genius is the activity which repairs the decays of things, whether wholly or partly of a material and finite kind. Nature, through all her kingdoms, insures herself. Nobody cares for planting the poor fungus, so she shakes down from the gills of one agaric countless spores, any one of which, being preserved, transmits new billions of spores to-morrow or next day. The new agaric of this hour has a chance which the old one had not. This atom of seed is thrown into a new place, not subject to the accidents which destroyed its parent two rods off. She makes a man, and having brought him to ripe age, she will no longer run the risk of losing this wonder at a blow, but she detaches from him a new self, that the kind may be safe from accidents to which the individual is exposed. So when the soul of the poet has come to ripeness of thought, she detaches and sends away from it its poems or songs,—a fearless, sleepless, deathless progeny, which is not exposed to the accidents of the weary kingdom of time, a fearless, vivacious offspring, clad with wings (such was the virtue of the soul out of which they came) which carry them fast and far, and infix them irrecoverably into the hearts of men. These wings are the beauty of the poet's soul. The songs, thus flying immortal from their mortal parent, are pursued by clamorous flights of censures, which swarm in far greater numbers and threaten to devour them, but these last are not winged. At the end of a very short leap they fall plump down and rot, having received from the souls out of which they came no beautiful wings. But the melodies of the poet ascend and leap and pierce into the deeps of infinite time.

So far the bard taught me, using his freer speech. But nature has a higher end, in the production of new individuals, than security, namely *ascension*, or the passage of the soul into higher forms. I knew in my younger days the sculptor who made the statue of the youth which stands in the

public garden. He was, as I remember, unable to tell directly what made him happy or unhappy, but by wonderful indications he could tell. He rose one day, according to his habit, before the dawn, and saw the morning break, grand as the eternity out of which it came, and for many days after, he strove to express this tranquillity, and lo! his chisel had fashioned out of marble the form of a beautiful youth, Phosphorus, whose aspect is such that it is said all persons who look on it become silent. The poet also resigns himself to his mood, and that thought which agitated him is expressed, but *alter idem*,⁷ in a manner totally new. The expression is organic, or the new type which things themselves take when liberated. As, in the sun, objects paint their images on the retina of the eye, so they, sharing the aspiration of the whole universe, tend to paint a far more delicate copy of their essence in his mind. Like the metamorphosis of things into higher organic forms is their change into melodies. Over everything stands its daemon or soul, and, as the form of the thing is reflected by the eye, so the soul of the thing is reflected by a melody. The sea, the mountain-ridge, Niagara, and every flower-bed, pre-exist, or super-exist, in pre-cantations, which sail like odors in the air, and when any man goes by with an ear sufficiently fine, he overhears them and endeavors to write down the notes without diluting or depraving them. And herein is the legitimation of criticism, in the mind's faith that the poems are a corrupt version of some text in nature with which they ought to be made to tally. A rhyme in one of our sonnets should not be less pleasing than the iterated notes of a seashell, or the resembling difference of a group of flowers. The pairing of the birds is an idyl, not tedious as our idyls are, a tempest is a rough ode, without falsehood or rant, a summer, with its harvest sown, reaped and stored, is an epic song, subordinating how many admirably executed parts. Why should not

the symmetry and truth that modulate these, glide into our spirits, and we participate the invention of nature?

This insight, which expresses itself by what is called Imagination, is a very high sort of seeing, which does not come by study, but by the intellect being where and what it sees, by sharing the path or circuit of things through forms, and so making them translucent to others. The path of things is silent. Will they suffer a speaker to go with them? A spy they will not suffer, a lover, a poet, is the transcendency of their own nature,—him they will suffer. The condition of true naming, on the poet's part, is his resigning himself to the divine *aura* which breathes through forms, and accompanying that.

It is a secret which every intellectual man quickly learns, that beyond the energy of his possessed and conscious intellect he is capable of a new energy (as of an intellect doubled on itself), by abandonment to the nature of things, that beside his privacy of power as an individual man, there is a great public power on which he can draw, by unlocking, at all risks, his human doors, and suffering the ethereal tides to roll and circulate through him, then he is caught up into the life of the Universe, his speech is thunder, his thought is law, and his words are universally intelligible as the plants and animals. The poet knows that he speaks adequately then only when he speaks somewhat wildly, or "with the flower of the mind," not with the intellect used as an organ, but with the intellect released from all service and suffered to take its direction from its celestial life, or as the ancients were wont to express themselves, not with intellect alone but with the intellect inebriated by nectar. As the traveller who has lost his way throws his reins on his horse's neck and trusts to the instinct of the animal to find his road, so must we do with the divine animal who carries us through this world.

⁷ The same thing, but different

For if in any manner we can stimulate this instinct, new passages are opened for us into nature, the mind flows into and through things hardest and highest, and the metamorphosis is possible

This is the reason why bards love wine, mead, narcotics, coffee, tea, opium, the fumes of sandalwood and tobacco, or whatever other procurers of animal exhilaration. All men avail themselves of such means as they can, to add this extraordinary power to their normal powers, and to this end they prize conversation, music, pictures, sculpture, dancing, theatres, travelling, war, mobs, fires, gaming, politics, or love, or science, or animal intoxication,—which are several coarser or finer *quasi-mechanical* substitutes for the true nectar, which is the ravishment of the intellect by coming nearer to the fact. These are auxiliaries to the centrifugal tendency of a man, to his passage out into free space, and they help him to escape the custody of that body in which he is pent up, and of that jail-yard of individual relations in which he is enclosed. Hence a great number of such as were professionally expressers of Beauty, as painters, poets, musicians and actors, have been more than others wont to lead a life of pleasure and indulgence, all but the few who received the true nectar, and, as it was a spurious mode of attaining freedom, as it was an emancipation not into the heavens but into the freedom of baser places, they were punished for that advantage they won, by a dissipation and deterioration. But never can any advantage be taken of nature by a trick. The spirit of the world, the great calm presence of the Creator, comes not forth to the sorceries of opium or of wine. The sublime vision comes to the pure and simple soul in a clean and chaste body. That is not an inspiration, which we owe to narcotics, but some counterfeit excitement and fury. Milton says that the lyric poet may drink wine and live generously, but the epic poet, he who shall sing of the gods and their descent unto men, must drink water out of a wooden bowl.^a For

poetry is not "Devil's wine," but God's wine. It is with this as it is with toys. We fill the hands and nurseries of our children with all manner of dolls, drums and horses, withdrawing their eyes from the plain face and sufficing objects of nature, the sun and moon, the animals, the water and stones, which should be their toys. So the poet's habit of living should be set on a key so low that the common influences should delight him. His cheerfulness should be the gift of the sunlight, the air should suffice for his inspiration, and he should be tipsy with water. That spirit which suffices quiet hearts, which seems to come forth to such from every dry knoll of sere grass, from every pine stump and half-imbedded stone on which the dull March sun shines, comes forth to the poor and hungry, and such as are of simple taste. If thou fill thy brain with Boston and New York, with fashion and covetousness, and wilt stimulate thy jaded senses with wine and French coffee, thou shalt find no radiance of wisdom in the lonely waste of the pine woods.

If the imagination intoxicates the poet, it is not inactive in other men. The metamorphosis excites in the beholder an emotion of joy. The use of symbols has a certain power of emancipation and exhilaration for all men. We seem to be touched by a wand which makes us dance and run about happily, like children. We are like persons who come out of a cave or cellar into the open air. This is the effect on us of tropes, fables, oracles and all poetic forms. Poets are thus liberating gods. Men have really got a new sense, and found within their world another world, or nest of worlds, for, the metamorphosis once seen, we divine that it does not stop. I will not now consider how much this makes the charm of algebra and the mathematics, which also have their tropes, but it is felt in every definition, as when Aristotle defines *space* to be an immovable vessel in

^a The reference is apparently to *Elegia Sexta*, Milton's sixth Latin elegy, ll 55-78

which things are contained,—or when Plato defines a *line* to be a flowing point, or *figure* to be a bound of solid, and many the like. What a joyful sense of freedom we have when Vitruvius⁹ announces the old opinion of artists that no architect can build any house well who does not know something of anatomy. When Socrates, in Charmides, tells us that the soul is cured of its maladies by certain incantations, and that these incantations are beautiful reasons, from which temperance is generated in souls, when Plato calls the world an animal, and Timæus¹⁰ affirms that the plants also are animals, or affirms a man to be a heavenly tree, growing with his root, which is his head, upward, and, as George Chapman, following him, writes,

“So in our tree of man, whose nerve root
Springs in his top,”—¹¹

when Orpheus speaks of hoariness as “that white flower which marks extreme old age,” when Ptolemy calls the universe the statue of the intellect, when Chaucer, in his praise of “Gentilesse,” compares good blood in mean condition to fire, which, though carried to the darkest house betwixt this and the mount of Caucasus, will yet hold its natural office and burn as bright as if twenty thousand men did it behold, when John saw, in the Apocalypse, the ruin of the world through evil, and the stars fall from heaven as the fig tree casteth her untimely fruit, when Æsop reports the whole catalogue of common daily relations through the masquerade of birds and beasts,—we take the cheerful hint of the immortality of our essence and its versatile habit and escapes, as when the gypsies say of themselves, “It is in vain to hang them, they cannot die.”

The poets are thus liberating gods. The ancient British bards had for the title of their order, “Those who are free throughout the world.” They are free, and they make free. An imaginative book renders us much more service at first, by stimulating us through its tropes, than afterward when

we arrive at the precise sense of the author. I think nothing is of any value in books excepting the transcendental and extraordinary. If a man is inflamed and carried away by his thought, to that degree that he forgets the authors and the public and heeds only this one dream which holds him like an insanity, let me read his paper, and you may have all the arguments and histories and criticism. All the value which attaches to Pythagoras, Paracelsus, Cornelius Agrippa, Cardan, Kepler, Swedenborg, Schelling, Oken,¹² or any other who introduces questionable facts into his cosmogony, as angels, devils, magic, astrology, palmistry, mesmerism, and so on, is the certificate we have of departure from routine, and that here is a new witness. That also is the best success in conversation, the magic of liberty, which puts the world like a ball in our hands. How cheap even the liberty then seems, how mean to study, when an emotion communicates to the intellect the power to sap and upheave nature, how great the perspective! Nations, times, systems, enter and disappear like threads in tapestry of large figure and many colors, dream delivers us to dream, and while the drunkenness lasts we will sell our bed, our philosophy, our religion, in our opulence.

There is good reason why we should prize this liberation. The fate of the poor shepherd, who, blinded and lost in the snow-storm, perishes in a drift within a few feet of his cottage door, is an emblem

⁹ Marcus Vitruvius Pollio, Roman architect and engineer of the first century, B. C.

¹⁰ Charmides and Timæus participate in those Dialogues of Plato named after them respectively.

¹¹ From the Dedication of Chapman's Homer.

¹² Among the ancient and modern philosophers in this list are interpolated three occultists—Philippus Aureolus Paracelsus (1493?-1541), Swiss alchemist, Cornelius Heinrich Agrippa (1486?-1535), German writer on magic, and Geronimo Cardano (1501-1576) Italian astrologer.

of the state of man. On the brink of the waters of life and truth, we are miserably dying. The inaccessibleness of every thought but that we are in, is wonderful. What if you come near to it, you are as remote when you are nearest as when you are farthest. Every thought is also a prison, every heaven is also a prison. Therefore we love the poet, the inventor, who in any form, whether in an ode or in an action or in looks and behavior, has yielded us a new thought. He unlocks our chains and admits us to a new scene.

This emancipation is dear to all men, and the power to impart it, as it must come from greater depth and scope of thought, is a measure of intellect. Therefore all books of the imagination endure, all which ascend to that truth that the writer sees nature beneath him, and uses it as his exponent. Every verse or sentence possessing this virtue will take care of its own immortality. The religions of the world are the ejaculations of a few imaginative men.

But the quality of the imagination is to flow, and not to freeze. The poet did not stop at the color or the form, but read their meaning, neither may he rest in this meaning, but he makes the same objects exponents of his new thought. Here is the difference betwixt the poet and the mystic, that the last nails a symbol to one sense, which was a true sense for a moment, but soon becomes old and false. For all symbols are fluxional, all language is vehicular and transitive, and is good, as ferries and horses are, for conveyance, not as farms and houses are, for homestead. Mysticism consists in the mistake of an accidental and individual symbol for an universal one. The morning-redness happens to be the favorite meteor to the eyes of Jacob Behmen,¹³ and comes to stand to him for truth and faith, and, he believes, should stand for the same realities to every reader. But the first reader prefers as naturally the symbol of a mother and child, or a gardener and his bulb, or a jeweller polishing a

gem. Either of these, or of a myriad more, are equally good to the person to whom they are significant. Only they must be held lightly, and be very willingly translated into the equivalent terms which others use. And the mystic must be steadily told,—All that you say is just as true without the tedious use of that symbol as with it. Let us have a little algebra, instead of this trite rhetoric,—universal signs, instead of these village symbols,—and we shall both be gainers. The history of hierarchies seems to show that all religious error consisted in making the symbol too stark and solid, and was at last nothing but an excess of the organ of language.

Swedenborg, of all men in the recent ages, stands eminently for the translator of nature into thought. I do not know the man in history to whom things stood so uniformly for words. Before him the metamorphosis continually plays. Everything on which his eye rests, obeys the impulses of moral nature. The figs become grapes whilst he eats them. When some of his angels affirmed a truth, the laurel twig which they held blossomed in their hands. The noise which at a distance appeared like gnashing and thumping, on coming nearer was found to be the voice of disputants. The men in one of his visions, seen in heavenly light, appeared like dragons, and seemed in darkness, but to each other they appeared as men, and when the light from heaven shone into their cabin, they complained of the darkness, and were compelled to shut the window that they might see.

There was this perception in him which makes the poet or seer an object of awe and terror, namely that the same man or society of men may wear one aspect to themselves and their companions, and a different aspect to higher intelligences. Certain priests, whom he describes as conversing very learnedly together, appeared to the children who were at some distance,

¹³ Jakob Bohme (1575-1624), German mystic

like dead horses, and many the like misappearances. And instantly the mind inquires whether these fishes under the bridge, yonder oxen in the pasture, those dogs in the yard, are immutably fishes, oxen and dogs, or only so appear to me, and perchance to themselves appear upright men, and whether I appear as a man to all eyes. The Brahmins and Pythagoras propounded the same question, and if any poet has witnessed the transformation he doubtless found it in harmony with various experiences. We have all seen changes as considerable in wheat and caterpillars. He is the poet and shall draw us with love and terror, who sees through the flowing vest the firm nature, and can declare it.

I look in vain for the poet whom I describe. We do not with sufficient plainness or sufficient profoundness address ourselves to life, nor dare we chaunt our own times and social circumstance. If we filled the day with bravery, we should not shrink from celebrating it. Time and nature yield us many gifts, but not yet the timely man, the new religion, the reconciler, whom all things await. Dante's praise is that he dared to write his autobiography in colossal cipher, or into universality.* We have yet had no genius in America, with tyrannous eye, which knew the value of our incomparable materials, and saw, in the barbarism and materialism of the times, another carnival of the same gods whose picture he so much admires in Homer, then in the Middle Age, then in Calvinism. Banks and tariffs, the newspaper and caucus, Methodism and Unitarianism, are flat and dull to dull people, but rest on the same foundations of wonder as the town of Troy and the temple of Delphi, and are as swiftly passing away. Our log-rolling, our stumps and then politics, our fisheries, our Negroes and Indians, our boats and our repudiations, the wrath of rogues and the pusillanimity of honest men, the northern trade, the southern planting, the western clearing, Oregon and Texas, are yet unsung. Yet America is a poem in our

eyes, its ample geography dazzles the imagination, and it will not wait long for metres. If I have not found that excellent combination of gifts in my countrymen which I seek, neither could I aid myself to fix the idea of the poet by reading now and then in Chalmers's collection of five centuries of English poets.¹⁴ These are wits more than poets, though there have been poets among them. But when we adhere to the ideal of the poet, we have our difficulties even with Milton and Homer. Milton is too literary, and Homer too literal and historical.

But I am not wise enough for a national criticism, and must use the old largeness a little longer, to discharge my errand from the muse to the poet concerning his art.

Art is the path of the creator to his work. The paths or methods are ideal and eternal, though few men ever see them, not the artist himself for years, or for a lifetime, unless he come into the conditions. The painter, the sculptor, the composer, the epic rhapsodist, the orator, all partake one desire, namely to express themselves symmetrically and abundantly, not dwarfishly and fragmentarily. They found or put themselves in certain conditions, as, the painter and sculptor before some impressive human figures, the orator into the assembly of the people, and the others in such scenes as each has found exciting to his intellect, and each presently feels the new desire. He hears a voice, he sees a beckoning. Then he is apprised, with wonder, what herds of dæmons hem him in. He can no more rest, he says, with the old painter, "By God, it is in me and must go forth of me." He pursues a beauty, half seen, which flies before him. The poet pours out verses in every solitude. Most of the things he says are conventional, no doubt, but by and by he says something which is original and beautiful. That charms him. He would say nothing else.

¹⁴ Alexander Chalmers (1759-1834) edited *Works of the English Poets from Chaucer to Cowper* in 21 volumes in 1810.

but such things In our way of talking we say, "That is yours, this is mine," but the poet knows well that it is not his, that it is as strange and beautiful to him as to you, he would fain hear the like eloquence at length Once having tasted this immortal ichor, he cannot have enough of it, and as an admirable creative power exists in these intellections, it is of the last importance that these things get spoken What a little of all we know is said! What drops of all the sea of our science are bailed up! and by what accident it is that these are exposed, when so many secrets sleep in nature! Hence the necessity of speech and song, hence these throbs and heart-beatings in the orator, at the door of the assembly, to the end namely that thought may be ejaculated as Logos, or Word

Doubt not, O poet, but persist Say, "It is in me, and shall out" Stand there, balked and dumb, stuttering and stammering, hissed and hooted, stand and strive, until at last rage draw out of thee that *dream*-power which every night shows thee is thine own, a power transcending all limit and privacy, and by virtue of which a man is the conductor of the whole river of electricity Nothing walks, or creeps, or grows, or exists, which must not in turn arise and walk before him as exponent of his meaning Comes he to that power, his genius is no longer exhaustible All the creatures by pairs and by tribes pour into his mind as into a Noah's ark, to come forth again to people a new world This is like the stock of air for our respiration or for the combustion of our fireplace, not a measure of gallons, but the entire atmosphere if wanted And therefore the rich poets, as Homer, Chaucer, Shakspeare, and Raphael, have obviously no limits to their works except the limits of their lifetime, and resemble a mirror carried through the street, ready to render an image of every created thing

O poet! a new nobility is conferred in groves and pastures, and not in castles or by the sword-blade any longer The conditions are hard, but equal Thou shalt

leave the world, and know the muse only Thou shalt not know any longer the times, customs, graces, politics, or opinions of men, but shalt take all from the muse For the time of towns is tolled from the world by funereal chimes, but in nature the universal hours are counted by succeeding tribes of animals and plants, and by growth of joy on joy God wills also that thou abdicate a manifold and duplex life, and that thou be content that others speak for thee Others shall be thy gentlemen and shall represent all courtesy and worldly life for thee, others shall do the great and resounding actions also Thou shalt lie close hid with nature, and canst not be afforded to the Capitol or the Exchange The world is full of renunciations and apprenticeships, and this is thine, thou must pass for a fool and a churl for a long season This is the screen and sheath in which Pan has protected his well-beloved flower, and thou shalt be known only to thine own, and they shall console thee with tenderest love And thou shalt not be able to rehearse the names of thy friends in thy verse, for an old shame before the holy ideal And this is the reward, that the ideal shall be real to thee, and the impressions of the actual world shall fall like summer rain, copious, but not troublesome to thy invulnerable essence Thou shalt have the whole land for thy park and manor, the sea for thy bath and navigation, without tax and without envy, the woods and the rivers thou shalt own, and thou shalt possess that wherein others are only tenants and boarders Thou true land-lord! sea-lord! air-lord! Wherever snow falls or water flows or birds fly, wherever day and night meet in twilight, wherever the blue heaven is hung by clouds or sown with stars, wherever are forms with transparent boundaries, wherever are outlets into celestial space, wherever is danger, and awe, and love,—there is Beauty, plenteous as rain, shed for thee, and though thou shouldst walk the world over, thou shalt not be able to find a condition inopportune or ignoble

MONTAIGNE
[1850]

EVERY fact is related on one side to sensation, and, on the other, to morals. The game of thought is, on the appearance of one of these two sides, to find the other, given the upper, to find the under side. Nothing so thin, but has these two faces, and, when the observer has seen the obverse, he turns it over to see the reverse. Life is a pitching of this penny,—heads or tails. We never tire of this game, because there is still a slight shudder of astonishment at the exhibition of the other face, at the contrast of the two faces. A man is flushed with success, and bethinks himself what this good luck signifies. He drives his bargain in the street, but it occurs, that he also is bought and sold. He sees the beauty of a human face, and searches the cause of that beauty, which must be more beautiful. He builds his fortunes, maintains the laws, cherishes his children, but he asks himself, why? and whereto? This head and this tail are called, in the language of philosophy, Infinite and Finite, Relative and Absolute, Apparent and Real, and many fine names beside.

Each man is born with a predisposition to one or the other of these sides of nature, and it will easily happen that men will be found devoted to one or the other. One class has the perception of difference, and is conversant with facts and surfaces, cities and persons, and the bringing certain things to pass,—the men of talent and action. Another class have the perception of identity, and are men of faith and philosophy, men of genius.

Each of these riders drives too fast. Plotinus believes only in philosophers, Fenelon, in saints, Pindar and Byron, in poets. Read the haughty language in which Plato and the Platonists speak of all men who are not devoted to their own shining abstractions: other men are rats and mice. The literary class is usually proud and exclusive. The correspondence of Pope and Swift describes mankind around them as

monsters, and that of Goethe and Schiller, in our own time, is scarcely more kind.

It is easy to see how this arrogance comes. The genius is a genius by the first look he casts on any object. Is his eye creative? Does he not rest in angles and colors, but beholds the design,—he will presently undervalue the actual object. In powerful moments, his thought has dissolved the works of art and nature into their causes, so that the works appear heavy and faulty. He has a conception of beauty, which the sculptor cannot embody. Picture, statue, temple, railroad, steam-engine, existed first in an artist's mind, without flaw, mistake, or friction, which impair the executed models. So did the church, the state, college, court, social circle, and all the institutions. It is not strange that these men, remembering what they have seen and hoped of ideas, should affirm disdainfully the superiority of ideas. Having at some time seen that the happy soul will carry all the arts in power, they say, Why cumber ourselves with superfluous realizations? and, like dreaming beggars, they assume to speak and act as if these values were already substantiated.

On the other part, the men of toil and trade and luxury,—the animal world, including the animal in the philosopher and poet also,—and the practical world, including the painful drudgeries which are never excused to philosopher or poet any more than to the rest,—weigh heavily on the other side. The trade in our streets believes in no metaphysical causes, thinks nothing of the force which necessitated traders and a trading planet to exist, no, but sticks to cotton, sugar, wool, and salt. The ward meetings, on election days, are not softened by any misgiving of the value of these ballotings. Hot life is streaming in a single direction. To the men of this world, to the animal strength and spirits, to the men of practical power, while immersed in it, the man of ideas appears out of his reason. They alone have reason.

Things always bring their own philosophy

with them, that is, prudence. No man acquires property without acquiring with it a little arithmetic, also. In England, the richest country that ever existed, property stands for more, compared with personal ability, than in any other. After dinner, a man believes less, demes more verities, have lost some charm. After dinner, arithmetic is the only science ideas are disturbing, incendiary, follies of young men, repudiated by the solid portion of society, and a man comes to be valued by his athletic and animal qualities. Spence relates, that Mr. Pope was with Sir Godfrey Kneller, one day, when his nephew, a Guinea trader, came in. "Nephew," said Sir Godfrey, "you have the honor of seeing the two greatest men in the world." "I don't know how great men you may be," said the Guinea man, "but I don't like your looks. I have often bought a much better than both of you, all muscles and bones, for ten guineas."¹ Thus, the men of the senses revenge themselves on the professors, and repay scorn for scorn. The first had leaped to conclusions not yet ripe, and say more than is true, the others make themselves merry with the philosopher, and weigh man by the pound. They believe that mustard bites the tongue, and pepper is hot, friction-matches are incendiary, revolvers to be avoided, and suspenders hold up pantaloons, that there is much sentiment in a chest of tea, and a man will be eloquent, if you give him good wine. Are you tender and scrupulous,—you must eat more mince-pie. They hold that Luther had milk in him when he said,

"Wer nicht hebt Wein, Weib, und Gesang,
Der bleibt ein Narr sein Leben lang,"²

and when he advised a young scholar, perplexed with foreordination and free-will, to get well drunk. "The nerves," says Cabanis,³ "they are the man." My neighbor, a jolly farmer, in the tavern bar-room, thinks that the use of money is sure and speedy spending. "for his part," he says, "he puts his down his neck, and gets the good of it".

The inconvenience of this way of thinking is, that it runs into indifferentism, and then into disgust. Life is eating us up. We shall be fables presently. Keep cool. It will be all one a hundred years hence. Life's well enough, but we shall be glad to get out of it, and they will all be glad to have us. Why should we fret and drudge? Our meat will taste to-morrow as it did yesterday, and we may at last have had enough of it. "Ah," said my languid gentleman at Oxford, "there's nothing new or true,—and no matter."

With a little more bitterness, the cynic moans our life is like an ass led to market by a bundle of hay being carried before him. He sees nothing but the bundle of hay. "There is so much trouble in coming into the world," said Lord Bolingbroke, "and so much more, as well as meanness, in going out of it, that 'tis hardly worth while to be here at all." I know a philosopher of this kidney,⁴ who was accustomed briefly to sum up his experience of human nature in saying, "Mankind is a damned rascal," and the natural corollary is pretty sure to follow,—"The world lives by humbug, and so will I."

The abstractionist and the materialist thus mutually exasperating each other, and the scoffer expressing the worst of materialism, there arises a third party to occupy the middle ground between these two, the sceptic, namely. He finds both wrong by being in extremes. He labors to plant his feet, to be the beam of the balance. He will not go beyond his card. He sees the one-sidedness of these men of the street, he will not be a Gibeonite, he stands for the intellectual faculties,

¹ Joseph Spence (1699-1768) was a friend of Alexander Pope and a famous anecdotist. Sir Godfrey Kneller (1646-1723) was an eminent portrait painter.

² Who loves not wine, woman, and song
Remains a fool his whole life long.

³ Pierre Jean Georges Cabanis (1757-1809) French physician and philosopher.

⁴ The reference is to a laboring man who was a neighbor of Emerson's.

a cool head, and whatever serves to keep it cool, no unadvised industry, no unrewarded self-devotion, no loss of the brains in toil. Am I an ox, or a dray?—You are both in extremes, he says. You that will have all solid, and a world of piglead, deceive yourselves grossly. You believe yourselves rooted and grounded on adamant, and yet, if we uncover the last facts of our knowledge, you are spinning like bubbles in a river, you know not whither or whence, and you are bottomed and capped and wrapped in delusions.

Neither will he be betrayed to a book, and wrapped in a gown.⁵ The studious class are their own victims: they are thin and pale, their feet are cold, their heads are hot, the night is without sleep, the day a fear of interruption,—pallor, squalor, hunger, and egotism. If you come near them, and see what conceits they entertain,—they are abstractionists, and spend their days and nights in dreaming some dream, in expecting the homage of society to some precious scheme built on a truth, but destitute of proportion in its presentment, of justness in its application, and of all energy of will in the schemer to embody and vitalize it.

But I see plainly, he says, that I cannot see. I know that human strength is not in extremes, but in avoiding extremes. I, at least, will shun the weakness of philosophizing beyond my depth. What is the use of pretending to powers we have not? What is the use of pretending to assurances we have not, respecting the other life? Why exaggerate the power of virtue? Why be an angel before your time? These stings, wound up too high, will snap. If there is a wish for immortality, and no evidence, why not say just that? If there are conflicting evidences, why not state them? If there is not ground for a candid thinker to make up his mind, yea or nay,—why not suspend the judgment? I weary of these dogmatizers. I tire of these hacks of routine, who deny the dogmas. I neither affirm nor deny. I stand here to try the case. I am here to consider, σκεπτείν, to con-

sider how it is. I will try to keep the balance true. Of what use to take the chair, and glibly rattle off theories of society, religion, and nature, when I know that practical objections lie in the way, insurmountable by me and by my mates? Why so talkative in public, when each of my neighbors can pin me to my seat by arguments I cannot refute? Why pretend that life is so simple a game, when we know how subtle and illusive the Proteus is? Why think to shut up all things in your narrow coop, when we know there are not one or two only, but ten, twenty, a thousand things, and unlike? Why fancy that you have all the truth in your keeping? There is much to say on all sides.

Who shall forbid a wise scepticism, seeing that there is no practical question on which anything more than an approximate solution can be had? Is not marriage an open question, when it is alleged, from the beginning of the world, that such as are in the institution wish to get out, and such as are out wish to get in? And the reply of Socrates, to him who asked whether he should choose a wife, still remains reasonable, "that, whether he should choose one or not, he would repent it." Is not the state a question? All society is divided in opinion on the subject of the state. Nobody loves it, great numbers dislike it, and suffer conscientious scruples to allegiance; and the only defence set up, is the fear of doing worse in disorganizing. Is it otherwise with the church? Or, to put any of the questions which touch mankind nearest,—shall the young man aim at a leading part in law, in politics, in trade? It will not be pretended that a success in either of these kinds is quite coincident with what is best and inmost in his mind. Shall he, then, cutting the stays that hold him fast to the social state, put out to sea with no guidance but his genius? There is much to say on both sides. Remember the open question.

⁵ A reference to George Herbert's poem "Affliction."

"Thou didst betray me to a lingering book,
And wrapt me in a gown."

between the present order of "competition," and the friends of "attractive and associated labor." The generous minds embrace the proposition of labor shared by all, it is the only honesty, nothing else is safe. It is from the poor man's hut alone, that strength and virtue come and yet, on the other side, it is alleged that labor impairs the form, and breaks the spirit of man, and the laborers cry unanimously, 'We have no thoughts' Culture, how indispensable! I cannot forgive you the want of accomplishments, and yet, culture will instantly impair that chiefest beauty of spontaneousness. Excellent is culture for a savage, but once let him read in the book, and he is no longer able not to think of Plutarch's heroes. In short, since true fortitude of understanding consists "in not letting what we know be embarrassed by what we do not know," we ought to secure those advantages which we can command, and not risk them by clutching after the airy and unattainable. Come, no chimeras! Let us go abroad, let us mix in affairs, let us learn, and get, and have, and climb. "Men are a sort of moving plants, and, like trees, receive a great part of their nourishment from the air. If they keep too much at home, they pine." Let us have a robust, manly life, let us know what we know, for certain, what we have, let it be solid, and seasonable, and our own. A world in the hand is worth two in the bush. Let us have to do with real men and women, and not with skipping ghosts.

This, then, is the right ground of the sceptic,—this of consideration, of self-containing, not at all of unbelief, not at all of universal denying, nor of universal doubting,—doubting even that he doubts, least of all, of scoffing and profligate jeering at all that is stable and good. These are no more his moods than are those of religion and philosophy. He is the considerer, the prudent, taking in sail, counting stock, husbanding his means, believing that a man has too many enemies, than that he can afford to be his own foe, that we cannot give ourselves too many advantages, in this

unequal conflict, with powers so vast and unweariable ranged on one side, and this little, conceited, vulnerable popinjay that a man is, bobbing up and down into every danger, on the other. It is a position taken up for better defence, as of more safety, and one that can be maintained, and it is one of more opportunity and range as, when we build a house, the rule is to set it not too high nor too low, under the wind, but out of the dirt.

The philosophy we want is one of fluxions and mobility. The Spartan and Stoic schemes are too stark and stiff for our occasion. A theory of Saint John, and of nonresistance, seems, on the other hand, too thin and aerial. We want some coat woven of elastic steel, stout as the first, and limber as the second. We want a ship in these billows we inhabit. An angular, dogmatic house would be rent to chips and splinters, in this storm of many elements. No, it must be tight, and fit to the form of man, to live at all, as a shell must dictate the architecture of a house founded on the sea. The soul of man must be the type of our scheme, just as the body of man is the type after which a dwelling-house is built. Adaptiveness is the peculiarity of human nature. We are golden averages, volitant stabilities, compensated or periodic errors, houses founded on the sea. The wise sceptic wishes to have a near view of the best game, and the chief players, what is best in the planet, art and nature, places and events, but mainly men. Everything that is excellent in mankind—a form of grace, an arm of iron, lips of persuasion, a brain of resources, every one skilful to play and win—he will see and judge.

The terms of admission to this spectacle, are, that he have a certain solid and intelligible way of living of his own, some method of answering the inevitable needs of human life, proof that he has played with skill and success, that he has evinced the temper, stoutness, and the range of qualities which, among his contemporaries and countrymen, entitle him to fellowship and trust. For, the secrets of life are not

shown except to sympathy and likeness. Men do not confide themselves to boys, or coxcombs, or pedants, but to their peers. Some wise limitation, as the modern phrase is, some condition between the extremes, and having itself a positive quality, some stark and sufficient man, who is not salt or sugar, but sufficiently related to the world to do justice to Paris or London, and, at the same time, a vigorous and original thinker, whom cities cannot overawe, but who uses them,—is the fit person to occupy this ground of speculation.

These qualities meet in the character of Montaigne. And yet, since the personal regard which I entertain for Montaigne may be unduly great, I will, under the shield of this prince of egotists, offer, as an apology for electing him as the representative of scepticism, a word or two to explain how my love began and grew for this admirable gossip.

A single odd volume of Cotton's⁶ translation of the *Essays* remained to me from my father's library, when a boy. It lay long neglected, until, after many years, when I was newly escaped from college, I read the book, and procured the remaining volumes. I remember the delight and wonder in which I lived with it. It seemed to me as if I had myself written the book, in some former life, so sincerely it spoke to my thought and experience. It happened, when in Paris, in 1833, that, in the cemetery of Père la Chaise, I came to a tomb of Auguste Collignon, who died in 1830, aged sixty-eight years, and who, said the monument, "lived to do right, and had formed himself to virtue on the *Essays* of Montaigne." Some years later, I became acquainted with an accomplished English poet, John Sterling,⁷ and, in prosecuting my correspondence, I found that, from a love of Montaigne, he had made a pilgrimage to his château, still standing near Castellan, in Périgord, and, after two hundred and fifty years, had copied from the walls of his library the inscriptions which Montaigne had written there. That *Journal* of Mr Sterling's, published in the

Westminster Review, Mr Hazlitt has reprinted in the *Prolegomena* to his edition of the *Essays*. I heard with pleasure that one of the newly discovered autographs of William Shakspeare was in a copy of Florio's translation of Montaigne. It is the only book which we certainly know to have been in the poet's library. And, oddly enough, the duplicate copy of Florio, which the British Museum purchased, with a view of protecting the Shakspeare autograph (as I was informed in the Museum), turned out to have the autograph of Ben Jonson in the fly-leaf. Leigh Hunt relates of Lord Byron, that Montaigne was the only great writer of past times whom he read with avowed satisfaction. Other coincidences, not needful to be mentioned here, concurred to make this old Gascon still new and immortal for me.

In 1571, on the death of his father, Montaigne, then thirty-eight years old, retired from the practice of law, at Bordeaux, and settled himself on his estate. Though he had been a man of pleasure, and sometimes a courtier, his studious habits now grew on him, and he loved the compass, staidness, and independence of the country gentleman's life. He took up his economy in good earnest, and made his farms yield the most downright and plain dealing, and abhorring to be deceived or to deceive, he was esteemed in the country for his sense and probity. In the civil wars of the League,⁸ which converted every house into a fort, Montaigne kept his gates open, and his house without defence. All parties freely came and went, his courage and honor being universally esteemed. The neighboring lords and gentry brought jew-

⁶ Charles Cotton (1630-1687) English poet, translated Montaigne's *Essays* in 1685.

⁷ This was an epistolary acquaintance. John Sterling (1806-1844) was a poet and essayist who organized a famous literary club, died young, and was celebrated in a biography by Thomas Carlyle.

⁸ The Holy League, formed in 1572 under Henry of Guise to advance Catholic interests.

els and papers to him for safe-keeping Gibbon reckons, in these bigoted times, but two men of liberality in France,—Henry IV and Montaigne

Montaigne is the frankest and honestest of all writers His French freedom runs into grossness, but he has anticipated all censure by the bounty of his own confessions In his times, books were written to one sex only, and almost all were written in Latin, so that, in a humorist, a certain nakedness of statement was permitted, which our manners, of a literature addressed equally to both sexes, do not allow But, though a Biblical plainness, coupled with a most uncanonical levity, may shut his pages to many sensitive readers, yet the offence is superficial He parades it he makes the most of it nobody can think or say worse of him than he does He pretends to most of the vices, and, if there be any virtue in him, he says, it got in by stealth There is no man, in his opinion, who has not deserved hanging five or six times, and he pretends no exception in his own behalf "Five or six as ridiculous stories," too, he says, "can be told of me, as of any man living" But, with all this really superfluous frankness, the opinion of an invincible probity grows into every reader's mind

"When I the most strictly and religiously confess myself, I find that the best virtue I have has in it some tincture of vice, and I am afraid that Plato, in his purest virtue (I, who am as sincere and perfect a lover of virtue of that stamp as any other whatever), if he had listened, and laid his ear close to himself, would have heard some jarring sound of human mixture, but faint and remote, and only to be perceived by himself."

Here is an impatience and fastidiousness at color or pretence of any kind He has been in courts so long as to have conceived a furious disgust at appearances, he will indulge himself with a little cursing and swearing; he will talk with sailors and gypsies, use flash and street ballads he has stayed in-doors till he is deadly sick,

he will to the open air, though it rain bullets He has seen too much of gentlemen of the long robe, until he wishes for cannibals, and is so nervous, by factitious life, that he thinks, the more barbarous man is, the better he is He likes his saddle You may read theology, and grammar, and metaphysics elsewhere Whatever you get here, shall smack of the earth and of real life, sweet, or smart, or stinging He makes no hesitation to entertain you with the records of his disease, and his journey to Italy is quite full of that matter He took and kept this position of equilibrium Over his name, he drew an emblematic pair of scales, and wrote *Que sçans je?*⁹ under it As I look at his effigy opposite the title-page, I seem to hear him say, "You may play old Poz,¹⁰ if you will, you may rail and exaggerate,—I stand here for truth, and will not, for all the states, and churches, and revenues, and personal reputations of Europe, overstate the dry fact, as I see it, I will rather mumble and prose about what I certainly know,—my house and barns, my father, my wife, and my tenants, my old lean bald pate, my knives and forks, what meats I eat, and what drinks I prefer, and a hundred straws just as ridiculous,—than I will write, with a fine crow-quill, a fine romance I like gray days, and autumn and winter weather I am gray and autumnal myself, and think an undress, and old shoes that do not pinch my feet, and old friends who do not constrain me, and plain topics where I do not need to strain myself and pump my brains, the most suitable Our condition as men is risky and ticklish enough One cannot be sure of himself and his fortune an hour, but he may be whisked off into some pitiable or ridiculous plight Why should I vapor and play the philosopher, instead of ballasting, the best I can, this dancing balloon? So, at least, I live within compass, keep myself ready for action, and

⁹ What do I know?

¹⁰ To "play old Poz" is a colloquialism indicating too positive an attitude

can shoot the gulf, at last, with decency. If there be anything farcical in such a life, the blame is not mine: let it lie at fate's and nature's door."

The *Essays*, therefore, are an entertaining soliloquy on every random topic that comes into his head, treating everything without ceremony, yet with masculine sense. There have been men with deeper insight, but, one would say, never a man with such abundance of thoughts: he is never dull, never insincere, and has the genius to make the reader care for all that he cares for.

The sincerity and marrow of the man reaches to his sentences. I know not anywhere the book that seems less written. It is the language of conversation transferred to a book. Cut these words and they would bleed; they are vascular and alive. One has the same pleasure in it that we have in listening to the necessary speech of men about their work, when any unusual circumstance gives momentary importance to the dialogue. For blacksmiths and teamsters do not trip in their speech; it is a shower of bullets. It is Cambridge men who correct themselves, and begin again at every half-sentence, and, moreover, will pun, and refine too much, and swerve from the matter to the expression. Montaigne talks with shrewdness, knows the world, and books, and himself, and uses the positive degree: never shrieks, or protests, or prays: no weakness, no convulsion, no superlative. Does not wish to jump out of his skin, or play any antics, or annihilate space or time, but is stout and solid, tastes every moment of the day, likes pain, because it makes him feel himself, and realize things; as we pinch ourselves to know that we are awake. He keeps the plain, he rarely mounts or sinks, likes to feel solid ground, and the stones underneath. His writing has no enthusiasms, no aspiration, contented, self-respecting, and keeping the middle of the road. There is but one exception,—in his love for Socrates. In speaking of him, for once his cheek flushes, and his style rises to passion.

Montaigne died of a quinsy, at the age of sixty, in 1592. When he came to die, he caused the mass to be celebrated in his chamber. At the age of thirty-three, he had been married. "But," he says, "might I have had my own will, I would not have married Wisdom herself, if she would have had me: but 'tis to much purpose to evade it, the common custom and use of life will have it so. Most of my actions are guided by example, not choice." In the hour of death, he gave the same weight to custom. *Que sçais je?* What do I know?

This book of Montaigne the world has indorsed, by translating it into all tongues, and printing seventy-five editions of it in Europe: and that, too, a circulation somewhat chosen, namely, among courtiers, soldiers, princes, men of the world, and men of wit and generosity.

Shall we say that Montaigne has spoken wisely, and given the right and permanent expression of the human mind, on the conduct of life?

We are natural believers. Truth, or the connection between cause and effect, alone interests us. We are persuaded that a thread runs through all things: all worlds are strung on it, as beads: and men, and events, and life, come to us, only because of that thread: they pass and repass, only that we may know the direction and continuity of that line. A book or statement which goes to show that there is no line, but random and chaos, a calamity out of nothing, a prosperity and no account of it, a hero born from a fool, a fool from a hero,—dispirits us. Seen or unseen, we believe the tie exists. Talent makes counterfeit ties; genius finds the real ones. We hearken to the man of science, because we anticipate the sequence in natural phenomena which he uncovers. We love whatever affirms, connects, preserves, and dislike what scatters or pulls down. One man appears whose nature is to all men's eyes: conserving and constructive: his presence supposes a well-ordered society, agriculture, trade, large institutions, and empire.

If these did not exist, they would begin to exist through his endeavors. Therefore, he cheers and comforts men, who feel all this in him very readily. The nonconformist and the rebel say all manner of unanswerable things against the existing republic, but discover to our sense no plan of house or state of their own. Therefore, though the town, and state, and way of living, which our counsellor contemplated, might be a very modest or musty prosperity, yet men rightly go for him, and reject the reformer, so long as he comes only with axe and crow-bar.

But though we are natural conservers and causationists, and reject a sour, dumpish unbelief, the sceptical class, which Montaigne represents, have reason, and every man, at some time, belongs to it. Every superior mind will pass through this domain of equilibration,—I should rather say, will know how to avail himself of the checks and balances in nature, as a natural weapon against the exaggeration and formalism of bigots and blockheads.

Scepticism is the attitude assumed by the student in relation to the particulars which society adores, but which he sees to be reverend only in their tendency and spirit. The ground occupied by the sceptic is the vestibule of the temple. Society does not like to have any breath of question blown on the existing order. But the interrogation of custom at all points is an inevitable stage in the growth of every superior mind, and is the evidence of its perception of the flowing power which remains itself in all changes.

The superior mind will find itself equally at odds with the evils of society, and with the projects that are offered to relieve them. The wise sceptic is a bad citizen, no conservative, he sees the selfishness of property, and the drowsiness of institutions. But neither is he fit to work with any democratic party that ever was constituted, for parties wish every one committed, and he penetrates the popular patriotism. His politics are those of the "Soul's Errand" of Sir Walter Raleigh,

or of Krishna, in the Bhagavat, "There is none who is worthy of my love or hatred," whilst he sentences law, physic, divinity, commerce, and custom. He is a reformer yet he is no better member of the philanthropic association. It turns out that he is not the champion of the operative, the pauper, the prisoner, the slave. It stands in his mind, that our life in this world is not of quite so easy interpretation as churches and school-books say. He does not wish to take ground against these benevolences, to play the part of devil's attorney, and blazon every doubt and sneer that darkens the sun for him. But he says, There are doubts.

I mean to use the occasion, and celebrate the calendar-day of our St. Michel de Montaigne, by counting and describing these doubts or negations. I wish to ferret them out of their holes, and sun them a little. We must do with them as the police do with old rogues, who are shown up to the public at the marshal's office. They will never be so formidable, when once they have been identified and registered. But I mean honestly by them,—that justice shall be done to their terrors. I shall not take Sunday objections, made up on purpose to be put down. I shall take the worst I can find, whether I can dispose of them, or they of me.

I do not press the scepticism of the materialist. I know the quadruped opinion will not prevail. 'Tis of no importance what bats and oxen think. The first dangerous symptom I report is, the levity of intellect, as if it were fatal to earnestness to know much. Knowledge is the knowing that we cannot know. The dull pray, the geniuses are light mockers. How respectable is earnestness on every platform! but intellect kills it. Nay, San Carlo,¹¹ my subtle and admirable friend, one of the most penetrating of men, finds that all direct ascension, even of lofty piety, leads to this ghastly insight, and sends back the votary or—

¹¹ Charles K. Newcomb, a mystic and a member of the Brook Farm community.

hanged My astonishing San Carlo thought the lawgivers and saints infected They found the ark empty, saw, and would not tell, and tried to choke off their approaching followers, by saying, 'Action, action, my dear fellows, is for you' Bad as was to me this detection by San Carlo, this frost in July, this blow from a bride, there was still a worse, namely, the cloy or satiety of the saints In the mount of vision, ere they have yet risen from their knees, they say, We discover that thus our homage and beatitude is partial and deformed we must fly for relief to the suspected and reviled Intellect, to the Understanding, the Meplustopheles, to the gymnastics of talent

This is hobgoblin the first, and, though it has been the subject of much elegy, in our nineteenth century, from Byron, Goethe, and other poets of less fame, not to mention many distinguished private observers,—I confess it is not very affecting to my imagination, for it seems to concern the shattering of baby-houses and crockery-shops What flutters the church of Rome, or of England, or of Geneva, or of Boston, may yet be very far from touching any principle of faith I think that the intellect and moral sentiment are unanimous, and that, though philosophy extirpates bugbears, yet it supplies the natural checks of vice, and polarity to the soul I think that the wiser a man is, the more stupendous he finds the natural and moral economy, and lifts himself to a more absolute reliance

There is the power of moods, each setting at naught all but its own tissue of facts and beliefs There is the power of complexions, obviously modifying the dispositions and sentiments The beliefs and unbeliefs appear to be structural, and, as soon as each man attains the poise and vivacity which allow the whole machinery to play, he will not need extreme examples, but will rapidly alternate all opinions in his own life Our life is March weather, savage and serene in one hour We go forth austere, dedicated, believing in the iron

links of Destiny, and will not turn on our heel to save our life but a book or a bust, or only the sound of a name, shoots a spark through the nerves, and we suddenly believe in will my finger-ring shall be the seal of Solomon fate is for imbeciles all is possible to the resolved mind Presently, a new experience gives a new turn to our thoughts commonsense resumes its tyranny we say, 'Well, the army, after all, is the gate to fame, manners, and poetry and, look you,—on the whole, selfishness plants best, prunes best, makes the best commerce, and the best citizen' Are the opinions of a man on right and wrong, on fate and causation, at the mercy of a broken sleep or an indigestion? Is his belief in God and Duty no deeper than a stomach evidence? And what guaranty for the permanence of his opinions? I like not the French celerity,—a new church and state once a week This is the second negation, and I shall let it pass for what it will As far as it asserts rotation of states of mind, I suppose it suggests its own remedy, namely, in the record of larger periods What is the mean of many states, of all the states? Does the general voice of ages affirm any principle, or is no community of sentiment discoverable in distant times and places? And when it shows the power of self-interest, I accept that as part of the divine law, and must reconcile it with aspiration the best I can

The word Fate, or Destiny, expresses the sense of mankind, in all ages,—that the laws of the world do not always befriend, but often hurt and crush us Fate, in the shape of *Kunde* or nature, grows over us like grass We paint Time with a scythe, Love and Fortune, blind, and Destiny, deaf We have too little power of resistance against this ferocity which champs us up What front can we make against these unavoidable, victorious, maleficent forces? What can I do against the influence of Race, in my history? What can I do against hereditary and constitutional habits, against scrofula, lymph, impotence, against climate, against barbarism, in my country?

I can reason down or deny everything, except this perpetual Belly feed he must and will, and I cannot make him respectable

But the main resistance which the affirmative impulse finds, and one including all others, is in the doctrine of the Illusionists. There is a painful rumor in circulation, that we have been practised upon in all the principal performances of life, and free agency is the emptiest name. We have been sopped and drugged with the air, with food, with woman, with children, with sciences, with events, which leave us exactly where they found us. The mathematics, 'tis complained, leave the mind where they find it, so do all sciences, and so do all events and actions. I find a man who has passed through all the sciences, the churl he was, and through all the offices, learned, civil, and social, can detect the child. We are not the less necessitated to dedicate life to them. In fact, we may come to accept it as the fixed rule and theory of our state of education, that God is a substance, and his method is illusion. The Eastern sages owned the goddess Yogamdra, the great illusory energy of Vishnu, by whom, as utter ignorance, "the whole world is beguiled."

Or, shall I state it thus?—The astonishment of life is, the absence of any appearance of reconciliation between the theory and practice of life. Reason, the prized reality, the Law, is apprehended, now and then, for a serene and profound moment, amidst the hubbub of cares and works which have no direct bearing on it,—is then lost, for months or years, and again found, for an interval, to be lost again. If we compute it in time, we may, in fifty years, have half a dozen reasonable hours. But what are these cares and works the better? A method in the world we do not see, but this parallelism of great and little, which never react on each other, nor discover the smallest tendency to converge. Experiences, fortunes, governings, readings, writings, are nothing to the purpose,

as when a man comes into the room, it does not appear whether he has been fed on yams or buffalo,—he has contrived to get so much bone and fibre as he wants, out of rice or out of snow. So vast is the disproportion between the sky of law and the pismire of performance under it, that, whether he is a man of worth or a sot, is not so great a matter as we say. Shall I add, as one juggle of this enchantment, the stunning non-intercourse law which makes cooperation impossible? The young spirit pants to enter society. But all the ways of culture and greatness lead to solitary imprisonment. He has been often balked. He did not expect a sympathy with his thought from the village, but he went with it to the chosen and intelligent, and found no entertainment for it, but mere misapprehension, distaste, and scoffing. Men are strangely mistimed and misapplied, and the excellence of each is an inflamed individualism which separates him more.

There are these, and more than these, diseases of thought, which our ordinary teachers do not attempt to remove. Now shall we, because a good nature inclines us to virtue's side, say, There are no doubts,—and lie for the right? Is life to be led in a brave or in a cowardly manner? and is not the satisfaction of the doubts essential to all manliness? Is the name of virtue to be a barrier to that which is virtue? Can you not believe that a man of earnest and burly habit may find small good in tea, essays, and catechism, and want a rougher instruction, want men, labor, trade, farming, war, hunger, plenty, love, hatred, doubt, and terror, to make things plain to him, and has not he a right to insist on being convinced in his own way? When he is convinced, he will be worth the pains.

Belief consists in accepting the affirmations of the soul, unbelief, in denying them. Some minds are incapable of scepticism. The doubts they profess to entertain are rather a civility or accommodation to the common discourse of their company. They may well give themselves leave to speculate, for they are secure of a return.

Once admitted to the heaven of thought, they see no relapse into night, but infinite invitation on the other side. Heaven is within heaven, and sky over sky, and they are encompassed with divinities. Others there are, to whom the heaven is brass, and it shuts down to the surface of the earth. It is a question of temperament, or of more or less immersion in nature. The last class must needs have a reflex or parasite faith, not a sight of realities, but an instinctive reliance on the seers and believers of realities. The manners and thoughts of believers astonish them, and convince them that these have seen something which is hid from themselves. But then sensual habit would fix the believer to his last position, whilst he as inevitably advances, and presently the unbeliever, for love of belief, burns the believer.

Great believers are always reckoned infidels, impracticable, fantastic, atheistic, and really men of no account. The spiritualist finds himself driven to express his faith by a series of scepticisms. Charitable souls come with their projects, and ask his cooperation. How can he hesitate? It is the rule of mere comity and courtesy to agree where you can, and to turn your sentence with something auspicious, and not freezing and sinister. But he is forced to say, 'O, these things will be as they must be: what can you do? These particular griefs and crimes are the foliage and fruit of such trees as we see growing. It is vain to complain of the leaf or the berry: cut it off, it will bear another just as bad. You must begin your cure lower down.' The generousities of the day prove an intractable element for him. The people's questions are not his, their methods are not his, and, against all the dictates of good-nature, he is driven to say, he has no pleasure in them.

Even the doctrines dear to the hope of man, of the divine Providence, and of the immortality of the soul, his neighbors cannot put the statement so that he shall affirm it. But he denies out of more faith, and not less. He denies out of honesty. He

had rather stand charged with the imbecility of scepticism, than with untruth. I believe, he says, in the moral design of the universe, it exists hospitably for the weal of souls, but your dogmas seem to me caricatures: why should I make believe them? Will any say, this is cold and infidel? The wise and magnanimous will not say so. They will exult in his far-sighted good-will, that can abandon to the adversary all the ground of tradition and common belief, without losing a jot of strength. It sees to the end of all transgression. George Fox saw "that there was an ocean of darkness and death, but withal, an infinite ocean of light and love which flowed over that of darkness."

The final solution in which scepticism is lost, is, in the moral sentiment, which never forfeits its supremacy. All moods may be safely tried, and their weight allowed to all objections: the moral sentiment as easily outweighs them all, as any one. This is the drop which balances the sea. I play with the miscellany of facts, and take those superficial views which we call scepticism, but I know that they will presently appear to me in that order which makes scepticism impossible. A man of thought must feel the thought that is parent of the universe: that the masses of nature do undulate and flow. This faith avails to the whole emergency of life and objects. The world is saturated with deity and with law. He is content with just and unjust, with sots and fools, with the triumph of folly and fraud. He can behold with serenity the yawning gulf between the ambition of man and his power of performance, between the demand and supply of power, which makes the tragedy of all souls.

Charles Fournier announced that "the attractions of man are proportioned to his destinies," in other words, that every desire predicts its own satisfaction. Yet, all experience exhibits the reverse of this; the incompetency of power is the universal grief of young and ardent minds. They accuse the divine providence of a certain

parsimony It has shown the heaven and earth to every child, and filled him with a desire for the whole, a desire raging, infinite, a hunger, as of space to be filled with planets, a cry of famine, as of devils for souls Then for the satisfaction,—to each man is administered a single drop, a bead of dew of vital power, *per day*,—a cup as large as space, and one drop of the water of life in it Each man woke in the morning, with an appetite that could eat the solar system like a cake, a spirit for action and passion without bounds, he could lay his hand on the morning star he could try conclusions with gravitation or chemistry, but, on the first motion to prove his strength,—hands, feet, senses, gave away, and would not serve him He was an emperor deserted by his states, and left to whistle by himself, or thrust into a mob of emperors, all whistling and still the sirens sang, "The attractions are proportioned to the destinies" In every house, in the heart of each maiden, and of each boy, in the soul of the soaring saint, this chasm is found,—between the largest promise of ideal power, and the shabby experience

The expansive nature of truth comes to our succor, elastic, not to be surrounded Man helps himself by larger generalizations The lesson of life is practically to generalize, to believe what the years and the centuries say against the hours, to resist the usurpation of particulars, to penetrate to their catholic sense Things seem to say one thing, and say the reverse The appearance is immoral, the result is moral Things seem to tend downward, to justify despondency, to promote rogues, to defeat the just, and, by knaves, as by martyrs, the just cause is carried forward Although knaves win in every political struggle, although society seems to be delivered over from the hands of one set of criminals into the hands of another set of criminals, as fast as the government is changed, and the march of civilization is a train of felonies, yet, general ends are somehow answered We see, now, events forced on, which seem to retard or retro-

grade the civility of ages But the world-spirit is a good swimmer, and storms and waves cannot drown him He snaps his finger at laws and so, throughout history, heaven seems to affect low and poor means Through the years and the centuries, through evil agents, through toys and atoms, a great and beneficent tendency irresistibly streams

Let a man learn to look for the permanent in the mutable and fleeting, let him learn to bear the disappearance of things he was wont to reverence, without losing his reverence, let him learn that he is here, not to work, but to be worked upon, and that, though abyss open under abyss, and opinion displace opinion, all are at last contained in the Eternal Cause

"If my bark sink, 'tis to another sea" ¹²

From

EMERSON'S "JOURNALS"

[1909-1914]

Jan 25, 1820

THESE pages are intended at their commencement to contain a record of new thoughts (when they occur), for a receptacle of all the old ideas that partial but peculiar peepings at antiquity can furnish or furbish, for tablet to save the wear and tear of weak Memory, and, in short, for all the various purposes and utility, real or imaginary, which are usually comprehended under that comprehensive title *Common Place Book*

June 7, 1820

Have been of late reading patches of Barrow¹ and Ben Jonson, and what the object—not curiosity? no—nor expectation of edification intellectual or moral—but merely because they are authors where

vigorous phrases and quaint, peculiar words and expressions may be sought and found, the better 'to rattle out the battle of my thoughts'

February, 1822

I have not much cause, I sometimes think, to wish my Alma Mater well, personally, I was not often highly flattered by success, and was every day mortified by my own ill fate or ill conduct. Still, when I went today to the ground where I had had the brightest thoughts of my life and filled up the little measure of my knowledge, and had felt sentimental for a time, and poetical for a time, and had seen many fine faces, and traversed many fine walks, and enjoyed much pleasant, learned, or friendly society,—I felt a crown of pleasant thoughts, as I went posting about from place to place, and room to chapel.

Cambridge, undated

All things are double one against another, said Solomon. The whole of what we know is a system of compensations. Every defect in one manner is made up in another. Every suffering is rewarded, every sacrifice is made up, every debt is paid.

Charleston, April 6, 1827

A new event is added to the quiet history of my life. I have connected myself by friendship to a man² who with as ardent a love of truth as that which animates me, with a mind surpassing mine in the variety of its research, and sharpened and strengthened to an energy for action to which I have no pretension, by advantages of birth and practical connexion with mankind beyond almost all men in the world,—is, yet, that which I had ever supposed only a creature of the imagination—a consistent Atheist,—and a disbeliever in the existence, and, of course, in the immortality of the soul. My faith in these points is strong and I trust, as I live, indestructible. Meantime I love and honour this intrepid doubter. His soul is noble, and his virtue, as the virtue of a Sadducee must always be, is sublime.

Alexandria, May 19, 1826

Mr Adams³ went out a swimming the other day into the Potomac, and went near to a boat which was coming down the river. Some rude blackguards were in it, who, not knowing the character of the swimmer, amused themselves with laughing at his bald head as it popped up and down in the water, and, as they drew nearer, threatened to crack open his round pate if he came nigh them. The President of the United States was, I believe, compelled to waive the point of honour and seek a more retired bathing-place.

Concord, March 4, 1831

The Religion that is afraid of science dishonours God and commits suicide.

Boston, May 16, 1832

Shakspeare's creations indicate no sort of anxiety to be understood. There is the Cleopatra, an irregular, unfinished, glorious, sinful character, sink or swim, there she is, and not one in the thousand of his readers apprehends the noble dimensions of the heroine. Then Ariel, Hamlet, and all, all done in sport with the free, daring pencil of a master of the World. He leaves his children with God.

Florence, April 29, 1833

How like an archangel's tent is this great Cathedral of many-coloured marble set down in the midst of the city, and by its side its wondrous Campanile! I took a hasty glance at the gates of the Baptistery which Angelo said ought to be the gates of Paradise, 'digne chudere il Paradiso,' and then at his own David, and hastened to the Tribune and to the Pitti Palace. I saw the statue that enchants the world. And truly the Venus deserves to be visited from far. It is not adequately represented by the plaster casts, as the Apollo and the Laocoon are. I must go again and see this statue. Then I went round this cabinet and

gallery and galleries till I was well-nigh 'dazzled and drunk with beauty' I think no man has an idea of the powers of painting until he has come hither. Why should painters study at Rome? Here, here

Florence, May 21, 1833

I like the sayers of No better than the sayers of Yes

Liverpool, Sep 1, 1833

I thank the Great God who has led me through this European scene, this last schoolroom in which he has pleased to instruct me, from Malta's isle, through Sicily, through Italy, through Switzerland, through France, through England, through Scotland, in safety and pleasure, and has now brought me to the shore and the ship that steers westward. He has shown me the men I wished to see,—Landor, Coleridge, Carlyle, Wordsworth, he has thereby comforted and confirmed me in my convictions. Many things I owe to the sight of these men. I shall judge more justly, less timidly, of wise men forevermore. To be sure not one of these is a mind of the very first class, but what the intercourse with each of these suggests is true of intercourse with better men, that they never fill the ear—fill the mind—no, it is an idealized portrait which always we draw of them. Upon an intelligent man, wholly a stranger to their names, they would make in conversation no deep impression, none of a world-filling fame,—they would be remembered as sensible, well-read, earnest men, not more. Especially are they all deficient, all these four,—in different degrees, but all deficient,—in insight into religious truth. They have no idea of that species of moral truth which I call the first philosophy.

The comfort of meeting men of genius such as these is that they talk sincerely, they feel themselves to be so rich that they are above the meanness of pretending to knowledge which they have not, and they frankly tell you what puzzles them. But Carlyle—Carlyle is so amiable that I love him.

Boston, Feb 19, 1834

A seaman in the coach told the story of an old spermwhale, which he called a white whale, which was known for many years by the whalers as Old Tom, and who rushed upon the boats which attacked him, and crushed the boats to small chips in his jaws, the men generally escaping by jumping overboard and being picked up. A vessel was fitted out at New Bedford, he said, to take him. And he was finally taken somewhere off Payta Head by the Winslow or the Essex.⁴

Newton, June 18, 1834

Webster's speeches seem to be the utmost that the unpoetic West has accomplished or can. We all lean on England, scarce a verse, a page, a newspaper, but is writ in imitation of English forms, our very manners and conversation are traditional, and sometimes the life seems dying out of all literature, and this enormous paper currency of Words is accepted instead. I suppose the evil may be cured by this rank rabble party, the Jacksonism of the country, heedless of English and of all literature—a stone cut out of the ground without hands,—they may root out the hollow dilettantisms of our cultivation in the coarsest way, and the newborn may begin again to frame their own world with greater advantage.

Concord, Nov 15, 1834

Hail to the quiet fields of my fathers! Not wholly unattended by supernatural friendship and favor, let me come hither. Bless my purposes as they are simple and virtuous.

Henceforth I design not to utter any speech, poem or book that is not entirely and peculiarly my work. I will say at public lectures, and the like, those things which I have meditated for their own sake, and not for the first time with a view to that occasion.

⁴ Cf. discussion of the origins of *Moby Dick*, under "Herman Melville," in Book I, Part I.

Nov 26, 1834

The shepherd or the beggar in his red cloak little knows what a charm he gives to the wide landscape that charms you on the mountaintop and whereof he makes the most agreeable feature, and I no more the part my individuality plays in the All⁵

June 22, 1836

Mr Alcott has been here with his Olympian dreams He is a world-builder Evermore he toils to solve the problem, whence is the world? The point at which he prefers to begin is the mystery of the Birth of a child I tell him it is idle for him to affect to feel an interest in the compositions of any one else Particulars—particular thoughts, sentences, facts even—cannot interest him, except as for a moment they take their place as a ray from his orb The Whole,—Nature proceeding from himself, is what he studies But he loses, like other sovereigns, great pleasures by reason of his grandeur I go to Shakspear, Goethe, Swift, even to Tennyson, submit myself to them, become merely an organ of hearing, and yield to the law of their being I am paid for thus being nothing by an entire new mind, and thus, a Proteus, I enjoy the universe through the powers and organs of a hundred different men But Alcott cannot delight in Shakspear, cannot get near him And so with all things What is characteristic also, he cannot recall one word or part of his own conversation or of any one's, let the expression be never so happy He made here some majestic utterances, but so inspired me that even I forgot the words often

April 26, 1838

Yesterday afternoon I went to the Cliff with Henry Thoreau Warm, pleasant, misty weather, which the great mountain

amphitheatre seemed to drink in with gladness A crow's voice filled all the miles of air with sound A bird's voice, even a piping frog, enlivens a solitude and makes world enough for us At night I went out into the dark and saw a glimmering star and heard a frog, and Nature seemed to say, Well do not these suffice? Here is a new scene, a new experience Ponder it, Emerson, and not like the foolish world, hanker after thunders and multitudes and vast landscapes, the sea or Niagara

Oct 18, 1839

Lectures—In these golden days it behooves me once more to make my annual inventory of the world For the five last years I have read each winter a new course of lectures in Boston, and each was my creed and confession of faith Each told all I thought of the past, the present and the future Once more I must renew my work, and I think only once in the same form, though I see that he who thinks he does something for the last time ought not to do it at all Yet my objection is not to the thing, but with the form and the concatenation of errors called society to which I still consent, until my plumes be grown, makes even a duty of this concession also So I submit to sell tickets again

June 24, 1840

Montaigne—The language of the street is always strong What can describe the folly and emptiness of scolding like the word *jawing*? I feel too the force of the double negative, though clean contrary to our grammar rules And I confess to some pleasure from the stinging rhetoric of a rattling oath in the mouth of truckmen and teamsters How laconic and brisk it is by the side of a page of the *North American Review* Cut these words and they would bleed, they are vascular and alive, they walk and run Moreover they who speak them have this elegance, that they do not trip in their speech It is a shower of

⁵ See Emerson's poem "Each and All"

bullets, whilst Cambridge men and Yale men correct themselves and begin again at every half sentence

I know nobody among my contemporaries except Carlyle who writes with any sinew and vivacity comparable to Plutarch and Montaigne. Yet always this profane swearing and bar-room wit has salt and fire in it. I cannot now read Webster's speeches. Fuller and Browne⁶ and Milton are quick, but the list is soon ended. Goethe seems to be well alive, no pedant. Luther too.

October 24, 1841

I told Garrison that I thought he must be a very young man, or his time very heavy on his hands, who can afford to think much and talk much about the foibles of his neighbors, or 'denounce,' and play 'the son of thunder' as he called it.

October, undated

Thou shalt read Homer, Æschylus, Sophocles, Euripides, Aristophanes, Plato, Proclus, Plotinus, Jamblichus, Porphyry, Aristotle, Virgil, Plutarch, Apuleius, Chaucer, Dante, Rabelais, Montaigne, Cervantes, Shakspeare, Jonson, Ford, Chapman, Beaumont and Fletcher, Bacon, Marvell, More, Milton, Moliere, Swedenborg, Goethe.

August, 1843, undated

Webster quite fills our little town, and I doubt if I shall get settled down to writing until he is well gone from the county.

Elizabeth Hoar⁷ says that she talked with him, as one likes to go behind the Niagara Falls, so she tried to look into those famed caverns of eyes, and see how deep they were, and the whole man was magnificent. Mr Choate told her that he should not sleep for a week when a cause like this was pending, but that when they met in Boston on Saturday afternoon to talk over the matter, the rest of them were wide awake, but Mr Webster went fast asleep amidst the consultation.

It seems to me the Quixotism of Criticisms to quarrel with Webster because he

has not this or that fine evangelical property. He is no saint, but the wild olive wood, ungrafted yet by grace, but according to his lights a very true and admirable man. His expensiveness seems to be necessary to him. Were he too prudent a Yankee it would be a sad deduction from his magnificence. I only wish he would never truckle, I do not care how much he spends.

May 24, 1847

The days come and go like muffled and veiled figures sent from a distant friendly party, but they say nothing, and if we do not use the gifts they bring, they carry them as silently away.⁸

Jones Very,⁹ who thought it an honour to wash his own face, seems to me less insane than men who hold themselves cheap.

⁶ Thomas Fuller (1608-1661) and Sir Thomas Browne (1605-1682), English essayists.

⁷ Daughter of famous Concord lawyer and legislator, Samuel Hoar. Rufus Choate (1799-1859) was U S Senator from Massachusetts at the time Webster, under attack on personal and political grounds, had recently resigned as Secretary of State.

⁸ Cf. Emerson's poem "Days."

⁹ Transcendental poet and essayist (1813-1880).

June 24, 1863

In reading Henry Thoreau's journal, I am very sensible of the vigour of his constitution. That oaken strength which I noted whenever he walked, or worked, or surveyed wood-lots, the same unhesitating hand with which a field-labourer accosts a piece of work, which I should shun as a waste of strength, Henry shows in his literary task. He has muscle, and ventures on and performs feats which I am forced to decline. In reading him, I find the same thought, the same spirit that is in me, but he takes a step beyond, and illustrates by excellent images that which I should have conveyed in a sleepy generality. 'Tis as if I went into a gymnasium, and saw youths leap, climb, and swing with a force unapproachable,—though their feats are only continuations of my initial grapplings and jumps.

May 24, 1864

Yesterday, May 23, we buried Hawthorne in Sleepy Hollow, in a pomp of sunshine and verdure, and gentle winds. James Freeman Clarke read the service in the church and at the grave. Longfellow, Lowell, Holmes, Agassiz, Hoar, Dwight, Whipple, Norton, Alcott, Hillard, Fields, Judge Thomas, and I attended the hearse as pall-bearers. Franklin Pierce was with the family. The church was copiously decorated with white flowers delicately arranged. The corpse was unwillingly shown,—only a few moments to this company of his friends. But it was noble and serene in its aspect,—nothing amiss,—a calm and powerful head. A large company filled the church and the grounds of the cemetery. All was so bright and quiet that pain or mourning was hardly suggested, and Holmes said to me that it looked like a happy meeting.

Clarke in the church said that Hawthorne

had done more justice than any other to the shades of life, shown a sympathy with the crime in our nature, and, like Jesus, was the friend of sinners.

I thought there was a tragic element in the event, that might be more fully rendered,—in the painful solitude of the man, which, I suppose, could not longer be endured, and he died of it.

I have found in his death a surprise and disappointment. I thought him a greater man than any of his works betray, that there was still a great deal of work in him, and that he might one day show a purer power. Moreover, I have felt sure of him in his neighborhood, and in his necessities of sympathy and intelligence,—that I could well wait his time,—his unwillingness and caprice,—and might one day conquer a friendship. It would have been a happiness, doubtless to both of us, to have come into habits of unreserved intercourse. It was easy to talk with him,—there were no barriers,—only, he said so little, that I talked too much, and stopped only because, as he gave no indications, I feared to exceed. He showed no egotism or self-assertion, rather a humility, and, at one time, a fear that he had written himself out. One day, when I found him on the top of his hill, in the woods, he paced back the path to his house, and said, 'This path is the only remembrance of me that will remain.' Now it appears that I waited too long.

March 15, 1870

My new book sells faster, it appears, than either of its foregoers. This is not for its merit, but only shows that old age is a good advertisement. Your name has been seen so often that your book must be worth buying.

1817 ~ *Henry David Thoreau* ~ 1862

I

ONE evening in late July, 1846, Henry Thoreau left his little one-room house at the edge of Walden Pond and set off for the nearby village of Concord, Massachusetts. Walking was an important part of the life of this young man, and shoes are an important part of walking, his errand this evening was to pick up a shoe which he had left with the Concord cobbler a few days earlier. But he did not get the mended shoe that night, for as soon as he reached the main street of the village he was accosted by Constable Sam Staples, presented with a warrant for his arrest, and conducted, quietly and directly, to the jail.

Thoreau has made Concord and its environs memorable forever in literature, but his own standing in his home community was not very high at this time. He was commonly regarded as a shiftless and even dangerous character—a graduate of Harvard, to be sure, and a friend of Emerson and Alcott, but a ne'er-do-well. Not long before, he and a fishing companion had accidentally set fire to some woods, and much damage had been done before volunteer firemen from Concord had subdued the flames. His arrest was based not upon this escapade, however, but upon his refusal to pay his poll tax.

The Mexican War, then in progress, was regarded by many as no more than an attempt to gain more territory for the extension of the slave system. Thoreau had resolved not to "pay a tax to, or recognize the authority of, the state which buys and sells men, women, and children at the door of its senate-house." So here was the young man in jail, a martyr to the rugged individualism of his convictions, spending an interesting night in conversation with a fellow prisoner awaiting trial for barn-burning. But relatives paid his tax that night, and the next morning Thoreau was released. Sam Staples later reported he was "mad as the devil" when he walked out of the jail. He got his mended shoe and went back to his huckleberry crop on the edge of Walden Pond. His martyrdom had proved abortive.

II

This troublesome individualist was of mixed French and Scotch ancestry. His grandfather Thoreau had come to Boston from the Channel Islands just before the Revolution and had done fairly well in trade. More intellectual was the heritage from the maternal side, Grandfather Dunbar was a Harvard graduate and Congregational minister. Henry was born in Concord in 1817. By that time his father had proved a failure at shop-keeping, and for the next

few years tried various shifts—farming, keeping a school in Boston, trading with the Indians at Bangor

In 1823 the family returned to Concord, falling back upon the help of the Dunbar relatives. Here they took up pencil-making, which proved to be a moderately successful vocation and which led, many years later, to a profitable small business in the manufacture of fine graphite. But this was after Henry had reached middle age, during his youth the Thoreaus were poor, without being actually needy. Henry had a brother, to whom he was very closely attached, and two sisters. With aunts and uncles and occasional boarders, the Thoreau house was often full to overflowing. The curse of the family, as of so many New Englanders in those days, was tuberculosis, which had brought down powerful Grandfather Thoreau and which was to cause the death of Henry's sister Helen and finally of Henry himself.

The boyhood of Henry Thoreau was happy. What if his family was hard-pressed at times? Henry had the woods and swamps and river, the hills and small lakes (called ponds), of his native town to rove over. He was a hunter and fisherman, and learned the habits of the ducks, partridges, and wild pigeons, the rabbits and muskrats. In later life he was fond of telling of the pleasures of his boyhood. "My life was ecstasy," he wrote. His first schooling was in the local "academy," a private school, and at sixteen he was sent off to Harvard.

His poverty, together with his own sensitiveness and the robust independence which his Scotch blood and his outdoor life had already developed, seems to have set him apart from his fellow students. Only the scrimping and saving of his family and his own frugal habits made college possible for him at all. But one thing he did learn there, and that was how to make the most of a college library. He had become an avid reader even before he entered Harvard. For example, he had read through Chalmers' *English Poets*, which left him with a lasting affection for the verse writers of the seventeenth century and some of the Elizabethans. When Thoreau was given a leave of absence in the midst of his college course in order to earn some money with which to finish it, he was fortunate to get a school at Canton, then the home of Orestes A. Brownson. He lived at Brownson's home and was stimulated by that lionine liberal in many an evening's conversation about the new German thought and the Transcendentalists and Emerson. The two studied German together. "The morning of a new *Lebenstag*" for him, Thoreau later called this interlude in his college course.

Thoreau was graduated in 1837. His commencement oration was on "The Commercial Spirit"—object of his attack throughout life. "The order of things should be somewhat reversed," he said, "the seventh should be man's day of toil, wherein to earn his living by the sweat of his brow, and the other six his Sabbath of the affections and the Soul, in which to range this widespread garden and drink in the soft influences and sublime revelations of Nature."

III

After his graduation, Thoreau got a job teaching the town school at Concord. He announced at the start that he would spare the rod, at the end of two weeks a school-committeeman stalked in and told him to beat the scholars "or the school would spoil." That night Thoreau kept six of them after school, flogged them, and then resigned. Later he and his brother John opened a private school in the village and conducted it on more agreeable principles for three years.

Thoreau began his journal shortly after his graduation from Harvard. This daily record of his ideas, observations, reading, and inspirations he continued all his life. Published incompletely in fourteen volumes, it is Thoreau's basic literary production, both in the sense that he drew upon it for his other works, and that it furnishes a continuous record of the true, the inner Thoreau.

It was his journal that first brought our young school-teacher to the attention of Ralph Waldo Emerson, Concord's most famous resident. Mrs. Emerson's sister was a boarder at the Thoreau house, she came to share the family interest in Henry's journal and eventually showed parts of it to her brother-in-law. Henry was thereupon invited to call, and he soon became a frequent visitor at the Emerson house. "I delight much in my young friend," wrote Emerson in his own journal, "who seems to have as free and erect a mind as any I have ever met." Thoreau was accepted as a member of the informal Transcendental Club, and at its gatherings met A. Bronson Alcott, Margaret Fuller, Theodore Parker, George Ripley, and others whose names must always be connected with that extraordinary and fertile movement known as New England Transcendentalism.

Already Thoreau was spiritually a member of this group. Like many another young man, he had been deeply affected by Emerson's first book *Nature*, published during his senior year at Harvard, and had doubtless heard Emerson read "The American Scholar" as the Phi Beta Kappa address at his commencement. His brief but fruitful contact with Brownson had set him to reading the German idealists and probing the doctrine of "intuition." By this time he had fully and thoroughly accepted that doctrine, so perfectly compressed in Emerson's statement: "We lie in the lap of an immense intelligence, which makes us receivers of its truth." Again.

Meantime, whilst the doors of the temple stand open night and day before every man, and the oracles of this truth cease never, it is guarded by one stern condition, this, namely, it is an intuition. It cannot be received at second hand. Truly speaking, it is not instruction but provocation that I can receive from another soul. What he announces I must find true in me, or reject.

Thus Emerson, and thus, indeed, Thoreau.

But those who are tempted to think, as some have thought in the past,

that Thoreau was merely "Emerson's man"—that he was robbing Emerson's orchard, to repeat the misjudgment of Lowell—ought to read again the above quotation from the Divinity School Address. Emerson provoked Thoreau, he did not instruct him. What Emerson announced, Thoreau either found true in himself or he rejected.

This is precisely what Emerson meant in his reference to Thoreau's "free and erect mind." The quality of individualism which had been first developed in the Middlesex woods and swamps, and which had been stiffened by his Harvard experience, found a congenial philosophy and a foundation in the Transcendental doctrine of "intuition." Further, the idea of nature as another manifestation of that "divine intelligence" which at the same time informed the mind of man, thus relating the spirit of Henry Thoreau to that of the pine tree, gave a new and necessary meaning to his woodland excursions and studies.

But the thoroughness of Thoreau's acceptance of Transcendentalism, with both its emphasis on individualism (or self-reliance) and on the polarity of idea and fact, made Thoreau difficult for his friends. He was not only "prickly," to use the adjective so often applied to him, but he was tremendously in earnest in his determination to *live* the ideology which was now making such a stir in the world. In this fierce determination we have the key to much of his life. It sets him off from those to whom Transcendentalism was only a fascinating intellectual plaything, and even from those who stopped short of practical acceptance of its implications. Let us keep this in mind as we review his adult life.

IV

For many years Thoreau seems to have been a Young Man in Search of a Career. Of course, every young man is searching for a career. Most of them are looking for a way of life increasingly rich in money and influence. Thoreau completely and sincerely rejected the money goal, asking only enough to enable him to pursue a career of observation, contemplation, and study. So far as influence (or fame) was concerned, here again he asked only enough to make him secure in a career devoted to the same three objectives. But how to get the little money, the little attention needed for such a life as he desired, without sacrificing that life itself? He could teach school, and he did for three years, but found it dull and unrewarding. "Pray, what things interest me at present? A long, soaking rain, the drops trickling down the stubble, while I lay drenched on a last year's bed of wild oats, by the side of some bare hill, ruminating. Such things are of moment." Or he could always make pencils. He could make pencils, or even do heavy farm labor, only in an emergency, however, he needed an employment that would give him six days a week to invite his soul, as he had

said in his Commencement speech. This invitation to his soul was "of moment," he must come to grips with himself. "How shall I help myself? By withdrawing into the garret and associating with spiders and mice, determining to meet myself face to face sooner or later."

What he did do when his school petered out was to become a kind of man-of-all-work at Emerson's place in Concord. Emerson was often away lecturing, and someone was needed to do the chores and help with the children, especially since Mrs. Emerson was a semi-invalid. So Henry moved into the room at the head of the stairs, and made it his home for two years (and for a briefer period later). There was talk with Emerson and with those who frequented his house. There was opportunity for an intimate acquaintance with Mrs. Emerson, for whom he came to have a deep affection. There was time for the study of Hindu literature and the writing of some articles for the *Dial*. Whatever he did, there was always time for his journal.

He had begun to study the philosophers of India while in college. Now in *The Laws of Menu* and the *Bhagavat-Gita* he found himself stimulated anew by the knowledge that thinkers of an old race had long ago found a way of life in the search for a reality beneath the shell of surface appearances. The oriental doctrines which he now read with such passionate interest fortified a plan which he already had in mind to retire somewhere in the woods and live simply with high thoughts.

Two of the score of items which Thoreau contributed to the *Dial*, the short-lived quarterly edited by Margaret Fuller, George Ripley, and Emerson, were groups of brief selections—one from *The Laws of Menu* and the other sayings from Confucius. The *Dial* was important to Thoreau because it gave him the feeling of being a man of letters. That is what he was, and from this time forward, writing for publication seemed to open before him, not wholly as a career, but quite as much the means to a career. But he was to find the financial rewards of authorship elusive, to say the least.

Also literary was another means of earning what little he needed to live on—lecturing. The first lyceums were self-improvement groups organized in Massachusetts and Connecticut villages to study whatever was new and important, but especially geology. They were spontaneous adult education clubs. They made natural history collections, held discussions and debates, and heard papers read. Soon they began inviting scholars from neighboring villages and cities to talk to them, paying their modest traveling expense and sometimes a fee of a few dollars. Concord organized a lyceum in 1829, it admitted children of the age of twelve to membership, and Henry Thoreau joined. Shortly before his Walden experience Thoreau was secretary of the Lyceum, which by then had become a winter lecture course, he brought Emerson, Theodore Parker, and Horace Greeley, among others, before the Concord Lyceum that winter. The lectures were nearly always read, and sometimes they

must have been painfully dull, but the system had prospered in New England, and had spread westward and southward over the whole country. Emerson was much in demand on the lyceum platform, though his delivery was poor and he rarely roused his audiences to any enthusiasm. But people wanted to see him because he was the great Emerson, and for many years a chief part of his income was derived from his lecturing trips.

It was plain to Thoreau that lecturing was a function of the man of letters. He could follow Emerson's pattern—piece together his journal entries for a lecture, and then make the lecture into an essay for publication. This he did, beginning with lectures in Concord, and going out to other villages and cities as invitations came. Though not a good platform man, he was sometimes effective, and his lyceum work was an important part of his later life.

Emerson, who was sometimes a little annoyed by Thoreau's failure to get ahead, to "show a performance much more manifest than that of the other grand promisees," supported him in his literary ambitions. After Thoreau had quitted the room at the head of the stairs, Emerson encouraged him to try his literary fortunes in New York, and to that end got him a position as tutor to his young nephews in the William Emerson family on Staten Island. And Henry faithfully but vainly pounded the pavement looking for a suitable opening, and then came back to Concord all ready for the Walden experience. Well he knew that his true career was that of an observer of nature and of himself, and that New York with all its publishing was no place for him. "I seem to see somewhat more of my own kith and kin in the lichens on the rocks than in any books. It does seem as if mine were a peculiarly wild nature, which so yearns toward all wildness."

V

Emerson had recently bought fourteen acres of woods and briars on the shore of the small lake known as Walden Pond. He permitted Thoreau to build a cabin there. The one-room dwelling was set a short distance from the lake and in view of the public road. It was no hermitage and Thoreau was no hermit. He had much of solitude and time for contemplation at Walden, but he also had many visitors, "whom he receives," wrote a friend, "with pleasure, and does his best to entertain."

Readers of Thoreau's matchless account of his life in this retreat have commonly failed to take it seriously enough. Perhaps its quiet humor invites too light a regard, and there is a danger of confusing it with the sentimental writing about nature which has become popular in our own time. But there are two definite (though not sharply differentiated) values in *Walden* that the student who comes to a new perusal of it must not miss. One, of course, is its fresh presentation of Transcendental idealism—its love and reverence for all the natural phenomena, regarded as Henry Thoreau's "kith and kin"—the

grand ideas of Fichte and Coleridge and Emerson and the Oriental philosophers brought home to Walden Pond. The other, perhaps more important today, or more to the taste of the present, is the economic principle of the whole experiment. For Thoreau was utterly serious in his attempt to live simply and greatly—with "leisure and independence and health"—on 27 cents a week for food and about the same for clothes. Any failure of distribution in the midst of abundance, whether in the last depression or the next, invites attention to *Walden*, indeed, any revolt against over-complexity in modern civilization may find here its manifesto.

The Walden experience was good for Thoreau. He gained in self-confidence, in sound relationships with others, in his distinctively literary work. He came away from Walden (because he had "other lives to live") with the manuscript of a book ready for a publisher. It was not *Walden*, which was to be his second book, but *A Week on the Concord and Merrimack Rivers*.

The *Week* is founded upon a journey which Henry and John Thoreau had taken in September, 1839, in an interval of their school-keeping. That narrative, the descriptions of nature, and the character sketches give a certain form to the work, but the selections ("meditations" the older writers would have called them) from his long-kept journal give it body. "Virgil and White of Selborne and Izaak Walton all in one!" exulted Alcott, and many discerning readers have preferred this first book of Thoreau's to the more popular *Walden*. But publishers did not look with favor on the manuscript that came out of Walden cabin, even when Emerson and other friends urged them, they were unmoved. Thoreau then decided to have the book brought out at his own risk, but it did not sell when it was at last offered to an unappreciative public. Of the edition of 1000 copies, about 225 were sold, 75 given away, and the remainder returned, at the end of four years, to the author. "I have now," Thoreau wrote in his journal in 1853, "a library of nearly 900 volumes, 700 of which I wrote myself."

Nor was the debt to the publisher yet satisfied by that time. The financial venture, larger than any Thoreau had ever before undertaken, had made it necessary for him to earn some cash money. He thereupon gave more attention to his father's pencil business, which had now turned to the profitable line of fine graphite. Henry's inventive mind contributed to the improvement of the production processes. He also wrote and sold some articles to the magazines, aided by the advice of Horace Greeley, whose lasting friendship he had made during his visit to New York. He continued with his lecturing. And finally he became Concord's leading surveyor, marking the limits of woodlots, laying out streets and roads, drawing careful maps.

Despite all these employments, he found time to write *Walden*. Though the failure of his first book caused some delay, Thoreau eventually placed the new one with Ticknor & Fields, then well established as leading Boston publishers.

Walden appeared in 1854, and 2000 copies were sold before the author's death eight years later

His activities as surveyor and author rehabilitated Thoreau in the eyes of his neighbors, no longer was he the shiftless woods-tramp. But any who regarded him as a transformed character were wholly mistaken. He was the same Henry Thoreau, kith and kin with the lichens. "I will take another walk to the Cliff, another row on the river, another skate on the meadow, be out in the first snow, and associate with the winter birds. Here I am at home. In the bare and bleached crust of the earth I recognize my friend" (*Journal*, 1858)

He was the same Henry Thoreau who had gone to jail as a protest against a government which permitted slavery. His famous essay on "Civil Disobedience," which grew out of that experience, was published two years after he left *Walden*. He followed it up a few years later with his defiant "Slavery in Massachusetts," delivered on the Fourth of July at Framingham. Thoreau the individualist challenged slave-holding on the highest principles. "I wish my countrymen to consider that whatever the human law may be, neither an individual nor a nation can ever commit the least act of injustice against the obscurest individual without having to pay the penalty for it."

Thoreau met John Brown of Osawatimie when he visited Concord in 1857, indeed he had the old white-bearded hero and fanatic in his own home. Two years later he heard Captain Brown speak in Concord just before he left for his tragic raid on Harper's Ferry. Thoreau was tremendously affected by the news of the raid and the imminent hanging of Old Brown. At white heat he wrote his greatest public address, "A Plea for John Brown," and delivered it with feeling to a Concord audience, and again in Worcester, and finally to a great throng in Theodore Parker's church in Boston. Emerson heard it in Concord and testified to its moving power and effect on its audience. "I plead not for his life, but for his character—his immortal life," declared Thoreau. As in his earlier political addresses, all was pitched upon the level of high principle.

In these latter years, though he was sought out by visitors and admirers and had many demands upon his time, Thoreau was still the outdoor man, still the searcher after himself in fern, tree, and wildfowl. His erect form (of medium height or under), clothed in homespun garments woven to resist thorns and brambles, and a large handkerchief about the neck, might have been seen almost any day, fair or rainy, passing through a wood opening or meadow near Concord with that long Indian stride of his, pausing now and again for examination of something on the ground or in a bush or in the air. His grey-blue eyes commonly had a downward look, as though attending the path he trod, his nose was the most prominent feature of his face, curving as it did almost low enough to touch his upper lip. Outdoors he wore a big shapeless hat with broad brim and a crown high enough to furnish storage-room for specimens he col-

grand ideas of Fichte and Coleridge and Emerson and the Oriental philosophers brought home to Walden Pond. The other, perhaps more important today, or more to the taste of the present, is the economic principle of the whole experiment. For Thoreau was utterly serious in his attempt to live simply and greatly—with “leisure and independence and health”—on 27 cents a week for food and about the same for clothes. Any failure of distribution in the midst of abundance, whether in the last depression or the next, invites attention to *Walden*; indeed, any revolt against over-complexity in modern civilization may find here its manifesto.

The Walden experience was good for Thoreau: he gained in self-confidence, in sound relationships with others, in his distinctively literary work. He came away from Walden (because he had “other lives to live”) with the manuscript of a book ready for a publisher. It was not *Walden*, which was to be his second book, but *A Week on the Concord and Merrimack Rivers*.

He also wrote and sold some articles to the magazines, aided by the advice of Horace Greeley, whose lasting friendship he had made during his visit to New York. He continued with his lecturing. And finally he became Concord’s leading surveyor, marking the limits of woodlots, laying out streets and roads, drawing careful maps.

Despite all these employments, he found time to write *Walden*. Though the failure of his first book caused some delay, Thoreau eventually placed the new one with Ticknor & Fields, then well established as leading Boston publishers.

Walden appeared in 1854, and 2000 copies were sold before the author's death eight years later.

His activities as surveyor and author rehabilitated Thoreau in the eyes of his neighbors; no longer was he the shiftless woods-tramp. But any who regarded him as a transformed character were wholly mistaken. He was the same Henry Thoreau, kith and kin with the lichens. "I will take another walk to the Cliff, another row on the river, another skate on the meadow, be out in the first snow, and associate with the winter birds. Here I am at home. In the bare and bleached crust of the earth I recognize my friend." (Journal, 1858).

He was the same Henry Thoreau who had gone to jail as a protest against a government which permitted slavery. His famous essay on "Civil Disobedience," which grew out of that experience, was published two years after he left *Walden*. He followed it up a few years later with his defiant "Slavery in Massachusetts," delivered on the Fourth of July at Framingham. Thoreau the individualist challenged slave-holding on the highest principles: "I wish my countrymen to consider that whatever the human law may be, neither an individual nor a nation can ever commit the least act of injustice against the obscurest individual without having to pay the penalty for it."

Thoreau met John Brown of Osawatimie when he visited Concord in 1857; indeed he had the old white-bearded hero and fanatic in his own home. Two years later he heard Captain Brown speak in Concord just before he left for his tragic raid on Harper's Ferry. Thoreau was tremendously affected by the news of the raid and the imminent hanging of Old Brown. At white heat he wrote his greatest public address, "A Plea for John Brown," and delivered it with feeling to a Concord audience, and again in Worcester, and finally to a great throng in Theodore Parker's church in Boston. Emerson heard it in Concord and testified to its moving power and effect on its audience. "I plead not for his life, but for his character—his immortal life," declared Thoreau. As in his earlier political addresses, all was pitched upon the level of high principle.

In these latter years, though he was sought out by visitors and admirers and had many demands upon his time, Thoreau was still the outdoor man, still the searcher after himself in fern, tree, and wildfowl. His erect form (of medium height or under), clothed in homespun garments woven to resist thorns and brambles, and a large handkerchief about the neck, might have been seen almost any day, fair or rainy, passing through a wood opening or meadow near Concord with that long Indian stride of his, pausing now and again for examination of something on the ground or in a bush or in the air. His grey-blue eyes commonly had a downward look, as though attending the path he trod; his nose was the most prominent feature of his face, curving as it did almost low enough to touch his upper lip. Outdoors he wore a big shapeless hat with broad brim and a crown high enough to furnish storage-room for specimens he col-

lected on his walks. Thus he still roamed the countryside, more and more intent, as he grew older, upon collection and classification.

Sometimes he went further abroad—outside of the Middlesex region. He made a trip to the Maine woods in 1846, and to Cape Cod three years later; both these visits were repeated. In 1850 he and his friend Ellery Channing spent a week in Canada—a journey which resulted in *A Yankee in Canada*, serialized in *Putnam's Magazine* a few years later. There were other trips, especially to Monadnock and the White Mountains with different friends; but he still "travelled a good deal in Concord." His last long trip—the most ambitious but least successful—was made to Minnesota in search of relief from the consumption which had then marked him for death.

Henry Thoreau died in the late spring of 1862, at the age of forty-four. In the next few years several volumes put together out of the journals and lectures appeared—*Excursions; The Maine Woods; Cape Cod; A Yankee in Canada, with Anti-Slavery and Reform Papers*. Emerson edited some of Thoreau's letters in 1865, and in the eighties H. G. O. Blake joined some of the nature descriptions of the journals in the series composed of *Early Spring in Massachusetts, Summer, Winter, and Autumn*. His poems were published together in 1895.

VI

Thoreau's reputation as a writer has increased rather steadily since his death. It has been hard for his critics to separate his literary performance from the eccentricities of his personality or from his positions in regard to nature, society, and politics. But the consensus now places both the *Week* and *Walden* very high among the great American masterpieces. The attentive reader may well give special consideration to Thoreau's style, noting particularly: (1) his knowing use of words, wide and varied vocabulary, employment of both archaic words and modern slang, and delight in poetic expression; (2) his mastery of the sentence, in which his most recent and perhaps ablest critic has found the chief excellency of his style; (3) his use of figures, which so often makes poetry of his prose; and (4) his quiet humor, his sarcasm, his wit sharpened into epigram. At one time Emerson thought of his friend as a poet, but he never achieved adequate mastery of the essential forms of verse.

Thoreau is, after all these years, strikingly modern. No other of the great New England group now speaks so directly to contemporary questions. This is true especially with respect to two matters. One of them is the economic retreat from the city. It is not without significance that *Walden* has been widely circulated in England as a tract for a labor-reform group representing the plan of a cheaper, simpler life outside the cities. Thoreau's other chief impact on contemporary thinking aligns him with the "rugged individualism" which protests against increasing government controls. His influence upon the philosophical

anarchists, upon the Russian Tolstoy and the Indian Gandhi, has been notable and freely acknowledged. His contribution to the art and practice of political protest has been effective and world-wide.

A complicated personality, Thoreau was many things; but in all these things he was an individualist in search of the meaning of life. He lived every day to find what he tells us he sought at Walden:

I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and if it proved to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world; or if it were sublime, to know it by experience and be able to give a true account of it.

[For nearly fifty years the best existing book about Thoreau was the biography by an Englishman, H. S. Salt (London, 1890, revised 1896); but H. S. Canby's *Thoreau* (Boston, 1939), excellent both as biography and criticism, has superseded it. F. B. Sanborn wrote two books on Thoreau, the first for the American Men of Letters Series (revised edition, Boston, 1910). They are worth more as reminiscence than as ordered and careful studies. W. E. Channing's *Thoreau, the Poet-Naturalist* (Boston, 1873, revised 1902) is interesting as a Transcendental interpretation by a friend. Léon Bazalgette's *Henry Thoreau, Sauvage* (Paris, 1914), translated by Van Wyck Brooks as *Henry Thoreau, Bachelor of Nature* (New York, 1924), is a novelized biography, as soundly based on fact as could be expected—an interesting and helpful book. *The Heart of Thoreau's Journals*, edited by Odell Shepard (Boston, 1927), is a convenient source-book for the study of Thoreau's personality and ideas. Good essays on Thoreau may be found in F. O. Matthiessen's *American Renaissance* (New York, 1941), B. V. Crawford's *Thoreau* (New York, 1934) in American Writers Series; R. L. Stevenson's *Familiar Studies of Men and Books* (London, 1882); Paul Elmer More's *Shelburne Essays; First Series* (New York, 1904) and *Fifth Series* (New York, 1908). Mark Van Doren's *Henry David Thoreau, A Critical Study* (Boston, 1916) is useful.]

From
A WEEK ON THE CONCORD AND
MERRIMACK RIVERS
[1849]

From
SATURDAY

"Come, come, my lovely fair, and let us try
These rural delicacies."

—*Invitation to the Soul*, Quarles¹

AT LENGTH, on Saturday, the last day of
August, 1839, we two, brothers, and natives

of Concord, weighed anchor in this river port; for Concord, too, lies under the sun, a port of entry and departure for the bodies as well as the souls of men; one shore at least exempted from all duties but such as an honest man will gladly discharge. A warm drizzling rain had obscured the morning, and threatened to delay our voyage, but at length the leaves and grass were

¹ Francis Quarles (1592-1644), English poet, famous for his poems in the artificial style of his times.

dried, and it came out a mild afternoon, as serene and fresh as if nature were maturing some greater scheme of her own. After this long dripping and oozing from every pore, she began to respire again more healthily than ever. So with a vigorous shove we launched our boat from the bank, while the flags and bulrushes curtseyed a God-speed, and dropped silently down the stream.

Our boat, which had cost us a week's labor in the spring, was in form like a fisherman's dory, fifteen feet long by three and a half in breadth at the widest part, painted green below, with a border of blue, with reference to the two elements in which it was to spend its existence. It had been loaded the evening before at our door, half a mile from the river, with potatoes and melons from a patch which we had cultivated, and a few utensils, and was provided with wheels in order to be rolled around falls, as well as with two sets of oars, and several slender poles for shoving in shallow places, and also two masts, one of which served for a tent-pole at night; for a buffalo skin was to be our bed, and a tent of cotton cloth our roof. It was strongly built but heavy, and hardly of better model than usual. If rightly made, a boat would be a sort of amphibious animal, a creature of two elements, related by one half its structure to some swift and shapely fish, and by the other to some strong-winged and graceful bird. The fish shows where there should be the greatest breadth of beam and depth in the hold; its fins direct where to set the oars, and the tail gives some hint for the form and position of the rudder. The bird shows how to rig and trim the sails, and what form to give to the prow that it may balance the boat and divide the air and water best. These hints we had but partially obeyed. But the eyes, though they are no sailors, will never be satisfied with any model, however fashionable, which does not answer all the requisitions of art. However, as art is all of a ship but the wood, and yet the wood alone will rudely serve the purpose of a ship,

so our boat being of wood gladly availed itself of the old law that the heavier shall float the lighter, and though a dull water fowl, proved a sufficient buoy for our purpose.

"Were it the will of Heaven, an osier bough
Were vessel safe enough the seas to
plow."²

Some village friends stood upon a promontory lower down the stream to wave us a last farewell; but we, having already performed these shore rites with excusable reserve, as befits those who are embarked on unusual enterprises, who behold but speak not, silently glided past the firm lands of Concord, both peopled cape and lonely summer meadow, with steady sweeps. And yet we did unbend so far as to let our guns speak for us, when at length we had swept out of sight, and thus left the woods to ring again with their echoes; and it may be many russet-clad children lurking in those broad meadows, with the bittern and the woodcock and the rail, though wholly concealed by brakes and hardhack and meadow-sweet, heard our salute that afternoon.

We were soon floating past the first regular battle ground of the Revolution, resting on our oars between the still visible abutments of that "North Bridge," over which in April, 1775, rolled the first faint tide of that war, which ceased not, till, as we read on the stone on our right, it "gave peace to these United States." . . .

Gradually the village murmur subsided, and we seemed to be embarked on the placid current of our dreams, floating from past to future as silently as one awakes to fresh morning or evening thoughts. We glided noiselessly down the stream, occasionally driving a pickerel from the covert of the pads, or a bream from her nest, and the smaller bittern now and then sailed away on sluggish wings from some recess in the shore, or the larger lifted itself out

² Pindar (Emerson's translation).

of the long grass at our approach, and carried its precious legs away to deposit them in a place of safety. The tortoises also rapidly dropped into the water, as our boat ruffled the surface amid the willows, breaking the reflections of the trees. The banks had passed the height of their beauty, and some of the brighter flowers showed by their faded tints that the season was verging towards the afternoon of the year; but this sombre tinge enhanced their sincerity, and in the still unabated heats they seemed like a mossy brink of some cool well. The narrow-leaved willow lay along the surface of the water in masses of light green foliage, interspersed with the large white balls of the button-bush. The rose-colored polygonum³ raised its head proudly above the water on either hand, and, flowering at this season, and in these localities, in the midst of dense fields of the white species which skirted the sides of the stream, its little streak of red looked very rare and precious. The pure white blossoms of the arrowhead stood in the shallower parts, and a few cardinals on the margin still proudly surveyed themselves reflected in the water, though the latter, as well as the pickerel-weed, was now nearly out of blossom. The snakehead, *chelone glabra*, grew close to the shore, while a kind of coreopsis, turning its brazen face to the sun, full and rank, and a tall dull red flower, *eupatorium purpureum*, or trumpet weed, formed the rear rank of the fluvial array. The bright blue flowers of the soap-wort gentian were sprinkled here and there in the adjacent meadows, like flowers which Proserpine had dropped, and still further in the fields, or higher on the bank, were seen the Virginian rhexia, and drooping neottia or ladies'-tresses; while from the more distant waysides, which we occasionally passed, and banks where the sun had lodged, was reflected a dull yellow beam from the ranks of tansy, now in its prime. In short, nature seemed to have adorned herself for our departure with a profusion of fringes and curls, mingled with the bright tints of flowers, reflected in the water. But we

missed the white water-lily, which is the queen of river flowers, its reign being over for this season. He makes his voyage too late, perhaps, by a true water clock who delays so long. Many of this species inhabit our Concord water. I have passed down the river before sunrise on a summer morning between fields of lilies still shut in sleep; and when at length the flakes of sunlight from over the bank fell on the surface of the water, whole fields of white blossoms seemed to flash open before me, as I floated along, like the unfolding of a banner, so sensible is this flower to the influence of the sun's rays.

Late in the afternoon we passed a man on the shore fishing with a long birch pole, its silvery bark left on, and a dog at his side, rowing so near as to agitate his cork with our oars, and drive away luck for a season, and when we had rowed a mile as straight as an arrow, with our faces turned towards him, and the bubbles in our wake still visible on the tranquil surface, there stood the fisher still with his dog, like statues under the other side of the heavens, the only objects to relieve the eye in the extended meadow; and there would he stand abiding his luck, till he took his way home through the fields at evening with his fish. Thus, by one bait or another, Nature allures inhabitants into all her recesses. This man was the last of our townsmen whom we saw, and we silently through him bade adieu to our friends.

The characteristics and pursuits of various ages and races of men are always existing in epitome in every neighborhood. The pleasures of my earliest youth have become the inheritance of other men. This man is still a fisher, and belongs to an era in which I myself have lived. Perchance he is not confounded by many knowledges, and has not sought out many inventions, but how to take many fishes before the sun sets, with his slender birchen pole and flaxen line, that is invention enough for

³ Water-pepper.

him. It is good even to be a fisherman in summer and in winter. Some men are judges these August days, sitting on benches, even till the court rises; they sit judging there honorably, between the seasons and between meals, leading a civil politic life, arbitrating in the case of Spaulding *versus* Cummings, it may be, from highest noon till the red vesper sinks into the west. The fisherman, meanwhile, stands in three feet of water, under the same summer's sun, arbitrating in other cases between muck-worm and shiner, amid the fragrance of water-lilies, mint, and pontederia,⁴ leading his life many rods from the dry land, within a pole's length of where the larger fishes swim. Human life is to him very much like a river,

—"renning aie downward to the sea."

This was his observation. His honor made a great discovery in bailments.

I can just remember an old brown-coated man who was the Walton⁵ of this stream, who had come over from Newcastle, England, with his son, the latter a stout and hearty man who had lifted an anchor in his day. A straight old man he was who took his way in silence through the meadows, having passed the period of communication with his fellows; his old experienced coat hanging long and straight and brown as the yellow pine bark, glittering with so much smothered sunlight, if you stood near enough, no work of art but naturalized at length. I often discovered him unexpectedly amid the pads and the gray willows when he moved, fishing in some old country method,—for youth and age then went a-fishing together,—full of incommunicable thoughts, perchance about his own Tyne and Northumberland. He was always to be seen in serene afternoons haunting the river, and almost rustling with the sedge; so many sunny hours in an old man's life, entrapping silly fish, almost grown to be the sun's familiar; what need had he of hat or raiment any, having served out his time, and seen through such

thin disguises? I have seen how his coeval fates rewarded him with the yellow perch, and yet I thought his luck was not in proportion to his years; and I have seen when, with slow steps and weighed down with aged thoughts, he disappeared with his fish under his low-roofed house on the skirts of the village. I think nobody else saw him; nobody else remembers him now, for he soon after died, and migrated to new Tyne streams. His fishing was not a sport, nor solely a means of subsistence, but a sort of solemn sacrament and withdrawal from the world, just as the aged read their Bibles. . . .

That was a long pull from Ball's Hill to Carlisle Bridge, sitting with our faces to the south, a slight breeze rising from the north; but nevertheless water still runs and grass grows, for now, having passed the bridge between Carlisle and Bedford, we see men haying far off in the meadow, their heads waving like the grass which they cut. In the distance the wind seemed to bend all alike. As the night stole over, such a freshness was wafted across the meadow that every blade of cut-grass seemed to teem with life. Faint purple clouds began to be reflected in the water, and the cow-bells tinkled louder along the banks, while, like sly water rats, we stole along nearer the shore, looking for a place to pitch our camp.

At length, when we had made about seven miles, as far as Billerica, we moored our boat on the west side of a little rising ground which in the spring forms an island in the river. Here we found huckleberries still hanging upon the bushes, where they seemed to have slowly ripened for our especial use. Bread and sugar, and cocoa boiled in river water, made our repast, and as we had drunk in the fluvial prospect all day, so now we took a draught of the water with our evening meal to

⁴ *Pontederia cordata* is the pickerel-weed, referred to in the second paragraph above.

⁵ Izaak Walton (1593-1683), author of *The Compleat Angler*.

propitiate the river gods, and whet our vision for the sights it was to behold. The sun was setting on the one hand, while our eminence was contributing its shadow to the night, on the other. It seemed insensibly to grow lighter as the night shut in, and a distant and solitary farm-house was revealed, which before lurked in the shadows of the noon. There was no other house in sight, nor any cultivated field. To the right and left, as far as the horizon, were straggling pine woods with their plumes against the sky, and across the river were rugged hills, covered with shrub oaks, tangled with grape vines and ivy, with here and there a gray rock jutting out from the maze. The sides of these cliffs, though a quarter of a mile distant, were almost heard to rustle while we looked at them, it was such a leafy wilderness; a place for fauns and satyrs, and where bats hung all day to the rocks, and at evening flitted over the water, and fireflies husbanded their light under the grass and leaves against the night. When we had pitched our tents on the hill-side, a few rods from the shore, we sat looking through its triangular door in the twilight at our lonely mast on the shore, just seen above the alders, and hardly yet come to a stand-still from the swaying of the stream; the first encroachment of commerce on this land. There was our port, our Ostia.⁶ That straight geometrical line against the water and the sky stood for the last refinements of civilized life, and what of sublimity there is in history was there symbolized.

For the most part, there was no recognition of human life in the night, no human breathing was heard, only the breathing of the wind. As we sat up, kept awake by the novelty of our situation, we heard at intervals foxes stepping about over the dead leaves, and brushing the dewy grass close to our tent, and once a musquash fumbling among the potatoes and melons in our boat, but when we hastened to the shore we could detect only a ripple in the water ruffling the disk of a star. At intervals we

were serenaded by the song of a dreaming sparrow or the throttled cry of an owl, but after each sound which near at hand broke the stillness of the night, each crackling of the twigs, or rustling among the leaves, there was a sudden pause, and deeper and more conscious silence, as if the intruder were aware that no life was rightfully abroad at that hour. There was a fire in Lowell, as we judged, this night, and we saw the horizon blazing, and heard the distant alarm bells, as it were a faint tinkling music borne to these woods. But the most constant and memorable sound of a summer's night, which we did not fail to hear every night afterward, though at no time so incessantly and so favorably as now, was the barking of the house dogs, from the loudest and hoarsest bark to the faintest aerial palpitation under the eaves of heaven, from the patient but anxious mastiff to the timid and wakeful terrier, at first loud and rapid, then faint and slow, to be imitated only in a whisper; wow-wow-wow-wow—wo—wo—w—w. Even in a retired and uninhabited district like this, it was a sufficiency of sound for the ear of night, and more impressive than any music. I have heard the voice of a hound, just before daylight, while the stars were shining, from over the woods and river, far in the horizon, when it sounded as sweet and melodious as an instrument. The hounding of a dog pursuing a fox or other animal in the horizon, may have first suggested the notes of the hunting horn to alternate with and relieve the lungs of the dog. This natural bugle long resounded in the woods of the ancient world before the horn was invented. The very dogs that sullenly bay the moon from farmyards in these nights, excite more heroism in our breasts than all the civil exhortations or war sermons of the age. "I had rather be a dog, and bay the moon," than many a Roman that I know. The night is equally indebted to the clarion of the cock,

⁶ Ancient seaport of Rome, situated at the mouth of the Tiber.

with wakeful hope, from the very setting of the sun, prematurely ushering in the dawn. All these sounds, the crowing of cocks, the baying of dogs, and the hum of insects at noon, are the evidence of nature's health or *sound* state. Such is the never failing beauty and accuracy of language, the most perfect art in the world; the chisel of a thousand years retouches it.

At length the antepenultimate and drowsy hours drew on, and all sounds were denied entrance to our ears.

From
SUNDAY

At least let us have healthy books, a stout horse-rake or a kitchen range which is not cracked. Let not the poet shed tears only for the public weal. He should be as vigorous as a sugar maple, with sap enough to maintain his own verdure, beside what runs into the troughs, and not like a vine, which being cut in the spring bears no fruit, but bleeds to death in the endeavor to heal its wounds. The poet is he that hath fat enough, like bears and marmots, to suck his claws all winter. He hibernates in this world, and feeds on his own marrow. It is pleasant to think in winter, as we walk over the snowy pastures, of those happy dreamers that lie under the sod, of dormice and all that race of dormant creatures, which have such a superfluous life enveloped in thick folds of fur, impervious to cold. Alas, the poet too is, in one sense, a sort of dormouse gone into winter quarters of deep and serene thoughts, insensible to surrounding circumstances; his words are the relation of his oldest and finest memory, a wisdom drawn from the remotest experience. Other men lead a starved existence, meanwhile, like hawks, that would fain keep on the wing, and trust to pick up a sparrow now and then. . . .

A perfectly healthy sentence, it is true, is extremely rare. For the most part we miss the hue and fragrance of the thought; as

if we could be satisfied with the dews of the morning or evening without their colors, or the heavens without their azure. The most attractive sentences are, perhaps, not the wisest, but the surest and roundest. They are spoken firmly and conclusively, as if the speaker had a right to know what he says, and if not wise, they have at least been well learned. Sir Walter Raleigh might well be studied if only for the excellence of his style, for he is remarkable in the midst of so many masters. There is a natural emphasis in his style, like a man's tread, and a breathing space between the sentences, which the best of modern writing does not furnish. His chapters are like English parks, or say rather like a western forest, where the larger growth keeps down the underwood, and one may ride on horse-back through the openings. All the distinguished writers of that period, possess a greater vigor and naturalness than the more modern,—for it is allowed to slander our own time,—and when we read a quotation from one of them in the midst of a modern author, we seem to have come suddenly upon a greener ground, a greater depth and strength of soil. It is as if a green bough were laid across the page, and we are refreshed as by the sight of fresh grass in mid-winter or early spring. You have constantly the warrant of life and experience in what you read. The little that is said is eked out by implication of the much that was done. The sentences are verdurous and blooming as evergreen and flowers, because they are rooted in fact and experience, but our false and florid sentences have only the tints of flowers without their sap or roots. All men are really most attracted by the beauty of plain speech, and they even write in a florid style in imitation of this. They prefer to be misunderstood rather than to come short of its exuberance. Hussein Effendi praised the epistolary style of Ibrahim Pasha to the French traveller Botta,[†] be-

[†] Paul Émile Botta (1802-1870), famous for Assyrian discoveries.

cause of "the difficulty of understanding it; there was," he said, "but one person at Jidda who was capable of understanding and explaining the Pasha's correspondence." A man's whole life is taxed for the least thing well done. It is its net result. Every sentence is the result of a long probation. Where shall we look for standard English, but to the words of a standard man? The word which is best said came nearest to not being spoken at all, for it is cousin to a deed which the speaker could have better done. Nay, almost it must have taken the place of a deed by some urgent necessity, even by some misfortune, so that the truest writer will be some captive knight, after all. And perhaps the fates had such a design, when, having stored Raleigh so richly with the substance of life and experience, they made him a fast prisoner, and compelled him to make his words his deeds, and transfer to his expression the emphasis and sincerity of his action.⁸

From
TUESDAY

Early one summer morning I had left the shores of the Connecticut, and for the hvelong day traveled up the bank of a river, which came in from the west; now looking down on the stream, foaming and rippling through the forest a mile off, from the hills over which the road led, and now sitting on its rocky brink and dipping my feet in its rapids, or bathing adventurously in mid-channel. The hills grew more and more frequent, and gradually swelled into mountains as I advanced, hemming in the course of the river, so that at last I could not see where it came from, and was at liberty to imagine the most wonderful meanderings and descents. At noon I slept on the grass in the shade of a maple, where the river had found a broader channel than usual, and was spread out shallow, with frequent sand-bars exposed. In the names of the towns I rec-

ognized some which I had long ago read on teamsters' wagons, that had come from far up country, quiet uplandish towns, of mountainous fame. I walked along, musing and enchanted, by rows of sugar-maples, through the small and uninquisitive villages, and sometimes was pleased with the sight of a boat drawn up on a sand-bar, where there appeared no inhabitants to use it. It seemed, however, as essential to the river as a fish, and to lend a certain dignity to it. It was like the trout of mountain streams to the fishes of the sea, or like the young of the land-crab born far in the interior, who have never yet heard the sound of the ocean's surf. The hills approached nearer and nearer to the stream, until at last they closed behind me, and I found myself just before nightfall in a romantic and retired valley, about half a mile in length, and barely wide enough for the stream at its bottom. I thought that there could be no finer site for a cottage among mountains. You could anywhere run across the stream on the rocks, and its constant murmuring would quiet the passions of mankind forever. Suddenly the road, which seemed aiming for the mountain-side, turned short to the left, and another valley opened, concealing the former, and of the same character with it. It was the most remarkable and pleasing scenery I had ever seen. I found here a few mild and hospitable inhabitants, who, as the day was not quite spent, and I was anxious to improve the light, directed me four or five miles farther on my way to the dwelling of a man whose name was Rice, who occupied the last and highest of the valleys that lay in my path, and who, they said, was a rather rude and uncivil man. But "what is a foreign country to those who have science? Who is a stranger to those who have the habit of speaking kindly?"

At length, as the sun was setting behind the mountains in a still darker and more

⁸ Most of Raleigh's writing was done during the thirteen years he was a prisoner in the Tower of London.

solitary vale, I reached the dwelling of this man. Except for the narrowness of the plain, and that the stones were solid granite, it was the counterpart of that retreat to which Brilphoebe bore the wounded Timias,—

“In a pleasant glade,
With mountains round about environed,
And mighty woods, which did the valley
 shade,
And like a stately theatre it made,
Spreading itself into a spacious plain;
And in the midst a little river played
Amongst the pumy stones which seemed
 to plain,
With gentle murmur, that his course they
 did restrain.”^a

I observed, as I drew near, that he was not so rude as I had anticipated, for he kept many cattle, and dogs to watch them, and I saw where he had made maple-sugar on the sides of the mountains, and above all distinguished the voices of children mingling with the murmur of the torrent before the door. As I passed his stable, I met one whom I supposed to be a hired man, attending to his cattle, and I inquired if they entertained travelers at that house. “Sometimes we do,” he answered gruffly, and immediately went to the farthest stall from me, and I perceived that it was Rice himself whom I had addressed. But pardoning this incivility to the wildness of the scenery, I bent my steps to the house. There was no sign-post before it, nor any of the usual invitations to the traveler, though I saw by the road that many went and came there, but the owner’s name only was fastened to the outside; a sort of implied and sullen invitation, as I thought. I passed from room to room without meeting any one, till I came to what seemed the guests’ apartment, which was neat, and even had an air of refinement about it, and I was glad to find a map against the wall which would direct me on my journey on the morrow. At length I heard a step in a distant apartment, which was the first I had entered, and went to see if the landlord had come in; but it proved to be

only a child, one of those whose voices I had heard, probably his son, and between him and me stood in the doorway a large watch-dog, which growled at me, and looked as if he would presently spring, but the boy did not speak to him; and when I asked for a glass of water, he briefly said, “It runs in the corner.” So I took a mug from the counter and went out of doors, and searched round the corner of the house, but could find neither well nor spring, nor any water but the stream which ran all along the front. I came back, therefore, and, setting down the mug, asked the child if the stream was good to drink; whereupon he seized the mug, and, going to the corner of the room, where a cool spring which issued from the mountain behind trickled through a pipe into the apartment, filled it, and drank, and gave it to me empty again, and, calling to the dog, rushed out of doors. Ere long some of the hired men made their appearance, and drank at the spring, and lazily washed themselves and combed their hair in silence, and some sat down as if weary, and fell asleep in their seats. But all the while I saw no women, though I sometimes heard a bustle in that part of the house from which the spring came.

At length Rice himself came in, for it was now dark, with an ox-whip in his hand, breathing hard, and he too soon settled down into his seat not far from me, as if, now that his day’s work was done, he had no farther to travel, but only to digest his supper at his leisure. When I asked him if he could give me a bed, he said there was one ready, in such a tone as implied that I ought to have known it, and the less said about that the better. So far so good. And yet he continued to look at me as if he would fain have me say something further like a traveler. I remarked that it was a wild and rugged country he inhabited, and worth coming many miles to see. “Not so very rough neither,” said he, and appealed to his men

^a From Edmund Spenser’s *Faery Queen*.

to bear witness to the breadth and smoothness of his fields, which consisted in all of one small interval, and to the size of his crops; "and if we have some hills," added he, "there's no better pasturage anywhere." I then asked if this place was the one I had heard of, calling it by a name I had seen on the map, or if it was a certain other; and he answered, gruffly, that it was neither the one nor the other; that he had settled it and cultivated it, and made it what it was, and I could know nothing about it. Observing some guns and other implements of hunting hanging on brackets around the room, and his hounds now sleeping on the floor, I took occasion to change the discourse, and inquired if there was much game in that country, and he answered this question more graciously, having some glimmering of my drift; but when I inquired if there were any bears, he answered impatiently that he was no more in danger of losing his sheep than his neighbors; he had tamed and civilized that region. After a pause, thinking of my journey on the morrow, and the few hours of daylight in that hollow and mountainous country, which would require me to be on my way betimes, I remarked that the day must be shorter by an hour there than on the neighboring plains; at which he gruffly asked what I knew about it, and affirmed that he had as much daylight as his neighbors; he ventured to say, the days were longer there than where I lived, as I should find if I stayed; that in some way, I could not be expected to understand how, the sun came over the mountains half an hour earlier, and stayed half an hour later there than on the neighboring plains. And more of like sort he said. He was, indeed, as rude as a fabled satyr. But I suffered him to pass for what he was,—for why should I quarrel with nature?—and was even pleased at the discovery of such a singular natural phenomenon. I dealt with him as if to me all manners were indifferent, and he had a sweet, wild way with him. I would not question nature, and I would rather have him as he was

than as I would have him. For I had come up here not for sympathy, or kindness, or society, but for novelty and adventure, and to see what nature had produced here. I therefore did not repel his rudeness, but quite innocently welcomed it all, and knew how to appreciate it, as if I were reading in an old drama a part well sustained. He was indeed a coarse and sensual man, and, as I have said, uncivil, but he had his just quarrel with nature and mankind, I have no doubt, only he had no artificial covering to his ill-humors. He was earthy enough, but yet there was good soil in him, and even a long-suffering Saxon probity at bottom. If you could represent the case to him, he would not let the race die out in him, like a red Indian.

At length I told him that he was a fortunate man, and I trusted that he was grateful for so much light; and, rising, said I would take a lamp, and that I would pay him then for my lodging, for I expected to recommence my journey even as early as the sun rose in his country; but he answered in haste, and this time civilly, that I should not fail to find some of his household stirring, however early, for they were no sluggards, and I could take my breakfast with them before I started, if I chose; and as he lighted the lamp I detected a gleam of true hospitality and ancient civility, a beam of pure and even gentle humanity, from his bleared and moist eyes. It was a look more intimate with me, and more explanatory, than any words of his could have been if he had tried to his dying day. It was more significant than any Rice of those parts could even comprehend, and long anticipated this man's culture,—a glance of his pure genius, which did not much enlighten him, but did impress and rule him for the moment, and faintly constrain his voice and manner. He cheerfully led the way to my apartment, stepping over the limbs of his men, who were asleep on the floor in an intervening chamber, and showed me a clean and comfortable bed. For many pleasant hours after the household was

asleep I sat at the open window, for it was a sultry night, and heard the little river

"Amongst the pumy stomes, which seemed to plain,

With gentle murmur, that his course they did restrain."

But I arose as usual by starlight the next morning, before my host, or his men, or even his dogs, were awake; and, having left a ninepence on the counter, was already half-way over the mountain with the sun before they had broken their fast.

From
FRIDAY

As I pass along the streets of our village of Concord on the day of our annual Cattle Show, when it usually happens that the leaves of the elms and buttonwoods begin first to strew the ground under the breath of the October wind, the lively spirits in their sap seem to mount as high as any plowboy's let loose that day; and they lead my thoughts away to the rustling woods, where the trees are preparing for their winter campaign. This autumnal festival, when men are gathered in crowds in the streets as regularly and by as natural a law as the leaves cluster and rustle by the wayside, is naturally associated in my mind with the fall of the year. The low of cattle in the streets sounds like a hoarse symphony or running base¹⁰ to the rustling of the leaves. The wind goes hurrying down the country, gleaning every loose straw that is left in the fields, while every farmer lad too appears to scud before it,—having donned his best peajacket and pepper-and-salt waistcoat, his unbent trousers, outstanding rigging of duck, or kersymere, or corduroy, and his furry hat withal,—to country fairs and cattle shows, to that Rome among the villages where the treasures of the year are gathered. All the land over they go leaping

the fences with their tough idle palms, which have never learned to hang by their sides, amid the low of calves and the bleating of sheep,—Amos, Abner, Elnathan, Elbridge,—

"From steep pine-bearing mountains to the plain."

I love these sons of earth, every mother's son of them, with their great hearty hearts rushing tumultuously in herds from spectacle to spectacle, as if fearful lest there should not be time between sun and sun to see them all, and the sun does not wait more than in haying time.

"Wise nature's darlings, they live in the world

Perplexing not themselves how it is hurled."

Running hither and thither with appetite for the coarse pastimes of the day, now with boisterous speed at the heels of the inspired negro from whose larynx the melodies of all Congo and Guinea coast have broke loose into our streets; now to see the procession of a hundred yoke of oxen, all as august and grave as Osiris, or the droves of neat cattle and milch cows as unspotted as Isis or Io. Such as had no love for Nature

"at all,
Came lovers home from this great festival."¹¹

They may bring their fattest cattle and richest fruits to the fair, but they are all eclipsed by the show of men. These are stirring autumn days, when men sweep by in crowds, amid the rustle of leaves, like migrating finches; this is the true harvest of the year, when the air is but the breath

¹⁰ Old form of "bass."

¹¹ The three quotations interpolated in this paragraph are all from poems by Christopher Marlowe.

of men, and the rustling of leaves is as the trampling of the crowd. We read now-a-days of the ancient festivals, games, and processions of the Greeks and Etruscans, with a little incredulity, or at least with little sympathy, but how natural and irrepressible in every people is some hearty and palpable greeting of Nature. The Corybantes, the Bacchantes, the rude primitive tragedians with their procession and goatsong, and the whole paraphernalia of the Panathenæa,¹² which appear so antiquated and peculiar, have their parallel now. The husbandman is always a better Greek than the scholar is prepared to appreciate, and the old custom still survives, while antiquarians and scholars grow gray in commemorating it. The farmers crowd to the fair to-day in obedience to the same ancient law which Solon or Lycurgus did not enact, as naturally as bees swarm and follow their queen.

It is worth the while to see the country's people, how they pour into the town, the sober farmer folk, now all agog, their very shirt and coat collars pointing forward,—collars so broad as if they had put their shirts on wrong end upward, for the fashions always tend to superfluity,—and with an unusual springiness in their gait, jabbering earnestly to one another. The more supple vagabond, too, is sure to appear on the least rumor of such a gathering, and the next day to disappear, and go into his hole like the seventeen-year locust, in an ever shabby coat, though finer than the farmer's best, yet never dressed, come to see the sport, and have a hand in what is going,—to know "what's the row," if there is any; to be where some men are drunk, some horses race, some cockerels fight, anxious to be shaking props under a table, and above all to see the "striped pig." He especially is the creature of the occasion. He empties both his pockets and his character into the stream, and swims in such a day. He dearly loves the social slush. There is no reserve of soberness in him.

I love to see the herd of men feeding

heartily on coarse and succulent pleasures, as cattle on the husks and stalks of vegetables. Though there are many crooked and crabbed specimens of humanity among them, run all to thorn and rind, and crowded out of shape by adverse circumstances, like the third chestnut in the bur, so that you wonder to see some heads wear a whole hat, yet fear not that the race will fail or waiver in them; like the crabs which grow in hedges, they furnish the stocks of sweet and thrifty fruits still. Thus is nature recruited from age to age, while the fair and palatable varieties die out and have their period. This is that mankind. How cheap must be the material of which so many are made

[1854]

ECONOMY

WHEN I wrote the following pages, or rather the bulk of them, I lived alone, in the woods, a mile from any neighbor, in a house which I had built myself, on the shore of Walden Pond, in Concord, Massachusetts, and earned my living by the labor of my hands only. I lived there two years and two months. At present I am a sojourner in civilized life again.

I should not obtrude my affairs so much on the notice of my readers if very particular inquiries had not been made by my townsmen concerning my mode of life, which some would call impertinent, though they do not appear to me at all impertinent, but, considering the circumstances, very natural and pertinent. Some have asked what I got to eat, if I did not feel lonesome; if I was not afraid; and the like. Others have been curious to learn what portion of my income I devoted to charitable purposes; and some, who have large families, how many poor children I main-

¹² The festival in honor of Athena, most important of the celebrations in ancient Athens.

tained. I will therefore ask those of my readers who feel no particular interest in me to pardon me if I undertake to answer some of these questions in this book. In most books, the *I*, or first person, is omitted, in this it will be retained; that, in respect to egotism, is the main difference. We commonly do not remember that it is, after all, always the first person that is speaking. I should not talk so much about myself if there were anybody else whom I knew as well. Unfortunately, I am confined to this theme by the narrowness of my experience. Moreover, I, on my side, require of every writer, first or last, a simple and sincere account of his own life, and not merely what he has heard of other men's lives; some such account as he would send to his kindred from a distant land; for if he has lived sincerely, it must have been in a distant land to me. Perhaps these pages are more particularly addressed to poor students. As for the rest of my readers, they will accept such portions as apply to them. I trust that none will stretch the seams in putting on the coat, for it may do good service to him whom it fits.

I would fain say something, not so much concerning the Chinese and Sandwich Islanders as you who read these pages, who are said to live in New England; something about your condition, especially your outward condition or circumstances in this world, in this town, what it is, whether it is necessary that it be as bad as it is, whether it cannot be improved as well as not. I have travelled a good deal in Concord, and everywhere, in shops, and offices, and fields, the inhabitants have appeared to me to be doing penance in a thousand remarkable ways. What I have heard of Bramins sitting exposed to four fires and looking in the face of the sun; or hanging suspended, with their heads downward, over flames; or looking at the heavens over their shoulders "until it becomes impossible for them to resume their natural position, while from the twist of the neck nothing but liquids can pass into the stomach;" or dwelling, chained for life, at the

foot of a tree; or measuring with their bodies, like caterpillars, the breadth of vast empires; or standing on one leg on the tops of pillars,—even these forms of conscious penance are hardly more incredible and astonishing than the scenes which I daily witness. The twelve labors of Hercules were trifling in comparison with those which my neighbors have undertaken; for they were only twelve, and had an end, but I could never see that these men slew or captured any monster or finished any labor. They have no friend Iolaus¹ to burn with a hot iron the root of the hydra's head, but as soon as one head is crushed, two spring up.

I see young men, my townsmen, whose misfortune it is to have inherited farms, houses, barns, cattle, and farming tools, for these are more easily acquired than got rid of. Better if they had been born in the open pasture and suckled by a wolf, that they might have seen with clear eyes what field they were called to labor in. Who made them serfs of the soil? Why should they eat their sixty acres, when man is condemned to eat only his peek of dirt? Why should they begin digging their graves as soon as they are born? They have got to live a man's life, pushing all these things before them, and get on as well as they can. How many a poor immortal soul have I met well-nigh crushed and smothered under its load, creeping down the road of life, pushing before it a barn seventy-five feet by forty, its Augean stables never cleansed,² and one hundred acres of land, tillage, mowing, pasture, and woodlot! The portionless, who struggle with no such unnecessary inherited encumbrances, find it labor enough to subdue and cultivate a few cubic feet of flesh.

¹ One of the twelve labors of Hercules was the slaying of the Lernean hydra, which had nine heads. Whenever Hercules cut one off, two sprouted in its place until his charioteer Iolaus seared the stumps with a red-hot iron.

² The cleansing of the Augean stables was another labor of Hercules.

But men labor under a mistake. The better part of the man is soon plowed into the soil for compost. By a seeming fate, commonly called necessity, they are employed, as it says in an old book, laying up treasures which moth and rust will corrupt and thieves break through and steal. It is a fool's life, as they will find when they get to the end of it, if not before. It is said that Deucalion and Pyrrha created men by throwing stones over their heads behind them:—

Inde genus durum sumus, experiens-
que laborum,
Et documenta damus quâ simus origine
nati.³

Or, as Raleigh rhymes it in his sonorous way,—

"From thence our kind hard-hearted is,
enduring pain and care,
Approving that our bodies of a stony
nature are."

So much for a blind obedience to a blundering oracle, throwing the stones over their heads behind them, and not seeing where they fell.

Most men, even in this comparatively free country, through mere ignorance and mistake, are so occupied with the factitious cares and superfluously coarse labors of life that its finer fruits cannot be plucked by them. Their fingers, from excessive toil, are too clumsy and tremble too much for that. Actually, the laboring man has not leisure for a true integrity day by day; he cannot afford to sustain the manliest relations to men; his labor would be depreciated in the market. He has no time to be anything but a machine. How can he remember well his ignorance—which his growth requires—who has so often to use his knowledge? We should feed and clothe him gratuitously sometimes, and recruit him with our cordials, before we judge of him. The finest qualities of our nature, like the bloom on fruits, can be preserved

only by the most delicate handling. Yet we do not treat ourselves nor one another thus tenderly.

Some of you, we all know, are poor, find it hard to live, are sometimes, as it were, gasping for breath. I have no doubt that some of you who read this book are unable to pay for all the dinners which you have actually eaten, or for the coats and shoes which are fast wearing or are already worn out, and have come to this page to spend borrowed or stolen time, robbing your creditors of an hour. It is very evident what mean and sneaking lives many of you live, for my sight has been whetted by experience; always on the limits, trying to-day, insolvent, seeking to curry favor, to get into business and trying to get out of debt, a very ancient slough, called by the Latins *aes alienum*, another's brass, for some of their coins were made of brass; still living, and dying, and buried by this other's brass; always promising to pay, promising to pay, to-morrow, and dying to get custom, by how many modes, only not state-prison offences; lying, flattering, voting, contracting yourselves into a nutshell of civility, or dilating into an atmosphere of thin and vaporous generosity, that you may persuade your neighbor to let you make his shoes, or his hat, or his coat, or his carriage, or import his groceries for him; making yourselves sick, that you may lay up something against a sick day, something to be tucked away in an old chest, or in a stocking behind the plastering, or, more safely, in the brick bank; no matter where, no matter how much or how little.

I sometimes wonder that we can be so frivolous, I may almost say, as to attend to the gross but somewhat foreign form of servitude called Negro Slavery, there are so many keen and subtle masters that enslave both North and South. It is hard to have a Southern overseer; it is worse to have a Northern one; but worst of all when you are the slave-driver of yourself.

³ Ovid's *Metamorphoses*, I, 414-415.

Talk of a divinity in man! Look at the teamster on the highway, wending to market by day or night; does any divinity stir within him? His highest duty to fodder and water his horses! What is his destiny to him compared with the shipping interests? Does not he drive for Squire Make-a-stir? How godlike, how immortal, is he? See how he cowers and sneaks, how vaguely all the day he fears, not being immortal nor divine, but the slave and prisoner of his own opinion of himself, a fame won by his own deeds. Public opinion is a weak tyrant compared with our own private opinion. What a man thinks of himself, that it is which determines, or rather indicates, his fate. Self-emanicipation even in the West Indian provinces of the fancy and imagination,—what Wilberforce⁴ is there to bring that about? Think, also, of the ladies of the land weaving toilet cushions against the last day, not to betray too green an interest in their fates! As if you could kill time without injuring eternity.

The mass of men lead lives of quiet desperation. What is called resignation is confirmed desperation. From the desperate city you go into the desperate country, and have to console yourself with the bravery of minks and muskrats. A stereotyped but unconscious despair is concealed even under what are called the games and amusements of mankind. There is no play in them, for this comes after work. But it is a characteristic of wisdom not to do desperate things.

When we consider what, to use the words of the catechism, is the chief end of man, and what are the true necessities and means of life, it appears as if men had deliberately chosen the common mode of living because they preferred it to any other. Yet they honestly think there is no choice left. But alert and healthy natures remember that the sun rose clear. It is never too late to give up our prejudices. No way of thinking or doing, however ancient, can be trusted without proof. What everybody echoes or in silence passes by as true to-day may turn out to be false-

hood to-morrow, mere smoke of opinion, which some had trusted for a cloud that would sprinkle fertilizing rain on their fields. What old people say you cannot do, you try and find that you can. Old deeds for old people, and new deeds for new. Old people did not know enough once, perchance, to fetch fresh fuel to keep the fire a-going; new people put a little dry wood under a pot, and are whirled round the globe with the speed of birds, in a way to kill old people, as the phrase is. Age is no better, hardly so well, qualified for an instructor as youth, for it has not profited so much as it has lost. One may almost doubt if the wisest man has learned anything of absolute value by living. Practically, the old have no very important advice to give the young, their own experience has been so partial, and their lives have been such miserable failures, for private reasons, as they must believe; and it may be that they have some faith left which belies that experience, and they are only less young than they were. I have lived some thirty years on this planet, and I have yet to hear the first syllable of valuable or even earnest advice from my seniors. They have told me nothing, and probably cannot tell me anything to the purpose. Here is life, an experiment to a great extent untried by me; but it does not avail me that they have tried it. If I have any experience which I think valuable, I am sure to reflect that this my Mentors said nothing about.

One farmer says to me, "You cannot live on vegetable food solely, for it furnishes nothing to make bones with;" and so he religiously devotes a part of his day to supplying his system with the raw material of bones; walking all the while he talks behind his oxen, which, with vegetable-made bones, jerk him and his lumbering plow along in spite of every obstacle. Some things are really necessities of life in some circles, the most helpless and diseased,

⁴ William Wilberforce (1759-1853), leader in the British abolition movement.

which in others are luxuries merely, and in others still are entirely unknown.

The whole round of human life seems to some to have been gone over by their predecessors, both the heights and the valleys, and all things to have been cared for. According to Evelyn,⁵ "the wise Solomon prescribed ordinances for the very distances of trees; and the Roman prætors have decided how often you may go into your neighbor's land to gather the acorns which fall on it without trespass, and what share belongs to that neighbor." Hippocrates has even left directions how we should cut our nails; that is, even with the ends of the fingers, neither shorter nor longer. Undoubtedly the very tedium and ennui which presume to have exhausted the variety and the joys of life are as old as Adam. But man's capacities have never been measured; nor are we to judge of what he can do by any precedents, so little has been tried. Whatever have been thy failures hitherto, "be not afflicted, my child, for who shall assign to thee what thou hast left undone?"

We might try our lives by a thousand simple tests; as, for instance, that the same sun which ripens my beans illumines at once a system of earths like ours. If I had remembered this it would have prevented some mistakes. This was not the light in which I hoed them. The stars are the apexes of what wonderful triangles! What distant and different beings in the various mansions of the universe are contemplating the same one at the same moment! Nature and human life are as various as our several constitutions. Who shall say what prospect life offers to another? Could a greater miracle take place than for us to look through each other's eyes for an instant? We should live in all the ages of the world in an hour; ay, in all the worlds of the ages. History, Poetry, Mythology!—I know of no reading of another's experience so startling and informing as this would be.

The greater part of what my neighbors call good I believe in my soul to be bad,

and if I repent of anything, it is very likely to be my good behavior. What demon possessed me that I behaved so well? You may say the wisest thing you can, old man,—you who have lived seventy years, not without honor of a kind,—I hear an irresistible voice which invites me away from all that. One generation abandons the enterprises of another like stranded vessels.

I think that we may safely trust a good deal more than we do. We may waive just so much care of ourselves as we honestly bestow elsewhere. Nature is as well adapted to our weakness as to our strength. The incessant anxiety and strain of some is a well-nigh incurable form of disease. We are made to exaggerate the importance of what work we do; and yet how much is not done by us! or, what if we had been taken sick? How vigilant we are! determined not to live by faith if we can avoid it; all the day long on the alert, at night we unwillingly say our prayers and commit ourselves to uncertainties. So thoroughly and sincerely are we compelled to live, reverencing our life, and denying the possibility of change. This is the only way, we say; but there are as many ways as there can be drawn radii from one centre. All change is a miracle to contemplate; but it is a miracle which is taking place every instant. Confucius said, "To know that we know what we know, and that we do not know what we do not know, that is true knowledge." When one man has reduced a fact of the imagination to be a fact to his understanding, I foresee that all men will at length establish their lives on that basis.

Let us consider for a moment what most of the trouble and anxiety which I have referred to is about, and how much it is necessary that we be troubled, or at least careful. It would be some advantage to live a primitive and frontier life, though in the midst of an outward civilization, if

⁵ John Evelyn (1620-1706), English diarist and writer on arboriculture, etc. His book on trees, entitled *Sylva*, is often referred to by Thoreau.

only to learn what are the gross necessities of life and what methods have been taken to obtain them; or even to look over the old day-books of the merchants, to see what it was that men most commonly bought at the stores, what they stored, that is, what are the grossest groceries. For the improvements of ages have had but little influence on the essential laws of man's existence: as our skeletons, probably, are not to be distinguished from those of our ancestors.

By the words, *necessary of life*, I mean whatever, of all that man obtains by his own exertions, has been from the first, or from long use has become, so important to human life that few, if any, whether from savageness, or poverty, or philosophy, ever attempt to do without it. To many creatures there is in this sense but one necessary of life, Food. To the bison of the prairie it is a few inches of palatable grass, with water to drink; unless he seeks the Shelter of the forest or the mountain's shadow. None of the brute creation requires more than Food and Shelter. The necessities of life for man in this climate may, accurately enough, be distributed under the several heads of Food, Shelter, Clothing, and Fuel; for not till we have secured these are we prepared to entertain the true problems of life with freedom and a prospect of success. Man has invented, not only houses, but clothes and cooked food; and possibly from the accidental discovery of the warmth of fire, and the consequent use of it, at first a luxury, arose the present necessity to sit by it. We observe cats and dogs acquiring the same second nature. By proper Shelter and Clothing we legitimately retain our own internal heat; but with an excess of these, or of Fuel, that is, with an external heat greater than our own internal, may not cookery properly be said to begin? Darwin, the naturalist, says of the inhabitants of Tierra del Fuego,⁶ that while his own party, who were well clothed and sitting close to a fire, were far from too warm, these naked savages, who were farther off, were observed, to his great

surprise, "to be streaming with perspiration at undergoing such a roasting." So, we are told, the New Hollander goes naked with impunity, while the European shivers in his clothes. Is it impossible to combine the hardness of these savages with the intellectualness of the civilized man? According to Liebig,⁷ man's body is a stove, and food the fuel which keeps up the internal combustion in the lungs. In cold weather we eat more, in warm less. The animal heat is the result of a slow combustion, and disease and death take place when this is too rapid; or for want of fuel, or from some defect in the draught, the fire goes out. Of course the vital heat is not to be confounded with fire; but so much for analogy. It appears, therefore, from the above list, that the expression *animal life*, is nearly synonymous with the expression, *animal heat*; for while Food may be regarded as the Fuel which keeps up the fire within us,—and Fuel serves only to prepare that Food or to increase the warmth of our bodies by addition from without,—Shelter and Clothing also serve only to retain the *heat* thus generated and absorbed.

The grand necessity, then, for our bodies, is to keep warm, to keep the vital heat in us. What pains we accordingly take, not only with our Food, and Clothing, and Shelter, but with our beds, which are our nightclothes, robbing the nests and breasts of birds to prepare this shelter within a shelter, as the mole has its bed of grass and leaves at the end of its burrow! The poor man is wont to complain that this is a cold world; and to cold, no less physical than social, we refer directly a great part of our ills. The summer, in some climates, makes possible to man a sort of Elysian life. Fuel, except to cook his Food, is then

⁶ Charles Robert Darwin (1809-1882), recounts his observations on Tierra del Fuego in his *A Naturalist's Voyage Round the World*, which Thoreau had read. Darwin's more famous *On the Origin of Species* was published five years after *Walden*.

⁷ Baron Justus von Liebig (1803-1873), German chemist.

unnecessary; the sun is his fire, and many of the fruits are sufficiently cooked by its rays; while Food generally is more various, and more easily obtained, and Clothing and Shelter are wholly or half unnecessary. At the present day, and in this country, as I find by my own experience, a few implements, a knife, an axe, a spade, a wheelbarrow, etc., and for the studious, lamp-light, stationery, and access to a few books, rank next to necessities, and can all be obtained at a trifling cost. Yet some, not wise, go to the other side of the globe, to barbarous and unhealthy regions, and devote themselves to trade for ten or twenty years, in order that they may live,—that is, keep comfortably warm,—and die in New England at last. The luxuriously rich are not simply kept comfortably warm, but unnaturally hot; as I implied before, they are cooked, of course *à la mode*.

Most of the luxuries, and many of the so-called comforts of life, are not only not indispensable, but positive hindrances to the elevation of mankind. With respect to luxuries and comforts, the wisest have ever lived a more simple and meagre life than the poor. The ancient philosophers, Chinese, Hindoo, Persian, and Greek, were a class than which none has been poorer in outward riches, none so rich in inward. We know not much about them. It is remarkable that *we* know so much of them as we do. The same is true of the more modern reformers and benefactors of their race. None can be an impartial or wise observer of human life but from the vantage ground of what *we* should call voluntary poverty. Of a life of luxury the fruit is luxury, whether in agriculture, or commerce, or literature, or art. There are nowadays professors of philosophy, but not philosophers. Yet it is admirable to profess because it was once admirable to live. To be a philosopher is not merely to have subtle thoughts, nor even to found a school, but so to love wisdom as to live according to its dictates, a life of simplicity, independence, magnanimity, and trust. It is to solve some of the problems of life, not

only theoretically, but practically. The success of great scholars and thinkers is commonly a courtier-like success, not kingly, not manly. They make shift to live merely by conformity, practically as their fathers did, and are in no sense the progenitors of a nobler race of men. But why do men degenerate ever? What makes families run out? What is the nature of the luxury which enervates and destroys nations? Are we sure that there is none of it in our own lives? The philosopher is in advance of his age even in the outward form of his life. He is not fed, sheltered, clothed, warmed, like his contemporaries. How can a man be a philosopher and not maintain his vital heat by better methods than other men?

When a man is warmed by the several modes which I have described, what does he want next? Surely not more warmth of the same kind, as more and richer food, larger and more splendid houses, finer and more abundant clothing, more numerous, incessant, and hotter fires, and the like. When he has obtained those things which are necessary to life, there is another alternative than to obtain the superfluities; and that is, to adventure on life now, his vacation from humbler toil having commenced. The soil, it appears, is suited to the seed, for it has sent its radicle downward, and it may now send its shoot upward also with confidence. Why has man rooted himself thus firmly in the earth, but that he may rise in the same proportion into the heavens above?—for the nobler plants are valued for the fruit they bear at last in the air and light, far from the ground, and are not treated like the humbler esculents, which, though they may be biennials, are cultivated only till they have perfected their root, and often cut down at top for this purpose, so that most would not know them in their flowering season.

I do not mean to prescribe rules to strong and valiant natures, who will mind their own affairs whether in heaven or hell, and perchance build more magnificently and spend more lavishly than the

richest, without ever impoverishing themselves, not knowing how they live,—if, indeed, there are any such, as has been dreamed, nor to those who find their encouragement and inspiration in precisely the present condition of things, and cherish it with the fondness and enthusiasm of lovers,—and, to some extent, I reckon myself in this number; I do not speak to those who are well employed, in whatever circumstances, and they know whether they are well employed or not;—but mainly to the mass of men who are discontented, and idly complaining of the hardness of their lot or of the times, when they might improve them. There are some who complain most energetically and inconsolably of any, because they are, as they say, doing their duty. I also have in my mind that seemingly wealthy, but most terribly impoverished class of all, who have accumulated dross, but know not how to use it, or get rid of it, and thus have forged their own golden or silver fetters.

If I should attempt to tell how I have desired to spend my life in years past, it would probably surprise those of my readers who are somewhat acquainted with its actual history; it would certainly astonish those who know nothing about it. I will only hint at some of the enterprises which I have cherished.

In any weather, at any hour of the day or night, I have been anxious to improve the nick of time, and notch it on my stick too; to stand on the meeting of two eternities, the past and future, which is precisely the present moment; to toe that line. You will pardon some obscurities, for there are more secrets in my trade than in most men's, and yet not voluntarily kept, but inseparable from its very nature. I would gladly tell all that I know about it, and never paint "No Admittance" on my gate.

I long ago lost a hound, a bay horse, and a turtledove, and am still on their trail. Many are the travellers I have spoken concerning them, describing their tracks and what calls they answered to. I have

met one or two who had heard the hound, and the tramp of the horse, and even seen the dove disappear behind a cloud, and they seemed as anxious to recover them as if they had lost them themselves.⁸

To anticipate, not the sunrise and the dawn merely, but, if possible, Nature herself! How many mornings, summer and winter, before yet any neighbor was stirring about his business, have I been about mine! No doubt, many of my townsmen have met me returning from this enterprise, farmers starting for Boston in the twilight, or woodchoppers going to their work. It is true, I never assisted the sun materially in his rising, but, doubt not, it was of the last importance only to be present at it.

So many autumn, ay, and winter days, spent outside the town, trying to hear what was in the wind, to hear and carry it to express! I well-nigh sunk all my capital in it, and lost my own breath into the bargain, running in the face of it. If it had concerned either of the political parties, depend upon it, it would have appeared in the *Gazette* with the earliest intelligence. At other times watching from the observatory of some cliff or tree, to telegraph any new arrival; or waiting at evening on the hill-tops for the sky to fall, that I might catch something, though I never caught much, and that, manna-wise, would dissolve again in the sun.

For a long time I was reporter to a journal,⁹ of no very wide circulation, whose editor has never yet seen fit to print the

⁸ In the original manuscript, this paragraph, which has been the subject of much controversy, appears as a footnote in the chapter on "Winter Animals." See Van Doren's *Henry David Thoreau* and T. M. Raysor, "The Love Story of Thoreau," *Studies in Philology*, xxiii, 457-463 (October, 1926). Thoreau told Miss Ward, the aunt of Ellen Sewall, that the hound symbolized the boy Edmund Sewall; the bay horse, John Thoreau, Henry's brother; and the turtle-dove, Ellen Sewall, to whom Henry once proposed marriage.

⁹ Doubtless his own journal, or diary, is here referred to. In 1906 it was published in fourteen volumes.

bulk of my contributions, and, as is too common with writers, I got only my labor for my pains. However, in this case my pains were their own reward.

For many years I was self-appointed inspector of snow-storms and rain-storms, and did my duty faithfully; surveyor, if not of highways, then of forest paths and all across-lot routes, keeping them open, and ravines bridged and passable at all seasons, where the public heel had testified to their utility.

I have looked after the wild stock of the town, which give a faithful herdsman a good deal of trouble by leaping fences; and I have had an eye to the unfrequented nooks and corners of the farm; though I did not always know whether Jonas or Solomon worked in a particular field to-day; that was none of my business. I have watered the red huckleberry, the sand cherry and the nettle-tree, the red pine and the black ash, the white grape and the yellow violet, which might have withered else in dry seasons.

In short, I went on thus for a long time (I may say it without boasting), faithfully minding my business, till it became more and more evident that my townsmen would not after all admit me into the list of town officers, nor make my place a sinecure with a moderate allowance. My accounts, which I can swear to have kept faithfully, I have, indeed, never got audited, still less accepted, still less paid and settled. However, I have not set my heart on that.

Not long since, a strolling Indian went to sell baskets at the house of a well-known lawyer in my neighborhood.¹⁰ "Do you wish to buy any baskets?" he asked. "No, we do not want any," was the reply. "What!" exclaimed the Indian as he went out the gate, "do you mean to starve us?" Having seen his industrious white neighbors so well off,—that the lawyer had only to weave arguments, and, by some magic, wealth and standing followed,—he had said to himself: I will go into business; I will weave baskets; it is a thing which I

can do. Thinking that when he had made the baskets he would have done his part, and then it would be the white man's to buy them. He had not discovered that it was necessary for him to make it worth the other's while to buy them, or at least make him think that it was so, or to make something else which it would be worth his while to buy. I too had woven a kind of basket of a delicate texture, but I had not made it worth any one's while to buy them. Yet not the less in my case, did I think it worth my while to weave them, and instead of studying how to make it worth men's while to buy my baskets, I studied rather how to avoid the necessity of selling them. The life which men praise and regard as successful is but one kind. Why should we exaggerate any one kind at the expense of the others?

Finding that my fellow-citizens were not likely to offer me any room in the court house, or any curacy or living anywhere else, but I must shift for myself, I turned my face more exclusively than ever to the woods, where I was better known. I determined to go into business at once, and not wait to acquire the usual capital, using such slender means as I had already got. My purpose in going to Walden Pond was not to live cheaply nor to live dearly there, but to transact some private business with the fewest obstacles, to be hindered from accomplishing which for want of a little common sense, a little enterprise and business talent, appeared not so sad as foolish.

I have always endeavored to acquire strict business habits; they are indispensable to every man. If your trade is with the Celestial Empire, then some small counting house on the coast, in some Salem harbor, will be fixture enough. You will export such articles as the country affords, purely native products, much ice and pine timber and a little granite, always in native bottoms. These will be good ventures. To oversee all the details yourself in person; to be at once pilot and captain, and owner

¹⁰ Samuel Hoar.

and underwriter; to buy and sell and keep the accounts; to read every letter received, and write or read every letter sent; to superintend the discharge of imports night and day; to be upon many parts of the coast almost at the same time,—often the richest freight will be discharged upon a Jersey shore;—to be your own telegraph, unweariedly sweeping the horizon, speaking all passing vessels bound coastwise; to keep up a steady despatch of commodities, for the supply of such a distant and exorbitant market, to keep yourself informed of the state of the markets, prospects of war and peace everywhere, and anticipate the tendencies of trade and civilizations,—taking advantage of the results of all exploring expeditions, using new passages and all improvements in navigation;—charts to be studied, the position of reefs and new lights and buoys to be ascertained, and ever, and ever, the logarithmic tables to be corrected, for by the error of some calculator the vessel often splits upon a rock that should have reached a friendly pier,—there is the untold fate of *La Pérouse*¹¹;—universal science to be kept pace with, studying the lives of all great discoverers and navigators, great adventurers and merchants, from Hanno¹² and the Phœnicians down to our day; in fine, account of stock to be taken from time to time, to know how you stand. It is a labor to task the faculties of a man,—such problems of profit and loss, of interest, of tare and tret, and gauging of all kinds in it, as demand a universal knowledge.

I have thought that Walden Pond would be a good place for business, not solely on account of the railroad and the ice trade; it offers advantages which it may not be good policy to divulge; it is a good port and a good foundation. No Neva marshes to be filled; though you must everywhere build on piles of your own driving. It is said that a flood-tide, with a westerly wind, and ice in the Neva, would sweep St. Petersburg from the face of the earth.

As this business was to be entered into without the usual capital, it may not be

easy to conjecture where those means, that will still be indispensable to every such undertaking, were to be obtained. As for Clothing, to come at once to the practical part of the question, perhaps we are led oftener by the love of novelty and a regard for the opinions of men, in procuring it, than by a true utility. Let him who has work to do recollect that the object of clothing is, first, to retain the vital heat, and secondly, in this state of society, to cover nakedness, and he may judge how much of any necessary or important work may be accomplished without adding to his wardrobe. Kings and queens who wear a suit but once, though made by some tailor or dressmaker to their majesties, cannot know the comfort of wearing a suit that fits. They are no better than wooden horses to hang the clean clothes on. Every day our garments become more assimilated to ourselves, receiving the impress of the wearer's character, until we hesitate to lay them aside without such delay and medical appliances and some such solemnity even as our bodies. No man ever stood the lower in my estimation for having a patch in his clothes; yet I am sure that there is greater anxiety, commonly, to have fashionable, or at least clean and unpatched clothes, than to have a sound conscience. But even if the rent is not mended, perhaps the worst vice betrayed is improvidence. I sometimes try my acquaintances by such tests as this,—Who could wear a patch, or two extra seams only, over the knee? Most behave as if they believed that their prospects for life would be ruined if they should do it. It would be easier for them to hobble to town with a broken leg than with a broken pantaloons. Often if an accident happens to a gentleman's legs, they can be mended; but if a similar accident happens to the legs of his pantaloons,

¹¹ There were no survivors to tell the story of the probable shipwreck of the two ships of the Comte de la Pérouse, explorer, in 1788.

¹² Carthaginian explorer and colonizer of the 5th Century B. C.

there is no help for it; for he considers, not what is truly respectable, but what is respected. We know but few men, a great many coats and breeches. Dress a scarecrow in your last shift, you standing shiftless by, who would not soonest salute the scarecrow? Passing a cornfield the other day, close by a hat and coat on a stake, I recognized the owner of the farm. He was only a little more weather-beaten than when I saw him last. I have heard of a dog that barked at every stranger who approached his master's premises with clothes on, but was easily quieted by a naked thief. It is an interesting question how far men would retain their relative rank if they were divested of their clothes. Could you, in such a case, tell surely of any company of civilized men which belonged to the most respected class? When Madam Pfeiffer,¹³ in her adventurous travels round the world, from east to west, had got so near home as Asiatic Russia, she says that she felt the necessity of wearing other than a travelling dress, when she went to meet the authorities, for she "was now in a civilized country, where . . . people are judged of by their clothes." Even in our democratic New England towns the accidental possession of wealth, and its manifestation in dress and equipage alone, obtain for the possessor almost universal respect. But they who yield such respect, numerous as they are, are so far heathen, and need to have a missionary sent to them. Beside, clothes introduced sewing, a kind of work which you may call endless; a woman's dress, at least, is never done.

A man who has at length found something to do will not need to get a new suit to do it in; for him the old will do, that has lain dusty in the garret for an indeterminate period. Old shoes will serve a hero longer than they have served his valet,—if a hero ever has a valet,—bare feet are older than shoes, and he can make them do. Only they who go to soirées and legislative halls must have new coats, coats to change as often as the man changes in them. But if my jacket and trousers, my

hat and shoes, are fit to worship God in, they will do; will they not? Who ever saw his old clothes,—his old coat, actually worn out, resolved into its primitive elements so that it was not a deed of charity to bestow it on some poor boy, by him perchance to be bestowed on some poorer still, or shall we say richer, who could do with less? I say, beware of all enterprises that require new clothes, and not rather a new wearer of clothes. If there is not a new man, how can the new clothes be made to fit? If you have any enterprise before you, try it in your old clothes. All men want, not something to *do with*, but something to *do*, or rather something to *be*. Perhaps we should never procure a new suit, however ragged or dirty the old, until we have so conducted, so enterprised or sailed in some way, that we feel like new men in the old, and that to retain it would be like keeping new wine in old bottles. Our moulting season, like that of the fowls, must be a crisis in our lives. The loon retires to solitary ponds to spend it. Thus also the snake casts its slough, and the caterpillar its wormy coat, by an internal industry and expansion; for clothes are but our outmost cuticle and mortal coil. Otherwise we shall be found sailing under false colors, and be inevitably cashiered at last by our own opinion, as well as that of mankind.

We don garment after garment, as if we grew like exogenous plants by addition without. Our outside and often thin and fanciful clothes are our epidermis, or false skin, which partakes not of our life, and may be stripped off here and there without fatal injury; our thicker garments, constantly worn, are our cellular integument, or cortex; but our shirts are our liber, or true bark, which cannot be removed without girdling and so destroying the man. I believe that all races at some seasons wear something equivalent to the shirt. It is desirable that a man be clad so simply that he can lay his hands on himself in the dark,

¹³ Ida Laura (Reyer) Pfeiffer (1797-1858), German traveler and author.

and that he live in all respects so compactly and preparedly that, if an enemy take the town, he can, like the old philosopher,¹⁴ walk out the gate empty-handed without anxiety. While one thick garment is, for most purposes, as good as three thin ones, and cheap clothing can be obtained at prices really to suit customers; while a thick coat can be bought for five dollars, which will last as many years, thick pantaloons for two dollars, cowhide boots for a dollar and a half a pair, a summer hat for a quarter of a dollar, and a winter cap for sixty-two and a half cents, or a better be made at home at a nominal cost, where is he so poor that, clad in such a suit, of *his own earning*, there will not be found wise men to do him reverence?

When I ask for a garment of a particular form, my tailoress tells me gravely, "They do not make them so now," not emphasizing the "They" at all, as if she quoted an authority as impersonal as the Fates, and I find it difficult to get made what I want, simply because she cannot believe that I mean what I say, that I am so rash. When I hear this oracular sentence, I am for a moment absorbed in thought, emphasizing to myself each word separately that I may come at the meaning of it, that I may find out by what degree of consanguinity *They* are related to *me*, and what authority they may have in an affair which affects me so nearly; and, finally, I am inclined to answer her with equal mystery, and without any more emphasis of the "they,"—"It is true, they did not make them so recently, but they do now." Of what use this measuring of me if she does not measure my character, but only the breadth of my shoulders, as it were a peg to hang the coat on? We worship not the Graces, nor the Paræ, but Fashion. She spins and weaves and cuts with full authority. The head monkey at Paris puts on a traveller's cap, and all the monkeys in America do the same. I sometimes despair of getting anything quite simple and honest done in this world by the help of men. They would have to be passed through a

powerful press first, to squeeze their old notions out of them, so that they would not soon get upon their legs again; and then there would be some one in the company with a maggot in his head, hatched from an egg deposited there nobody knows when, for not even fire kills these things, and you would have lost your labor. Nevertheless, we will not forget that some Egyptian wheat was handed down to us by a mummy.

On the whole, I think that it cannot be maintained that dressing has in this or any country risen to the dignity of an art. At present men make shift to wear what they can get. Like shipwrecked sailors, they put on what they can find on the beach, and at a little distance, whether of space or time, laugh at each other's masquerade. Every generation laughs at the old fashions, but follows religiously the new. We are amused at beholding the costume of Henry VIII., or Queen Elizabeth, as much as if it was that of the King and Queen of the Cannibal Islands. All costume off a man is pitiful or grotesque. It is only the serious eye peering from and the sincere life passed within it which restrain laughter and consecrate the costume of any people. Let Harlequin be taken with a fit of the colic and his trappings will have to serve that mood too. When the soldier is hit by a cannon-ball, rags are as becoming as purple.

The childish and savage taste of men and women for new patterns keeps how many shaking and squinting through kaleidoscopes that they may discover the particular figure which this generation requires to-day. The manufacturers have learned that this taste is merely whimsical. Of two patterns which differ only by a few threads more or less of a particular color, the one will be sold readily, the other lie on the shelf, though it frequently happens that after the lapse of a season the latter becomes the most fashionable. Comparatively,

¹⁴ Bias (c. 6th Century B. C.). Cf. Thoreau's *Journals*, July 12, 1840.

tattooing is not the hideous custom which it is called. It is not barbarous merely because the printing is skin-deep and unalterable.

I cannot believe that our factory system is the best mode by which men may get clothing. The condition of the operatives is becoming every day more like that of the English; and it cannot be wondered at, since, as far as I have heard or observed, the principal object is, not that mankind may be well and honestly clad, but, unquestionably, that the corporations may be enriched. In the long run men hit only what they aim at. Therefore, though they should fail immediately, they had better aim at something high.

As for a Shelter, I will not deny that this is now a necessary of life, though there are instances of men having done without it for long periods in colder countries than this. Samuel Laing¹⁵ says that "the Laplander in his skin dress, and in a skin bag which he puts over his head and shoulders, will sleep night after night on the snow . . . in a degree of cold which would extinguish the life of one exposed to it in any woollen clothing." He had seen them asleep thus. Yet he adds, "They are not harder than other people." But, probably, man did not live long on the earth without discovering the convenience which there is in a house, the domestic comforts, which phrase may have originally signified the satisfactions of the house more than of the family; though these must be extremely partial and occasional in those climates where the house is associated in our thoughts with winter or the rainy season chiefly, and two thirds of the year, except for a parasol, is unnecessary. In our climate, in the summer, it was formerly almost solely a covering at night. In the Indian gazettes a wigwam was the symbol of a day's march, and a row of them cut or painted on the bark of a tree signified that so many times they had camped. Man was not made so large limbed and robust but that he must seek to narrow his world, and wall in a space such as fitted him.

He was at first bare and out of doors; but though this was pleasant enough in serene and warm weather, by daylight, the rainy season and the winter, to say nothing of the torrid sun, would perhaps have nipped his race in the bud if he had not made haste to clothe himself with the shelter of a house. Adam and Eve, according to the fable, wore the bower before other clothes. Man wanted a home, a place of warmth, or comfort, first of physical warmth, then the warmth of the affections.

We may imagine a time when, in the infancy of the human race, some enterprising mortal crept into a hollow in a rock for shelter. Every child begins the world again, to some extent, and loves to stay outdoors, even in wet and cold. It plays house, as well as horse, having an instinct for it. Who does not remember the interest with which, when young, he looked at shelving rocks, or any approach to a cave? It was the natural yearning of that portion of our most primitive ancestor which still survived in us. From the cave we have advanced to roofs of palm leaves, of bark and boughs, of linen woven and stretched, of grass and straw, of boards and shingles, of stones and tiles. At last, we know not what it is to live in the open air, and our lives are domestic in more senses than we think. From the hearth the field is a great distance. It would be well, perhaps, if we were to spend more of our days and nights without any obstruction between us and the celestial bodies, if the poet did not speak so much from under a roof, or the saint dwell there so long. Birds do not sing in caves, nor do doves cherish their innocence in dovecots.

However, if one designs to construct a dwelling-house, it behooves him to exercise a little Yankee shrewdness, lest after all he find himself in a workhouse, a labyrinth without a clue, a museum, an almshouse, a prison, or a splendid mausoleum instead. Consider first how slight a shelter is abso-

¹⁵ English writer on economic and social conditions of Scandinavia (1780-1868).

lutely necessary I have seen Penobscot Indians, in this town, living in tents of thin cotton cloth, while the snow was nearly a foot deep around them, and I thought that they would be glad to have it deeper to keep out the wind. Formerly, when how to get my living honestly, with freedom left for my proper pursuits, was a question which vexed me even more than it does now, for unfortunately I am become somewhat callous, I used to see a large box by the railroad, six feet long by three wide, in which the laborers locked up their tools at night; and it suggested to me that every man who was hard pushed might get such a one for a dollar, and, having bored a few auger holes in it, to admit the air at least, get into it when it rained and at night, and hook down the lid, and so have freedom in his love, and in his soul be free.¹⁶ This did not appear the worst, nor by any means a despicable alternative. You could sit up as late as you pleased, and, whenever you got up, go abroad without any landlord or house-lord dogging you for rent. Many a man is harassed to death to pay the rent of a larger and more luxurious box who would not have frozen to death in such a box as this. I am far from jesting. Economy is a subject which admits of being treated with levity, but it cannot so be disposed of. A comfortable house for a rude and hardy race, that lived mostly out of doors, was once made here almost entirely of such materials as Nature furnished ready to their hands. Gookin,¹⁷ who was superintendent of the Indians subject to the Massachusetts Colony, writing in 1674, says, "The best of their houses are covered very neatly, tight and warm, with barks of trees, slipped from their bodies at those seasons when the sap is up, and made into great flakes, with pressure of weighty timber, when they are green. . . . The meaner sort are covered with mats which they make of a kind of bulrush, and are also indifferently tight and warm, but not so good as the former. . . . Some I have seen, sixty or a hundred feet long and thirty feet broad. . . . I have often lodged

in their wigwams, and found them as warm as the best English houses." He adds that they were commonly carpeted and lined within with well-wrought embroidered mats, and were furnished with various utensils. The Indians had advanced so far as to regulate the effect of the wind by a mat suspended over the hole in the roof and moved by a string. Such a lodge was in the first instance constructed in a day or two at most, and taken down and put up in a few hours; and every family owned one, or its apartment in one.

In the savage state every family owns a shelter as good as the best, and sufficient for its coarser and simpler wants; but I think that I speak within bounds when I say that, though the birds of the air have their nests, and the foxes their holes, and the savages their wigwams, in modern civilized society not more than one half the families own a shelter. In the large towns and cities, where civilization especially prevails, the number of those who own a shelter is a very small fraction of the whole. The rest pay an annual tax for this outside garment of all, become indispensable summer and winter, which would buy a village of Indian wigwams, but now helps to keep them poor as long as they live. I do not mean to insist here on the disadvantage of hiring compared with owning, but it is evident that the savage owns his shelter because it costs so little, while the civilized man hires his commonly because he cannot afford to own it; nor can he, in the long run, any better afford to hire. But, answers one, by merely paying this tax the poor civilized man secures an abode which is a palace compared with the savage's. An annual rent of from twenty-five to a hundred dollars (these are the country rates) entitles him to the

¹⁶ "If I have freedom in my love
And in my soul am free,
Angels alone that soar above
Enjoy such liberty."

—Richard Lovelace, "*To Althea from Prison*."

¹⁷ See Daniel Gookin, Vol. I, pp. 97-101.

benefit of the improvements of centuries, spacious apartments, clean paint and paper, Rumford fireplace,¹⁸ back plastering, Venetian blinds, copper pump, spring lock, a commodious cellar, and many other things. But how happens it that he who is said to enjoy these things is so commonly a *poor* civilized man, while the savage, who has them not, is rich as a savage? If it is asserted that civilization is a real advance in the condition of man,—and I think that it is, though only the wise improve their advantages,—it must be shown that it has produced better dwellings without making them more costly, and the cost of a thing is the amount of what I will call life which is required to be exchanged for it, immediately or in the long run. An average house in this neighborhood costs perhaps eight hundred dollars, and to lay up this sum will take from ten to fifteen years of the laborer's life, even if he is not encumbered with a family,—estimating the pecuniary value of every man's labor at one dollar a day, for if some receive more, others receive less;—so that he must have spent more than half his life commonly before *his* wigwam will be earned. If we suppose him to pay a rent instead, this is but a doubtful choice of evils. Would the savage have been wise to exchange his wigwam for a palace on these terms?

It may be guessed that I reduce almost the whole advantage of holding this superfluous property as a fund in store against the future, so far as the individual is concerned, mainly to the defraying of funeral expenses. But perhaps a man is not required to bury himself. Nevertheless this points to an important distinction between the civilized man and the savage; and, no doubt, they have designs on us for our benefit, in making the life of a civilized people an *institution*, in which the life of the individual is to a great extent absorbed, in order to preserve and perfect that of the race. But I wish to show at what a sacrifice this advantage is at present obtained, and to suggest that we may possibly so live as

to secure all the advantage without suffering any of the disadvantage. What mean ye by saying that the poor ye have always with you, or that the fathers have eaten sour grapes, and the children's teeth are set on edge?

"As I live, saith the Lord God, ye shall not have occasion any more to use this proverb in Israel.

"Behold all souls are mine; as the soul of the father, so also the soul of the son is mine: the soul that sinneth, it shall die."¹⁹

When I consider my neighbors, the farmers of Concord, who are at least as well off as the other classes, I find that for the most part they have been toiling twenty, thirty, or forty years, that they may become the real owners of their farms, which commonly they have inherited with encumbrances, or else bought with hired money,—and we may regard one third of that toil as the cost of their houses,—but commonly they have not paid for them yet. It is true, the encumbrances sometimes outweigh the value of the farm, so that the farm itself becomes one great encumbrance, and still a man is found to inherit it, being well acquainted with it, as he says. On applying to the assessors, I am surprised to learn that they cannot at once name a dozen in the town who own their farms free and clear. If you would know the history of these homesteads, inquire at the bank where they are mortgaged. The man who has actually paid for his farm with labor on it is so rare that every neighbor can point to him. I doubt if there are three such men in Concord. What has been said of the merchants, that a very large majority, even ninety-seven in a hundred, are sure to fail, is equally true of the farmers. With regard to the merchants, however, one of them says pertinently that a great part of their failures

¹⁸ Benjamin Thompson, Count Rumford (1753-1815), set forth the principles for the construction of chimneys and fireplaces.

¹⁹ The quotation and part of the preceding sentence are taken from Ezekiel xviii, 2-4.

are not genuine pecuniary failures, but merely failures to fulfil their engagements, because it is inconvenient; that is, it is the moral character that breaks down. But this puts an infinitely worse face on the matter, and suggests, beside, that probably not even the other three succeed in saving their souls, but are perchance bankrupt in a worse sense than they who fail honestly. Bankruptcy and repudiation are the spring-boards from which much of our civilization vaults and turns its somersets, but the savage stands on the unelastic plank of famine. Yet the Middlesex Cattle Show goes off here with *éclat* annually, as if all the joints of the agricultural machine were suent.²⁰

The farmer is endeavoring to solve the problem of a livelihood by a formula more complicated than the problem itself. To get his shoestrings he speculates in herds of cattle. With consummate skill he has set his trap with a hair spring to catch comfort and independence, and then, as he turned away, got his own leg into it. This is the reason he is poor; and for a similar reason we are all poor in respect to a thousand savage comforts, though surrounded by luxuries. As Chapman sings,—

"The false society of men—
—for earthly greatness
All heavenly comforts rarefies to air."

And when the farmer has got his house, he may not be the richer but the poorer for it, and it be the house that has got him. As I understand it, that was a valid objection urged by Momus against the house which Minerva made, that she "had not made it movable, by which means a bad neighborhood might be avoided;" and it may still be urged, for our houses are such unwieldy property that we are often imprisoned rather than housed in them; and the bad neighborhood to be avoided is our own scurvy selves. I know one or two families, at least, in this town, who, for nearly a generation, have been wishing to sell their houses in the outskirts and move

into the village, but have not been able to accomplish it, and only death will set them free.

Granted that the *majority* are able at last either to own or hire the modern house with all its improvements. While civilization has been improving our houses, it has not equally improved the men who are to inhabit them. It has created palaces, but it was not so easy to create noblemen and kings. And *if the civilized man's pursuits are no worthier than the savage's, if he is employed the greater part of his life in obtaining gross necessities and comforts merely, why should he have a better dwelling than the former?*

But how do the poor *minority* fare? Perhaps it will be found that just in proportion as some have been placed in outward circumstances above the savage, others have been degraded below him. The luxury of one class is counterbalanced by the indigence of another. On the one side is the palace, on the other are the almshouse and "silent poor." The myriads who built the pyramids to be the tombs of the Pharaohs were fed on garlic, and it may be were not decently buried themselves. The mason who finishes the cornice of the palace returns at night perchance to a hut not so good as a wigwam. It is a mistake to suppose that, in a country where the usual evidences of civilization exist, the condition of a very large body of the inhabitants may not be as degraded as that of savages. I refer to the degraded poor, not now to the degraded rich. To know this I should not need to look farther than to the shanties which everywhere border our railroads, that last improvement in civilization; where I see in my daily walks human beings living in sties, and all winter with an open door, for the sake of light, without any visible, often imaginable, wood-pile, and the forms of both old and young are permanently contracted by the long habit of shrinking from cold and misery, and

²⁰ Smooth-running—a dialectal expression.

the development of all their limbs and faculties is checked. It certainly is fair to look at that class by whose labor the works which distinguish this generation are accomplished. Such too, to a greater or less extent, is the condition of the operatives of every denomination in England, which is the great workhouse of the world. Or I could refer you to Ireland, which is marked as one of the white or enlightened spots on the map. Contrast the physical condition of the Irish with that of the North American Indian, or the South Sea Islander, or any other savage race before it was degraded by contact with the civilized man. Yet I have no doubt that that people's rulers are as wise as the average of civilized rulers. Their condition only proves what squalidness may consist with civilization. I hardly need refer now to the laborers in our Southern States who produce the staple exports of this country, and are themselves a staple production of the South. But to confine myself to those who are said to be in *moderate* circumstances.

Most men appear never to have considered what a house is, and are actually though needlessly poor all their lives because they think that they must have such a one as their neighbors have. As if one were to wear any sort of coat which the tailor might cut out for him, or, gradually leaving off palm-leaf hat or cap of wood-chuck skin, complain of hard times because he could not afford to buy him a crown! It is possible to invent a house still more convenient and luxurious than we have, which yet all would admit that man could not afford to pay for. Shall we always study to obtain more of these things, and not sometimes to be content with less? Shall the respectable citizen thus gravely teach, by precept and example, the necessity of the young man's providing a certain number of superfluous glow-shoes,²¹ and umbrellas, and empty guest chambers for empty guests, before he dies? Why should not our furniture be as simple as the Arab's or the Indian's? When I think of the benefactors of the race, whom we have apotheosized as

messengers from heaven, bearers of divine gifts to man, I do not see in my mind any retinue at their heels, any carload of fashionable furniture. Or what if I were to allow—would it not be a singular allowance²²—that our furniture should be more complex than the Arab's, in proportion as we are morally and intellectually his superiors! At present our houses are cluttered and defiled with it, and a good housewife would sweep out the greater part into the dust hole, and not leave her morning's work undone. Morning work! By the blushes of Aurora and the music of Memnon,²³ what should be man's *morning work* in this world? I had three pieces of limestone on my desk, but I was terrified to find that they required to be dusted daily, when the furniture of my mind was all undusted still, and I threw them out the window in disgust. How, then, could I have a furnished house? I would rather sit in the open air, for no dust gathers on the grass, unless where man has broken ground.

It is the luxurious and dissipated who set the fashions which the herd so diligently follow. The traveller who stops at the best houses, so called, soon discovers this, for the publicans presume him to be a Sardanapalus,²³ and if he resigned himself to their tender mercies he would soon be completely emasculated. I think that in the railroad car we are inclined to spend more on luxury than on safety and convenience, and it threatens without attaining these to become no better than a modern drawing-room, with its divans, and ottomans, and sunshades, and a hundred other oriental things, which we are taking west with us, invented for the ladies of the harem and the effeminate natives of the Celestial Empire, which Jonathan should be ashamed to know the names of. I would rather sit on a pumpkin and have it all to myself than

²¹ Galoshes.

²² For note on Memnon see Vol. I, p. 452.

²³ Splendid and magnificent king of Assyria 668-626 B.C.

be crowded on a velvet cushion. I would rather ride on earth in an ox cart, with a free circulation, than go to heaven in the fancy car of an excursion train and breathe a *malaria* all the way.

The very simplicity and nakedness of man's life in the primitive ages imply this advantage, at least, that they left him still but a sojourner in nature. When he was refreshed with food and sleep, he contemplated his journey again. He dwelt, as it were, in a tent in this world, and was either threading the valleys, or crossing the plains, or climbing the mountain-tops. But lo! men have become the tools of their tools. The man who independently plucked the fruits when he was hungry is become a farmer; and he who stood under a tree for shelter, a housekeeper. We now no longer camp as for a night, but have settled down on earth and forgotten heaven. We have adopted Christianity merely as an improved method of *agri-culture*. We have built for this world a family mansion, and for the next a family tomb. The best works of art are the expression of man's struggle to free himself from this condition, but the effect of our art is merely to make this low state comfortable and that higher state to be forgotten. There is actually no place in this village for a work of *fine* art, if any had come down to us, to stand, for our lives, our houses and streets, furnish no proper pedestal for it. There is not a nail to hang a picture on, nor a shelf to receive the bust of a hero or a saint. When I consider how our houses are built and paid for, or not paid for, and their internal economy managed and sustained, I wonder that the floor does not give way under the visitor while he is admiring the gew-gaws upon the mantelpiece, and let him through into the cellar, to some solid and honest though earthy foundation. I cannot but perceive that this so-called rich and refined life is a thing jumped at, and I do not get on in the enjoyment of the *fine* arts which adorn it, my attention being wholly occupied with the jump; for I remember that the greatest genuine leap, due to human

muscles alone, on record, is that of certain wandering Arabs, who are said to have cleared twenty-five feet on level ground. Without factitious support, man is sure to come to earth again beyond that distance. The first question which I am tempted to put to the proprietor of such great impropriety is, Who bolsters you? Are you one of the ninety-seven who fail, or the three who succeed? Answer me these questions, and then perhaps I may look at your bawbles and find them ornamental. The cart before the horse is neither beautiful nor useful. Before we can adorn our houses with beautiful objects the walls must be stripped, and our lives must be stripped, and beautiful housekeeping and beautiful living be laid for a foundation: now, a taste for the beautiful is most cultivated out of doors, where there is no house and no housekeeper.

Old Johnson, in his "Wonder-Working Providence,"²⁴ speaking of the first settlers of this town, with whom he was contemporary, tells us that "they burrow themselves in the earth for their first shelter under some hillside, and, casting the soil aloft upon timber, they make a smoky fire against the earth, at the highest side." They did not "provide them houses," says he, "till the earth, by the Lord's blessing, brought forth bread to feed them," and the first year's crop was so light that "they were forced to cut their bread very thin for a long season." The secretary of the Province of New Netherland,²⁵ writing in Dutch, in 1650, for the information of those who wished to take up land there, states more particularly that "those in New Netherland, and especially in New England, who have no means to build farm-houses at first according to their wishes, dig a square pit in the ground, cellar fashion, six or seven feet deep, as long and

²⁴ Edward Johnson's history of New England (1654).

²⁵ The name was changed to New York when the British captured it in 1664. The secretary referred to was Cornelis van Tienhoven.

as broad as they think proper, case the earth inside with wood all round the wall, and line the wood with the bark of trees or something else to prevent the caving in of the earth; floor this cellar with plank, and wainscot it overhead for a ceiling, raise a roof of spars clear up, and cover the spars with bark or green sods, so that they can live dry and warm in these houses with their entire families for two, three, and four years, it being understood that partitions are run through those cellars which are adapted to the size of the family. The wealthy and principal men in New England, in the beginning of the colonies, commenced their first dwelling-houses in this fashion for two reasons: firstly, in order not to waste time in building, and not to want food the next season; secondly, in order not to discourage poor laboring people whom they brought over in numbers from Fatherland. In the course of three or four years, when the country became adapted to agriculture, they built themselves handsome houses, spending on them several thousands."

In this course which our ancestors took there was a show of prudence at least, as if their principle were to satisfy the more pressing wants first. But are the more pressing wants satisfied now? When I think of acquiring for myself one of our luxurious dwellings, I am deterred, for, so to speak, the country is not yet adapted to *human* culture, and we are still forced to cut our *spiritual* bread far thinner than our forefathers did their wheaten. Not that all architectural ornament is to be neglected even in the rudest periods; but let our houses first be lined with beauty, where they come in contact with our lives, like the tenement of the shell-fish, and not overlaid with it. But, alas! I have been inside one or two of them, and know what they are lined with.

Though we are not so degenerate but that we might possibly live in a cave or a wigwam or wear skins to-day, it certainly is better to accept the advantages, though so dearly bought, which the invention and

industry of mankind offer. In such a neighborhood as this, boards and shingles, lime and bricks, are cheaper and more easily obtained than suitable caves, or whole logs, or bark in sufficient quantities, or even well-tempered clay or flat stones. I speak understandingly on this subject, for I have made myself acquainted with it both theoretically and practically. With a little more wit we might use these materials so as to become richer than the richest now are, and make our civilization a blessing. The civilized man is a more experienced and wiser savage. But to make haste to my own experiment.

Near the end of March, 1845, I borrowed an axe and went down to the woods by Walden Pond, nearest to where I intended to build my house, and began to cut down some tall, arrowy white pines, still in their youth, for timber. It is difficult to begin without borrowing, but perhaps it is the most generous course thus to permit your fellow-men to have an interest in your enterprise. The owner of the axe,²⁶ as he released his hold on it, said that it was the apple of his eye, but I returned it sharper than I received it. It was a pleasant hillside where I worked, covered with pine woods, through which I looked out on the pond, and a small open field in the woods where pines and hickories were springing up. The ice in the pond was not yet dissolved, though there were some open spaces, and it was all dark-colored and saturated with water. There were some slight flurries of snow during the days that I worked there, but for the most part when I came out on to the railroad, on my way home, its yellow sand-heap stretched away gleaming in the hazy atmosphere, and the rails shone in the spring sun, and I heard the lark and pewee and other birds already come to commence another year with us. They were pleasant spring days, in which the winter of man's discontent was thawing as well as the earth, and the life that had

²⁶ It was A. Bronson Alcott, famous Concord philosopher.

lain torpid began to stretch itself. One day, when my axe had come off and I had cut a green hickory for a wedge, driving it with a stone, and had placed the whole to soak in a pond-hole in order to swell the wood, I saw a striped snake run into the water, and he lay on the bottom, apparently without inconvenience, as long as I stayed there, or more than a quarter of an hour; perhaps because he had not yet fairly come out of the torpid state. It appeared to me that for a like reason men remain in their present low and primitive condition, but if they should feel the influence of the spring of springs arousing them, they would of necessity rise to a higher and more ethereal life. I had previously seen the snakes in frosty mornings in my path with portions of their bodies still numb and inflexible, waiting for the sun to thaw them. On the 1st of April it rained and melted the ice, and in the early part of the day, which was very foggy, I heard a stray goose groping about over the pond and cackling as if lost, or like the spirit of the fog.

So I went on for some days cutting and hewing timber, and also studs and rafters, all with my narrow axe, not having many communicable or scholar-like thoughts, singing to myself,—

Men say they know many things;
But lo! they have taken wings,—
The arts and sciences,
And a thousand appliances:
The wind that blows
Is all that anybody knows.²⁷

I hewed the main timbers six inches square, most of the studs on two sides only, and the rafters and floor timbers on one side, leaving the rest of the bark on, so that they were just as straight and much stronger than sawed ones. Each stick was carefully mortised or tenoned by its stump, for I had borrowed other tools by this time. My days in the woods were not very long ones; yet I usually carried my dinner of bread and butter, and read the news-

paper in, which it was wrapped, at noon, sitting amid the green pine boughs which I had cut off, and to my bread was imparted some of their fragrance, for my hands were covered with a thick coat of pitch. Before I had done I was more the friend than the foe of the pine tree, though I had cut down some of them, having become better acquainted with it. Sometimes a Rambler in the wood was attracted by the sound of my axe, and we chatted pleasantly over the chips which I had made.

By the middle of April, for I made no haste in my work, but rather made the most of it, my house was framed and ready for the raising. I had already bought the shanty of James Collins, an Irishman who worked on the Fitchburg Railroad, for boards. James Collins' shanty was considered an uncommonly fine one. When I called to see it he was not at home. I walked about the outside, at first unobserved from within, the window was so deep and high. It was of small dimensions, with a peaked cottage roof, and not much else to be seen, the dirt being raised five feet all around as if it were a compost heap. The roof was the soundest part, though a good deal warped and made brittle by the sun. Doorsill there was none, but a perennial passage for the hens under the door-board. Mrs. C. came to the door and asked me to view it from the inside. The hens were driven in by my approach. It was dark, and had a dirt floor for the most part, dank, clammy, and aguish, only here a board and there a board which would not bear removal. She lighted a lamp to show me the inside of the roof and the walls, and also that the board floor extended under the bed, warning me not to step into the cellar, a sort of dust hole two feet deep. In her own words, they were "good boards overhead, good boards all around, and a good window,"—of two whole squares originally, only the cat had passed out that way lately. There was a

²⁷ This is one of the four places in *Walden* in which Thoreau inserts verse of his own composition.

stove, a bed, and a place to sit, an infant in the house where it was born, a silk parasol, gilt-framed looking-glass, and a patent new coffee-mill nailed to an oak sapling, all told. The bargain was soon concluded, for James had in the meanwhile returned. I to pay four dollars and twenty-five cents to-night, he to vacate at five to-morrow morning, selling to nobody else meanwhile: I to take possession at six. It were well, he said, to be there early, and anticipate certain indistinct but wholly unjust claims on the score of ground rent and fuel. This he assured me was the only encumbrance. At six I passed him and his family on the road. One large bundle held their all,—bed, coffee-mill, looking-glass, hens,—all but the cat, she took to the woods and became a wild cat, and, as I learned afterward, trod in a trap set for woodchucks, and so became a dead cat at last.

I took down this dwelling the same morning, drawing the nails, and removed it to the pond-side by small cartloads, spreading the boards on the grass there to bleach and warp back again in the sun. One early thrush gave me a note or two as I drove along the woodland path. I was informed treacherously by a young Patrick that neighbor Seeley, an Irishman, in the intervals of the carting, transferred the still tolerable, straight, and drivable nails, staples, and spikes to his pocket, and then stood when I came back to pass the time of day, and look freshly up, unconcerned, with spring thoughts, at the devastation; there being a dearth of work, as he said. He was there to represent spectatordom, and help make this seemingly insignificant event one with the removal of the gods of Troy.

I dug my cellar in the side of a hill sloping to the south, where a woodchuck had formerly dug his burrow, down through sumach and blackberry roots, and the lowest stain of vegetation, six feet square by seven deep, to a fine sand where potatoes would not freeze in any winter. The sides were left shelving, and not stoned;

but the sun having never shone on them, the sand still keeps its place. It was but two hours' work. I took particular pleasure in this breaking of ground, for in almost all latitudes men dig into the earth for an equable temperature. Under the most splendid house in the city is still to be found the cellar where they store their roots as of old, and long after the superstructure has disappeared posterity remark its dent in the earth. The house is still but a sort of porch at the entrance of a burrow.

At length, in the beginning of May, with the help of some of my acquaintances, rather to improve so good an occasion for neighborliness than from any necessity, I set up the frame of my house. No man was ever more honored in the character of his raisers²⁸ than I. They are destined, I trust, to assist at the raising of loftier structures one day. I began to occupy my house on the 4th of July, as soon as it was boarded and roofed, for the boards were carefully feather-edged and lapped, so that it was perfectly impervious to rain, but before boarding I laid the foundation of a chimney at one end, bringing two cartloads of stones up the hill from the pond in my arms. I built the chimney after my hoeing in the fall, before a fire became necessary for warmth, doing my cooking in the meanwhile out of doors on the ground, early in the morning: which mode I still think is in some respects more convenient and agreeable than the usual one. When it stormed before my bread was baked, I fixed a few boards over the fire, and sat under them to watch my loaf, and passed some pleasant hours in that way. In those days, when my hands were much employed, I read but little, but the least scraps of paper which lay on the ground, my holder, or tablecloth, afforded me as much entertainment, in fact answered the same purpose as the *Iliad*.

²⁸ They were Alcott, Emerson, Ellery Channing, George William Curtis and his brother Burrill, and Edmund Hosmer and his three sons.

It would be worth the while to build still more deliberately than I did, considering, for instance, what foundation a door, a window, a cellar, a garret, have in the nature of man, and perchance never raising any superstructure until we found a better reason for it than our temporal necessities even. There is some of the same fitness in a man's building his own house that there is in a bird's building its own nest. Who knows but if men constructed their dwellings with their own hands, and provided food for themselves and families simply and honestly enough, the poetic faculty would be universally developed, as birds universally sing when they are so engaged? But alas! we do like cowbirds and cuckoos, which lay their eggs in nests which other birds have built, and cheer no traveller with their chattering and unmusical notes. Shall we forever resign the pleasure of construction to the carpenter? What does architecture amount to in the experience of the mass of men? I never in all my walks came across a man engaged in so simple and natural an occupation as building his house. We belong to the community. It is not the tailor alone who is the ninth part of a man; it is as much the preacher, and the merchant, and the farmer. Where is this division of labor to end? and what object does it finally serve? No doubt another *may* also think for me; but it is not therefore desirable that he should do so to the exclusion of my thinking for myself.

True, there are architects so called in this country, and I have heard of one at least possessed with the idea of making architectural ornaments have a core of truth, a necessity, and hence a beauty, as if it were a revelation to him.²⁹ All very well perhaps from his point of view, but only a little better than the common diletantism. A sentimental reformer in architecture, he began at the cornice, not at the foundation. It was only how to put a core of truth within the ornaments, that every sugarplum, in fact, might have an almond or caraway seed in it,—though I hold that almonds are most wholesome without the

sugar,—and not how the inhabitant, the indweller, might build truly within and without, and let the ornaments take care of themselves. What reasonable man ever supposed that ornaments were something outward and in the skin merely,—that the tortoise got his spotted shell, or the shell-fish its mother-o'-pearl tints, by such a contract as the inhabitants of Broadway their Trinity Church? But a man has no more to do with the style of architecture of his house than a tortoise with that of its shell: nor need the soldier be so idle as to try to paint the precise *color* of his virtue on his standard. The enemy will find it out. He may turn pale when the trial comes. This man seemed to me to lean over the cornice, and timidly whisper his half truth to the rude occupants who really knew it better than he. What of architectural beauty I now see, I know has gradually grown from within outward, out of the necessities and character of the indweller, who is the only builder,—out of some unconscious truthfulness, and nobleness, without ever a thought for the appearance; and whatever additional beauty of this kind is destined to be produced will be preceded by a like unconscious beauty of life. The most interesting dwellings in this country, as the painter knows, are the most unpretending, humble log huts and cottages of the poor commonly; it is the life of the inhabitants whose shells they are, and not any peculiarity in their surfaces merely, which makes them *picturesque*; and equally interesting will be the citizen's suburban box, when his life shall be as simple and as agreeable to the imagination, and there is as little straining after effect in the style of his dwelling. A great proportion of architectural ornaments are literally hollow, and a September gale would strip them off, like borrowed plumes, without injury to the substantials. They can do without *architecture* who have no olives nor wines in the cellar. What if

²⁹ Horatio Greenough, American sculptor (1805-1852). See *Journal*, Jan. 11, 1854.

an equal ado were made about the ornaments of style in literature, and the architects of our Bibles spent as much time about their cornices as the architects of our churches do.⁹ So are made the *belles-lettres* and the *beaux-arts* and their professors. Much it concerns a man, forsooth, how a few sticks are slanted over him or under him, and what colors are daubed upon his box. It would signify somewhat, if, in any earnest sense, *he* slanted them and daubed it; but the spirit having departed out of the tenant, it is of a piece with constructing his own coffin,—the architecture of the grave,—and “carpenter” is but another name for “coffin-maker.” One man says, in his despair or indifference to life, take up a handful of the earth at your feet, and paint your house that color. Is he thinking of his last and narrow house? Toss up a copper for it as well. What an abundance of leisure he must have! Why do you take up a handful of dirt? Better paint your house your own complexion;

let it turn pale or blush for you. An enterprise to improve the style of cottage architecture! When you have got my ornaments ready, I will wear them.

Before winter I built a chimney, and shingled the sides of my house, which were already impervious to rain, with imperfect and sappy shingles made of the first slice of the log, whose edges I was obliged to straighten with a plane.

I have thus a tight shingled and plastered house, ten feet wide by fifteen long, and eight-feet posts, with a garret and a closet, a large window on each side, two trap-doors, one door at the end, and a brick fireplace opposite. The exact cost of my house, paying the usual price for such materials as I used, but not counting the work, all of which was done by myself, was as follows; and I give the details because very few are able to tell exactly what their houses cost, and fewer still, if any, the separate cost of the various materials which compose them:—

Boards	\$8 03½, mostly shanty boards.	
Refuse shingles for roof and sides	4 00	
Laths	1 25	
Two second-hand windows with glass	2 43	
One thousand old brick.....	4 00	
Two casks of lime.....	2 40	That was high.
Hair	0 31	More than I needed.
Mantle-tree iron	0 15	
Nails	3 90	
Hinges and screws.....	0 14	
Latch	0 10	
Chalk	0 01	
Transportation	1 40	{ I carried a good part on my back.
In all	\$28 12½	

These are all the materials, excepting the timber, stones, and sand, which I claimed by squatter's right. I have also a small woodshed adjoining, made chiefly of the stuff which was left after building the house.

I intend to build me a house which will surpass any on the main street in Concord in grandeur and luxury, as soon as it pleases me as much and will cost me no more than my present one.

I thus found that the student who wishes

for a shelter can obtain one for a lifetime at an expense not greater than the rent which he now pays annually. If I seem to boast more than is becoming, my excuse is that I brag for humanity rather than for myself; and my shortcomings and inconsistencies do not affect the truth of my statement. Notwithstanding much cant and hypocrisy,—chaff which I find it difficult to separate from my wheat, but for which I am as sorry as any man,—I will breathe freely and stretch myself in this respect, it is such a relief to both the moral and physical system, and I am resolved that I will not through humility become the devil's attorney. I will endeavor to speak a good word for the truth. At Cambridge College the mere rent of a student's room, which is only a little larger than my own, is thirty dollars each year, though the corporation had the advantage of building thirty-two side by side and under one roof, and the occupant suffers the inconvenience of many and noisy neighbors, and perhaps a residence in the fourth story. I cannot but think that if we had more true wisdom in these respects, not only less education would be needed, because, forsooth, more would already have been acquired, but the pecuniary expense of getting an education would in a great measure vanish. Those conveniences which the student requires at Cambridge or elsewhere cost him or somebody else ten times as great a sacrifice of life as they would with proper management on both sides. Those things for which the most money is demanded are never the things which the student most wants. Tuition, for instance, is an important item in the term bill, while for the far more valuable education which he gets by associating with the most cultivated of his contemporaries no charge is made. The mode of founding a college is, commonly, to get up a subscription of dollars and cents, and then, following blindly the principles of a division of labor to its extreme,—a principle which should never be followed but with circumspection,—to call in a contractor who makes this a subject of

speculation, and he employs Irishmen or other operatives actually to lay the foundations, while the students that are to be are said to be fitting themselves for it, and for these oversights successive generations have to pay. I think that it would be *better than this*, for the students, or those who desire to be benefited by it, even to lay the foundation themselves. The student who secures his coveted leisure and retirement by systematically shirking any labor necessary to man obtains but an ignoble and unprofitable leisure, defrauding himself of the experience which alone can make leisure fruitful. "But," says one, "you do not mean that the students should go to work with their hands instead of their heads?" I do not mean that exactly, but I mean something which he might think a good deal like that; I mean that they should not *play* life, or *study* it merely, while the community supports them at this expensive game, but earnestly *live* it from beginning to end. How could youths better learn to live than by at once trying the experiment of living? Methinks thus would exercise their minds as much as mathematics. If I wished a boy to know something about the arts and sciences, for instance, I would not pursue the common course, which is merely to send him into the neighborhood of some professor, where anything is professed and practised but the art of life;—to survey the world through a telescope or a microscope, and never with his natural eye, to study chemistry, and not learn how his bread is made, or mechanics, and not learn how it is earned; to discover new satellites to Neptune, and not detect the motes in his eyes, or to what vagabond he is a satellite himself; or to be devoured by the monsters that swarm all around him, while contemplating the monsters in a drop of vinegar. Which would have advanced the most at the end of a month,—the boy who had made his own jackknife from the ore which he had dug and smelted, reading as much as would be necessary for this—or the boy who had attended the lectures on metallurgy at the Institute in the mean-

while, and had received a Rodgers pen-knife from his father? Which would be most likely to cut his fingers? . . . To my astonishment I was informed on leaving college that I had studied navigation!—why, if I had taken one turn down the harbor I should have known more about it. Even the *poor* student studies and is taught only *political* economy, while that economy of living which is synonymous with philosophy is not even sincerely professed in our colleges. The consequence is, that while he is reading Adam Smith, Ricardo, and Say,³⁰ he runs his father in debt irretrievably.

As with our colleges, so with a hundred "modern improvements," there is an illusion about them; there is not always a positive advance. The devil goes on exacting compound interest to the last for his early share and numerous succeeding investments in them. Our inventions are wont to be pretty toys, which distract our attention from serious things. They are but improved means to an unimproved end, an end which it was already but too easy to arrive at, as railroads lead to Boston or New York. We are in great haste to construct a magnetic telegraph from Maine to Texas; but Maine and Texas, it may be, have nothing important to communicate. Either is in such a predicament as the man who was earnest to be introduced to a distinguished deaf woman,³¹ but when he was presented, and one end of her ear trumpet was put into his hand, had nothing to say. As if the main object were to talk fast and not to talk sensibly. We are eager to tunnel under the Atlantic and bring the Old World some weeks nearer to the New; but perchance the first news that will leak through into the broad, flapping American ear will be that the Princess Adelaide has the whooping cough. After all, the man whose horse trots a mile a minute does not carry the most important messages; he is not an evangelist, nor does he come round eating locusts and wild honey. I doubt if Flying Childers³² ever carried a peck of corn to mill.

One says to me, "I wonder that you do

not lay up money; you love to travel; you might take the cars and go to Fitchburg to-day and see the country." But I am wiser than that. I have learned that the swiftest traveller is he that goes afoot. I say to my friend, Suppose we try who will get there first. The distance is thirty miles, the fare ninety cents. That is almost a day's wages. I remember when wages were sixty cents a day for laborers on this very road. Well, I start now on foot, and get there before night, I have travelled at that rate by the week together. You will in the meanwhile have earned your fare, and arrive there sometime to-morrow, or possibly this evening, if you are lucky enough to get a job in season. Instead of going to Fitchburg, you will be working here the greater part of the day. And so, if the railroad reached round the world, I think that I should keep ahead of you, and as for seeing the country and getting experience of that kind, I should have to cut your acquaintance altogether.

Such is the universal law, which no man can ever outwit, and with regard to the railroad even we may say it is as broad as it is long. To make a railroad round the world available to all mankind is equivalent to grading the whole surface of the planet. Men have an indistinct notion that if they keep up this activity of joint stocks and spades long enough all will at length ride somewhere, in next to no time, and for nothing, but though a crowd rushes to the depot, and the conductor shouts "All aboard!" when the smoke is blown away and the vapor condensed, it will be perceived that a few are riding, but the rest are run over,—and it will be called, and will be, "A melancholy accident." No doubt they can ride at last who

³² A famous English race-horse.

shall have earned their fare, that is, if they survive so long, but they will probably have lost their elasticity and desire to travel by that time. This spending of the best part of one's life earning money in order to enjoy a questionable liberty during the least valuable part of it reminds me of the Englishman who went to India to make a fortune first, in order that he might return to England and live the life of a poet. He should have gone up garret at once. "What!" exclaim a million Irishmen starting up from all the shanties in the land, "is not this railroad which we have built a good thing?" Yes, I answer, *comparatively* good, that is, you might have done worse; but I wish, as you are brothers of mine, that you could have spent your time better than digging in this dirt.

Before I finished my house, wishing to earn ten or twelve dollars by some honest and agreeable method, in order to meet my unusual expenses, I planted about two acres and a half of light and sandy soil near it chiefly with beans, but also a small part with potatoes, corn, peas, and turnips. The whole lot contains eleven acres, mostly growing up to pines and hickories, and was sold the preceding season for eight dollars and eight cents an acre. One farmer said that it was "good for nothing but to raise cheeping squirrels on." I put no manure whatever on this land, not being the owner, but merely a squatter, and not expecting to cultivate so much again, and I did not quite hoe it all once. I got out several cords of stumps in plowing, which supplied me with fuel for a long time, and left small circles of virgin mould, easily distinguishable through the summer by the greater luxuriance of the beans there. The dead and for the most part unmerchable wood behind my house, and the driftwood from the pond, have supplied the remainder of my fuel. I was obliged to hire a team and a man for the plowing, though I held the plow myself. My farm outgoes for the first season were, for implements, seed,

work, etc., \$14.72½. The seed corn was given me. This never costs anything to speak of unless you plant more than enough. I got twelve bushels of beans, and eighteen bushels of potatoes, beside some peas and sweet corn. The yellow corn and turnips were too late to come to anything. My whole income from the farm was

	\$23 44
Deducting the outgoes....	14 72½
	<hr/>
There are left.....	\$ 8 71½,

beside produce consumed and on hand at the time this estimate was made of the value of \$4.50,—the amount on hand much more than balancing a little grass which I did not raise. All things considered, that is, considering the importance of a man's soul and of to-day, notwithstanding the short time occupied by my experiment, nay, partly even because of its transient character, I believe that that was doing better than any farmer in Concord did that year.

The next year I did better still, for I spaded up all the land which I required, about a third of an acre, and I learned from the experience of both years, not being in the least awed by many celebrated works on husbandry, Arthur Young³³ among the rest, that if one would live simply and eat only the crop which he raised, and raise no more than he ate, and not exchange it for an insufficient quantity of more luxurious and expensive things, he would need to cultivate only a few rods of ground, and that it would be cheaper to spade up that than to use oxen to plow it, and to select a fresh spot from time to time than to manure the old, and he could do all his necessary farm work as it were with his left hand at odd hours in the summer; and thus he would not be tied to an ox, or horse, or cow, or pig, as at present. I desire to speak impartially on this point, and as one not interested in the success or

³³ British writer on agricultural economy (1741-1820).

failure of the present economical and social arrangements. I was more independent than any farmer in Concord, for I was not anchored to a house or farm, but could follow the bent of my genius, which is a very crooked one, every moment. Beside being better off than they already, if my house had been burned or my crops had failed, I should have been nearly as well off as before.

I am wont to think that men are not so much the keepers of herds as herds are the keepers of men, the former are so much the freer. Men and oxen exchange work; but if we consider necessary work only, the oxen will be seen to have greatly the advantage, their farm is so much the larger. Man does some of his part of the exchange work in his six weeks of haying, and it is no boy's play. Certainly no nation that lived simply in all respects, that is, no nation of philosophers, would commit so great a blunder as to use the labor of animals. True, there never was and is not likely soon to be a nation of philosophers, nor am I certain it is desirable that there should be. However, I should never have broken a horse or bull and taken him to board for any work he might do for me, for fear I should become a horse-man or a herds-man merely; and if society seems to be the gainer by so doing, are we certain that what is one man's gain is not another's loss, and that the stable-boy has equal cause with his master to be satisfied? Granted that some public works would not have been constructed without this aid, and let man share the glory of such with the ox and horse; does it follow that he could not have accomplished works yet more worthy of himself in that case? When men begin to do, not merely unnecessary or artistic, but luxurious and idle work, with their assistance, it is inevitable that a few do all the exchange work with the oxen, or, in other words, become the slaves of the strongest. Man thus not only works for the animal within him, but, for a symbol of this, he works for the animal without him. Though we have many substantial houses

of brick or stone, the prosperity of the farmer is still measured by the degree to which the barn overshadows the house. This town is said to have the largest houses for oxen, cows, and horses hereabouts, and it is not behindhand in its public buildings; but there are very few halls for free worship or free speech in this county. It should not be by their architecture, but why not even by their power of abstract thought, that nations should seek to commemorate themselves? How much more admirable the Bhagvat-Geeta³⁴ than all the runs of the East! Towers and temples are the luxury of princes. A simple and independent mind does not toil at the bidding of any prince. Genius is not a retainer to any emperor, nor is its material silver, or gold, or marble, except to a trifling extent. To what end, pray, is so much stone hammered? In Arcadia,³⁵ when I was there, I did not see any hammering stone. Nations are possessed with an insane ambition to perpetuate the memory of themselves by the amount of hammered stone they leave. What if equal pains were taken to smooth and polish their manners? One piece of good sense would be more memorable than a monument as high as the moon. I love better to see stones in place. The grandeur of Thebes was a vulgar grandeur. More sensible is a rod of stone wall that bounds an honest man's field than a hundred-gated Thebes that has wandered farther from the true end of life. The religion and civilization which are barbaric and heathenish build splendid temples; but what you might call Christianity does not. Most of the stone a nation hammers goes toward its tomb only. It buries itself alive. As for the Pyramids, there is nothing to wonder at in them so much as the fact that so many men could be found degraded enough to spend their lives constructing a tomb

³⁴ The *Bhagavat Gita*, philosophical and mystical poem in Sanskrit, supposed to have been written in the first or second century B.C. in India.

³⁵ A pastoral section of ancient Greece, but used figuratively for the simple life.

for some ambitious booby, whom it would have been wiser and manlier to have drowned in the Nile, and then given his body to the dogs. I might possibly invent some excuse for them and him, but I have no time for it. As for the religion and love of art of the builders, it is much the same all the world over, whether the building be an Egyptian temple or the United States Bank. It costs more than it comes to. The mainspring is vanity, assisted by the love of garlic and bread and butter. Mr. Balcom, a promising young architect, designs it on the back of his Vitruvius,³⁶ with hard pencil and ruler, and the job is let out to Dobson & Sons, stonecutters. When the thirty centuries³⁷ begin to look down on it, mankind begin to look up at it. As for your high towers and monuments, there was a crazy fellow once in this town who undertook to dig through to China, and he got so far that, as he said,

he heard the Chinese pots and kettles rattle, but I think that I shall not go out of my way to admire the hole which he made. Many are concerned about the monuments of the West and the East,—to know who built them. For my part, I should like to know who in those days did not build them,—who were above such trifling. But to proceed with my statistics.

By surveying, carpentry, and day-labor of various other kinds in the village in the meanwhile, for I have as many trades as fingers, I had earned \$13.34. The expense of food for eight months, namely, from July 4th to March 1st, the time when these estimates were made, though I lived there more than two years,—not counting potatoes, a little green corn, and some peas, which I had raised, nor considering the value of what was on hand at the last date,—was

Rice	\$1 73½
Molasses	1 73
Rye meal	1 04¾
Indian meal	0 99¾
Pork	0 22
Flour	0 88
Sugar	0 80
Lard	0 65
Apples	0 25
Dried apple	0 22
Sweet potatoes	0 10
One pumpkin	0 6
One watermelon	0 2
Salt	0 3

Cheapest form of the saccharine.

Cheaper than rye.

{ Costs more than Indian meal, both money and trouble.

} All experiments which failed.

Yes, I did eat \$8.74, all told; but I should not thus unblushingly publish my guilt, if I did not know that most of my readers were equally guilty with myself, and that their deeds would look no better in print. The next year I sometimes caught a mess of fish for my dinner, and once I went so far as to slaughter a woodchuck which ravaged my bean-field,—effect his transmigration, as a Tartar would say,—and

devour him, partly for experiment's sake; but though it afforded me a momentary enjoyment, notwithstanding a musky flavor, I saw that the longest use would not make

³⁶ Roman architect under Caesar, whose book *De Architectura* is here referred to.

³⁷ Napoleon, addressing his soldiers in Egypt, said: "From the summits of these monuments forty centuries look down upon you."

that a good practice, however it might seem to have your woodchucks ready dressed by the village butcher.

Clothing and some incidental expenses within the same dates, though little can be inferred from this item, amounted to

\$8 40¾

Oil and some household utensils... 2 00

So that all the pecuniary outgoes, excepting for washing and mending, which for the most part were done out of the house, and their bills have not yet been received, —and these are all and more than all the ways by which money necessarily goes out in this part of the world,—were

House	\$28 12½
Farm one year.....	14 72½
Food eight months.....	8 74
Clothing, etc., eight months....	8 40¾
Oil, etc., eight months.....	2 00
In all	\$61 99¾

I address myself now to those of my readers who have a living to get. And to meet this I have for farm produce sold

	\$23 44
Earned by day-labor	13 34
In all	\$36 78,

which subtracted from the sum of the outgoes leaves a balance of \$25.21¾ on the one side,—this being very nearly the means with which I started, and the measure of expenses to be incurred,—and on the other, beside the leisure and independence and health thus secured, a comfortable house for me as long as I choose to occupy it.

These statistics, however accidental and therefore uninformative they may appear, as they have a certain completeness, have a certain value also. Nothing was given me of which I have not rendered some account. It appears from the above estimate, that my food alone cost me in money about

twenty-seven cents a week. It was, for nearly two years after this, rye and Indian meal without yeast, potatoes, rice, a very little salt pork, molasses, and salt; and my drink, water. It was fit that I should live on rice, mainly, who loved so well the philosophy of India. To meet the objections of some inveterate cavillers, I may as well state, that if I dined out occasionally, as I always had done, and I trust shall have opportunities to do again, it was frequently to the detriment of my domestic arrangements. But the dining out, being, as I have stated, a constant element, does not in the least affect a comparative statement like this.

I learned from my two years' experience that it would cost incredibly little trouble to obtain one's necessary food, even in this latitude; that a man may use as simple a diet as the animals, and yet retain health and strength. I have made a satisfactory dinner, satisfactory on several accounts, simply off a dish of purslane (*Portulaca oleracea*) which I gathered in my cornfield, boiled and salted. I give the Latin on account of the savoriness of the trivial name.³⁸ And pray what more can a reasonable man desire, in peaceful times, in ordinary noons, than a sufficient number of ears of green sweet corn boiled, with the addition of salt? Even the little variety which I used was a yielding to the demands of appetite, and not of health. Yet men have come to such a pass that they frequently starve, not for want of necessities, but for want of luxuries, and I know a good woman who thinks that her son lost his life because he took to drinking water only.

The reader will perceive that I am treating the subject rather from an economic than a dietetic point of view, and he will not venture to put my abstemiousness to the test unless he has a well-stocked larder.

Bread I at first made of pure Indian meal and salt, genuine hoe-cakes, which I baked before my fire out of doors on a

³⁸ The name of the species, *oleracea*.

shingle or the end of a stick of timber sawed off in building my house, but it was wont to get smoked and to have a piny flavor. I tried flour also; but have at last found a mixture of rye and Indian meal most convenient and agreeable. In cold weather it was no little amusement to bake several small loaves of this in succession, tending and turning them as carefully as an Egyptian his hatching eggs. They were a real cereal fruit which I ripened, and they had to my senses a fragrance like that of other noble fruits, which I kept in as long as possible by wrapping them in cloths. I made a study of the ancient and indispensable art of bread-making, consulting such authorities as offered, going back to the primitive days and first invention of the unleavened kind, when from the wildness of nuts and meats men first reached the mildness and refinement of this diet, and travelling gradually down in my studies through that accidental souring of the dough which, it is supposed, taught the leavening process, and through the various fermentations thereafter, till I came to "good, sweet, wholesome bread," the staff of life. Leaven, which some deem the soul of bread, the *spiritus* which fills its cellular tissue, which is religiously preserved like the vestal fire,—some precious bottleful, I suppose, first brought over in the Mayflower, did the business for America, and its influence is still rising, swelling, spreading, in cerealian billows over the land,—this seed I regularly and faithfully procured from the village, till at length one morning I forgot the rules, and scalded my yeast; by which accident I discovered that even this was not indispensable,—for my discoveries were not by the synthetic but analytic process,—and I have gladly omitted it since, though most housewives earnestly assured me that safe and wholesome bread without yeast might not be, and elderly people prophesied a speedy decay of the vital forces. Yet I find it not to be an essential ingredient, and after going without it for a year am still in the land of the living; and I am

glad to escape the trivialness of carrying a bottleful in my pocket, which would sometimes pop and discharge its contents to my discomfort. It is simpler and more respectable to omit it. Man is an animal who more than any other can adapt himself to all climates and circumstances. Neither did I put any sal-soda, or other acid or alkali, into my bread. It would seem that I made it according to the recipe which Marcus Porcius Cato gave about two centuries before Christ. "*Panem depticium sic facito Manus mortariumque bene lavato Farinam in mortarium indito, aquae paulatim addito, subigitoque pulchre. Ubi bene subegeris, defingito, coquitoque sub testu.*"³⁹ Which I take to mean, "Make kneaded bread thus. Wash your hands and trough well. Put the meal into the trough, add water gradually, and knead it thoroughly. When you have kneaded it well, mould it, and bake it under a cover," that is, in a baking-kettle. Not a word about leaven. But I did not always use this staff of life. At one time, owing to the emptiness of my purse, I saw none of it for more than a month.

Every New Englander might easily raise all his own breadstuffs in this land of rye and Indian corn, and not depend on distant and fluctuating markets for them. Yet so far are we from simplicity and independence that, in Concord, fresh and sweet meal is rarely sold in the shops, and hominy and corn in a still coarser form are hardly used by any. For the most part the farmer gives to his cattle and hogs the grain of his own producing, and buys flour, which is at least no more wholesome, at a greater cost, at the store. I saw that I could easily raise my bushel or two of rye and Indian corn, for the former will grow on the poorest land, and the latter does not require the best, and grind them in a hand-mill, and so do without rice and pork; and if I must have some concentrated sweet, I found by experiment that I could make a very good molasses either of pump-

³⁹ Cato's *De Agri Cultura*, cap. 74.

kins or beets, and I knew that I needed only to set out a few maples to obtain it more easily still, and while these were growing I could use various substitutes beside those which I have named. "For," as the Forefathers sang,—

"we can make liquor to sweeten
our lips

Of pumpkins and parsnips and walnut-
tree chips."⁴⁰

Finally, as for salt, the grossest of groceries, to obtain this might be a fit occasion for a visit to the seashore, or, if I did without it altogether, I should probably drink the less water. I do not learn that the Indians ever troubled themselves to go after it.

Thus I could avoid all trade and barter, so far as my food was concerned, and having a shelter already, it would only remain to get clothing and fuel. The pantaloons which I now wear were woven in a farmer's family,—thank Heaven there is so much virtue still in man; for I think the fall from the farmer to the operative as great and memorable as that from the man to the farmer;—and in a new country, fuel is an encumbrance. As for a habitat, if I were not permitted still to squat, I might purchase one acre at the same price for which the land I cultivated was sold—namely, eight dollars and eight cents. But as it was, I considered that I enhanced the value of the land by squatting on it.

There is a certain class of unbelievers who sometimes ask me such questions as, if I think that I can live on vegetable food alone; and to strike at the root of the matter at once,—for the root is faith,—I am accustomed to answer such, that I can live on board nails. If they cannot understand that, they cannot understand much that I have to say. For my part, I am glad to hear of experiments of this kind being tried; as that a young man tried for a fortnight to live on hard, raw corn on the ear, using his teeth for all mortar. The squirrel tribe tried the same and suc-

ceeded. The human race is interested in these experiments, though a few old women who are incapacitated for them, or who own their thirds in mills, may be alarmed.

My furniture, part of which I made myself,—and the rest cost me nothing of which I have not rendered an account,—consisted of a bed, a table, a desk, three chairs, a looking-glass three inches in diameter, a pair of tongs and andirons, a kettle, a skillet, and a frying-pan, a dipper, a wash-bowl, two knives and forks, three plates, one cup, one spoon, a jug for oil, a jug for molasses, and a japanned lamp. None is so poor that he need sit on a pumpkin. That is shiftlessness. There is plenty of such chairs as I like best in the village garrets to be had for taking them away. Furniture! Thank God, I can sit and I can stand without the aid of a furniture warehouse. What man but a philosopher would not be ashamed to see his furniture packed in a cart and going up country exposed to the light of heaven and the eyes of men, a beggarly account of empty boxes? That is Spaulding's furniture. I could never tell from inspecting such a load whether it belonged to a so-called rich man or a poor one; the owner always seemed poverty-stricken. Indeed, the more you have of such things the poorer you are. Each load looks as if it contained the contents of a dozen shanties; and if one shanty is poor, this is a dozen times as poor. Pray, for what do we *move* ever but to get rid of our furniture, our *exuviae*,⁴¹ at last to go from this world to another newly furnished, and leave this to be burned? It is the same as if all these traps were buckled to a man's belt, and he could not move over the rough country where our lines are cast without dragging them,—dragging his trap. He was a lucky fox that left his tail in the trap. The

⁴⁰ From the anonymous "New England's Annoyances."

⁴¹ That which is stripped off, as clothing, equipment, etc.

muskrat will gnaw his third leg off to be free. No wonder man has lost his elasticity. How often he is at a dead set! "Sir, if I may be so bold, what do you mean by a dead set?" If you are a seer, whenever you meet a man you will see all that he owns, ay, and much that he pretends to disown, behind him, even to his kitchen furniture and all the trumpery which he saves and will not burn, and he will appear to be harnessed to it and making what headway he can. I think that the man is at a dead set who has got through a knot-hole or gateway where his sledge load of furniture cannot follow him. I cannot but feel compassion when I hear some trig, compact-looking man, seemingly free, all girded and ready, speak of his "furniture," as whether it is insured or not. "But what shall I do with my furniture?" My gay butterfly is entangled in a spider's web then. Even those who seem for a long while not to have any, if you inquire more narrowly you will find have some stored in somebody's barn. I look upon England to-day as an old gentleman who is travelling with a great deal of baggage, trumpery which has accumulated from long housekeeping, which he has not the courage to burn; great trunk, little trunk, bandbox, and bundle. Throw away the first three at least. It would surpass the powers of a well man nowadays to take up his bed and walk, and I should certainly advise a sick one to lay down his bed and run. When I have met an immigrant tottering under a bundle which contained his all,—looking like an enormous wen which had grown out of the nape of his neck,—I have pitied him, not because that was his all, but because he had all *that* to carry. If I have got to drag my trap, I will take care that it be a light one and do not nip me in a vital part. But perchance it would be wisest never to put one's paw into it.

I would observe, by the way, that it costs me nothing for curtains, for I have no gazers to shut out but the sun and moon, and I am willing that they should look in. The moon will not sour milk nor taint

meat of mine, nor will the sun injure my furniture or fade my carpet; and if he is sometimes too warm a friend, I find it still better economy to retreat behind some curtain which nature has provided, than to add a single item to the details of housekeeping. A lady once offered me a mat, but as I had no room to spare within the house, nor time to spare within or without to shake it, I declined it, preferring to wipe my feet on the sod before my door. It is best to avoid the beginnings of evil.

Not long since I was present at the auction of a deacon's effects, for his life had not been ineffectual.—

"The evil that men do lives after them."⁴²

As usual, a great proportion was trumpery which had begun to accumulate in his father's day. Among the rest was a dried tapeworm. And now, after lying half a century in his garret and other dust holes, these things were not burned; instead of a *bonfire*, or purifying destruction of them, there was an *auction*, or increasing of them. The neighbors eagerly collected to view them, bought them all, and carefully transported them to their garrets and dust holes, to lie there till their estates are settled, when they will start again. When a man dies he kicks the dust.

The customs of some savage nations might, perchance, be profitably imitated by us, for they at least go through the semblance of casting their slough annually; they have the idea of the thing, whether they have the reality or not. Would it not be well if we were to celebrate such a "busk," or "feast of first fruits," as Bartram⁴³ describes to have been the custom of the Mucclasse Indians? "When a town celebrates the busk," says he, "having previously provided themselves with new clothes, new pots, pans, and other house-

⁴² Shakespeare's *Julius Caesar*, Act. III, scene 2.

⁴³ For William Bartram see Vol. I, pp. 138-143.

hold utensils and furniture, they collect all their worn out clothes and other despicable things, sweep and cleanse their houses, squares, and the whole town, of their filth, which with all the remaining grain and other old provisions they cast together into one common heap, and consume it with fire. After having taken medicine, and fasted for three days, all the fire in the town is extinguished. During this fast they abstain from the gratification of every appetite and passion whatever. A general amnesty is proclaimed; all malefactors may return to their town.

"On the fourth morning, the high priest, by rubbing dry wood together, produces new fire in the public square, from whence every habitation in the town is supplied with the new and pure flame."

They then feast on the new corn and fruits, and dance and sing for three days, "and the four following days they receive visits and rejoice with their friends from neighboring towns who have in like manner purified and prepared themselves."

The Mexicans also practised a similar purification at the end of every fifty-two years, in the belief that it was time for the world to come to an end.

I have scarcely heard of a truer sacrament, that is, as the dictionary defines it, "outward and visible sign of an inward and spiritual grace," than this, and I have no doubt that they were originally inspired directly from Heaven to do thus, though they have no Biblical record of the revelation.

For more than five years I maintained myself thus solely by the labor of my hands, and I found that, by working about six weeks in a year, I could meet all the expenses of living. The whole of my winters, as well as most of my summers, I had free and clear for study. I have thoroughly tried schoolkeeping, and found that my expenses were in proportion, or rather out of proportion, to my income, for I was obliged to dress and train, not to say think and

believe, accordingly, and I lost my time into the bargain. As I did not teach for the good of my fellow-men, but simply for a livelihood, this was a failure. I have tried trade; but I found that it would take ten years to get under way in that, and that then I should probably be on my way to the devil. I was actually afraid that I might by that time be doing what is called a good business. When formerly I was looking about to see what I could do for a living, some sad experience in conforming to the wishes of friends being fresh in my mind to tax my ingenuity, I thought often and seriously of picking huckleberries; that surely I could do, and its small profits might suffice,—for my greatest skill has been to want but little,—so little capital it required, so little distraction from my wonted moods, I foolishly thought. While my acquaintances went unhesitatingly into trade or the professions, I contemplated this occupation as most like theirs, ranging the hills all summer to pick the berries which came in my way, and thereafter carelessly dispose of them; so, to keep the flocks of Admetus.⁴⁴ I also dreamed that I might gather the wild herbs, or carry evergreens to such villagers as loved to be reminded of the woods, even to the city, by hay-cart loads. But I have since learned that trade curses everything it handles; and though you trade in messages from Heaven, the whole curse of trade attaches to the business.

As I preferred some things to others, and especially valued my freedom, as I could fare hard and yet succeed well, I did not wish to spend my time in earning rich carpets or other fine furniture, or delicate cookery, or a house in the Grecian or the Gothic style just yet. If there are any to whom it is no interruption to acquire these things, and who know how to use them when acquired, I relinquish to them the pursuit. Some are "industrious," and appear to love labor for its own sake, or perhaps because it keeps them out of worse

⁴⁴ Apollo, banished from Olympus, kept the flocks of Admetus, king of Thessaly, for nine years.

mischievous, to such I have at present nothing to say. Those who would not know what to do with more leisure than they now enjoy, I might advise to work twice as hard as they do,—work till they pay for themselves, and get their free papers. For myself I found that the occupation of a day-laborer was the most independent of any, especially as it required only thirty or forty days in a year to support one. The laborer's day ends with the going down of the sun, and he is then free to devote himself to his chosen pursuit, independent of his labor; but his employer, who speculates from month to month, has no respite from one end of the year to the other.

In short, I am convinced, both by faith and experience, that to maintain one's self on this earth is not a hardship but a pastime, if we will live simply and wisely; as the pursuits of the simpler nations are still the sports of the more artificial. It is not necessary that a man should earn his living by the sweat of his brow, unless he sweats easier than I do.

One young man of my acquaintance, who has inherited some acres, told me that he thought he should live as I did, *if he had the means*. I would not have any one adopt *my* mode of living on any account; for, beside that before he has fairly learned it I may have found out another for myself, I desire that there may be as many different persons in the world as possible; but I would have each one be very careful to find out and pursue *his own* way, and not his father's or his mother's or his neighbor's instead. The youth may build or plant or sail, only let him not be hindered from doing that which he tells me he would like to do. It is by a mathematical point only that we are wise, as the sailor or the fugitive slave keeps the polestar in his eye; but that is sufficient guidance for all our life. We may not arrive at our port within a calculable period, but we would preserve the true course.

Undoubtedly, in this case, what is true for one is truer still for a thousand, as a large house is not proportionally more ex-

pensive than a small one, since one roof may cover, one cellar underlie, and one wall separate several apartments. But for my part, I preferred the solitary dwelling. Moreover, it will commonly be cheaper to build the whole yourself than to convince another of the advantage of the common wall; and when you have done this, the common partition, to be much cheaper, must be a thin one, and that other may prove a bad neighbor, and also not keep his side in repair. The only coöperation which is commonly possible is exceedingly partial and superficial, and what little true cooperation there is, is as if it were not, being a harmony inaudible to men. If a man has faith, he will cooperate with equal faith everywhere, if he has not faith, he will continue to live like the rest of the world, whatever company he is joined to. To coöperate in the highest as well as the lowest sense, means *to get our living together*. I heard it proposed lately that two young men should travel together over the world, the one without money, earning his means as he went, before the mast and behind the plow, the other carrying a bill of exchange in his pocket. It was easy to see that they could not long be companions or cooperate, since one would not *operate* at all. They would part at the first interesting crisis in their adventures. Above all, as I have implied, the man who goes alone can start to-day; but he who travels with another must wait till that other is ready, and it may be a long time before they get off.

But all this is very selfish, I have heard some of my townsmen say. I confess that I have hitherto indulged very little in philanthropic enterprises. I have made some sacrifices to a sense of duty, and among others have sacrificed this pleasure also. There are those who have used all their arts to persuade me to undertake the support of some poor family in the town; and if I had nothing to do—for the devil finds employment for the idle—I might try

my hand at some such pastime as that. However, when I have thought to indulge myself in this respect, and lay their Heaven under an obligation by maintaining certain poor persons in all respects as comfortably as I maintain myself, and have even ventured so far as to make them the offer, they have one and all unhesitatingly preferred to remain poor. While my townsmen and women are devoted in so many ways to the good of their fellows, I trust that one at least may be spared to other and less humane pursuits. You must have a genius for charity as well as for anything else. As for Doing-good, that is one of the professions which are full. Moreover, I have tried it fairly, and, strange as it may seem, am satisfied that it does not agree with my constitution. Probably I should not consciously and deliberately forsake my particular calling to do the good which society demands of me, to save the universe from annihilation; and I believe that a like but infinitely greater steadfastness elsewhere is all that now preserves it. But I would not stand between any man and his genius; and to him who does this work, which I decline, with his whole heart and soul and life, I would say, Persevere, even if the whole world call it doing evil, as it is most likely they will.

I am far from supposing that my case is a peculiar one; no doubt many of my readers would make a similar defence. At doing something,—I will not engage that my neighbors shall pronounce it good,—I do not hesitate to say that I should be a capital fellow to hire; but what that is, it is for my employer to find out. What *good* I do, in the common sense of that word, must be aside from my main path, and for the most part wholly unintended. Men say, practically, Begin where you are and such as you are, without aiming mainly to become of more worth, and with kindness aforethought go about doing good. If I were to preach at all in this strain, I should say rather, Set about being good. As if the sun should stop when he had kindled his fires up to the splendor of a moon or

a star of the sixth magnitude, and go about like a Robin Goodfellow,⁴⁵ peeping in at every cottage window, inspiring lunatics, and tainting meats, and making darkness visible, instead of steadily increasing his genial heat and beneficence till he is of such brightness that no mortal can look him in the face, and then, and in the meanwhile too, going about the world in his own orbit, doing it good, or rather, as a truer philosophy has discovered, the world going about him getting good. When Phaëton, wishing to prove his heavenly birth by his beneficence, had the sun's chariot but one day, and drove out of the beaten track, he burned several blocks of houses in the lower streets of Heaven, and scorched the surface of the earth, and dried up every spring, and made the great desert of Sahara, till at length Jupiter hurled him headlong to the earth with a thunderbolt, and the sun, through grief at his death, did not shine for a year.

There is no odor so bad as that which arises from goodness tainted. It is human, it is divine, carrion. If I knew for a certainty that a man was coming to my house with the conscious design of doing me good, I should run for my life, as from that dry and parching wind of the African deserts called the simoom, which fills the mouth and nose and ears and eyes with dust till you are suffocated, for fear that I should get some of his good done to me,—some of its virus mingled with my blood. No,—in this case I would rather suffer evil the natural way. A man is not a good *man* to me because he will feed me if I should be starving, or warm me if I should be freezing, or pull me out of a ditch if I should ever fall into one. I can find you a Newfoundland dog that will do as much. Philanthropy is not love for one's fellow-man in the broadest sense. Howard ⁴⁶ was no doubt an exceedingly kind and worthy man in his way, and has his reward;

⁴⁵ Another name for the mischievous elf Puck.

⁴⁶ John Howard (1726-1790), English philanthropist and prison reformer.

but, comparatively speaking, what are a hundred Howards to us, if their philanthropy do not help *us* in our best estate, when we are most worthy to be helped? I never heard of a philanthropic meeting in which it was sincerely proposed to do any good to me, or the like of me.

The Jesuits were quite balked by those Indians who, being burned at the stake, suggested new modes of torture to their tormentors. Being superior to physical suffering, it sometimes chanced that they were superior to any consolation which the missionaries could offer; and the law to do as you would be done by fell with less persuasiveness on the ears of those who, for their part, did not care how they were done by, who loved their enemies after a new fashion, and came very near freely forgiving them all they did.

Be sure that you give the poor the aid they most need, though it be your example which leaves them far behind. If you give money, spend yourself with it, and do not merely abandon it to them. We make curious mistakes sometimes. Often the poor man is not so cold and hungry as he is dirty and ragged and gross. It is partly his taste, and not merely his misfortune. If you give him money, he will perhaps buy more rags with it. I was wont to pity the clumsy Irish laborers who cut ice on the pond, in such mean and ragged clothes, while I shivered in my more tidy and somewhat more fashionable garments, till, one bitter cold day, one who had slipped into the water came to my house to warm him, and I saw him strip off three pairs of pants and two pairs of stockings ere he got down to the skin, though they were dirty and ragged enough, it is true, and that he could afford to refuse the *extra* garments which I offered him, he had so many *intra* ones. This ducking was the very thing he needed. Then I began to pity myself, and I saw that it would be a greater charity to bestow on me a flannel shirt than a whole slop-shop on him. There are a thousand hacking at the branches of evil to one who is striking at the root, and it may

be that he who bestows the largest amount of time and money on the needy is doing the most by his mode of life to produce that misery which he strives in vain to relieve. It is the pious slave-breeder devoting the proceeds of every tenth slave to buy a Sunday's liberty for the rest. Some show their kindness to the poor by employing them in their kitchens. Would they not be kinder if they employed themselves there? You boast of spending a tenth part of your income in charity, maybe you should spend the nine tenths so, and done with it. Society recovers only a tenth part of the property then. Is this owing to the generosity of him in whose possession it is found, or to the remissness of the officers of justice?

Philanthropy is almost the only virtue which is sufficiently appreciated by mankind. Nay, it is greatly overrated; and it is our selfishness which overrates it. A robust poor man, one sunny day here in Concord, praised a fellow-townsmen to me, because, as he said, he was kind to the poor; meaning himself. The kind uncles and aunts of the race are more esteemed than its true spiritual fathers and mothers. I once heard a reverend lecturer on England, a man of learning and intelligence, after enumerating her scientific, literary, and political worthies, Shakespeare, Bacon, Cromwell, Milton, Newton, and others, speak next of her Christian heroes, whom, as if his profession required it of him, he elevated to a place far above all the rest, as the greatest of the great. They were Penn,⁴⁷ Howard, and Mrs. Fry. Every one must feel the falsehood and cant of this. The last were not England's best men and women; only, perhaps, her best philanthropists.

I would not subtract anything from the praise that is due to philanthropy, but merely demand justice for all who by their

⁴⁷ William Penn (1644-1718), Quaker founder of Colony of Pennsylvania. See *supra* for Howard. Elizabeth Fry (1780-1845), English Quaker philanthropist and reformer.

lives and works are a blessing to mankind. I do not value chiefly a man's uprightness and benevolence, which are, as it were, his stem and leaves. Those plants of whose greenness withered we make herb tea for the sick serve but a humble use, and are most employed by quacks. I want the flower and fruit of a man, that some fragrance be wafted over from him to me, and some ripeness flavor our intercourse. His goodness must not be a partial and transitory act, but a constant superfluity, which costs him nothing and of which he is unconscious. This is a charity that hides a multitude of sins.⁴⁸ The philanthropist too often surrounds mankind with the remembrance of his own cast-off griefs as an atmosphere, and calls it sympathy. We should impart our courage, and not our despair, our health and ease, and not our disease, and take care that this does not spread by contagion. From what southern plains comes up the voice of wailing? Under what latitudes reside the heathen to whom we would send light? Who is that intemperate and brutal man whom we would redeem? If anything ail a man, so that he does not perform his functions, if he have a pain in his bowels even,—for that is the seat of sympathy,—he forthwith sets about reforming—the world. Being a microcosm himself, he discovers—and it is a true discovery, and he is the man to make it—that the world has been eating green apples; to his eyes, in fact, the globe itself is a great green apple, which there is danger awful to think of that the children of men will nibble before it is ripe; and straightway his drastic philanthropy seeks out the Esquimaux and the Patagonian, and embraces the populous Indian and Chinese villages; and thus, by a few years of philanthropic activity, the powers in the meanwhile using him for their own ends, no doubt, he cures himself of his dyspepsia, the globe acquires a faint blush on one or both of its cheeks, as if it were beginning to be ripe, and life loses its crudity and is once more sweet and wholesome to live. I never dreamed of any enormity greater

than I have committed. I never knew, and never shall know, a worse man than myself.

I believe that what so saddens the reformer is not his sympathy with his fellows in distress, but, though he be the holiest son of God, is his private ail. Let this be righted, let the spring come to him, the morning rise over his couch, and he will forsake his generous companions without apology. My excuse for not lecturing against the use of tobacco is, that I never chewed it, that is a penalty which reformed tobacco-chewers have to pay, though there are things enough I have chewed which I could lecture against. If you should ever be betrayed into any of these philanthropies, do not let your left hand know what your right hand does,⁴⁹ for it is not worth knowing. Rescue the drowning and tie your shoestrings. Take your time, and set about some free labor.

Our manners have been corrupted by communication with the saints.⁵⁰ Our hymn-books resound with a melodious cursing of God and enduring Him forever.⁵¹ One would say that even the prophets and redeemers had rather consoled the fears than confirmed the hopes of man. There is nowhere recorded a simple and irrepressible satisfaction with the gift of life, any memorable praise of God. All health and success does me good, however far off and withdrawn it may appear; all disease and failure helps to make me sad and does me evil, however much sympathy it may have with me or I with it. If, then, we would indeed restore mankind by truly Indian, botanic, magnetic, or natural means, let us first be as simple and well as Nature ourselves, dispel the clouds which hang over our own brows, and take up a little life into our

⁵⁰ "Evil communications corrupt good manners."—1 *Corinthians*, xv, 33.

⁵¹ The chief end of man, according to the Westminster catechism, is to "glorify God and enjoy Him forever." See the end of the first paragraph of the following selection.

pores. Do not stay to be an overseer of the poor, but endeavor to become one of the worthies of the world.

I read in the Gulistan, or Flower Garden, of Sheik Sadi of Shiraz,⁵² that "they asked a wise man, saying Of the many celebrated trees which the Most High God has created lofty and umbrageous, they call none azad, or free, excepting the cypress, which bears no fruit, what mystery is there in this? He replied Each has its appropriate produce, and appointed season, during the continuance of which it is fresh and blooming, and during their absence dry and withered; to neither of which states is the cypress exposed, being always flourishing, and of this nature are the azads, or religious independents.—Fix not thy heart on that which is transitory, for the Dijlah, or Tigris, will continue to flow through Bagdad after the race of caliphs is extinct: if thy hand has plenty, be liberal as the date tree, but if it affords nothing to give away, be an azad, or free man, like the cypress."

WHERE I LIVED, AND WHAT I LIVED FOR

I WENT to the woods because I wished to live deliberately, to front only the essential facts of life, and see if I could not learn what it had to teach, and not, when I came to die, discover that I had not lived. I did not wish to live what was not life, living is so dear; nor did I wish to practise resignation, unless it was quite necessary. I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and, if it proved to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world; or if it were sublime, to know it by experience, and be able to give a true account of it in my next excursion. For most men, it appears to me,

are in a strange uncertainty about it, whether it is of the devil or of God, and have *somewhat hastily* concluded that it is the chief end of man here to "glorify God and enjoy him forever."

Still we live meanly, like ants; though the fable tells us that we were long ago changed into men; like pygmies we fight with cranes; it is error upon error, and clout upon clout, and our best virtue has for its occasion a superfluous and evitable wretchedness. Our life is frittered away by detail. An honest man has hardly need to count more than his ten fingers, or in extreme cases he may add his ten toes, and lump the rest. Simplicity, simplicity, simplicity! I say, let your affairs be as two or three, and not a hundred or a thousand; instead of a million count half a dozen, and keep your accounts on your thumb-nail. In the midst of this chopping sea of civilized life, such are the clouds and storms and quicksands and thousand-and-one items to be allowed for, that a man has to live, if he would not founder and go to the bottom and not make his port at all, by dead reckoning, and he must be a great calculator indeed who succeeds. Simplify, simplify. Instead of three meals a day, if it be necessary eat but one; instead of a hundred dishes, five; and reduce other things in proportion. Our life is like a German Confederacy, made up of petty states, with its boundary forever fluctuating, so that even a German cannot tell you how it is bounded at any moment. The nation itself, with all its so-called internal improvements, which, by the way, are all external and superficial, is just such an unwieldy and overgrown establishment, cluttered with furniture and tripped up by its own traps, ruined by luxury and heedless expense, by want of calculation and a worthy aim, as the million households in the land; and the only cure for it, as for them, is in a rigid economy, a stern and more than Spartan simplicity of life and elevation of purpose. It lives too

⁵² Persian poet (1184?-1291).

fast.¹ Men think that it is essential that the *Nation* have commerce, and export ice, and talk through a telegraph, and ride thirty miles an hour, without a doubt, whether *they* do or not, but whether we should live like baboons or like men, is a little uncertain. If we do not get out sleepers, and forge rails, and devote days and nights to the work, but go to tinkering upon our *lives* to improve *them*, who will build railroads? And if railroads are not built, how shall we get to Heaven in season? But if we stay at home and mind our business, who will want railroads? We do not ride on the railroad, it rides upon us. Did you ever think what those sleepers are that underlie the railroad? Each one is a man, an Irishman, or a Yankee man. The rails are laid on them, and they are covered with sand, and the cars run smoothly over them. They are sound sleepers, I assure you. And every few years a new lot is laid down and run over; so that, if some have the pleasure of riding on a rail, others have the misfortune to be ridden upon. And when they run over a man that is walking in his sleep, a supernumerary sleeper in the wrong position, and wake him up, they suddenly stop the cars, and make a hue and cry about it, as if this were an exception. I am glad to know that it takes a gang of men for every five miles to keep the sleepers down and level in their beds as it is, for this is a sign that they may sometime get up again.

Why should we live with such hurry and waste of life? We are determined to be starved before we are hungry. Men say that a stitch in time saves nine, and so they take a thousand stitches to-day to save nine to-morrow. As for *work*, we haven't any of any consequence. We have the Saint Vitus' dance, and cannot possibly keep our heads still. If I should only give a few pulls at the parish bell-rope, as for a fire, that is, without setting the bell,² there is hardly a man on his farm in the outskirts of Concord, notwithstanding that press of engagements which was his excuse so many times this morning, nor a boy, nor

a woman, I might almost say, but would forsake all and follow that sound, not mainly to save property from the flames, but, if we will confess the truth, much more to see it burn, since burn it must, and we, be it known, did not set it on fire,—or to see it put out, and have a hand in it, if that is done as handsomely, yes, even if it were the parish church itself. Hardly a man takes a half-hour's nap after dinner, but when he wakes he holds up his head and asks, "What's the news?" as if the rest of mankind had stood his sentinels. Some give directions to be waked every half-hour, doubtless for no other purpose; and then, to pay for it, they tell what they have dreamed. After a night's sleep the news is as indispensable as the breakfast "Pray tell me anything new that has happened to a man anywhere on this globe,"—and he reads it over his coffee and rolls, that a man has had his eyes gouged out this morning on the Wachito River;³ never dreaming the while that he lives in the dark unfathomed mammoth cave of this world, and has but the rudiment of an eye himself. . . .

Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars. I cannot count one. I know not the first letter of the alphabet. I have always been regretting that I was not as wise as the day I was born. The intellect is a cleaver, it discerns and rifts its way into the secret of things. I do not wish to be any more busy with my hands than is necessary. My head is hands and feet. I feel all my best faculties concentrated in it. My instinct tells me that my head is an organ for burrowing, as some creatures use their snout and

¹ A passage in the original manuscript at this point voiced a criticism of Fourierism; it was deleted before printing.

² The bell is "set" when it is pulled so far over that it rests upside-down.

³ The Ouachita, or Washita, River, then a feature of the frontier.

fore paws, and with it I would mine and burrow my way through these hills. I think that the richest vein is somewhere hereabouts; so by the divining-rod and thin rising vapors I judge; and here I will begin to mine.

From
SOUNDS

SOMETIMES, on Sundays, I heard the bells, the Lincoln, Acton, Bedford, or Concord bell, when the wind was favorable, a faint, sweet, and, as it were, natural melody, worth importing into the wilderness. At a sufficient distance over the woods this sound acquires a certain vibratory hum, as if the pine needles in the horizon were the strings of a harp which it swept. All sound heard at the greatest possible distance produces one and the same effect, a vibration of the universal lyre, just as the intervening atmosphere makes a distant ridge of earth interesting to our eyes by the azure tint it imparts to it. There came to me in this case a melody which the air had strained, and which had conversed with every leaf and needle of the wood, that portion of the sound which the elements had taken up and modulated and echoed from vale to vale. The echo is, to some extent, an original sound, and therein is the magic and charm of it. It is not merely a repetition of what was worth repeating in the bell, but partly the voice of the wood; the same trivial words and notes sung by a wood-nymph.

At evening, the distant lowing of some cow in the horizon beyond the woods sounded sweet and melodious and at first I would mistake it for the voices of certain minstrels by whom I was sometimes serenaded, who might be straying over hill and dale; but soon I was not unpleasantly disappointed when it was prolonged into the cheap and natural music of the cow. I do not mean to be satirical, but to express my appreciation of those youths' singing, when I state that I perceived

clearly that it was akin to the music of the cow, and they were at length one articulation of Nature

Regularly at half-past seven, in one part of the summer, after the evening train had gone by, the whip-poor-wills chanted their vespers for half an hour, sitting on a stump by my door, or upon the ridge-pole of the house. They would begin to sing almost with as much precision as a clock, within five minutes of a particular time, referred to the setting of the sun, every evening. I had a rare opportunity to become acquainted with their habits. Sometimes I heard four or five at once in different parts of the wood, by accident one a bar behind another, and so near me that I distinguished not only the cluck after each note, but often that singular buzzing sound like a fly in a spider's web, only proportionally louder. Sometimes one would circle round and round me in the woods a few feet distant as if tethered by a string, when probably I was near its eggs. They sang at intervals throughout the night, and were again as musical as ever just before and about dawn.

When other birds are still, the screech owls take up the strain, like mourning women their ancient u-lu-lu. Their dismal scream is truly Ben Jonsonian.⁴ 'Wise midnight hags! It is no honest and blunt tu-whit tu-who of the poets, but, without jesting, a most solemn graveyard ditty, the mutual consolations of suicide lovers remembering the pangs and the delights of supernal love in the infernal groves. Yet I love to hear their wailing, their doleful responses, trilled along the woodside; reminding me sometimes of music and singing birds; as if it were the dark and tearful side of music, the regrets and sighs that would fain be sung. They are the spirits, the low spirits and melancholy forebodings, of fallen souls that once in human shape night-walked the earth and did the deeds of darkness, now expiating

⁴ F. H. Allen suggests the witches' scene in Jonson's *Masque of Queens* as the basis for this reference.

their sins with their wailing hymns or threnodies in the scenery of their transgressions. They give me a new sense of the variety and capacity of that nature which is our common dwelling. *Oh-o-o-o that I never had been bor-r-r-n!* sighs one on this side of the pond, and circles with the restlessness of despair to some new perch on the gray oaks. Then—*that I never had been bor-r-r-n!* echoes another on the farther side with tremulous sincerity, and—*bor-r-r-n!* comes faintly from far in the Lincoln woods.

I was also serenaded by a hooting owl. Near at hand you could fancy it the most melancholy sound in Nature, as if she meant by this to stereotype and make permanent in her choir the dying moans of a human being,—some poor weak relic of mortality who has left hope behind, and howls like an animal, yet with human sobs, on entering the dark valley, made more awful by a certain gurgling melodiousness,—I find myself beginning with the letters *gl* when I try to imitate it,—expressive of a mind which has reached the gelatinous, mildeady stage in the mortification of all healthy and courageous thought. It reminded me of ghouls and idiots and insane howlings. But now one answers from far woods in a strain made really melodious by distance,—*Hoo hoo hoo, hooser hoo;* and indeed for the most part it suggested only pleasing associations, whether heard by day or night, summer or winter.

I rejoice that there are owls. Let them do the idiotic and maniacal hooting for men. It is a sound admirably suited to swamps and twilight woods which no day illustrates, suggesting a vast and undeveloped nature which men have not recognized. They represent the stark twilight and unsatisfied thoughts which all have. All day the sun has shone on the surface of some savage swamp, where the single spruce stands hung with usnea lichens, and small hawks circulate above, and the chickadee hisps amid the evergreens, and the partridge and rabbit skulk beneath; but now a more dismal and fitting day dawns, and a different

race of creatures awakes to express the meaning of Nature there.

Late in the evening I heard the distant rumbling of wagons over bridges,—a sound heard farther than almost any other at night,—the baying of dogs, and sometimes again the lowing of some disconsolate cow in a distant barn-yard. In the meanwhile all the shore rang with the tramp of bullfrogs, the sturdy spirits of ancient winebibbers and wassailers, still unrepentant, trying to sing a catch in their Stygian lake,—if the Walden nymphs will pardon the comparison, for though there are almost no weeds, there are frogs there,—who would fain keep up the hilarious rules of their old festal tables, though their voices have waxed hoarse and solemnly grave, mocking at mirth, and the wine has lost its flavor, and become only liquor to distend their paunches, and sweet intoxication never comes to drown the memory of the past, but mere saturation and waterloggedness and distention. The most aldermanic, with his chin upon a heart-leaf, which serves for a napkin to his drooling chops, under this northern shore quaffs a deep draught of the once scorned water, and passes round the cup with the ejaculation *tr-r-r-oonk, tr-r-r-oonk, tr-r-r-oonk!* and straightway comes over the water from some distant cove the same password repeated, where the next in seniority and girth has gulped down to his mark; and when this observance has made the circuit of the shores, then ejaculates the master of ceremonies, with satisfaction, *tr-r-r-oonk!* and each in his turn repeats the same down to the least distended, leakiest, and flabbiest paunched, that there be no mistake; and then the bowl goes round again and again, until the sun disperses the morning mist, and only the patriarch is not under the pond, but vainly bellowing *troonk* from time to time, and pausing for a reply.

I am not sure that I ever heard the sound of cock-crowing from my clearing, and I thought that it might be worth the while to keep a cockerel for his music merely, as a singing bird. The note of

this once wild Indian pheasant is certainly the most remarkable of any bird's, and if they could be naturalized without being domesticated, it would soon become the most famous sound in our woods, surpassing the clangor of the goose and the hooting of the owl; and then imagine the cackling of the hens to fill the pauses when their lords' clarions rested! No wonder that man added this bird to his tame stock,—to say nothing of the eggs and drumsticks. To walk in a winter morning in a wood where these birds abounded, their native woods, and hear the wild cockerels crow on the trees, clear and shrill for miles over the resounding earth, drowning the feeble notes of other birds,—think of it! It would put nations on the alert. Who would not be early to rise, and rise earlier and earlier every successive day of his life, till he became unspeakably healthy, wealthy, and wise? This foreign bird's note is celebrated by the poets of all countries along with the notes of their native songsters. All climates agree with brave Chanticleer. He is more indigenous even than the natives. His health is ever good, his lungs are sound, his spirits never flag. Even the sailor on the Atlantic and Pacific is awakened by his voice; but its shrill sound never roused me from my slumbers. I kept neither dog, cat, cow, pig, nor hens, so that you would have said there was a deficiency of domestic sounds; neither the churn, nor the spinning-wheel, nor even the singing of the kettle, nor the hissing of the urn, nor children crying, to comfort one. An old-fashioned man would have lost his senses or died of ennui before this. Not even rats in the wall, for they were starved out, or rather were never baited in,—only squirrels on the roof and under the floor, a whip-poor-will on the ridge-pole, a blue jay screaming beneath the window, a hare or woodchuck under the house, a screech owl or a cat owl behind it, a flock of wild geese or a laughing loon on the pond, and a fox to bark in the night. Not even a lark or an oriole, those mild plantation birds, ever visited my clearing. No cockerels to crow

nor hens to cackle in the yard. No yard! but unfenced nature reaching up to your very sills. A young forest growing up under your windows, and wild sumachs and blackberry vines breaking through into your cellar; sturdy pitch pines rubbing and creaking against the shingles for want of room, their roots reaching quite under the house. Instead of a scuttle or a blind blown off in the gale,—a pine tree snapped off or torn up by the roots behind your house for fuel. Instead of no path to the front-yard gate in the Great Snow,—no gate—no front-yard,—and no path to the civilized world.

THE BEAN-FIELD

MEANWHILE my beans, the length of whose rows, added together, was seven miles already planted, were impatient to be hoed, for the earliest had grown considerably before the latest were in the ground, indeed they were not easily to be put off. What was the meaning of this so steady and self-respecting, this small Herculean labor, I knew not. I came to love my rows, my beans, though so many more than I wanted. They attached me to the earth, and so I got strength like Antæus.⁵ But why should I raise them? Only Heaven knows. This was my curious labor all summer,—to make this portion of the earth's surface, which had yielded only cinquefoil, blackberries, johnswort, and the like, before, sweet wild fruits and pleasant flowers, produce instead this pulse. What shall I learn of beans or beans of me? I cherish them, I hoe them, early and late I have an eye to them; and this is my day's work. It is a fine broad leaf to look on. My auxiliaries are the dews and rains which water this dry soil, and what fertility is in the soil itself, which for the most

⁵ In Greek mythology, a Libyan giant who was invincible so long as he remained in contact with his mother, the earth. Hercules killed him by raising him from the ground.

part is lean and effete. My enemies are worms, cool days, and most of all woodchucks. The last have nibbled for me a quarter of an acre clean. But what right had I to oust johnswort and the rest, and break up their ancient herb garden? Soon, however, the remaining beans will be too tough for them, and go forward to meet new foes.

When I was four years old, as I well remember, I was brought from Boston to this my native town, through these very woods and this field, to the pond. It is one of the oldest scenes stamped on my memory. And now to-night my flute has waked the echoes over that very water. The pines still stand here older than I; or, if some have fallen, I have cooked my supper with their stumps, and a new growth is rising all around, preparing another aspect for new infant eyes. Almost the same johnswort springs from the same perennial root in this pasture, and even I have at length helped to clothe that fabulous landscape of my infant dreams, and one of the results of my presence and influence is seen in these bean leaves, corn blades, and potato vines.

I planted about two acres and a half of upland; and as it was only about fifteen years since the land was cleared, and I myself had got out two or three cords of stumps, I did not give it any manure; but in the course of the summer it appeared by the arrowheads which I turned up in hoeing, that an extinct nation had anciently dwelt here and planted corn and beans ere white men came to clear the land, and so, to some extent, had exhausted the soil for this very crop.

Before yet any woodchuck or squirrel had run across the road, or the sun had got above the shrub oaks, while all the dew was on, though the farmers warned me against it,—I would advise you to do all your work if possible while the dew is on,—I began to level the ranks of haughty weeds in my bean-field and throw dust upon their heads. Early in the morning I worked barefooted, dabbling like a plastic

artist in the dewy and crumbling sand, but later in the day the sun blistered my feet. There the sun lighted me to hoe beans, pacing slowly backward and forward over that yellow gravelly upland, between the long green rows, fifteen rods, the one end terminating in a shrub oak copse where I could rest in the shade, the other in a blackberry field where the green berries deepened their tints by the time I had made another bout. Removing the weeds, putting fresh soil about the bean stems, and encouraging this weed which I had sown, making the yellow soil express its summer thought in bean leaves and blossoms rather than in wormwood and piper and millet grass, making the earth say beans instead of grass,—this was my daily work. As I had little aid from horses or cattle, or hired men or boys, or improved implements of husbandry, I was much slower, and became much more intimate with my beans than usual. But labor of the hands, even when pursued to the verge of drudgery, is perhaps never the worst form of idleness. It has a constant and imperishable moral, and to the scholar it yields a classic result. A very *agricola laboriosus*⁶ was I to travellers bound westward through Lincoln and Wayland to nobody knows where; they sitting at their ease in gigs, with elbows on knees, and reins loosely hanging in festoons; I the home-staying, laborious native of the soil. But soon my homestead was out of their sight and thought. It was the only open and cultivated field for a great distance on either side of the road, so they made the most of it; and sometimes the man in the field heard more of travellers' gossip and comment than was meant for his ear: "Beans so late! peas so late!"—for I continued to plant when others had begun to hoe,—the ministerial husbandman had not suspected it. "Corn, my boy, for fodder; corn for fodder." "Does he *live* there?" asks the black bonnet of the gray coat; and the hard-featured farmer reins up his grateful

⁶ Hard-working farmer.

dobbin to inquire what you are doing where he sees no manure in the furrow, and recommends a little chip dirt, or any little waste stuff, or it may be ashes or plaster. But here were two acres and a half of furrows, and only a hoe for cart and two hands to draw it,—there being an aversion to other carts and horses,—and chip dirt far away. Fellow-travellers as they rattled by compared it aloud with the fields which they had passed, so that I came to know how I stood in the agricultural world. This was one field not in Mr. Colman's report.⁷ And, by the way, who estimates the value of the crop which nature yields in the still wilder fields unimproved by man? The crop of *English* hay is carefully weighed, the moisture calculated, the silicates and the potash; but in all dells and pond-holes in the woods and pastures and swamps grows a rich and various crop only unreaped by man. Mine was, as it were, the connecting link between wild and cultivated fields; as some states are civilized, and others half-civilized, and others savage or barbarous, so my field was, though not in a bad sense, a half-cultivated field. They were beans cheerfully returning to their wild and primitive state that I cultivated, and my hoe played the *Ranz des Vaches*⁸ for them.

Near at hand, upon the topmost spray of a birch, sings the brown thrasher—or red mavis, as some love to call him—all the morning, glad of your society, that would find out another farmer's field if yours were not here. While you are planting the seed, he cries,—“Drop it, drop it,—cover it up, cover it up,—pull it up, pull it up, pull it up.” But this was not corn, and so it was safe from such enemies as he. You may wonder what his rigmarole, his amateur Paganini⁹ performances on one string or on twenty, have to do with your planting, and yet prefer it to leached ashes or plaster. It was a cheap sort of top dressing in which I had entire faith.

As I drew a still fresher soil about the rows with my hoe, I disturbed the ashes of unchronicled nations who in primeval years

lived under these heavens, and their small implements of war and hunting were brought to the light of this modern day. They lay mingled with other natural stones, some of which bore the marks of having been burned by Indian fires, and some by the sun, and also bits of pottery and glass brought hither by the recent cultivators of the soil. When my hoe tinkled against the stones, that music echoed to the woods and the sky, and was an accompaniment to my labor which yielded an instant and immeasurable crop. It was no longer beans that I hoed, nor I that hoed beans; and I remembered with as much pity as pride, if I remembered at all, my acquaintances who had gone to the city to attend the oratorios. The nighthawk circled overhead in the sunny afternoons—for I sometimes made a day of it—like a mote in the eye, or in heaven's eye, falling from time to time with a swoop and a sound as if the heavens were rent, torn at last to very rags and tatters, and yet a seamless cope remained; small imps that fill the air and lay their eggs on the ground on bare sand or rocks on the tops of hills, where few have found them; graceful and slender like ripples caught up from the pond, as leaves are raised by the wind to float in the heavens; such kindredship is in nature. The hawk is aerial brother of the wave which he sails over and surveys, those his perfect air-inflated wings answering to the elemental unfledged pinions of the sea. Or sometimes I watched a pair of hen-hawks circling high in the sky, alternately soaring and descending, approaching and leaving one another, as if they were the embodiment of my own thoughts. Or I was attracted by the passage of wild pigeons

⁷ Henry Colman was long State Commissioner for the Agricultural Survey of Massachusetts.

⁸ Song of Swiss mountain shepherds, noted by certain French observers because they made Swiss troops long for their free and wild home life.

⁹ Nicolò Paganini (1782-1840), Italian violinist.

from this wood to that, with a slight quivering winnowing sound and carrier haste, or from under a rotten stump my hoe turned up a sluggish portentous and outlandish spotted salamander, a trace of Egypt and the Nile, yet our contemporary. When I paused to lean on my hoe, these sounds and sights I heard and saw anywhere in the row, a part of the inexhaustible entertainment which the country offers.

On gala days the town fires its great guns, which echo like popguns to these woods, and some waifs of martial music occasionally penetrate thus far. To me, away there in my bean-field at the other end of the town, the big guns sounded as if a puffball had burst; and when there was a military turnout¹⁰ of which I was ignorant, I have sometimes had a vague sense all the day of some sort of itching and disease in the horizon, as if some eruption would break out there soon, either scarlatina or canker-rash, until at length some more favorable puff of wind, making haste over the fields and up the Wayland road, brought me information of the "trainers." It seemed by the distant hum as if somebody's bees had swarmed, and that the neighbors, according to Virgil's advice, by a faint *tintinnabulum* upon the most sonorous of their domestic utensils, were endeavoring to call them down into the hive again. And when the sound died quite away, and the hum had ceased, and the most favorable breezes told no tale, I knew that they had got the last drone of them all safely into the Middlesex hive, and that now their minds were bent on the honey with which it was smeared.

I felt proud to know that the liberties of Massachusetts and of our fatherland were in such safe keeping; and as I turned to my hoeing again I was filled with an inexpressible confidence, and pursued my labor cheerfully with a calm trust in the future.

When there were several bands of musicians, it sounded as if all the village was a vast bellows, and all the buildings expanded and collapsed alternately with a din. But

sometimes it was a really noble and inspiring strain that reached these woods, and the trumpet that sings of fame, and I felt as if I could spit a Mexican with a good relish,—for why should we always stand for trifles?—and looked round for a wood-chuck or a skunk to exercise my chivalry upon. These martial strains seemed as far away as Palestine, and reminded me of a march of crusaders in the horizon, with a slight tantivy and tremulous motion of the elm tree tops which overhang the village. This was one of the *great* days; though the sky had from my clearing only the same everlastingly great look that it wears daily, and I saw no difference in it.

It was a singular experience, that long acquaintance which I cultivated with beans, what with planting, and hoeing, and harvesting, and threshing, and picking over and selling them,—the last was the hardest of all,—I might add eating, for I did taste. I was determined to know beans. When they were growing, I used to hoe from five o'clock in the morning till noon, and commonly spent the rest of the day about other affairs. Consider the intimate and curious acquaintance one makes with various kinds of weeds,—it will bear some iteration in the account, for there was no little iteration in the labor,—disturbing their delicate organizations so ruthlessly, and making such invidious distinctions with his hoe, levelling whole ranks of one species, and sedulously cultivating another. That's Roman wormwood,—that's pigweed,—that's sorrel,—that's piper-grass,—have at him, chop him up, turn his roots upward to the sun, don't let him have a fibre in the shade, if you do he'll turn himself t'other side up and be as green as a leek in two days. A long war, not with cranes, but with weeds, those Trojans who had sun and rain and dews on their side. Daily the beans saw me come to their rescue armed with a hoe, and thin the ranks of their enemies, filling up the trenches with weedy

¹⁰ "Training Day" for a town's militia was then an important holiday in New England.

dead. Many a lusty crest-waving Hector, that towered a whole foot above his crowding comrades, fell before my weapon and rolled in the dust.

Those summer days which some of my contemporaries devoted to the fine arts in Boston or Rome, and others to contemplation in India, and others to trade in London or New York, I thus, with the other farmers of New England, devoted to husbandry. Not that I wanted beans to eat, for I am by nature a Pythagorean,¹¹ so far as beans are concerned, whether they mean porridge or voting, and exchanged them for rice; but, perchance, as some must work in fields if only for the sake of tropes and expression, to serve a parable-maker one day. It was on the whole a rare amusement, which, continued too long, might have become a dissipation. Though I gave them no manure, and did not hoe them all once, I hoed them unusually well as far as I went, and was paid for it in the end, "there being in truth," as Evelyn says, "no compost or letation whatsoever comparable to this continual motion, repastination, and turning of the mould with the spade." "The earth," he adds elsewhere, "especially if fresh, has a certain magnetism in it, by which it attracts the salt, power, or virtue (call it either) which gives it life, and is the logic of all the labor and stir we keep about it, to sustain us; all dungings and other sordid temperings being but the vicars succedaneous to this improvement." Moreover, this being one of those "worn-out and exhausted lay fields which enjoy their sabbath," had perchance, as Sir Kenelm Digby¹² thinks likely, attracted "vital spirits" from the air. I harvested twelve bushels of beans.

But to be more particular, for it is complained that Mr. Colman has reported chiefly the expensive experiments of gentlemen farmers, my outgoes were,—

For a hoe.....	\$0 54	
Plowing, harrowing, and furrowing....	7 50	Too much.
Beans for seed.....	3 12½	

Potatoes "	1 33
Peas "	0 40
Turnip seed.....	0 06
White line for crow fence	0 02
Horse cultivator and boy three hours...	1 00
Horse and cart to get crop	0 75
In all	\$14 72½

My income was (*patremfamilias vendacen, non emacem esse oportet*¹³), from

Nine bushels and twelve quarts of beans sold	\$16 94
Five bushels large potatoes.....	2 50
Nine " small.....	2 25
Grass	1 00
Stalks	0 75
In all	\$23 44
Leaving a pecuniary profit, as I have elsewhere said, of.....	\$8 71½

This is the result of my experience in raising beans: Plant the common small white bush bean about the first of June, in rows three feet by eighteen inches apart, being careful to select fresh round and unmixed seed. First look out for worms, and supply vacancies by planting anew. Then look out for woodchucks, if it is an exposed place, for they will nibble off the earliest tender leaves almost clean as they go; and again, when the young tendrils make their appearance, they have notice of it, and will shear them off with both buds and young pods, sitting erect like a squirrel. But above all harvest as early as

¹¹ The cult of Pythagoras (582?-507? B.C.), Greek philosopher, forbade the eating of flesh or beans. Beans were often used in voting by ancient peoples.

¹² English author of religious and quasi-scientific works (1603-1665).

¹³ The householder should be a seller, not a buyer.

possible, if you would escape frosts and have a fair and salable crop; you may save much loss by this means.

This further experience also I gained: I said to myself, I will not plant beans and corn with so much industry another summer, but such seeds, if the seed is not lost, as sincerity, truth, simplicity, faith, innocence, and the like, and see if they will not grow in this soil, even with less toil and manurance, and sustain me, for surely it has not been exhausted for these crops. Alas! I said this to myself; but now another summer is gone, and another, and another, and I am obliged to say to you, Reader, that the seeds which I planted, if indeed they *were* the seeds of those virtues, were wormeaten or had lost their vitality, and so did not come up. Commonly men will only be brave as their fathers were brave, or timid. This generation is very sure to plant corn and beans each new year precisely as the Indians did centuries ago and taught the first settlers to do, as if there were a fate in it. I saw an old man the other day, to my astonishment, making the holes with a hoe for the seventieth time at least, and not for himself to lie down in. But why should not the New Englander try new adventures, and not lay so much stress on his grain, his potato and grass crop, and his orchards,—raise other crops than these? Why concern ourselves so much about our beans for seed, and not be concerned at all about a new generation of men? We should really be fed and cheered if when we met a man we were sure to see that some of the qualities which I have named, which we all prize more than those other productions, but which are for the most part broadcast and floating in the air, had taken root and grown in him. Here comes such a subtle and ineffable quality, for instance, as truth or justice, though the slightest amount or new variety of it, along the road. Our ambassadors should be instructed to send home such seeds as these, and Congress help to distribute them over all the land. We should never stand upon ceremony with

sincerity. We should never cheat and insult and banish one another by our meanness, if there were present the kernel of worth and friendliness. We should not meet thus in haste. Most men I do not meet at all, for they seem not to have time; they are busy about their beans. We would not deal with a man thus plodding ever, leaning on a hoe or a spade as a staff between his work, not as a mushroom, but partially risen out of the earth, something more than erect, like swallows alighted and walking on the ground:—

“And as he spake, his wings would now
and then

Spread, as he meant to fly, then close
again,—”

so that we should suspect that we might be conversing with an angel. Bread may not always nourish us, but it always does us good, it even takes stiffness out of our joints, and makes us supple and buoyant, when we knew not what ailed us, to recognize any generosity in man or Nature, to share any unmixed and heroic joy.

Ancient poetry and mythology suggest, at least, that husbandry was once a sacred art; but it is pursued with irreverent haste and heedlessness by us, our object being to have large farms and large crops merely. We have no festival, nor procession, nor ceremony, not excepting our cattle-shows and so-called Thanksgivings, by which the farmer expresses a sense of the sacredness of his calling, or is reminded of its sacred origin. It is the premium and the feast which tempt him. He sacrifices not to Ceres and the Terrestrial Jove, but to the infernal Plutus rather.¹⁴ By avarice and selfishness, and a grovelling habit, from which none of us is free, of regarding the soil as property, or the means of acquiring property chiefly, the landscape is deformed, husbandry is degraded with us, and the farmer

¹⁴ Ceres, goddess of farming and harvest; Terrestrial Jove, supreme god of the earth, distinguished from Pluto, Jove of the under-world.

leads the meanest of lives. He knows Nature but as a robber. Cato says that the profits of agriculture are particularly pious or just (*maximeque pius quaestus*), and according to Varro the old Romans "called the same earth Mother and Ceres, and thought that they who cultivated it led a pious and useful life, and they alone were left of the race of King Saturn."

We are wont to forget that the sun looks on our cultivated fields and on the prairies and forests without distinction. They all reflect and absorb his rays alike, and the former make but a small part of the glorious picture which he beholds in his daily course. In his view the earth is all equally cultivated like a garden. Therefore we should receive the benefit of his light and heat with a corresponding trust and magnanimity. What though I value the seeds of these beans, and harvest that in the fall of the year? This broad field which I have looked at so long looks not to me as the principal cultivator, but away from me to influences more genial to it, which water and make it green. These beans have results which are not harvested by me. Do they not grow for woodchucks partly? The ear of wheat (in Latin *spica*, obsoletely *specca*, from *spe*, hope) should not be the only hope of the husbandman; its kernel or grain (*granum*, from *gerendo*, bearing) is not all that it bears. How, then, can our harvest fail? Shall I not rejoice also at the abundance of the weeds whose seeds are the granary of the birds? It matters little comparatively whether the fields fill the farmer's barns. The true husbandman will cease from anxiety, as the squirrels manifest no concern whether the woods will bear chestnuts this year or not, and finish his labor with every day, relinquishing all claim to the produce of his fields, and sacrificing in his mind not only his first but his last fruits also.

CONCLUSION

TO the sick the doctors wisely recommend a change of air and scenery. Thank

Heaven, here is not all the world. The buckeye does not grow in New England, and the mockingbird is rarely heard here. The wild goose is more of a cosmopolite than we, he breaks his fast in Canada, takes a luncheon in the Ohio, and plumes himself for the night in a southern bayou. Even the bison, to some extent, keeps pace with the seasons, cropping the pastures of the Colorado only till a greener and sweeter grass awaits him by the Yellowstone. Yet we think that if rail fences are pulled down, and stone walls piled up on our farms, bounds are henceforth set to our lives and our fates decided. If you are chosen town clerk, forsooth, you cannot go to Tierra del Fuego¹⁵ this summer: but you may go to the land of infernal fire nevertheless. The universe is wider than our views of it.

Yet we should oftener look over the taffarel of our craft, like curious passengers, and not make the voyage like stupid sailors picking oakum. The other side of the globe is but the home of our correspondent. Our voyaging is only great-circle sailing, and the doctors prescribe for diseases of the skin merely. One hastens to southern Africa to chase the giraffe; but surely that is not the game he would be after. How long, pray, would a man hunt giraffes if he could? Snipes and woodcocks also may afford rare sport; but I trust it would be nobler game to shoot one's self.—

"Direct your eye right inward, and you'll find

A thousand regions in your mind
Yet undiscovered. Travel them, and be
Expert in home-cosmography."

What does Africa,—what does the West stand for? Is not our own interior white on the chart? black though it may prove, like the coast, when discovered. Is it the source of the Nile, or the Niger, or the Mississippi, or a Northwest Passage around

¹⁵ The Spanish words mean "Land of Fire."

this continent, that we would find? Are these the problems which most concern mankind? Is Franklin¹⁶ the only man who is lost, that his wife should be so earnest to find him? Does Mr. Grinnell know where he himself is? Be rather the Mungo Park, the Lewis and Clark and Frobisher, of your own streams and oceans; explore your own higher latitudes,—with shiploads of preserved meats to support you, if they be necessary; and pile the empty cans sky-high for a sign. Were preserved meats invented to preserve meat merely? Nay, be a Columbus to whole new continents and worlds within you, opening new channels, not of trade, but of thought. Every man is the lord of a realm beside which the earthly empire of the Czar is but a petty state, a hummock left by the ice. Yet some can be patriotic who have no *self-respect*, and sacrifice the greater to the less. They love the soil which makes their graves, but have no sympathy with the spirit which may still animate their clay. Patriotism is a maggot in their heads. What was the meaning of that South-Sea Exploring Expedition, with all its parade and expense, but an indirect recognition of the fact that there are continents and seas in the moral world to which every man is an isthmus or an inlet, yet unexplored by him, but that it is easier to sail many thousand miles through cold and storm and cannibals, in a government ship, with five hundred men and boys to assist one, than it is to explore the private sea, the Atlantic and Pacific Ocean of one's being alone.—

"Erret, et extremos alter scrutetur Iberos.
Plus habet hic vitæ, plus habet ille
viæ."¹⁷

Let them wander and scrutinize the out-
landish Australians.
I have more of God, they more of the road.

It is not worth the while to go round the world to count the cats in Zanzibar. Yet do this even till you can do better, and you may perhaps find some "Symmes' Hole"¹⁸

by which to get at the inside at last. England and France, Spain and Portugal, Gold Coast and Slave Coast, all front on this private sea; but no bark from them has ventured out of sight of land, though it is without doubt the direct way to India. If you would learn to speak all tongues and conform to the customs of all nations, if you would travel farther than all travellers, be naturalized in all climes, and cause the Sphinx to dash her head against a stone, even obey the precept of the old philosopher,¹⁹ and Explore thyself. Herein are demanded the eye and the nerve. Only the defeated and deserters go to the wars, cowards that run away and enlist. Start now on that farthest western way, which does not pause at the Mississippi or the Pacific, nor conduct toward a worn-out China or Japan, but leads on direct, a tangent to this sphere, summer and winter, day and night, sun down, moon down, and at last earth down too.

It is said that Mirabeau²⁰ took to highway robbery "to ascertain what degree of resolution was necessary in order to place one's self in formal opposition to the most sacred laws of society." He declared that "a soldier who fights in the ranks does not require half so much courage as a foot-

¹⁶ Sir John Franklin (1786-1847) disappeared in the Arctic, and several expeditions searched for him before he was given up as lost. Henry Grinnell (1799-1874), New York merchant, financed two of these expeditions (1850, 1853). Mungo Park (1771-1806) was a Scottish explorer in Africa. Meriwether Lewis (1774-1809) and William Clark (1770-1838) were explorers of the American Northwest, and Sir Martin Frobisher (1535?-1594) was an English mariner.

¹⁷ Final lines of Claudian's *De Seneca Veronensi*.

¹⁸ John Cleves Symmes (1780-1829) proposed to make a hole at the North Pole to demonstrate his theory that the earth is a hollow sphere, habitable within.

¹⁹ The advice, "Know thyself," has been given by many philosophers, and its origin as a maxim is doubtful.

²⁰ The Comte de Mirabeau (1749-1791), French revolutionary leader.

pad,"—"that honor and religion have never stood in the way of a well-considered and a firm resolve." This was manly, as the world goes; and yet it was idle, if not desperate. A saner man would have found himself often enough "in formal opposition" to what are deemed "the most sacred laws of society," through obedience to yet more sacred laws, and so have tested his resolution without going out of his way. It is not for a man to put himself in such an attitude to society, but to maintain himself in whatever attitude he find himself through obedience to the laws of his being, which will never be one of opposition to a just government, if he should chance to meet with such.

I left the woods for as good a reason as I went there. Perhaps it seemed to me that I had several more lives to live, and could not spare any more time for that one. It is remarkable how easily and insensibly we fall into a particular route, and make a beaten track for ourselves. I had not lived there a week before my feet wore a path from my door to the pondside; and though it is five or six years since I trod it, it is still quite distinct. It is true, I fear, that others may have fallen into it, and so helped to keep it open. The surface of the earth is soft and impressible by the feet of men; and so with the paths which the mind travels. How worn and dusty, then, must be the highways of the world, how deep the ruts of tradition and conformity! I did not wish to take a cabin passage, but rather to go before the mast and on the deck of the world, for there I could best see the moonlight amid the mountains. I do not wish to go below now.

I learned this, at least, by my experiment: that if one advances confidently in the direction of his dreams, and endeavors to live the life which he has imagined, he will meet with a success unexpected in common hours. He will put some things behind, will pass an invisible boundary; new, universal, and more liberal laws will begin to establish themselves around and within him; or the old laws be expanded, and

interpreted in his favor in a more liberal sense, and he will live with the license of a higher order of beings. In proportion as he simplifies his life, the laws of the universe will appear less complex, and solitude will not be solitude, nor poverty poverty, nor weakness weakness. If you have built castles in the air, your work need not be lost; that is where they should be. Now put the foundations under them.

It is a ridiculous demand which England and America make, that you shall speak so that they can understand you. Neither men nor toadstools grow so. As if that were important, and there were not enough to understand you without them. As if Nature could support but one order of understandings, could not sustain birds as well as quadrupeds, flying as well as creeping things, and *hush* and *whoa*, which Bright²¹ can understand, were the best English. As if there were safety in stupidity alone. I fear chiefly lest my expression may not be *extra-vagant*²² enough, may not wander far enough beyond the narrow limits of my daily experience, so as to be adequate to the truth of which I have been convinced. *Extra vagance!* it depends on how you are yarded. The migrating buffalo, which seeks new pastures in another latitude, is not extravagant like the cow which kicks over the pail, leaps the cowyard fence, and runs after her calf, in milking time. I desire to speak somewhere *without* bounds; like a man in a waking moment, to men in their waking moments; for I am convinced that I cannot exaggerate enough even to lay the foundation of a true expression. Who that has heard a strain of music feared then lest he should speak extravagantly any more forever? In view of the future or possible, we should live quite laxly and undefined in front, our outlines dim and misty on that side; as our shadows reveal an insensible perspiration toward the sun. The volatile truth of

²¹ Common name for an ox.

²² So written to direct attention to the Latin etymology of the word from *extra*, on the outside, and *vagans*, wandering.

our words should continually betray the inadequacy of the residual statement. Their truth is instantly *translated*; its literal monument alone remains. The words which express our faith and piety are not definite; yet they are significant and fragrant like frankincense to superior natures.

Why level downward to our dullest perception always, and praise that as common sense? The commonest sense is the sense of men asleep, which they express by snoring. Sometimes we are inclined to class those who are once-and-a-half-witted with the half-witted, because we appreciate only a third part of their wit. Some would find fault with the morning red, if they ever got up early enough. "They pretend," as I hear, "that the verses of Kabir²³ have four different senses; illusion, spirit, intellect, and the exoteric doctrine of the Vedas," but in this part of the world it is considered a ground for complaint if a man's writings admit of more than one interpretation. While England endeavors to cure the potato-rot, will not any endeavor to cure the brain-rot, which prevails so much more widely and fatally?

I do not suppose that I have attained to obscurity, but I should be proud if no more fatal fault were found with my pages on this score than was found with the Walden ice. Southern customers objected to its blue color, which is the evidence of its purity, as if it were muddy, and preferred the Cambridge ice, which is white, but tastes of weeds. The purity men love is like the mists which envelop the earth, and not like the azure ether beyond.

Some are dinning in our ears that we Americans, and moderns generally, are intellectual dwarfs compared with the ancients, or even the Elizabethan men. But what is that to the purpose? A living dog is better than a dead lion. Shall a man go and hang himself because he belongs to the race of pygmies, and not be the biggest pygmy that he can? Let every one mind his own business, and endeavor to be what he was made.

Why should we be in such desperate

haste to succeed and in such desperate enterprises? If a man does not keep pace with his companions, perhaps it is because he hears a different drummer. Let him step to the music which he hears, however measured or far away. It is not important that he should mature as soon as an apple tree or an oak. Shall he turn his spring into summer? If the condition of things which we were made for is not yet, what were any reality which we can substitute? We will not be shipwrecked on a vain reality. Shall we with pains erect a heaven of blue glass over ourselves, though when it is done we shall be sure to gaze still at the true ethereal heaven far above, as if the former were not?

There was an artist in the city of Kouroo²⁴ who was disposed to strive after perfection. One day it came into his mind to make a staff. Having considered that in an imperfect work time is an ingredient, but into a perfect work time does not enter, he said to himself, It shall be perfect in all respects, though I should do nothing else in my life. He proceeded instantly to the forest for wood, being resolved that it should not be made of unsuitable material; and as he searched for and rejected stick after stick, his friends gradually deserted him, for they grew old in their works and died, but he grew not older by a moment. His singleness of purpose and resolution, and his elevated piety, endowed him, without his knowledge, with perennial youth. As he made no compromise with Time, Time kept out of his way, and only sighed at a distance because he could not overcome him. Before he had found a stick in all respects suitable the city of Kouroo was a hoary ruin, and he sat on one of its mounds to peel the stick. Before he had given it the proper shape the dynasty of the Candahars was at an end, and with the point of the stick he wrote the name of the last of that race in the sand, and then resumed

²³ Hindu mystic poet (1450?-1518).

²⁴ This fable is probably Thoreau's own invention, though modeled on the Hindu style.

his work. By the time he had smoothed and polished the staff Kalpa²⁵ was no longer the pole-star, and ere he had put on the ferule and the head adorned with precious stones, Brahma had awoke and slumbered many times. But why do I stay to mention these things? When the finishing stroke was put to his work, it suddenly expanded before the eyes of the astonished artist into the fairest of all the creations of Brahma. He had made a new system in making a staff, a world with full and fair proportions; in which, though the old cities and dynasties had passed away, fairer and more glorious ones had taken their places. And now he saw by the heap of shavings still fresh at his feet, that, for him and his work, the former lapse of time had been an illusion, and that no more time had elapsed than is required for a single semittillation from the brain of Brahma to fall on and inflame the tinder of a mortal brain. The material was pure, and his art was pure; how could the result be other than wonderful?

No face which we can give to a matter will stead us so well at last as the truth. This alone wears well. For the most part, we are not where we are, but in a false position. Through an infirmity of our natures, we suppose a case, and put ourselves into it, and hence are in two cases at the same time, and it is doubly difficult to get out. In sane moments we regard only the facts, the case that is. Say what you have to say, not what you ought. Any truth is better than make-believe. Tom Hyde, the tinker, standing on the gallows, was asked if he had anything to say. "Tell the tailors," said he, "to remember to make a knot in their thread before they take the first stitch." His companion's prayer is forgotten.

However mean your life is, meet it and live it; do not shun it and call it hard names. It is not so bad as you are. It looks poorest when you are richest. The faultfinder will find faults even in paradise. Love your life, poor as it is. You may perhaps have some pleasant, thrilling, glorious

hours, even in a poorhouse. The setting sun is reflected from the windows of the almshouse as brightly as from the rich man's abode; the snow melts before its door as early in the spring. I do not see but a quiet mind may live as contentedly there, and have as cheering thoughts, as in a palace. The town's poor seem to me often to live the most independent lives of any. Maybe they are simply great enough to receive without misgiving. Most think that they are above being supported by the town, but it oftener happens that they are not above supporting themselves by dishonest means, which should be more disreputable. Cultivate poverty like a garden herb, like sage. Do not trouble yourself much to get new things, whether clothes or friends. Turn the old; return to them. Things do not change; we change. Sell your clothes and keep your thoughts. God will see that you do not want society. If I were confined to a corner of a garret all my days, like a spider, the world would be just as large to me while I had my thoughts about me. The philosopher said: "From an army of three divisions one can take away its general, and put it in disorder; from the man the most abject and vulgar one cannot take away his thought." Do not seek so anxiously to be developed, to subject yourself to many influences to be played on; it is all dissipation. Humility like darkness reveals the heavenly lights. The shadows of poverty and meanness gather around us, "and lo! creation widens to our view."²⁶ We are often reminded that if there were bestowed on us the wealth of Croesus, our aims must still be the same, and our means essentially the same. Moreover, if you are restricted in your range by poverty, if you cannot buy books and newspapers, for instance, you are but confined to the most significant and vital experiences; you are compelled to

²⁵ Sanskrit for a day of Brahma—4,320,000,000 years.

²⁶ From Blanco White's sonnet "To Night."

deal with the material which yields the most sugar and the most starch. It is life near the bone where it is sweetest. You are defended from being a trifier. No man loses ever on a lower level by magnanimity on a higher. Superfluous wealth can buy superfluities only. Money is not required to buy one necessary of the soul.

I live in the angle of a leaden wall, into whose composition was poured a little alloy of bell-metal. Often, in the repose of my mid-day, there reaches my ears a confused *tintinnabulum* from without. It is the noise of my contemporaries. My neighbors tell me of their adventures with famous gentlemen and ladies, what notabilities they met at the dinner-table; but I am no more interested in such things than in the contents of the Daily Times. The interest and the conversation are about costume and manners chiefly; but a goose is a goose still, dress it as you will. They tell me of California and Texas, of England and the Indies, of the Hon. Mr.—of Georgia or of Massachusetts, all transient and fleeting phenomena, till I am ready to leap from their court-yard like the Mameluke bey.²⁷ I delight to come to my bearings,—not walk in procession with pomp and parade, in a conspicuous place, but to walk even with the Builder of the universe, if I may,—not to live in this restless, nervous, bustling, trivial Nineteenth Century, but stand or sit thoughtfully while it goes by. What are men celebrating? They are all on a committee of arrangements, and hourly expect a speech from somebody. God is only the president of the day, and Webster is his orator. I love to weigh, to settle, to gravitate toward that which most strongly and rightfully attracts me;—not hang by the beam of the scale and try to weigh less,—not suppose a case, but take the case that is; to travel the only path I can, and that on which no power can resist me. It affords me no satisfaction to commence to spring an arch before I have got a solid foundation. Let us not play at kittly-benders.²⁸ There is a solid bottom everywhere. We

read that the traveller asked the boy if the swamp before him had a hard bottom. The boy replied that it had. But presently the traveller's horse sank in up to the girths, and he observed to the boy, "I thought you said that this bog had a hard bottom." "So it has," answered the latter, "but you have not got half way to it yet." So it is with the bogs and quicksands of society; but he is an old boy that knows it. Only what is thought, said, or done at a certain rare coincidence is good. I would not be one of those who will foolishly drive a nail into mere lath and plastering; such a deed would keep me awake nights. Give me a hammer, and let me feel for the furring. Do not depend on the putty. Drive a nail home and clench it so faithfully that you can wake up in the night and think of your work with satisfaction,—a work at which you would not be ashamed to invoke the Muse. So will help you God, and so only. Every nail driven should be as another rivet in the machine of the universe, you carrying on the work.

Rather than love, than money, than fame, give me truth. I sat at a table where were rich food and wine in abundance, and obsequious attendance, but sincerity and truth were not; and I went away hungry from the inhospitable board. The hospitality was as cold as the ices. I thought that there was no need of ice to freeze them. They talked to me of the age of the wine and the fame of the vintage; but I thought of an older, a newer, and purer wine, of a more glorious vintage, which they had not got, and could not buy. The style, the house and grounds and "entertainment" pass for nothing with me. I called on the king, but he made me wait in his hall, and conducted like a man incapacitated for hospitality. There was a man in my neighborhood who lived in a hollow tree. His

²⁷ At the massacre of the famous cavalry troop known as the Mamelukes by Mohammed Ali in 1811, Emin Bey is said to have escaped by leaping his horse from the fortifications.

²⁸ Running or skating on thin ice.

manners were truly regal. I should have done better had I called on him.

How long shall we sit in our porticoes practising idle and musty virtues, which any work would make impertinent? As if one were to begin the day with long-suffering, and hire a man to hoe his potatoes; and in the afternoon go forth to practise Christian meekness and charity with goodness aforethought! Consider the China pride and stagnant self-complacency of mankind. This generation inclines a little to congratulate itself on being the last of an illustrious line; and in Boston and London and Paris and Rome, thinking of its long descent, it speaks of its progress in art and science and literature with satisfaction. There are the Records of the Philosophical Societies, and the public Eulogies of *Great Men*! It is the good Adam contemplating his own virtue. "Yes, we have done great deeds, and sung divine songs, which shall never die,"—that is, as long as *we* can remember them. The learned societies and great men of Assyria,—where are they? What youthful philosophers and experimentalists we are! There is not one of my readers who has yet lived a whole human life. These may be but the spring months in the life of the race. If we have had the seven-years' itch, we have not seen the seventeen-year locust yet in Concord. We are acquainted with a mere pellicle of the globe on which we live. Most have not delved six feet beneath the surface, nor leaped as many above it. We know not where we are. Beside, we are sound asleep nearly half our time. Yet we esteem ourselves wise, and have an established order on the surface. Truly, we are deep thinkers, we are ambitious spirits! As I stand over the insect crawling amid the pine needles on the forest floor, and endeavoring to conceal itself from my sight, and ask myself why it will cherish those humble thoughts, and hide its head from me who might, perhaps, be its benefactor, and impart to its race some cheering information, I am reminded of the greater Bene-

factor and Intelligence that stands over me the human insect

There is an incessant influx of novelty into the world and yet we tolerate incredible dulness. I need only suggest what kind of sermons are still listened to in the most enlightened countries. There are such words as joy and sorrow, but they are only the burden of a psalm, sung with a nasal twang, while we believe in the ordinary and mean. We think that we can change our clothes only. It is said that the British Empire is very large and respectable, and that the United States are a first-rate power. We do not believe that a tide rises and falls behind every man which can float the British Empire like a chip, if he should ever harbor it in his mind. Who knows what sort of seventeen-year locust will next come out of the ground? The government of the world I live in was not framed, like that of Britain, in after-dinner conversations over the wine.

The life in us is like the water in the river. It may rise this year higher than man has ever known it, and flood the parched uplands; even this may be the eventful year, which will drown out all our muskrats. It was not always dry land where we dwell. I see far inland the banks which the stream anciently washed, before science began to record its freshets. Every one has heard the story which has gone the rounds of New England, of a strong and beautiful bug which came out of the dry leaf of an old table of apple-tree wood, which had stood in a farmer's kitchen for sixty years, first in Connecticut, and afterward in Massachusetts,—from an egg deposited in the living tree many years earlier still, as appeared by counting the annual layers beyond it; which was heard gnawing out for several weeks, hatched perchance by the heat of an urn. Who does not feel his faith in a resurrection and immortality strengthened by hearing of this? Who knows what beautiful and winged life, whose egg has been buried for ages under many concentric layers of

woodenness in the dead dry life of society, deposited at first in the alburnum of the green and living tree, which has been gradually converted into the semblance of its well-seasoned tomb,—heard perchance gnawing out now for years by the astonished family of man, as they sat round the festive board,—may unexpectedly come forth from amidst society's most trivial and handselled furniture, to enjoy its perfect summer life at last!

I do not say that John or Jonathan will realize all this; but such is the character of that morrow which mere lapse of time can never make to dawn. The light which puts out our eyes is darkness to us. Only that day dawns to which we are awake. There is more day to dawn. The sun is but a morning star.

CIVIL DISOBEDIENCE¹

[1849]

I HEARTILY accept the motto,—“That government is best which governs least;” and I should like to see it acted up to more rapidly and systematically. Carried out, it finally amounts to this, which also I believe,—“That government is best which governs not at all;” and when men are prepared for it, that will be the kind of government which they will have. Government is at best but an expedient; but most governments are usually, and all governments are sometimes, inexpedient. The objections which have been brought against a standing army, and they are many and weighty, and deserve to prevail, may also at last be brought against a standing government. The standing army is only an arm of the standing government. The government itself, which is only the mode which the people have chosen to execute their will, is equally liable to be abused and perverted before the people can act through it. Witness the present Mexican war, the work of comparatively a few individuals using the standing government

as their tool, for, in the outset, the people would not have consented to this measure.

This American government,—what is it but a tradition, though a recent one, endeavoring to transmit itself unimpaired to posterity, but each instant losing some of its integrity? It has not the vitality and force of a single living man; for a single man can bend it to his will. It is a sort of wooden gun to the people themselves. But it is not the less necessary for this; for the people must have some complicated machinery or other, and hear its din, to satisfy that idea of government which they have. Governments show thus how successfully men can be imposed on, even impose on themselves, for their own advantage. It is excellent, we must all allow. Yet this government never of itself furthered any enterprise, but by the alacrity with which it got out of its way. *It* does not keep the country free. *It* does not settle the West. *It* does not educate. The character inherent in the American people has done all that has been accomplished; and it would have done somewhat more, if the government had not sometimes got in its way. For government is an expedient by which men would fain succeed in letting one another alone; and, as has been said, when it is most expedient, the governed are most let alone by it. Trade and commerce, if they were not made of India-rubber, would never manage to bounce over the obstacles which legislators are continually putting in their way; and, if one were to judge these men wholly by the effects of their actions and not partly by their intentions, they would deserve to be classed and punished with those mischievous persons who put obstructions on the railroads.

But, to speak practically and as a citizen, unlike those who call themselves no-

¹ The original title, when this essay was first printed in Elizabeth P. Peabody's *Aesthetic Papers* (Boston, 1849), was “Resistance to Civil Government.” It was written, however, in 1847, during the War with Mexico.

government men, I ask for, not at once no government, but *at once* a better government. Let every man make known what kind of government would command his respect, and that will be one step toward obtaining it.

After all, the practical reason why, when the power is once in the hands of the people, a majority are permitted, and for a long period continue, to rule is not because they are most likely to be in the right, nor because this seems fairest to the minority, but because they are physically the strongest. But a government in which the majority rule in all cases cannot be based on justice, even as far as men understand it. Can there not be a government in which majorities do not virtually decide right and wrong, but conscience?—in which majorities decide only those questions to which the rule of expediency is applicable? Must the citizen ever for a moment, or in the least degree, resign his conscience to the legislator? Why has every man a conscience, then? I think that we should be men first, and subjects afterward. It is not desirable to cultivate a respect for the law, so much as for the right. The only obligation which I have a right to assume is to do at any time what I think right. It is truly enough said, that a corporation has no conscience; but a corporation of conscientious men is a corporation *with* a conscience. Law never made men a whit more just; and, by means of their respect for it, even the well-disposed are daily made the agents of injustice. A common and natural result of an undue respect for law is, that you may see a file of soldiers, colonel, captain, corporal, privates, powder-monkeys, and all, marching in admirable order over hill and dale to the wars, against their wills, ay, against their common sense and consciences, which makes it very steep marching indeed, and produces a palpitation of the heart. They have no doubt that it is a damnable business in which they are concerned; they are all peaceably inclined. Now, what are they? Men at all? or small movable forts and magazines, at the serv-

ice of some unscrupulous man in power? Visit the Navy-Yard, and behold a marine, such a man as an American government can make, or such as it can make a man with its black arts,—a mere shadow and reminiscence of humanity, a man laid out alive and standing, and already, as one may say, buried under arms with funeral accompaniments, though it may be,—

“Not a drum was heard, not a funeral note,
As his corse to the rampart we hurried;
Not a soldier discharged his farewell shot
O’er the grave where our hero we buried.”²

The mass of men serve the state thus, not as men mainly, but as machines, with their bodies. They are the standing army, and the militia, jailors, constables, posse comitatus, etc. In most cases there is no free exercise whatever of the judgment or of the moral sense; but they put themselves on a level with wood and earth and stones; and wooden men can perhaps be manufactured that will serve the purpose as well. Such command no more respect than men of straw or a lump of dirt. They have the same sort of worth only as horses and dogs. Yet such as these even are commonly esteemed good citizens. Others—as most legislators, politicians, lawyers, ministers, and office-holders—serve the state chiefly with their heads; and, as they rarely make any moral distinctions, they are as likely to serve the Devil, without *intending* it, as God. A very few, as heroes, patriots, martyrs, reformers in the great sense, and *men*, serve the state with their consciences also, and so necessarily resist it for the most part; and they are commonly treated as enemies by it. A wise man will only be useful as a man, and will not submit to be “clay,” and “stop a hole to keep the wind away,”³ but leave that office to his dust at least:—

² From Charles Wolfe’s “The Burial of Sir John Moore.”

³ Shakespeare’s *Hamlet*, Act V, scene 1.

"I am too high-born to be propertied,
To be a secondary at control,
Or useful serving-man and instrument
To any sovereign state throughout the
world." ⁴

He who gives himself entirely to his fellow-men appears to them useless and selfish; but he who gives himself partially to them is pronounced a benefactor and philanthropist.

How does it become a man to behave toward this American government to-day? I answer, that he cannot without disgrace be associated with it. I cannot for an instant recognize that political organization as *my* government which is the *slave's* government also.

All men recognize the right of revolution; that is, the right to refuse allegiance to, and to resist, the government, when its tyranny or its inefficiency are great and unendurable. But almost all say that such is not the case now. But such was the case, they think, in the Revolution of '75. If one were to tell me that this was a bad government because it taxed certain foreign commodities brought to its ports, it is most probable that I should not make an ado about it, for I can do without them. All machines have their friction; and possibly this does enough good to counterbalance the evil. At any rate, it is a great evil to make a stir about it. But when the friction comes to have its machine, and oppression and robbery are organized, I say, let us not have such a machine any longer. In other words, when a sixth of the population of a nation which has undertaken to be the refuge of liberty are slaves, and a whole country is unjustly overrun and conquered by a foreign army, and subjected to military law, I think that it is not too soon for honest men to rebel and revolutionize. What makes this duty the more urgent is the fact that the country so overrun is not our own, but ours is the invading army.

Paley,⁵ a common authority with many on moral questions, in his chapter on the "Duty of Submission to Civil Government,"

resolves all civil obligation into expediency; and he proceeds to say, "that so long as the interest of the whole society requires it, that is, so long as the established government cannot be resisted or changed without public inconveniency, it is the will of God that the established government be obeyed, and no longer. . . . This principle being admitted, the justice of every particular case of resistance is reduced to a computation of the quantity of the danger and grievance on the one side, and of the probability and expense of redressing it on the other." Of this, he says, every man shall judge for himself. But Paley appears never to have contemplated those cases to which the rule of expediency does not apply, in which a people, as well as an individual, must do justice, cost what it may. If I have unjustly wrested a plank from a drowning man, I must restore it to him though I drown myself. This, according to Paley, would be inconvenient. But he that would save his life, in such a case, shall lose it. This people must cease to hold slaves, and to make war on Mexico, though it cost them their existence as a people.

In their practice, nations agree with Paley; but does any one think that Massachusetts does exactly what is right at the present crisis?

"A drab of state, a cloth-o'-silver slut,

To have her train borne up, and her
soul trail in the dirt."

Practically speaking, the opponents to a reform in Massachusetts are not a hundred thousand politicians at the South, but a hundred thousand merchants and farmers here, who are more interested in commerce and agriculture than they are in humanity, and are not prepared to do justice to the slave and to Mexico, *cost what it may*. I quarrel not with far-off foes, but with those

⁴ Shakespeare's *King John*, Act V, scene 2.

⁵ William Paley (1743-1805), English theologian and utilitarian philosopher. The work quoted is Paley's *Principles of Moral and Political Philosophy* (1785)

who, near at home, coöperate with, and do the bidding of, those far away, and without whom the latter would be harmless. We are accustomed to say, that the mass of men are unprepared; but improvement is slow, because the few are not materially wiser or better than the many. It is not so important that many should be as good as you, as that there be some absolute goodness somewhere; for that will leaven the whole lump. There are thousands who are *in opinion* opposed to slavery and to the war, who yet in effect do nothing to put an end to them; who, esteeming themselves children of Washington and Franklin, sit down with their hands in their pockets, and say that they know not what to do, and do nothing; who even postpone the question of freedom to the question of free-trade, and quietly read the prices-current along with the latest advices from Mexico, after dinner, and, it may be, fall asleep over them both. What is the price-current of an honest man and patriot to-day? They hesitate, and they regret, and sometimes they petition; but they do nothing in earnest and with effect. They will wait, well disposed, for others to remedy the evil, that they may no longer have it to regret. At most, they give only a cheap vote, and a feeble countenance and God-speed, to the right, as it goes by them. There are nine hundred and ninety-nine patrons of virtue to one virtuous man. But it is easier to deal with the real possessor of a thing than with the temporary guardian of it.

All voting is a sort of gaming, like checkers or backgammon, with a slight moral tinge to it, a playing with right and wrong, with moral questions; and betting naturally accompanies it. The character of the voters is not staked. I cast my vote, perchance, as I think right; but I am not vitally concerned that that right should prevail. I am willing to leave it to the majority. Its obligation, therefore, never exceeds that of expediency. Even voting *for the right* is *doing* nothing for it. It is only expressing to men feebly your desire that it should prevail. A wise man will not

leave the right to the mercy of chance, nor wish it to prevail through the power of the majority. There is but little virtue in the action of masses of men. When the majority shall at length vote for the abolition of slavery, it will be because they are indifferent to slavery, or because there is but little slavery left to be abolished by their vote. *They* will then be the only slaves. Only *his* vote can hasten the abolition of slavery who asserts his own freedom by his vote.

I hear of a convention to be held at Baltimore, or elsewhere, for the selection of a candidate for the Presidency, made up chiefly of editors, and men who are politicians by profession; but I think, what is it to any independent, intelligent, and respectable man what decision they may come to? Shall we not have the advantage of his wisdom and honesty, nevertheless? Can we not count upon some independent votes? Are there not many individuals in the country who do not attend conventions? But no: I find that the respectable man, so called, has immediately drifted from his position, and despairs of his country, when his country has more reason to despair of him. He forthwith adopts one of the candidates thus selected as the only *available* one, thus proving that he is-himself *available* for any purposes of the demagogue. His vote is of no more worth than that of any unprincipled foreigner or hireling native, who may have been bought. O for a man who is a *man*, and, as my neighbor says, has a bone in his back which you cannot pass your hand through! Our statistics are at fault: the population has been returned too large. How many *men* are there to a square thousand miles in this country? Hardly one. Does not America offer any inducement for men to settle here? The American has dwindled into an Odd Fellow,⁶—one who may be known by

⁶ Reference is to the Independent Order of Odd Fellows, which had set up as a distinctively American organization in 1842. It originated in England in the 18th Century.

the development of his organ of gregariousness, and a manifest lack of intellect and cheerful self-reliance; whose first and chief concern, on coming into the world, is to see that the Almshouses are in good repair; and, before yet he has lawfully donned the virile garb, to collect a fund for the support of the widows and orphans that may be; who, in short, ventures to live only by the aid of the Mutual Insurance Company, which has promised to bury him decently.

It is not a man's duty, as a matter of course, to devote himself to the eradication of any, even the most enormous wrong; he may still properly have other concerns to engage him; but it is his duty, at least, to wash his hands of it, and, if he gives it no thought longer, not to give it practically his support. If I devote myself to other pursuits and contemplations, I must first see, at least, that I do not pursue them sitting upon another man's shoulders. I must get off him first, that he may pursue his contemplations too. See what gross inconsistency is tolerated. I have heard some of my townsmen say, "I should like to have them order me out to help put down an insurrection of the slaves, or to march to Mexico;—see if I would go;" and yet these very men have each, directly by their allegiance, and so indirectly, at least, by their money, furnished a substitute. The soldier is applauded who refuses to serve in an unjust war by those who do not refuse to sustain the unjust government which makes the war; is applauded by those whose own act and authority he disregards and sets at naught, as if the state were penitent to that degree that it hired one to scourge it while it sinned, but not to that degree that it left off sinning for a moment. Thus, under the name of Order and Civil Government, we are all made at last to pay homage to and support our own meanness. After the first blush of sin comes its indifference; and from immoral it becomes, as it were, *unmoral*, and not quite unnecessary to that life which we have made.

The broadest and most prevalent error

requires the most disinterested virtue to sustain it. The slight reproach to which the virtue of patriotism is commonly liable, the noble are most likely to incur. Those who, while they disapprove of the character and measures of a government, yield to it their allegiance and support are undoubtedly its most conscientious supporters, and so frequently the most serious obstacles to reform. Some are petitioning the state to dissolve the Union, to disregard the requisitions of the President. Why do they not dissolve it themselves,—the union between themselves and the state,—and refuse to pay their quota into its treasury? Do not they stand in the same relation to the state that the state does to the Union? And have not the same reasons prevented the state from resisting the Union which have prevented them from resisting the state?

How can a man be satisfied to entertain an opinion merely, and enjoy *it*? Is there any enjoyment in it, if his opinion is that he is aggrieved? If you are cheated out of a single dollar by your neighbor, you do not rest satisfied with knowing that you are cheated, or with saying that you are cheated, or even with petitioning him to pay you your due; but you take effectual steps at once to obtain the full amount, and see that you are never cheated again. Action from principle, the perception and the performance of right, changes things and relations; it is essentially revolutionary, and does not consist wholly with anything which was. It not only divides states and churches, it divides families; ay, it divides the *individual*, separating the diabolical in him from the divine.

Unjust laws exist: shall we be content to obey them, or shall we endeavor to amend them, and obey them until we have succeeded, or shall we transgress them at once? Men generally, under such a government as this, think that they ought to wait until they have persuaded the majority to alter them. They think that, if they should resist, the remedy would be worse than the evil. But it is the fault of the government itself that the remedy is worse than the

evil. *It* makes it worse. Why is it not more apt to anticipate and provide for reform? Why does it not cherish its wise minority? Why does it cry and resist before it is hurt? Why does it not encourage its citizens to be on the alert to point out its faults, and *do* better than it would have them? Why does it always crucify Christ, and excommunicate Copernicus⁷ and Luther, and pronounce Washington and Franklin rebels?

One would think, that a deliberate and practical denial of its authority was the only offense never contemplated by government; else, why has it not assigned its definite, its suitable and proportionate penalty? If a man who has no property refuses but once to earn nine shillings for the state, he is put in prison for a period unlimited by any law that I know, and determined only by the discretion of those who placed him there; but if he should steal ninety times nine shillings from the state, he is soon permitted to go at large again.

If the injustice is part of the necessary friction of the machine of government, let it go, let it go: perchance it will wear smooth,—certainly the machine will wear out. If the injustice has a spring, or a pulley, or a rope, or a crank, exclusively for itself, then perhaps you may consider whether the remedy will not be worse than the evil; but if it is of such a nature that it requires you to be the agent of injustice to another, then, I say, break the law. Let your life be a counter friction to stop the machine. What I have to do is to see, at any rate, that I do not lend myself to the wrong which I condemn.

As for adopting the ways which the state has provided for remedying the evil, I know not of such ways. They take too much time, and a man's life will be gone. I have other affairs to attend to. I came into this world, not chiefly to make this a good place to live in, but to live in it, be it good or bad. A man has not everything to do, but something; and because he cannot do *everything*, it is not necessary that he should do *something* wrong. It is not my

business to be petitioning the Governor or the Legislature any more than it is theirs to petition me; and if they should not hear my petition, what should I do then? But in this case the state has provided no way: its very Constitution is the evil. This may seem to be harsh and stubborn and unconciliatory; but it is to treat with the utmost kindness and consideration the only spirit that can appreciate or deserves it. So is all change for the better, like birth and death, which convulse the body.

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually withdraw their support, both in person and property, from the government of Massachusetts and not wait till they constitute a majority of one, before they suffer the right to prevail through them. I think that it is enough if they have God on their side, without waiting for that other one. Moreover, any man more right than his neighbors constitutes a majority of one already.

I meet this American government, or its representative, the state government, directly, and face to face, once a year—no more—in the person of its tax-gatherer; this is the only mode in which a man situated as I am necessarily meets it; and it then says distinctly, Recognize me; and the simplest, most effectual, and, in the present posture of affairs, the indispensable mode of treating with it on this head, of expressing your little satisfaction with and love for it, is to deny it then. My civil neighbor, the tax-gatherer, is the very man I have to deal with,—for it is, after all, with men and not with parchment that I quarrel,—and he has voluntarily chosen to be an agent of the government. How shall he ever know well what he is and does as an officer of the government, or as a man, until he is obliged to consider whether he shall treat me, his neighbor, for whom he has respect, as a neighbor and well-disposed man, or as a maniac and disturber of the peace, and see if he can get over this obstruction to his

⁷ Copernicus was not excommunicated.

neighborliness without a ruder and more impetuous thought or speech corresponding with his action. I know this well, that if one thousand, if one hundred, if ten men whom I could name,—if ten *honest* men only,—ay, if *one* HONEST man, in this State of Massachusetts, *ceasing to hold slaves*, were actually to withdraw from this copartnership, and be locked up in the county jail therefor, it would be the abolition of slavery in America. For it matters not how small the beginning may seem to be: what is once well done is done forever. But we love better to talk about it: that we say is our mission. Reform keeps many scores of newspapers in its service, but not one man. If my esteemed neighbor, the State's ambassador, who will devote his days to the settlement of the question of human rights in the Council Chamber, instead of being threatened with the prisons of Carolina, were to sit down the prisoner of Massachusetts, that State which is so anxious to foist the sin of slaving upon her sister,—though at present she can discover only an act of inhospitality to be the ground of a quarrel with her,—the Legislature would not wholly waive the subject the following winter.⁸

Under a government which imprisons any unjustly, the true place for a just man is also a prison. The proper place to-day, the only place which Massachusetts has provided for her freer and less desponding spirits, is in her prisons, to be put out and locked out of the State by her own act, as they have already put themselves out by their principles. It is there that the fugitive slave, and the Mexican prisoner on parole, and the Indian come to plead the wrongs of his race should find them; on that separate, but more free and honorable ground, where the State places those who are not *with* her, but *against* her,—the only house in a slave State in which a free man can abide with honor. If any think that their influence would be lost there, and their voices no longer afflict the ear of the State, that they would not be as an enemy within its walls, they do not know by how

much truth is stronger than error, nor how much more eloquently and effectively he can combat injustice who has experienced a little in his own person. Cast your whole vote, not a strip of paper merely, but your whole influence. A minority is powerless while it conforms to the majority; it is not even a minority then; but it is irresistible when it clogs by its whole weight. If the alternative is to keep all just men in prison, or give up war and slavery, the State will not hesitate which to choose. If a thousand men were not to pay their tax-bills this year, that would not be a violent and bloody measure, as it would be to pay them, and enable the State to commit violence and shed innocent blood. This is, in fact, the definition of a peaceable revolution, if any such is possible. If the tax-gatherer, or any other public officer, asks me, as one has done, "But what shall I do?" my answer is, "If you really wish to do anything, resign your office." When the subject has refused allegiance, and the officer has resigned his office, then the revolution is accomplished. But even suppose blood should flow. Is there not a sort of blood shed when the conscience is wounded? Through this wound a man's real manhood and immortality flow out, and he bleeds to an ever-lasting death. I see this blood flowing now.

I have contemplated the imprisonment of the offender, rather than the seizure of his goods—though both will serve the same purpose,—because they who assert the purest right, and consequently are most dangerous to a corrupt State, commonly have not spent much time in accumulating property. To such the State renders comparatively small service, and a slight tax is wont to appear exorbitant, particularly if they are obliged to earn it by special labor with their hands. If there were one who lived wholly without the use of money, the

⁸ An allusion to the expulsion of Samuel Hoar from South Carolina, whither he had been sent in 1844 by the governor of Massachusetts to initiate a test case based on South Carolina slave law.

State itself would hesitate to demand it of him. But the rich man—not to make any invidious comparison—is always sold to the institution which makes him rich. Absolutely speaking, the more money, the less virtue; for money comes between a man and his objects, and obtains them for him, and it was certainly no great virtue to obtain it. It puts to rest many questions which he would otherwise be taxed to answer, while the only new question which it puts is the hard but superfluous one, how to spend it. Thus his moral ground is taken from under his feet. The opportunities of living are diminished in proportion as what are called the “means” are increased. The best thing a man can do for his culture when he is rich is to endeavor to carry out those schemes which he entertained when he was poor. Christ answered the Herodians according to their condition. “Show me the tribute-money,” said he;—and one took a penny out of his pocket;—if you use money which has the image of Cæsar on it and which he has made current and valuable, that is, *if you are men of the State*, and gladly enjoy the advantages of Cæsar’s government, then pay him back some of his own when he demands it. “Render therefore to Cæsar that which is Cæsar’s, and to God those things which are God’s”^a—leaving them no wiser than before as to which was which; for they did not wish to know.

When I converse with the freest of my neighbors, I perceive that, whatever they may say about the magnitude and seriousness of the question, and their regard for the public tranquillity, the long and the short of the matter is, that they cannot spare the protection of the existing government, and they dread the consequences to their property and families of disobedience to it. For my own part, I should not like to think that I ever rely on the protection of the State. But, if I deny the authority of the State when it presents its tax-bill, it will soon take and waste all my property, and so harass me and my children without end. This is hard. This makes it

impossible for a man to live honestly, and at the same time comfortably, in outward respects. It will not be worth the while to accumulate property; that would be sure to go again. You must hire or squat somewhere, and raise but a small crop, and eat that soon. You must live within yourself, and depend upon yourself always tucked up and ready for a start, and not have many affairs. A man may grow rich in Turkey even, if he will be in all respects a good subject of the Turkish government. Confucius said. “If a state is governed by the principles of reason, poverty and misery are subjects of shame; if a state is not governed by the principles of reason, riches and honors are the subjects of shame.” No: until I want the protection of Massachusetts to be extended to me in some distant Southern port, where my liberty is endangered, or until I am bent solely on building up an estate at home by peaceful enterprise, I can afford to refuse allegiance to Massachusetts, and her right to my property and life. It costs me less in every sense to incur the penalty of disobedience to the State than it would to obey. I should feel as if I were worth less in that case.

Some years ago, the State met me in behalf of the Church, and commanded me to pay a certain sum toward the support of a clergyman whose preaching my father attended, but never I myself. “Pay,” it said, “or be locked up in the jail.” I declined to pay, but, unfortunately, another man saw fit to pay it. I did not see why the schoolmaster should be taxed to support the priest, and not the priest the schoolmaster; for I was not the State’s schoolmaster, but I supported myself by voluntary subscription. I did not see why the lyceum should not present its tax-bill, and have the State to back its demand, as well as the Church. However, at the request of the selectmen, I condescended to make some such statement as this in writing:—“Know all men by these presents,

^a Cf. *Matthew*, xx, 19.

that I, Henry Thoreau, do not wish to be regarded as a member of any incorporated society which I have not joined." This I gave to the town clerk; and he has it. The State, having thus learned that I did not wish to be regarded as a member of that church, has never made a like demand on me since; though it said that it must adhere to its original presumption that time. If I had known how to name them, I should then have signed off in detail from all the societies which I never signed on to; but I did not know where to find a complete list.

I have paid no poll-tax for six years. I was put into a jail once on this account, for one night; and, as I stood considering the walls of solid stone, two or three feet thick, the door of wood and iron, a foot thick, and the iron grating which strained the light, I could not help being struck with the foolishness of that institution which treated me as if I were mere flesh and blood and bones, to be locked up. I wondered that it should have concluded at length that this was the best use it could put me to, and had never thought to avail itself of my services in some way. I saw that, if there was a wall of stone between me and my townsmen, there was a still more difficult one to climb or break through before they could get to be as free as I was. I did not for a moment feel confined, and the walls seemed a great waste of stone and mortar. I felt as if I alone of all my townsmen had paid my tax. They plainly did not know how to treat me, but behaved like persons who are underbred. In every threat and in every compliment there was a blunder; for they thought that my chief desire was to stand the other side of that stone wall. I could not but smile to see how industriously they locked the door on my meditations, which followed them out again without let or hindrance, and *they* were really all that was dangerous. As they could not reach me, they had resolved to punish my body; just as boys, if they cannot come at some person against whom they have a spite, will abuse his

dog. I saw that the State was half-witted, that it was timid as a lone woman with her silver spoons, and that it did not know its friends from its foes, and I lost all my remaining respect for it, and pitied it.

Thus the State never intentionally confronts a man's sense, intellectual or moral, but only his body, his senses. It is not armed with superior wit or honesty, but with superior physical strength. I was not born to be forced. I will breathe after my own fashion. Let us see who is the strongest. What force has a multitude? They only can force me who obey a higher law than I. They force me to become like themselves. I do not hear of *men* being *forced* to live this way or that by masses of men. What sort of life were that to live? When I meet a government which says to me, "Your money or your life," why should I be in haste to give it my money? It may be in a great strait, and not know what to do: I cannot help that. It must help itself; do as I do. It is not worth the while to snivel about it. I am not responsible for the successful working of the machinery of society. I am not the son of the engineer. I perceive that, when an acorn and a chestnut fall side by side, the one does not remain inert to make way for the other, but both obey their own laws, and spring and grow and flourish as best they can, till one, perchance, overshadows and destroys the other. If a plant cannot live according to its nature, it dies; and so a man.

The night in prison was novel and interesting enough. The prisoners in their shirt-sleeves were enjoying a chat and the evening air in the doorway, when I entered. But the jailer said, "Come, boys, it is time to lock up;" and so they dispersed, and I heard the sound of their steps returning into the hollow apartments. My room-mate was introduced to me by the jailer as "a first-rate fellow and a clever man." When the door was locked, he showed me where to hang my hat, and how he managed matters there. The rooms were whitewashed once a month; and this

one, at least, was the whitest, most simply furnished, and probably the neatest apartment in the town. He naturally wanted to know where I came from, and what brought me there; and, when I had told him, I asked him in my turn how he came there, presuming him to be an honest man, of course; and, as the world goes, I believe he was. "Why," said he, "they accuse me of burning a barn; but I never did it." As near as I could discover, he had probably gone to bed in a barn when drunk, and smoked his pipe there; and so a barn was burnt. He had the reputation of being a clever man, had been there some three months waiting for his trial to come on, and would have to wait as much longer, but he was quite domesticated and contented, since he got his board for nothing, and thought that he was well treated.

He occupied one window, and I the other; and I saw that if one stayed there long, his principal business would be to look out the window. I had soon read all the tracts that were left there, and examined where former prisoners had broken out, and where a grate had been sawed off, and heard the history of the various occupants of that room; for I found that even here there was a history and a gossip which never circulated beyond the walls of the jail. Probably this is the only house in the town where verses are composed, which are afterward printed in a circular form, but not published. I was shown quite a long list of verses which were composed by some young men who had been detected in an attempt to escape, who avenged themselves by singing them.

I pumped my fellow-prisoner as dry as I could, for fear I should never see him again; but at length he showed me which was my bed, and left me to blow out the lamp.

It was like traveling into a far country, such as I had never expected to behold, to be there for one night. It seemed to me that I never had heard the town-clock strike before, nor the evening sounds of

the village, for we slept with the windows open, which were inside the grating. It was to see my native village in the light of the Middle Ages and our Concord was turned into a Rhine stream, and visions of knights and castles passed before me. They were the voices of old burghers that I heard in the streets. I was an involuntary spectator and auditor of whatever was done and said in the kitchen of the adjacent village-inn,—a wholly new and rare experience to me. It was a closer view of my native town. I was fairly inside of it. I never had seen its institutions before. This is one of its peculiar institutions; for it is a shire town. I began to comprehend what its inhabitants were about.

In the morning, our breakfasts were put through the hole in the door, in small oblong-square tin pans, made to fit, and holding a pint of chocolate, with brown bread, and an iron spoon. When they called for the vessels again, I was green enough to return what bread I had left; but my comrade seized it, and said that I should lay that up for lunch or dinner. Soon after he was let out to work at haying in a neighboring field, whither he went every day, and would not be back till noon; so he bade me good-day, saying that he doubted if he should see me again.

When I came out of prison,—for some one interfered, and paid that tax,—I did not perceive that great changes had taken place on the common, such as he observed who went in a youth and emerged a tottering and gray-headed man; and yet a change had to my eyes come over the scene, —the town, and State, and country,—greater than any that mere time could effect. I saw yet more distinctly the State in which I lived. I saw to what extent the people among whom I lived could be trusted as good neighbors and friends; that their friendship was for summer weather only; that they did not greatly propose to do right; that they were a distinct race from me by their prejudices and superstitions, as the Chinamen and Malays are; that in their sacrifices to humanity they ran

no risks, not even to their property; that after all they were not so noble but they treated the thief as he had treated them, and hoped, by a certain outward observance and a few prayers, and by walking in a particular straight though useless path from time to time, to save their souls. This may be to judge my neighbors harshly, for I believe that many of them are not aware that they have such an institution as the jail in their village.

It was formerly the custom in our village, when a poor debtor came out of jail, for his acquaintances to salute him, looking through their fingers, which were crossed to represent the grating of a jail window, "How do ye do?" My neighbors did not thus salute me, but first looked at me, and then at one another, as if I had returned from a long journey. I was put into jail as I was going to the shoemaker's to get a shoe which was mended. When I was let out the next morning, I proceeded to finish my errand, and, having put on my mended shoe, joined a huckleberry party, who were impatient to put themselves under my conduct, and in half an hour,—for the horse was soon tackled,—was in the midst of a huckleberry field, on one of our highest hills, two miles off, and then the State was nowhere to be seen.

This is the whole history of "My Prisons."¹⁰

I have never declined paying the highway tax, because I am as desirous of being a good neighbor as I am of being a bad subject; and as for supporting schools, I am doing my part to educate my fellow-countrymen now. It is for no particular item in the tax-bill that I refuse to pay it. I simply wish to refuse allegiance to the State, to withdraw and stand aloof from it effectually. I do not care to trace the course of my dollar, if I could, till it buys a man, or a musket to shoot one with,—the dollar is innocent,—but I am concerned to trace the effects of my allegiance. In fact, I quietly declare war with the State, after

my fashion, though I will still make what use and get what advantage of her I can, as is usual in such cases.

If others pay the tax which is demanded of me, from a sympathy with the State, they do but what they have already done in their own case, or rather they abet injustice to a greater extent than the State requires. If they pay the tax from a mistaken interest in the individual taxed, to save his property, or prevent his going to jail, it is because they have not considered wisely how far they let their private feelings interfere with the public good.

This, then, is my position at present. But one cannot be too much on his guard in such a case, lest his action be biased by obstinacy or an undue regard for the opinions of men. Let him see that he does only what belongs to himself and to the hour.

I think sometimes, Why, this people mean well, they are only ignorant, they would do better if they knew how: why give your neighbors this pain to treat you as they are not inclined to? But I think again, This is no reason why I should do as they do, or permit others to suffer much greater pain of a different kind. Again, I sometimes say to myself, When many millions of men, without heat, without ill will, without personal feeling of any kind, demand of you a few shillings only, without the possibility, such is their constitution, of retracting or altering their present demand, and without the possibility, on your side, of appeal to any other millions, why expose yourself to this overwhelming brute force? You do not resist cold and hunger, the winds and the waves, thus obstinately, you quietly submit to a thousand similar necessities. You do not put your head into the fire. But just in proportion as I regard this as not wholly a brute force, but partly a human force, and consider that I have relations to those

¹⁰ Reference is to a popular book with this title in translation—Silvio Pellico's *Le mie prigioni* (1832), dealing with the author's imprisonment by the Austrian government.

millions as to so many millions of men, and not of mere brute or inanimate things, I see that appeal is possible, first and instantaneously, from them to the Maker of them, and, secondly, from them to themselves. But if I put my head deliberately into the fire, there is no appeal to fire or to the Maker of fire, and I have only myself to blame. If I could convince myself that I have any right to be satisfied with men as they are, and to treat them accordingly, and not according, in some respects, to my requisitions and expectations of what they and I ought to be, then, like a good Mussulman and fatalist, I should endeavor to be satisfied with things as they are, and say it is the will of God. And, above all, there is this difference between resisting this and a purely brute or natural force, that I can resist this with some effect, but I cannot expect, like Orpheus, to change the nature of the rocks and trees and beasts.

I do not wish to quarrel with any man or nation. I do not wish to split hairs, to make fine distinctions, or set myself up as better than my neighbors. I seek rather, I may say, even an excuse for conforming to the laws of the land. I am but too ready to conform to them. Indeed, I have reason to suspect myself on this head, and each year, as the tax-gatherer comes round, I find myself disposed to review the acts and position of the general and State governments, and the spirit of the people, to discover a pretext for conformity.

"We must affect our country as our parents,

And if at any time we alienate
Our love or industry from doing it honor,
We must respect effects and teach the soul
Matter of conscience and religion,
And not desire of rule or benefit."

I believe that the State will soon be able to take all my work of this sort out of my hands, and then I shall be no better a patriot than my fellow-countrymen. Seen from a lower point of view, the Constitu-

tion, with all its faults, is very good; the law and the courts are very respectable; even this State and this American government are, in many respects, very admirable, and rare things, to be thankful for, such as a great many have described them; but seen from a point of view a little higher, they are what I have described them, seen from a higher still, and the highest, who shall say what they are, or that they are worth looking at or thinking of at all?

However, the government does not concern me much, and I shall bestow the fewest possible thoughts on it. It is not many moments that I live under a government, even in this world. If a man is thought-free, fancy-free, imagination-free, that which *is not* never for a long time appearing *to be* to him, unwise rulers or reformers cannot fatally interrupt him.

I know that most men think differently from myself, but those whose lives are by profession devoted to the study of these or kindred subjects content me as little as any. Statesmen and legislators, standing so completely within the institution, never distinctly and nakedly behold it. They speak of moving society, but have no resting-place without it. They may be men of a certain experience and discrimination, and have no doubt invented ingenious and even useful systems, for which we sincerely thank them, but all their wit and usefulness lie within certain not very wide limits. They are wont to forget that the world is not governed by policy and expediency. Webster never goes behind government, and so cannot speak with authority about it. His words are wisdom to those legislators who contemplate no essential reform in the existing government; but for thinkers, and those who legislate for all time, he never once glances at the subject. I know of those whose serene and wise speculations on this theme would soon reveal the limits of his mind's range and hospitality. Yet, compared with the cheap professions of most reformers, and the still cheaper wisdom and eloquence of politicians

in general, his are almost the only sensible and valuable words, and we thank Heaven for him. Comparatively, he is always strong, original, and, above all, practical. Still, his quality is not wisdom, but prudence. The lawyer's truth is not Truth, but consistency or a consistent expediency. Truth is always in harmony with herself, and is not concerned chiefly to reveal the justice that may consist with wrong-doing. He well deserves to be called, as he has been called, the Defender of the Constitution. There are really no blows to be given by him but defensive ones. He is not a leader, but a follower. His leaders are the men of '87.¹¹ "I have never made an effort," he says, "and never propose to make an effort, I have never countenanced an effort, and never mean to countenance an effort, to disturb the arrangement as originally made, by which the various States came into the Union." Still thinking of the sanction which the Constitution gives to slavery, he says, "Because it was a part of the original compact,—let it stand."¹² Notwithstanding his special acuteness and ability, he is unable to take a fact out of its merely political relations, and behold it as it lies absolutely to be disposed of by the intellect,—what, for instance, it behooves a man to do here in America to-day with regard to slavery,—but ventures, or is driven, to make some such desperate answer as the following, while professing to speak absolutely, and as a private man,—from which what new and singular code of social duties might be inferred? "The manner," says he, "in which the governments of those States where slavery exists are to regulate it is for their own consideration, under their responsibility to their constituents, to the general laws of propriety, humanity, and justice, and to God. Associations formed elsewhere, springing from a feeling of humanity, or other cause, have nothing whatever to do with it. They have never received any encouragement from me, and they never will."¹³

They who know of no purer sources of truth, who have traced up its stream no

higher, stand, and wisely stand, by the Bible and the Constitution, and drink at it there with reverence and humility; but they who behold where it comes truckling into this lake or that pool, gird up their loins once more, and continue their pilgrimage toward its fountainhead.

No man with a genius for legislation has appeared in America. They are rare in the history of the world. There are orators, politicians, and eloquent men, by the thousand; but the speaker has not yet opened his mouth to speak who is capable of settling the much-vexed questions of the day. We love eloquence for its own sake, and not for any truth which it may utter, or any heroism it may inspire. Our legislators have not yet learned the comparative value of free-trade and of freedom, of union, and of rectitude, to a nation. They have no genius or talent for comparatively humble questions of taxation and finance, commerce and manufactures and agriculture. If we were left solely to the wordy wit of legislators in Congress for our guidance, uncorrected by the seasonable experience and the effectual complaints of the people, America would not long retain her rank among the nations. For eighteen hundred years, though perchance I have no right to say it, the New Testament has been written; yet where is the legislator who has wisdom and practical talent enough to avail himself of the light which it sheds on the science of legislation?

The authority of government, even such as I am willing to submit to,—for I will cheerfully obey those who know and can do better than I, and in many things even those who neither know nor can do so well,—is still an impure one: to be strictly just, it must have the sanction and consent of the governed. It can have no pure right

¹¹ The authors of the Constitution.

¹² From Webster's speech on the Texas question, Dec. 22, 1845. The quotation which follows is from a speech on the bill to exclude slavery from the territories, Aug. 12, 1848.

¹³ These extracts have been inserted since the lecture was read. [Thoreau's note.]

over my person and property but what I concede to it. The progress from an absolute to a limited monarchy, from a limited monarchy to a democracy, is a progress toward a true respect for the individual. Even the Chinese philosopher was wise enough to regard the individual as the basis of the empire. Is a democracy, such as we know it, the last improvement possible in government? Is it not possible to take a step further towards recognizing and organizing the rights of man? There will never be a really free and enlightened State until the State comes to recognize the individual as a higher and independent power, from which all its own power and authority are derived, and treats him accordingly. I please myself with imagining a State at last which can afford to be just to all men, and to treat the individual with respect as a neighbor; which even would not think it inconsistent with its own repose if a few were to live aloof from it, not meddling with it, nor embraced by it, who fulfilled all the duties of neighbors and fellow-men. A State which bore this kind of fruit, and suffered it to drop off as fast as it ripened, would prepare the way for a still more perfect and glorious State, which also I have imagined, but not yet anywhere seen.

From
WILD APPLES
[1863 (1862)]

THE FRUIT AND ITS FLAVOR

THE TIME for wild apples is the last of October and the first of November. They then get to be palatable, for they ripen late, and they are still, perhaps, as beautiful as ever. I make a great account of these fruits, which the farmers do not think it worth the while to gather,—wild flavors of the Muse, vivacious and inspiring. The farmer thinks that he has better in his barrels; but he is mistaken, unless he has a walker's appetite and imagination, neither of which can he have.

Such as grow quite wild, and are left out till the first of November, I presume that the owner does not mean to gather. They belong to children as wild as themselves,—to certain active boys that I know,—to the wild-eyed woman of the fields, to whom nothing comes amiss, who gleanes after all the world,—and, moreover, to us walkers. We have met with them, and they are ours. These rights, long enough insisted upon, have come to be an institution in some old countries, where they have learned how to live. I hear that "the custom of gipping, which may be called apple-gleaning, is, or was formerly, practised in Herefordshire. It consists in leaving a few apples, which are called the gipples, on every tree, after the general gathering, for the boys, who go with climbing-poles and bags to collect them."

As for those I speak of, I pluck them as a wild fruit, native to this quarter of the earth,—fruit of old trees that have been dying ever since I was a boy and are not yet dead, frequented only by the woodpecker and the squirrel, deserted now by the owner, who has not faith enough to look under their boughs. From the appearance of the tree-top, at a little distance, you would expect nothing but lichens to drop from it, but your faith is rewarded by finding the ground strewn with spirited fruit,—some of it, perhaps, collected at squirrel-holes, with the marks of their teeth by which they carried them,—some containing a cricket or two silently feeding within, and some, especially in damp days, a shell-less snail. The very sticks and stones lodged in the tree-top might have convinced you of the savoriness of the fruit which has been so eagerly sought after in past years.

I have seen no account of these among the "Fruits and Fruit-Trees of America," though they are more memorable to my taste than the grafted kinds; more racy and wild American flavors do they possess, when October and November, when December and January, and perhaps February and March even, have assuaged them

somewhat. An old farmer in my neighborhood, who always selects the right word, says that "they have a kind of bow-arrow tang."

Apples for grafting appear to have been selected commonly, not so much for their spirited flavor, as for their mildness, their size, and bearing qualities,—not so much for their beauty, as for their fairness and soundness. Indeed, I have no faith in the selected lists of pomological gentlemen. Their "Favorites" and "Non-suches" and "Seek-no-farthers," when I have fruited them, commonly turn out very tame and forgettable. They are eaten with comparatively little zest, and have no real tang nor smack to them.

What if some of these wildings are acrid and puckery, genuine verjuice, do they not still belong to the Pomaceae,¹ which are uniformly innocent and kind to our race? I still begrudge them to the cider-mill. Perhaps they are not fairly ripe yet.

No wonder that these small and high-colored apples are thought to make the best cider. London quotes from the "Herefordshire Report," that "apples of a small size are always, if equal in quality, to be preferred to those of a larger size, in order that the rind and kernel may bear the greatest proportion to the pulp, which affords the weakest and most watery juice." And he says, that, "to prove this, Dr. Symonds, of Hereford, about the year 1800, made one hogshead of cider entirely from the rinds and cores of apples, and another from the pulp only, when the first was found of extraordinary strength and flavor, while the latter was sweet and insipid."

Evelyn² says that the "Red-strake" was the favorite cider-apple in his day; and he quotes one Dr. Newburg as saying, "In Jersey 't is a general observation, as I hear, that the more of red any apple has in its rind, the more proper it is for this use. Palefaced apples they exclude as much as may be from their cider-vat." This opinion still prevails.

All apples are good in November. Those

which the farmer leaves out as unsalable, and unpalatable to those who frequent the markets, are choicest fruit to the walker. But it is remarkable that the wild apple, which I praise as so spirited and racy when eaten in the fields or woods, being brought into the house, has frequently a harsh and crabbed taste. The Saunterer's Apple not even the saunterer can eat in the house. The palate rejects it there, as it does haws and acorns, and demands a tamed one; for there you miss the November air, which is the sauce it is to be eaten with. Accordingly, when Tityrus, seeing the lengthening shadows, invites Meliboeus³ to go home and pass the night with him, he promises him mild apples and soft chestnuts. I frequently pluck wild apples of so rich and spicy a flavor that I wonder all orchardists do not get a scion from that tree, and I fail not to bring home my pockets full. But perchance, when I take one out of my desk and taste it in my chamber I find it unexpectedly crude,—sour enough to set a squirrel's teeth on edge and make a jay scream.

These apples have hung in the wind and frost and rain till they have absorbed the qualities of the weather or season, and thus are highly seasoned, and they pierce and sting and permeate us with their spirit. They must be eaten in season, accordingly, —that is, out-of-doors.

To appreciate the wild and sharp flavors of these October fruits, it is necessary that you be breathing the sharp October or November air. The out-door air and exercise which the walker gets give a different tone to his palate, and he craves a fruit which the sedentary would call harsh and crabbed. They must be eaten in the fields, when your system is all aglow with exercise, when the frosty weather nips your fingers, the wind rattles the bare boughs or rustles the few remaining leaves, and the jay is heard screaming around. What is sour in the house a bracing walk makes

¹ The apple family, *Malaceae*.

² See note on Evelyn, p. 805, *Supra*.

³ Shepherds in Vergil's first eclogue.

sweet. Some of these apples might be labelled, "To be eaten in the wind."

Of course no flavors are thrown away; they are intended for the taste that is up to them. Some apples have two distinct flavors, and perhaps one-half of them must be eaten in the house, the other outdoors. One Peter Whitney wrote from Northborough in 1782, for the Proceedings of the Boston Academy, describing an apple-tree in that town "producing fruit of opposite qualities, part of the same apple being frequently sour and the other sweet," also some all sour, and others all sweet, and this diversity on all parts of the tree.

There is a wild apple on Nawshawtuck Hill in my town which has to me a peculiarly pleasant bitter tang, not perceived till it is three-quarters tasted. It remains on the tongue. As you eat it, it smells exactly like a squash-bug. It is a sort of triumph to eat and relish it.

I hear that the fruit of a kind of plum-tree in Provence is "called Prunes siba-relles, because it is impossible to whistle after having eaten them, from their sourness." But perhaps they were only eaten in the house and in summer, and if tried out-of-doors in a stinging atmosphere, who knows but you could whistle an octave higher and clearer?

In the fields only are the sour and bitters of Nature appreciated; just as the wood-chopper eats his meal in a sunny glade, in the middle of a winter day, with content, basks in a sunny ray there, and dreams of summer in a degree of cold which, experienced in a chamber, would make a student miserable. They who are at work abroad are not cold, but rather it is they who sit shivering in houses. As with temperatures, so with flavors; as with cold and heat, so with sour and sweet. This natural raciness, the sour and bitters which the diseased palate refuses, are the true condiments.

Let your condiments be in the condition of your senses. To appreciate the flavor of these wild apples requires vigorous and healthy senses, papillae firm and erect on

the tongue and palate, not easily flattened and tamed.

From my experience with wild apples, I can understand that there may be reason for a savage's preferring many kinds of food which the civilized man rejects. The former has the palate of an out-door man. It takes a savage or wild taste to appreciate a wild fruit.

What a healthy out-of-door appetite it takes to relish the apple of life, the apple of the world, then!

"Nor is it every apple I desire,
Nor that which pleases every palate best;
'Tis not the lasting Deuxan I require,
Nor yet the red-cheeked Greening I
request,
Nor that which first beshrewed the name
of wife,
Nor that whose beauty caused the golden
strife
No, no! bring me an apple from the
tree of life."

So there is one thought for the field, another for the house. I would have my thoughts, like wild apples, to be food for walkers, and will not warrant them to be palatable, if tasted in the house.

From
THOREAU'S "JOURNALS"
[1906]

July 21, 1851, 8 a.m.

NOW I yearn for one of those old, meandering, dry, unhabited roads, which lead away from towns, which lead us away from temptation, which conduct to the outside of earth, over its uppermost crust; where you may forget in what country you are travelling, where no farmer can complain that you are treading down his grass, no gentleman who has recently constructed a seat in the country that you are trespassing; on which you can go off at hallicock and wave adieu to the village; along which you may travel

like a pilgrim, going nowhither; where travellers are not too often to be met, where my spirit is free; where the walls and fences are not cared for; where your head is more in heaven than your feet are on earth; which have long reaches where you can see the approaching traveller half a mile off and be prepared for him, not so luxuriant a soil as to attract men, some root and stump fences which do not need attention; where travellers have no occasion to stop, but pass along and leave you to your thoughts; where it makes no odds which way you face, whether you are going or coming, whether it is morning or evening, mid-noon or midnight; where earth is cheap enough by being public; where you can walk and think with least obstruction, there being nothing to measure progress by, where you can pace when your breast is full, and cherish your moodiness; where you are not in false relations with men, are not dining nor conversing with them; by which you may go to the uttermost parts of the earth. It is wide enough, wide as the thoughts it allows to visit you. Sometimes it is some particular half-dozen rods which I wish to find myself pacing over, as where certain airs blow; then my life will come to me, methinks; like a hunter I walk in wait for it. When I am against this bare promontory of a huckleberry hill, then forsooth my thoughts will expand. Is it some influence, as a vapor which exhales from the ground, or something in the gales which blow there, or in all things there brought together agreeably to my spirit? The walls must not be too high, imprisoning me, but low, with numerous gaps. The trees must not be too numerous, nor the hills too near, bounding the view, nor the soil too rich, attracting the attention to the earth. It must simply be the way and the life,—a way that was never known to be repaired, nor to need repair, within the memory of the oldest inhabitant. I cannot walk habitually in those ways that are liable to be mended, for sure it was the devil only that wore them. Never by the heel of thinkers

(of thought) were they worn, the zephyrs could repair that damage. The saunterer wears out no road, even though he travel on it, and therefore should pay no highway, or rather *low* way, tax. He may be taxed to construct a higher way than men travel. A way which no geese defile, nor hiss along it, but only sometimes their wild brethren fly far overhead, which the kingbird and the swallow twitter over, and the song sparrow sings on its rails; where the small red butterfly is at home on the yarrow, and no boys threaten it with imprisoning hat. There I can walk and stalk and pace and plod. Which nobody but Jonas Potter travels beside me, where no cow but his is tempted to linger for the herbage by its side, where the guide-board is fallen, and now the hand points to heaven significantly,—to a Sudbury and Marlborough in the skies. That's a road I can travel, that the particular Sudbury I am bound for, six miles an hour, or two, as you please; and few there be that enter thereon. There I can walk, and recover the lost child that I am without any ringing of a bell.

There is no glory so bright but the veil of business can hide it effectually. With most men life is postponed to some trivial business, and so therefore is heaven. Men think foolishly they may abuse and mispend life as they please and when they get to heaven turn over a new leaf.

Men are very generally spoiled by being so civil and well-disposed. You can have no profitable conversation with them, they are so conciliatory, determined to agree with you. They exhibit such long-suffering and kindness in a short interview. I would meet with some provoking strangeness, so that we may be guest and host and refresh one another. It is possible for a man wholly to disappear and be merged in his manners. The thousand and one gentlemen whom I meet, I meet despairingly, and but to part from them, for I am not cheered by the hope of any rudeness from them. A cross man, a coarse man, an eccentric man, a silent, a man who does not drill

well,—of him there is some hope. Your gentlemen, they are all alike.

There is always a kind of fine æolian harp music to be heard in the air I hear now, as it were, the mellow sound of distant horns in the hollow mansions of the upper air, a sound to make all men divinely insane that hear it, far away overhead, subsiding into my ear. To ears that are expanded what a harp this world is! The occupied ear thinks that beyond the cricket no sound can be heard, but there is an immortal melody that may be heard morning, noon, and night, by ears that can attend, and from time to time this man or that hears it, having ears that were made for music. To hear this the hardhack and the meadowsweet *aspire*. They are thus beautifully painted, because they are tinged in the lower stratum of that melody.

Aug. 22, 1851

It is the fault of some excellent writers—De Quincey's¹ first impressions on seeing London suggest it to me—that they express themselves with too great fullness and detail. They give the most faithful, natural, and lifelike account of their sensations, mental and physical, but they lack moderation and sententiousness. They do not affect us by an ineffectual earnestness and a reserve of meaning, like a stutterer, they say all they mean. Their sentences are not concentrated and nutty. Sentences which suggest far more than they say, which have an atmosphere about them, which do not merely report an old, but make a new, impression; sentences which suggest as many things and are as durable as a Roman aqueduct; to frame these, that is the *art* of writing. Sentences which are expensive, towards which so many volumes, so much life, went; which lie like boulders on the page, up and down or across; which contain the seed of other sentences, not mere repetition, but creation; which a man might sell his grounds and castles to build. If De Quincey had suggested each of his pages in a sentence and passed on,

it would have been far more excellent writing. His style is nowhere kinked and knotted up into something hard and significant, which you could swallow like a diamond, without digesting.

Dec. 28, 1852

It is worth the while to apply what wisdom one has to the conduct of his life, surely I find myself oftenest wise in little things and foolish in great ones. That I may accomplish some particular petty affair well, I live my whole life coarsely. A broad margin of leisure is as beautiful in a man's life as in a book. Haste makes waste, no less in life than in housekeeping. Keep the time, observe the hours of the universe, not of the cars. What are three-score years and ten hurriedly and coarsely lived to moments of divine leisure in which your life is coincident with the life of the universe? We live too fast and coarsely, just as we eat too fast, and do not know the true savor of our food. We consult our will and understanding and the expectation of men, not our genius. I can impose upon myself tasks which will crush me for life and prevent all expansion, and this I am but too inclined to do.

One moment of life costs many hours, hours not of business but of preparation and invitation. Yet the man who does not betake himself at once and desperately to sawing is called a loafer, though he may be knocking at the doors of heaven all the while, which shall surely be opened to him. That aim in life is highest which requires the highest and finest discipline. How much, what infinite, leisure it requires, as of a lifetime, to appreciate a single phenomenon! You must camp down beside it as for life, having reached your land of promise, and give yourself wholly to it. It must stand for the whole world to you, symbolical of all things. The least partialness is your own defect of sight and cheapens the experience fatally. Unless the

¹ Thomas De Quincey (1785-1859), English author, best known for *Confessions of an English Opium-Eater* (1821).

humming of a gnat is as the music of the spheres, and the music of the spheres is as the humming of a gnat, they are naught to me. It is not communications to serve for a history,—which are sciences,—but the great story itself, that cheers and satisfies us.

May 6, 1854

There is no such thing as pure *objective* observation. Your observation, to be interesting, *i. e.* to be significant, must be *subjective*. The sum of what the writer of whatever class has to report is simply some human experience, whether he be poet or philosopher or man of science. The man of most science is the man most alive, whose life is the greatest event. Senses that take cognizance of outward things merely are of no avail. It matters not where or how far you travel,—the farther commonly the worse,—but how much alive you are. If it is possible to conceive of an event outside to humanity, it is not of the slightest significance, though it were the explosion of a planet. Every important worker will report what life there is in him. It makes no odds into what seeming deserts the poet is born. Though all his neighbors pronounce it a Sahara, it will be a paradise to him; for the desert which we see is the result of the barrenness of our experience. No mere willful activity whatever, whether in writing verses or collecting statistics, will produce true poetry or science. If you are really a sick man, it is indeed to be regretted, for you cannot accomplish so much as if you were well. All that a man has to say or do that can possibly concern mankind, is in some shape or other to tell the story of his love,—to sing, and, if he is fortunate and keeps alive, he will be forever in love. This alone is to be alive to the extremities. It is a pity that this divine creature should ever suffer from cold feet; a still greater pity that the coldness so often reaches to his heart. I look over the report of the doings of a scientific association and am surprised that there is so little life to be reported; I am put off

with a parcel of dry technical terms. Anything living is easily and naturally expressed in popular language I cannot help suspecting that the life of these learned professors has been almost as inhuman and wooden as a rain-gauge or self-registering magnetic machine. They communicate no fact which rises to the temperature of blood-heat. It doesn't all amount to one rhyme.

Dec. 1, 1856

I see the old pale-faced farmer out again on his sled now for the five-thousandth time,—Cyrus Hubbard, a man of a certain New England probity and worth, immortal and natural, like a natural product, like the sweetness of a nut, like the toughness of hickory. He, too, is a redeemer for me. How superior actually to the faith he professes! He is not an office-seeker. What an institution, what a revelation is a man! We are wont foolishly to think that the creed which a man professes is more significant than the fact he is. It matters not how hard the conditions seemed, how mean the world, for a man is a prevalent force and a new law himself. He is a system whose law is to be observed. The old farmer condescends to countenance still this nature and order of things. It is a great encouragement that an honest man makes this world his abode. . . . Moderate, natural, true, as if he were made of earth, stone, wood, snow. I thus meet in this universe kindred of mine, composed of these elements. I see men like frogs; their peeping I partially understand.

The dear wholesome color of shrub oak leaves, so clean and firm, not decaying, but which have put on a kind of immortality, not wrinkled and thin like the white oak leaves, but full-veined and plump, as nearer earth. Well-tanned leather on the one side, sun-tanned, color of colors, color of the cow and the deer, silver-downy beneath, turned toward the late bleached and russet fields. What are acanthus leaves and the rest to this? Emblem of my winter condition. I love and could embrace the

shrub oak with its scanty garment of leaves rising above the snow, lowly whispering to me, akin to winter thoughts, and sunsets, and to all virtue. Covert which the hare and the partridge seek, and I too seek. What cousin of mine is the shrub oak? How can any man suffer long? For a sense of want is a prayer, and all prayers are answered. Rigid as iron, clean as the atmosphere, hardy as virtue, innocent and sweet as a maiden is the shrub oak. In proportion

as I know and love it, I am natural and sound as a partridge I felt a positive yearning toward one bush this afternoon. There was a match found for me at last. I fell in love with a shrub oak.

No, I am a stranger in your towns. I am not at home at French's, or Lovejoy's, or Savery's. I can winter more to my mind amid the shrub oaks. I have made arrangements to stay with them.

American Literature 1800-1860

V

HUMANISM AND BEYOND

I

TWO periods in Hawthorne's early life enabled him to achieve the kind of perspective on human existence that is necessary for the writing of philosophical romance at its best.

The first period was one of virtual invalidism between the ages of nine and twelve. As the result of a foot-injury received while playing ball, he was kept all this time away from school and from close companionship with boys and girls of his own age. His mother and two sisters lived a strange, quiet life in their three-story house in Salem, Massachusetts. Their name was "Hathorne"; Nathaniel was to change it to "Hawthorne" later. His father, also Nathaniel, had been a sea-captain and had died in far-away Surinam of yellow fever in 1808. Young Nathaniel was then four years old, having been born at Salem, July 4, 1804. Ever since his father's death, his mother, Elizabeth Manning, and his sisters, Elizabeth and Louisa, had been in mourning. Their days were a ritual of isolation from almost everyone except their relatives, the Mannings and the Forresters. Mrs. Hathorne even had her meals regularly alone, and young Nathaniel and his sisters sometimes followed her example. With his bandaged foot, there was little for him to do but read and dream.

The second period was one of self-imposed retirement from the world after he was graduated from Bowdoin College at Brunswick, Maine, in 1825. This period lasted all during his twenties and into his early thirties. For more than a decade, in fact, he spent most of his time in the same old house in Salem, in the same atmosphere of strange, quiet family living, in a dismal chamber under the eaves on the third floor. Here he continued to dream and read, but also to write—the long story, *Fanshawe*, which was published anonymously in 1828, and the short stories and sketches which appeared anonymously or pseudonymously in gift-books and magazines, and were ultimately collected in the first edition of *Twice-Told Tales* in 1837.

These periods of living apart from normal existence in a world of dreams amid an atmosphere of forlorn devotion to the past helped make of Hawthorne a modest, reticent man, with an imagination prone, like an owl, to eerie flight, but they did not transform him into a freakish recluse, nor did they give him any real morbidity of outlook. They were so happily offset by healthy contacts with nature and with worldly-tempered friends and with humdrum, robust reality that the result was a mind and personality with a balance and sanity all their own, so to speak.

At Raymond, Maine, his uncles, Richard and Robert Manning, had built houses on opposite sides of Dingley Brook. Here, to Robert's house, Elizabeth Hathorne took her children as soon as Nathaniel had recovered from his foot-injury. Legg's Hill, Rattlesnake Mountain, Thomas Pond, Sebago Lake, the deep woods everywhere—these were Nathaniel's haunts all the year round. He lived like a noble little savage, hunting, fishing, skating, swimming, walking. Although he had such companions as Robinson Cook, Jacob Dingley, and the colored boy, William Symmes, it was here, rather than in Salem, that he first got, as he was to point out later, his "cursed habits of solitude." But it was a solitude which gave him, in Wordsworth's lines,

. . . sensations sweet,
Felt in the blood, and felt along the heart . . .

and perhaps also

. . . a sense sublime
Of something far more deeply interfused . . .

Back in Salem, he worked at the ledgers in the offices of his Uncle William Manning, who was in the stagecoach business. He also studied Latin and Greek in preparation for Bowdoin, where his Uncle Richard Manning proposed to finance him for four years. The winter before he entered Bowdoin, he wrote to his mother at Raymond a somewhat playful letter in which he expressed his disapproval of studying for the ministry or the law or medicine, lamented that he wasn't rich enough to live without a profession, asked her what she thought of his becoming an author, and then dismissed even this possibility with the remark, "But authors are always poor devils, and therefore may Satan take them."

At Bowdoin, which he entered in 1821, he was a fellow student of Henry Wadsworth Longfellow; his closest friends, however, were young men who were to distinguish themselves, not in literature, but in public affairs—Franklin Pierce, who was to become President of the United States; Jonathan Cilley, who was to enter Congress under the aegis of the Democratic Party, and Horatio Bridge, who was to be one of the leading industrialists of Augusta, Maine. With these typical go-getters of a frontier college, Hawthorne played cards for modest stakes, and was fined for the misdemeanor; drilled in the campus military company; and enjoyed convivial revelry at Ward's Tavern. The studies in which he excelled were English composition and Latin, but he disliked metaphysics, mathematics, and declamation. When a cousin who visited him in his senior year at Bowdoin took back to the family a glowing account of his prospects for the future, Hawthorne deprecated such optimism in a letter

to his sister Louisa: "I have thought much upon the subject, and have finally come to the conclusion that I shall never make a distinguished figure in the world, and all I hope or wish is to plod along with the multitude."

Later, when his laborious solitude in the room under the eaves proved burdensome, he could always turn to this multitude for solace. Even if he did not mingle with it, he could enjoy observing it. To do so, he would climb up into the steeple of the South Church and drink in the sights of the town. Or he would sit on the bench before the toll-gatherer's house on Beverly Bridge and watch traffic all day long. Or he would stroll on the seashore and gaze at groups of girls on holiday or groups of fishermen at work. Even better, he would take longer excursions on his uncle's stagecoaches, going all over New England, and even into New York, to Buffalo and Niagara, as ubiquitous and as curious, although never so garrulous, as his pedlar, Dominicus Pike, in "Mr. Higginbotham's Catastrophe."

II

Hawthorne's early reading contributed much to the balance and sanity of his mind and personality. Through Spenser's *The Faerie Queene*, Milton's *Paradise Lost*, and Bunyan's *The Pilgrim's Progress* he acquired a taste for allegory and absorbed the Christian Humanism of the English Renaissance. Central to that Humanism was an ethical philosophy derived from Aristotle and from the best thought of the Middle Ages and the Reformation. It was an ethical philosophy somewhat different from that held by any school of theology—by the New England Puritans of an earlier day or by the Unitarians of Hawthorne's own time. And it was different, also, from that shortly to be professed by the New England Transcendentalists. Set against any of these creeds, it was less one-sided, less pretentious, more sweetly reasonable, more chastened by the knowledge, not merely of good and evil, but of good-and-evil, to borrow a subtle but valid distinction made by the modern English novelist, E. M. Forster, in his *The Longest Journey*.

The values that were most important to this Christian Humanism may be reduced to four—introspection, or knowing oneself in the Socratic sense; measure, or avoiding extremes in anything and following always the golden mean; humility, or remembering the limitations which Providence has imposed upon one as a mortal being; and charity, or treating others with scrupulous, constant respect for whatever goodness of heart they have, for whatever grace is in them. These values were re-inforced in Hawthorne's mind by wide reading in 18th Century English literature—Swift, Pope, Addison, Goldsmith, Johnson, Thompson, and Sterne.

Through his browsing in the writings of Jean-Jacques Rousseau, William

Godwin, and Sir Walter Scott, young Hawthorne was influenced by two tendencies of the many-sided European Romantic Movement—its reverence for “the still, sad music of humanity,” and its interest in *regions* as storied theaters of the past wherein the strains of this music might still be heard echoing, or as picturesque alcoves of the present where this humanity could be studied microcosmically in all its lights and shadows.

Finally, young Hawthorne steeped himself in any reading that enabled him to relive in thought and feeling and sensation the life his ancestors had known. Salem, of course, was haunted with this life, for it was a town of old houses and old wharves. From an England where Christian Humanism was in temporary decline, William Hathorne, age twenty-two, had sailed for New England on the *Arbella* as one of John Winthrop’s company of Puritan emigrants. Settling first in Dorchester, he moved in 1636 to Salem. As one of Governor Endicott’s lieutenants, he was a stern persecutor of the early Quakers. He defied a command of King Charles II in 1666 that he come to England as an agent to answer charges against the Massachusetts Bay Colony. He was deputy, Speaker of the House, merchant, magistrate, and father of eight children. John Hathorne, the son of William, was among the judges who presided at the witchcraft trials, in the course of which the cases of some two hundred prisoners were reviewed, nineteen of them, including women, being hanged, and one, a man, being crushed to death in accordance with the sentence meted him. Joseph Hathorne, the son of John, may have been a sailor, but turned to farming to rebuild the shattered family fortunes. Daniel Hathorne, son of Joseph, went back to the sea, captained a privateer against the British in the Revolution, and entered his son Nathaniel—Hawthorne’s father—in the mercantile service.

The panorama of this ancestral life, the ghosts of the old houses and old wharves, pulsed and breathed once more for the young Hawthorne as he pored over Mather’s *Magnalia* or Felt’s *Annals of Salem* or the *History of Haverhill*, or tomes of travel that included Hakluyt, Turnefort, Madden, Chrishull and the like. Such experience of his family’s, his town’s, his region’s past gave his creative imagination roots as well as wings.

“Wakefield,” a twice-told tale written and first published toward the end of his long retirement from the world, was in part a half-serious, half-humorous commentary on himself. Just as Wakefield, in order to escape becoming “the Outcast of the Universe,” returned to the good Mrs. Wakefield, from whom he had perversely absconded long ago, so Hawthorne decided to put his relations with mundane reality on a completely active footing, to re-assume the kind of participation in the world’s life that, in some degree at least, he had been capable of during his college days. Besides, he needed a more regular income than he had yet received for any of his numerous published tales.

III

His first experience in earning such an income, in re-entering the world, was short and disillusioning. His contributions to the gift-book, *The Token*, had won him the friendship of its editor, Samuel G. Goodrich, a member of the Bewick Company of Boston, printers and engravers. Through Goodrich's influence, this firm offered Hawthorne the editorship of *The American Magazine of Useful and Entertaining Knowledge* at a salary of \$500 a year. To use his own phraseology, Hawthorne proceeded to "concoct—concoct—concoct" six issues, beginning with that of March, 1836. His sister Elizabeth, laboring in Salem, assisted him in his Boston hackwork. Failing to receive his salary on time, he wrote Louisa: "The world is as full of rogues as Beelzebub is of fleas," Beelzebub being the Hawthorne family cat. Little wonder that he was soon back home in his chamber under the eaves writing more twice-told tales and looking forward to the publication of the first series of them in book form. Since Horatio Bridge, Hawthorne's old college friend, stood guarantor for the book, Goodrich got the American Stationers' Company of Boston to publish it and thus redeemed himself somewhat in Hawthorne's eyes.

Keeping a notebook had become one of Hawthorne's habits. The early entries in the one he kept from July 5, 1837, to September 24, 1838, were made at Augusta, Maine, where he had gone for a several weeks' visit with Horatio Bridge. There is abundant evidence in these entries that his interest in mundane reality is keen. Bridge himself, and his guest, the merry Mr. Schaeffer, and the successful Jonathan Cilley, whom Hawthorne saw "for the first time since we graduated," and "the only petticoat that comes within our premises . . . Nancy, the pretty, dark-eyed maid-servant of the man who keeps in the other part of the house"—these and many others drew Hawthorne out of himself.

But, paradoxically enough, it was Elizabeth Peabody, of Salem and Boston, one of the literary ladies of the new otherworldly Transcendental movement, who was to have most to do with bringing him more definitely into the world's orbit. She called at the Hawthorne home in Salem to pay homage to the new local literary celebrity, whose *Twice-Told Tales* had received a favorable notice from Longfellow in the *North American Review*. She introduced Hawthorne to her sister Sophia, who had been for years an invalid confined to her room in the Peabody home in Salem. Soon Hawthorne was squiring Sophia to Transcendentalist meetings and became engaged to marry her. Sophia spoke of Ralph Waldo Emerson as "the greatest man that ever lived," "the Attic bird," "the Word again," "Pure Tone," and the like.

In order that Sophia and Nathaniel might have enough to marry on,

Elizabeth Peabody immediately mentioned Hawthorne to George Bancroft, collector of the Port of Boston. She got results. Hawthorne was appointed to a post as measurer in the Boston Custom House and went to work there early in 1839. It was the first of several political appointments which enabled him to earn an adequate living and yet to write, on the whole, what he wanted to write, and to take time out now and then to do it.

Whereas Hawthorne, in his reading, had immersed himself so deeply in tradition, he was now to have, in his actual living, an experience of utopia. Resigning his position at the Boston Custom House with capital saved up for his marriage, he had to wait until Sophia had fully recovered her health. In the interval he was persuaded by the Reverend George Ripley to become in 1841 a full-time helper at Brook Farm, the Transcendentalist co-operative experiment at West Roxbury, Massachusetts, intended "to establish a mode of life which shall combine the enchantments of poetry with the facts of daily experience," as Ripley put it.

Hawthorne had won Bancroft's praise for his energy and industry as a Custom House measurer. At Brook Farm he was to toil conscientiously at milking, planting potatoes and peas, feeding the pigs, cutting straw and hay for the cattle, and tending the farm's "gold-mine"—the dung-heap. His zeal was eminently practical; he hoped to make a home at Brook Farm for Sophia and himself; he even went so far as to invest some of his capital in the enterprise.

There is ample evidence that he enjoyed some phases of the experience. In May, for example, he wrote to Louisa: "This is one of the most beautiful places I ever saw in my life . . . such a delectable way of life has never been seen on earth since the days of the early Christians." Yet in the late autumn he was only too glad to leave this utopia and to abandon any notion of bringing Sophia there.

He had at least two good reasons, if not more, for rejecting it as a solution to the problem of living wisely. One was the work itself, which soon became sheer drudgery, particularly certain features of it. He was moved to write to Sophia: "It is my opinion, dearest, that a man's soul may be buried and perish under a dung-heap, or in a furrow of the field, just as well as under a pile of money . . . Even my Custom House experience was not such a thralldom and weariness; my mind and heart were freer. Oh, belovedest, labor is the curse of the world, and nobody can meddle with it without becoming proportionately brutified! Dost thou think it a praiseworthy matter that I have spent five golden months in providing food for cows and horses?"

Another reason was the buzzing confusion of too many people tipsy with new doctrine. He thus described to Sophia his state of mind: "It is true, nobody intrudes into my room; but still I cannot be quiet. Nothing here is settled; everything is but beginning to arrange itself, and though thy husband

would seem to have little to do with aught beside his own thoughts, still he cannot but partake of the ferment around him."

The years from 1842 through 1852 were Hawthorne's most creative. This period was auspiciously inaugurated by three events—the publication of the second edition of his *Twice-Told Tales*, in two volumes, his marriage to Sophia, July 9, 1842; and their settling down at the "Old Manse," at Concord, Massachusetts, a house where the Emersons and the Ripleys had lived since before the Revolution.

As a Christian Humanist, Hawthorne had his share of sedate pessimism. "Happiness, in this world, if it comes at all, comes incidentally," he wrote in one of his notebooks. "Make it the object of pursuit, and it leads us a wild-goose chase and is never attained. Follow some other object, and very possibly we may find that we have caught happiness without dreaming of such luck, but likely enough, it is gone the moment we say to ourselves—'Here it is!'—like the chest of gold that treasure-seekers find."

Yet happiness was surely his at the "Old Manse." Of his first summer there, he remarked "My life, at this time, is more like that of a boy externally, than it has been since I was really a boy. It is usually supposed that the cares of life come with matrimony; but I seem to have cast off all care, and live on with as much easy trust in Providence, as Adam could possibly have felt, before he had learned that there was a world beyond his Paradise . . . The fight with the world—the struggle of a man among men—the agony of the universal effort to wrench the means of life from a host of greedy competitors—all this seems like a dream to me."

Of this paradisaical sojourn, the main literary result was *Mosses from an Old Manse*, published in 1846. In that same year Hawthorne accepted another political appointment from the Democratic Party—this time as surveyor at the Salem Custom House, a post which he held until 1849. The year after going there, he began *The Scarlet Letter*, but did not finish and publish it until 1850. In a very short time it had won for him an international reputation.

From Salem, the Hawthornes moved to the "Red House" at Lenox, Massachusetts, in 1850, and from there to the Horace Mann house in West Newton, Massachusetts, in 1851. In 1851 appeared *The House of the Seven Gables*; in 1852, *The Snow Image and Other Twice-Told Tales* and *The Blithedale Romance*. It was also in 1852 that Hawthorne purchased his permanent American home, "The Wayside," at Concord. Shortly after moving there, he accepted and discharged the commission of writing a campaign biography for his old college friend, now candidate for the Presidency of the United States—the *Life of Franklin Pierce*.

As recompense for this political pot-boiler, President Pierce, who doubtless would have been elected if it had never been written and published, appointed Hawthorne Consul at Liverpool. In 1853, with the departure for England of

Hawthorne and his family—Sophia and their three children, Una, Julian, and Rose—his most creative period was at an end. Our greatest writer of regional fiction about universal themes was to gain experience that would enable him to experiment with what Henry James later called “the international theme.”

IV

Putting America behind him for approximately the next seven years, Hawthorne could look back on associations with some of the leading figures of what has been called the “American Renaissance.” Among others, he had known Emerson, Ellery Channing, Margaret Fuller, Thoreau, and Melville. Although he had some enjoyable moments with Emerson, he regarded him far more critically than did Sophia. Contrasting him with the Concord yeoman, Mr. Hosmer, he remarks in his notebook: “Mr. Emerson is a great searcher for facts; but they seem to melt away and become unsubstantial in his grasp.”

Of Ellery Channing he says: “He is one of those queer and clever young men whom Mr. Emerson (that everlasting rejecter of all that is, and seeker for he knows not what) is continually picking up by way of a genius.”

He seems to have shied away from Margaret Fuller from the very beginning. While measurer at the Boston Custom House, he wrote to Sophia: “I was invited to dine at Mr. Bancroft’s yesterday with Miss Margaret Fuller, but Providence had given me some business to do, for which I was very thankful. When . . . Sophia Hawthorne can be with me, I shall not be afraid to accept invitations to meet literary lions and lionesses because then I shall put the abovesaid redoubtable little personage in the front of the battle.”

Seeing a good deal of Margaret Fuller later on, Hawthorne treats her always with a touch of irony. She leaves a book behind her, and he has to walk over to Emerson’s to return it. On the way home he finds her reclining in Sleepy Hollow. He sits down beside her and they talk “. . . about Autumn—and about the pleasures of getting lost in the woods—and about the crows, whose voices Margaret had heard—and about the experiences of early childhood, whose influence remains upon the character after the recollection of them has passed away—and about the sights of mountains from a distance, and the view from the summits—and about other matters of high and low philosophy.” He seems glad to abandon her to one of her kind: “In the midst of our talk, we heard footsteps above us, on the high bank; and while the intruder was still hidden among the trees, he called to Margaret, of whom he had gotten a glimpse. Then he emerged from the green shade; and behold, it was Mr. Emerson, who, in spite of his clerical consecration, had found no better way of spending the Sabbath than to ramble among the woods. He appeared to have had a pleasant time; for he said that there were Muses in the woods to-day, and whispers to be heard in the breezes. It being now nearly six o’clock, we

separated, Mr. Emerson and Margaret towards his home, and I towards mine, where my little wife was very busy getting tea." One should compare such impressions of Emerson and his disciples with those in Hawthorne's essay, "The Old Manse."

Hawthorne concludes a sketch of Thoreau with this admission of praise, which carefully avoids superlatives: "On the whole, I find him a healthy and wholesome man to know." Melville, whom he saw frequently at Lenox, struck him as something of a kindred spirit. He thus describes one of their evenings: ". . . Melville and I had a talk about time and eternity, things of this world and of the next, and books, and publishers, and all possible and impossible matters, that lasted pretty deep into the night. At last, he arose, and saddled his horse (whom he had put into the barn) and rode off for his own domicile; and I hastened to make the most of what little sleeping-time remained for me."

His respect for Poe is greatly in contrast with his strictures on many of the Transcendentalists. He thus wrote to Poe in 1846: "I presume the publishers will have sent you a copy of 'Mosses from an Old Manse'—the latest (and probably the last) collection of my tales and sketches. I have read your occasional notices of my productions with great interest—not so much because your judgment was, upon the whole, favorable, as because it seemed to be given in earnest. I care for nothing but the truth, and shall always more readily accept a harsh truth, in regard to my writings, than a sugared falsehood. I confess, however, that I admire you rather as a writer of tales than as a critic upon them. I might often—and often do—dissent from your opinions in the latter capacity, but could never fail to recognize your force and originality in the former." Perhaps Hawthorne had particularly in mind Poe's interpretation of "The Minister's Black Veil." Incidentally, Poe's review of *Mosses* in *Godey's Lady's Book* for November, 1847, was most ungenerous.

V

As Hawthorne sailed for England, he could look back, too, on a considerable achievement in the writing of fiction. From the outset, he had tried, in his tales and longer pieces, to solve a technical problem such as that which confronted Samuel Taylor Coleridge in his contributions to *Lyrical Ballads* in 1798.

Whereas Wordsworth, in his poems for that volume, had proposed "to give the charm of novelty to things of every day," Coleridge's endeavors, he tells us in the *Biographia Literaria*, had been "directed to persons and characters supernatural or at least romantic; so as to transfer from our inward nature a human interest and a semblance of truth sufficient to procure for these shadows of imagination that willing suspension of disbelief for the moment, which constitutes poetic faith."

To procure this "willing suspension of disbelief" for characters and inci-

dents in a story, it is necessary to invest them with what may be called an illusion of reality. To conjure up such an illusion is most difficult when one's urge to create characters and incidents comes from reading, from an interest in allegory, from an imagination fostered in relative removal from the world. Of this difficulty Hawthorne was acutely conscious. Concerning the first edition of his *Twice-Told Tales*, he wrote thus to Longfellow in 1837: "I have . . . great difficulty in the lack of materials, for I have seen so little of the world that I have nothing but thin air to concoct my stories of, and it is not easy to give a life-like semblance to such shadowy stuff."

To improve illusion in his fiction, Hawthorne followed two main methods. The first was to keep his notebooks. Herein, from observation of daily life, of actual people, animals, things, incidents, he jotted down vivid details to be transferred to his stories in order that their ideological skeletons might have flesh and blood. The result was a growing "realism" in his work, a steady progress in "solidity of specification"—to use a suggestive phrase from Henry James' "The Art of Fiction."

The connection between the illusion of reality in Hawthorne's stories and his careful record of everyday observations may be clearly grasped by reading "Ethan Brand" and then turning to those passages from his *American Notebooks* wherein source materials for various features of this story unquestionably appear. Or one may go through these notebooks and then read his three great American romances. The Hawthornes' first child, Una, served as a model for Pearl in *The Scarlet Letter*. The setting of *The House of the Seven Gables* is a composite transcript from actuality. Above all, in *The Blithedale Romance*, Hawthorne made use of his experiences at Brook Farm, and, in the character of Coverdale, the narrator of the story, introduced a but slightly distorted projection of himself into the Dutch painting of that utopian community. Even the discovery of Zenobia's drowned body was based on his actual participation in dredging up from the Concord River the corpse of a Miss Hunt, who had committed suicide.

The second method which Hawthorne followed to improve the illusion of reality in his fiction was to perfect its form as well as its content or "stuff." He experimented carefully with the "focus of narration" or "the point of view," as may be seen, say, in "Mr. Higginbotham's Catastrophe," or "Rappaccini's Daughter," or *The Blithedale Romance*. In both his tales and his longer romances, he strove for structure nicely adapted to the theme at hand. The structure of "Rappaccini's Daughter," for example, is worth close analysis to demonstrate how effectively it conveys Hawthorne's Humanistic critique of the scientific intellect. Dramatic structure, with "scenes" that may be regarded as the beginning, middle, and end, the attack, crisis, and resolution, of conflict involving a few characters, distinguishes each of his three great American romances. The device of "foreshadowing" or "prospect," i.e., preparing the

reader in advance for later events so as to make them more credible or to create suspense or to heighten unity in the whole narrative, is brilliantly exemplified in all his best work, and may be studied particularly in such stories as "The Minister's Black Veil" and "Ethan Brand." The use of contrast in description, in "scene," in characterization, in symbol is developed to a fine point. Such tales as "The Maypole of Merry Mount" and "Endicott and the Red Cross" are rich in various kinds of contrast, as are, of course, all the longer romances.

It is no accident that one of America's greatest masters of the art of fiction, Henry James, should have written a study of Hawthorne for the *English Men of Letters* series. Nor is it surprising that one of the ablest craftsmen among English novelists, Thomas Hardy, was to learn something of his craft from reading Hawthorne, as may be understood by comparing *The Return of the Native* and *The Blithedale Romance*. Finally, it must never be forgotten that Hawthorne's practice inspired Poe to formulate his epoch-making theory of the prose tale.

In its criticism of life, Hawthorne's fiction had probed deeply. In some of his tales, such as "The Maypole of Merry Mount" and "Endicott and the Red Cross," he used episodes in the history of New England for more than one purpose—to endow ethical issues with such reality that the reader might dwell long on them, and to assess the nature and continuing value of Puritanism as a cultural force. In other tales, such as "Wakefield," "Young Goodman Brown," and "The Minister's Black Veil," he analyzed the case histories of characters who, for different reasons, became solitaries. In "Ethan Brand" and "Rappaccini's Daughter" he dealt with two protagonists of inhuman intellect, likewise immolated in their solitude. In "The Celestial Railroad" he wrote his own kind of satirical burlesque, viewing the new doctrines of the day in terms of their implications for the Christian Humanism of John Bunyan. In "Mr. Higginbotham's Catastrophe" he experimented with a mystery rather than a detective story, and, by basing it on the concept of special Providence and enriching it with "local color," anticipated such modern deviations from the Poe formula as Melville Davidsson Post's *Uncle Abner* stories.

Some of these emphases were repeated, combined, developed, and modulated as Hawthorne moved from the tale to the longer romance. As the English romancer, J. H. Shorthouse, was to point out in the 1881 preface of his *John Inglesant*, Hawthorne carried his art "to such perfection that it is only with difficulty that we perceive how absolutely every character, nay, every word and line, is subordinated to the philosophical idea of the book. . . ."

The Scarlet Letter is unified by the idea that the full acceptance of responsibility for sin is better than denying or ignoring this responsibility altogether or accepting it but half-way. *The House of the Seven Gables* is held together by the idea that, instead of being dominated by a tradition, such as

Puritanism, for example, or rejecting this tradition completely, one should conserve whatever is good in it, and build on it, and leave behind whatever is evil. *The Blithedale Romance* ironically suggests that, even among utopians—with all their nobility, their fine hopes for the future of society, their admirable faith in human brotherhood—the egotism or possessiveness associated with the passions, and the evil consequences thereof, will stalk in, sometimes assuming the mask of philanthropy or altruism, and sometimes subtly undermining the most disinterested detachment.

More truly than most fiction produced by later schools of realism and naturalism, on the one hand, or of fantasy, on the other, these three romances fulfill "the high ambition and privilege of art not to reproduce reality but without conspicuously offending against it to enlarge its confines," to quote one of the dicta of the Shakespearean critic, E. E. Stoll. In the whole range of American literature it would be difficult to find three major works of fiction by one author that are so original in conception and execution, so various in theme, felicitous in prose style, and remarkable for other technical achievements, and so rewarding in their consistent presentation of the values of a Christian Humanism through subtle contrasts of memorable characters.

VI

While Consul at Liverpool from 1853 to 1857, Hawthorne was a busy man. In his bulky *English Notebooks* he records in detail his multifarious activities—how he rambled through slum and countryside; how he visited almshouses and literary shrines—Stratford, Lichfield, Grasmere, Newstead Abbey, Dumfries, how he investigated the cases of sailors maltreated in the American merchant marine; how he attended civic banquets and literary gatherings; how he talked with James Buchanan, then American Minister and soon to be President, about politics back home; how he watched the growth of his children and worried about Sophia, who for a while had to go to Portugal for her health, taking Una and Rose along, and leaving Julian with him; and how he kept in touch with American literati abroad, such as Melville, to whom he played host, or Delia Bacon, whom he sought out and interviewed concerning her theory that Lord Bacon wrote Shakespeare's plays.

Henry Arthur Bright, whom he had first met at Concord, was one of his closest English friends; he knew Monckton Milnes well; he met such celebrities as the Brownings, Charles Reade, and Lord Macaulay; he took part in a number of conversations about Thackeray, then at the height of his popularity.

Of Browning he remarks: ". . . a younger man than I expected to see, handsome, with dark hair, a very little frosted. He is very simple and agreeable in manner, gently impulsive, talking as if his heart were uppermost. He spoke of his pleasure in meeting me, and his appreciation of my books; and

(which has not often happened to me) mentioned that the Blithedale Romance was the one he admired most. I wonder why."

After praising the fine dinner he and Una and Sophia were given by Russell Sturgis, he comments. "Mr Sturgis is a friend of Thackeray, and, speaking of the last number of the *Newcomes*—so touching that nobody can read it aloud without breaking down—he mentioned that Thackeray himself had read it to James Russell Lowell and William Story, in a cider cellar!" This anecdote led Hawthorne to reflect as follows "Speaking of Thackeray, I cannot but wonder at his coolness in respect to his own pathos, and compare it with my emotions when I read the last scene of the *Scarlet Letter* to my wife, just after writing it—tried to read it, rather, for my voice swelled and heaved, as if I were tossed up and down on an ocean, as it subsided after a storm. But I was in a very nervous state, then, having gone through a great diversity and severity of emotion, for many months past I think I have never overcome my own adamant in any other instance."

He has this to say of Mrs. S. C. Hall: ". . . a genuine and good woman, unspoilt by a literary career, and retaining more sentiment (for I will not call it sentimentalism) than most girls keep beyond seventeen. She told me that it had been the dream of her life to see Longfellow and myself! Good Heavens! What an object to live for!"

Resigning his consulship in 1857, Hawthorne took his family to Italy by way of Paris. At Rome, they visited the New England sculptor and writer, William Wetmore Story, whom Henry James was to regard later as the prototype of the American cosmopolitan *émigré*. In Florence, they saw a good deal of the Brownings and settled at the Villa Montuato on the Bellosguardo Hill. At Siena, they again called on the Storys. When they went to Rome, Una fell ill of fever, and her life hovered in the balance for months. Such distinguished Americans as ex-President Pierce, the historian John Lothrop Motley, and Charles Sumner kept the Hawthornes company.

In 1859, with Una entirely out of danger, the family left for England. In his baggage, Hawthorne carried the first draft of his romance, *The Marble Faun*. They lived at Whitby, Redcar, Leamington, Bath, and London. *The Marble Faun* was published in 1860 both in England and the United States, but the English publisher insisted on giving it the title *Transformation*, which was not by any means to its author's liking.

When the Hawthornes returned to America in 1860, to resume their life at "The Wayside," where Sophia's brother had stayed in their absence, they found that the Transcendentalist fever had developed into the Abolitionist delirium and that many of their old friends were passionate defenders of John Brown. The intimate associate of such conservative and cordially hated Democrats as Franklin Pierce and James Buchanan looked askance on such radicalism, even though he was no believer in slavery. He had written in one of his *English*

Notebooks in 1854: "If mankind were all intellect, they would be continually changing, so that one age would be entirely unlike another. The great conservative is the heart, which remains the same in all ages; so that common-places of a thousand years' standing are as effective as ever."

During the Civil War Hawthorne maintained much of his balance. While a member of the Saturday Club that dined at Parker's Hotel in Boston and included Emerson, Longfellow, Holmes, Lowell, Motley, Whittier, and Sumner among others, he reproved his friend Bright back in England for lack of sympathy with the Northern cause. Instead of deploring the War, he even looked on it somewhat optimistically. "I never imagined what a happy state of mind a civil war produces, and how it invigorates every man's whole being," he wrote to Bright. "You will live to see the Americans another people than they have hitherto been; and I truly regret that my youth was not cast in these days, instead of in a quiet time."

Because of the war, and because, too, he was getting old, Hawthorne found it difficult to do creative writing. His book on England, *Our Old Home*, was published in 1863, but he could not complete another great romance. Instead he left four torsos—*The Ancestral Footstep*, running to some 28,000 words, *Dr. Grimshawe's Secret*, running to some 85,000, *Septimus Felton*, amounting to about 60,000; and *The Dolliver Romance*, stopping at 16,000. His health began to fail fast, from some disease that seemed, in the words of Franklin Pierce, to be "in the brain or spine or both." On a trip with Pierce, Hawthorne died at Plymouth, New Hampshire, May 19, 1864.

VII

One characteristic of those men of letters who have best represented our cosmopolitan or international tradition is that in their personalities and their work two worlds have been in conflict. It has been impossible for them to abandon their Americanism and their attachment to America and in consequence there has been much in Europe which they have been unable to accept. Yet Europe has had for them an enchantment they have been powerless to shake off entirely. It has symbolized for them tradition or culture or leisure or experience or grace, and these values or essences or sheer illusions have put them out of sorts with workaday America.

There is abundant evidence of such a conflict in Hawthorne in his last years. He is distinctly critical of England's aristocratic system. In *Our Old Home* he makes the point that "there was continually a dull sound in my ears as if the old foundations of things were crumbling away. Sometime or other,—by no irreverent effort of violence, but, rather, in spite of all pious efforts to uphold a heterogeneous pile of institutions that will have outlasted their vitality,—at some unexpected moment, there must come a terrible crash." And in one

of his *English Notebooks* he observes: "The public life of America is lived through the mind and heart of every man in it; here, the people feel that they have nothing to do with what is going forward, and, I suspect, care little or nothing about it. Such things they permit to be the exclusive affair of the higher classes"

Yet he writes Horatio Bridge as follows in 1854: "It sickens me to look back to America. I am sick to death of the continual fuss and tumult and excitement and bad blood we keep up about political topics" And he made these confessions to W. D. Ticknor, the first in a letter from England, the second in a letter from Rome: "To say the truth, the longer I stay away, the less I feel inclined to come back. . . . Not but what I love my country, but I can live more to my individual satisfaction elsewhere." "I wish I were a little more patriotic, but to confess the truth I had rather be a sojourner in any other country than return to my own. The United States are fit for many excellent purposes, but they are certainly not fit to live in."

As for the American literary scene, Hawthorne wrote disgustedly to Ticknor in January, 1855: "America is now wholly given over to a d—d mob of scribbling women, and I should have no chance of success while the public taste is occupied with their trash—and should be ashamed of myself if I did succeed." Yet in February he is praising one of these same "scribbling women," Sara Payson Willis, who wrote the novel, *Ruth Hall*, under her pseudonym of Fanny Fern: "In my last, I recollect, I bestowed some vituperation on female authors. I have since been reading *Ruth Hall*; and I must say I enjoyed it a good deal. The woman writes as if the Devil was in her; and that is the only condition under which a woman ever writes anything worth reading."

Hawthorne's last great romance, *The Marble Faun*, should be approached as a revelation of this conflict between America and Europe in his mind and heart. It contrasts European personality with American personality, European ethics with American ethics, in terms of their coping with the problem of evil. Although, in the end, Hawthorne seems to be telling us that the New England way of Kenyon and Hilda is superior to the way of Miriam and Donatello, the work has an ultimate ambiguity more tantalizing than the mystery of Donatello's ears. It should continue to interest readers of the 20th Century's second post-war period, when "the international theme" has come into its own as never before, not only in fiction, but in all aspects of life, and promises to develop manifold ambiguities as a challenge to our best intelligence.

[The best "modern" biographies are Newton Arvin's *Hawthorne* (Boston, 1929) and Edward Mather's *Nathaniel Hawthorne: A Modest Man* (New York, 1940). The main source-book for Hawthorne's biography is Julian Hawthorne's authorized *Nathaniel Hawthorne and His Wife* in two volumes (Boston, 1884). Other older biographical and critical studies of interest are George P. Lathrop's *A Study of Hawthorne* (Boston, 1876), Henry James' *Hawthorne* (New York,

1879) in the English Men of Letters series, and George E. Woodberry's *Nathaniel Hawthorne* (Boston, 1902) in the American Men of Letters series. Randall Stewart's editions of Hawthorne's *American Notebooks* (New Haven, 1932) and *English Notebooks* (New York, 1941) are indispensable. Stimulating critical essays on Hawthorne are to be found in Paul Elmer More's *Shelburne Essays; First Series* (Boston, 1904) and *Second Series* (Boston, 1905); Austin Warren's *Hawthorne* (New York, 1934) in American Writers Series, Yvor Winters' *Maule's Curse* (Norfolk, Conn., 1938); F. O. Matthiessen's *American Renaissance* (New York, 1941); and Newton Arvin's edition of *Hawthorne's Short Stories* (New York, 1946).]

SIGHTS FROM A STEEPLE
[1837 (1830)]

SO' I have climbed high, and my reward is small. Here I stand, with wearied knees, earth, indeed, at a dizzy depth below, but heaven far, far beyond me still. Oh that I could soar up into the very zenith, where man never breathed, nor eagle ever flew, and where the ethereal azure melts away from the eye, and appears only a deepened shade of nothingness! And yet I shiver at that cold and solitary thought. What clouds are gathering in the golden west, with direful intent against the brightness and the warmth of this summer afternoon! They are ponderous air ships, black as death, and freighted with the tempest; and at intervals their thunder, the signal guns of that unearthly squadron, rolls distant along the deep of heaven. These nearer heaps of fleecy vapor—methinks I could roll and toss upon them the whole day long!—seem scattered here and there for the repose of tired pilgrims through the sky. Perhaps—for who can tell?—beautiful spirits are disporting themselves there, and will bless my mortal eye with the brief appearance of their curly locks of golden light and laughing faces, fair and faint as the people of a rosy dream. Or, where the floating mass so imperfectly obstructs the color of the firmament, a slender foot and fairy limb, resting too heavily upon the frail support, may be thrust through, and suddenly withdrawn, while longing fancy follows them in vain. Yonder again is an

airy archipelago, where the sunbeams love to linger in their journeyings through space. Every one of those little clouds has been dipped and steeped in radiance, which the slightest pressure might disengage in silvery profusion, like water wrung from a sea-maid's hair. Bright they are as a young man's visions, and, like them, would be realized in chillness, obscurity, and tears. I will look on them no more.

In three parts of the visible circle, whose centre is this spire, I discern cultivated fields, villages, white country seats, the waving lines of rivulets, little placid lakes, and here and there a rising ground, that would fain be termed a hill. On the fourth side is the sea, stretching away towards a viewless boundary, blue and calm, except where the passing anger of a shadow flits across its surface, and is gone. Hitherward, a broad inlet penetrates far into the land; on the verge of the harbor, formed by its extremity, is a town; and over it am I, a watchman, all-heeding and unheeded. Oh that the multitude of chimneys could speak, like those of Madrid, and betray, in smoky whispers, the secrets of all who, since their first foundation, have assembled at the hearths within! Oh that the Limping Devil of Le Sage would perch beside me here, extend his wand over this contiguity of roofs, uncover every chamber, and make me familiar with their inhabitants!¹ The most

¹ Alain René Le Sage (1688-1747) wrote *Le Diable Boiteux* (1707), translated as *Asmodeus* or *The Devil on Two Sticks*, a satiric novel in which a limping devil pries into the residences of Madrid.

desirable mode of existence might be that of a spiritualized Paul Pry, hovering invisible round man and woman, witnessing their deeds, searching into their hearts, borrowing brightness from their felicity and shade from their sorrow, and retaining no emotion peculiar to himself. But none of these things are possible; and if I would know the interior of brick walls, or the mystery of human bosoms, I can but guess.

Yonder is a fair street, extending north and south. The stately mansions are placed each on its carpet of verdant grass, and a long flight of steps descends from every door to the pavement. Ornamental trees—the broad-leaved horse-chestnut, the elm so lofty and bending, the graceful but infrequent willow, and others whereof I know not the names—grow thrivingly among brick and stone. The oblique rays of the sun are intercepted by these green citizens, and by the houses, so that one side of the street is a shaded and pleasant walk. On its whole extent there is now but a single passenger, advancing from the upper end, and he, unless distance and the medium of a pocket spyglass do him more than justice, is a fine young man of twenty. He saunters slowly forward, slapping his left hand with his folded gloves, bending his eyes upon the pavement, and sometimes raising them to throw a glance before him. Certainly, he has a pensive air. Is he in doubt, or in debt? Is he, if the question be allowable, in love? Does he strive to be melancholy and gentleman-like? Or, is he merely overcome by the heat? But I bid him farewell for the present. The door of one of the houses—an aristocratic edifice, with curtains of purple and gold waving from the windows, is now opened, and down the steps come two ladies, swinging their parasols, and lightly arrayed for a summer ramble. Both are young, both are pretty, but methinks the left-hand lass is the fairer of the twain; and, though she be so serious at this moment, I could swear that there is a treasure of gentle fun within her. They stand talking a little while upon the steps, and finally proceed up the street. Mean-

time, as their faces are now turned from me, I may look elsewhere.

Upon that wharf, and down the corresponding street, is a busy contrast to the quiet scene which I have just noticed. Business evidently has its centre there, and many a man is wasting the summer afternoon in labor and anxiety, in losing riches or in gaining them, when he would be wiser to flee away to some pleasant country village, or shaded lake in the forest, or wild and cool sea-beach. I see vessels unloading at the wharf, and precious merchandise strewn upon the ground, abundantly as at the bottom of the sea, that market whence no goods return, and where there is no captain nor supercargo to render an account of sales. Here, the clerks are diligent with their paper and pencils, and sailors ply the block and tackle that hang over the hold, accompanying their toil with cries, long drawn and roughly melodious, till the bales and punchcons ascend to upper air. At a little distance a group of gentlemen are assembled round the door of a warehouse. Grave seniors be they, and I would wager—if it were safe in these times to be responsible for any one—that the least eminent among them might vie with old Vicentio, that incomparable trafficker of Pisa.² I can even select the wealthiest of the company. It is the elderly personage, in somewhat rusty black, with powdered hair, the superfluous whiteness of which is visible upon the cape of his coat. His twenty ships are wafted on some of their many courses by every breeze that blows, and his name—I will venture to say, though I know it not—is a familiar sound among the far separated merchants of Europe and the Indies.

But I bestow too much of my attention in this quarter. On looking again to the long and shady walk, I perceive that the two fair girls have encountered the young man. After a sort of shyness in the recognition, he turns back with them. Moreover,

² An allusion to a character in Shakespeare's *The Taming of the Shrew*.

he has sanctioned my taste in regard to his companions by placing himself on the inner side of the pavement, nearest the Venus to whom I—enacting, on a steeple top, the part of Paris on the top of Ida—adjudged the golden apple.

In two streets, converging at right angles towards my watchtower, I distinguish three different processions. One is a proud array of voluntary soldiers, in bright uniform, resembling, from the height whence I look down, the painted veterans that garrison the windows of a toyshop. And yet, it stirs my heart, their regular advance, their nodding plumes, the sunflash on their bayonets and musket barrels, the roll of their drums ascending past me, and the fife ever and anon piercing through—these things have awakened a warlike fire, peaceful though I be. Close to their rear marches a battalion of school-boys, ranged in crooked and irregular platoons, shouldering sticks, thumping a harsh and unripe clatter from an instrument of tin, and ridiculously aping the intricate manœuvres of the foremost band. Nevertheless, as slight differences are scarcely perceptible from a church spire, one might be tempted to ask, “Which are the boys?”—or rather, “Which the men?” But, leaving these, let us turn to the third procession, which, though sadder in outward show, may excite identical reflections in the thoughtful mind. It is a funeral. A hearse, drawn by a black and bony steed, and covered by a dusty pall; two or three coaches rumbling over the stones, their drivers half asleep; a dozen couple of careless mourners in their every-day attire; such was not the fashion of our fathers, when they carried a friend to his grave. There is now no doleful clang of the bell to proclaim sorrow to the town. Was the King of Terrors more awful in those days than in our own, that wisdom and philosophy have been able to produce this change? Not so. Here is a proof that he retains his proper majesty. The military men and the military boys are wheeling round the corner, and meet the funeral full in the face. Immediately the drum is

silent, all but the tap that regulates each simultaneous footfall. The soldiers yield the path to the dusty hearse and unpretending train, and the children quit their ranks, and cluster on the sidewalks, with timorous and instinctive curiosity. The mourners enter the churchyard at the base of the steeple, and pause by an open grave among the burial stones; the lightning glimmers on them as they lower down the coffin, and the thunder rattles heavily while they throw the earth upon its lid. Verily, the shower is near, and I tremble for the young man and the girls, who have now disappeared from the long and shady street.

How various are the situations of the people covered by the roofs beneath me, and how diversified are the events at this moment befalling them! The new born, the aged, the dying, the strong in life, and the recent dead, are in the chambers of these many mansions. The full of hope, the happy, the miserable, and the desperate, dwell together within the circle of my glance. In some of the houses over which my eyes roam so coldly, guilt is entering into hearts that are still tenanted by a debased and trodden virtue,—guilt is on the very edge of commission, and the impending deed might be averted, guilt is done, and the criminal wonders if it be irrevocable. There are broad thoughts struggling in my mind, and, were I able to give them distinctness, they would make their way in eloquence. Lo! the raindrops are descending.

The clouds, within a little time, have gathered over all the sky, hanging heavily, as if about to drop in one unbroken mass upon the earth. At intervals, the lightning flashes from their brooding hearts, quivers, disappears, and then comes the thunder, travelling slowly after its twin-born flame. A strong wind has sprung up, howls through the darkened streets, and raises the dust in dense bodies, to rebel against the approaching storm. The disbanded soldiers fly, the funeral has already vanished like its dead, and all people hurry homeward—all that have a home; while a few

lounge by the corners, or trudge on desperately, at their leisure. In a narrow lane, which communicates with the shady street, I discern the rich old merchant, putting himself to the top of his speed, lest the rain should convert his hair powder to a paste. Unhappy gentleman! By the slow vehemence and painful moderation where-with he journeys, it is but too evident that Podagra³ has left its thrilling tenderness in his great toe. But yonder, at a far more rapid pace, come three other of my acquaintance, the two pretty girls and the young man, unseasonably interrupted in their walk. Their footsteps are supported by the risen dust,—the wind lends them its velocity,—they fly like three sea-birds driven landward by the tempestuous breeze. The ladies would not thus rival Atalanta if they but knew that any one were at leisure to observe them. Ah! as they hasten onward, laughing in the angry face of nature, a sudden catastrophe has chanced. At the corner where the narrow lane enters into the street, they come plump against the old merchant, whose tortoise motion has just brought him to that point. He likes not the sweet encounter; the darkness of the whole air gathers speedily upon his visage, and there is a pause on both sides. Finally, he thrusts aside the youth with little courtesy, seizes an arm of each of the two girls, and plods onward, like a magician with a prize of captive faeries. All this is easy to be understood. How disconsolate the poor lover stands! regardless of the rain that threatens an exceeding damage to his well-fashioned habiliments, till he catches a backward glance of mirth from a bright eye, and turns away with whatever comfort it conveys.

The old man and his daughters are safely housed, and now the storm lets loose its fury. In every dwelling I perceive the faces of the chambermaids as they shut down the windows, excluding the impetuous shower, and shrinking away from the quick fiery glare. The large drops descend with force upon the slated roofs, and rise again in smoke. There is a rush and roar, as of

a river through the air, and muddy streams bubble majestically along the pavement, whirl their dusky foam into the kennel, and disappear beneath iron grates. Thus did Arethusa sink⁴ I love not my station here aloft, in the midst of the tumult which I am powerless to direct or quell, with the blue lightning wrinkling on my brow, and the thunder muttering its first awful syllables in my ear. I will descend. Yet let me give another glance to the sea, where the foam breaks out in long white lines upon a broad expanse of blackness, or boils up in far distant points, like snowy mountain tops in the eddies of a flood. and let me look once more at the green plain, and little hills of the country, over which the giant of the storm is striding in robes of mist, and at the town, whose obscured and desolate streets might beseech a city of the dead, and turning a single moment to the sky, now gloomy as an author's prospects, I prepare to resume my station on lower earth. But stay! A little speck of azure has widened in the western heavens, the sunbeams find a passage, and go rejoicing through the tempest; and on yonder darkest cloud, born, like hallowed hopes, of the glory of another world and the trouble and tears of this, brightens forth the Rainbow!

MR. HIGGINBOTHAM'S
CATASTROPHE
[1837 (1834)]

A YOUNG fellow, a tobacco pedlar by trade, was on his way from Morristown, where he had dealt largely with the Deacon of the Shaker settlement, to the village of Parker's Falls, on Salmon River. He had a neat little cart, painted green, with a box of cigars depicted on each side panel, and an Indian chief, holding a pipe and

³ The gout.

⁴ A wood nymph who, to escape her pursuer, the river god Alpheus, was changed to a stream running under the sea.

a golden tobacco stalk, on the rear. The pedlar drove a smart little mare, and was a young man of excellent character, keen at a bargain, but none the worse liked by the Yankees, who, as I have heard them say, would rather be shaved with a sharp razor than a dull one. Especially was he beloved by the pretty girls along the Connecticut, whose favor he used to court by presents of the best smoking tobacco in his stock; knowing well that the country lasses of New England are generally great performers on pipes. Moreover, as will be seen in the course of my story, the pedlar was inquisitive, and something of a tattler, always itching to hear the news and anxious to tell it again.

After an early breakfast at Morristown, the tobacco pedlar, whose name was Dominicus Pike, had travelled seven miles through a solitary piece of woods, without speaking a word to anybody but himself and his little gray mare. It being nearly seven o'clock, he was as eager to hold a morning gossip as a city shop-keeper to read the morning paper. An opportunity seemed at hand when, after lighting a cigar with a sun-glass, he looked up, and perceived a man coming over the brow of the hill, at the foot of which the pedlar had stopped his green cart. Dominicus watched him as he descended, and noticed that he carried a bundle over his shoulder on the end of a stick, and travelled with a weary, yet determined pace. He did not look as if he had started in the freshness of the morning, but had footed it all night, and meant to do the same all day.

"Good morning, mister," said Dominicus, when within speaking distance. "You go a pretty good jog. What's the latest news at Parker's Falls?"

The man pulled the broad brim of a gray hat over his eyes, and answered, rather suddenly, that he did not come from Parker's Falls, which, as being the limit of his own day's journey, the pedlar had naturally mentioned in his inquiry.

"Well then," rejoined Dominicus Pike,

"let's have the latest news where you did come from. I'm not particular about Parker's Falls. Any place will answer."

Being thus importuned, the traveller—who was as ill looking a fellow as one would desire to meet in a solitary piece of woods—appeared to hesitate a little, as if he was either searching his memory for news, or weighing the expediency of telling it. At last, mounting on the step of the cart, he whispered in the ear of Dominicus, though he might have shouted aloud and no other mortal would have heard him.

"I do remember one little trifle of news," said he. "Old Mr Higginbotham, of Kimballton, was murdered in his orchard, at eight o'clock last night, by an Irishman and a nigger. They strung him up to the branch of a St. Michael's pear-tree, where nobody would find him till the morning."

As soon as this horrible intelligence was communicated, the stranger betook himself to his journey again, with more speed than ever, not even turning his head when Dominicus invited him to smoke a Spanish cigar and relate all the particulars. The pedlar whistled to his mare and went up the hill, pondering on the doleful fate of Mr. Higginbotham, whom he had known in the way of trade, having sold him many a bunch of long nines, and a great deal of pigtail, lady's twist, and fig tobacco. He was rather astonished at the rapidity with which the news had spread. Kimballton was nearly sixty miles distant in a straight line; the murder had been perpetrated only at eight o'clock the preceding night, yet Dominicus had heard of it at seven in the morning, when, in all probability, poor Mr. Higginbotham's own family had but just discovered his corpse, hanging on the St. Michael's pear-tree. The stranger on foot must have worn seven-league boots to travel at such a rate.

"Ill news flies fast, they say," thought Dominicus Pike; "but this beats railroads. The fellow ought to be hired to go express with the President's Message."

The difficulty was solved by supposing

that the narrator had made a mistake of one day in the date of the occurrence; so that our friend did not hesitate to introduce the story at every tavern and country store along the road, expending a whole bunch of Spanish wrappers among at least twenty horrified audiences. He found himself invariably the first bearer of the intelligence, and was so pestered with questions that he could not avoid filling up the outline, till it became quite a respectable narrative. He met with one piece of corroborative evidence. Mr. Higginbotham was a trader; and a former clerk of his, to whom Dominicus related the facts, testified that the old gentleman was accustomed to return home through the orchard about nightfall, with the money and valuable papers of the store in his pocket. The clerk manifested but little grief at Mr. Higginbotham's catastrophe, hinting, what the pedlar had discovered in his own dealings with him, that he was a crusty old fellow, as close as a vice. His property would descend to a pretty niece who was now keeping school in Kimballton.

What with telling the news for the public good, and driving bargains for his own, Dominicus was so much delayed on the road that he chose to put up at a tavern, about five miles short of Parker's Falls. After supper, lighting one of his prime cigars, he seated himself in the bar-room, and went through the story of the murder, which had grown so fast that it took him half an hour to tell. There were as many as twenty people in the room, nineteen of whom received it all for gospel. But the twentieth was an elderly farmer, who had arrived on horseback a short time before, and was now seated in a corner smoking his pipe. When the story was concluded, he rose up very deliberately, brought his chair right in front of Dominicus, and stared him full in the face, puffing out the vilest tobacco smoke the pedlar had ever smelt.

"Will you make affidavit," demanded he, in the tone of a country justice taking an examination, "that old Squire Higgin-

botham of Kimballton was murdered in his orchard the night before last, and found hanging on his great pear-tree yesterday morning?"

"I tell the story as I heard it, mister," answered Dominicus, dropping his half-burnt cigar; "I don't say that I saw the thing done. So I can't take my oath that he was murdered exactly in that way."

"But I can take mine," said the farmer, "that if Squire Higginbotham was murdered night before last, I drank a glass of bitters with his ghost this morning. Being a neighbor of mine, he called me into his store, as I was riding by, and treated me, and then asked me to do a little business for him on the road. He didn't seem to know any more about his own murder than I did."

"Why, then, it can't be a fact!" exclaimed Dominicus Pike.

"I guess he'd have mentioned, if it was," said the old farmer; and he removed his chair back to the corner, leaving Dominicus quite down in the mouth.

Here was a sad resurrection of old Mr. Higginbotham! The pedlar had no heart to mingle in the conversation any more, but comforted himself with a glass of gin and water, and went to bed where, all night long, he dreamed of hanging on the St. Michael's pear-tree. To avoid the old farmer (whom he so detested that his suspension would have pleased him better than Mr. Higginbotham's), Dominicus rose, in the gray of the morning, put the little mare into the green cart, and trotted swiftly away towards Parker's Falls. The fresh breeze, the dewy road, and the pleasant summer dawn, revived his spirits, and might have encouraged him to repeat the old story had there been anybody awake to hear it. But he met neither ox team, light wagon chaise, horseman, nor foot traveller, till, just as he crossed Salmon River, a man came trudging down to the bridge with a bundle over his shoulder, on the end of a stick.

"Good morning, mister," said the pedlar,

reining in his mare. "If you come from Kimballton or that neighborhood, may be you can tell me the real fact about this affair of old Mr. Higginbotham. Was the old fellow actually murdered two or three nights ago, by an Irishman and a nigger?"

Dominicus had spoken in too great a hurry to observe, at first, that the stranger himself had a deep tinge of negro blood. On hearing this sudden question, the Ethiopian appeared to change his skin, its yellow hue becoming a ghastly white, while, shaking and stammering, he thus replied:—

"No! no! There was no colored man! It was an Irishman that hanged him last night, at eight o'clock. I came away at seven! His folks can't have looked for him in the orchard yet."

Scarcely had the yellow man spoken, when he interrupted himself, and though he seemed weary enough before, continued his journey at a pace which would have kept the pedlar's mare on a smart trot. Dominicus stared after him in great perplexity. If the murder had not been committed till Tuesday night, who was the prophet that had foretold it, in all its circumstances, on Tuesday morning? If Mr. Higginbotham's corpse were not yet discovered by his own family, how came the mulatto, at above thirty miles' distance, to know that he was hanging in the orchard, especially as he had left Kimballton before the unfortunate man was hanged at all? These ambiguous circumstances, with the stranger's surprise and terror, made Dominicus think of raising a hue and cry after him, as an accomplice in the murder; since a murder, it seemed, had really been perpetrated.

"But let the poor devil go," thought the pedlar. "I don't want his black blood on my head; and hanging the nigger wouldn't unhang Mr. Higginbotham. Unhang the old gentleman! It's a sin, I know; but I should hate to have him come to life a second time, and give me the lie!"

With these meditations, Dominicus Pike drove into the street of Parker's Falls, which, as everybody knows, is as thriving

a village as three cotton factories and a slitting mill can make it. The machinery was not in motion, and but a few of the shop doors unbarred, when he alighted in the stable yard of the tavern, and made it his first business to order the mare four quarts of oats. His second duty, of course, was to impart Mr. Higginbotham's catastrophe to the hostler. He deemed it advisable, however, not to be too positive as to the date of the dreadful fact, and also to be uncertain whether it were perpetrated by an Irishman and a mulatto, or by the son of Erin alone. Neither did he profess to relate it on his own authority, or that of any one person; but mentioned it as a report generally diffused.

The story ran through the town like fire among girdled trees, and became so much the universal talk that nobody could tell whence it had originated. Mr. Higginbotham was as well known at Parker's Falls as any citizen of the place, being part owner of the slitting mill, and a considerable stockholder in the cotton factories. The inhabitants felt their own prosperity interested in his fate. Such was the excitement, that the Parker's Falls Gazette anticipated its regular day of publication, and came out with half a form of blank paper and a column of double pica emphasized with capitals, and headed HORRID MURDER OF MR. HIGGINBOTHAM! Among other dreadful details, the printed account described the mark of the cord round the dead man's neck, and stated the number of thousand dollars of which he had been robbed; there was much pathos also about the affliction of his niece, who had gone from one fainting fit to another, ever since her uncle was found hanging on the St. Michael's pear-tree with his pockets inside out. The village poet likewise commemorated the young girl's grief in seventeen stanzas of a ballad. The selectmen held a meeting, and, in consideration of Mr. Higginbotham's claims on the town, determined to issue handbills, offering a reward of five hundred dollars for the apprehension of his murderers, and the

recovery of the stolen property.

Meanwhile the whole population of Parker's Falls, consisting of shopkeepers, mistresses of boarding-houses, factory girls, millmen, and school boys, rushed into the street and kept up such a terrible loquacity as more than compensated for the silence of the cotton machines, which refrained from their usual din out of respect to the deceased. Had Mr. Higginbotham cared about posthumous renown, his untimely ghost would have exulted in this tumult. Our friend Dominicus, in his vanity of heart, forgot his intended precautions, and mounting on the town pump, announced himself as the bearer of the authentic intelligence which had caused so wonderful a sensation. He immediately became the great man of the moment, and had just begun a new edition of the narrative, with a voice like a field preacher, when the mail stage drove into the village street. It had travelled all night, and must have shifted horses at Kimballton, at three in the morning.

"Now we shall hear all the particulars," shouted the crowd.

The coach rumbled up to the piazza of the tavern, followed by a thousand people; for if any man had been minding his own business till then, he now left it at sixes and sevens, to hear the news. The pedlar, foremost in the race, discovered two passengers, both of whom had been startled from a comfortable nap to find themselves in the centre of a mob. Every man assailing them with separate questions, all propounded at once, the couple were struck speechless, though one was a lawyer and the other a young lady.

"Mr. Higginbotham! Mr. Higginbotham! Tell us the particulars about old Mr. Higginbotham!" bawled the mob. "What is the coroner's verdict? Are the murderers apprehended? Is Mr. Higginbotham's niece come out of her fainting fits? Mr. Higginbotham! Mr. Higginbotham!"

The coachman said not a word, except to swear awfully at the hostler for not bringing him a fresh team of horses. The lawyer

inside had generally his wits about him even when asleep; the first thing he did, after learning the cause of the excitement, was to produce a large, red pocket-book. Meantime Dominicus Pike, being an extremely polite young man, and also suspecting that a female tongue would tell the story as glibly as a lawyer's, had handed the lady out of the coach. She was a fine, smart girl, now wide awake and bright as a button, and had such a sweet pretty mouth, that Dominicus would almost as lief have heard a love tale from it as a tale of murder.

"Gentlemen and ladies," said the lawyer to the shopkeepers, the millmen, and the factory girls, "I can assure you that some unaccountable mistake, or, more probably, a wilful falsehood, maliciously contrived to injure Mr. Higginbotham's credit, has excited this singular uproar. We passed through Kimballton at three o'clock this morning, and most certainly should have been informed of the murder had any been perpetrated. But I have proof nearly as strong as Mr. Higginbotham's own oral testimony, in the negative. Here is a note relating to a suit of his in the Connecticut courts, which was delivered me from that gentleman himself. I find it dated at ten o'clock last evening."

So saying, the lawyer exhibited the date and signature of the note, which irrefragably proved, either that this perverse Mr. Higginbotham was alive when he wrote it, or—as some deemed the more probable case, of two doubtful ones—that he was so absorbed in worldly business as to continue to transact it even after his death. But unexpected evidence was forthcoming. The young lady, after listening to the pedlar's explanation, merely seized a moment to smooth her gown and put her curls in order, and then appeared at the tavern door, making a modest signal to be heard.

"Good people," said she, "I am Mr. Higginbotham's niece."

A wondering murmur passed through the crowd on beholding her so rosy and bright; that same unhappy niece, whom

they had supposed, on the authority of the Parker's Falls Gazette, to be lying at death's door in a fainting fit. But some shrewd fellows had doubted, all along, whether a young lady would be quite so desperate at the hanging of a rich old uncle.

"You see," continued Miss Higginbotham, with a smile, "that this strange story is quite unfounded as to myself, and I believe I may affirm it to be equally so in regard to my dear uncle Higginbotham. He has the kindness to give me a home in his house, though I contribute to my own support by teaching a school. I left Kimballton this morning to spend the vacation of commencement week with a friend, about five miles from Parker's Falls. My generous uncle, when he heard me on the stairs, called me to his bedside, and gave me two dollars and fifty cents to pay my stage fare, and another dollar for my extra expenses. He then laid his pocket-book under his pillow, shook hands with me, and advised me to take some biscuit in my bag, instead of breakfasting on the road. I feel confident, therefore, that I left my beloved relative alive, and trust that I shall find him so on my return."

The young lady courtesied at the close of her speech, which was so sensible and well worded, and delivered with such grace and propriety, that everybody thought her fit to be preceptress of the best academy in the State. But a stranger would have supposed that Mr. Higginbotham was an object of abhorrence at Parker's Falls, and that a thanksgiving had been proclaimed for his murder; so excessive was the wrath of the inhabitants on learning their mistake. The millmen resolved to bestow public honors on Dominicus Pike, only hesitating whether to tar and feather him, ride him on a rail, or refresh him with an ablution at the town pump, on the top of which he had declared himself the bearer of the news. The selectmen, by advice of the lawyer, spoke of prosecuting him for a misdemeanor, in circulating unfounded reports, to the great disturbance of the peace

of the Commonwealth. Nothing saved Dominicus, either from mob law or a court of justice, but an eloquent appeal made by the young lady in his behalf. Addressing a few words of heartfelt gratitude to his benefactress, he mounted the green cart and rode out of town, under a discharge of artillery from the school boys, who found plenty of ammunition in the neighboring clay-pits and mud holes. As he turned his head to exchange a farewell glance with Mr. Higginbotham's niece, a ball, of the consistence of hasty pudding, hit him slap in the mouth, giving him a most grim aspect. His whole person was so bespattered with the like filthy missiles, that he had almost a mind to ride back, and supplicate for the threatened ablution at the town pump; for, though not meant in kindness, it would now have been a deed of charity.

However, the sun shone bright on poor Dominicus, and the mud, an emblem of all stains of undeserved opprobrium, was easily brushed off when dry. Being a funny rogue, his heart soon cheered up, nor could he refrain from a hearty laugh at the uproar which his story had excited. The handbills of the selectmen would cause the commitment of all the vagabonds in the State; the paragraph in the Parker's Falls Gazette would be reprinted from Maine to Florida, and perhaps form an item in the London newspapers, and many a miser would tremble for his money bags and life, on learning the catastrophe of Mr. Higginbotham. The pedlar meditated with much fervor on the charms of the young schoolmistress, and swore that Daniel Webster never spoke nor looked so like an angel as Miss Higginbotham, while defending him from the wrathful populace at Parker's Falls.

Dominicus was now on the Kimballton turnpike, having all along determined to visit that place, though business had drawn him out of the most direct road from Morristown. As he approached the scene of the supposed murder, he continued to revolve the circumstances in his mind, and was astonished at the aspect which the

whole case assumed Had nothing occurred to corroborate the story of the first traveller, it might now have been considered as a hoax; but the yellow man was evidently acquainted either with the report or the fact, and there was a mystery in his dismayed and guilty look on being abruptly questioned When, to this singular combination of incidents, it was added that the rumor tallied exactly with Mr. Higginbotham's character and habits of life; and that he had an orchard, and a St. Michael's pear-tree, near which he always passed at nightfall: the circumstantial evidence appeared so strong that Dominicus doubted whether the autograph produced by the lawyer, or even the niece's direct testimony, ought to be equivalent. Making cautious inquiries along the road, the pedlar further learned that Mr. Higginbotham had in his service an Irishman of doubtful character, whom he had hired without a recommendation, on the score of economy.

"May I be hanged myself," exclaimed Dominicus Pike aloud, on reaching the top of a lonely hill, "if I'll believe old Higginbotham is unchanged till I see him with my own eyes, and hear it from his own mouth! And—as he's a real shaver, I'll have the minister or some other responsible man for an indorser."

It was growing dusk when he reached the toll-house on Kimballton turnpike, about a quarter of a mile from the village of this name. His little mare was fast bringing him up with a man on horseback, who trotted through the gate a few rods in advance of him, nodded to the toll-gatherer, and kept on towards the village. Dominicus was acquainted with the toll-man, and, while making change, the usual remarks on the weather passed between them.

"I suppose," said the pedlar, throwing back his whiplash, to bring it down like a feather on the mare's flank, "you have not seen anything of old Mr. Higginbotham within a day or two?"

"Yes," answered the toll-gatherer. "He passed the gate just before you drove up,

and yonder he rides now, if you can see him through the dusk. He's been to Woodfield this afternoon, attending a sheriff's sale there. The old man generally shakes hands and has a little chat with me, but to-night, he nodded,—as if to say, 'Charge my toll,' and jogged on; for wherever he goes, he must always be home by eight o'clock."

"So they tell me," said Dominicus.

"I never saw a man look so yellow and thin as the squire does," continued the toll-gatherer "Says I to myself, to-night, he's more like a ghost or an old mummy than good flesh and blood."

The pedlar strained his eyes through the twilight, and could just discern the horseman now far ahead on the village road. He seemed to recognize the rear of Mr. Higginbotham; but through the evening shadows, and amid the dust from the horse's feet, the figure appeared dim and unsubstantial; as if the shape of the mysterious old man were faintly moulded of darkness and gray light. Dominicus shivered.

"Mr. Higginbotham has come back from the other world, by way of the Kimballton turnpike," thought he.

He shook the reins and rode forward, keeping about the same distance in the rear of the gray old shadow, till the latter was concealed by a bend of the road. On reaching this point, the pedlar no longer saw the man on horseback, but found himself at the head of the village street, not far from a number of stores and two taverns, clustered round the meeting-house steeple. On his left were a stone wall and a gate, the boundary of a wood-lot, beyond which lay an orchard, farther still, a mowing field, and last of all, a house. These were the premises of Mr. Higginbotham, whose dwelling stood beside the old highway, but had been left in the back-ground by the Kimballton turnpike. Dominicus knew the place; and the little mare stopped short by instinct; for he was not conscious of tightening the reins.

"For the soul of me, I cannot get by this gate!" said he, trembling. "I never shall be my own man again, till I see

whether Mr. Higginbotham is hanging on the St. Michael's pear-tree!"

He leaped from the cart, gave the rein a turn round the gate post, and ran along the green path of the wood-lot as if Old Nick were chasing behind. Just then the village clock tolled eight, and as each deep stroke fell, Dominicus gave a fresh bound and flew faster than before, till, dim in the solitary centre of the orchard, he saw the fated pear-tree. One great branch stretched from the old contorted trunk across the path, and threw the darkest shadow on that one spot. But something seemed to struggle beneath the branch!

The pedlar had never pretended to more courage than befits a man of peaceable occupation, nor could he account for his valor on this awful emergency. Certain it is, however, that he rushed forward, prostrated a sturdy Irishman with the butt end of his whip, and found—not indeed hanging on the St. Michael's pear-tree, but trembling beneath it, with a halter round his neck—the old, identical Mr. Higginbotham!

"Mr. Higginbotham," said Dominicus tremulously, "you're an honest man, and I'll take your word for it. Have you been hanged or not?"

If the riddle be not already guessed, a few words will explain the simple machinery by which this "coming event" was made to "cast its shadow before." Three men had plotted the robbery and murder of Mr. Higginbotham, two of them, successively, lost courage and fled, each delaying the crime one night by their disappearance; the third was in the act of perpetration, when a champion, blindly obeying the call of fate, like the heroes of old romance, appeared in the person of Dominicus Pike.

It only remains to say, that Mr. Higginbotham took the pedlar into high favor, sanctioned his addresses to the pretty schoolmistress, and settled his whole property on their children, allowing themselves the interest. In due time, the old gentleman capped the climax of his favors, by dying a Christian death, in bed, since which

melancholy event Dominicus Pike has removed from Kimballton, and established a large tobacco manufactory in my native village.

YOUNG GOODMAN BROWN

[1846 (1835)]

YOUNG Goodman Brown came forth at sunset into the street at Salem village, but put his head back, after crossing the threshold, to exchange a parting kiss with his young wife. And Faith, as the wife was aptly named, thrust her own pretty head into the street, letting the wind play with the pink ribbons of her cap while she called to Goodman Brown

"Dearest heart," whispered she, softly and rather sadly, when her lips were close to his ear, "prithee put off your journey until sunrise and sleep in your own bed to-night. A lone woman is troubled with such dreams and such thoughts that she's afear'd of herself sometimes. Pray tarry with me this night, dear husband, of all nights in the year."

"My love and my Faith," replied young Goodman Brown, "of all nights in the year, this one night must I tarry away from thee. My journey, as thou callest it, forth and back again, must needs be done 'twixt now and sunrise. What, my sweet, pretty wife, dost thou doubt me already, and we but three months married?"

"Then God bless you!" said Faith, with the pink ribbons; "and may you find all well when you come back."

"Amen!" cried Goodman Brown. "Say thy prayers, dear Faith, and go to bed at dusk, and no harm will come to thee."

So they parted; and the young man pursued his way until, being about to turn the corner by the meeting-house, he looked back and saw the head of Faith still peeping after him with a melancholy air, in spite of her pink ribbons.

"Poor little Faith!" thought he, for his heart smote him. "What a wretch am I to leave her on such an errand! She talks of

dreams, too. Methought as she spoke there was trouble in her face, as if a dream had warned her what work is to be done to-night. But no, no, 't would kill her to think it. Well, she's a blessed angel on earth; and after this one night I'll cling to her skirts and follow her to heaven."

With this excellent resolve for the future, Goodman Brown felt himself justified in making more haste on his present evil purpose. He had taken a dreary road, darkened by all the gloomiest trees of the forest, which barely stood aside to let the narrow path creep through, and closed immediately behind. It was all as lonely as could be, and there is this peculiarity in such a solitude, that the traveller knows not who may be concealed by the innumerable trunks and the thick boughs overhead; so that with lonely footsteps he may yet be passing through an unseen multitude.

"There may be a devilish Indian behind every tree," said Goodman Brown to himself; and he glanced fearfully behind him as he added, "What if the devil himself should be at my very elbow!"

His head being turned back, he passed a crook of the road, and, looking forward again, beheld the figure of a man, in grave and decent attire, seated at the foot of an old tree. He arose at Goodman Brown's approach and walked onward side by side with him.

"You are late, Goodman Brown," said he. "The clock of the Old South was striking as I came through Boston, and that is full fifteen minutes ago."¹

"Faith kept me back a while," replied the young man, with a tremor in his voice, caused by the sudden appearance of his companion, though not wholly unexpected.

It was now deep dusk in the forest, and deepest in that part of it where these two were journeying. As nearly as could be discerned, the second traveller was about fifty years old, apparently in the same rank of life as Goodman Brown, and bearing a considerable resemblance to him, though perhaps more in expression than features. Still they might have been taken

for father and son. And yet, though the elder person was as simply clad as the younger, and as simple in manner too, he had an indescribable air of one who knew the world, and who would not have felt abashed at the governor's dinner table or in King William's court, were it possible that his affairs should call him thither.² But the only thing about him that could be fixed upon as remarkable was his staff, which bore the likeness of a great black snake, so curiously wrought that it might almost be seen to twist and wriggle itself like a living serpent. This, of course, must have been an ocular deception, assisted by the uncertain light.

"Come, Goodman Brown," cried his fellow-traveller, "this is a dull pace for the beginning of a journey. Take my staff, if you are so soon weary."

"Friend," said the other, exchanging his slow pace for a full stop, "having kept covenant by meeting thee here, it is my purpose now to return whence I came. I have scruples touching the matter thou wot'st of."

"Sayest thou so?" replied he of the serpent, smiling apart. "Let us walk on, nevertheless, reasoning as we go; and if I convince thee not thou shalt turn back. We are but a little way in the forest yet."

"Too far! too far!" exclaimed the goodman, unconsciously resuming his walk. "My father never went into the woods on such an errand, nor his father before him. We have been a race of honest men and good Christians since the days of the martyrs; and shall I be the first of the name of Brown that ever took this path and kept"—

"Such company, thou wouldst say," observed the elder person, interpreting his pause. "Well said, Goodman Brown! I have been as well acquainted with your family as with ever a one among the Puritans; and that's no trifle to say. I helped

¹ The Old South Church in Boston was built in 1730.

² The reference is to William III (1650-1702), England's King 1689-1702.

your grandfather, the constable, when he lashed the Quaker woman so smartly through the streets of Salem, and it was I that brought your father a pitch-pine knot, kindled at my own hearth, to set fire to an Indian village, in King Philip's war. They were my good friends, both. and many a pleasant walk have we had along this path, and returned merrily after midnight. I would fain be friends with you for their sake."

"If it be as thou sayest," replied Goodman Brown, "I marvel they never spoke of these matters; or, verily, I marvel not, seeing that the least rumor of the sort would have driven them from New England. We are a people of prayer, and good works to boot, and abide no such wickedness."

"Wickedness or not," said the traveller with the twisted staff, "I have a very general acquaintance here in New England. The deacons of many a church have drunk the communion wine with me; the selectmen of divers towns make me their charrman, and a majority of the Great and General Court are firm supporters of my interest. The governor and I, too— But these are state secrets."

"Can this be so?" cried Goodman Brown, with a stare of amazement at his undisturbed companion. "Howbeit, I have nothing to do with the governor and council; they have their own ways, and are no rule for a simple husbandman like me. But, were I to go on with thee, how should I meet the eye of that good old man, our minister, at Salem village? Oh, his voice would make me tremble both Sabbath day and lecture day."

Thus far the elder traveller had listened with due gravity; but now burst into a fit of irrepressible mirth, shaking himself so violently that his snake-like staff actually seemed to wriggle in sympathy.

"Ha! ha! ha!" shouted he again and again; then composing himself, "Well, go on, Goodman Brown, go on; but, prithee, don't kill me with laughing."

"Well, then, to end the matter at once,"

said Goodman Brown, considerably nettled, "there is my wife, Faith. It would break her dear little heart; and I'd rather break my own."

"Nay, if that be the case," answered the other, "e'en go thy ways, Goodman Brown. I would not for twenty old women like the one hobbling before us that Faith should come to any harm."

As he spoke he pointed his staff at a female figure on the path, in whom Goodman Brown recognized a very pious and exemplary dame, who had taught him his catechism in youth, and was still his moral and spiritual adviser, jointly with the minister and Deacon Gookin.

"A marvel, truly, that Goody Cloyse should be so far in the wilderness at night-fall," said he. "But with your leave, friend, I shall take a cut through the woods until we have left this Christian woman behind. Being a stranger to you, she might ask whom I was consorting with and whither I was going."

"Be it so," said his fellow-traveller. "Betake you to the woods, and let me keep the path."

Accordingly the young man turned aside, but took care to watch his companion, who advanced softly along the road until he had come within a staff's length of the old dame. She, meanwhile, was making the best of her way, with singular speed for so aged a woman, and mumbling some indistinct words—a prayer, doubtless—as she went. The traveller put forth his staff and touched her withered neck with what seemed the serpent's tail.

"The devil!" screamed the pious old lady.

"Then Goody Cloyse knows her old friend?" observed the traveller, confronting her and leaning on his writhing stick.

"Ah, forsooth, and is it your worship indeed?" cried the good dame. "Yea, truly is it, and in the very image of my old gossip, Goodman Brown, the grandfather of the silly fellow that now is. But—would your worship believe it?—my broomstick hath strangely disappeared, stolen, as I suspect, by that unchanced witch, Goody

Cory, and that, too, when I was all anointed with the juice of smallage, and cinquefoil, and wolf's bane"—

"Mingled with fine wheat and the fat of a new-born babe," said the shape of old Goodman Brown.

"Ah, your worship knows the recipe," cried the old lady, cackling aloud "So, as I was saying, being all ready for the meeting, and no horse to ride on, I made up my mind to foot it; for they tell me there is a nice young man to be taken into communion to-night. But now your good worship will lend me your arm, and we shall be there in a twinkling."

"That can hardly be," answered her friend. "I may not spare you my arm, Goody Cloyse, but here is my staff, if you will."

So saying, he threw it down at her feet, where, perhaps, it assumed life, being one of the rods which its owner had formerly lent to the Egyptian magi. Of this fact, however, Goodman Brown could not take cognizance. He had cast up his eyes in astonishment, and, looking down again, beheld neither Goody Cloyse nor the serpentine staff, but his fellow-traveller alone, who waited for him as calmly as if nothing had happened.

"That old woman taught me my catechism," said the young man; and there was a world of meaning in this simple comment.

They continued to walk onward, while the elder traveller exhorted his companion to make good speed and persevere in the path, discoursing so aptly that his arguments seemed rather to spring up in the bosom of his auditor than to be suggested by himself. As they went, he plucked a branch of maple to serve for a walking stick, and began to strip it of the twigs and little boughs, which were wet with evening dew. The moment his fingers touched them they became strangely withered and dried up as with a week's sunshine. Thus the pair proceeded, at a good free pace, until suddenly, in a gloomy hollow of the road, Goodman Brown sat

himself down on the stump of a tree and refused to go any farther.

"Friend," said he, stubbornly, "my mind is made up. Not another step will I budge on this errand. What if a wretched old woman do choose to go to the devil when I thought she was going to heaven: is that any reason why I should quit my dear Faith and go after her?"

"You will think better of this by and by," said his acquaintance, composedly. "Sit here and rest yourself a while; and when you feel like moving again, there is my staff to help you along."

Without more words, he threw his companion the maple stick, and was as speedily out of sight as if he had vanished into the deepening gloom. The young man sat a few moments by the roadside, applauding himself greatly, and thinking with how clear a conscience he should meet the minister in his morning walk, nor shrink from the eye of good old Deacon Gookin. And what calm sleep would be his that very night, which was to have been spent so wickedly, but so purely and sweetly now, in the arms of Faith! Amidst these pleasant and praiseworthy meditations, Goodman Brown heard the tramp of horses along the road, and deemed it advisable to conceal himself within the verge of the forest, conscious of the guilty purpose that had brought him thither, though now so happily turned from it.

On came the hoof tramps and the voices of the riders, two grave old voices, conversing soberly as they drew near. These mingled sounds appeared to pass along the road, within a few yards of the young man's hiding-place, but, owing doubtless to the depth of the gloom at that particular spot, neither the travellers nor their steeds were visible. Though their figures brushed the small boughs by the wayside, it could not be seen that they intercepted, even for a moment, the faint gleam from the strip of bright sky athwart which they must have passed. Goodman Brown alternately crouched and stood on tiptoe, pulling aside the branches and thrusting forth his

head as far as he durst without discerning so much as a shadow. It vexed him the more, because he could have sworn, were such a thing possible, that he recognized the voices of the minister and Deacon Gookin, jogging along quietly, as they were wont to do, when bound to some ordination or ecclesiastical council. While yet within hearing, one of the riders stopped to pluck a switch.

"Of the two, reverend sir," said the voice like the deacon's, "I had rather miss an ordination dinner than to-night's meeting. They tell me that some of our community are to be here from Falmouth and beyond, and others from Connecticut and Rhode Island, besides several of the Indian powwows, who, after their fashion, know almost as much deviltry as the best of us. Moreover, there is a goodly young woman to be taken into communion."

"Mighty well, Deacon Gookin!" replied the solemn old tones of the minister. "Spur up, or we shall be late. Nothing can be done, you know, until I get on the ground."

The hoofs clattered again; and the voices, talking so strangely in the empty air, passed on through the forest, where no church had ever been gathered or solitary Christian prayed. Whither, then, could these holy men be journeying so deep into the heathen wilderness? Young Goodman Brown caught hold of a tree for support, being ready to sink down on the ground, faint and overburdened with the heavy sickness of his heart. He looked up to the sky, doubting whether there really was a heaven above him. Yet there was the blue arch, and the stars brightening in it.

"With heaven above and Faith below, I will yet stand firm against the devil!" cried Goodman Brown.

While he still gazed upward into the deep arch of the firmament and had lifted his hands to pray, a cloud, though no wind was stirring, hurried across the zenith and hid the brightening stars. The blue sky was still visible, except directly overhead, where this black mass of cloud was sweeping swiftly northward. Aloft in the air, as

if from the depths of the cloud, came a confused and doubtful sound of voices. Once the listener fancied that he could distinguish the accents of towns-people of his own, men and women, both pious and ungodly, many of whom he had met at the communion table, and had seen others rioting at the tavern. The next moment, so indistinct were the sounds, he doubted whether he had heard aught but the murmur of the old forest, whispering without a wind. Then came a stronger swell of those familiar tones, heard daily in the sunshine at Salem village, but never until now from a cloud of night. There was one voice, of a young woman, uttering lamentations, yet with an uncertain sorrow, and entreating for some favor, which, perhaps, it would grieve her to obtain, and all the unseen multitude, both saints and sinners, seemed to encourage her onward.

"Faith!" shouted Goodman Brown, in a voice of agony and desperation; and the echoes of the forest mocked him, crying, "Faith! Faith!" as if bewildered wretches were seeking her all through the wilderness.

The cry of grief, rage, and terror was yet piercing the night, when the unhappy husband held his breath for a response. There was a scream, drowned immediately in a louder murmur of voices, fading into far-off laughter, as the dark cloud swept away, leaving the clear and silent sky above Goodman Brown. But something fluttered lightly down through the air and caught on the branch of a tree. The young man seized it, and beheld a pink ribbon.

"My Faith is gone!" cried he, after one stupefied moment. "There is no good on earth; and sin is but a name. Come, devil; for to thee is this world given."

And, maddened with despair, so that he laughed loud and long, did Goodman Brown grasp his staff and set forth again, at such a rate that he seemed to fly along the forest path rather than to walk or run. The road grew wilder and drearier and more faintly traced, and vanished at length, leaving him in the heart of the dark wilderness, still rushing onward with the instinct that

guides mortal man to evil. The whole forest was peopled with frightful sounds—the creaking of the trees, the howling of wild beasts, and the yell of Indians; while sometimes the wind tolled like a distant church bell, and sometimes gave a broad roar around the traveller, as if all Nature were laughing him to scorn. But he was himself the chief horror of the scene, and shrank not from its other horrors.

“Ha! ha! ha!” roared Goodman Brown when the wind laughed at him. “Let us hear which will laugh loudest. Think not to frighten me with your deviltry. Come witch, come wizard, come Indian powwow, come devil himself, and here comes Goodman Brown. You may as well fear him as he fear you.”

In truth, all through the haunted forest there could be nothing more frightful than the figure of Goodman Brown. On he flew among the black pines, brandishing his staff with frenzied gestures, now giving vent to an inspiration of horrid blasphemy, and now shouting forth such laughter as set all the echoes of the forest laughing like demons around him. The fiend in his own shape is less hideous than when he rages in the breast of man. Thus sped the demomac on his course, until, quivering among the trees, he saw a red light before him, as when the felled trunks and branches of a clearing have been set on fire, and throw up their lurid blaze against the sky, at the hour of midnight. He paused, in a lull of the tempest that had driven him onward, and heard the swell of what seemed a hymn, rolling solemnly from a distance with the weight of many voices. He knew the tune, it was a familiar one in the choir of the village meeting-house. The verse died heavily away, and was lengthened by a chorus, not of human voices, but of all the sounds of the benighted wilderness pealing in awful harmony together. Goodman Brown cried out, and his cry was lost to his own ear by its unison with the cry of the desert.

In the interval of silence he stole forward until the light glared full upon his

eyes. At one extremity of an open space, hemmed in by the dark wall of the forest, arose a rock, bearing some rude, natural resemblance either to an altar or a pulpit, and surrounded by four blazing pines, their tops aflame, their stems untouched, like candles at an evening meeting. The mass of foliage that had overgrown the summit of the rock was all on fire, blazing high into the night and fitfully illuminating the whole field. Each pendent twig and leafy festoon was in a blaze. As the red light arose and fell, a numerous congregation alternately shone forth, then disappeared in shadow, and again grew, as it were, out of the darkness, peopling the heart of the solitary woods at once.

“A grave and dark-clad company,” quoth Goodman Brown.

In truth they were such. Among them, quivering to and fro between gloom and splendor, appeared faces that would be seen next day at the council board of the province, and others which, Sabbath after Sabbath, looked devoutly heavenward, and benignantly over the crowded pews, from the holiest pulpits in the land. Some affirm that the lady of the governor was there. At least there were high dames well known to her, and wives of honored husbands, and widows, a great multitude, and ancient maidens, all of excellent repute, and fair young girls, who trembled lest their mothers should espy them. Either the sudden gleams of light flashing over the obscure field bedazzled Goodman Brown, or he recognized a score of the church members of Salem village famous for their especial sanctity. Good old Deacon Gookin had arrived, and waited at the skirts of that venerable saint, his revered pastor. But, irreverently consorting with these grave, reputable, and pious people, these elders of the church, these chaste dames and dewy virgins, there were men of dissolute lives and women of spotted fame, wretches given over to all mean and filthy vice, and suspected even of horrid crimes. It was strange to see that the good shrank not from the wicked, nor were the sinners abashed by the saints.

Scattered also among their pale-faced enemies were the Indian priests, or powwows, who had often scared their native forest with more hideous incantations than any known to English witchcraft.

"But where is Faith?" thought Goodman Brown; and, as hope came into his heart, he trembled.

Another verse of the hymn arose, a slow and mournful strain, such as the pious love, but joined to words which expressed all that our nature can conceive of sin, and darkly hinted at far more. Unfathomable to mere mortals is the lore of fiends. Verse after verse was sung; and still the chorus of the desert swelled between like the deepest tone of a mighty organ; and with the final peal of that dreadful anthem there came a sound, as if the roaring wind, the rushing streams, the howling beasts, and every other voice of the unconcerted wilderness were mingling and according with the voice of guilty man in homage to the prince of all. The four blazing pines threw up a loftier flame, and obscurely discovered shapes and visages of horror on the smoke wreaths above the impious assembly. At the same moment the fire on the rock shot redly forth and formed a glowing arch above its base, where now appeared a figure. With reverence be it spoken, the figure bore no slight similitude, both in garb and manner, to some grave divine of the New England churches.

"Bring forth the converts!" cried a voice that echoed through the field and rolled into the forest.

At the word, Goodman Brown stepped forth from the shadow of the trees and approached the congregation, with whom he felt a loathful brotherhood by the sympathy of all that was wicked in his heart. He could have well-nigh sworn that the shape of his own dead father beckoned him to advance, looking downward from a smoke wreath, while a woman, with dim features of despair, threw out her hand to warn him back. Was it his mother? But he had no power to retreat one step, nor to resist, even in thought, when the minister

and good old Deacon Gookin seized his arms and led him to the blazing rock. Thither came also the slender form of a veiled female, led between Goody Cloyse, that pious teacher of the catechism, and Martha Carrier, who had received the devil's promise to be queen of hell.³ A rampant hag was she. And there stood the proselytes beneath the canopy of fire.

"Welcome, my children," said the dark figure, "to the communion of your race. Ye have found thus young your nature and your destiny. My children, look behind you!"

They turned; and flashing forth, as it were, in a sheet of flame, the fiend worshippers were seen, the smile of welcome gleamed darkly on every visage.

"There," resumed the sable form, "are all whom ye have revered from youth. Ye deemed them holier than yourselves and shrank from your own sin, contrasting it with their lives of righteousness and prayerful aspirations heavenward. Yet here are they all in my worshipping assembly. This night it shall be granted you to know their secret deeds, how hoary-bearded elders of the church have whispered wanton words to the young maids of their households; how many a woman, eager for widows' weeds, has given her husband a drink at bedtime and let him sleep his last sleep in her bosom, how beardless youths have made haste to inherit their fathers' wealth; and how fair damsels—blush not, sweet ones—have dug little graves in the garden, and bidden me, the sole guest, to an infant's funeral. By the sympathy of your human hearts for sin ye shall scent out all the places—whether in church, bedchamber, street, field, or forest—where crime has been committed, and shall exult to behold the whole earth one stain of guilt, one mighty blood spot. Far more than this. It shall be yours to penetrate, in every bosom,

³ Martha Carrier, Goody Cloyse, and Goody Cory were the names of witches sentenced to death by Hawthorne's great-grandfather in 1692.

the deep mystery of sin, the fountain of all wicked arts, and which inexhaustibly supplies more evil impulses than human power—than my power at its utmost—can make manifest in deeds. And now, my children, look upon each other”

They did so; and, by the blaze of the hell-kindled torches, the wretched man beheld his Faith, and the wife her husband, trembling before that unhallowed altar.

“Lo, there ye stand, my children,” said the figure, in a deep and solemn tone, almost sad with its despairing awfulness, as if his once angelic nature could yet mourn for our miserable race. “Depending upon one another’s hearts, ye had still hoped that virtue were not all a dream. Now are ye undeceived. Evil is the nature of mankind. Evil must be your only happiness. Welcome again, my children, to the communion of your race.”

“Welcome,” repeated the fiend worshippers, in one cry of despair and triumph.

And there they stood, the only pair, as it seemed, who were yet hesitating on the verge of wickedness in this dark world. A basin was hollowed, naturally, in the rock. Did it contain water, reddened by the lurid light? or was it blood? or, perchance, a liquid flame? Herein did the shape of evil dip his hand and prepare to lay the mark of baptism upon their foreheads, that they might be partakers of the mystery of sin, more conscious of the secret guilt of others, both in deed and thought, than they could now be of their own. The husband cast one look at his pale wife, and Faith at him. What polluted wretches would the next glance show them to each other, shuddering alike at what they disclosed and what they saw!

“Faith! Faith!” cried the husband, “look up to heaven, and resist the wicked one.”

Whether Faith obeyed he knew not. Hardly had he spoken when he found himself amid calm night and solitude, listening to a roar of the wind which died heavily away through the forest. He staggered against the rock, and felt it chill and damp; while a hanging twig, that had been all on

fire, besprinkled his cheek with the coldest dew.

The next morning young Goodman Brown came slowly into the street of Salem village, staring around him like a bewildered man. The good old minister was taking a walk along the graveyard to get an appetite for breakfast and meditate his sermon, and bestowed a blessing, as he passed, on Goodman Brown. He shrank from the venerable saint as if to avoid an anathema. Old Deacon Gookin was at domestic worship, and the holy words of his prayer were heard through the open window. “What God doth the wizard pray to?” quoth Goodman Brown. Goody Cloyse, that excellent old Christian, stood in the early sunshine at her own lattice, catechizing a little girl who had brought her a pint of morning’s milk. Goodman Brown snatched away the child as from the grasp of the fiend himself. Turning the corner by the meeting-house, he spied the head of Faith, with the pink ribbons, gazing anxiously forth, and bursting into such joy at sight of him that she skipped along the street and almost kissed her husband before the whole village. But Goodman Brown looked sternly and sadly into her face, and passed on without a greeting.

Had Goodman Brown fallen asleep in the forest and only dreamed a wild dream of a witch-meeting?

Be it so if you will; but, alas! it was a dream of evil omen for young Goodman Brown. A stern, a sad, a darkly meditative, a distrustful, if not a desperate man did he become from the night of that fearful dream. On the Sabbath day, when the congregation were singing a holy psalm, he could not listen because an anthem of sin rushed loudly upon his ear and drowned all the blessed strain. When the minister spoke from the pulpit with power and fervid eloquence, and, with his hand on the open Bible, of the sacred truths of our religion, and of saint-like lives and triumphant deaths, and of future bliss or misery unutterable, then did Goodman Brown turn pale, dreading lest the roof should thunder

down upon the gray blasphemer and his hearers. Often, awaking suddenly at midnight, he shrank from the bosom of Faith; and at morning or eventide, when the family knelt down at prayer, he scowled and muttered to himself, and gazed sternly at his wife, and turned away. And when he had lived long, and was borne to his grave a hoary corpse, followed by Faith, an aged woman, and children and grandchildren, a goodly procession, besides neighbors not a few, they carved no hopeful verse upon his tombstone, for his dying hour was gloom.

WAKEFIELD
[1837 (1835)]

IN some old magazine or newspaper I recollect a story, told as truth, of a man—let us call him Wakefield—who absented himself for a long time from his wife. The fact, thus abstractedly stated, is not very uncommon, nor—without a proper distinction of circumstances—to be condemned either as naughty or nonsensical. Howbeit, this, though far from the most aggravated, is perhaps the strangest, instance on record, of marital delinquency; and, moreover, as remarkable a freak as may be found in the whole list of human oddities. The wedded couple lived in London. The man, under pretence of going a journey, took lodgings in the next street to his own house, and there, unheard of by his wife or friends, and without the shadow of a reason for such self-banishment, dwelt upwards of twenty years. During that period, he beheld his home every day, and frequently the forlorn Mrs. Wakefield. And after so great a gap in his matrimonial felicity—when his death was reckoned certain, his estate settled, his name dismissed from memory, and his wife, long, long ago, resigned to her autumnal widowhood—he entered the door one evening, quietly, as from a day's absence, and became a loving spouse till death.

This outline is all that I remember. But the incident, though of the purest original-

ity, unexampled, and probably never to be repeated, is one, I think, which appeals to the generous sympathies of mankind. We know, each for himself, that none of us would perpetrate such a folly, yet feel as if some other might. To my own contemplations, at least, it has often recurred, always exciting wonder, but with a sense that the story must be true, and a conception of its hero's character. Whenever any subject so forcibly affects the mind, time is well spent in thinking of it. If the reader choose, let him do his own meditation; or if he prefer to ramble with me through the twenty years of Wakefield's vagary, I bid him welcome; trusting that there will be a pervading spirit and a moral, even should we fail to find them, done up neatly, and condensed into the final sentence. Thought has always its efficacy, and every striking incident its moral.

What sort of a man was Wakefield? We are free to shape out our own idea, and call it by his name. He was now in the meridian of life, his matrimonial affections, never violent, were sobered into a calm, habitual sentiment; of all husbands, he was likely to be the most constant, because a certain sluggishness would keep his heart at rest, wherever it might be placed. He was intellectual, but not actively so: his mind occupied itself in long and lazy musings, that ended to no purpose, or had not vigor to attain it; his thoughts were seldom so energetic as to seize hold of words. Imagination, in the proper meaning of the term, made no part of Wakefield's gifts. With a cold but not depraved nor wandering heart, and a mind never feverish with riotous thoughts, nor perplexed with originality, who could have anticipated that our friend would entitle himself to a foremost place among the doers of eccentric deeds? Had his acquaintances been asked, who was the man in London the surest to perform nothing to-day which should be remembered on the morrow, they would have thought of Wakefield. Only the wife of his bosom might have hesitated. She, without having ana-

lyzed his character, was partly aware of a quiet selfishness, that had rusted into his inactive mind; of a peculiar sort of vanity, the most uneasy attribute about him; of a disposition to craft, which had seldom produced more positive effects than the keeping of petty secrets, hardly worth revealing; and, lastly, of what she called a little strangeness, sometimes, in the good man. This latter quality is indefinable, and perhaps non-existent.

Let us now imagine Wakefield bidding adieu to his wife. It is the dusk of an October evening. His equipment is a drab great-coat, a hat covered with an oilcloth, top-boots, an umbrella in one hand and a small portmanteau in the other. He has informed Mrs. Wakefield that he is to take the night coach into the country. She would fain inquire the length of his journey, its object, and the probable time of his return; but, indulgent to his harmless love of mystery, interrogates him only by a look. He tells her not to expect him positively by the return coach, nor to be alarmed should he tarry three or four days; but, at all events, to look for him at supper on Friday evening. Wakefield himself, be it considered, has no suspicion of what is before him. He holds out his hand, she gives her own, and meets his parting kiss in the matter-of-course way of a ten years' matrimony, and forth goes the middle-aged Mr. Wakefield, almost resolved to perplex his good lady by a whole week's absence. After the door has closed behind him, she perceives it thrust partly open, and a vision of her husband's face, through the aperture, smiling on her, and gone in a moment. For the time, this little incident is dismissed without a thought. But, long afterwards, when she has been more years a widow than a wife, that smile recurs, and flickers across all her reminiscences of Wakefield's visage. In her many musings, she surrounds the original smile with a multitude of fantasies, which make it strange and awful: as, for instance, if she imagines him in a coffin, that parting look is frozen on his pale features; or, if she

dreams of him in heaven, still his blessed spirit wears a quiet and crafty smile. Yet, for its sake, when all others have given him up for dead, she sometimes doubts whether she is a widow.

But our business is with the husband. We must hurry after him along the street, ere he lose his individuality, and melt into the great mass of London life. It would be vain searching for him there. Let us follow close at his heels, therefore, until, after several superfluous turns and doublings, we find him comfortably established by the fireside of a small apartment, previously bespoken. He is in the next street to his own, and at his journey's end. He can scarcely trust his good fortune, in having got thither unperceived—recollecting that, at one time, he was delayed by the throng, in the very focus of a lighted lantern; and, again, there were footsteps that seemed to tread behind his own, distinct from the multitudinous tramp around him; and, anon, he heard a voice shouting afar, and fancied that it called his name. Doubtless, a dozen busybodies had been watching him, and told his wife the whole affair. Poor Wakefield! Little knowest thou thine own insignificance in this great world! No mortal eye but mine has traced thee. Go quietly to thy bed, foolish man, and, on the morrow, if thou wilt be wise, get thee home to good Mrs. Wakefield, and tell her the truth. Remove not thyself, even for a little week, from thy place in her chaste bosom. Were she, for a single moment, to deem thee dead, or lost, or lastingly divided from her, thou wouldst be wofully conscious of a change in thy true wife forever after. It is perilous to make a chasm in human affections; not that they gape so long and wide—but so quickly close again!

Almost repenting of his frolic, or whatever it may be termed, Wakefield lies down betimes, and starting from his first nap, spreads forth his arms into the wide and solitary waste of the unaccustomed bed. "No,"—thinks he, gathering the bedclothes about him,—"I will not sleep alone another night."

In the morning he rises earlier than usual, and sets himself to consider what he really means to do. Such are his loose and rambling modes of thought that he has taken this very singular step with the consciousness of a purpose, indeed, but without being able to define it sufficiently for his own contemplation. The vagueness of the project, and the convulsive effort with which he plunges into the execution of it, are equally characteristic of a feeble-minded man. Wakefield sifts his ideas, however, as minutely as he may, and finds himself curious to know the progress of matters at home—how his exemplary wife will endure her widowhood of a week, and, briefly, how the little sphere of creatures and circumstances, in which he was a central object, will be affected by his removal. A morbid vanity, therefore, lies nearest the bottom of the affair. But, how is he to attain his ends? Not, certainly, by keeping close in this comfortable lodging, where, though he slept and awoke in the next street to his home, he is as effectually abroad as if the stagecoach had been whirling him away all night. Yet, should he reappear, the whole project is knocked in the head. His poor brains being hopelessly puzzled with this dilemma, he at length ventures out, partly resolving to cross the head of the street, and send one hasty glance towards his forsaken domicile. Habit—for he is a man of habits—takes him by the hand, and guides him, wholly unaware, to his own door, where, just at the critical moment, he is aroused by the scraping of his foot upon the step. Wakefield! whither are you going?

At that instant his fate was turning on the pivot. Little dreaming of the doom to which his first backward step devotes him, he hurries away, breathless with agitation hitherto unfelt, and hardly dares turn his head at the distant corner. Can it be that nobody caught sight of him? Will not the whole household—the decent Mrs. Wakefield, the smart maid servant, and the dirty little footboy—raise a hue and cry, through London streets, in pursuit of their fugitive

lord and master? Wonderful escape! He gathers courage to pause and look homeward, but is perplexed with a sense of change about the familiar edifice, such as affects us all, when, after a separation of months or years, we again see some hill or lake, or work of art, with which we were friends of old. In ordinary cases, this indescribable impression is caused by the comparison and contrast between our imperfect reminiscences and the reality. In Wakefield, the magic of a single night has wrought a similar transformation, because, in that brief period, a great moral change has been effected. But this is a secret from himself. Before leaving the spot, he catches a far and momentary glimpse of his wife, passing athwart the front window, with her face turned towards the head of the street. The crafty nincompoop takes to his heels, scared with the idea that, among a thousand such atoms of mortality, her eye must have detected him. Right glad is his heart, though his brain be somewhat dizzy, when he finds himself by the coal fire of his lodgings.

So much for the commencement of this long whimwham. After the initial conception, and the stirring up of the man's sluggish temperament to put it in practice, the whole matter evolves itself in a natural train. We may suppose him, as the result of deep deliberation, buying a new wig, of reddish hair, and selecting sundry garments, in a fashion unlike his customary suit of brown, from a Jew's old-clothes bag. It is accomplished. Wakefield is another man. The new system being now established, a retrograde movement to the old would be almost as difficult as the step that placed him in his unparalleled position. Furthermore, he is rendered obstinate by a sulkiness occasionally incident to his temper, and brought on at present by the inadequate sensation which he conceives to have been produced in the bosom of Mrs. Wakefield. He will not go back until she be frightened half to death. Well; twice or thrice has she passed before his sight, each time with a heavier step, a paler cheek,

and more anxious brow, and in the third week of his non-appearance he detects a portent of evil entering the house, in the guise of an apothecary. Next day the knocker is muffled. Towards nightfall comes the chariot of a physician, and deposits its big-wigged and solemn burden at Wakefield's door, whence, after a quarter of an hour's visit, he emerges, perchance the herald of a funeral. Dear woman! Will she die? By this time, Wakefield is excited to something like energy of feeling, but still lingers away from his wife's bedside, pleading with his conscience that she must not be disturbed at such a juncture. If aught else restrains him, he does not know it. In the course of a few weeks she gradually recovers; the crisis is over; her heart is sad, perhaps, but quiet, and, let him return soon or late, it will never be feverish for him again. Such ideas glimmer through the mist of Wakefield's mind, and render him indistinctly conscious that an almost impassable gulf divides his hired apartment from his former home. "It is but in the next street!" he sometimes says. Fool! it is in another world. Hitherto, he has put off his return from one particular day to another; henceforward, he leaves the precise time undetermined. Not tomorrow—probably next week—pretty soon. Poor man! The dead have nearly as much chance of revisiting their earthly homes as the self-banished Wakefield.

Would that I had a folio to write, instead of an article of a dozen pages! Then might I exemplify how an influence beyond our control lays its strong hand on every deed which we do, and weaves its consequences into an iron tissue of necessity. Wakefield is spell-bound. We must leave him, for ten years or so, to haunt around his house, without once crossing the threshold, and to be faithful to his wife, with all the affection of which his heart is capable, while he is slowly fading out of hers. Long since, it must be remarked, he had lost the perception of singularity in his conduct.

Now for a scene! Amid the throng of a London street we distinguish a man, now

waxing elderly, with few characteristics to attract careless observers, yet bearing, in his whole aspect, the handwriting of no common fate, for such as have the skill to read it. He is meagre; his low and narrow forehead is deeply wrinkled; his eyes, small and lustreless, sometimes wander apprehensively about him, but oftener seem to look inward. He bends his head, and moves with an indescribable obliquity of gait, as if unwilling to display his full front to the world. Watch him long enough to see what we have described, and you will allow that circumstances—which often produce remarkable men from nature's ordinary handiwork—have produced one such here. Next, leaving him to sidle along the footwalk, cast your eyes in the opposite direction, where a portly female, considerably in the wane of life, with a prayer-book in her hand, is proceeding to yonder church. She has the placid mien of settled widowhood. Her regrets have either died away, or have become so essential to her heart, that they would be poorly exchanged for joy. Just as the lean man and well-conditioned woman are passing, a slight obstruction occurs, and brings these two figures directly in contact. Their hands touch; the pressure of the crowd forces her bosom against his shoulder, they stand, face to face, staring into each other's eyes. After a ten years' separation, thus Wakefield meets his wife!

The throng eddies away, and carries them asunder. The sober widow, resuming her former pace, proceeds to church, but pauses in the portal, and throws a perplexed glance along the street. She passes in, however, opening her prayer-book as she goes. And the man! with so wild a face that busy and selfish London stands to gaze after him, he hurries to his lodgings, bolts the door, and throws himself upon the bed. The latent feelings of years break out; his feeble mind acquires a brief energy from their strength; all the miserable strangeness of his life is revealed to him at a glance: and he cries out, passionately, "Wakefield! Wakefield! You are mad!"

Perhaps he was so. The singularity of his situation must have so moulded him to himself, that, considered in regard to his fellow-creatures and the business of life, he could not be said to possess his right mind. He had contrived, or rather he had happened, to dis sever himself from the world—to vanish—to give up his place and privileges with living men, without being admitted among the dead. The life of a hermit is nowise parallel to his. He was in the bustle of the city, as of old; but the crowd swept by and saw him not; he was, we may figuratively say, always beside his wife and at his hearth, yet must never feel the warmth of the one nor the affection of the other. It was Wakefield's unprecedented fate to retain his original share of human sympathies, and to be still involved in human interests, while he had lost his reciprocal influence on them. It would be a most curious speculation to trace out the effect of such circumstances on his heart and intellect, separately, and in unison. Yet, changed as he was, he would seldom be conscious of it, but deem himself the same man as ever; glimpses of the truth, indeed, would come, but only for the moment, and still he would keep saying, "I shall soon go back!"—nor reflect that he had been saying so for twenty years.

I conceive, also, that these twenty years would appear, in the retrospect, scarcely longer than the week to which Wakefield had at first limited his absence. He would look on the affair as no more than an interlude in the main business of his life. When, after a little while more, he should deem it time to reënter his parlor, his wife would clap her hands for joy, on beholding the middle-aged Mr. Wakefield. Alas, what a mistake! Would Time but await the close of our favorite follies, we should be young men, all of us, and till Doomsday.

One evening, in the twentieth year since he vanished, Wakefield is taking his customary walk towards the dwelling which he still calls his own. It is a gusty night of autumn, with frequent showers that patter down upon the pavement, and are gone

before a man can put up his umbrella. Pausing near the house, Wakefield discerns, through the parlor windows of the second floor, the red glow and the glimmer and fitful flash of a comfortable fire. On the ceiling appears a grotesque shadow of good Mrs. Wakefield. The cap, the nose and chin, and the broad waist, form an admirable caricature, which dances, moreover, with the up-flickering and down-sinking blaze, almost too merrily for the shade of an elderly widow. At this instant a shower chances to fall, and is driven, by the unmannerly gust, full into Wakefield's face and bosom. He is quite penetrated with its autumnal chill. Shall he stand, wet and shivering here, when his own hearth has a good fire to warm him, and his own wife will run to fetch the gray coat and small-clothes, which, doubtless, she has kept carefully in the closet of their bed chamber? No! Wakefield is no such fool. He ascends the steps—heavily!—for twenty years have stiffened his legs since he came down—but he knows it not. Stay, Wakefield! Would you go to the sole home that is left you? Then step into your grave! The door opens. As he passes in, we have a parting glimpse of his visage, and recognize the crafty smile, which was the precursor of the little joke that he has ever since been playing off at his wife's expense. How unmercifully has he quizzed the poor woman! Well, a good night's rest to Wakefield!

This happy event—supposing it to be such—could only have occurred at an unpremeditated moment. We will not follow our friend across the threshold. He has left us much food for thought, a portion of which shall lend its wisdom to a moral, and be shaped into a figure. Amid the seeming confusion of our mysterious world, individuals are so nicely adjusted to a system, and systems to one another and to a whole, that, by stepping aside for a moment, a man exposes himself to a fearful risk of losing his place forever. Like Wakefield, he may become, as it were, the Outcast of the Universe.

THE MINISTER'S BLACK VEIL

A Parable
[1837 (1835)]

Another clergyman in New England, Mr. Joseph Moody, of York, Maine, who died about eighty years since, made himself remarkable by the same eccentricity that is here related of the Reverend Mr. Hooper. In his case, however, the symbol had a different import. In early life he had accidentally killed a beloved friend; and from that day till the hour of his own death, he hid his face from men.—Hawthorne's note.

THE SEXTON stood in the porch of Milford meeting-house, pulling busily at the bell-rope. The old people of the village came stooping along the street. Children, with bright faces, tripped merrily beside their parents, or mimicked a graver gait, in the conscious dignity of their Sunday clothes. Spruce bachelors looked sidelong at the pretty maidens, and fancied that the Sabbath sunshine made them prettier than on week days. When the throng had mostly streamed into the porch, the sexton began to toll the bell, keeping his eye on the Reverend Mr. Hooper's door. The first glimpse of the clergyman's figure was the signal for the bell to cease its summons.

"But what has good Parson Hooper got upon his face?" cried the sexton in astonishment.

All within hearing immediately turned about, and beheld the semblance of Mr. Hooper, pacing slowly his meditative way towards the meeting-house. With one accord they started, expressing more wonder than if some strange minister were coming to dust the cushions of Mr. Hooper's pulpit.

"Are you sure it is our parson?" inquired Goodman Gray of the sexton.

"Of a certainty it is good Mr. Hooper," replied the sexton. "He was to have exchanged pulpits with Parson Shute, of Westbury; but Parson Shute sent to excuse himself yesterday, being to preach a funeral sermon."

The cause of so much amazement may

appear sufficiently slight. Mr. Hooper, a gentlemanly person, of about thirty, though still a bachelor, was dressed with due clerical neatness, as if a careful wife had starched his band, and brushed the weekly dust from his Sunday's garb. There was but one thing remarkable in his appearance. Swathed about his forehead, and hanging down over his face, so low as to be shaken by his breath, Mr. Hooper had on a black veil. On a nearer view it seemed to consist of two folds of crape, which entirely concealed his features, except the mouth and chin, but probably did not intercept his sight, further than to give a darkened aspect to all living and inanimate things. With this gloomy shade before him, good Mr. Hooper walked onward, at a slow and quiet pace, stooping somewhat, and looking on the ground, as is customary with abstracted men, yet nodding kindly to those of his parishioners who still waited on the meeting-house steps. But so wonder-struck were they that his greeting hardly met with a return.

"I can't really feel as if good Mr. Hooper's face was behind that piece of crape," said the sexton.

"I don't like it," muttered an old woman, as she hobbled into the meeting-house. "He has changed himself into something awful, only by hiding his face."

"Our parson has gone mad!" cried Goodman Gray, following him across the threshold.

A rumor of some unaccountable phenomenon had preceded Mr. Hooper into the meeting-house, and set all the congregation astir. Few could refrain from twisting their heads towards the door; many stood upright, and turned directly about; while several little boys clambered upon the seats, and came down again with a terrible racket. There was a general bustle, a rustling of the women's gowns and shuffling of the men's feet, greatly at variance with that hushed repose which should attend the entrance of the minister. But Mr. Hooper appeared not to notice the perturbation of his people. He entered with an almost

noiseless step, bent his head mildly to the pews on each side, and bowed as he passed his oldest parishioner, a white-haired great-grandson, who occupied an arm-chair in the centre of the aisle. It was strange to observe how slowly this venerable man became conscious of something singular in the appearance of his pastor. He seemed not fully to partake of the prevailing wonder, till Mr. Hooper had ascended the stairs, and showed himself in the pulpit, face to face with his congregation, except for the black veil. That mysterious emblem was never once withdrawn. It shook with his measured breath, as he gave out the psalm; it threw its obscurity between him and the holy page, as he read the Scriptures; and while he prayed, the veil lay heavily on his uplifted countenance. Did he seek to hide it from the dread Being whom he was addressing?

Such was the effect of this simple piece of crape, that more than one woman of delicate nerves was forced to leave the meeting-house. Yet perhaps the pale-faced congregation was almost as fearful a sight to the minister, as his black veil to them.

Mr. Hooper had the reputation of a good preacher, but not an energetic one: he strove to win his people heavenward by mild, persuasive influences, rather than to drive them thither by the thunders of the Word. The sermon which he now delivered was marked by the same characteristics of style and manner as the general series of his pulpit oratory. But there was something, either in the sentiment of the discourse itself, or in the imagination of the auditors, which made it greatly the most powerful effort that they had ever heard from their pastor's lips. It was tinged, rather more darkly than usual, with the gentle gloom of Mr. Hooper's temperament. The subject had reference to secret sin, and those sad mysteries which we hide from our nearest and dearest, and would fain conceal from our own consciousness, even forgetting that the Omniscient can detect them. A subtle power was breathed into his words. Each member of the con-

gregation, the most innocent girl, and the man of hardened breast, felt as if the preacher had crept upon them, behind his awful veil, and discovered their hoarded iniquity of deed or thought. Many spread their clasped hands on their bosoms. There was nothing terrible in what Mr. Hooper said, at least, no violence, and yet, with every tremor of his melancholy voice, the hearers quaked. An unsought pathos came hand in hand with awe. So sensible were the audience of some unwonted attribute in their minister, that they longed for a breath of wind to blow aside the veil, almost believing that a stranger's visage would be discovered, though the form, gesture, and voice were those of Mr. Hooper.

At the close of the services, the people hurried out with indecorous confusion, eager to communicate their pent-up amazement, and conscious of lighter spirits the moment they lost sight of the black veil. Some gathered in little circles, huddled closely together, with their mouths all whispering in the centre; some went homeward alone, wrapt in silent meditation, some talked loudly, and profaned the Sabbath day with ostentatious laughter. A few shook their sagacious heads, intimating that they could penetrate the mystery; while one or two affirmed that there was no mystery at all, but only that Mr. Hooper's eyes were so weakened by the midnight lamp, as to require a shade. After a brief interval, forth came good Mr. Hooper also, in the rear of his flock. Turning his veiled face from one group to another, he paid due reverence to the hoary heads, saluted the middle aged with kind dignity as their friend and spiritual guide, greeted the young with mingled authority and love, and laid his hands on the little children's heads to bless them. Such was always his custom on the Sabbath day. Strange and bewildered looks repaid him for his courtesy. None, as on former occasions, aspired to the honor of walking by their pastor's side. Old Squire Saunders, doubtless by an accidental lapse of memory, neglected to

invite Mr. Hooper to his table, where the good clergyman had been wont to bless the food, almost every Sunday since his settlement. He returned, therefore, to the parsonage, and, at the moment of closing the door, was observed to look back upon the people, all of whom had their eyes fixed upon the minister. A sad smile gleamed faintly from beneath the black veil, and flickered about his mouth, glimmering as he disappeared.

"How strange," said a lady, "that a simple black veil, such as any woman might wear on her bonnet, should become such a terrible thing on Mr. Hooper's face!"

"Something must surely be amiss with Mr. Hooper's intellects," observed her husband, the physician of the village. "But the strangest part of the affair is the effect of this vagary, even on a sober-minded man like myself. The black veil, though it covers only our pastor's face, throws its influence over his whole person, and makes him ghostlike from head to foot. Do you not feel it so?"

"Truly do I," replied the lady; "and I would not be alone with him for the world. I wonder he is not afraid to be alone with himself!"

"Men sometimes are so," said her husband.

The afternoon service was attended with similar circumstances. At its conclusion, the bell tolled for the funeral of a young lady. The relatives and friends were assembled in the house, and the more distant acquaintances stood about the door, speaking of the good qualities of the deceased, when their talk was interrupted by the appearance of Mr. Hooper, still covered with his black veil. It was now an appropriate emblem. The clergyman stepped into the room where the corpse was laid, and bent over the coffin, to take a last farewell of his deceased parishioner. As he stooped, the veil hung straight down from his forehead, so that, if her eyelids had not been closed forever, the dead maiden might have seen his face. Could Mr. Hooper be fearful of her glance, that he so hastily caught

back the black veil? A person who watched the interview between the dead and living, scrupled not to affirm, that, at the instant when the clergyman's features were disclosed, the corpse had slightly shuddered, rustling the shroud and muslin cap, though the countenance retained the composure of death. A superstitious old woman was the only witness of this prodigy. From the coffin Mr. Hooper passed into the chamber of the mourners, and thence to the head of the staircase, to make the funeral prayer. It was a tender and heart-dissolving prayer, full of sorrow, yet so imbued with celestial hopes, that the music of a heavenly harp, swept by the fingers of the dead, seemed faintly to be heard among the saddest accents of the minister. The people trembled, though they but darkly understood him when he prayed that they, and himself, and all of mortal race, might be ready, as he trusted this young maiden had been, for the dreadful hour that should snatch the veil from their faces. The bearers went heavily forth, and the mourners followed, saddening all the street, with the dead before them, and Mr. Hooper in his black veil behind.

"Why do you look back?" said one in the procession to his partner.

"I had a fancy," replied she, "that the minister and the maiden's spirit were walking hand in hand."

"And so had I, at the same moment," said the other.

That night, the handsomest couple in Milford village were to be joined in wedlock. Though reckoned a melancholy man, Mr. Hooper had a placid cheerfulness for such occasions, which often excited a sympathetic smile where livelier merriment would have been thrown away. There was no quality of his disposition which made him more beloved than this. The company at the wedding awaited his arrival with impatience, trusting that the strange awe, which had gathered over him throughout the day, would now be dispelled. But such was not the result. When Mr. Hooper came, the first thing that their eyes rested on was

the same horrible black veil, which had added deeper gloom to the funeral, and could portend nothing but evil to the wedding. Such was its immediate effect on the guests that a cloud seemed to have rolled duskily from beneath the black crape, and dimmed the light of the candles. The bridal pair stood up before the minister. But the bride's cold fingers quivered in the tremulous hand of the bridegroom, and her deathlike paleness caused a whisper that the maiden who had been buried a few hours before was come from her grave to be married. If ever another wedding were so dismal, it was that famous one where they tolled the wedding knell.¹ After performing the ceremony, Mr. Hooper raised a glass of wine to his lips, wishing happiness to the new-married couple in a strain of mild pleasantry that ought to have brightened the features of the guests, like a cheerful gleam from the hearth. At that instant, catching a glimpse of his figure in the looking-glass, the black veil involved his own spirit in the horror with which it overwhelmed all others. His frame shuddered, his lips grew white, he spilt the untasted wine upon the carpet, and rushed forth into the darkness. For the Earth, too, had on her Black Veil.

The next day, the whole village of Milford talked of little else than Parson Hooper's black veil. That, and the mystery concealed behind it, supplied a topic for discussion between acquaintances meeting in the street, and good women gossiping at their open windows. It was the first item of news that the tavern-keeper told to his guests. The children babbled of it on their way to school. One imitative little imp covered his face with an old black handkerchief, thereby so affrighting his playmates that the pame seized himself, and he well-nigh lost his wits by his own waggyery.

It was remarkable that of all the busybodies and impertinent people in the parish, not one ventured to put the plain question to Mr. Hooper, wherefore he did this thing. Hitherto, whenever there appeared

the slightest call for such interference, he had never lacked advisers, nor shown himself averse to be guided by their judgment. If he erred at all, it was by so painful a degree of self-distrust, that even the mildest censure would lead him to consider an indifferent action as a crime. Yet, though so well acquainted with this amiable weakness, no individual among his parishioners chose to make the black veil a subject of friendly remonstrance. There was a feeling of dread, neither plainly confessed nor carefully concealed, which caused each to shift the responsibility upon another, till at length it was found expedient to send a deputation of the church, in order to deal with Mr. Hooper about the mystery, before it should grow into a scandal. Never did an embassy so ill discharge its duties. The minister received them with friendly courtesy, but became silent, after they were seated, leaving to his visitors the whole burden of introducing their important business. The topic, it might be supposed, was obvious enough. There was the black veil swathed round Mr. Hooper's forehead, and concealing every feature above his placid mouth, on which, at times, they could perceive the glimmering of a melancholy smile. But that piece of crape, to their imagination, seemed to hang down before his heart, the symbol of a fearful secret between him and them. Were the veil but cast aside, they might speak freely of it, but not till then. Thus they sat a considerable time, speechless, confused, and shrinking uneasily from Mr. Hooper's eye, which they felt to be fixed upon them with an invisible glance. Finally, the deputies returned abashed to their constituents, pronouncing the matter too weighty to be handled, except by a council of the churches, if, indeed, it might not require a general synod.

But there was one person in the village unappalled by the awe with which the black veil had impressed all beside herself. When the deputies returned without an explana-

¹ The reference is to an incident in another of Hawthorne's *Twice-Told Tales*, "The Wedding Knell."

tion, or even venturing to demand one, she, with the calm energy of her character, determined to chase away the strange cloud that appeared to be settling round Mr. Hooper, every moment more darkly than before. As his plighted wife, it should be her privilege to know what the black veil concealed. At the minister's first visit, therefore, she entered upon the subject with a direct simplicity, which made the task easier both for him and her. After he had seated himself, she fixed her eyes steadfastly upon the veil, but could discern nothing of the dreadful gloom that had so overawed the multitude: it was but a double fold of crape, hanging down from his forehead to his mouth, and slightly stirring with his breath.

"No," said she aloud, and smiling, "there is nothing terrible in this piece of crape, except that it hides a face which I am always glad to look upon. Come, good sir, let the sun shine from behind the cloud. First lay aside your black veil: then tell me why you put it on."

Mr. Hooper's smile glimmered faintly.

"There is an hour to come," said he, "when all of us shall cast aside our veils. Take it not amiss, beloved friend, if I wear this piece of crape till then."

"Your words are a mystery, too," returned the young lady. "Take away the veil from them, at least."

"Elizabeth, I will," said he, "so far as my vow may suffer me. Know, then, this veil is a type and a symbol, and I am bound to wear it ever, both in light and darkness, in solitude and before the gaze of multitudes, and as with strangers, so with my familiar friends. No mortal eye will see it withdrawn. This dismal shade must separate me from the world: even you, Elizabeth, can never come behind it!"

"What grievous affliction hath befallen you," she earnestly inquired, "that you should thus darken your eyes forever?"

"If it be a sign of mourning," replied Mr. Hooper, "I, perhaps, like most other mortals, have sorrows dark enough to be typified by a black veil."

"But what if the world will not believe that it is the type of an innocent sorrow?" urged Elizabeth. "Beloved and respected as you are, there may be whispers that you hide your face under the consciousness of secret sin. For the sake of your holy office, do away this scandal!"

The color rose into her cheeks as she intimated the nature of the rumors that were already abroad in the village. But Mr. Hooper's mildness did not forsake him. He even smiled again—that same sad smile, which always appeared like a faint glimmering of light, proceeding from the obscurity beneath the veil.

"If I hide my face for sorrow, there is cause enough," he merely replied; "and if I cover it for secret sin, what mortal might not do the same?"

And with this gentle, but unconquerable obstinacy did he resist all her entreaties. At length Elizabeth sat silent. For a few moments she appeared lost in thought, considering, probably, what new methods might be tried to withdraw her lover from so dark a fantasy, which, if it had no other meaning, was perhaps a symptom of mental disease. Though of a firmer character than his own, the tears rolled down her cheeks. But, in an instant, as it were, a new feeling took the place of sorrow: her eyes were fixed insensibly on the black veil, when, like a sudden twilight in the air, its terrors fell around her. She arose, and stood trembling before him.

"And do you feel it then, at last?" said he mournfully.

She made no reply, but covered her eyes with her hand, and turned to leave the room. He rushed forward and caught her arm.

"Have patience with me, Elizabeth!" cried he, passionately. "Do not desert me, though this veil must be between us here on earth. Be mine, and hereafter there shall be no veil over my face, no darkness between our souls! It is but a mortal veil—it is not for eternity! O! you know not how lonely I am, and how frightened, to be alone behind my black veil. Do not leave

me in this miserable obscurity forever!"

"Lift the veil but once, and look me in the face," said she.

"Never! It cannot be!" replied Mr. Hooper.

"Then farewell!" said Elizabeth.

She withdrew her arm from his grasp, and slowly departed, pausing at the door, to give one long shuddering gaze, that seemed almost to penetrate the mystery of the black veil. But, even amid his grief, Mr. Hooper smiled to think that only a material emblem had separated him from happiness, though the horrors, which it shadowed forth, must be drawn darkly between the fondest of lovers.

From that time no attempts were made to remove Mr. Hooper's black veil, or, by a direct appeal, to discover the secret which it was supposed to hide. By persons who claimed a superiority to popular prejudice, it was reckoned merely an eccentric whim, such as often mingles with the sober actions of men otherwise rational, and tinges them all with its own semblance of insanity. But with the multitude, good Mr. Hooper was irreparably a bugbear. He could not walk the street with any peace of mind, so conscious was he that the gentle and timid would turn aside to avoid him, and that others would make it a point of hardness to throw themselves in his way. The impertinence of the latter class compelled him to give up his customary walk at sunset to the burial ground; for when he leaned pensively over the gate, there would always be faces behind the gravestones, peeping at his black veil. A fable went the rounds that the stare of the dead people drove him thence. It grieved him, to the very depth of his kind heart, to observe how the children fled from his approach, breaking up their merriest sports, while his melancholy figure was yet afar off. Their instinctive dread caused him to feel more strongly than aught else, that a preternatural horror was interwoven with the threads of the black crape. In truth, his own antipathy to the veil was known to be so great, that he

never willingly passed before a mirror, nor stooped to drink at a still fountain, lest, in its peaceful bosom, he should be affrighted by himself. This was what gave plausibility to the whispers, that Mr. Hooper's conscience tortured him for some great crime too horrible to be entirely concealed, or otherwise than so obscurely intimated. Thus, from beneath the black veil, there rolled a cloud into the sunshine, an ambiguity of sin or sorrow, which enveloped the poor minister, so that love or sympathy could never reach him. It was said that ghost and fiend consorted with him there. With self-shudderings and outward terrors, he walked continually in its shadow, groping darkly within his own soul, or gazing through a medium that saddened the whole world. Even the lawless wind, it was believed, respected his dreadful secret, and never blew aside the veil. But still good Mr. Hooper sadly smiled at the pale visages of the worldly throng as he passed by.

Among all its bad influences, the black veil had the one desirable effect, of making its wearer a very efficient clergyman. By the aid of his mysterious emblem—for there was no other apparent cause—he became a man of awful power over souls that were in agony for sin. His converts always regarded him with a dread peculiar to themselves, affirming, though but figuratively, that, before he brought them to celestial light, they had been with him behind the black veil. Its gloom, indeed, enabled him to sympathize with all dark affections. Dying sinners cried aloud for Mr. Hooper, and would not yield their breath till he appeared; though ever, as he stooped to whisper consolation, they shuddered at the veiled face so near their own. Such were the terrors of the black veil, even when Death had bared his visage! Strangers came long distances to attend service at his church, with the mere idle purpose of gazing at his figure, because it was forbidden them to behold his face. But many were made to quake ere they departed!

Once, during Governor Belcher's administration,² Mr. Hooper was appointed to preach the election sermon. Covered with his black veil, he stood before the chief magistrate, the council, and the representatives, and wrought so deep an impression, that the legislative measures of that year were characterized by all the gloom and piety of our earliest ancestral sway.

In this manner Mr. Hooper spent a long life, irreproachable in outward act, yet shrouded in dismal suspicions; kind and loving, though unloved, and dimly feared; a man apart from men, shunned in their health and joy, but ever summoned to their aid in mortal anguish. As years wore on, shedding their snows above his sable veil, he acquired a name throughout the New England churches, and they called him Father Hooper. Nearly all his parishioners, who were of mature age when he was settled, had been borne away by many a funeral. he had one congregation in the church, and a more crowded one in the churchyard; and having wrought so late into the evening, and done his work so well, it was now good Father Hooper's turn to rest.

Several persons were visible by the shaded candle-light, in the death chamber of the old clergyman. Natural connections he had none. But there was the decorously grave, though unmoved physician, seeking only to mitigate the last pangs of the patient whom he could not save. There were the deacons, and other eminently pious members of his church. There, also, was the Reverend Mr. Clark, of Westbury, a young and zealous divine, who had ridden in haste to pray by the bedside of the expiring minister. There was the nurse, no hired handmaiden of death, but one whose calm affection had endured thus long in secrecy, in solitude, amid the chill of age, and would not perish, even at the dying hour. Who, but Elizabeth! And there lay the hoary head of good Father Hooper upon the death pillow, with the black veil

still swathed about his brow, and reaching down over his face, so that each more difficult gasp of his faint breath caused it to stir. All through life that piece of crape had hung between him and the world: it had separated him from cheerful brotherhood and woman's love, and kept him in that saddest of all prisons, his own heart; and still it lay upon his face, as if to deepen the gloom of his darksome chamber, and shade him from the sunshine of eternity.

For some time previous, his mind had been confused, wavering doubtfully between the past and the present, and hovering forward, as it were, at intervals, into the indistinctness of the world to come. There had been feverish turns, which tossed him from side to side, and wore away what little strength he had. But in his most convulsive struggles, and in the wildest vagaries of his intellect, when no other thought retained its sober influence, he still showed an awful solicitude lest the black veil should slip aside. Even if his bewildered soul could have forgotten, there was a faithful woman at his pillow, who, with averted eyes, would have covered that aged face, which she had last beheld in the comeliness of manhood. At length the death-stricken old man lay quietly in the torpor of mental and bodily exhaustion, with an imperceptible pulse, and breath that grew fainter and fainter, except when a long, deep, and irregular inspiration seemed to prelude the flight of his spirit.

The minister of Westbury approached the bedside.

"Venerable Father Hooper," said he, "the moment of your release is at hand. Are you ready for the lifting of the veil that shuts in time from eternity?"

Father Hooper at first replied merely by a feeble motion of his head; then, apprehensive, perhaps, that his meaning might be doubtful, he exerted himself to speak.

"Yea," said he, in faint accents, "my

² Jonathan Belcher (1681-1757) was governor of Massachusetts and New Hampshire 1730-41.

soul hath a patient weariness until that veil be lifted."

"And is it fitting," resumed the Reverend Mr. Clark, "that a man so given to prayer, of such a blameless example, holy in deed and thought, so far as mortal judgment may pronounce; is it fitting that a father in the church should leave a shadow on his memory, that may seem to blacken a life so pure? I pray you, my venerable brother, let not this thing be! Suffer us to be gladdened by your triumphant aspect as you go to your reward. Before the veil of eternity be lifted, let me cast aside this black veil from your face!"

And thus speaking, the Reverend Mr. Clark bent forward to reveal the mystery of so many years. But, exerting a sudden energy, that made all the beholders stand aghast, Father Hooper snatched both his hands from beneath the bedclothes, and pressed them strongly on the black veil, resolute to struggle, if the minister of Westbury would contend with a dying man.

"Never!" cried the veiled clergyman. "On earth, never!"

"Dark old man!" exclaimed the affrighted minister, "with what horrible crime upon your soul are you now passing to the judgment?"

Father Hooper's breath heaved; it rattled in his throat; but, with a mighty effort, grasping forward with his hands, he caught hold of life, and held it back till he should speak. He even raised himself in bed; and there he sat, shivering with the arms of death around him, while the black veil hung down, awful, at that last moment, in the gathered terrors of a lifetime. And yet the faint, sad smile, so often there, now seemed to glimmer from its obscurity, and linger on Father Hooper's lips.

"Why do you tremble at me alone?" cried he, turning his veiled face round the circle of pale spectators. "Tremble also at each other! Have men avoided me, and women shown no pity, and children screamed and fled, only for my black veil? What, but the mystery which it obscurely typifies, has made this piece of crape so

awful? When the friend shows his inmost heart to his friend, the lover to his best beloved; when man does not vainly shrink from the eye of his Creator, loathsomely treasuring up the secret of his sin; then deem me a monster, for the symbol beneath which I have lived, and die! I look around me, and, lo! on every visage a Black Veil!"

While his auditors shrank from one another, in mutual affright, Father Hooper fell back upon his pillow, a veiled corpse, with a faint smile lingering on the lips. Still veiled, they laid him in his coffin, and a veiled corpse they bore him to the grave. The grass of many years has sprung up and withered on that grave, the burial stone is moss-grown, and good Mr. Hooper's face is dust; but awful is still the thought that it mouldered beneath the Black Veil!

THE MAYPOLE OF MERRY MOUNT [1837 (1835)]

There is an admirable foundation for a philosophic romance in the curious history of the early settlement of Mount Wollaston, or Merry Mount. In the slight sketch here attempted, the facts, recorded on the grave pages of our New England annalists, have wrought themselves, almost spontaneously, into a sort of allegory. The masques, mummeries, and festive customs, described in the text, are in accordance with the manners of the age. Authority on these points may be found in Strutt's *Book of English Sports and Pastimes*.—Hawthorne's note.

BRIGHT were the days at Merry Mount, when the Maypole was the banner staff of that gay colony! They who reared it, should their banner be triumphant, were to pour sunshine over New England's rugged hills, and scatter flower seeds throughout the soil. Jollity and gloom were contending for an empire. Midsummer eve had come, bringing deep verdure to the forest, and roses in her lap, of a more vivid hue than the tender buds of Spring. But May, or her

mirthful spirit, dwelt all the year round at Merry Mount, sporting with the Summer months, and revelling with Autumn, and basking in the glow of Winter's fireside. Through a world of toil and care she flitted with a dreamlike smile, and came hither to find a home among the lightsome hearts of Merry Mount.

Never had the Maypole been so gayly decked as at sunset on midsummer eve. This venerated emblem was a pine-tree, which had preserved the slender grace of youth, while it equalled the loftiest height of the old wood monarchs. From its top streamed a silken banner, colored like the rainbow. Down nearly to the ground the pole was dressed with birchen boughs, and others of the liveliest green, and some with silvery leaves, fastened by ribbons that fluttered in fantastic knots of twenty different colors, but no sad ones. Garden flowers, and blossoms of the wilderness, laughed gladly forth amid the verdure, so fresh and dewy that they must have grown by magic on that happy pine-tree. Where this green and flowery splendor terminated, the shaft of the Maypole was stained with the seven brilliant hues of the banner at its top. On the lowest green bough hung an abundant wreath of roses, some that had been gathered in the sunniest spots of the forest, and others, of still richer blush, which the colonists had reared from English seed. O, people of the Golden Age, the chief of your husbandry was to raise flowers!

But what was the wild throng that stood hand in hand about the Maypole? It could not be that the fauns and nymphs, when driven from their classic groves and homes of ancient fable, had sought refuge, as all the persecuted did, in the fresh woods of the West. These were Gothic monsters, though perhaps of Grecian ancestry. On the shoulders of a comely youth uprose the head and branching antlers of a stag; a second, human in all other points, had the grim visage of a wolf; a third, still with the trunk and limbs of a mortal man, showed the beard and horns of a venerable

he-goat. There was the likeness of a bear erect, brute in all but his hind legs, which were adorned with pink silk stockings. And here again, almost as wondrous, stood a real bear of the dark forest, lending each of his fore paws to the grasp of a human hand, and as ready for the dance as any in that circle. His inferior nature rose half way, to meet his companions as they stooped. Other faces wore the similitude of man or woman, but distorted or extravagant, with red noses pendulous before their mouths, which seemed of awful depth, and stretched from ear to ear in an eternal fit of laughter. Here might be seen the Salvage Man, well known in heraldry, hairy as a baboon, and girdled with green leaves. By his side, a noble figure, but still a counterfeit, appeared an Indian hunter, with feathery crest and wampum belt. Many of this strange company wore foolscaps, and had little bells appended to their garments, tinkling with a silvery sound, responsive to the inaudible music of their gleesome spirits. Some youths and maidens were of soberer garb, yet well maintained their places in the irregular throng by the expression of wild revelry upon their features. Such were the colonists of Merry Mount, as they stood in the broad smile of sunset round their venerated Maypole.

Had a wanderer, bewildered in the melancholy forest, heard their mirth, and stolen a half-affrighted glance, he might have fancied them the crew of *Comus*,¹ some already transformed to brutes, some midway between man and beast, and the others rioting in the flow of tipsy jollity that foreran the change. But a band of Puritans, who watched the scene, invisible themselves, compared the masques to those devils and ruined souls with whom their superstition peopled the black wilderness.

Within the ring of monsters appeared the two airiest forms that had ever trodden on any more solid footing than a purple and golden cloud. One was a youth in

¹ The reference is to Milton's *Comus*, lines 92 ff.

glistening apparel, with a scarf of the rainbow pattern crosswise on his breast. His right hand held a gilded staff, the ensign of high dignity among the revellers, and his left grasped the slender fingers of a fair maiden, not less gayly decorated than himself. Bright roses glowed in contrast with the dark and glossy curls of each, and were scattered round their feet, or had sprung up spontaneously there. Behind this lightsome couple, so close to the Maypole that its boughs shaded his jovial face, stood the figure of an English priest, canonically dressed, yet decked with flowers, in heathen fashion, and wearing a chaplet of the native vine leaves. By the riot of his rolling eye, and the pagan decorations of his holy garb, he seemed the wildest monster there, and the very Comus of the crew.

"Votaries of the Maypole," cried the flower-decked priest, "merrily, all day long, have the woods echoed to your mirth. But be this your merriest hour, my hearts! Lo, here stand the Lord and Lady of the May, whom I, a clerk of Oxford, and high priest of Merry Mount, am presently to join in holy matrimony. Up with your nimble spirits, ye morris-dancers, green men, and glee maidens, bears and wolves, and horned gentlemen! Come; a chorus now, rich with the old mirth of Merry England, and the wilder glee of this fresh forest; and then a dance, to show the youthful pair what life is made of, and how airily they should go through it! All ye that love the Maypole, lend your voices to the nuptial song of the Lord and Lady of the May!"

This wedlock was more serious than most affairs of Merry Mount, where jest and delusion, trick and fantasy, kept up a continual carnival. The Lord and Lady of the May, though their titles must be laid down at sunset, were really and truly to be partners for the dance of life, beginning the measure that same bright eve. The wreath of roses, that hung from the lowest green bough of the Maypole, had been twined for them, and would be thrown over both their heads, in symbol of their flowery

union. When the priest had spoken, therefore, a motous uproar burst from the rout of monstrous figures.

"Begin you the stave, reverend Sir," cried they all, "and never did the woods ring to such a merry peal as we of the Maypole shall send up!"

Immediately a prelude of pipe, cithern, and viol, touched with practised minstrelsy, began to play from a neighboring thicket, in such a mirthful cadence that the boughs of the Maypole quivered to the sound. But the May Lord, he of the gilded staff, chancing to look into his Lady's eyes, was wonder struck at the almost pensive glance that met his own.

"Edith, sweet Lady of the May," whispered he reproachfully, "is yon wreath of roses a garland to hang above our graves, that you look so sad? O, Edith, this is our golden time! Tarnish it not by any pensive shadow of the mind, for it may be that nothing of futurity will be brighter than the mere remembrance of what is now passing."

"That was the very thought that saddened me! How came it in your mind too?" said Edith, in a still lower tone than he, for it was high treason to be sad at Merry Mount. "Therefore do I sigh amid this festive music. And besides, dear Edgar, I struggle as with a dream, and fancy that these shapes of our jovial friends are visionary, and their mirth unreal, and that we are no true Lord and Lady of the May. What is the mystery in my heart?"

Just then, as if a spell had loosened them, down came a little shower of withering rose leaves from the Maypole. Alas, for the young lovers! No sooner had their hearts glowed with real passion than they were sensible of something vague and unsubstantial in their former pleasures, and felt a dreary presentiment of inevitable change. From the moment that they truly loved, they had subjected themselves to earth's doom of care and sorrow, and troubled joy, and had no more a home at Merry Mount. That was Edith's mystery. Now leave we the priest to marry them,

and the masquers to sport round the Maypole, till the last sunbeam be withdrawn from its summit, and the shadows of the forest mingle gloomily in the dance. Meanwhile, we may discover who these gay people were.

Two hundred years ago, and more, the old world and its inhabitants became mutually weary of each other. Men voyaged by thousands to the West: some to barter glass beads, and such like jewels, for the furs of the Indian hunter; some to conquer virgin empires; and one stern band to pray. But none of these motives had much weight with the colonists of Merry Mount. Their leaders were men who had sported so long with life, that when Thought and Wisdom came, even these unwelcome guests were led astray by the crowd of vanities which they should have put to flight. Erring Thought and perverted Wisdom were made to put on masques, and play the fool. The men of whom we speak, after losing the heart's fresh gayety, imagined a wild philosophy of pleasure, and came hither to act out their latest day-dream. They gathered followers from all that giddy tribe whose whole life is like the festal days of soberer men. In their train were minstrels, not unknown in London streets; wandering players, whose theatres had been the halls of noblemen; mummers, rope-dancers, and mountebanks, who would long be missed at wakes, church ales, and fairs; in a word, mirth makers of every sort, such as abounded in that age, but now began to be discountenanced by the rapid growth of Puritanism. Light had their footsteps been on land, and as lightly they came across the sea. Many had been maddened by their previous troubles into a gay despair; others were as madly gay in the flush of youth, like the May Lord and his Lady; but whatever might be the quality of their mirth, old and young were gay at Merry Mount. The young deemed themselves happy. The elder spirits, if they knew that mirth was but the counterfeit of happiness, yet followed the false shadow wilfully, because at least her garments

glittered brightest. Sworn triflers of a lifetime, they would not venture among the sober truths of life not even to be truly blest.

All the hereditary pastimes of Old England were transplanted hither. The King of Christmas was duly crowned, and the Lord of Misrule bore potent sway. On the Eve of St. John, they felled whole acres of the forest to make bonfires, and danced by the blaze all night, crowned with garlands, and throwing flowers into the flame. At harvest time, though their crop was of the smallest, they made an image with the sheaves of Indian corn, and wreathed it with autumnal garlands, and bore it home triumphantly. But what chiefly characterized the colonists of Merry Mount was their veneration for the Maypole. It has made their true history a poet's tale. Spring decked the hallowed emblem with young blossoms and fresh green boughs, Summer brought roses of the deepest blush, and the perfected foliage of the forest; Autumn enriched it with that red and yellow gorgeousness which converts each wildwood leaf into a painted flower; and Winter silvered it with sleet, and hung it round with icicles, till it flashed in the cold sunshine, itself a frozen sunbeam. Thus each alternate season did homage to the Maypole, and paid it a tribute of its own richest splendor. Its votaries danced round it, once, at least, in every month; sometimes they called it their religion, or their altar; but always, it was the banner staff of Merry Mount.

Unfortunately, there were men in the new world of a sterner faith than these Maypole worshippers. Not far from Merry Mount was a settlement of Puritans, most dismal wretches, who said their prayers before daylight, and then wrought in the forest or the cornfield till evening made it prayer time again. Their weapons were always at hand to shoot down the straggling savage. When they met in conclave, it was never to keep up the old English mirth, but to hear sermons three hours long, or to proclaim bounties on the heads

of wolves and the scalps of Indians. Their festivals were fast days, and their chief pastime the singing of psalms. Woe to the youth or maiden who did but dream of a dance! The selectman nodded to the constable; and there sat the light-heeled reprobate in the stock, or if he danced, it was round the whipping-post, which might be termed the Puritan Maypole.

A party of these grim Puritans, toiling through the difficult woods, each with a horseload of iron armor to burden his footsteps, would sometimes draw near the sunny precincts of Merry Mount. There were the silken colonists, sporting round their Maypole; perhaps teaching a bear to dance, or striving to communicate their mirth to the grave Indians, or masquerading in the skins of deer and wolves, which they had hunted for that especial purpose. Often, the whole colony were playing at blindman's buff, magistrates and all, with their eyes bandaged, except a single scapegoat, whom the blinded sinners pursued by the tinkling of the bells at his garments. Once, it is said, they were seen following a flower-decked corpse, with merriment and festive music, to his grave. But did the dead man laugh? In their quietest times, they sang ballads and told tales, for the edification of their pious visitors; or perplexed them with juggling tricks, or grinned at them through horse collars; and when sport itself grew wearisome, they made game of their own stupidity, and began a yawning match. At the very least of these enormities, the men of iron shook their heads and frowned so darkly that the revellers looked up, imagining that a momentary cloud had overcast the sunshine, which was to be perpetual there. On the other hand, the Puritans affirmed that, when a psalm was pealing from their place of worship, the echo which the forest sent them back seemed often like the chorus of a jolly catch, closing with a roar of laughter. Who but the fiend, and his bond slaves, the crew of Merry Mount, had thus disturbed them? In due time, a feud arose, stern and bitter on one side, and as serious

on the other as anything could be among such light spirits as had sworn allegiance to the Maypole. The future complexion of New England was involved in this important quarrel. Should the grizzly saints establish their jurisdiction over the gay sinners, then would their spirits darken all the clime and make it a land of clouded visages, of hard toil, of sermon and psalm forever. But should the banner staff of Merry Mount be fortunate, sunshine would break upon the hills, and flowers would beautify the forest, and late posterity do homage to the Maypole.

After these authentic passages from history, we return to the nuptials of the Lord and Lady of the May. Alas! we have delayed too long, and must darken our tale too suddenly. As we glance again at the Maypole, a solitary sunbeam is fading from the summit, and leaves only a faint, golden tinge blended with the hues of the rainbow banner. Even that dim light is now withdrawn, relinquishing the whole domain of Merry Mount to the evening gloom, which has rushed so instantaneously from the black surrounding woods. But some of these black shadows have rushed forth in human shape.

Yes, with the setting sun, the last day of mirth had passed from Merry Mount. The ring of gay masquers was disordered and broken; the stag lowered his antlers in dismay, the wolf grew weaker than a lamb; the bells of the morris-dancers tinkled with tremulous affright. The Puritans had played a characteristic part in the Maypole mummeries. Their darksome figures were intermixed with the wild shapes of their foes, and made the scene a picture of the moment, when waking thoughts start up amid the scattered fantasies of a dream. The leader of the hostile party stood in the centre of the circle, while the route of monsters cowered around him, like evil spirits in the presence of a dread magician. No fantastic foolery could look him in the face. So stern was the energy of his aspect, that the whole man, visage, frame, and soul, seemed wrought of iron, gifted with life

and thought, yet all of one substance with his headpiece and breastplate. It was the Puritan of Puritans; it was Endicott himself!²

"Stand off, priest of Baal!" said he, with a grim frown, and laying no reverent hand upon the surplice. "I know thee, Blackstone!³ Thou art the man who couldst not abide the rule even of thine own corrupted church, and hast come hither to preach iniquity, and to give example of it in thy life. But now shall it be seen that the Lord hath sanctified this wilderness for his peculiar people. Woe unto them that would defile it! And first, for this flower-decked abomination, the altar of thy worship!"

And with his keen sword Endicott assaulted the hallowed Maypole. Nor long did it resist his arm. It groaned with a dismal sound; it showered leaves and rosebuds upon the remorseless enthusiast; and finally, with all its green boughs and ribbons and flowers, symbolic of departed pleasures, down fell the banner staff of Merry Mount. As it sank, tradition says, the evening sky grew darker, and the woods threw forth a more sombre shadow.

"There," cried Endicott, looking triumphantly on his work, "there lies the only Maypole in New England! The thought is strong within me that, by its fall, is shadowed forth the fate of light and idle mirth makers, amongst us and our posterity. Amen, saith John Endicott."

"Amen!" echoed his followers.

But the votaries of the Maypole gave one groan for their idol. At the sound, the Puritan leader glanced at the crew of Comus, each a figure of broad mirth, yet, at this moment, strangely expressive of sorrow and dismay.

"Valiant captain," quoth Peter Palfrey, the Ancient of the band, "what order shall be taken with the prisoners?"

"I thought not to repent me of cutting down a Maypole," replied Endicott, "yet now I could find in my heart to plant it again, and give each of these bestial pagans one other dance round their idol. It would

have served rarely for a whipping-post!"

"But there are pine-trees enow," suggested the lieutenant.

"True, good Ancient," said the leader. "Wherefore, bind the heathen crew, and bestow on them a small matter of stripes apiece, as earnest of our future justice. Set some of the rogues in the stocks to rest themselves, so soon as Providence shall bring us to one of our own well-ordered settlements, where such accommodations may be found. Further penalties, such as branding and cropping of ears, shall be thought of hereafter."

"How many stripes for the priest?" inquired Ancient Palfrey.

"None as yet," answered Endicott, bending his iron frown upon the culprit. "It must be for the Great and General Court to determine, whether stripes and long imprisonment, and other grievous penalty, may atone for his transgressions. Let him look to himself! For such as violate our civil order, it may be permitted us to show mercy. But woe to the wretch that troubleth our religion!"

"And this dancing bear," resumed the officer. "Must he share the stripes of his fellows?"

"Shoot him through the head!" said the energetic Puritan. "I suspect witchcraft in the beast."

"Here be a couple of shunning ones," continued Peter Palfrey, pointing his weapon at the Lord and Lady of the May. "They seem to be of high station among these misdoers. Methinks their dignity will not be fitted with less than a double share of stripes."

Endicott rested on his sword, and closely surveyed the dress and aspect of the hap-

² John Endicott (c. 1588-1665), governor of Massachusetts Bay after 1644.

³ Did Governor Endicott speak less positively, we should suspect a mistake here. The Rev. Mr. Blackstone, though an eccentric, is not known to have been an immoral man. We rather doubt his identity with the priest of Merry Mount.—Hawthorne's note.

less pair. There they stood, pale, downcast, and apprehensive. Yet there was an air of mutual support, and of pure affection, seeking aid and giving it, that showed them to be man and wife, with the sanction of a priest upon their love. The youth, in the peril of the moment, had dropped his gilded staff, and thrown his arm about the Lady of the May, who leaned against his breast, too lightly to burden him, but with weight enough to express that their destinies were linked together, for good or evil. They looked first at each other, and then into the grim captain's face. There they stood, in the first hour of wedlock, while the idle pleasures, of which their companions were the emblems, had given place to the sternest cares of life, personified by the dark Puritans. But never had their youthful beauty seemed so pure and high as when its glow was chastened by adversity.

"Youth," said Endicott, "ye stand in an evil case, thou and thy maiden wife. Make ready presently, for I am minded that ye shall both have a token to remember your wedding day!"

"Stern man," cried the May Lord, "how can I move thee? Were the means at hand, I would resist to the death. Being powerless, I entreat! Do with me as thou wilt, but let Edith go untouched!"

"Not so," replied the immitigable zealot. "We are not wont to show an idle courtesy to that sex, which requireth the stricter discipline. What sayest thou, maid? Shall thy silken bridegroom suffer thy share of the penalty, besides his own?"

"Be it death," said Edith, "and lay it all on me!"

Truly, as Endicott had said, the poor lovers stood in a woful case. Their foes were triumphant, their friends captive and abased, their home desolate, the benighted wilderness around them, and a rigorous destiny, in the shape of the Puritan leader, their only guide. Yet the deepening twilight could not altogether conceal that the iron man was softened; he smiled at the

fair spectacle of early love; he almost sighed for the inevitable blight of early hopes.

"The troubles of life have come hastily on this young couple," observed Endicott. "We will see how they comport themselves under their present trials ere we burden them with greater. If, among the spoil, there be any garments of a more decent fashion, let them be put upon this May Lord and his Lady, instead of their glistening vanities. Look to it, some of you."

"And shall not the youth's hair be cut?" asked Peter Palfrey, looking with abhorrence at the lovelock and long glossy curls of the young man.

"Crop it forthwith, and that in the true pumpkinshell fashion," answered the captain. "Then bring them along with us, but more gently than their fellows. There be qualities in the youth, which may make him valiant to fight, and sober to toil, and pious to pray, and in the maiden, that may fit her to become a mother in our Israel, bringing up babes in better nurture than her own hath been. Nor think ye, young ones, that they are the happiest, even in our lifetime of a moment, who misspend it in dancing round a Maypole!"

And Endicott, the severest Puritan of all who laid the rock foundation of New England, lifted the wreath of roses from the run of the Maypole, and threw it, with his own gauntleted hand, over the heads of the Lord and Lady of the May. It was a deed of prophecy. As the moral gloom of the world overpowers all systematic gayety, even so was their home of wild mirth made desolate amid the sad forest. They returned to it no more. But as their flowery garland was wreathed of the brightest roses that had grown there, so, in the tie that united them, were intertwined all the purest and best of their early joys. They went heavenward, supporting each other along the difficult path which it was their lot to tread, and never wasted one regretful thought on the vanities of Merry Mount.

ENDICOTT AND THE RED CROSS
[1842 (1837)]

AT NOON of an autumnal day, more than two centuries ago, the English colors were displayed by the standard-bearer of the Salem tramband, which had mustered for martial exercise under the orders of John Endicott. It was a period when the religious exiles were accustomed often to buckle on their armor, and practise the handling of their weapons of war. Since the first settlement of New England, its prospects had never been so dismal. The dissensions between Charles the First and his subjects were then, and for several years afterwards, confined to the floor of Parliament. The measures of the King and ministry were rendered more tyrannically violent by an opposition, which had not yet acquired sufficient confidence in its own strength to resist royal injustice with the sword. The bigoted and haughty primate, Laud, Archbishop of Canterbury, controlled the religious affairs of the realm, and was consequently invested with powers which might have wrought the utter ruin of the two Puritan colonies, Plymouth and Massachusetts.¹ There is evidence on record that our forefathers perceived their danger, but were resolved that their infant country should not fall without a struggle, even beneath the giant strength of the King's right arm.

Such was the aspect of the times when the folds of the English banner, with the Red Cross in its field, were flung out over a company of Puritans. Their leader, the famous Endicott, was a man of stern and resolute countenance, the effect of which was heightened by a grizzled beard that swept the upper portion of his breastplate. This piece of armor was so highly polished that the whole surrounding scene had its image in the glittering steel. The central object in the mirrored picture was an edifice of humble architecture with neither steeple nor bell to proclaim it—what nevertheless it was—the house of prayer. ▲

token of the perils of the wilderness was seen in the grim head of a wolf, which had just been slain within the precincts of the town, and according to the regular mode of claiming the bounty, was nailed on the porch of the meeting-house. The blood was still plashing on the doorstep. There happened to be visible, at the same noontide hour, so many other characteristics of the times and manners of the Puritans, that we must endeavor to represent them in a sketch, though far less vividly than they were reflected in the polished breastplate of John Endicott.

In close vicinity to the sacred edifice appeared that important engine of Puritanic authority, the whipping-post—with the soil around it well trodden by the feet of evil doers, who had there been disciplined! At one corner of the meeting-house was the pillory, and at the other the stocks; and, by a singular good fortune for our sketch, the head of an Episcopalian and suspected Catholic was grotesquely incased in the former machine; while a fellow-criminal, who had boisterously quaffed a health to the king, was confined by the legs in the latter. Side by side, on the meeting-house steps, stood a male and female figure. The man was a tall, lean, haggard personification of fanaticism, bearing on his breast this label,—A WANTON GOSPELLER,—which betokened that he had dared to give interpretations of Holy Writ unsanctioned by the infallible judgment of the civil and religious rulers. His aspect showed no lack of zeal to maintain his heterodoxies, even at the stake. The woman wore a cleft stick on her tongue, in appropriate retribution for having wagged that unruly member against the elders of the church, and her countenance and gestures gave much cause to apprehend that, the moment the stick should be removed, a repetition of the offence would demand new ingenuity in chastising it.

¹ William Laud (1573-1645), archbishop of Canterbury, 1633-45.

The above-mentioned individuals had been sentenced to undergo their various modes of ignominy, for the space of one hour at noonday. But among the crowd were several whose punishment would be life-long; some, whose ears had been cropped, like those of puppy dogs, others, whose cheeks had been branded with the initials of their misdemeanors; one, with his nostrils slit and seared, and another, with a halter about his neck, which he was forbidden ever to take off, or to conceal beneath his garments. Methinks he must have been grievously tempted to affix the other end of the rope to some convenient beam or bough. There was likewise a young woman, with no mean share of beauty, whose doom it was to wear the letter A on the breast of her gown, in the eyes of all the world and her own children. And even her own children knew what that initial signified. Sporting with her infamy, the lost and desperate creature had embroidered the fatal token in scarlet cloth, with golden thread and the nicest art of needlework; so that the capital A might have been thought to mean Admirable, or anything rather than Adulteress.

Let not the reader argue, from any of these evidences of iniquity, that the times of the Puritans were more vicious than our own, when, as we pass along the very street of this sketch, we discern no badge of infamy on man or woman. It was the policy of our ancestors to search out even the most secret sins, and expose them to shame, without fear or favor, in the broadest light of the noonday sun. Were such the custom now, perchance we might find materials for a no less piquant sketch than the above.

Except the malefactors whom we have described, and the diseased or infirm persons, the whole male population of the town, between sixteen years and sixty, were seen in the ranks of the trainband. A few stately savages, in all the pomp and dignity of the primeval Indian, stood gazing at the spectacle. Their flint-headed arrows were but childish weapons com-

pared with the matchlocks of the Puritans, and would have rattled harmlessly against the steel caps and hammered iron breast-plates which inclosed each soldier in an individual fortress. The valiant John Endicott glanced with an eye of pride at his sturdy followers, and prepared to renew the martial toils of the day.

"Come, my stout hearts!" quoth he, drawing his sword. "Let us show these poor heathen that we can handle our weapons like men of might. Well for them, if they put us not to prove it in earnest!"

The iron-breasted company straightened their line, and each man drew the heavy butt of his matchlock close to his left foot, thus awaiting the orders of the captain. But, as Endicott glanced right and left along the front, he discovered a personage at some little distance with whom it behooved him to hold a parley. It was an elderly gentleman, wearing a black cloak and band, and a high-crowned hat, beneath which was a velvet skull-cap, the whole being the garb of a Puritan minister. This reverend person bore a staff which seemed to have been recently cut in the forest, and his shoes were bemired as if he had been travelling on foot through the swamps of the wilderness. His aspect was perfectly that of a pilgrim, heightened also by an apostolic dignity. Just as Endicott perceived him, he laid aside his staff, and stooped to drink at a bubbling fountain which gushed into the sunshine about a score of yards from the corner of the meeting-house. But, ere the good man drank, he turned his face heavenward in thankfulness, and then, holding back his gray beard with one hand, he scooped up his simple draught in the hollow of the other.

"What, ho! good Mr. Williams," shouted Endicott. "You are welcome back again to our town of peace. How does our worthy Governor Winthrop? And what news from Boston?"

"The Governor hath his health, worshipful Sir," answered Roger Williams, now resuming his staff, and drawing near. "And

for the news, here is a letter, which, knowing I was to travel hitherward to-day, his Excellency committed to my charge. Belike it contains tidings of much import; for a ship arrived yesterday from England."

Mr. Williams, the minister of Salem and of course known to all the spectators, had now reached the spot where Endicott was standing under the banner of his company, and put the Governor's epistle into his hand. The broad seal was impressed with Winthrop's coat of arms. Endicott hastily unclosed the letter and began to read, while, as his eye passed down the page, a wrathful change came over his manly countenance. The blood glowed through it, till it seemed to be kindling with an internal heat; nor was it unnatural to suppose that his breastplate would likewise become red-hot with the angry fire of the bosom which it covered. Arriving at the conclusion, he shook the letter fiercely in his hand, so that it rustled as loud as the flag above his head.

"Black tidings these, Mr. Williams," said he; "blacker never came to New England. Doubtless you know their purport?"

"Yea, truly," replied Roger Williams; "for the Governor consulted, respecting this matter, with my brethren in the ministry at Boston; and my opinion was likewise asked. And his Excellency entreats you by me, that the news be not suddenly noised abroad, lest the people be stirred up unto some outbreak, and thereby give the King and the Archbishop a handle against us."

"The Governor is a wise man—a wise man, and a meek and moderate," said Endicott, setting his teeth grimly. "Nevertheless, I must do according to my own best judgment. There is neither man, woman, nor child in New England, but has a concern as dear as life in these tidings; and if John Endicott's voice be loud enough, man, woman, and child shall hear them. Soldiers, wheel into a hollow square! Ho, good people! Here are news for one and all of you."

The soldiers closed in around their cap-

tain; and he and Roger Williams stood together under the banner of the Red Cross; while the women and the aged men pressed forward, and the mothers held up their children to look Endicott in the face. A few taps of the drum gave signal for silence and attention.

"Fellow-soldiers,—fellow-exiles," began Endicott, speaking under strong excitement, yet powerfully restraining it, "wherefore did ye leave your native country? Wherefore, I say, have we left the green and fertile fields, the cottages, or, perchance, the old gray halls, where we were born and bred, the churchyards where our forefathers lie buried? Wherefore have we come hither to set up our own tombstones in a wilderness? A howling wilderness it is! The wolf and the bear meet us within halloo of our dwellings. The savage leth in wait for us in the dismal shadow of the woods. The stubborn roots of the trees break our ploughshares, when we would till the earth. Our children cry for bread, and we must dig in the sands of the seashore to satisfy them. Wherefore, I say again, have we sought this country of a rugged soil and wintry sky? Was it not for the enjoyment of our civil rights? Was it not for liberty to worship God according to our conscience?"

"Call you this liberty of conscience?" interrupted a voice on the steps of the meeting-house.

It was the Wanton Gospeller. A sad and quiet smile flitted across the mild visage of Roger Williams. But Endicott, in the excitement of the moment, shook his sword wrathfully at the culprit—an ominous gesture from a man like him.

"What hast thou to do with conscience, thou knave?" cried he. "I said liberty to worship God, not license to profane and ridicule him. Break not in upon my speech, or I will lay thee neck and heels till this time to-morrow! Harken to me, friends, nor heed that accursed rhapsodist. As I was saying, we have sacrificed all things, and have come to a land whereof the old world hath scarcely heard, that we

might make a new world unto ourselves, and painfully seek a path from hence to heaven. But what think ye now? This son of a Scotch tyrant—this grandson of a Papistical and adulterous Scotch woman, whose death proved that a golden crown doth not always save an anointed head from the block”—

“Nay, brother, nay,” interposed Mr. Williams; “thy words are not meet for a secret chamber, far less for a public street.”

“Hold thy peace, Roger Williams!” answered Endicott, imperiously. “My spirit is wiser than thine, for the business now in hand. I tell ye, fellow-exiles, that Charles of England, and Laud, our bitterest persecutor, arch-priest of Canterbury, are resolute to pursue us even hither. They are taking counsel, saith this letter, to send over a governor-general, in whose breast shall be deposited all the law and equity of the land. They are minded, also, to establish the idolatrous forms of English Episcopacy; so that, when Laud shall kiss the Pope’s toe, as cardinal of Rome, he may deliver New England, bound hand and foot, into the power of his master!”

A deep groan from the auditors,—a sound of wrath, as well as fear and sorrow,—responded to this intelligence.

“Look ye to it, brethren,” resumed Endicott, with increasing energy. “If this king and this arch-prelate have their will, we shall briefly behold a cross on the spire of this tabernacle which we have builded, and a high altar within its walls, with wax tapers burning round it at noonday. We shall hear the sacring bell, and the voices of the Romish priests saying the mass. But think ye, Christian men, that these abominations may be suffered without a sword drawn? without a shot fired? without blood spilt, yea, on the very stairs of the pulpit? No,—be ye strong of hand and stout of heart! Here we stand on our own soil, which we have bought with our goods, which we have won with our swords, which we have cleared with our axes, which we have tilled with the sweat of our brows, which we have sanctified with our prayers

to the God that brought us hither! Who shall enslave us here? What have we to do with this mitred prelate,—with this crowned king? What have we to do with England?”

Endicott gazed round at the excited countenances of the people, now full of his own spirit, and then turned suddenly to the standard-bearer, who stood close behind him.

“Officer, lower your banner!” said he.

The officer obeyed; and, brandishing his sword, Endicott thrust it through the cloth, and, with his left hand, rent the Red Cross completely out of the banner. He then waved the tattered ensign above his head.

“Sacrilegious wretch!” cried the high-churchman in the pillory, unable longer to restrain himself, “thou hast rejected the symbol of our holy religion!”

“Treason, treason!” roared the royalist in the stocks. “He hath defaced the King’s banner!”

“Before God and man, I will avouch the deed,” answered Endicott. “Beat a flourish, drummer!—shout, soldiers and people!—in honor of the ensign of New England. Neither Pope nor Tyrant hath part in it now!”

With a cry of triumph, the people gave their sanction to one of the boldest exploits which our history records. And forever honored be the name of Endicott! We look back through the mist of ages, and recognize in the rending of the Red Cross from New England’s banner the first omen of that deliverance which our fathers consummated after the bones of the stern Puritan had lain more than a century in the dust.

THE CELESTIAL RAILROAD

[1846 (1843)]

NOT a great while ago, passing through the gate of dreams, I visited that region of the earth in which lies the famous City of Destruction. It interested me much to learn that by the public spirit of some of the inhabitants a railroad has recently been

established between this populous and flourishing town and the Celestial City. Having a little time upon my hands, I resolved to gratify a liberal curiosity by making a trip thither. Accordingly, one fine morning after paying my bill at the hotel, and directing the porter to stow my luggage behind a coach, I took my seat in the vehicle and set out for the station-house. It was my good fortune to enjoy the company of a gentleman—one Mr. Smooth-it-away¹—who, though he had never actually visited the Celestial City, yet seemed as well acquainted with its laws, customs, policy, and statistics, as with those of the City of Destruction, of which he was a native townsman. Being, moreover, a director of the railroad corporation and one of its largest stockholders, he had it in his power to give me all desirable information respecting that praiseworthy enterprise.

Our coach rattled out of the city, and at a short distance from its outskirts passed over a bridge of elegant construction, but somewhat too slight, as I imagined, to sustain any considerable weight. On both sides lay an extensive quagmire, which could not have been more disagreeable, either to sight or smell, had all the kennels of the earth emptied their pollution there.

"This," remarked Mr. Smooth-it-away, "is the famous Slough of Despond—a disgrace to all the neighborhood; and the greater that it might so easily be converted into firm ground."

"I have understood," said I, "that efforts have been made for that purpose from time immemorial. Bunyan mentions that above twenty thousand cartloads of wholesome instructions had been thrown in here without effect."

"Very probably! And what effect could be anticipated from such unsubstantial stuff?" cried Mr. Smooth-it-away. "You observe this convenient bridge. We obtained a sufficient foundation for it by throwing into the slough some editions of books of morality; volumes of French philosophy and German rationalism; tracts, sermons,

and essays of modern clergymen; extracts from Plato, Confucius, and various Hindoo sages, together with a few ingenious commentaries upon texts of Scripture,—all of which by some scientific process, have been converted into a mass like granite. The whole bog might be filled up with similar matter."

It really seemed to me, however, that the bridge vibrated and heaved up and down in a very formidable manner, and, in spite of Mr. Smooth-it-away's testimony to the solidity of its foundation, I should be loath to cross it in a crowded omnibus, especially if each passenger were encumbered with as heavy luggage as that gentleman and myself. Nevertheless we got over without accident, and soon found ourselves at the station-house. This very neat and spacious edifice is erected on the site of the little wicket gate, which formerly, as all old pilgrims will recollect, stood directly across the highway, and, by its inconvenient narrowness, was a great obstruction to the traveller of liberal mind and expansive stomach. The reader of John Bunyan will be glad to know that Christian's old friend Evangelist, who was accustomed to supply each pilgrim with a mystic roll, now presides at the ticket office. Some malicious persons, it is true, deny the identity of this reputable character with the Evangelist of old times, and even pretend to bring competent evidence of an imposture. Without involving myself in a dispute I shall merely observe that, so far as my experience goes, the square pieces of pasteboard now delivered to passengers are much more convenient and useful along the road than the antique roll of parchment. Whether they will be as readily received at the gate of the Celestial City I decline giving an opinion.

A large number of passengers were already at the station-house awaiting the departure of the cars. By the aspect and demeanor of these persons it was easy to

¹ Mr. Smooth-man was a citizen of Vanity Fair in Bunyan's *Pilgrim's Progress*.

judge that the feelings of the community had undergone a very favorable change in reference to the celestial pilgrimage. It would have done Bunyan's heart good to see it. Instead of a lonely and ragged man with a huge burden on his back, plodding along sorrowfully on foot while the whole city hooted after him, here were parties of the first gentry and most respectable people in the neighborhood setting forth towards the Celestial City as cheerfully as if the pilgrimage were merely a summer tour. Among the gentlemen were characters of deserved eminence—magistrates, politicians, and men of wealth, by whose example religion could not but be greatly recommended to their meaner brethren. In the ladies' apartment, too, I rejoiced to distinguish some of those flowers of fashionable society who are so well fitted to adorn the most elevated circles of the Celestial City. There was much pleasant conversation about the news of the day, topics of business and politics, or the lighter matters of amusement; while religion, though indubitably the main thing at heart, was thrown tastefully into the background. Even an infidel would have heard little or nothing to shock his sensibility.

One great convenience of the new method of going on pilgrimage I must not forget to mention. Our enormous burdens, instead of being carried on our shoulders as had been the custom of old, were all snugly deposited in the baggage car, and, as I was assured, would be delivered to their respective owners at the journey's end. Another thing, likewise, the benevolent reader will be delighted to understand. It may be remembered that there was an ancient feud between Prince Beelzebub and the keeper of the wicket gate, and that the adherents of the former distinguished personage were accustomed to shoot deadly arrows at honest pilgrims while knocking at the door. This dispute, much to the credit as well of the illustrious potentate above mentioned as of the worthy and enlightened directors of the railroad, has been pacifically arranged on the principle of mutual com-

promise. The prince's subjects are now pretty numerously employed about the station-house, some in taking care of the baggage, others in collecting fuel, feeding the engines, and such congenial occupations; and I can conscientiously affirm that persons more attentive to their business, more willing to accommodate, or more generally agreeable to the passengers, are not to be found on any railroad. Every good heart must surely exult at so satisfactory an arrangement of an immemorial difficulty.

"Where is Mr. Greatheart?" inquired I. "Beyond a doubt the directors have engaged that famous old champion to be chief conductor on the railroad?"²

"Why, no," said Mr. Smooth-it-away, with a dry cough. "He was offered the situation of brakeman, but, to tell you the truth, our friend Greatheart has grown preposterously stiff and narrow in his old age. He has so often guided pilgrims over the road on foot that he considers it a sin to travel in any other fashion. Besides, the old fellow had entered so heartily into the ancient feud with Prince Beelzebub that he would have been perpetually at blows or ill language with some of the prince's subjects, and thus have embroiled us anew. So, on the whole, we were not sorry when honest Greatheart went off to the Celestial City in a huff and left us at liberty to choose a more suitable and accommodating man. Yonder comes the engineer of the train. You will probably recognize him at once."

The engine at this moment took its station in advance of the cars, looking, I must confess, much more like a sort of mechanical demon that would hurry us to the infernal regions than a laudable contrivance for smoothing our way to the Celestial City. On its top sat a personage almost enveloped in smoke and flame, which, not to startle the reader, appeared to gush from his own mouth and stomach

² Mr. Greatheart is a character in the second part of Bunyan's *Pilgrim's Progress*.

as well as from the engine's brazen abdomen.

"Do my eyes deceive me?" cried I. "What on earth is this! A living creature? If so, he is own brother to the engine he rides upon!"

"Poh, poh, you are obtuse!" said Mr. Smooth-it-away, with a hearty laugh. "Don't you know Apollyon, Christian's old enemy, with whom he fought so fierce a battle in the Valley of Humiliation?³ He was the very fellow to manage the engine; and so we have reconciled him to the custom of going on pilgrimage, and engaged him as chief engineer."

"Bravo, bravo!" exclaimed I, with irrepressible enthusiasm; "this shows the liberality of the age, this proves, if anything can, that all musty prejudices are in a fair way to be obliterated. And how will Christian rejoice to hear of this happy transformation of his old antagonist! I promise myself great pleasure in informing him of it when we reach the Celestial City."

The passengers being all comfortably seated, we now rattled away merrily, accomplishing a greater distance in ten minutes than Christian probably trudged over in a day. It was laughable, while we glanced along, as it were, at the tail of a thunder-bolt, to observe two dusty foot travellers in the old pilgrim guise, with cockle shell and staff, their mystic rolls of parchment in their hands and their intolerable burdens on their backs. The preposterous obstinacy of these honest people in persisting to groan and stumble along the difficult pathway rather than take advantage of modern improvements, excited great mirth among our wiser brotherhood. We greeted the two pilgrims with many pleasant gibes and a roar of laughter; whereupon they gazed at us with such woful and absurdly compassionate visages that our merriment grew tenfold more obstreperous. Apollyon also entered heartily into the fun, and contrived to flirt the smoke and flame of the engine, or of his own breath, into their faces, and envelop them in an atmosphere of scalding steam. These little practical

jokes amused us mightily, and doubtless afforded the pilgrims the gratification of considering themselves martyrs.

At some distance from the railroad Mr. Smooth-it-away pointed to a large antique edifice, which, he observed, was a tavern of long standing, and had formerly been a noted stopping-place for pilgrims. In Bunyan's road-book it is mentioned as the Interpreter's House.

"I have long had a curiosity to visit that old mansion," remarked I.

"It is not one of our stations, as you perceive," said my companion. "The keeper was violently opposed to the railroad; and well he might be, as the track left his house of entertainment on one side, and thus was pretty certain to deprive him of all his reputable customers. But the foot-path still passes his door, and the old gentleman now and then receives a call from some simple traveller, and entertains him with fare as old-fashioned as himself."

Before our talk on this subject came to a conclusion we were rushing by the place where Christian's burden fell from his shoulders at the sight of the Cross. This served as a theme for Mr. Smooth-it-away, Mr. Live-for-the-world, Mr. Hide-an-in-the-heart, Mr. Scaly-conscience, and a knot of gentlemen from the town of Shun-repentance, to descant upon the inestimable advantages resulting from the safety of our baggage. Myself, and all the passengers indeed, joined with great unanimity in this view of the matter; for our burdens were rich in many things esteemed precious throughout the world; and, especially, we each of us possessed a great variety of favorite Habits, which we trusted would not be out of fashion even in the polite circles of the Celestial City. It would have been a sad spectacle to see such an assortment of valuable articles tumbling into the sepulchre. Thus pleasantly conversing on the favorable circumstances of our position as compared with those of past pilgrims

³ The reference is to an incident in Bunyan's *Pilgrim's Progress*.

and of narrow-minded ones at the present day, we soon found ourselves at the foot of the Hill Difficulty. Through the very heart of this rocky mountain a tunnel has been constructed of most admirable architecture, with a lofty arch and a spacious double track; so that, unless the earth and rocks should chance to crumble down, it will remain an eternal monument of the builder's skill and enterprise. It is a great though incidental advantage that the materials from the heart of the Hill Difficulty have been employed in filling up the Valley of Humiliation, thus obviating the necessity of descending into that disagreeable and unwholesome hollow.

"This is a wonderful improvement, indeed," said I. "Yet I should have been glad of an opportunity to visit the Palace Beautiful and be introduced to the charming young ladies—Miss Prudence, Miss Piety, Miss Charity, and the rest—who have the kindness to entertain pilgrims there."

"Young ladies!" cried Mr. Smooth-it-away, as soon as he could speak for laughing. "And charming young ladies! Why, my dear fellow, they are old maids, every soul of them—prim, starched, dry, and angular; and not one of them, I will venture to say, has altered so much as the fashion of her gown since the days of Christian's pilgrimage."

"Ah, well," said I, much comforted, "then I can very readily dispense with their acquaintance."

The respectable Apollyon was now putting on the steam at a prodigious rate, anxious, perhaps, to get rid of the unpleasant reminiscences connected with the spot where he had so disastrously encountered Christian. Consulting Mr. Bunyan's road-book, I perceived that we must now be within a few miles of the Valley of the Shadow of Death, into which doleful region, at our present speed, we should plunge much sooner than seemed at all desirable. In truth, I expected nothing better than to find myself in the ditch on one side or the quag on the other; but on

communicating my apprehensions to Mr. Smooth-it-away, he assured me that the difficulties of this passage, even in its worst condition, had been vastly exaggerated, and that, in its present state of improvement, I might consider myself as safe as on any railroad in Christendom.

Even while we were speaking the train shot into the entrance of this dreaded Valley. Though I plead guilty to some foolish palpitations of the heart during our headlong rush over the causeway here constructed, yet it were unjust to withhold the highest encomiums on the boldness of its original conception and the ingenuity of those who executed it. It was gratifying, likewise, to observe how much care had been taken to dispel the everlasting gloom and supply the defect of cheerful sunshine, not a ray of which has ever penetrated among these awful shadows. For this purpose, the inflammable gas which exudes plentifully from the soil is collected by means of pipes, and thence communicated to a quadruple row of lamps along the whole extent of the passage. Thus a radiance has been created even out of the fiery and sulphurous curse that rests forever upon the valley—a radiance hurtful, however, to the eyes, and somewhat bewildering, as I discovered by the changes which it wrought in the visages of my companions. In this respect, as compared with natural daylight, there is the same difference as between truth and falsehood; but if the reader have ever travelled through the dark Valley, he will have learned to be thankful for any light that he could get—if not from the sky above, then from the blasted soil beneath. Such was the red brilliancy of these lamps that they appeared to build walls of fire on both sides of the track, between which we held our course at lightning speed, while a reverberating thunder filled the Valley with its echoes. Had the engine run off the track,—a catastrophe, it is whispered, by no means unprecedented,—the bottomless pit, if there be any such place, would undoubtedly have received us. Just as some dismal fooleries

of this nature had made my heart quake there came a tremendous shriek, careering along the valley as if a thousand devils had burst their lungs to utter it, but which proved to be merely the whistle of the engine on arriving at a stopping-place.

The spot where we had now paused is the same that our friend Bunyan—a truthful man, but infected with many fantastic notions—has designated, in terms plainer than I like to repeat, as the mouth of the infernal region. This, however, must be a mistake, inasmuch as Mr. Smooth-it-away, while we remained in the smoky and lurid cavern, took occasion to prove that Tophet has not even a metaphorical existence. The place, he assured us, is no other than the crater of a half-extinct volcano, in which the directors had caused forges to be set up for the manufacture of railroad iron. Hence, also, is obtained a plentiful supply of fuel for the use of the engines. Whoever had gazed into the dismal obscurity of the broad cavern mouth, whence ever and anon darted huge tongues of dusky flame, and had seen the strange, half-shaped monsters, and visions of faces horribly grotesque, into which the smoke seemed to wreathe itself, and had heard the awful murmurs, and shrieks, and deep shuddering whispers of the blast, sometimes forming themselves into words almost articulate, would have seized upon Mr. Smooth-it-away's comfortable explanation as greedily as we did. The inhabitants of the cavern, moreover, were unlovely personages, dark, smoke-begrimed, generally deformed, with misshapen feet, and a glow of dusky redness in their eyes as if their hearts had caught fire and were blazing out of the upper windows. It struck me as a peculiarity that the laborers at the forge and those who brought fuel to the engine, when they began to draw short breath, positively emitted smoke from their mouth and nostrils.

Among the idlers about the train, most of whom were puffing cigars which they had lighted at the flame of the crater, I was perplexed to notice several who, to

my certain knowledge, had heretofore set forth by railroad for the Celestial City. They looked dark, wild, and smoky, with a singular resemblance, indeed, to the native inhabitants, like whom, also, they had a disagreeable propensity to ill-natured gabes and sneers, the habit of which had wrought a settled contortion of their visages. Having been on speaking terms with one of these persons,—an indolent, good-for-nothing fellow, who went by the name of Take-it-easy,—I called him, and inquired what was his business there.

"Did you not start," said I, "for the Celestial City?"

"That's a fact," said Mr. Take-it-easy, carelessly puffing some smoke into my eyes. "But I heard such bad accounts that I never took pains to climb the hill on which the city stands. No business doing, no fun going on, nothing to drink, and no smoking allowed, and a thrumming of church music from morning till night. I would not stay in such a place if they offered me house room and living free."

"But, my good Mr. Take-it-easy," cried I, "why take up your residence here, of all places in the world?"

"Oh," said the loafer, with a grin, "it is very warm hereabouts, and I meet with plenty of old acquaintances, and altogether the place suits me. I hope to see you back again some day soon. A pleasant journey to you."

While he was speaking the bell of the engine rang, and we dashed away after dropping a few passengers, but receiving no new ones. Rattling onward through the Valley, we were dazzled with the fiercely gleaming gas lamps, as before. But sometimes, in the dark of intense brightness, grim faces, that bore the aspect and expression of individual sins, or evil passions, seemed to thrust themselves through the veil of light, glaring upon us, and stretching forth a great, dusky hand, as if to impede our progress. I almost thought that they were my own sins that appalled me there. These were freaks of imagination—nothing more, certainly—mere delusions,

which I ought to be heartily ashamed of, but all through the Dark Valley I was tormented, and pestered, and dolefully bewildered with the same kind of waking dreams. The mephitic gases of that region intoxicate the brain. As the light of natural day, however, began to struggle with the glow of the lanterns, these vain imaginations lost their vividness, and finally vanished with the first ray of sunshine that greeted our escape from the Valley of the Shadow of Death. Ere we had gone a mile beyond it I could well-nigh have taken my oath that this whole gloomy passage was a dream.

At the end of the valley, as John Bunyan mentions, is a cavern, where, in his days, dwelt two cruel giants, Pope and Pagan, who had strown the ground about their residence with the bones of slaughtered pilgrims. These vile old troglodytes are no longer there; but into their deserted cave another terrible giant has thrust himself, and makes it his business to seize upon honest travellers and fatten them for his table with plentiful meals of smoke, mist, moonshine, raw potatoes, and sawdust. He is a German by birth, and is called Giant Transcendentalist; but as to his form, his features, his substance, and his nature generally, it is the chief peculiarity of this huge miscreant that neither he for himself, nor anybody for him, has ever been able to describe them. As we rushed by the cavern's mouth we caught a hasty glimpse of him, looking somewhat like an ill-proportioned figure, but considerably more like a heap of fog and duskiness. He shouted after us, but in so strange a phraseology that we knew not what he meant, nor whether to be encouraged or affrighted.

It was late in the day when the train thundered into the ancient city of Vanity, where Vanity Fair is still at the height of prosperity, and exhibits an epitome of whatever is brilliant, gay, and fascinating beneath the sun. As I purposed to make a considerable stay here, it gratified me to learn that there is no longer the want of

harmony between the town's-people and pilgrims, which impelled the former to such lamentably mistaken measures as the persecution of Christian and the fiery martyrdom of Faithful. On the contrary, as the new railroad brings with it great trade and a constant influx of strangers, the lord of Vanity Fair is its chief patron, and the capitalists of the city are among the largest stockholders. Many passengers stop to take their pleasure or make their profit in the Fair, instead of going onward to the Celestial City. Indeed, such are the charms of the place that people often affirm it to be the true and only heaven, stoutly contending that there is no other, that those who seek further are mere dreamers, and that, if the fabled brightness of the Celestial City lay but a bare mile beyond the gates of Vanity, they would not be fools enough to go thither. Without subscribing to these perhaps exaggerated encomiums, I can truly say that my abode in the city was mainly agreeable, and my intercourse with the inhabitants productive of much amusement and instruction.

Being naturally of a serious turn, my attention was directed to the solid advantages derivable from a residence here, rather than to the effervescent pleasures which are the grand object with too many visitants. The Christian reader, if he have had no accounts of the city later than Bunyan's time, will be surprised to hear that almost every street has its church, and that the reverend clergy are nowhere held in higher respect than at Vanity Fair. And well do they deserve such honorable estimation; for the maxims of wisdom and virtue which fall from their lips come from as deep a spiritual source, and tend to as lofty a religious aim, as those of the sagest philosophers of old. In justification of this high praise I need only mention the names of the Rev. Mr. Shallow-deep, the Rev. Mr. Stumble-at-truth, that fine old clerical character the Rev. Mr. This-to-day, who expects shortly to resign his pulpit to the Rev. Mr. That-to-morrow; together with the Rev. Mr. Bewilderment, the Rev.

Mr. Clog-the-spirit, and, last and greatest, the Rev. Dr. Wind-of-doctrine. The labors of these eminent divines are aided by those of innumerable lecturers, who diffuse such a various profundity, in all subjects of human or celestial science, that any man may acquire an omnigenous erudition without the trouble of even learning to read. Thus literature is etherealized by assuming for its medium the human voice; and knowledge, depositing all its heavier particles, except, doubtless, its gold, becomes exhaled into a sound, which forthwith steals into the ever-open ear of the community. These ingenious methods constitute a sort of machinery, by which thought and study are done to every person's hand without his putting himself to the slightest inconvenience in the matter. There is another species of machine for the wholesale manufacture of individual morality. This excellent result is effected by societies for all manner of virtuous purposes, with which a man has merely to connect himself, throwing, as it were, his quota of virtue into the common stock, and the president and directors will take care that the aggregate amount be well applied. All these, and other wonderful improvements in ethics, religion, and literature, being made plain to my comprehension by the ingenious Mr. Smooth-it-away, inspired me with a vast admiration of *Vanity Fair*.

It would fill a volume, in an age of pamphlets, were I to record all my observations in this great capital of human business and pleasure. There was an unlimited range of society—the powerful, the wise, the witty, and the famous in every walk of life; princes, presidents, poets, generals, artists, actors, and philanthropists,—all making their own market at the fair, and deeming no price too exorbitant for such commodities as hit their fancy. It was well worth one's while, even if he had no idea of buying or selling, to loiter through the bazaars and observe the various sorts of traffic that were going forward.

Some of the purchasers, I thought, made very foolish bargains. For instance, a

young man having inherited a splendid fortune, laid out a considerable portion of it in the purchase of diseases, and finally spent all the rest for a heavy lot of repentance and a suit of rags. A very pretty girl bartered a heart as clear as crystal, and which seemed her most valuable possession, for another jewel of the same kind, but so worn and defaced as to be utterly worthless. In one shop there were a great many crowns of laurel and myrtle, which soldiers, authors, statesmen, and various other people pressed eagerly to buy; some purchased these paltry wreaths with their lives, others by a toilsome servitude of years; and many sacrificed whatever was most valuable, yet finally slunk away without the crown. There was a sort of stock of scrip, called Conscience, which seemed to be in great demand, and would purchase almost anything. Indeed, few rich commodities were to be obtained without paying a heavy sum in this particular stock, and a man's business was seldom very lucrative unless he knew precisely when and how to throw his hoard of conscience into the market. Yet as this stock was the only thing of permanent value, whoever parted with it was sure to find himself a loser in the long run. Several of the speculations were of a questionable character. Occasionally a member of Congress recruited his pocket by the sale of his constituents; and I was assured that public officers have often sold their country at very moderate prices. Thousands sold their happiness for a whim. Gilded chains were in great demand, and purchased with almost any sacrifice. In truth, those who desired, according to the old adage, to sell anything valuable for a song, might find customers all over the Fair; and there were innumerable messes of pottage, piping hot, for such as chose to buy them with their birthrights. A few articles, however, could not be found genuine at *Vanity Fair*. If a customer wished to renew his stock of youth the dealers offered him a set of false teeth and an auburn wig; if he demanded peace of

mind, they recommended opium or a brandy bottle.

Tracts of land and golden mansions, situate in the Celestial City, were often exchanged, at very disadvantageous rates, for a few years' lease of small, dismal, inconvenient tenements in Vanity Fair. Prince Beelzebub himself took great interest in this sort of traffic, and sometimes condescended to meddle with smaller matters. I once had the pleasure to see him bargaining with a miser for his soul, which, after much ingenious skirmishing on both sides, his highness succeeded in obtaining at about the value of sixpence. The prince remarked with a smile, that he was a loser by the transaction.

Day after day, as I walked the streets of Vanity, my manners and deportment became more and more like those of the inhabitants. The place began to seem like home; the idea of pursuing my travels to the Celestial City was almost obliterated from my mind. I was reminded of it, however, by the sight of the same pair of simple pilgrims at whom we had laughed so heartily when Apollyon puffed smoke and steam into their faces at the commencement of our journey. There they stood amidst the densest bustle of Vanity; the dealers offering them their purple and fine linen and jewels, the men of wit and humor gibing at them, a pair of buxom ladies ogling them askance, while the benevolent Mr. Smooth-it-away whispered some of his wisdom at their elbows, and pointed to a newly-erected temple; but there were these worthy simpletons, making the scene look wild and monstrous, merely by their sturdy repudiation of all part in its business or pleasures.

One of them—his name was Stick-to-the-right—perceived in my face, I suppose, a species of sympathy and almost admiration, which, to my own great surprise, I could not help feeling for this pragmatic couple. It prompted him to address me.

"Sir," inquired he, with a sad, yet mild and kindly voice, "do you call yourself a pilgrim?"

"Yes," I replied, "my right to that appellation is indubitable. I am merely a sojourner here in Vanity Fair, being bound to the Celestial City by the new railroad."

"Alas, friend," rejoined Mr. Stick-to-the-right, "I do assure you, and beseech you to receive the truth of my words, that that whole concern is a bubble. You may travel on it all your lifetime, were you to live thousands of years, and yet never get beyond the limits of Vanity Fair. Yea, though you should deem yourself entering the gates of the blessed city, it will be nothing but a miserable delusion."

"The Lord of the Celestial City," began the other pilgrim, whose name was Mr. Foot-it-to-heaven, "has refused, and will ever refuse, to grant an act of incorporation for this railroad; and unless that be obtained, no passenger can ever hope to enter his dominions. Wherefore every man who buys a ticket must lay his account with losing the purchase money, which is the value of his own soul."

"Poh, nonsense!" said Mr. Smooth-it-away, taking my arm and leading me off, "these fellows ought to be indicted for a libel. If the law stood as it once did in Vanity Fair we should see them grinning through the iron bars of the prison window."

This incident made a considerable impression on my mind, and contributed with other circumstances to indispose me to a permanent residence in the city of Vanity; although, of course, I was not simple enough to give up my original plan of gliding along easily and commodiously by railroad. Still, I grew anxious to be gone. There was one strange thing that troubled me. Amid the occupations or amusements of the Fair, nothing was more common than for a person—whether at feast, theatre, or church, or trafficking for wealth and honors, or whatever he might be doing, and however unseasonable the interruption—suddenly to vanish like a soap bubble, and be never more seen of his fellows; and so accustomed were the latter to such little accidents that they went on

with their business as quietly as if nothing had happened. But it was otherwise with me.

Finally, after a pretty long residence at the Fair, I resumed my journey towards the Celestial City, still with Mr. Smooth-it-away at my side. At a short distance beyond the suburbs of Vanity we passed the ancient silver mine, of which Demas was the first discoverer, and which is now wrought to great advantage, supplying nearly all the coined currency of the world. A little further onward was the spot where Lot's wife had stood forever under the semblance of a pillar of salt. Curious travellers have long since carried it away piecemeal. Had all regrets been punished as rigorously as this poor dame's were, my yearning for the relinquished delights of Vanity Fair might have produced a similar change in my own corporeal substance, and left me a warning to future pilgrims.

The next remarkable object was a large edifice, constructed of mossgrown stone, but in a modern and airy style of architecture. The engine came to a pause in its vicinity, with the usual tremendous shriek.

"This was formerly the castle of the redoubted giant Despair," observed Mr. Smooth-it-away; "but since his death Mr. Flimsy-faith has repaired it, and keeps an excellent house of entertainment here. It is one of our stopping-places."

"It seems but slightly put together," remarked I, looking at the frail yet ponderous walls. "I do not envy Mr. Flimsy-faith his habitation. Some day it will thunder down upon the heads of the occupants."

"We shall escape at all events," said Mr. Smooth-it-away, "for Apollyon is putting on the steam again."

The road now plunged into a gorge of the Delectable Mountains, and traversed the field where in former ages the blind men wandered and stumbled among the tombs. One of these ancient tombstones had been thrust across the track by some malicious person, and gave the train of cars a terrible jolt. Far up the rugged side of a mountain I perceived a rusty iron door,

half overgrown with bushes and creeping plants, but with smoke issuing from its crevices.

"Is that," inquired I, "the very door in the hill-side which the shepherds assured Christian was a by-way to hell?"

"That was a joke on the part of the shepherds," said Mr. Smooth-it-away, with a smile. "It is neither more nor less than the door of a cavern which they use as a smoke-house for the preparation of nut-ton hams."

My recollections of the journey are now, for a little space, dim and confused, inasmuch as a singular drowsiness here overcame me, owing to the fact that we were passing over the enchanted ground, the air of which encourages a disposition to sleep. I awoke, however, as soon as we crossed the borders of the pleasant land of Beulah. All the passengers were rubbing their eyes, comparing watches, and congratulating one another on the prospect of arriving so seasonably at the journey's end. The sweet breezes of this happy clime came refreshingly to our nostrils; we beheld the glimmering gush of silver fountains, overhung by trees of beautiful foliage and delicious fruit, which were propagated by grafts from the celestial gardens. Once, as we dashed onward like a hurricane, there was a flutter of wings and the bright appearance of an angel in the air, speeding forth on some heavenly mission. The engine now announced the close vicinity of the final station-house by one last and horrible scream, in which there seemed to be distinguishable every kind of wailing and woe, and bitter fierceness of wrath, all mixed up with the wild laughter of a devil or a madman. Throughout our journey, at every stopping-place, Apollyon had exercised his ingenuity in screwing the most abominable sounds out of the whistle of the steam-engine; but in this closing effort he outdid himself and created an infernal uproar, which, besides disturbing the peaceful inhabitants of Beulah, must have sent its discord even through the celestial gates.

While the horrid clamor was still ringing

in our ears we heard an exulting strain, as if a thousand instruments of music, with height and depth and sweetness in their tones, at once tender and triumphant, were struck in unison, to greet the approach of some illustrious hero, who had fought the good fight and won a glorious victory, and was come to lay aside his battered arms forever. Looking to ascertain what might be the occasion of this glad harmony, I perceived, on alighting from the cars, that a multitude of shining ones had assembled on the other side of the river, to welcome two poor pilgrims, who were just emerging from its depths. They were the same whom Apollyon and ourselves had persecuted with taunts, and gibes, and scalding steam, at the commencement of our journey—the same whose unworldly aspect and impressive words had stirred my conscience amid the wild revellers of Vanity Fair.

"How amazingly well those men have got on," cried I to Mr. Smooth-it-away. "I wish we were secure of as good a reception."

"Never fear, never fear!" answered my friend. "Come, make haste; the ferry boat will be off directly, and in three minutes you will be on the other side of the river. No doubt you will find coaches to carry you up to the city gates."

A steam ferry boat, the last improvement on this important route, lay at the river side, puffing, snorting, and emitting all those other disagreeable utterances which betoken the departure to be immediate. I hurried on board with the rest of the passengers, most of whom were in great perturbation: some bawling out for their baggage, some tearing their hair and exclaiming that the boat would explode or sink; some already pale with the heaving of the stream; some gazing affrighted at the ugly aspect of the steersman; and some still dizzy with the slumberous influences of the Enchanted Ground. Looking back to the shore, I was amazed to discern Mr. Smooth-it-away waving his hand in token of farewell.

"Don't you go over to the Celestial City?" exclaimed I.

"Oh, no!" answered he with a queer smile, and that same disagreeable contortion of visage which I had remarked in the inhabitants of the Dark Valley. "Oh, no! I have come thus far only for the sake of your pleasant company. Good-by! We shall meet again."

And then did my excellent friend Mr. Smooth-it-away laugh outright, in the midst of which eachinnation a smoke-wreath issued from his mouth and nostrils, while a twinkle of lurid flame darted out of either eye, proving indubitably that his heart was all of a red blaze. The impudent fiend! To deny the existence of Tophet, when he felt its fiery tortures raging within his breast. I rushed to the side of the boat, intending to fling myself on shore, but the wheels, as they began their revolutions, threw a dash of spray over me so cold—so deadly cold, with the chill that will never leave those waters until Death be drowned in his own river—that with a shiver and a heartquake I awoke. Thank Heaven it was a Dream!

RAPPACCINI'S DAUGHTER¹

[1846 (1844)]

A YOUNG man, named Giovanni Guasconti, came, very long ago, from the more southern region of Italy, to pursue his studies at the University of Padua. Giovanni, who had but a scanty supply of gold ducats in his pocket, took lodgings in a high and gloomy chamber of an old edifice which looked not unworthy to have been the palace of a Paduan noble, and which, in fact, exhibited over its entrance the armorial bearings of a family long since extinct. The young stranger, who

¹Hawthorne's facetious prefatory note to this story in the *Democratic Review* for December, 1844, has been omitted; it is reprinted in the American Writers Series *Hawthorne*, ed. Austin Warren, pp. 20 f.

was not unstudied in the great poem of his country, recollected that one of the ancestors of this family, and perhaps an occupant of this very mansion, had been pictured by Dante as a partaker of the immortal agonies of his *Inferno*. These reminiscences and associations, together with the tendency to heartbreak natural to a young man for the first time out of his native sphere, caused Giovanni to sigh heavily as he looked around the desolate and ill-furnished apartment.

"Holy Virgin, signor!" cried old Dame Lisabetta, who, won by the youth's remarkable beauty of person, was kindly endeavoring to give the chamber a habitable air, "what a sigh was that to come out of a young man's heart! Do you find this old mansion gloomy? For the love of Heaven, then, put your head out of the window, and you will see as bright sunshine as you have left in Naples."

Guasconti mechanically did as the old woman advised, but could not quite agree with her that the Paduan sunshine was as cheerful as that of southern Italy. Such as it was, however, it fell upon a garden beneath the window and expended its fostering influences on a variety of plants, which seemed to have been cultivated with exceeding care.

"Does this garden belong to the house?" asked Giovanni.

"Heaven forbid, signor, unless it were fruitful of better pot herbs than any that grow there now," answered old Lisabetta. "No; that garden is cultivated by the own hands of Signor Giacomo Rappaccini, the famous doctor, who, I warrant him, has been heard of as far as Naples. It is said that he distils these plants into medicines that are as potent as a charm. Oftentimes you may see the signor doctor at work, and perchance the signora, his daughter, too, gathering the strange flowers that grow in the garden."

The old woman had now done what she could for the aspect of the chamber; and, commending the young man to the pro-

tection of the saints, took her departure.

Giovanni still found no better occupation than to look down into the garden beneath his window. From its appearance, he judged it to be one of those botanic gardens which were of earlier date in Padua than elsewhere in Italy or in the world. Or, not improbably, it might once have been the pleasure-place of an opulent family; for there was the ruin of a marble fountain, in the centre, sculptured with rare art, but so wofully shattered that it was impossible to trace the original design from the chaos of remaining fragments. The water, however, continued to gush and sparkle into the sunbeams as cheerfully as ever. A little gurgling sound ascended to the young man's window, and made him feel as if the fountain were an immortal spirit that sung its song unceasingly and without heeding the vicissitudes around it, while one century embodied it in marble and another scattered the perishable garniture on the soil. All about the pool into which the water subsided grew various plants, that seemed to require a plentiful supply of moisture for the nourishment of gigantic leaves, and, in some instances, flowers gorgeously magnificent. There was one shrub in particular, set in a marble vase in the midst of the pool, that bore a profusion of purple blossoms, each of which had the lustre and richness of a gem, and the whole together made a show so resplendent that it seemed enough to illuminate the garden, even had there been no sunshine. Every portion of the soil was peopled with plants and herbs, which, if less beautiful, still bore tokens of assiduous care, as if all had their individual virtues, known to the scientific mind that fostered them. Some were placed in urns, rich with old carving, and others in common garden pots, some crept serpent-like along the ground or climbed on high, using whatever means of ascent was offered them. One plant had wreathed itself round a statue of Vertumnus,² which was thus

² Roman god of the seasons.

quite veiled and shrouded in a drapery of hanging foliage, so happily arranged that it might have served a sculptor for a study.

While Giovanni stood at the window he heard a rustling behind a screen of leaves, and became aware that a person was at work in the garden. His figure soon emerged into view, and showed itself to be that of no common laborer, but a tall, emaciated, sallow, and sickly-looking man, dressed in a scholar's garb of black. He was beyond the middle term of life, with gray hair, a thin, gray beard, and a face singularly marked with intellect and cultivation, but which could never, even in his more youthful days, have expressed much warmth of heart.

Nothing could exceed the intentness with which this scientific gardener examined every shrub which grew in his path: it seemed as if he was looking into their inmost nature, making observations in regard to their creative essence, and discovering why one leaf grew in this shape and another in that, and wherefore such and such flowers differed among themselves in hue and perfume. Nevertheless, in spite of this deep intelligence on his part, there was no approach to intimacy between himself and these vegetable existences. On the contrary, he avoided their actual touch or the direct inhaling of their odors with a caution that impressed Giovanni most disagreeably; for the man's demeanor was that of one walking among malignant influences, such as savage beasts, or deadly snakes, or evil spirits, which, should he allow them one moment of license, would wreak upon him some terrible fatality. It was strangely frightful to the young man's imagination to see this air of insecurity in a person cultivating a garden, that most simple and innocent of human toils, and which had been alike the joy and labor of the unfallen parents of the race. Was this garden, then, the Eden of the present world? And this man, with such a perception of harm in what his own hands caused to grow,—was he the Adam?

The distrustful gardener, while plucking away the dead leaves or pruning the too luxuriant growth of the shrubs, defended his hands with a pair of thick gloves. Nor were these his only armor. When, in his walk through the garden, he came to the magnificent plant that hung its purple gems beside the marble fountain, he placed a kind of mask over his mouth and nostrils, as if all this beauty did but conceal a deadlier malice; but, finding his task still too dangerous, he drew back, removed the mask, and called loudly, but in the infirm voice of a person affected with inward disease,—

"Beatrice! Beatrice!"

"Here am I, my father. What would you?" cried a rich and youthful voice from the window of the opposite house—a voice as rich as a tropical sunset, and which made Giovanni, though he knew not why, think of deep hues of purple or crimson and of perfumes heavily delectable. "Are you in the garden?"

"Yes, Beatrice," answered the gardener, "and I need your help."

Soon there emerged from under a sculptured portal the figure of a young girl, arrayed with as much richness of taste as the most splendid of the flowers, beautiful as the day, and with a bloom so deep and vivid that one shade more would have been too much. She looked redundant with life, health, and energy; all of which attributes were bound down and compressed, as it were, and girdled tensely, in their luxuriance, by her virgin zone. Yet Giovanni's fancy must have grown morbid while he looked down into the garden; for the impression which the fair stranger made upon him was as if here were another flower, the human sister of those vegetable ones, as beautiful as they, more beautiful than the richest of them, but still to be touched only with a glove, nor to be approached without a mask. As Beatrice came down the garden path, it was observable that she handled and inhaled the odor of several of the plants which her father had most sedulously avoided.

"Here, Beatrice," said the latter, "see how many needful offices require to be done to our chief treasure. Yet, shattered as I am, my life might pay the penalty of approaching it so closely as circumstances demand. Henceforth, I fear, this plant must be consigned to your sole charge."

"And gladly will I undertake it," cried again the rich tones of the young lady, as she bent towards the magnificent plant and opened her arms as if to embrace it. "Yes, my sister, my splendor, it shall be Beatrice's task to nurse and serve thee; and thou shalt reward her with thy kisses and perfumed breath, which to her is as the breath of life."

Then, with all the tenderness in her manner that was so strikingly expressed in her words, she busied herself with such attentions as the plant seemed to require; and Giovanni, at his lofty window, rubbed his eyes and almost doubted whether it were a girl tending her favorite flower, or one sister performing the duties of affection to another. The scene soon terminated. Whether Dr. Rappaccini had finished his labors in the garden, or that his watchful eye had caught the stranger's face, he now took his daughter's arm and retired. Night was already closing in; oppressive exhalations seemed to proceed from the plants and steal upward past the open window; and Giovanni, closing the lattice, went to his couch and dreamed of a rich flower and beautiful girl. Flower and maiden were different, and yet the same, and fraught with some strange peril in either shape.

But there is an influence in the light of morning that tends to rectify whatever errors of fancy, or even of judgment, we may have incurred during the sun's decline, or among the shadows of the night, or in the less wholesome glow of moonshine. Giovanni's first movement, on starting from sleep, was to throw open the window and gaze down into the garden which his dreams had made so fertile of mysteries. He was surprised and a little ashamed to find how real and matter-of-fact an affair it proved to be, in the first

rays of the sun which gilded the dew-drops that hung upon leaf and blossom, and, while giving a brighter beauty to each rare flower, brought everything within the limits of ordinary experience. The young man rejoiced that, in the heart of the barren city, he had the privilege of overlooking this spot of lovely and luxuriant vegetation. It would serve, he said to himself, as a symbolic language to keep him in communion with Nature. Neither the sickly and thoughtworn Dr. Giacomo Rappaccini, it is true, nor his brilliant daughter, were now visible; so that Giovanni could not determine how much of the singularity which he attributed to both was due to their own qualities and how much to his wonder-working fancy; but he was inclined to take a most rational view of the whole matter.

In the course of the day he paid his respects to Signor Pietro Baglioni, professor of medicine in the university, a physician of eminent repute, to whom Giovanni had brought a letter of introduction. The professor was an elderly personage, apparently of genial nature, and habits that might almost be called jovial. He kept the young man to dinner, and made himself very agreeable by the freedom and liveliness of his conversation, especially when warmed by a flask or two of Tuscan wine. Giovanni, conceiving that men of science, inhabitants of the same city, must needs be on familiar terms with one another, took an opportunity to mention the name of Dr. Rappaccini. But the professor did not respond with so much cordiality as he had anticipated.

"Ill would it become a teacher of the divine art of medicine," said Professor Pietro Baglioni, in answer to a question of Giovanni, "to withhold due and well-considered praise of a physician so eminently skilled as Rappaccini; but, on the other hand, I should answer it but scantily to my conscience were I to permit a worthy youth like yourself, Signor Giovanni, the son of an ancient friend, to imbibe erroneous ideas respecting a man

who might hereafter chance to hold your life and death in his hands. The truth is, our worshipful Dr. Rappacemi has as much science as any member of the faculty—with perhaps one single exception—in Padua, or all Italy: but there are certain grave objections to his professional character.”

“And what are they?” asked the young man.

“Has my friend Giovanni any disease of body or heart, that he is so inquisitive about physicians?” said the professor, with a smile. “But as for Rappacemi, it is said of him—and I, who know the man well, can answer for its truth—that he cares infinitely more for science than for mankind. His patients are interesting to him only as subjects for some new experiment. He would sacrifice human life, his own among the rest, or whatever else was dearest to him, for the sake of adding so much as a grain of mustard seed to the great heap of his accumulated knowledge.”

“Methinks he is an awful man indeed,” remarked Guasconti, mentally recalling the cold and purely intellectual aspect of Rappacemi. “And yet, worshipful professor, is it not a noble spirit? Are there many men capable of so spiritual a love of science?”

“God forbid,” answered the professor, somewhat testily. “at least, unless they take sounder views of the healing art than those adopted by Rappacemi. It is his theory that all medicinal virtues are comprised within those substances which we term vegetable poisons. These he cultivates with his own hands, and is said even to have produced new varieties of poison, more horribly deleterious than Nature, without the assistance of this learned person, would ever have plagued the world withal. That the signor doctor does less mischief than might be expected with such dangerous substances is undeniable. Now and then, it must be owned, he has effected, or seemed to effect, a marvellous cure; but, to tell you my private mind, Signor Giovanni, he should receive little credit for such instances of success,—they being probably

the work of chance,—but should be held strictly accountable for his failures, which may justly be considered his own work.”

The youth might have taken Baglioni's opinions with many grains of allowance had he known that there was a professional warfare of long continuance between him and Dr. Rappacemi, in which the latter was generally thought to have gained the advantage. If the reader be inclined to judge for himself, we refer him to certain black-letter tracts on both sides, preserved in the medical department of the University of Padua.

“I know not, most learned professor,” returned Giovanni, after musing on what had been said of Rappacemi's exclusive zeal for science,—“I know not how dearly this physician may love his art, but surely there is one object more dear to him. He has a daughter.”

“Aha!” cried the professor, with a laugh. “So now our friend Giovanni's secret is out. You have heard of this daughter, whom all the young men in Padua are wild about, though not half a dozen have ever had the good hap to see her face. I know little of the Signora Beatrice save that Rappacemi is said to have instructed her deeply in his science, and that, young and beautiful as fame reports her, she is already qualified to fill a professor's chair. Perchance her father destines her for mine! Other absurd rumors there be, not worth talking about or listening to. So now, Signor Giovanni, drink off your glass of lachryma.”

Guasconti returned to his lodgings somewhat heated with the wine he had quaffed, and which caused his brain to swim with strange fantasies in reference to Dr. Rappacemi and the beautiful Beatrice. On his way, happening to pass by a florist's, he bought a fresh bouquet of flowers.

Ascending to his chamber, he seated himself near the window, but within the shadow thrown by the depth of the wall, so that he could look down into the garden with little risk of being discovered. All beneath his eye was a solitude. The strange

plants were basking in the sunshine, and now and then nodding gently to one another, as if in acknowledgment of sympathy and kindred. In the midst, by the shattered fountain, grew the magnificent shrub, with its purple gems clustering all over it; they glowed in the air, and gleamed back again out of the depths of the pool, which thus seemed to overflow with colored radiance from the rich reflection that was steeped in it. At first, as we have said, the garden was a solitude. Soon, however,—as Giovanni had half hoped, half feared, would be the case,—a figure appeared beneath the antique sculptured portal, and came down between the rows of plants, inhaling their various perfumes as if she were one of those beings of old classic fable that lived upon sweet odors. On again beholding Beatrice, the young man was even startled to perceive how much her beauty exceeded his recollection of it; so brilliant, so vivid, was its character, that she glowed amid the sunlight, and, as Giovanni whispered to himself, positively illuminated the more shadowy intervals of the garden path. Her face being now more revealed than on the former occasion, he was struck by its expression of simplicity and sweetness,—qualities that had not entered into his idea of her character, and which made him ask anew what manner of mortal she might be. Nor did he fail again to observe, or imagine, an analogy between the beautiful girl and the gorgeous shrub that hung its gemlike flowers over the fountain,—a resemblance which Beatrice seemed to have indulged a fantastic humor in heightening, both by the arrangement of her dress and the selection of its hues.

Approaching the shrub, she threw open her arms, as with a passionate ardor, and drew its branches into an intimate embrace—so intimate that her features were hidden in its leafy bosom and her glistening ringlets all intermingled with the flowers.

"Give me thy breath, my sister," exclaimed Beatrice; "for I am faint with common air. And give me this flower of thine, which I separate with gentlest fingers

from the stem and place it close beside my heart."

With these words the beautiful daughter of Rappaccini plucked one of the richest blossoms of the shrub, and was about to fasten it in her bosom. But now, unless Giovanni's draughts of wine had bewildered his senses, a singular incident occurred. A small orange-colored reptile, of the lizard or chameleon species, chanced to be creeping along the path, just at the feet of Beatrice. It appeared to Giovanni,—but, at the distance from which he gazed, he could scarcely have seen anything so minute,—it appeared to him, however, that a drop or two of moisture from the broken stem of the flower descended upon the lizard's head. For an instant the reptile contorted itself violently, and then lay motionless in the sunshine. Beatrice observed this remarkable phenomenon, and crossed herself, sadly, but without surprise; nor did she therefore hesitate to arrange the fatal flower in her bosom. There it blushed, and almost glimmered with the dazzling effect of a precious stone, adding to her dress and aspect the one appropriate charm which nothing else in the world could have supplied. But Giovanni, out of the shadow of his window, bent forward and shrank back, and murmured and trembled.

"Am I awake? Have I my senses?" said he to himself. "What is this being? Beautiful shall I call her, or inexpressibly terrible?"

Beatrice now strayed carelessly through the garden, approaching closer beneath Giovanni's window, so that he was compelled to thrust his head quite out of its concealment in order to gratify the intense and painful curiosity which she excited. At this moment there came a beautiful insect over the garden wall; it had, perhaps, wandered through the city, and found no flowers or verdure among those antique haunts of men until the heavy perfumes of Dr. Rappaccini's shrubs had lured it from afar. Without alighting on the flowers, this winged brightness seemed

to be attracted by Beatrice, and lingered in the air and fluttered about her head. Now, here it could not be but that Giovanni Guasconti's eyes deceived him. Be that as it might, he fancied that, while Beatrice was gazing at the insect with childish delight, it grew faint and fell at her feet; its bright wings shivered; it was dead—from no cause that he could discern, unless it were the atmosphere of her breath. Again Beatrice crossed herself and sighed heavily as she bent over the dead insect.

An impulsive movement of Giovanni drew her eyes to the window. There she beheld the beautiful head of the young man—rather a Grecian than an Italian head, with fair, regular features, and a glistening of gold among his ringlets—gazing down upon her like a being that hovered in mid air. Scarcely knowing what he did, Giovanni threw down the bouquet which he had hitherto held in his hand.

"Signora," said he, "there are pure and healthful flowers. Wear them for the sake of Giovanni Guasconti."

"Thanks, signor," replied Beatrice, with her rich voice, that came forth as it were like a gush of music, and with a mirthful expression half childish and half woman-like. "I accept your gift, and would fain recompense it with this precious purple flower; but if I toss it into the air it will not reach you. So Signor Guasconti must even content himself with my thanks."

She lifted the bouquet from the ground, and then, as if inwardly ashamed at having stepped aside from her maidenly reserve to respond to a stranger's greeting, passed swiftly homeward through the garden. But few as the moments were, it seemed to Giovanni, when she was on the point of vanishing beneath the sculptured portal, that his beautiful bouquet was already beginning to wither in her grasp. It was an idle thought; there could be no possibility of distinguishing a faded flower from a fresh one at so great a distance.

For many days after this incident the young man avoided the window that looked

into Dr. Rappaccini's garden, as if something ugly and monstrous would have blasted his eyesight had he been betrayed into a glance. He felt conscious of having put himself, to a certain extent, within the influence of an unintelligible power by the communication which he had opened with Beatrice. The wisest course would have been, if his heart were in any real danger, to quit his lodgings and Padua itself at once; the next wiser, to have accustomed himself, as far as possible, to the familiar and daylight view of Beatrice—thus bringing her rigidly and systematically within the limits of ordinary experience. Least of all, while avoiding her sight, ought Giovanni to have remained so near this extraordinary being that the proximity and possibility even of intercourse should give a kind of substance and reality to the wild vagaries which his imagination ran riot continually in producing. Guasconti had not a deep heart—or, at all events, its depths were not sounded now; but he had a quick fancy, and an ardent southern temperament, which rose every instant to a higher fever pitch. Whether or no Beatrice possessed those terrible attributes, that fatal breath, the affinity with those so beautiful and deadly flowers which were indicated by what Giovanni had witnessed, she had at least instilled a fierce and subtle poison into his system. It was not love, although her rich beauty was a madness to him; nor horror, even while he fancied her spirit to be imbued with the same baneful essence that seemed to pervade her physical frame; but a wild offspring of both love and horror that had each parent in it, and burned like one and shivered like the other. Giovanni knew not what to dread; still less did he know what to hope; yet hope and dread kept a continual warfare in his breast, alternately vanquishing one another and starting up afresh to renew the contest. Blessed are all simple emotions, be they dark or bright! it is the lurid intermixture of the two that produces the illuminating blaze of the infernal regions.

Sometimes he endeavored to assuage the

fever of his spirit by a rapid walk through the streets of Padua or beyond its gates: his footsteps kept time with the throbbings of his brain, so that the walk was apt to accelerate itself to a race. One day he found himself arrested; his arm was seized by a portly personage, who had turned back on recognizing the young man and expended much breath in overtaking him.

"Signor Giovanni! Stay, my young friend!" cried he. "Have you forgotten me? That might well be the case if I were as much altered as yourself."

It was Baglioni, whom Giovanni had avoided ever since their first meeting, from a doubt that the professor's sagacity would look too deeply into his secrets. Endeavoring to recover himself, he stared forth wildly from his inner world into the outer one and spoke like a man in a dream.

"Yes; I am Giovanni Guasconti. You are Professor Pietro Baglioni. Now let me pass!"

"Not yet, not yet, Signor Giovanni Guasconti," said the professor, smiling, but at the same time scrutinizing the youth with an earnest glance. "What! did I grow up side by side with your father? and shall his son pass me like a stranger in these old streets of Padua? Stand still, Signor Giovanni; for we must have a word or two before we part."

"Speedily, then, most worshipful professor, speedily," said Giovanni, with feverish impatience. "Does not your worship see that I am in haste?"

Now, while he was speaking there came a man in black along the street, stooping and moving feebly like a person in inferior health. His face was all overspread with a most sickly and sallow hue, but yet so pervaded with an expression of piercing and active intellect that an observer might easily have overlooked the merely physical attributes and have seen only this wonderful energy. As he passed, this person exchanged a cold and distant salutation with Baglioni, but fixed his eyes upon Giovanni with an intentness that seemed to bring out whatever was within him

worthy of notice. Nevertheless, there was a peculiar quietness in the look, as if taking merely a speculative, not a human, interest in the young man.

"It is Dr. Rappaccini!" whispered the professor when the stranger had passed. "Has he ever seen your face before?"

"Not that I know," answered Giovanni, starting at the name.

"He *has* seen you! he must have seen you!" said Baglioni, hastily. "For some purpose or other, this man of science is making a study of you. I know that look of his! It is the same that coldly illuminates his face as he bends over a bird, a mouse, or a butterfly, which, in pursuance of some experiment, he has killed by the perfume of a flower; a look as deep as Nature itself, but without Nature's warmth of love. Signor Giovanni, I will stake my life upon it, you are the subject of one of Rappaccini's experiments!"

"Will you make a fool of me?" cried Giovanni, passionately. "*That*, signor professor, were an untoward experiment."

"Patience! patience!" replied the imperturbable professor. "I tell thee, my poor Giovanni, that Rappaccini has a scientific interest in thee. Thou hast fallen into fearful hands! And the Signora Beatrice,—what part does she act in this mystery?"

But Guasconti, finding Baglioni's pertinacity intolerable, here broke away, and was gone before the professor could again seize his arm. He looked after the young man intently and shook his head.

"This must not be," said Baglioni to himself. "The youth is the son of my old friend, and shall not come to any harm from which the arcana of medical science can preserve him. Besides, it is too insufferable an impertinence in Rappaccini, thus to snatch the lad out of my own hands, as I may say, and make use of him for his infernal experiments. This daughter of his! It shall be looked to. Perchance, most learned Rappaccini, I may foil you where you little dream of it!"

Meanwhile Giovanni had pursued a cir-

cautious route, and at length found himself at the door of his lodgings. As he crossed the threshold he was met by old Lisabetta, who smirked and smiled, and was evidently desirous to attract his attention; vainly, however, as the ebullition of his feelings had momentarily subsided into a cold and dull vacancy. He turned his eyes full upon the withered face that was puckering itself into a smile, but seemed to behold it not. The old dame, therefore, laid her grasp upon his cloak.

"Signor! signor!" whispered she, still with a smile over the whole breadth of her visage, so that it looked not unlike a grotesque carving in wood, darkened by centuries. "Listen, signor! There is a private entrance into the garden!"

"What do you say?" exclaimed Giovanni, turning quickly about, as if an inanimate thing should start into feverish life. "A private entrance into Dr. Rappaccini's garden?"

"Hush! hush! not so loud!" whispered Lisabetta, putting her hand over his mouth. "Yes; into the worshipful doctor's garden, where you may see all his fine shrubbery. Many a young man in Padua would give gold to be admitted among those flowers."

Giovanni put a piece of gold into her hand.

"Show me the way," said he.

A surmise, probably excited by his conversation with Baglioni, crossed his mind, that this interposition of old Lisabetta might perchance be connected with the intrigue, whatever were its nature, in which the professor seemed to suppose that Dr. Rappaccini was involving him. But such a suspicion, though it disturbed Giovanni, was inadequate to restrain him. The instant that he was aware of the possibility of approaching Beatrice, it seemed an absolute necessity of his existence to do so. It mattered not whether she were angel or demon; he was irrevocably within her sphere, and must obey the law that whirled him onward, in ever-lessening circles, towards a result which he did not attempt

to foreshadow, and yet, strange to say, there came across him a sudden doubt whether this intense interest on his part were not delusory, whether it were really of so deep and positive a nature as to justify him in now thrusting himself into an incalculable position, whether it were not merely the fantasy of a young man's brain, only slightly or not at all connected with his heart.

He paused, hesitated, turned half about, but again went on. His withered guide led him along several obscure passages, and finally undid a door, through which, as it was opened, there came the sight and sound of rustling leaves, with the broken sunshine glimmering among them. Giovanni stepped forth, and, forcing himself through the entanglement of a shrub that wreathed its tendrils over the hidden entrance, stood beneath his own window in the open area of Dr. Rappaccini's garden.

How often is it the case that, when impossibilities have come to pass and dreams have condensed their misty substance into tangible realities, we find ourselves calm, and even coldly self-possessed, amid circumstances which it would have been a delirium of joy or agony to anticipate! Fate delights to thwart us thus. Passion will choose his own time to rush upon the scene, and lingers sluggishly behind when an appropriate adjustment of events would seem to summon his appearance. So was it now with Giovanni. Day after day his pulses had throbbed with feverish blood at the improbable idea of an interview with Beatrice, and of standing with her, face to face, in this very garden, basking in the Oriental sunshine of her beauty, and snatching from her full gaze the mystery which he deemed the riddle of his own existence. But now there was a singular and untimely equanimity within his breast. He threw a glance around the garden to discover if Beatrice or her father were present, and, perceiving that he was alone, began a critical observation of the plants.

The aspect of one and all of them dis-

satisfied him; their gorgeousness seemed fierce, passionate, and even unnatural. There was hardly an individual shrub which a wanderer, straying by himself through a forest, would not have been startled to find growing wild, as if an unearthly face had glared at him out of the thicket. Several also would have shocked a delicate instinct by an appearance of artificialness indicating that there had been such commixture, and, as it were, adultery, of various vegetable species, that the production was no longer of God's making, but the monstrous offspring of man's depraved fancy, glowing with only an evil mockery of beauty. They were probably the result of experiment, which in one or two cases had succeeded in mingling plants individually lovely into a compound possessing the questionable and ominous character that distinguished the whole growth of the garden. In fine, Giovanni recognized but two or three plants in the collection, and those of a kind that he well knew to be poisonous. While busy with these contemplations he heard the rustling of a silken garment, and, turning, beheld Beatrice emerging from beneath the sculptured portal.

Giovanni had not considered with himself what should be his deportment; whether he should apologize for his intrusion into the garden, or assume that he was there with the privacy at least, if not by the desire, of Dr. Rappaccini or his daughter; but Beatrice's manner placed him at his ease, though leaving him still in doubt by what agency he had gained admittance. She came lightly along the path and met him near the broken fountain. There was surprise in her face, but brightened by a simple and kind expression of pleasure.

"You are a connoisseur in flowers, signor," said Beatrice, with a smile, alluding to the bouquet which he had flung her from the window. "It is no marvel, therefore, if the sight of my father's rare collection has tempted you to take a nearer view. If he were here, he could tell you

many strange and interesting facts as to the nature and habits of these shrubs; for he has spent a lifetime in such studies, and this garden is his world."

"And yourself, lady," observed Giovanni, "if fame says true,—you likewise are deeply skilled in the virtues indicated by these rich blossoms and these spicy perfumes. Would you deign to be my instructress, I should prove an apter scholar than if taught by Signor Rappaccini himself."

"Are there such idle rumors?" asked Beatrice, with the music of a pleasant laugh. "Do people say that I am skilled in my father's science of plants? What a jest is there! No; though I have grown up among these flowers, I know no more of them than their hues and perfume, and sometimes methinks I would fain rid myself of even that small knowledge. There are many flowers here, and those not the least brilliant, that shock and offend me when they meet my eye. But pray, signor, do not believe these stories about my science. Believe nothing of me save what you see with your own eyes."

"And must I believe all that I have seen with my own eyes?" asked Giovanni, pointedly, while the recollection of former scenes made him shrink. "No, signora; you demand too little of me. Bid me believe nothing save what comes from your own lips."

It would appear that Beatrice understood him. There came a deep flush to her cheek, but she looked full into Giovanni's eyes, and responded to his gaze of uneasy suspicion with a queenlike haughtiness.

"I do so bid you, signor," she replied. "Forget whatever you may have fancied in regard to me. If true to the outward senses, still it may be false in its essence; but the words of Beatrice Rappaccini's lips are true from the depths of the heart outward. Those you may believe."

A fervor glowed in her whole aspect and beamed upon Giovanni's consciousness like the light of truth itself; but while she

spoke there was a fragrance in the atmosphere around her, rich and delightful, though evanescent, yet which the young man, from an indefinable reluctance, scarcely dared to draw into his lungs. It might be the odor of the flowers. Could it be Beatrice's breath which thus embalmed her words with a strange richness, as if by steeping them in her heart? A faintness passed like a shadow over Giovanni and flitted away; he seemed to gaze through the beautiful girl's eyes into her transparent soul, and felt no more doubt or fear.

The tinge of passion that had colored Beatrice's manner vanished, she became gay, and appeared to derive a pure delight from her communion with the youth not unlike what the maiden of a lonely island might have felt conversing with a voyager from the civilized world. Evidently her experience of life had been confined within the limits of that garden. She talked now about matters as simple as the daylight or summer clouds, and now asked questions in reference to the city, or Giovanni's distant home, his friends, his mother, and his sisters—questions indicating such seclusion, and such lack of familiarity with modes and forms, that Giovanni responded as if to an infant. Her spirit gushed out before him like a fresh rill that was just catching its first glimpse of the sunlight and wondering at the reflections of earth and sky which were flung into its bosom. There came thoughts, too, from a deep source, and fantasies of a gemlike brilliancy, as if diamonds and rubies sparkled upward among the bubbles of the fountain. Ever and anon there gleamed across the young man's mind a sense of wonder that he should be walking side by side with the being who had so wrought upon his imagination, whom he had idealized in such hues of terror, in whom he had positively witnessed such manifestations of dreadful attributes,—that he should be conversing with Beatrice like a brother, and should find her so human and so maidenlike. But such reflections were only momentary; the

effect of her character was too real not to make itself familiar at once.

In this free intercourse they had strayed through the garden, and now, after many turns among its avenues, were come to the shattered fountain, beside which grew the magnificent shrub, with its treasury of glowing blossoms. A fragrance was diffused from it which Giovanni recognized as identical with that which he had attributed to Beatrice's breath, but incomparably more powerful. As her eyes fell upon it, Giovanni beheld her press her hand to her bosom as if her heart were throbbing suddenly and painfully.

"For the first time in my life," murmured she, addressing the shrub, "I had forgotten thee."

"I remember, signora," said Giovanni, "that you once promised to reward me with one of these living gems for the bouquet which I had the happy boldness to fling to your feet. Permit me now to pluck it as a memorial of this interview."

He made a step towards the shrub with extended hand, but Beatrice darted forward, uttering a shriek that went through his heart like a dagger. She caught his hand and drew it back with the whole force of her slender figure. Giovanni felt her touch thrilling through his fibres.

"Touch it not!" exclaimed she, in a voice of agony. "Not for thy life! It is fatal!"

Then, hiding her face, she fled from him and vanished beneath the sculptured portal. As Giovanni followed her with his eyes, he beheld the emaciated figure and pale intelligence of Dr. Rappaccini, who had been watching the scene, he knew not how long, within the shadow of the entrance.

No sooner was Guasconti alone in his chamber than the image of Beatrice came back to his passionate musings, invested with all the witchery that had been gathering around it ever since his first glimpse of her, and now likewise imbued with a tender warmth of girlish womanhood. She was human; her nature was endowed with

all gentle and feminine qualities; she was worthiest to be worshipped; she was capable, surely, on her part, of the height and heroism of love. Those tokens which he had hitherto considered as proofs of a frightful peculiarity in her physical and moral system were now either forgotten, or, by the subtle sophistry of passion transmitted into a golden crown of enchantment, rendering Beatrice the more admirable by so much as she was the more unique. Whatever had looked ugly was now beautiful; or, if incapable of such a change, it stole away and hid itself among those shapeless half ideas which throng the dim region beyond the daylight of our perfect consciousness. Thus did he spend the night, nor fell asleep until the dawn had begun to awake the slumbering flowers in Dr. Rappaccini's garden, whither Giovanni's dreams doubtless led him. Up rose the sun in his due season, and, flinging his beams upon the young man's eyelids, awoke him to a sense of pain. When thoroughly aroused, he became sensible of a burning and tingling agony in his hand—in his right hand—the very hand which Beatrice had grasped in her own when he was on the point of plucking one of the gemlike flowers. On the back of that hand there was now a purple print like that of four small fingers, and the likeness of a slender thumb upon his wrist.

Oh, how stubbornly does love,—or even that cunning semblance of love which flourishes in the imagination, but strikes no depth of root into the heart,—how stubbornly does it hold its faith until the moment comes when it is doomed to vanish into thin mist! Giovanni wrapped a handkerchief about his hand and wondered what evil thing had stung him, and soon forgot his pain in a reverie of Beatrice.

After the first interview, a second was in the inevitable course of what we call fate. A third; a fourth; and a meeting with Beatrice in the garden was no longer an incident in Giovanni's daily life, but the whole space in which he might be said to

live; for the anticipation and memory of that ecstatic hour made up the remainder. Nor was it otherwise with the daughter of Rappaccini. She watched for the youth's appearance, and flew to his side with confidence as unreserved as if they had been playmates from early infancy—as if they were such playmates still. If, by any unwonted chance, he failed to come at the appointed moment, she stood beneath the window and sent up the rich sweetness of her tones to float around him in his chamber and echo and reverberate throughout his heart: "Giovanni! Giovanni! Why tarriest thou? Come down!" And down he hastened into that Eden of poisonous flowers.

But, with all this intimate familiarity, there was still a reserve in Beatrice's demeanor, so rigidly and invariably sustained that the idea of infringing it scarcely occurred to his imagination. By all appreciable signs, they loved; they had looked love with eyes that conveyed the holy secret from the depths of one soul into the depths of the other, as if it were too sacred to be whispered by the way; they had even spoken love in those gushes of passion when their spirits darted forth in articulated breath like tongues of long-hidden flame; and yet there had been no seal of lips, no clasp of hands, nor any slightest caress such as love claims and hallows. He had never touched one of the gleaming ringlets of her hair; her garment—so marked was the physical barrier between them—had never been waved against him by a breeze. On the few occasions when Giovanni had seemed tempted to overstep the limit, Beatrice grew so sad, so stern, and withal wore such a look of desolate separation, shuddering at itself, that not a spoken word was requisite to repel him. At such times he was startled at the horrible suspicions that rose, monster-like, out of the caverns of his heart and stared him in the face; his love grew thin and faint as the morning mist, his doubts alone had sub-

stance. But, when Beatrice's face brightened again after the momentary shadow, she was transformed at once from the mysterious, questionable being whom he had watched with so much awe and horror; she was now the beautiful and unsophisticated girl whom he felt his spirit knew with a certainty beyond all other knowledge.

A considerable time had now passed since Giovanni's last meeting with Baghoni. One morning, however, he was disagreeably surprised by a visit from the professor, whom he had scarcely thought of for whole weeks, and would willingly have forgotten still longer. Given up as he had long been to a pervading excitement, he could tolerate no companions except upon condition of their perfect sympathy with his present state of feeling. Such sympathy was not to be expected from Professor Baghoni.

The visitor chatted carelessly for a few moments about the gossip of the city and the university, and then took up another topic.

"I have been reading an old classic author lately," said he, "and met with a story that strangely interested me. Possibly you may remember it. It is of an Indian prince, who sent a beautiful woman as a present to Alexander the Great. She was as lovely as the dawn and gorgeous as the sunset; but what especially distinguished her was a certain rich perfume in her breath—richer than a garden of Persian roses. Alexander, as was natural to a youthful conqueror, fell in love at first sight with this magnificent stranger; but a certain sage physician, happening to be present, discovered a terrible secret in regard to her."

"And what was that?" asked Giovanni, turning his eyes downward to avoid those of the professor.

"That this lovely woman," continued Baghoni, with emphasis, "had been nourished with poisons from her birth upward, until her whole nature was so imbued with them that she herself had become the deadliest poison in existence. Poison was her element of life. With that rich perfume

of her breath she blasted the very air. Her love would have been poison—her embrace death. Is not this a marvellous tale?"

"A childish fable," answered Giovanni, nervously starting from his chair "I marvel how your worship finds time to read such nonsense among your graver studies."

"By the by," said the professor, looking uneasily about him, "what singular fragrance is this in your apartment? Is it the perfume of your gloves? It is faint, but delicious; and yet, after all, by no means agreeable. Were I to breathe it long, methinks it would make me ill. It is like the breath of a flower, but I see no flowers in the chamber."

"Nor are there any," replied Giovanni, who had turned pale as the professor spoke, "nor, I think, is there any fragrance except in your worship's imagination. Odors, being a sort of element combined of the sensual and the spiritual, are apt to deceive us in this manner. The recollection of a perfume, the bare idea of it, may easily be mistaken for a present reality."

"Ay, but my sober imagination does not often play such tricks," said Baghoni. "and, were I to fancy any kind of odor, it would be that of some vile apothecary drug, wherewith my fingers are likely enough to be imbued. Our worshipful friend Rappaccini, as I have heard, tinctures his medicaments with odors richer than those of Araby. Doubtless, likewise, the fair and learned Signora Beatrice would minister to her patients with draughts as sweet as a maiden's breath, but woe to him that sips them!"

Giovanni's face evinced many contending emotions. The tone in which the professor alluded to the pure and lovely daughter of Rappaccini was a torture to his soul; and yet the intimation of a view of her character, opposite to his own, gave instantaneous distinctness to a thousand dim suspicions, which now grinned at him like so many demons. But he strove hard to quell them and to respond to Baghioni with a true lover's perfect faith.

"Signor professor," said he, "you were

my father's friend, perchance, too, it is your purpose to act a friendly part towards his son. I would fain feel nothing towards you save respect and deference; but I pray you to observe, signor, that there is one subject on which we must not speak. You know not the Signora Beatrice. You cannot, therefore, estimate the wrong—the blasphemy, I may even say—that is offered to her character by a light or injurious word."

"Giovanni! my poor Giovanni!" answered the professor, with a calm expression of pity, "I know this wretched girl far better than yourself. You shall hear the truth in respect to the poisoner Rappaccini and his poisonous daughter; yes, poisonous as she is beautiful. Listen, for, even should you do violence to my gray hairs, it shall not silence me. That old fable of the Indian woman has become a truth by the deep and deadly science of Rappaccini and in the person of the lovely Beatrice."

Giovanni groaned and hid his face.

"Her father," continued Baghioni, "was not restrained by natural affection from offering up his child in this horrible manner as the victim of his insane zeal for science, for, let us do him justice, he is as true a man of science as ever distilled his own heart in an alembic. What, then, will be your fate? Beyond a doubt you are selected as the material of some new experiment. Perhaps the result is to be death; perhaps a fate more awful still. Rappaccini, with what he calls the interest of science before his eyes, will hesitate at nothing."

"It is a dream," muttered Giovanni to himself; "surely it is a dream."

"But," resumed the professor, "be of good cheer, son of my friend. It is not yet too late for the rescue. Possibly we may even succeed in bringing back this miserable child within the limits of ordinary nature, from which her father's madness has estranged her. Behold this little silver vase! It was wrought by the hands of the renowned Benvenuto Cellini,³ and is well

worthy to be a love gift to the fairest dame in Italy. But its contents are invaluable. One little sip of this antidote would have rendered the most virulent poisons of the Borgias innocuous. Doubt not that it will be as efficacious against those of Rappaccini. Bestow the vase, and the precious liquid within it, on your Beatrice, and hopefully await the result."

Baghioni laid a small, exquisitely wrought silver vial on the table and withdrew, leaving what he had said to produce its effect upon the young man's mind.

"We will thwart Rappaccini yet," thought he, chuckling to himself, as he descended the stairs. "but, let us confess the truth of him, he is a wonderful man—a wonderful man indeed; a vile empiric, however, in his practice, and therefore not to be tolerated by those who respect the good old rules of the medical profession."

Throughout Giovanni's whole acquaintance with Beatrice, he had occasionally, as we have said, been haunted by dark surmises as to her character, yet so thoroughly had she made herself felt by him as a simple, natural, most affectionate, and guileless creature, that the image now held up by Professor Baghioni looked as strange and incredible as if it were not in accordance with his own original conception. True, there were ugly recollections connected with his first glimpses of the beautiful girl; he could not quite forget the bouquet that withered in her grasp, and the insect that perished amid the sunny air, by no ostensible agency save the fragrance of her breath. These incidents, however, dissolving in the pure light of her character, had no longer the efficacy of facts, but were acknowledged as mistaken fantasies, by whatever testimony of the senses they might appear to be substantiated. There is something truer and more real than what we can see with the eyes and touch with the finger. On such better evidence had Giovanni founded his confidence in Beatrice,

³ Renaissance artist (1500-1571), whose *Autobiography* is one of the world's classics.

though rather by the necessary force of her high attributes than by any deep and generous faith on his part. But now his spirit was incapable of sustaining itself at the height to which the early enthusiasm of passion had exalted it; he fell down, grovelling among earthly doubts, and defiled therewith the pure whiteness of Beatrice's image. Not that he gave her up; he did but distrust. He resolved to institute some decisive test that should satisfy him, once for all, whether there were those dreadful peculiarities in her physical nature which could not be supposed to exist without some corresponding monstrosity of soul. His eyes, gazing down afar, might have deceived him as to the lizard, the insect, and the flowers; but if he could witness, at the distance of a few paces, the sudden blight of one fresh and healthful flower in Beatrice's hand, there would be room for no further question. With this idea he hastened to the florist's and purchased a bouquet that was still gemmed with the morning dew-drops.

It was now the customary hour of his daily interview with Beatrice. Before descending into the garden, Giovanni failed not to look at his figure in the mirror,—a vanity to be expected in a beautiful young man, yet, as displaying itself at that troubled and feverish moment, the token of a certain shallowness of feeling and insincerity of character. He did gaze, however, and said to himself that his features had never before possessed so rich a grace, nor his eyes such vivacity, nor his cheeks so warm a hue of superabundant life.

"At least," thought he, "her poison has not yet insinuated itself into my system. I am no flower to perish in her grasp."

With that thought he turned his eyes on the bouquet, which he had never once laid aside from his hand. A thrill of indefinable horror shot through his frame on perceiving that those dewy flowers were already beginning to droop; they wore the aspect of things that had been fresh and lovely yesterday. Giovanni grew white as marble, and stood motionless before the

mirror, staring at his own reflection there as at the likeness of something frightful. He remembered Baglioni's remark about the fragrance that seemed to pervade the chamber. It must have been the poison in his breath! Then he shuddered—shuddered at himself. Recovering from his stupor, he began to watch with curious eye a spider that was busily at work hanging its web from the antique cornice of the apartment, crossing and recrossing the artful system of interwoven lines—as vigorous and active a spider as ever dangled from an old ceiling. Giovanni bent towards the insect, and emitted a deep, long breath. The spider suddenly ceased its toil, the web vibrated with a tremor originating in the body of the small artisan. Again Giovanni sent forth a breath, deeper, longer, and imbued with a venomous feeling out of his heart: he knew not whether he were wicked, or only desperate. The spider made a convulsive gripe with his limbs and hung dead across the window.

"Accursed! accursed!" muttered Giovanni, addressing himself. "Hast thou grown so poisonous that this deadly insect perishes by thy breath?"

At that moment a rich, sweet voice came floating up from the garden.

"Giovanni! Giovanni! It is past the hour! Why tarriest thou? Come down!"

"Yes," muttered Giovanni again. "She is the only being whom my breath may not slay! Would that it might!"

He rushed down, and in an instant was standing before the bright and loving eyes of Beatrice. A moment ago his wrath and despair had been so fierce that he could have desired nothing so much as to wither her by a glance; but with her actual presence there came influences which had too real an existence to be at once shaken off: recollections of the delicate and benign power of her feminine nature, which had so often enveloped him in a religious calm; recollections of many a holy and passionate outgush of her heart, when the pure fountain had been unsealed from its depths and made visible in its transparency to

his mental eye; recollections which, had Giovanni known how to estimate them, would have assured him that all this ugly mystery was but an earthly illusion, and that, whatever mist of evil might seem to have gathered over her, the real Beatrice was a heavenly angel. Incapable as he was of such high faith, still her presence had not utterly lost its magic. Giovanni's rage was quelled into an aspect of sullen insensibility. Beatrice, with a quick spiritual sense, immediately felt that there was a gulf of blackness between them which neither he nor she could pass. They walked on together, sad and silent, and came thus to the marble fountain and to its pool of water on the ground, in the midst of which grew the shrub that bore gem-like blossoms. Giovanni was affrighted at the eager enjoyment—the appetite, as it were—with which he found himself inhaling the fragrance of the flowers.

"Beatrice," asked he, abruptly, "whence came this shrub?"

"My father created it," answered she, with simplicity.

"Created it! created it!" repeated Giovanni. "What mean you, Beatrice?"

"He is a man fearfully acquainted with the secrets of Nature," replied Beatrice; "and, at the hour when I first drew breath, this plant sprang from the soil, the offspring of his science, of his intellect, while I was but his earthly child. Approach it not!" continued she, observing with terror that Giovanni was drawing nearer to the shrub. "It has qualities that you little dream of. But I, dearest Giovanni,—I grew up and blossomed with the plant and was nourished with its breath. It was my sister, and I loved it with a human affection; for, alas!—hast thou not suspected it?—there was an awful doom."

Here Giovanni frowned so darkly upon her that Beatrice paused and trembled. But her faith in his tenderness reassured her, and made her blush that she had doubted for an instant.

"There was an awful doom," she con-

tinued, "the effect of my father's fatal love of science, which estranged me from all society of my kind. Until Heaven sent thee, dearest Giovanni, oh, how lonely was thy poor Beatrice!"

"Was it a hard doom?" asked Giovanni, fixing his eyes upon her.

"Only of late have I known how hard it was," answered she, tenderly. "Oh, yes: but my heart was torpid, and therefore quiet."

Giovanni's rage broke forth from his sullen gloom like a lightning flash out of a dark cloud.

"Accursed one!" cried he, with venomous scorn and anger. "And, finding thy solitude wearisome, thou hast severed me likewise from all the warmth of life and enticed me into thy region of unspeakable horror!"

"Giovanni!" exclaimed Beatrice, turning her large bright eyes upon his face. The force of his words had not found its way into her mind; she was merely thunder-struck.

"Yes, poisonous thing!" repeated Giovanni, beside himself with passion. "Thou hast done it! Thou hast blasted me! Thou hast filled my veins with poison! Thou hast made me as hateful, as ugly, as loathsome and deadly a creature as thyself—a world's wonder of hideous monstrosity! Now, if our breath be happily as fatal to ourselves as to all others, let us join our lips in one kiss of unutterable hatred, and so die!"

"What has befallen me?" murmured Beatrice, with a low moan out of her heart. "Holy Virgin, pity me, a poor heart-broken child!"

"Thou,—dost thou pray?" cried Giovanni, still with the same fiendish scorn. "Thy very prayers, as they come from thy lips, taint the atmosphere with death. Yes, yes; let us pray! Let us to church and dip our fingers in the holy water at the portal! They that come after us will perish as by a pestilence! Let us sign crosses in the air! It will be scattering curses abroad in the likeness of holy symbols!"

"Giovanni," said Beatrice, calmly, for her grief was beyond passion, "why dost thou join thyself with me thus in those terrible words? I, it is true, am the horrible thing thou namest me. But thou,—what hast thou to do, save with one other shudder at my hideous misery to go forth out of the garden and mingle with thy race, and forget that there ever crawled on earth such a monster as poor Beatrice?"

"Dost thou pretend ignorance?" asked Giovanni, scowling upon her. "Behold! this power have I gained from the pure daughter of Rappaccini."

There was a swarm of summer insects flitting through the air in search of the food promised by the flower odors of the fatal garden. They circled round Giovanni's head, and were evidently attracted towards him by the same influence which had drawn them for an instant within the sphere of several of the shrubs. He sent forth a breath among them, and smiled bitterly at Beatrice as at least a score of the insects fell dead upon the ground.

"I see it! I see it!" shrieked Beatrice. "It is my father's fatal science! No, no, Giovanni; it was not I! Never! never! I dreamed only to love thee and be with thee a little time, and so to let thee pass away, leaving but thine image in mine heart, for, Giovanni, believe it, though my body be nourished with poison, my spirit is God's creature, and craves love as its daily food. But my father,—he has united us in this fearful sympathy. Yes; spurn me, tread upon me, kill me! Oh, what is death after such words as thine? But it was not I. Not for a world of bliss would I have done it."

Giovanni's passion had exhausted itself in its outburst from his lips. There now came across him a sense, mournful, and not without tenderness, of the intimate and peculiar relationship between Beatrice and himself. They stood, as it were, in an utter solitude, which would be made none the less solitary by the densest throng of human life. Ought not, then, the desert of humanity around them to press this in-

sulated pair closer together? If they should be cruel to one another, who was there to be kind to them? Besides, thought Giovanni, might there not still be a hope of his returning within the limits of ordinary nature, and leading Beatrice, the redeemed Beatrice, by the hand? O, weak, and selfish, and unworthy spirit, that could dream of an earthly union and earthly happiness as possible, after such deep love had been so bitterly wronged as was Beatrice's love by Giovanni's blighting words! No, no, there could be no such hope. She must pass heavily, with that broken heart, across the borders of Time—she must bathe her hurts in some fount of paradise, and forget her grief in the light of immortality, and *there* be well.

But Giovanni did not know it.

"Dear Beatrice," said he, approaching her, while she shrank away as always at his approach, but now with a different impulse, "dearest Beatrice, our fate is not yet so desperate. Behold! there is a medicine, potent, as a wise physician has assured me, and almost divine in its efficacy. It is composed of ingredients the most opposite to those by which thy awful father has brought this calamity upon thee and me. It is distilled of blessed herbs. Shall we not quaff it together, and thus be purified from evil?"

"Give it me!" said Beatrice, extending her hand to receive the little silver vial which Giovanni took from his bosom. She added, with a peculiar emphasis, "I will drink; but do thou await the result."

She put Baglioni's antidote to her lips; and, at the same moment, the figure of Rappaccini emerged from the portal and came slowly towards the marble fountain. As he drew near, the pale man of science seemed to gaze with a triumphant expression at the beautiful youth and maiden, as might an artist who should spend his life in achieving a picture or a group of statuary and finally be satisfied with his success. He paused; his bent form grew erect with conscious power; he spread out his hands over them in the attitude of a

father imploring a blessing upon his children; but those were the same hands that had thrown poison into the stream of their lives. Giovanni trembled Beatrice shuddered nervously, and pressed her hand upon her heart.

"My daughter," said Rappaccini, "thou art no longer lonely in the world. Pluck one of those precious gems from thy sister shrub and bid thy bridegroom wear it in his bosom. It will not harm him now. My science and the sympathy between thee and him have so wrought within his system that he now stands from common men, as thou dost, daughter of my pride and triumph, from ordinary women. Pass on, then, through the world, most dear to one another and dreadful to all besides!"

"My father," said Beatrice, feebly,—and still as she spoke she kept her hand upon her heart,—"wherefore didst thou inflict this miserable doom upon thy child?"

"Miserable!" exclaimed Rappaccini. "What mean you, foolish girl? Dost thou deem it misery to be endowed with marvellous gifts against which no power nor strength could avail an enemy—misery, to be able to quell the mightiest with a breath—misery, to be as terrible as thou art beautiful? Wouldst thou, then, have preferred the condition of a weak woman, exposed to all evil and capable of none?"

"I would fain have been loved, not feared," murmured Beatrice, sinking down upon the ground. "But now it matters not. I am going, father, where the evil which thou hast striven to mingle with my being will pass away like a dream—like the fragrance of these poisonous flowers, which will no longer taint my breath among the flowers of Eden. Farewell, Giovanni! Thy words of hatred are like lead within my heart; but they, too, will fall away as I ascend. Oh, was there not, from the first, more poison in thy nature than in mine?"

To Beatrice,—so radically had her earthly part been wrought upon by Rappaccini's skill,—as poison had been life, so the powerful antidote was death, and thus the poor victim of man's ingenuity and of

thwarted nature, and of the fatality that attends all such efforts of perverted wisdom, perished there, at the feet of her father and Giovanni. Just at that moment Professor Pietro Baghioni looked forth from the window, and called loudly, in a tone of triumph mixed with horror, to the thunderstricken man of science,—

"Rappaccini! Rappaccini! and is *this* the upshot of your experiment!"

THE AUTHOR MAKES THE READER AC-
QUAINTED WITH HIS ABODE

[1846]

BETWEEN two tall gateposts of rough-hewn stone (the gate itself having fallen from its hinges at some unknown epoch) we beheld the gray front of the old parsonage terminating the vista of an avenue of black ash-trees. It was now a twelve-month since the funeral procession of the venerable clergyman, its last inhabitant, had turned from that gateway towards the village burying-ground. The wheel-track leading to the door, as well as the whole breadth of the avenue, was almost overgrown with grass, affording dainty mouthfuls to two or three vagrant cows and an old white horse who had his own living to pick up along the roadside. The glimmering shadows that lay half asleep between the door of the house and the public highway were a kind of spiritual medium, seen through which the edifice had not quite the aspect of belonging to the material world. Certainly it had little in common with those ordinary abodes which stand so imminent upon the road that every passer-by can thrust his head, as it were, into the domestic circle. From these quiet windows the figures of passing travellers looked too remote and dim to disturb the sense of privacy. In its near retirement and accessible seclusion it was the very spot for the residence of a clergyman,—a man not estranged from human life, yet enveloped in the midst of it with

a veil woven of intermingled gloom and brightness. It was worthy to have been one of the time-honored parsonages of England in which, through many generations, a succession of holy occupants pass from youth to age, and bequeath each an inheritance of sanctity to pervade the house and hover over it as with an atmosphere.

Nor, in truth, had the Old Manse ever been profaned by a lay occupant until that memorable summer afternoon when I entered it as my home. A priest had built it; a priest had succeeded to it; other priestly men from time to time had dwelt in it, and children born in its chambers had grown up to assume the priestly character. It was awful to reflect how many sermons must have been written there. The latest inhabitant alone—he by whose translation to paradise the dwelling was left vacant—had penned nearly three thousand discourses, besides the better, if not the greater, number that gushed living from his lips. How often, no doubt, had he paced to and fro along the avenue, attuning his meditations to the sighs and gentle murmurs, and deep and solemn peals of the wind among the lofty tops of the trees! In that variety of natural utterances he could find something accordant with every passage of his sermon, were it of tenderness or reverential fear. The boughs over my head seemed shadowy with solemn thoughts as well as with rustling leaves. I took shame to myself for having been so long a writer of idle stories, and ventured to hope that wisdom would descend upon me with the falling leaves of the avenue, and that I should light upon an intellectual treasure in the Old Manse well worth those hoards of long-hidden gold which people seek for in moss-grown houses. Profound treatises of morality; a layman's unprofessional and therefore unprejudiced views of religion; histories (such as Bancroft¹ might have written had he taken up his abode here as he once purposed) bright with picture, gleaming over a depth of philosophic thought,—these were the works that might fitly have

flowed from such a retirement. In the humblest event I resolved at least to achieve a novel that should evolve some deep lesson and should possess physical substance enough to stand alone.

In furtherance of my design, and as if to leave me no pretext for not fulfilling it, there was in the rear of the house the most delightful little nook of a study that ever afforded its snug seclusion to a scholar. It was here that Emerson wrote *Nature*; for he was then an inhabitant of the Manse, and used to watch the Assyrian dawn and Paphian sunset and moonrise from the summit of our eastern hill. When I first saw the room its walls were blackened with the smoke of unnumbered years, and made still blacker by the grim prints of Puritan ministers that hung around. These worthies looked strangely like bad angels, or at least like men who had wrestled so continually and so sternly with the devil that somewhat of his sooty fierceness had been imparted to their own visages. They had all vanished now; a cheerful coat of paint and golden-tinted paper-hangings lighted up the small apartment; while the shadow of a willow-tree that swept against the overhanging eaves attempered the cheery western sunshine. In place of the grim prints there was the sweet and lovely head of one of Raphael's Madonnas and two pleasant little pictures of the Lake of Como. The only other decorations were a purple vase of flowers, always fresh, and a bronze one containing graceful ferns. My books (few, and by no means choice; for they were chiefly such waifs as chance had thrown in my way) stood in order about the room, seldom to be disturbed.

The study had three windows, set with little, old-fashioned panes of glass, each with a crack across it. The two on the western side looked, or rather peeped, between the willow branches down into the orchard, with glimpses of the river through the trees. The third, facing northward,

¹ George Bancroft (1800-1891), author of *History of the United States* (1834-74).

commanded a broader view of the river at a spot where its hitherto obscure waters gleam forth into the light of history. It was at this window that the clergyman who then dwelt in the Manse stood watching the outbreak of a long and deadly struggle between two nations; he saw the irregular array of his parishioners on the farther side of the river and the glittering line of the British on the hither bank. He awaited in an agony of suspense the rattle of the musketry. It came, and there needed but a gentle wind to sweep the battle smoke around this quiet house.

Perhaps the reader, whom I cannot help considering as my guest in the Old Manse and entitled to all courtesy in the way of sight-showing,—perhaps he will choose to take a nearer view of the memorable spot. We stand now on the river's brink. It may well be called the Concord, the river of peace and quietness; for it is certainly the most unexcitable and sluggish stream that ever loitered imperceptibly towards its eternity—the sea. Positively, I had lived three weeks beside it before it grew quite clear to my perception which way the current flowed. It never has a vivacious aspect except when a northwestern breeze is vexing its surface on a sunshiny day. From the incurable indolence of its nature, the stream is happily incapable of becoming the slave of human ingenuity, as is the fate of so many a wild, free mountain torrent. While all things else are compelled to subserve some useful purpose, it idles its sluggish life away in lazy liberty, without turning a solitary spindle or affording even water-power enough to grind the corn that grows upon its banks. The torpor of its movement allows it nowhere a bright, pebbly shore, nor so much as a narrow strip of glistening sand, in any part of its course. It slumbers between broad prairies, kissing the long meadow grass, and bathes the overhanging boughs of elder bushes and willows or the roots of elms and ash-trees and clumps of maples. Flags and rushes grow along its plashy shore; the yellow water-lily spreads its broad, flat

leaves on the margin; and the fragrant white pond-lily abounds, generally selecting a position just so far from the river's brink that it cannot be grasped save at the hazard of plunging in.

It is a marvel whence this perfect flower derives its loveliness and perfume, springing as it does from the black mud over which the river sleeps, and where lurk the slimy eel and speckled frog and the mud turtle, whom continual washing cannot cleanse. It is the very same black mud out of which the yellow lily sucks its obscene life and noisome odor. Thus we see, too, in the world that some persons assimilate only what is ugly and evil from the same moral circumstances which supply good and beautiful results—the fragrance of celestial flowers—to the daily life of others.

The reader must not, from any testimony of mine, contract a dislike towards our slumberous stream. In the light of a calm and golden sunset it becomes lovely beyond expression; the more lovely for the quietude that so well accords with the hour, when even the wind, after blustering all day long, usually hushes itself to rest. Each tree and rock, and every blade of grass, is distinctly imaged, and, however unsightly in reality, assumes ideal beauty in the reflection. The minutest things of earth and the broad aspect of the firmament are pictured equally without effort and with the same felicity of success. All the sky glows downward at our feet; the rich clouds float through the unruffled bosom of the stream like heavenly thoughts through a peaceful heart. We will not, then, malign our river as gross and impure while it can glorify itself with so adequate a picture of the heaven that broods above it; or, if we remember its tawny hue and the muddiness of its bed, let it be a symbol that the earthliest human soul has an infinite spiritual capacity and may contain the better world within its depths. But, indeed, the same lesson might be drawn out of any mud puddle in the streets of a city; and, being taught us everywhere, it must be true.

. Come, we have pursued a somewhat devious track in our walk to the battle-ground. Here we are, at the point where the river was crossed by the old bridge, the possession of which was the immediate object of the contest. On the hither side grow two or three elms, throwing a wide circumference of shade, but which must have been planted at some period within the threescore years and ten that have passed since the battle day. On the farther shore, overhung by a clump of elder bushes, we discern the stone abutment of the bridge. Looking down into the river, I once discovered some heavy fragments of the timbers, all green with half a century's growth of water moss; for during that length of time the tramp of horses and human footsteps had ceased along this ancient highway. The stream has here about the breadth of twenty strokes of a swimmer's arm,—a space not too wide when the bullets were whistling across. Old people who dwell hereabouts will point out the very spots on the western bank where our countrymen fell down and died; and on this side of the river an obelisk of granite has grown up from the soil that was fertilized with British blood. The monument, not more than twenty feet in height, is such as it befitted the inhabitants of a village to erect in illustration of a matter of local interest rather than what was suitable to commemorate an epoch of national history. Still, by the fathers of the village this famous deed was done, and their descendants might rightfully claim the privilege of building a memorial.

A humbler token of the fight, yet a more interesting one than the granite obelisk, may be seen close under the stone-wall which separates the battle-ground from the precincts of the parsonage. It is the grave—marked by a small, mossgrown fragment of stone at the head and another at the foot—the grave of two British soldiers who were slain in the skirmish, and have ever since slept peacefully where Zechariah Brown and Thomas Davis buried them. Soon was their warfare ended; a weary

night march from Boston, a rattling volley of musketry across the river, and then these many years of rest. In the long procession of slain invaders who passed into eternity from the battle-fields of the revolution, these two nameless soldiers led the way.

Lowell, the poet, as we were once standing over this grave, told me a tradition in reference to one of the inhabitants below. The story has something deeply impressive, though its circumstances cannot altogether be reconciled with probability. A youth in the service of the clergyman happened to be chopping wood, that April morning, at the back door of the Manse, and when the noise of battle rang from side to side of the bridge he hastened across the intervening field to see what might be going forward. It is rather strange, by the way, that this lad should have been so diligently at work when the whole population of town and country were startled out of their customary business by the advance of the British troops. Be that as it might, the tradition says that the lad now left his task and hurried to the battle-field with the axe still in his hand. The British had by this time retreated, the Americans were in pursuit; and the late scene of strife was thus deserted by both parties. Two soldiers lay on the ground—one was a corpse; but, as the young New Englander drew nigh, the other Briton raised himself painfully upon his hands and knees and gave a ghastly stare into his face. The boy,—it must have been a nervous impulse, without purpose, without thought, and betokening a sensitive and impressible nature rather than a hardened one,—the boy uplifted his axe and dealt the wounded soldier a fierce and fatal blow upon the head.

I could wish that the grave might be opened; for I would fain know whether either of the skeleton soldiers has the mark of an axe in his skull. The story comes home to me like truth. Oftentimes, as an intellectual and moral exercise, I have sought to follow that poor youth through his subsequent career, and observe how his

soul was tortured by the blood stain, contracted as it had been before the long custom of war had robbed human life of its sanctity, and while it still seemed murderous to slay a brother man. This one circumstance has borne more fruit for me than all that history tells us of the fight.²

Many strangers come in the summer time to view the battle-ground. For my own part, I have never found my imagination much excited by this or any other scene of historic celebrity, nor would the placid margin of the river have lost any of its charm for me had men never fought and died there. There is a wilder interest in the tract of land—perhaps a hundred yards in breadth—which extends between the battle-field and the northern face of our Old Manse, with its contiguous avenue and orchard. Here, in some unknown age, before the white man came, stood an Indian village, convenient to the river, whence its inhabitants must have drawn so large a part of their subsistence. The site is identified by the spear and arrowheads, the chisels, and other implements of war, labor, and the chase, which the plough turns up from the soil. You see a splinter of stone, half hidden beneath a sod; it looks like nothing worthy of note; but, if you have faith enough to pick it up, behold a relic! Thoreau, who has a strange faculty of finding what the Indians have left behind them, first set me on the search; and I afterwards enriched myself with some very perfect specimens, so rudely wrought that it seemed almost as if chance had fashioned them. Their great charm consists in this rudeness and in the individuality of each article, so different from the productions of civilized machinery, which shapes everything on one pattern. There is exquisite delight, too, in picking up for one's self an arrowhead that was dropped centuries ago and has never been handled since, and which we thus receive directly from the hand of the red hunter, who purposed to shoot it at his game or at an enemy. Such an incident builds up again the Indian village and its encircling

forest, and recalls to life the painted chiefs and warriors, the squaws at their household toil, and the children sporting among the wigwams, while the little wind-rocked papoose swings from the branch of the tree. It can hardly be told whether it is a joy or a pain, after such a momentary vision, to gaze around in the broad daylight of reality and see stone fences, white houses, potato fields, and men doggedly hoeing in their shirt-sleeves and homespun pantaloons. But this is nonsense. The Old Manse is better than a thousand wigwams.

The Old Manse! We had almost forgotten it, but will return thither through the orchard. This was set out by the last clergyman, in the decline of his life, when the neighbors laughed at the hoary-headed man for planting trees from which he could have no prospect of gathering fruit. Even had that been the case, there was only so much the better motive for planting them, in the pure and unselfish hope of benefiting his successors,—an end so seldom achieved by more ambitious efforts. But the old minister, before reaching his patriarchal age of ninety, ate the apples from this orchard during many years, and added silver and gold to his annual stipend by disposing of the superfluity. It is pleasant to think of him walking among the trees in the quiet afternoons of early autumn and picking up here and there a windfall, while he observes how heavily the branches are weighed down, and computes the number of empty flour barrels that will be filled by their burden. He loved each tree, doubtless, as if it had been his own child. An orchard has a relation to mankind, and readily connects itself with matters of the heart. The trees possess a domestic character; they have lost the wild nature of their forest kindred, and have grown humanized by receiving the care of man as well as by contributing to his wants. There is so much individuality of character, too, among apple-trees that it gives them an

² Hawthorne's unfinished *Septimus Felton* may be regarded in part as fruit of this circumstance.

additional claim to be the objects of human interest. One is harsh and crabbed in its manifestations; another gives us fruit as mild as charity. One is churlish and illiberal, evidently grudging the few apples that it bears, another exhausts itself in free-hearted benevolence. The variety of grotesque shapes into which apple-trees contort themselves has its effect on those who get acquainted with them: they stretch out their crooked branches, and take such hold of the imagination that we remember them as humorists and odd-fellows. And what is more melancholy than the old apple-trees that linger about the spot where once stood a homestead, but where there is now only a ruined chimney rising out of a grassy and weed-grown cellar? They offer their fruit to every wayfarer,—apples that are bitter sweet with the moral of Time's vicissitude.

I have met with no other such pleasant trouble in the world as that of finding myself, with only the two or three mouths which it was my privilege to feed, the sole inheritor of the old clergyman's wealth of fruits. Throughout the summer there were cherries and currants; and then came autumn, with his immense burden of apples, dropping them continually from his overlaid shoulders as he trudged along. In the stillest afternoon, if I listened, the thump of a great apple was audible, falling without a breath of wind, from the mere necessity of perfect ripeness. And, besides, there were pear-trees, that flung down bushels upon bushels of heavy pears; and peach-trees, which, in a good year, tormented me with peaches, neither to be eaten nor kept, nor, without labor and perplexity, to be given away. The idea of an infinite generosity and exhaustless bounty on the part of our Mother Nature was well worth obtaining through such cares as these. That feeling can be enjoyed in perfection only by the natives of summer islands, where the bread-fruit, the cocoa, the palm, and the orange grow spontaneously and hold forth the ever-ready meal; but likewise almost as well

by a man long habituated to city life, who plunges into such a solitude as that of the Old Manse, where he plucks the fruit of trees that he did not plant, and which therefore, to my heterodox taste, bear the closest resemblance to those that grew in Eden. It has been an apothegm these five thousand years, that toil sweetens the bread it earns. For my part (speaking from hard experience, acquired while belaboring the rugged furrows of Brook Farm), I relish best the free gifts of Providence.

Not that it can be disputed that the light toil requisite to cultivate a moderately-sized garden imparts such zest to kitchen vegetables as is never found in those of the market gardener. Childless men, if they would know something of the bliss of paternity, should plant a seed,—be it squash, bean, Indian corn, or perhaps a mere flower or worthless weed,—should plant it with their own hands, and nurse it from infancy to maturity altogether by their own care. If there be not too many of them, each individual plant becomes an object of separate interest. My garden, that skirted the avenue of the Manse, was of precisely the right extent. An hour or two of morning labor was all that it required. But I used to visit and revisit it a dozen times a day, and stand in deep contemplation over my vegetable progeny with a love that nobody could share or conceive of who had never taken part in the process of creation. It was one of the most bewitching sights in the world to observe a hill of beans thrusting aside the soil, or a row of early peas just peeping forth sufficiently to trace a line of delicate green. Later in the season the humming-birds were attracted by the blossoms of a peculiar variety of bean; and they were a joy to me, those little spiritual visitants, for deigning to sip airy food out of my nectar cups. Multitudes of bees used to bury themselves in the yellow blossoms of the summer squashes. This, too, was a deep satisfaction; although when they had laden themselves with sweets they flew away to

some unknown hive, which would give back nothing in requital of what my garden had contributed. But I was glad thus to fling a benefaction upon the passing breeze with the certainty that somebody must profit by it, and that there would be a little more honey in the world to allay the sourness and bitterness which mankind is always complaining of. Yes, indeed; my life was the sweeter for that honey.

Speaking of summer squashes, I must say a word of their beautiful and varied forms. They presented an endless diversity of urns and vases, shallow or deep, scalloped or plain, moulded in patterns which a sculptor would do well to copy, since Art has never invented anything more graceful. A hundred squashes in the garden were worthy, in my eyes at least, of being rendered indestructible in marble. If ever Providence (but I know it never will) should assign me a superfluity of gold, part of it shall be expended for a service of plate, or most delicate porcelain, to be wrought into the shapes of summer squashes gathered from vines which I will plant with my own hands. As dishes for containing vegetables they would be peculiarly appropriate.

But not merely the squeamish love of the beautiful was gratified by my toil in the kitchen garden. There was a hearty enjoyment, likewise, in observing the growth of the crook-necked winter squashes, from the first little bulb, with the withered blossom adhering to it, until they lay strewn upon the soil, big, round fellows, hiding their heads beneath the leaves, but turning up their great yellow rotundities to the noontide sun. Gazing at them, I felt that by my agency something worth living for had been done. A new substance was born into the world. They were real and tangible existences, which the mind could seize hold of and rejoice in. A cabbage, too,—especially the early Dutch cabbage, which swells to a monstrous circumference, until its ambitious heart often bursts asunder,—is a matter to be proud of when we can claim a share with the earth and sky in

producing it. But, after all, the hugest pleasure is reserved until these vegetable children of ours are smoking on the table, and we, like Saturn, make a meal of them.

What with the river, the battle-field, the orchard and the garden, the reader begins to despair of finding his way back into the Old Manse. But in agreeable weather it is the truest hospitality to keep him out-of-doors. I never grew quite acquainted with my habitation till a long spell of sulky rain had confined me beneath its roof. There could not be a more sombre aspect of external Nature than as then seen from the windows of my study. The great willow-tree had caught and retained among its leaves a whole cataract of water, to be shaken down at intervals by the frequent gusts of wind. All day long, and for a week together, the rain was drip-drip-dripping and splash-splash-splashing from the eaves, and bubbling and foaming into the tubs beneath the spouts. The old, unpainted shingles of the house and out-buildings were black with moisture; and the mosses of ancient growth upon the walls looked green and fresh, as if they were the newest things and afterthought of Time. The usually mirrored surface of the river was blurred by an infinity of raindrops; the whole landscape had a completely water-soaked appearance, conveying the impression that the earth was wet through like a sponge; while the summit of a wooded hill, about a mile distant, was enveloped in a dense mist, where the demon of the tempest seemed to have his abiding-place and to be plotting still direr inclemencies.

Nature has no kindness, no hospitality, during a rain. In the fiercest heat of sunny days she retains a secret mercy, and welcomes the wayfarer to shady nooks of the woods whither the sun cannot penetrate; but she provides no shelter against her storms. It makes us shiver to think of those deep, umbrageous recesses, those overshadowing banks, where we found such enjoyment during the sultry afternoons. Not a twig of foliage there but would dash a little shower into our faces. Looking

reproachfully towards the impenetrable sky,—if sky there be above that dismal uniformity of cloud,—we are apt to murmur against the whole system of the universe, since it involves the extinction of so many summer days in so short a life by the hissing and spluttering rain. In such spells of weather—and it is to be supposed such weather came—Eve's bower in paradise must have been but a cheerless and aguish kind of shelter, nowise comparable to the old parsonage, which had resources of its own to beguile the week's imprisonment. The idea of sleeping on a couch of wet roses!

Happy the man who in a rainy day can betake himself to a huge garret, stored, like that of the Manse, with lumber that each generation has left behind it from a period before the revolution. Our garret was an arched hall, dimly illuminated through small and dusty windows. It was but a twilight at the best, and there were nooks, or rather caverns, of deep obscurity, the secrets of which I never learned, being too reverent of their dust and cobwebs. The beams and rafters, roughly hewn and with strips of bark still on them, and the rude masonry of the chimneys, made the garret look wild and uncivilized,—an aspect unlike what was seen elsewhere in the quiet and decorous old house. But on one side there was a little whitewashed apartment which bore the traditionary title of the Saint's Chamber, because holy men in their youth had slept and studied and prayed there. With its elevated retirement, its one window, its small fireplace, and its closet, convenient for an oratory, it was the very spot where a young man might inspire himself with solemn enthusiasm and cherish saintly dreams. The occupants, at various epochs, had left brief records and ejaculations inscribed upon the walls. There, too, hung a tattered and shrivelled roll of canvas, which on inspection proved to be the forcibly wrought picture of a clergyman, in wig, band, and gown, holding a Bible in his hand. As I turned his face towards the light he eyed me with an

air of authority such as men of his profession seldom assume in our days. The original had been pastor of the parish more than a century ago, a friend of Whitefield, and almost his equal in fervid eloquence.³ I bowed before the effigy of the dignified divine, and felt as if I had now met face to face with the ghost by whom, as there was reason to apprehend, the Manse was haunted.

Houses of any antiquity in New England are so invariably possessed with spirits that the matter seems hardly worth alluding to. Our ghost used to heave deep sighs in a particular corner of the parlor, and sometimes rustled paper, as if he were turning over a sermon in the long upper entry,—where nevertheless he was invisible in spite of the bright moonshine that fell through the eastern window. Not improbably he wished me to edit and publish a selection from a chest full of manuscript discourses that stood in the garret. Once, while Hillard⁴ and other friends sat talking with us in the twilight, there came a rustling noise as of a minister's silk gown, sweeping through the very midst of the company so closely as almost to brush against the chairs. Still there was nothing visible. A yet stranger business was that of a ghostly servant maid, who used to be heard in the kitchen at deepest midnight, grinding coffee, cooking, ironing,—performing, in short, all kinds of domestic labor,—although no traces of anything accomplished could be detected the next morning. Some neglected duty of her servitude—some ill-starched ministerial band—disturbed the poor damsel in her grave and kept her at work without any wages.

But to return from this digression. A part of my predecessor's library was stored in the garret,—no unfit receptacle indeed for such dreary trash as comprised the

³ George Whitefield (1714-1770), Methodist evangelist from England, preached at Concord at the invitation of the Rev. Daniel Bliss, an ancestor of Emerson.

⁴ George Stillman Hillard (1808-1879), author and lawyer.

greater number of volumes. The old books would have been worth nothing at an auction. In this venerable garret, however, they possessed an interest, quite apart from their literary value, as heirlooms, many of which had been transmitted down through a series of consecrated hands from the days of the mighty Puritan divines. Autographs of famous names were to be seen in faded ink on some of their flyleaves; and there were marginal observations or interpolated pages closely covered with manuscript in illegible shorthand, perhaps concealing matter of profound truth and wisdom. The world will never be the better for it. A few of the books were Latin folios, written by Catholic authors; others demolished Papistry, as with a sledgehammer, in plain English. A dissertation on the book of Job—which only Job himself could have had patience to read—filled at least a score of small, thickset quartos, at the rate of two or three volumes to a chapter. Then there was a vast folio body of divinity—too corpulent a body, it might be feared, to comprehend the spiritual element of religion. Volumes of this form dated back two hundred years or more, and were generally bound in black leather, exhibiting precisely such an appearance as we should attribute to books of enchantment. Others equally antique were of a size proper to be carried in the large waistcoat pockets of old times,—diminutive, but as black as their bulkier brethren, and abundantly interfused with Greek and Latin quotations. These little old volumes impressed me as if they had been intended for very large ones, but had been unfortunately blighted at an early stage of their growth.

The rain pattered upon the roof and the sky gloomed through the dusty garret windows, while I burrowed among these venerable books in search of any living thought which should burn like a coal of fire, or glow like an inextinguishable gem, beneath the dead trumpery that had long hidden it. But I found no such treasure; all was dead alike; and I could not but muse deeply and

wonderingly upon the humiliating fact that the works of man's intellect decay like those of his hands. Thought grows mouldy. What was good and nourishing food for the spirits of one generation affords no sustenance for the next. Books of religion, however, cannot be considered a fair test of the enduring and vivacious properties of human thought, because such books so seldom really touch upon their ostensible subject, and have, therefore, so little business to be written at all. So long as an unlettered soul can attain to saving grace, there would seem to be no deadly error in holding theological libraries to be accumulations of, for the most part, stupendous impertinence.

Many of the books had accrued in the latter years of the last clergyman's lifetime. These threatened to be of even less interest than the elder works, a century hence, to any curious inquirer who should then rummage them as I was doing now. Volumes of the "Liberal Preacher" and "Christian Examiner,"⁵ occasional sermons, controversial pamphlets, tracts, and other productions of a like fugitive nature took the place of the thick and heavy volumes of past time. In a physical point of view there was much the same difference as between a feather and a lump of lead; but, intellectually regarded, the specific gravity of old and new was about upon a par. Both also were alike frigid. The elder books, nevertheless, seemed to have been earnestly written, and might be conceived to have possessed warmth at some former period; although, with the lapse of time, the heated masses had cooled down even to the freezing point. The frigidity of the modern productions, on the other hand, was characteristic and inherent, and evidently had little to do with the writer's qualities of mind and heart. In fine, of this whole dusty heap of literature I tossed aside all the sacred part, and felt myself none the less a Christian for eschewing it.

⁵ The first of these religious periodicals was published 1827-30 and 1831-36; the second 1824-69.

There appeared no hope of either mounting to the better world on a Gothic staircase of ancient folios or of flying thither on the wings of a modern tract.

Nothing, strange to say, retained any sap except what had been written for the passing day and year without the remotest pretension or idea of permanence. There were a few old newspapers, and still older almanacs, which reproduced to my mental eye the epochs when they had issued from the press with a distinctness that was altogether unaccountable. It was as if I had found bits of magic looking-glass among the books, with the images of a vanished century in them. I turned my eyes towards the tattered picture above mentioned, and asked of the austere divine wherefore it was that he and his brethren, after the most painful rummaging and groping into their minds, had been able to produce nothing half so real as these newspaper scribblers and almanac makers had thrown off in the effervescence of a moment. The portrait responded not; so I sought an answer for myself. It is the age itself that writes newspapers and almanacs, which, therefore, have a distinct purpose and meaning at the time, and a kind of intelligible truth for all times, whereas most other works—being written by men who, in the very act, set themselves apart from their age—are likely to possess little significance when new, and none at all when old. Genius, indeed, melts many ages into one, and thus effects something permanent, yet still with a similarity of office to that of the more ephemeral writer. A work of genius is but the newspaper of a century, or perchance of a hundred centuries.

Lightly as I have spoken of these old books, there yet lingers with me a superstitious reverence for literature of all kinds. A bound volume has a charm in my eyes similar to what scraps of manuscript possess for the good Mussulman. He imagines that those wind-wafted records are perhaps hallowed by some sacred verse; and I, that every new book or antique one may contain the "open sesame,"—the spell

to disclose treasures hidden in some unsuspected cave of Truth. Thus it was not without sadness that I turned away from the library of the Old Manse.

Blessed was the sunshine when it came again at the close of another stormy day, beaming from the edge of the western horizon; while the massive firmament of clouds threw down all the gloom it could, but served only to kindle the golden light into a more brilliant glow by the strongly contrasted shadows. Heaven smiled at the earth, so long unseen, from beneath its heavy eyelid. To-morrow for the hill-tops and the wood paths.

Or it might be that Ellery Channing⁶ came up the avenue to join me in a fishing excursion on the river. Strange and happy times were those when we cast aside all irksome forms and strait-laced habits, and delivered ourselves up to the free air, to live like the Indians or any less conventional race during one bright semicircle of the sun. Rowing our boat against the current, between wide meadows, we turned aside into the Assabeth. A more lovely stream than this, for a mile above its junction with the Concord, has never flowed on earth,—nowhere, indeed, except to lave the interior regions of a poet's imagination. It is sheltered from the breeze by woods and a hill-side; so that elsewhere there might be a hurricane, and here scarcely a ripple across the shaded water. The current lingers along so gently that the mere force of the boatman's will seems sufficient to propel his craft against it. It comes flowing softly through the midmost privacy and deepest heart of a wood which whispers it to be quiet; while the stream whispers back again from its sedgy borders, as if river and wood were hushing one another to sleep. Yes; the river sleeps along its course and dreams of the sky and of the clustering foliage, amid which fall showers of broken sunlight, im-

⁶ William Ellery Channing the younger (1818-1901), one of the Transcendentalist poets and nephew of the Unitarian clergyman of the same name.

parting specks of vivid cheerfulness, in contrast with the quiet depth of the prevailing tint. Of all this scene, the slumbering river has a dream picture in its bosom. Which, after all, was the most real—the picture, or the original?—the objects palpable to our grosser senses, or their apotheosis in the stream beneath? Surely the disembodied images stand in closer relation to the soul. But both the original and the reflection had here an ideal charm; and, had it been a thought more wild, I could have fancied that this river had strayed forth out of the rich scenery of my companion's inner world; only the vegetation along its banks should then have had an Oriental character.

Gentle and unobtrusive as the river is, yet the tranquil woods seem hardly satisfied to allow it passage. The trees are rooted on the very verge of the water, and dip their pendent branches into it. At one spot there is a lofty bank, on the slope of which grow some hemlocks, declining across the stream with outstretched arms, as if resolute to take the plunge. In other places the banks are almost on a level with the water; so that the quiet congregation of trees set their feet in the flood, and are fringed with foliage down to the surface. Cardinal flowers kindle their spiral flames and illuminate the dark nooks among the shrubbery. The pond-lily grows abundantly along the margin—that delicious flower, which, as Thoreau tells me, opens its virgin bosom to the first sunlight and perfects its being through the magic of that genial kiss. He has beheld beds of them unfolding in due succession as the sunrise stole gradually from flower to flower—a sight not to be hoped for unless when a poet adjusts his inward eye to a proper focus with the outward organ. Grape-vines here and there twine themselves around shrub and tree and hang their clusters over the water within reach of the boatman's hand. Oftentimes they unite two trees of alien race in an inextricable twine, marrying the hemlock and the maple against their will, and enriching them with a purple offspring of

which neither is the parent. One of these ambitious parasites has climbed into the upper branches of a tall, white pine, and is still ascending from bough to bough, unsatisfied till it shall crown the tree's airy summit with a wreath of its broad foliage and a cluster of its grapes.

The winding course of the stream continually shut out the scene behind us, and revealed as calm and lovely a one before. We glided from depth to depth, and breathed new seclusion at every turn. The shy kingfisher flew from the withered branch close at hand to another at a distance, uttering a shrill cry of anger or alarm. Ducks that had been floating there since the preceding eve were startled at our approach, and skimmed along the glassy river, breaking its dark surface with a bright streak. The pickerel leaped from among the lily-pads. The turtle, sunning itself upon a rock or at the root of a tree, slid suddenly into the water with a plunge. The painted Indian who paddled his canoe along the Assabeth three hundred years ago could hardly have seen a wilder gentleness displayed upon its banks and reflected in its bosom than we did. Nor could the same Indian have prepared his noontide meal with more simplicity. We drew up our skiff at some point where the over-arching shade formed a natural bower, and there kindled a fire with the pine cones and decayed branches that lay strewn plentifully around. Soon the smoke ascended among the trees, impregnated with a savory incense, not heavy, dull, and surfeiting, like the steam of cookery within doors, but sprightly and piquant. The smell of our feast was akin to the woodland odors with which it mingled: there was no sacrilege committed by our intrusion there: the sacred solitude was hospitable, and granted us free leave to cook and eat in the recess that was at once our kitchen and banquet hall. It is strange what humble offices may be performed in a beautiful scene without destroying its poetry. Our fire, red gleaming among the trees, and we beside it, busied with culinary rites and

spreading out our meal on a moss-grown log, all seemed in unison with the river gliding by and the foliage rustling over us. And, what was strangest, neither did our mirth seem to disturb the propriety of the solemn woods; although the hobgoblins of the old wilderness and the will-of-the-wisps that glimmered in the marshy places might have come trooping to share our table talk, and have added their shrill laughter to our merriment. It was the very spot in which to utter the extremest nonsense or the profoundest wisdom, or that ethereal product of the mind which partakes of both, and may become one or the other, in correspondence with the faith and insight of the auditor.

So amid sunshine and shadow, rustling leaves and sighing waters, up gushed our talk like the babble of a fountain. The evanescent spray was Ellery's; and his, too, the lumps of golden thought that lay glimmering in the fountain's bed and brightened both our faces by the reflection. Could he have drawn out that virgin gold and stamped it with the mint mark that alone gives currency, the world might have had the profit, and he the fame. My mind was the richer merely by the knowledge that it was there. But the chief profit of those wild days to him and me lay, not in any definite idea, not in any angular or rounded truth, which we dug out of the shapeless mass of problematical stuff, but in the freedom which we thereby won from all custom and conventionalism and fettering influences of man on man. We were so free to-day that it was impossible to be slaves again to-morrow. When we crossed the threshold of the house or trod the thronged pavements of a city, still the leaves of the trees that overhang the Assabeth were whispering to us, "Be free! be free!" Therefore along that shady river-bank there are spots, marked with a heap of ashes and half-consumed brands, only less sacred in my remembrance than the hearth of a household fire.

And yet how sweet, as we floated homeward adown the golden river at sunset,—

how sweet was it to return within the system of human society, not as to a dungeon and a chain, but as to a stately edifice, whence we could go forth at will into statelier simplicity! How gently, too, did the sight of the Old Manse, best seen from the river, overshadowed with its willow and all environed about with the foliage of its orchard and avenue,—how gently did its gray, homely aspect rebuke the speculative extravagances of the day! It had grown sacred in connection with the artificial life against which we inveighed; it had been a home for many years in spite of all; it was my home too, and, with these thoughts, it seemed to me that all the artifice and conventionalism of life was but an impalpable thinness upon its surface, and that the depth below was none the worse for it. Once, as we turned our boat to the bank, there was a cloud, in the shape of an immensely gigantic figure of a hound, couched above the house, as if keeping guard over it. Gazing at this symbol, I prayed that the upper influences might long protect the institutions that had grown out of the heart of mankind.

If ever my readers should decide to give up civilized life, cities, houses, and whatever moral or material enormities in addition to these the perverted ingenuity of our race has contrived, let it be in the early autumn. Then Nature will love him better than at any other season, and will take him to her bosom with a more motherly tenderness. I could scarcely endure the roof of the old house above me in those first autumnal days. How early in the summer, too, the prophecy of autumn comes! Earlier in some years than in others; sometimes even in the first weeks of July. There is no other feeling like what is caused by this faint, doubtful, yet real perception—if it be not rather a foreboding—of the year's decay, so blessedly sweet and sad in the same breath.

Did I say that there was no feeling like it? Ah, but there is a half-acknowledged melancholy like to this when we stand in the perfected vigor of our life and feel

that Time has now given us all his flowers, and that the next work of his never idle fingers must be to steal them one by one away.

I have forgotten whether the song of the cricket be not as early a token of autumn's approach as any other,—that song which may be called an audible stillness; for though very loud and heard afar, yet the mind does not take note of it as a sound, so completely is its individual existence merged among the accompanying characteristics of the season. Alas for the pleasant summer time! In August the grass is still verdant on the hills and in the valleys; the foliage of the trees is as dense as ever, and as green; the flowers gleam forth in richer abundance along the margin of the river, and by the stone walls, and deep among the woods; the days, too, are as fervid now as they were a month ago; and yet in every breath of wind and in every beam of sunshine we hear the whispered farewell and behold the parting smile of a dear friend. There is a coolness amid all the heat, a mildness in the blazing noon. Not a breeze can stir but it thrills us with the breath of autumn. A pensive glory is seen in the far golden gleams, among the shadows of the trees. The flowers—even the brightest of them, and they are the most gorgeous of the year—have this gentle sadness wedded to their pomp, and typify the character of the delicious time each within itself. The brilliant cardinal flower has never seemed gay to me.

Still later in the season Nature's tenderness waxes stronger. It is impossible not to be fond of our mother now; for she is so fond of us! At other periods she does not make this impression on me, or only at rare intervals; but in those genial days of autumn, when she has perfected her harvests and accomplished every needful thing that was given her to do, then she overflows with a blessed superfluity of love. She has leisure to caress her children now. It is good to be alive at such times. Thank Heaven for breath—yes, for mere breath

—when it is made up of a heavenly breeze like this! It comes with a real kiss upon our cheeks; it would linger fondly around us if it might; but, since it must be gone, it embraces us with its whole kindly heart and passes onward to embrace likewise the next thing that it meets. A blessing is flung abroad and scattered far and wide over the earth, to be gathered up by all who choose. I recline upon the still unwithered grass and whisper to myself, "O perfect day! O beautiful world! O beneficent God!" And it is the promise of a blessed eternity; for our Creator would never have made such lovely days and have given us the deep hearts to enjoy them, above and beyond all thought, unless we were meant to be immortal. This sunshine is the golden pledge thereof. It beams through the gates of paradise and shows us glimpses far inward.

By and by, in a little time, the outward world puts on a drear austerity. On some October morning there is a heavy hoarfrost on the grass and along the tops of the fences; and at sunrise the leaves fall from the trees of our avenue without a breath of wind, quietly descending by their own weight. All summer long they have murmured like the noise of waters; they have roared loudly while the branches were wrestling with the thunder gust; they have made music both glad and solemn; they have attuned my thoughts by their quiet sound as I paced to and fro beneath the arch of intermingling boughs. Now they can only rustle under my feet. Henceforth the gray parsonage begins to assume a larger importance, and draws to its fireside,—for the abomination of the air-tight stove is reserved till wintry weather,—draws closer and closer to its fireside the vagrant impulses that had gone wandering about through the summer.

When summer was dead and buried the Old Manse became as lonely as a hermitage. Not that ever—in my time at least—it had been thronged with company; but, at no rare intervals, we welcomed some friend out of the dusty glare and tumult

of the world, and rejoiced to share with him the transparent obscurity that was floating over us. In one respect our precincts were like the Enchanted Ground through which the pilgrim travelled on his way to the Celestial City! The guests, each and all, felt a slumberous influence upon them; they fell asleep in chairs, or took a more deliberate siesta on the sofa, or were seen stretched among the shadows of the orchard, looking up dreamily through the boughs. They could not have paid a more acceptable compliment to my abode, nor to my own qualities as a host. I held it as a proof that they left their cares behind them as they passed between the stone gate-posts at the entrance of our avenue, and that the so powerful opiate was the abundance of peace and quiet within and all around us. Others could give them pleasure and amusement or instruction—these could be picked up anywhere; but it was for me to give them rest—rest in a life of trouble. What better could be done for those weary and world-worn spirits?⁷—for him whose career of perpetual action was impeded and harassed by the rarest of his powers and the richest of his acquirements?—for another who had thrown his ardent heart from earliest youth into the strife of politics, and now, perchance, began to suspect that one lifetime is too brief for the accomplishment of any lofty aim—for her on whose feminine nature had been imposed the heavy gift of intellectual power, such as a strong man might have staggered under, and with it the necessity to act upon the world?—in a word, not to multiply instances, what better could be done for anybody who came within our magic circle than to throw the spell of a tranquil spirit over him? And when it had wrought its full effect, then we dismissed him, with but misty reminiscences, as if he had been dreaming of us.

Were I to adopt a pet idea, as so many people do, and fondle it in my embraces to the exclusion of all others, it would be, that the great want which mankind labors

under at this present period is sleep. The world should recline its vast head on the first convenient pillow and take an age-long nap. It has gone distracted through a morbid activity, and, while preternaturally wide awake, is nevertheless tormented by visions that seem real to it now, but would assume their true aspect and character were all things once set right by an interval of sound repose. This is the only method of getting rid of old delusions and avoiding new ones, of regenerating our race, so that it might in due time awake as an infant out of dewy slumber; of restoring to us the simple perception of what is right, and the single-hearted desire to achieve it, both of which have long been lost in consequence of this weary activity of brain and torpor or passion of the heart that now afflict the universe. Stimulants, the only mode of treatment hitherto attempted, cannot quell the disease, they do but heighten the delirium.

Let not the above paragraph ever be quoted against the author, for, though tinctured with its modicum of truth, it is the result and expression of what he knew, while he was writing, to be but a distorted survey of the state and prospects of mankind. There were circumstances around me which made it difficult to view the world precisely as it exists; for, severe and sober as was the Old Manse, it was necessary to go but a little way beyond its threshold before meeting with stranger moral shapes of men than might have been encountered elsewhere in a circuit of a thousand miles.

These hobgoblins of flesh and blood were attracted thither by the wide-spreading influence of a great original thinker, who had his earthly abode at the opposite extremity of our village. His mind acted upon other minds of a certain constitution with wonderful magnetism, and drew many men upon long pilgrimages to speak with him face to face. Young visionaries—to whom just so much of insight had been imparted

⁷ These are probably Horatio Bridge (1806-1893), Franklin Pierce (1804-1869), and Margaret Fuller (1810-1850).

as to make life all a labyrinth around them—came to seek the clew that should guide them out of their self-involved bewilderment. Grayheaded theorists—whose systems, at first air, had finally imprisoned them in an iron frame-work—travelled painfully to his door, not to ask deliverance, but to invite the free spirit into their own thralldom. People that had lighted on a new thought, or a thought that they fancied new, came to Emerson, as the finder of a glittering gem hastens to a lapidary, to ascertain its quality and value. Uncertain, troubled, earnest wanderers through the midnight of the moral world beheld his intellectual fire as a beacon burning on a hill-top, and, climbing the difficult ascent, looked forth into the surrounding obscurity more hopefully than hitherto. The light revealed objects unseen before,—mountains, gleaming lakes, glimpses of a creation among the chaos, but, also, as was unavoidable, it attracted bats and owls and the whole host of night birds, which flapped their dusky wings against the gazer's eyes, and sometimes were mistaken for fowls of angelic feather. Such delusions always hover nigh whenever a beacon fire of truth is kindled.

For myself, there had been epochs of my life when I, too, might have asked of this prophet the master word that should solve me the riddle of the universe; but now, being happy, I felt as if there were no question to be put, and therefore admired Emerson as a poet of deep beauty and austere tenderness, but sought nothing from him as a philosopher. It was good, nevertheless, to meet him in the woodpaths, or sometimes in our avenue, with that pure intellectual gleam diffused about his presence like the garment of a shining one; and he so quiet, so simple, so without pretension, encountering each man alive as if expecting to receive more than he could impart. And, in truth, the heart of many an ordinary man had, perchance, inscriptions which he could not read. But it was impossible to dwell in his vicinity without inhaling more or less the mountain atmos-

phere of his lofty thought, which, in the brains of some people, wrought a singular giddiness,—new truth being as heady as new wine. Never was a poor little country village infested with such a variety of queer, strangely-dressed, oddly-behaved mortals, most of whom took upon themselves to be important agents of the world's destiny, yet were simply bores of a very intense water. Such, I imagine, is the invariable character of persons who crowd so closely about an original thinker as to draw in his unuttered breath and thus become imbued with a false originality. This triteness of novelty is enough to make any man of common sense blaspheme at all ideas of less than a century's standing, and pray that the world may be petrified and rendered immovable in precisely the worst moral and physical state that it ever yet arrived at, rather than be benefited by such schemes of such philosophers.

And now I begin to feel—and perhaps should have sooner felt—that we have talked enough of the Old Manse. Mine honored reader, it may be, will vilify the poor author as an egotist for babbling through so many pages about a mossgrown country parsonage, and his life within its walls and on the river and in the woods, and the influences that wrought upon him from all these sources. My conscience, however, does not reproach me with betraying anything too sacredly individual to be revealed by a human spirit to its brother or sister spirit. How narrow—how shallow and scanty too—is the stream of thought that has been flowing from my pen, compared with the broad tide of dim emotions, ideas, and associations which swell around me from that portion of my existence! How little have I told! and of that little, how almost nothing is even tinctured with any quality that makes it exclusively my own! Has the reader gone wandering, hand in hand with me, through the inner passages of my being? and have we groped together into all its chambers and examined their treasures or their rubbish? Not so. We have been standing on the greensward

but just within the cavern's mouth, where the common sunshine is free to penetrate, and where every footstep is therefore free to come I have appealed to no sentiment or sensibilities save such as are diffused among us all. So far as I am a man of really individual attributes I veil my face, nor am I, nor have I ever been, one of those supremely hospitable people who serve up their own hearts, delicately fried, with brain sauce, as a tidbit for their beloved public.

Glancing back over what I have written, it seems but the scattered reminiscences of a single summer. In fairyland there is no measurement of time, and, in a spot so sheltered from the turmoil of life's ocean, three years hastened away with a noiseless flight, as the breezy sunshine chases the cloud shadows across the depths of a still valley. Now came hints, growing more and more distinct, that the owner of the old house was pining for his native air. Carpenters next appeared, making a tremendous racket among the out-buildings, strewing the green grass with pine shavings and chips of chestnut joists, and vexing the whole antiquity of the place with their discordant renovations. Soon, moreover, they divested our abode of the veil of woodbine which had crept over a large portion of its southern face. All the aged mosses were cleared unsparingly away, and there were horrible whispers about brushing up the external walls with a coat of paint—a purpose as little to my taste as might be that of rouging the venerable cheeks of one's grandmother. But the hand that renovates is always more sacrilegious than that which destroys. In fine, we gathered up our household goods, drank a farewell cup of tea in our pleasant little breakfast room,—delicately fragrant tea, an unpurchasable luxury, one of the many angel gifts that had fallen like dew upon us,—and passed forth between the tall stone gateposts as uncertain as the wandering Arabs where our tent might next be pitched. Providence took me by the hand,

and—an oddity of dispensation which, I trust, there is no irreverence in smiling at—has led me, as the newspapers announce while I am writing, from the Old Manse into a custom house. As a story teller, I have often contrived strange vicissitudes for my imaginary personages, but none like this.

The treasure of intellectual good which I hoped to find in our secluded dwelling had never come to light. No profound treatise of ethics, no philosophic history, no novel even, that could stand unsupported on its edges. All that I had to show, as a man of letters, were these few tales and essays, which had blossomed out like flowers in the calm summer of my heart and mind. Save editing (an easy task) the journal of my friend of many years, the *African Cruiser*, I had done nothing else.⁸ With these idle weeds and withering blossoms I have intermixed some that were produced long ago,—old, faded things, reminding me of flowers pressed between the leaves of a book,—and now offer the bouquet, such as it is, to any whom it may please. These fitful sketches, with so little of external life about them, yet claiming no profundity of purpose,—so reserved, even while they sometimes seem so frank,—often but half in earnest, and never, even when most so, expressing satisfactorily the thoughts which they profess to image,—such trifles, I truly feel, afford no solid basis for a literary reputation. Nevertheless, the public—if my limited number of readers, whom I venture to regard rather as a circle of friends, may be termed a public—will receive them the more kindly, as the last offering, the last collection, of this nature which it is my purpose ever to put forth. Unless I could do better, I have done enough in this kind. For myself the book will always retain one charm—as reminding me of the river, with its delightful solitudes, and of the avenue, the garden, and the orchard, and

⁸ Hawthorne edited Horatio Bridge's *The Journal of an African Cruiser* (1845).

especially the dear old Manse, with the little study on its western side, and the sunshine glimmering through the willow branches while I wrote

Let the reader, if he will do me so much honor, imagine himself my guest, and that, having seen whatever may be worthy of notice within and about the Old Manse, he has finally been ushered into my study. There, after seating him in an antique elbow chair, an henloom of the house, I take forth a roll of manuscript and entreat his attention to the following tales—an act of personal inhospitality, however, which I never was guilty of, nor ever will be, even to my worst enemy

[1932 (1868)]

JULY 26, 1838 This morning an underwitted old man met me on a walk, and held a pretty long conversation, insisting upon shaking hands (to which I was averse, lest his hand should not be clean), and insisting on his right to do so, as being a "friend of mankind." He was an old gray, bald-headed, wrinkled-visaged figure, decently dressed, with cowhide shoes, a coat on one arm, and an umbrella on the other, and said that he was going to see a widow in the neighborhood. Finding that I was not provided with a wife, he recommended a certain "maid" of forty years, who had 300 acres of land. He spoke of his children, who are proprietors of a circus establishment, and have taken a granddaughter to bring up in their way of life, and he gave me a message to tell them, in case we should meet. While this old man is wandering among the hills, his children are in the gaze of multitudes. He told me the place where he was born, directing me to it by pointing to a wreath of mist which lay on the side of a moun-

tain ridge, which he termed the "smoke yonder." Speaking of the widow, he said, "My wife has been dead these seven years, and why should not I enjoy myself a little?" His manner was full of quirks and quips and eccentricities, waving his umbrella and gesticulating strangely, with a great deal of action I suppose, to help his natural foolishness, he had been drinking. We parted, he exhorting me not to forget his message to his sons, and I shouting after him a request to be remembered to the widow. Conceive something tragical to be talked about, and much might be made of this interview, in a wild road among the hills, with Graylock at no great distance, looking sombre and angry by reason of the gray, heavy mist upon his head.

July 29, 1838 Remarkable characters—a disagreeable figure, waning from middle-age, clad in a pair of tow homespun pantaloons and very dirty shirt, bare-foot, and with one of his feet maimed by an axe, also, an arm amputated two or three inches below the elbow. His beard of a week's growth, grim and grisly, with a general effect of black,—altogether a filthy and disgusting object. Yet he has signs of having been a handsome man in his idea, though now such a beastly figure that, probably, no living thing but his great dog would touch him without an effort. Coming to the stoop, where several persons were sitting,—“Good morning, gentlemen,” said the wretch. Nobody answered for a time, till at last one said, “I don’t know who you speak to,—not me, I’m sure,” meaning that he did not claim to be a gentleman. “Why, I thought you’d all speak at once,” replied the figure laughing. So he sat himself down on the lower step of the stoop, and began to talk, and the conversation being turned upon his bare feet, by one of the company, he related the story of his losing his toes by the glancing aside of an axe, and with what grim fortitude he bore it. Then he made a transition to the loss of his arm, and setting his teeth and drawing in his breath, said that the pain was

dreadful, but thus, too, he seems to have borne like an Indian, and a person testified to his fortitude by saying that he did not suppose that there was any feeling in him, from observing how he bore it. The man spoke of the pain of cutting the muscles, and the particular agony at one moment, while the bone was being sawed asunder, and there was a strange expression of remembered agony, as he shrugged his half-limb, and described the matter. Afterwards, in a reply to a question of mine whether he still seemed to feel the hand that had been amputated, he answered that he did, always—and baring the stump, he moved the severed muscles, saying, "There is the thumb, there the forefinger" &c. Then he talked to me about phrenology, of which he seems a firm believer and skilful practitioner, telling how he had hit upon the true characters of many people. There was a great deal of sense and acuteness in his talk, and something of elevation in his expression, perhaps a studied elevation—and a sort of courtesy in his manner, but his sense had something out of the way in it, something wild, and ruined, and desperate, in his talk, though I can hardly say what it was. There was something of the gentleman and man of intellect in his deep degradation, and a pleasure in intellectual pursuits, and an acuteness and trained judgment, which bespoke a mind once strong and cultivated. "My study is man," said he. And looking at me "I do not know your name," said he, "but there is something of the hawk-eye about you too." This man was formerly a lawyer in good practice, but taking to drinking, was reduced to this lowest state. Yet not the lowest, for, after the amputation of his arm, being advised by divers persons to throw himself upon the public for support, he told them that, even if he should lose his other arm, he would still be able to support himself and a waiter. Certainly he is a strong minded and iron-constituted man, but, looking at the stump of his arm, he said "that the pain

of the mind was a thousand times greater than the pain of the body—That hand could make the pen go fast," said he. Among people in general, he does not seem to have any greater consideration in his ruin, for the sake of his former standing in society. He supports himself by making soap, and on account of the offals used in that business, there is probably rather an evil smell in his domicile. Talking about a dead horse, near his house, he said that he could not bear the scent of it. "I should not think you could smell carrion in that house," said a stage-agent. Whereupon the soap-maker dropped his head, with a little snort, as it were, of wounded feeling, but immediately said that he took all in good part. There was an old squire of the village, a lawyer probably, whose demeanor was different—with a distance, yet a kindness, for he remembered the times when they met on equal terms. "You and I," said the squire, alluding to their respective troubles and sicknesses, "would have died long ago, if we had not had the courage to live." The poor devil kept talking to me long after everybody else had left the stoop, giving vent to much practical philosophy and just observation on the ways of men, mingled with rather more assumption of literature and cultivation, than belonged to the present condition of his mind. Meantime his great dog—a cleanly looking, and not ill-bred dog, being the only decent attribute appertaining to his master—a well natured dog, too, and receiving civilly any demonstration of courtesy from other people, though preserving a certain distance of deportment—this great dog grew weary of his master's lengthy talk, and expressed his impatience to be gone, by thrusting himself between his legs, rolling over on his back, seizing his ragged trousers, or playfully taking his maimed bare foot into his mouth—using, in short, the kindly and humorous freedom of a friend, with a wretch to whom all are free enough, but none other kind. His master rebuked him, but

with kindness too, and not so that the dog felt himself bound to desist, though he seemed willing to allow his master all the time that could possibly be spared. And, at last, having said many times that he must go and shave and dress himself—and as his beard had been at least a week growing, it might have seemed almost a week's work to get rid of it—he rose from the stoop, and went his way, a forlorn and miserable thing in the light of the cheerful summer Sabbath morning. Yet he seems to keep his spirits up, and still preserves himself a man among men, asking nothing from them—nor is it clearly perceptible what right they have to scorn him, though he seems to acquiesce, in a sort, in their doing so. And yet he cannot wholly have lost his self-respect, and doubtless there were persons on the stoop more grovelling than himself.

July 30, 1838. A little boy, named Joe, who haunts about the bar-room and the stoop, about four years old, in a thin short jacket, and full-breeched trowsers, and bare feet. The men plague him, and put quids of tobacco in his mouth, under pretence of giving him a fig, and he gets enraged, and utters a peculiar sharp, spiteful cry, and strikes at them with a stick, to their great mirth. He is always in trouble, yet will not keep away. They dispatch him with two or three cents to buy candy, and nuts and raisins. They set him down in a niche of the door, and tell him to remain there a day and a half, he sits down very demurely, as if he really meant to fulfil his penance,—but, a moment after, behold there is little Joe, capering across the street to join two or three boys who are playing in a wagon. Take this boy as the germ of a tavern-haunter, a country roué, to spend a wild and brutal youth, ten years of his prime in the State-Prison, and his age in the poor-house.

July 31, 1838. A steam engine in a factory to be supposed to possess a malignant spirit, it catches one man's arm, and pulls it off, seizes another by the

coat-tails, and almost grapples him bodily,—catches a girl by the hair, and scalps her,—and finally draws a man, and crushes him to death.

The one-armed soap-maker, lawyer Haynes, wears an iron hook, which serves him instead of a hand for the purposes of holding on. They nickname him Black Hawk.

Doctors walk about the village with their saddle-bags on their arms. One always with a pipe in his mouth.

August 11, 1838. A doctor, a stout, tall, round-paunched, red-faced, brutal looking old fellow, who gets drunk daily. He sat down on the step of our stoop, looking surly, and speaking to nobody, then got up and walked homeward, with a surly swagger, and a slight unevenness of track, attended by a fine Newfoundland dog.

August 31, 1838. A ride, on Tuesday, to Shelburne Falls—twenty-two miles, or thereabouts, distant. Started at about eight o'clock in a wagon with Mr. Leach and Mr. Buck. Our road lay over the Green Mountain, the long ridge of which was made awful by a dark, heavy, threatening cloud, apparently rolled and condensed along the whole summit. As we ascended the zig-zig road, we looked behind, at every opening through the forest, and beheld a wide landscape of mountain-swells, and valleys intermixt, and old Graylock, and the whole of Saddle-back. Over this wide scene, there was a general gloom, but there was a continual vicissitude of bright sunshine flitting over it, now resting for a brief space on portions of the heights, now flooding the valleys with green brightness, now marking out distinctly each dwelling, and the hotels, and then two small brick churches of the distant village—denoting its prosperity, while all around seemed under adverse fortunes. But we, who stood so elevated above mortal things, and saw so wide and far, could see the sunshine of prosperity departing from one spot and rolling toward another, so that

we could not think it much matter which spot were sunny or gloomy at any one moment

The top of this Green Mountain is a long ridge, marked on the county map as 2160 ft above the sea, the summit is occupied by a valley, not very deep, but one or two miles wide, composing the town of Lebrida. Here there are respectable farmers, though it is a rough, and must be a bleak place. The first house, after reaching the summit, is a small, homely tavern, kept by P. Witt. We left our horse in the shed, and entering the little unpainted bar-room, we heard a voice, in a strange outlandish accent, explaining a diorama. It was an old man, with a full, gray-bearded countenance, and Mr. Leach exclaimed "Ah here's the old Dutchman again!" And he answered "Yes, Captain, here's the old Dutchman,"—tho' by the way, he is a German, and travels the country with this diorama, in a wagon, and had recently been at South Adams, and was now returning from Saratoga Springs. We looked through the glass orifice of his machine, while he exhibited a succession of the very worst scratchings and daubings that can be imagined—worn out, too, and full of cracks and wrinkles, besmeared with tobacco smoke, and every otherwise dilapidated. There were none in a later fashion than thirty years since, except some figures that had been cut from tailors' show-bills. There were views of cities and edifices in Europe, and ruins,—and of Napoleon's battles and Nelson's sea-fights, in the midst of which would be seen a gigantic, brown, hairy hand—the Hand of Destiny—pointing at the principal points of the conflict, while the old Dutchman explained. He gave considerable dramatic effect to his descriptions, but his accent and intonation cannot be written. He seemed to take an interest and pride in his exhibition, yet when the utter and ludicrous misery thereof made us laugh, he joined in the joke very readily. When the last picture had been exhibited, he caused a country boor, who stood gaping beside the machine

to put his head within it, and thrust his tongue out. The head becoming gigantic, a singular effect was produced.

The old Dutchman's exhibition over, a great dog—apparently an elderly dog—suddenly made himself the object of notice, evidently in rivalry of the Dutchman. He had seemed to be a good-natured, quiet kind of dog, offering his head to be patted by those kindly disposed towards him. This great, old dog, suddenly and of his own motion, began to run round after his own not very long tail, with the utmost eagerness, and catching hold of it, he growled furiously at it, and still continued to circle round, growling and snarling, with increasing rage, as if one half of his body were at deadly enmity with the other. Faster and faster went he round and round-about, growling still fiercer, till at last he ceased in a state of utter exhaustion, but no sooner had his exhibition finished, than he became the same mild, quiet, sensible old dog as before, and no one could have suspected him of such nonsense as getting enraged with his own tail. He was first taught this trick by attaching a bell to the end of his tail, but he now commences entirely of his own accord, and I really believe feels vain at the attention he excites.

It was chill and bleak on the mountain-top, and a fire was burning in the bar-room. The old Dutchman bestowed on everybody the title of Captain—perhaps because such a title has a great chance of suiting an American.

September 7, 1838. Mr. Leach and I took a walk by moonlight, last evening, on the road that leads over the mountain. Remote from houses, far up on the hill side, we found a lime kiln burning near the road side, and approaching it, a watcher started from the ground, where he had been lying at his length. There are several of these lime-kilns in this vicinity, they are built circular with stones, like a round tower, eighteen or twenty feet high, having a hillock heaped around a considerable of their circumference, so that the

marble may be brought and thrown in by cart loads at the top. At the bottom there is a doorway large enough to admit a man in a stooping posture. Thus an edifice of great solidity is composed, which will endure for centuries, unless needless pains are taken to tear it down. There is one on the hill side close to the village, wherein weeds grow at the bottom, and grass, and shrubs too are rooted in the interstices of the stones, and its low doorway had a dungeonlike aspect, and we look down from the top as into a roofless tower. It apparently has not been used for many years, and the lime, and weather-stained fragments of marble are scattered about.

But in the one we saw last night, a hard wood fire was burning merrily beneath the superincumbent marble—the kiln being heaped full, and shortly after we came, the man (a dark, black-bearded figure in shirt-sleeves) opened the iron door, through the chinks of which the fire was gleaming, and thrust in huge logs of wood, and stirred the immense coals with a long pole, and showed us the glowing lime-stone,—the lower layer of it. The glow of the fire was powerful, at the distance of several yards from the open door. He talked very sociably with us,—being doubtless glad to have two visitors to vary his solitary night-watch, for it would not do for him to get asleep, since the fire should be refreshed as often as every twenty minutes. We ascended the hillock to the top of the kiln, and the marble was red-hot and burning with a bluish lambent flame, quivering up, sometimes, nearly a yard high, and resembling the flame of anthracite coal—only, the marble being in larger fragments, the flame was higher. The kiln was perhaps six or eight feet across. Four hundred bushels of marble were then in a state of combustion. The expense of converting this quantity into lime is about fifty dollars, and it sells for 25 cts per bushel at the kiln. We talked with the man about whether he would run across the top of the intensely burning kiln for a thousand

dollars, barefooted, and he said he would for ten,—he said that the lime had been burning 48 hours, and would be finished in 36 more, and cooled sufficiently to handle in 12 more. He liked the business of watching it better by night than day, because the days were often hot, but such a mild and beautiful night as the last was just right. Here a poet might make verses, with moonlight in them—and a gleam of fierce firelight flickering through them. It is a shame to use this brilliant, white, almost transparent marble, in this way. A man said of it, the other day, that into some pieces of it, when polished, one could see a considerable distance, and instanced a certain gravestone.

Mr. Leach told me how a girl, to whom he was once paying attention, with some idea of marrying her, made a confession of having forfeited her chastity. He had heard rumors of her having been indiscreet, with reference to a man who was formerly attentive to her—but had no idea of anything more than a merely pardonable indiscretion, in having trusted herself in long and solitary walk with this man. He began to talk with her on this subject, intending gently to reprehend her, but she became greatly agitated, and fell weeping bitterly—her thoughts flying immediately to her guilt, and probably thinking that he was aware or suspicious of the full extent of it. She told so much, or betrayed so much, that he besought her to say no more. "That was the only time, Mr. Leach," sobbed she, "that I ever strayed from the path of virtue." Much might be made of such a scene—the lover's astoundment, at discovering so much more than he expected. Mr. Leach spoke to me as if one deviation from chastity might not be an altogether insuperable objection to making a girl his wife!!

(1844) The search of an investigator for the Unpardonable Sin,—he at last finds it in his own heart and practice.

The Unpardonable Sin might consist in a want of love and reverence for the

Human Soul, in consequence of which, the investigator pried into its dark depths, not with a hope or purpose of making it better, but from a cold philosophical curiosity,—content that it should be wicked in whatever kind or degree, and only desiring to study it out. Would not this, in other words, be the separation of the intellect from the heart?

July 29, 1849 Una makes infinite complaint, and whining, and teasing about her hair, which has not been combed and put in order this morning—everybody being busy with grandmamma. At last comes in Dora, and takes her into the little room, where I hear her busily prattling about various matters, while Dora combs her hair. Julian, who, I think, has remarkable sensibility to musical sounds, sits on the floor, playing a sort of tune, by pulling a string across a bar of iron. Soon, he gets up and runs into the little room to talk with Dora and Una. His mother making a momentary and fitting appearance, he requests to go up to see grandmamma with her, being refused, he asks for a kiss, and, while receiving it, still offers up a gentle and mournful petition to be allowed to go with his mother. As this cannot be, he remains behind, with a most woeful countenance and some few quiet tears, the shower, however, is averted by Dora's telling him a story, while she continues to fix Una's hair. Julian has too much tenderness, love, and sensibility in his nature, he needs to be hardened and tempered. I would not take a particle of the love out of him, but methinks it is highly desirable that some sterner quality should be interfused throughout the softness of his heart; else, in course of time, the hard intercourse of the world, and the many knocks and bruises he will receive, will cause a morbid crust of callousness to grow over his heart, so that, for at least a portion of his life, he will have less sympathy and love for his fellow-beings than those who began life with a much smaller portion. After a lapse of years, indeed, if he have native vigor

enough, there may be a second growth of love and benevolence, but the first crop, with its wild luxuriance, stands a good chance of being blighted.

September 5, 1849 After breakfast, it being cloudy and damp, with a south-east wind, the children did not run out-of-doors, but went up on the front-stairs, and absolutely filled the house with their shouting and hallooing. I went up to dress, and on coming down again, found them enacting the parts of Mr and Mrs Mann,—Una holding a baby in her arms, which was the subject of conversation. Julian has now just taken out the box of blocks, and, I suppose, is about to erect an edifice.

September 6, 1849 "Are you a good little boy?" quoth I to Julian. "Yes," said he—"What are you good for?" asked I—"Because I love all people," answered he. His mother will be in raptures with this response—a heavenly infant, powerless to do anything, but diffusing the richness of his pure love throughout the moral atmosphere, to make all mankind happier and better!!!! Or perhaps he understood the question to be for what reason he was good,—and meant to reply, that good deeds gushed forth from his heart of love, as the natural stream of such a fountain.

ETHAN BRAND

A CHAPTER FROM AN ABORTIVE ROMANCE
[1851 (1850)]

Bartram the lime-burner, a rough, heavy-looking man, begrimed with charcoal, sat watching his kiln, at nightfall, while his little son played at building houses with the scattered fragments of marble, when, on the hillside below them, they heard a roar of laughter, not mirthful, but slow, and even solemn, like a wind shaking the boughs of the forest.

"Father, what is that?" asked the little boy, leaving his play, and pressing betwixt his father's knees.

"Oh, some drunken man, I suppose," answered the lime-burner, "some merry fellow from the bar-room in the village, who dared not laugh loud enough within doors lest he should blow the roof of the house off. So here he is, shaking his jolly sides at the foot of Graylock."

"But, father," said the child, more sensitive than the obtuse, middle-aged clown, "he does not laugh like a man that is glad. So the noise frightens me!"

"Don't be a fool, child!" cried his father, gruffly. "You will never make a man, I do believe, there is too much of your mother in you. I have known the rustling of a leaf startle you. Hark! Here comes the merry fellow now. You shall see that there is no harm in him."

Bartram and his little son, while they were talking thus, sat watching the same lime-kiln that had been the scene of Ethan Brand's solitary and meditative life, before he began his search for the Unpardonable Sin. Many years, as we have seen, had now elapsed, since that portentous night when the IDEAL was first developed. The kiln, however, on the mountain-side, stood unimpaired, and was in nothing changed since he had thrown his dark thoughts into the intense glow of its furnace, and melted them, as it were, into the one thought that took possession of his life. It was a rude, round, tower-like structure about twenty feet high, heavily built of rough stones, and with a hillock of earth heaped about the larger part of its circumference, so that the blocks and fragments of marble might be drawn by cart-loads, and thrown in at the top. There was an opening at the bottom of the tower, like an oven-mouth, but large enough to admit a man in a stooping posture, and provided with a massive iron door. With the smoke and jets of flame issuing from the chunks and crevices of this door, which seemed to give admittance into the hillside, it resembled nothing so much as the private entrance to the infernal regions, which the shepherds of the Delectable Mountains were accustomed to show to pilgrims.¹

There are many such lime-kilns in that tract of country, for the purpose of burning the white marble which composes a large part of the substance of the hills. Some of them, built years ago, and long deserted, with weeds growing in the vacant round of the interior, which is open to the sky, and grass and wild-flowers rooting themselves into the chinks of the stones, look already like relics of antiquity, and may yet be overspread with the lichens of centuries to come. Others, where the lime-burner still feeds his daily and night-long fire, afford points of interest to the wanderer among the hills, who seats himself on a log of wood or a fragment of marble, to hold a chat with the solitary man. It is a lonesome, and, when the character is inclined to thought, may be an intensely thoughtful occupation, as it proved in the case of Ethan Brand, who had mused to such strange purpose, in days gone by, while the fire in this very kiln was burning.

The man who now watched the fire was of a different order, and troubled himself with no thoughts save the very few that were requisite to his business. At frequent intervals, he flung back the clashing weight of the iron door, and, turning his face from the insufferable glare, thrust in huge logs of oak, or stirred the immense brands with a long pole. Within the furnace were seen the curling and riotous flames, and the burning marble, almost molten with the intensity of heat, while without, the reflection of the fire quivered on the dark intricacy of the surrounding forest, and showed in the foreground a bright and ruddy little picture of the hut, the spring beside its door, the athletic and coal-begrimed figure of the lime-burner, and the half-frightened child, shrinking into the protection of his father's shadow. And when again the iron door was closed, then reappeared the tender light of the half-full moon, which vainly strove to trace out the indistinct shapes of the neighboring

¹ A reference to an incident in Bunyan's *Pilgrim's Progress*.

mountains, and, in the upper sky, there was a fitting congregation of clouds, still faintly tinged with the rosy sunset, though thus far down into the valley the sunshine had vanished long and long ago

The little boy now crept still closer to his father, as footsteps were heard ascending the hillside, and a human form thrust aside the bushes that clustered beneath the trees

"Hullo! who is it?" cried the lime-burner, vexed at his son's timidity, yet half infected by it "Come forward, and show yourself, like a man, or I'll fling this chunk of marble at your head!"

"You offer me a rough welcome," said a gloomy voice, as the unknown man drew nigh "Yet I neither claim nor desire a kinder one, even at my own fireside"

To obtain a distincter view, Bartram threw open the iron door of the kiln, whence immediately issued a gush of fierce light, that smote full upon the stranger's face and figure To a careless eye there appeared nothing very remarkable in his aspect, which was that of a man in a coarse, brown, country-made suit of clothes, tall and thin, with the staff and heavy shoes of a wayfarer As he advanced, he fixed his eyes—which were very bright—intently upon the brightness of the furnace, as if he beheld, or expected to behold, some object worthy of note within it

"Good evening, stranger," said the lime-burner, "whence come you, so late in the day?"

"I come from my search," answered the wayfarer, "for, at last, it is finished"

"Drunk!—or crazy!" muttered Bartram to himself "I shall have trouble with the fellow The sooner I drive him away, the better"

The little boy, all in a tremble, whispered to his father, and begged him to shut the door of the kiln, so that there might not be so much light, for that there was something in the man's face which he was afraid to look at, yet could not look away from And, indeed, even the lime-burner's dull and torpid sense began

to be impressed by an indescribable something in that thin, rugged, thoughtful visage, with the grizzled hair hanging wildly about it, and those deeply sunken eyes, which gleamed like fires within the entrance of a mysterious cavern But, as he closed the door, the stranger turned towards him, and spoke in a quiet, familiar way, that made Bartram feel as if he were a sane and sensible man, after all

"Your task draws to an end, I see," said he "This marble has already been burning three days A few hours more will convert the stone to lime"

"Why, who are you?" exclaimed the lime-burner "You seem as well acquainted with my business as I am myself"

"And well I may be," said the stranger, "for I followed the same craft many a long year, and here, too, on this very spot But you are a new-comer in these parts Did you never hear of Ethan Brand?"

"The man that went in search of the Unpardonable Sin?" asked Bartram, with a laugh

"The same," answered the stranger "He has found what he sought, and therefore he comes back again"

"What! then you are Ethan Brand himself?" cried the lime-burner, in amazement "I am a new-comer here, as you say, and they call it eighteen years since you left the foot of Graylock But, I can tell you, the good folks still talk about Ethan Brand, in the village yonder, and what a strange errand took him away from his lime-kiln Well, and so you have found the Unpardonable Sin?"

"Even so!" said the stranger, calmly

"If the question is a fair one," proceeded Bartram, "where might it be?"

Ethan Brand laid his finger on his own heart

"Here!" replied he

And then, without mirth in his countenance, but as if moved by an involuntary recognition of the infinite absurdity of seeking throughout the world for what was the closest of all things to himself, and looking into every heart, save his own, for

what was hidden in no other breast, he broke into a laugh of scorn. It was the same slow, heavy laugh, that had almost appalled the lime-burner when it heralded the wayfarer's approach.

The solitary mountain-side was made dismal by it. Laughter, when out of place, mistimed, or bursting forth from a disordered state of feeling, may be the most terrible modulation of the human voice. The laughter of one asleep, even if it be a little child,—the madman's laugh,—the wild, screaming laugh of a born idiot,—are sounds that we sometimes tremble to hear, and would always willingly forget. Poets have imagined no utterance of fiends or hobgoblins so fearfully appropriate as a laugh. And even the obtuse lime-burner felt his nerves shaken, as this strange man looked inward at his own heart, and burst into laughter that rolled away into the night, and was indistinctly reverberated among the hills.

"Joe," said he to his little son, "scamper down to the tavern in the village, and tell the jolly fellows there that Ethan Brand has come back, and that he has found the Unpardonable Sin!"

The boy darted away on his errand, to which Ethan Brand made no objection, nor seemed hardly to notice it. He sat on a log of wood, looking steadfastly at the iron door of the kiln. When the child was out of sight, and his swift and light footsteps ceased to be heard treading first on the fallen leaves and then on the rocky mountain-path, the lime-burner began to regret his departure. He felt that the little fellow's presence had been a barrier between his guest and himself, and that he must now deal, heart to heart, with a man who, on his own confession, had committed the one only crime for which Heaven could afford no mercy. That crime, in its indistinct blackness, seemed to overshadow him. The lime-burner's own sins rose up within him, and made his memory riotous with a throng of evil shapes that asserted their kindred with the Master Sin, whatever it might be, which it was within the scope of

man's corrupted nature to conceive and cherish. They were all of one family, they went to and fro between his breast and Ethan Brand's, and carried dark greetings from one to the other.

Then Bartram remembered the stories which had grown traditionary in reference to this strange man, who had come upon him like a shadow of the night, and was making himself at home in his old place, after so long absence that the dead people, dead and buried for years, would have had more right to be at home, in any familiar spot, than he. Ethan Brand, it was said, had conversed with Satan himself in the lurid blaze of this very kiln. The legend had been matter of mirth heretofore, but looked grisly now. According to this tale, before Ethan Brand departed on his search, he had been accustomed to evoke a fiend from the hot furnace of the lime-kiln, night after night, in order to confer with him about the Unpardonable Sin, the man and the fiend each laboring to frame the image of some mode of guilt which could neither be atoned for nor forgiven. And, with the first gleam of light upon the mountain-top, the fiend crept in at the iron door, there to abide the intensest element of fire, until again summoned forth to share in the dreadful task of extending man's possible guilt beyond the scope of Heaven's else infinite mercy.

While the lime-burner was struggling with the horror of these thoughts, Ethan Brand rose from the log, and flung open the door of the kiln. The action was in such accordance with the idea in Bartram's mind, that he almost expected to see the Evil One issue forth, red-hot, from the raging furnace.

"Hold! hold!" cried he, with a tremulous attempt to laugh, for he was ashamed of his fears, although they overmastered him. "Don't, for merev's sake, bring out your Devil now!"

"Man!" sternly replied Ethan Brand, "what need have I of the Devil? I have left him behind me, on my track. It is with such half-way sinners as you that he busies

himself. Fear not, because I open the door. I do but act by old custom, and am going to trim your fire, like a lime-burner, as I was once."

He stirred the vast coals, thrust in more wood, and bent forward to gaze into the hollow prison-house of the fire, regardless of the fierce glow that reddened upon his face. The lime-burner sat watching him, and half suspected this strange guest of a purpose, if not to evoke a fiend, at least to plunge bodily into the flames, and thus vanish from the sight of man. Ethan Brand, however, drew quietly back, and closed the door of the kiln.

"I have looked," said he, "into many a human heart that was seven times hotter with sinful passions than yonder furnace is with fire. But I found not there what I sought. No, not the Unpardonable Sin!"

"What is the Unpardonable Sin?" asked the lime-burner, and then he shrank farther from his companion, trembling lest his question should be answered.

"It is a sin that grew within my own breast," replied Ethan Brand, standing erect, with a pride that distinguishes all enthusiasts of his stamp. "A sin that grew nowhere else! The sin of an intellect that triumphed over the sense of brotherhood with man and reverence for God, and sacrificed everything to its own mighty claims! The only sin that deserves a recompense of immortal agony! Freely, were it to do again, would I incur the guilt. Unshrinkingly I accept the retribution!"

"The man's head is turned," muttered the lime-burner to himself. "He may be a sinner like the rest of us,—nothing more likely,—but, I'll be sworn, he is a madman too."

Nevertheless, he felt uncomfortable at his situation, alone with Ethan Brand on the wild mountain-side, and was right glad to hear the rough murmur of tongues, and the footsteps of what seemed a pretty numerous party, stumbling over the stones and rustling through the underbrush. Soon appeared the whole lazy regiment that was

went to infest the village tavern, comprehending three or four individuals who had drunk flip beside the bar-room fire through all the winters, and smoked their pipes beneath the stoop through all the summers, since Ethan Brand's departure. Laughing boisterously, and mingling all their voices together in unceremonious talk, they now burst into the moonshine and narrow streaks of firelight that illuminated the open space before the lime-kiln. Bartram set the door ajar again, flooding the spot with light, that the whole company might get a fair view of Ethan Brand, and he of them.

There, among other old acquaintances, was a once ubiquitous man, now almost extinct, but whom we were formerly sure to encounter at the hotel of every thriving village throughout the country. It was the stage-agent. The present specimen of the genus was a wilted and smoke-dried man, wrinkled and red-nosed, in a smartly cut, brown, bob-tailed coat, with brass buttons, who, for a length of time unknown, had kept his desk and corner in the bar-room, and was still puffing what seemed to be the same cigar that he had lighted twenty years before. He had great fame as a dry joker, though, perhaps, less on account of any intrinsic humor than from a certain flavor of brandy-toddy and tobacco-smoke, which impregnated all his ideas and expressions, as well as his person. Another well-remembered, though strangely altered, face was that of Lawyer Giles, as people still called him in courtesy, an elderly ragamuffin, in his soiled shirt-sleeves and tow-cloth trousers. This poor fellow had been an attorney, in what he called his better days, a sharp practitioner, and in great vogue among the village litigants, but flip, and sling, and toddy, and cocktails, imbibed at all hours, morning, noon, and night, had caused him to slide from intellectual to various kinds and degrees of bodily labor, till at last, to adopt his own phrase, he slid into a soap-vat. In other words, Giles was now a soap-boiler, in a small way. He had

come to be but the fragment of a human being, a part of one foot having been chopped off by an axe, and an entire hand torn away by the devilish grip of a steam-engine. Yet, though the corporeal hand was gone, a spiritual member remained, for, stretching forth the stump, Giles steadfastly averred that he felt an invisible thumb and fingers with as vivid a sensation as before the real ones were amputated. A maimed and miserable wretch he was, but one, nevertheless, whom the world could not trample on, and had no right to scorn, either in this or any previous stage of his misfortunes, since he had still kept up the courage and spirit of a man, asked nothing in charity, and with his one hand—and that the left one—fought a stern battle against want and hostile circumstances.

Among the throng, too, came another personage, who, with certain points of similarity to Lawyer Giles, had many more of difference. It was the village doctor, a man of some fifty years, whom, at an earlier period of his life, we introduced as paying a professional visit to Ethan Brand during the latter's supposed insanity. He was now a purple-visaged, rude, and brutal, yet half-gentlemanly figure, with something wild, ruined, and desperate in his talk, and in all the details of his gesture and manners. Brandy possessed this man like an evil spirit, and made him as sulky and savage as a wild beast, and as miserable as a lost soul, but there was supposed to be in him such wonderful skill, such native gifts of healing, beyond any which medical science could impart, that society caught hold of him, and would not let him sink out of its reach. So, swaying to and fro upon his horse, and grumbling thick accents at the bedside, he visited all the sick-chambers for miles about among the mountain towns, and sometimes raised a dying man, as it were, by miracle, or quite as often, no doubt, sent his patient to a grave that was dug many a year too soon. The doctor had an everlasting pipe in his

mouth, and, as somebody said, in allusion to his habit of swearing, it was always alight with hell-fire.

These three worthies pressed forward, and greeted Ethan Brand each after his own fashion, earnestly inviting him to partake of the contents of a certain black bottle, in which, as they averred, he would find something far better worth seeking for than the Unpardonable Sin. No mind, which has wrought itself by intense and solitary meditation into a high state of enthusiasm, can endure the kind of contact with low and vulgar modes of thought and feeling to which Ethan Brand was now subjected. It made him doubt—and, strange to say, it was a painful doubt—whether he had indeed found the Unpardonable Sin, and found it within himself. The whole question on which he had exhausted life, and more than life, looked like a delusion.

"Leave me," he said bitterly, "ye brute beasts, that have made yourselves so, shrivelling up your souls with fiery liquors! I have done with you. Years and years ago, I groped into your hearts, and found nothing there for my purpose. Get ye gone!"

"Why, you unevil scoundrel," cried the fierce doctor, "is that the way you respond to the kindness of your best friends? Then let me tell you the truth. You have no more found the Unpardonable Sin than yonder boy Joe has. You are but a crazy fellow,—I told you so twenty years ago,—neither better nor worse than a crazy fellow, and the fit companion of old Humphrey, here!"

He pointed to an old man, shabbily dressed, with long white hair, thin visage, and unsteady eyes. For some years past this aged person had been wandering about among the hills, inquiring of all travellers whom he met for his daughter. The girl, it seemed, had gone off with a company of circus-performers, and occasionally tidings of her came to the village, and fine stories were told of her glittering appearance as she rode on horseback in the ring, or performed marvellous feats on the tight-rope.

The white-haired father now approached Ethan Brand, and gazed unsteadily into his face

"They tell me you have been all over the earth," said he, wringing his hands with earnestness. "You must have seen my daughter, for she makes a grand figure in the world, and everybody goes to see her. Did she send any word to her old father, or say when she was coming back?"

Ethan Brand's eye quailed beneath the old man's. That daughter, from whom he so earnestly desired a word of greeting, was the Esther of our tale, the very girl whom, with such cold and remorseless purpose, Ethan Brand had made the subject of a psychological experiment, and wasted, absorbed, and perhaps annihilated her soul, in the process.

"Yes," murmured he, turning away from the hoary wanderer, "it is no delusion. There is an Unpardonable Sin!"

While these things were passing, a merry scene was going forward in the area of cheerful light, beside the spring and before the door of the hut. A number of the youth of the village, young men and girls, had hurried up the hillside, impelled by curiosity to see Ethan Brand, the hero of so many a legend familiar to their childhood. Finding nothing, however, very remarkable in his aspect,—nothing but a sunburnt wayfarer, in plain garb and dusty shoes, who sat looking into the fire as if he fancied pictures among the coals,—these young people speedily grew tired of observing him. As it happened, there was other amusement at hand. An old German Jew, travelling with a diorama on his back, was passing down the mountain-road towards the village just as the party turned aside from it, and, in hopes of eking out the profits of the day, the showman had kept them company to the lime-kiln.

"Come, old Dutchman," cried one of the young men, "let us see your pictures, if you can swear they are worth looking at!"

"Oh, yes, Captain," answered the Jew,—"whether as a matter of courtesy or craft,

he styled everybody Captain,—“I shall show you, indeed, some very superb pictures!”

So, placing his box in a proper position, he invited the young men and girls to look through the glass orifices of the machine, and proceeded to exhibit a series of the most outrageous scratchings and daubings, as specimens of the fine arts, that ever an itinerant showman had the face to impose upon his circle of spectators. The pictures were worn out, moreover, tattered, full of cracks and wrinkles, dingy with tobacco-smoke, and otherwise in a most pitiable condition. Some purported to be cities, public edifices, and ruined castles in Europe, others represented Napoleon's battles and Nelson's sea-fights, and in the midst of these would be seen a gigantic, brown, hairy hand,—which might have been mistaken for the Hand of Destiny, though, in truth, it was only the showman's,—pointing its forefinger to various scenes of the conflict, while its owner gave historical illustrations. When, with much merriment at its abominable deficiency of merit, the exhibition was concluded, the German bade little Joe put his head into the box. Viewed through the magnifying-glasses, the boy's round, rosy visage assumed the strangest imaginable aspect of an immense Titanic child, the mouth grinning broadly, and the eyes and every other feature overflowing with fun at the joke. Suddenly, however, that merry face turned pale, and its expression changed to horror, for this easily impressed and excitable child had become sensible that the eye of Ethan Brand was fixed upon him through the glass.

"You make the little man to be afraid, Captain," said the German Jew, turning up the dark and strong outline of his visage, from his stooping posture. "But look again, and, by chance, I shall cause you to see somewhat that is very fine, upon my word!"

Ethan Brand gazed into the box for an instant, and then starting back, looked fixedly at the German. What had he seen? Nothing, apparently, for a curious youth,

who had peeped in almost at the same moment, beheld only a vacant space of canvas

"I remember you now," muttered Ethan Brand to the showman

"Ah, Captain," whispered the Jew of Nuremberg, with a dark smile, "I find it to be a heavy matter in my show-box,—this Unpardonable Sin! By my faith, Captain, it has wearied my shoulders, this long day, to carry it over the mountain"

"Peace," answered Ethan Brand, sternly, "or get thee into the furnace yonder!"

The Jew's exhibition had scarcely concluded, when a great, elderly dog—who seemed to be his own master, as no person in the company laid claim to him—saw fit to render himself the object of public notice. Hitherto, he had shown himself a very quiet, well-disposed old dog, going round from one to another, and, by way of being sociable, offering his rough head to be patted by any kindly hand that would take so much trouble. But now, all of a sudden, this grave and venerable quadruped, of his own mere motion, and without the slightest suggestion from anybody else, began to run round after his tail, which, to heighten the absurdity of the proceeding, was a great deal shorter than it should have been. Never was seen such headlong eagerness in pursuit of an object that could not possibly be attained, never was heard such a tremendous outbreak of growling, snarling, barking, and snapping,—as if one end of the ridiculous brute's body were at deadly and most unforgivable enmity with the other. Faster and faster, round about went the cur, and faster and still faster fled the unapproachable brevity of his tail, and louder and fiercer grew his yells of rage and animosity, until, utterly exhausted, and as far from the goal as ever, the foolish old dog ceased his performance as suddenly as he had begun it. The next moment he was as mild, quiet, sensible, and respectable in his deportment, as when he first scraped acquaintance with the company.

As may be supposed, the exhibition was

greeted with universal laughter, clapping of hands, and shouts of encore, to which the canine performer responded by wagging all that there was to wag of his tail, but appeared totally unable to repeat his very successful effort to amuse the spectators.

Meanwhile, Ethan Brand had resumed his seat upon the log, and moved, it might be, by a perception of some remote analogy between his own case and that of this self-pursuing cur, he broke into the awful laugh, which, more than any other token, expressed the condition of his inward being. From that moment, the merriment of the party was at an end, they stood aghast, dreading lest the inauspicious sound should be reverberated around the horizon, and that mountain would thunder it to mountain, and so the horror be prolonged upon their ears. Then, whispering one to another that it was late,—that the moon was almost down,—that the August night was growing chill,—they hurried homewards, leaving the lime-burner and little Joe to deal as they might with their unwelcome guest. Save for these three human beings, the open space on the hillside was a solitude, set in a vast gloom of forest. Beyond that darksome verge, the firelight glimmered on the stately trunks and almost black foliage of pines, intermixed with the lighter verdure of sapling oaks, maples, and poplars, while here and there lay the gigantic corpses of dead trees, decaying on the leaf-strewn soil. And it seemed to little Joe—a timorous and imaginative child—that the silent forest was holding its breath until some fearful thing should happen.

Ethan Brand thrust more wood into the fire, and closed the door of the kiln, then looking over his shoulder at the lime-burner and his son, he bade, rather than advised, them to retire to rest.

"For myself, I cannot sleep," said he. "I have matters that it concerns me to meditate upon. I will watch the fire, as I used to do in the old time."

"And call the Devil out of the furnace

to keep you company, I suppose," muttered Bartram, who had been making intimate acquaintance with the black bottle above mentioned "But watch, if you like, and call as many devils as you like! For my part, I shall be all the better for a snooze. Come, Joe!"

As the boy followed his father into the hut, he looked back at the wayfarer, and the tears came into his eyes, for his tender spirit had an intuition of the bleak and terrible loneliness in which this man had enveloped himself.

When they had gone, Ethan Brand sat listening to the crackling of the kindled wood, and looking at the little spirits of fire that issued through the chinks of the door. These trifles, however, once so familiar, had but the slightest hold of his attention, while deep within his mind he was reviewing the gradual but marvellous change that had been wrought upon him by the search to which he had devoted himself. He remembered how the night dew had fallen upon him,—how the dark forest had whispered to him,—how the stars had gleamed upon him,—a simple and loving man, watching his fire in the years gone by, and ever musing as it burned. He remembered with what tenderness, with what love and sympathy for mankind, and what pity for human guilt and woe, he had first begun to contemplate those ideas which afterwards became the inspiration of his life, with what reverence he had then looked into the heart of man, viewing it as a temple originally divine, and, however desecrated, still to be held sacred by a brother, with what awful fear he had deprecated the success of his pursuit, and prayed that the Unpardonable Sin might never be revealed to him. Then ensued that vast intellectual development, which, in its progress, disturbed the counterpoise between his mind and heart. The Idea that possessed his life had operated as a means of education, it had gone on cultivating his powers to the highest point of which they were susceptible, it had raised him from the level of an unlettered laborer to stand

on a stair-lit eminence, whither the philosophers of the earth, laden with the lore of universities, might vainly strive to clamber after him. So much for the intellect! But where was the heart? That, indeed, had withered,—had contracted,—had hardened,—had perished! It had ceased to partake of the universal throbbing. He had lost his hold of the magnetic chain of humanity. He was no longer a brother-man, opening the chambers or the dungeons of our common nature by the key of holy sympathy, which gave him a right to share in all its secrets, he was now a cold observer, looking on mankind as the subject of his experiment, and, at length, converting man and woman to be his puppets, and pulling the wires that moved them to such degrees of crime as were demanded for his study.

Thus Ethan Brand became a fiend. He began to be so from the moment that his moral nature had ceased to keep the pace of improvement with his intellect. And now, as his highest effort and inevitable development,—as the bright and gorgeous flower, and rich, delicious fruit of his life's labor,—he had produced the Unpardonable Sin!

"What more have I to seek? what more to achieve?" said Ethan Brand to himself. "My task is done, and well done!"

Starting from the log with a certain alacrity in his gait and ascending the hill-ock of earth that was raised against the stone circumference of the lime-kiln, he thus reached the top of the structure. It was a space of perhaps ten feet across, from edge to edge, presenting a view of the upper surface of the immense mass of broken marble with which the kiln was heaped. All these innumerable blocks and fragments of marble were red-hot and vividly on fire, sending up great spouts of blue flame, which quivered aloft and danced madly, as within a magic circle, and sank and rose again, with continual and multitudinous activity. As the lonely man bent forward over this terrible body of fire, the blasting heat smote up against his person with a breath that, it might be sup-

posed, would have scorched and shrivelled him up in a moment

Ethan Brand stood erect, and raised his arms on high. The blue flames played upon his face, and imparted the wild and ghastly light which alone could have suited its expression, it was that of a fiend on the verge of plunging into his gulf of intensest torment

"O Mother Earth," cried he, "who art no more my Mother, and into whose bosom this frame shall never be resolved! O mankind, whose brotherhood I have cast off, and trampled thy great heart beneath my feet! O stars of heaven, that shone on me of old, as if to light me onward and upward!—farewell all, and forever. Come, deadly element of Fire,—henceforth my familiar flame! Embrace me, as I do thee!"

That night the sound of a fearful peal of laughter rolled heavily through the sleep of the lime-burner and his little son, dim shapes of horror and anguish haunted their dreams, and seemed still present in the rude hovel, when they opened their eyes to the daylight

"Up, boy, up!" cried the lime-burner, staring about him. "Thank Heaven, the night is gone, at last, and rather than pass such another, I would watch my lime-kiln, wide awake, for a twelvemonth. This Ethan Brand, with his humbug of an Unpardonable Sin, has done me no such mighty favor, in taking my place!"

He issued from the hut, followed by little Joe, who kept fast hold of his father's hand. The early sunshine was already pouring its gold upon the mountain-tops, and though the valleys were still in shadow, they smiled cheerfully in the promise of the bright day that was hastening onward. The village, completely shut in by hills, which swelled away gently about it, looked as if it had rested peacefully in the hollow of the great hand of Providence. Every dwelling was distinctly visible, the little spires of the two churches pointed upwards, and caught a foreglimmering of brightness from the sun-gilt skies upon

then gilded weathercocks. The tavern was astir, and the figure of the old, smoke-dried stage-agent, cigar in mouth, was seen beneath the stoop. Old Graylock was glorified with a golden cloud upon his head. Scattered likewise over the breasts of the surrounding mountains, there were heaps of hoary mist, in fantastic shapes, some of them far down into the valley, others high up towards the summits, and still others, of the same family of mist or cloud, hovering in the gold radiance of the upper atmosphere. Stepping from one to another of the clouds that rested on the hills, and thence to the loftier brotherhood that sailed in air, it seemed almost as if a mortal man might thus ascend into the heavenly regions. Earth was so mingled with sky that it was a day-dream to look at it.

To supply that charm of the familiar and homely, which Nature so readily adopts into a scene like this, the stage coach was rattling down the mountain-road, and the driver sounded his horn, while Echo caught up the notes, and intertwined them into a rich and varied and elaborate harmony, of which the original performer could lay claim to little share. The great hills played a concert among themselves, each contributing a strain of airy sweetness.

Little Joe's face brightened at once.

"Dear father," cried he, skipping cheerily to and fro, "that strange man is gone, and the sky and the mountains all seem glad of it!"

"Yes," growled the lime-burner, with an oath, "but he has let the fire go down, and no thanks to him if five hundred bushels of lime are not spoiled. If I catch the fellow hereabouts again, I shall feel like tossing him into the furnace!"

With his long pole in his hand, he ascended to the top of the kiln. After a moment's pause, he called to his son.

"Come up here, Joe!" said he.

So little Joe ran up the hillock, and stood by his father's side. The marble was all burnt into perfect, snow-white lime. But on its surface, in the midst of the circle, —snow-white too, and thoroughly con-

1819 ~ *Herman Melville* ~ 1891

I

HERMAN MELVILLE brought to his work as a writer richer and more adventurous external experience than did any other American of his literary generation. When he published his first novel at the age of twenty-seven, he had earned a living as farmhand, bank clerk, school-teacher, and retail salesman, he had crossed the Atlantic as a cabin boy on a freighter and had rounded Cape Horn as a maintopman on a man-of-war, he had pulled an oar and cooked blubber with the crews of three whaling vessels, he had lived among savages and had been imprisoned as a mutineer.

This wealth of experience was the fruit of Herman Melville's native courage and curiosity. Though the circumstances of his youth were neither happy nor easy, he was under no evident compulsion to follow the adventurous course he chose. The decisive event of his early years was his father's death, when Herman, the third of eight children, was thirteen. Allan Melville had been a decorously urbane gentleman of business, a lover of good food and of polite society, a collector of objects of art, vain in his famous Scottish name and ancestors and in his own good looks. He had enjoyed the opportunities given by his occupation—that of an importer of fashionable garments and fine fabrics—for frequent journeyings to Liverpool, London, and Paris, where he had admired the right things and cultivated the right people. When the effects of the War of 1812 began to destroy his business, he cheerfully poured into it the portion of his father's estate which should have been inherited by his own children, and borrowed from members of his own and his wife's families. But his personal philosophy—expressly stated in his declaration that "money is the only solid substratum on which man can safely build in this world"—contained little provision against adversity and none against disaster. When his New York firm definitely failed and an effort to reestablish himself in Albany proved fruitless, he surrendered the struggle, he died in 1832, mentally deranged.

María Gansevoort Melville, the widow who succeeded to the headship of the household, had shared many of her husband's tastes. She had been proud of her fine New York house, managed with traditional Dutch thoroughness and effectiveness of her handsome face and figure, which so worthily displayed her husband's finest importations, of the Gansevoort family, famous and influential in New Netherland and New York, and in her own time in the nation. A devout and active member of the Dutch Reformed church throughout her long life, she had subjected her children to a rigorously pious denominational training. With her older sons, she set about a practical and determined effort to rebuild the family fortune. For Herman there were dull and undistinguished years at an academy in Albany, a job at fifteen in the bank of which his mother's brother was the president, a job in the store which his mother and his brother Gansevoort had started, a job on another uncle's farm in Massachusetts. At eighteen he started out to find and to make his own way.

II

To the American youth of the 1830's and '40's there were two chief roads to adventure and independence, the West and the sea. The westward movement was replacing the forests of the Ohio valley with farms and cities, sweeping across the Mississippi and the Missouri, venturing into the vast lands beyond. In these same years the American merchant marine, swiftly expanding since the War of 1812, was becoming the greatest in the world, and Yankee clippers were already the queens of all the oceans.

Herman Melville's choice of the sea was a natural one. One of his uncles was a retired sea captain, and a cousin—only a few years his senior, and a frequent companion during Herman's stay at Albany—was an officer in the United States Navy. But no intercession of influential relatives softened the experience of his first voyage. The ship on which he sailed was the *Highlander*, a freighter bound for Liverpool. His job was menial. The new boy was hazed by the brutal crew and abused or neglected by the officers. But he was husky and determined, and in the thirty days of the voyage he learned to be resourceful and self-sufficient.

Herman Melville had crossed the Atlantic with high expectation to find the England of his father's admiring stories—historic shrines, gracious people, the fine flower of civilization. What he saw, while the *Highlander* lay at Liverpool for many weeks awaiting a cargo, was the dockside slum: abject poverty, filth, drunkenness, vice. The experience was decisive for his whole life. When at last the ship returned to New York, Herman was glad to escape from it, and ready to spend three years ashore—school-teaching, reading, trying to write—before he tried the sea again at twenty-two, this time as a common sailor on a

whaling vessel which took him from New Bedford to the South Pacific and to his most exciting adventures

The *Acushnet* was one of the new additions to the rapidly growing American whaling fleet. But her crew was badly fed and ill-treated, only half of the original group of twenty-six made the full voyage of four years. When the *Acushnet* reached the Marquesas after eighteen months at sea, Melville and a companion decided they had had enough of blows and bad biscuit. They deserted.

The natives of the Marquesas group had been as yet little influenced by contact with white men. Their easy, joyous life in a place of sunlight and flowers and bright water seemed to Melville as beautiful as that of the Liverpool slums was ugly. In person they were beautiful, and Melville found them virtuous as well—generous, trustworthy, and compassionate. He recognized something of the richness of their social system, though he was far from understanding it fully, and of their traditional wisdom and poetry. But when after a few weeks another whaler touched at the Marquesas, he joined her crew.

This ship, a small one from Australia, proved even less agreeable than the *Acushnet*. The captain was so grossly incompetent that part of the crew, Melville among them, ultimately took over control of the ship at Tahiti, refusing to sail farther. They were thrown into prison as mutineers. Melville escaped, and after a few weeks in which he observed the life of the Tahitian natives, much more influenced by white traders and missionaries than that of the Marquesans, he shipped on yet a third whaler.

On shore again in the Sandwich Islands (as the Hawaiian group was then called), he obtained a job in a store in Honolulu. Here he had opportunity to assess the full effect of white commerce and settlement on the native population. When an American naval vessel, the frigate *United States*, touched at Honolulu, Melville enlisted as an ordinary seaman, on August 17, 1843, for the voyage home.

III

Books of travel were in great popular demand at this time both in England and America, especially those dealing with the South Seas. Herman's older brothers—Allan, now established in a law practice in New York, and Gansevoort, in business in London—encouraged the returned sailor to write the story of his adventures in the Pacific, and helped him to find his first publishers, in both London and New York.

No reader of *Typee* (1846), the lively book Melville made out of his weeks on the Marquesas, can doubt that he enjoyed writing it. He wrote with easy naturalness, and with a pervasive good humor only occasionally ruffled when he touched on the mistreatment of the natives by the whites. The book was

immediately successful. For the first time in his life Herman Melville knew the feeling of being well paid for enjoyable work. Small wonder that he decided to go on writing.

He was encouraged in this decision by a new friend, the editor directly responsible for the publication of *Typee* in America. This was Evert Duyckinck, son of a respected New York publisher and an active and influential figure in American literary life for a generation. Duyckinck knew Irving, Poe, Simms, Hawthorne, and many lesser figures, and saw to it that Melville met these men and became known in their circles. Duyckinck had a large private library, and loaned his books to Melville freely. Rabelais, Tegnér, Sir Thomas Browne, John Donne, William Blake and Shakespeare were among the writers he read eagerly and with matured understanding, and discussed with Duyckinck and his group in long convivial evenings at Duyckinck's home—or in letters whenever the friends were separated for a few days. Public affairs were exciting as well, in these years of the Mexican War and the boundary controversy with Great Britain. Melville caught something of Duyckinck's active interest in politics, and wrote a series of sketches about Zachary Taylor for *Yankee Doodle*, a humorous magazine edited by members of the Duyckinck group. He followed the current books, and contributed many reviews—including a long and appreciative discussion of Hawthorne's *Mosses from an Old Manse*—to *The Literary World*, edited by Duyckinck. He went to the theatre, looked at pictures and sculpture, listened to music.

Meanwhile he had written a second long narrative based on the Tahitian episodes of his South Seas experience. *Omoo* (1847), though less idyllic than its predecessor, is even more adventurous and was equally popular. With prospects so bright, Melville married. His bride, Elizabeth Shaw, was the daughter of Chief Justice Lemuel Shaw of Boston, an old friend of the Melville family and one of the most distinguished American judges of his time. Allan Melville was newly married also, and late in 1847 the two couples set up housekeeping together at 103 Fourth Avenue, New York, to be joined soon by Maria Gansevoort Melville and the two unmarried Melville sisters. It was in this ménage that Herman Melville wrote three novels and began a fourth in the next three years.

Mardi (1849), published just a month after Melville's first child was born, begins as though it were a sequel to *Omoo*, with the departure of a whaler from Tahiti, but changes suddenly to satirical fantasy, and blossoms into poetic allegory. The result is a literary mixture which the critics sampled gingerly and the public rejected outright. Rebuked—and pressed for money—Melville returned to the proved pattern. Writing with increased power and control of his materials, he produced in rapid succession *Redburn* (1849), based on his first sea voyage on the freighter to Liverpool, and *White-jacket* (1850), in which he used the experience of his months on a man-of-war.

But even such productiveness could not meet the financial demands of the New York establishment. Early in 1850 Melville acquired, with the help of his father-in-law, a farm in the Berkshire Hills near Pittsfield, Massachusetts, and moved there with his family. No doubt he hoped to reduce living costs, to secure retired leisure for writing, and to simplify his life in other ways. He found the farm work demanding and exhausting, and the frequent visitors from New York—though welcome—equally so. Yet somehow he completed, for publication late in 1851, his greatest book, *Moby-Dick*.

The months at Pittsfield had been greatly enriched for Melville by a swiftly maturing friendship with Hawthorne and his wife, who had come to the region at about the same time. Melville admired Hawthorne's work profoundly, and had expressed in his review of *Mosses from an Old Manse* the opinion that Hawthorne was the first really great American writer. Now he turned eagerly for understanding to the man he was willing, in his fully achieved knowledge of his own powers, to call master. His forthrightness and exuberance may have embarrassed the older and colder man. But Melville was happy in what he found of response, and he was a frequent visitor, warmly welcomed, at the Hawthorne home.

We owe to the discerning eyes of Sophia Peabody, the wife of Hawthorne, our clearest contemporary portrait of Melville, in a long letter to her mother, almost wholly devoted to him.

I am not sure that I do not think him a very great man. A man with a true, warm heart, and a soul and an intellect,—with life to his finger-tips, earnest, sincere and reverent, very tender and modest. Once in a while, his animation gives place to a singularly quiet expression—an indrawn, dim look, but which at the same time makes you feel that he is at that moment taking deepest note of what is before him. It is a strange, lazy glance, but with a power in it quite unique.

Julian Hawthorne recounts a childhood memory of an evening visit in the course of which Melville, spinning a South Sea yarn for the entertainment of the Hawthornes, acted out a war dance so convincingly that after he had gone home the whole family searched for the war club—wholly imaginary—which he had supposedly forgotten.

To Hawthorne, then, Melville dedicated *Moby-Dick*; and he rejoiced in Hawthorne's characteristically measured praise of the book. A few critics, also, both in England and America, appreciated its quality and importance in some degree. But in general the reviews were unfavorable, and sales were poor.

Disappointed and resentful, baffled by his poverty and harassed by debts, saddened by the removal of the Hawthornes to Concord, Melville plunged at once into the writing of another novel. *Pierre* (1852) is externally a romantic melodrama, internally it is a passionate outpouring of the dark and troubled

mind of Herman Melville at thirty-two, a desperate attempt to read the riddle of good and evil, of human motive and human fate. If Melville expected favor for the book from any quarter, he was disappointed.

Perhaps Melville faced at this time a crisis somewhat like that to which his father had surrendered twenty years before. His wife wrote later of these months that "after the writing of *Pierre* his health was much despaired of." He survived, and went on writing, but on a less ambitious scale and in a changed tone.

Israel Potter (1855), Melville's first novel after *Pierre*, was avowedly a fictional retelling of an obscure fragment of autobiography from an old book Melville had picked up "Benito Cereno," a long story which most fully illustrates the height of technical mastery Melville had attained at this time, likewise uses old material. Only in a few unpretentious personal essays which he contributed to magazines, and in "The Encantadas," a series of related sketches of the Galapagos Islands—which he had twice visited in his Pacific journey—did he touch at all his personal experience. With the partial completion of *The Confidence Man* (1857)—a satirical and didactic panorama of people on a Mississippi River steamboat—he abruptly stopped writing prose fiction.

In 1856-7 Melville made a journey to Italy and the Holy Land, visiting Hawthorne at his consulate at Liverpool on the way. Again in 1860 he was on the sea, this time as a passenger to San Francisco on a clipper-ship commanded by his brother Thomas Melville. In these years he attempted rather unsuccessfully to make some money by lecturing—which was proving so remunerative to Emerson and other writers of the time—and tried repeatedly to obtain a government appointment which would assure an income. At last he gave up the Massachusetts farm and returned to New York.

He was still writing, but poetry rather than fiction. A volume of his poems occasioned by events and impressions of the Civil War appeared in 1866, *Battle-Pieces and Aspects of the War*, with a notable prose "Supplement" urging the same attitude toward the defeated South as that expressed by Lincoln in the "Second Inaugural Address." In the same year he finally obtained a government appointment, but one of no honor or comfort and with a meagre salary—that of District Inspector of Customs in the New York Harbor. Melville held this position for nineteen years.

The last thirty years of Melville's life were neither so unproductive nor so isolated as some biographers have suggested. In 1872 he published (with the financial assistance of his uncle, Peter Gansevoort) the long narrative poem *Clarel*. In this work he repeated the essential method of *Moby-Dick*, using a fictional framework and details from his own personal experience—of his visit to the Holy Land—to project philosophical and religious problems. Though in no way did Melville participate in the literary life of New York at this time as he had in earlier years, his friendship with Duyckinck was

renewed in regular association until Duyckinck's death. Occasionally, though rarely, an admirer of his work sought him out. Most of his not abundant leisure was given to reading and study. Poems accumulated to make up two small volumes, *John Mari and Other Sailors* (1888) and *Timoleon* (1891), which he published privately in editions of twenty-five copies each, and a third left in manuscript at his death. At the very end of his life he returned to fiction, to produce one of the finest of all his works, the long story *Billy Budd*, not published until 1924. He died in 1891, his death little noticed by the literary world.

IV

Long neglected by critics and literary historians—though ordinary people went on reading and enjoying *Typee*, *Omoo* and *Moby-Dick*, in both England and America—Melville's work was suddenly rediscovered in the early 1920's, arousing a degree of interest unparalleled by that in any other American writer of his century. Skepticism and negation were prominent aspects of thought and of literary expression in the 1920's. It is not surprising that the newly enthusiastic criticism of Melville tended to read into him its own dominant attitudes. In more recent years much careful research has clarified many events in Melville's life, and broader study of his work as a whole has made possible a better understanding of his major books.

Typee is one of these, primarily in its own right as entertainment. Such are the freshness, the vitality, the abundant humor and active movement of this story that it is hard to imagine a reader who would find nothing to enjoy in it. Melville's delight in the unspoiled, childlike people of whom he wrote is matched by his exuberant pleasure in his own power to recall and share that delight. The lovely figure of Fayaway, the Marquesan girl, at once strange and exotic and very real and human, is hardly to be equalled in all the extensive literature in which men of the complex modern world have sought to record their discovery of beauty and value in primitive characters. Toby Greene is as engaging a companion in adventure as one could ask for. In his writing of *Typee* Melville found a style amazingly easy, spontaneous, vivid—truly amazing if one remembers his extremely limited experience in writing, and if one examines the stolidly factual or falsely rhetorical narration of most other books of travel of the time. Yet this style is already characteristic in its occasional swift modulations to fit Melville's barbed commentary on the conduct of white men in the South Seas, or his candid examination of his own actions and motives.

It is in these ethical considerations that *Typee* is linked with its successors. Already in this first novel questions of right and wrong are troubling Melville, and he is not satisfied by conventional and easy answers. The contrast between

Liverpool slum and Marquesan valley, terribly real in his own experience, lies behind his questioning—and it is the value of civilization itself that he is moved to question. The conduct of the Typees is contrary to a thousand rules of civilized behaviour, but they are happy, kind, good—until white men teach them to be civilized!

In *Omoo* the ethical problems are intensified. The novel has no lack of the flavor and charm of its predecessor: the Tahitian landscape is as vividly presented as the Marquesan, the movement of the story is lively and absorbing. Melville's increasing ability to delineate character is apparent in Doctor Long (ghost, much more complete and arresting as the narrator's companion than Toby Greene). The other important characters are more or less directly related to the statement of ethical questions. The Tahitians had suffered longer than the Marquesans the effects of white supremacy, and the corresponding probings of critical commentary are more numerous and more prominent.

In *Mardi* Melville surrendered (after 150 pages of brilliant "straight" narration) to the impulse to play with words and, especially, with ideas. Ship and whales—real whales in a real ocean—are alike abandoned, for symbolic voyages in a world of fantasy. Fayaway is transmuted into Yillah, embodiment of pure delight briefly enjoyed and then lost forever. In the quest for her—doomed to frustration seemingly because his first possession of her has resulted from a crime of violence—the hero of the tale encounters Queen Hautia, whose dusky handmaidens afford a strange, recurring chorus of evil omen as they offer—vainly—earthly love and the pleasures of the senses as a substitute for the lost Yillah. The remaining bulk of *Mardi*, inexpert and vague in narrative structure, consists of satirical fantasy. In company with a poet and a philosopher the hero visits many lands, seeking news of Yillah, but pausing to question the inhabitants and observe their life. Into these episodes Melville poured the hodgepodge of his reading and thinking of the moment, his excited discovery of the world of ideas and affairs in which he was living and writing in those crowded years in New York. It is not hard to recognize satirical comments on the South and slavery, on the North and industrialism, on Britain and France and Russia. And in this totally different context and method, ethical inconsistencies and contradictions are noted as sharply as in *Typee* and *Omoo*, but—as was not true of the earlier novels—their philosophical and religious implications are approached, though somewhat clumsily and tentatively.

When, disappointed by the critics' harsh reception of *Mardi* and sobered by the refusal of the public to buy it, Melville returned to worlds wholly recognizable as actual, it was with a deepened sense of his calling as a writer and with rapidly maturing powers. He himself referred to *Redburn* as a pot-boiler, written hastily for money. But in both *Redburn* and *Whitejacket* he made experiments and gained experience necessary in preparation for *Moby-Dick*. For one thing, he developed in these novels the technique of embodying

great amounts of factual information in an adventurous narrative. This was the technique he was to use so extensively in the "encyclopedia of whales and whaling" which forms such a large and important part of *Moby-Dick*. When one has read *Redburn* he knows the life of the common sailors on a typical ocean freighter of Melville's time intimately and thoroughly. When he has read *Whitejacket* he knows even more completely the actual texture and movement of life on a man-of-war in the last days of the navy of sails. Growth in power of characterization is likewise noteworthy in these novels. Jackson, the venomous and degenerate sailor who becomes young Redburn's chief tormentor, is a more strongly portrayed character than any Melville had achieved before, masterly in pitiful ugliness. Similarly Jack Chase, of *Whitejacket*, is Melville's first full projection of human excellence in a man of courage and nobility. Perhaps even more significantly, these novels, and especially *Whitejacket*, show advance in the treatment of inner experience. Melville had never before written with such penetration and such sureness as he displayed in the incident of Whitejacket's fall from the mast-head and his near approach to death by drowning.

But it is in their ethical bearings that *Redburn* and *Whitejacket* are most interesting. Melville's quarrel with his own society has now become overt, aggressive. No longer proceeding by indirection or allegory, he attacks directly specific evils of his time. *Redburn* is marked by the powerful pictures of human misery and degradation seen by the young sailor in the Liverpool slums, and by the bitter contrast between the sufferings of the immigrants in the steerage and the callousness of the cabin passengers on the return voyage. Among *Whitejacket's* chief targets was the system of flogging in the Navy, and Melville's revelation of its inhumanity gave added force to a current demand for reform, shortly effective. In these aspects of his work Melville is the humanitarian reformer, in full harmony with his time.

But Melville's thinking was reaching to deeper levels in these years than that of most reformers of his time ever attained. He was not satisfied with movements and organizations, nor did he think that men can be saved by anything they make or do, by anything but what they are. It is in this emphasis on individual responsibility—confirmed in the novel's final paragraph: "From the last ill no being can save another, therefore each man must be his own saviour"—that *Whitejacket* is the true predecessor of *Moby-Dick*.

V

In the five years that preceded the writing of *Moby-Dick* Melville had completed five novels. He had married, and his first child had been born. He had tasted fame and financial success and had encountered adversity. He had

entered actively into the literary and political life of his times. He had read widely and enthusiastically.

Though the fruits of what he had lived, emotionally and intellectually, in these and earlier years are the chief elements of substance in *Moby-Dick*, the effects of his reading are perhaps most immediately apparent. To Richard Burton and Sir Thomas Browne *Moby-Dick* must owe something of its wealth of allusion and recondite lore, and something of the rolling music of its prose. To Blake it may owe something of its symbolism, to Rabelais something of its massiveness and discursiveness, its gusto and broad humor. To Shakespeare Melville's indebtedness is much more important. From the greatest of masters—whose plays he discussed eagerly with Duyckinck in letters and conversations of these years—he learned much of the actual technique he employed in *Moby-Dick*. Whole chapters of the novel are in dramatic form, and other passages not so denoted are actually Shakespearian soliloquies in the strictest sense. Even more significantly the thought of Shakespeare, especially of *King Lear*, entered into the conceptions of man and the world which Melville was to project in his greatest novel.

Moby-Dick is closely linked with its predecessors, however. Its narrative core is the actual experience of a whaling voyage, the richest portion of his life at sea, which Melville had left untouched—except for a few pages in *Mardi*—in the earlier books. And so brilliantly is this story told, as story, that *Moby-Dick* has been read with delight by many thousands for the story alone, and is to be obtained in some bookstores even today only in the juvenile department.¹

Also, as in the earlier novels, we have in *Moby-Dick* great quantities of factual information: the natural history of whales, the literature of whaling, the actual processes of chasing and capturing the whale, stripping the blubber, refining and storing the oil. A once great industry, today all but extinct, receives here its fullest and most illuminating history.

The richness of this history may make *Moby-Dick* seem, on first reading, a sprawling and amorphous book. The reader may find himself skipping chapters of detail to get on with the story. Only gradually does he come to see that both the narrative of action and the lore of whaling are subordinate to the real purpose of the novel. That purpose is revealed through the characters, and only by degrees.

Apart from the always shadowy narrator, Ishmael, the most important figure of the opening chapters of *Moby-Dick* is the savage harpooner Queequeg, who becomes Ishmael's friend—a person fully kin to the people of *Typee* and *Omoo*, though far richer than any of the earlier figures in human appeal and meaning. A savage, he is a rare demonstration of the potentials of human dignity and goodness—epitomized in his saving of the life of one who has insulted him—and with this a very real and likable person.

Not until many chapters have established a firm background of detail and

emotion does Melville let us see, with Ishmael and Queequeg, the major character of the novel, and learn with them his purpose which affords its theme. He bears the name of that proud and blasphemous Old Testament king who "did more to provoke the Lord God of Israel to anger than all the kings of Israel that were before him." Ahab's intention is not the ordinary harvest of whale-bone and oil, but a personal revenge on the giant white whale that in an earlier encounter has "reaped his right leg" and left the strong man a cripple. To support of this purpose he wins the crew by the seduction of gold and by the magnetism of his own hatred. The first mate, Starbuck, pleads with him, but in vain. Ahab acknowledges that his course is impious, even blasphemous. He feels remorse for those he is endangering and regret for the lost happiness of his own life. But he persists. He has identified the great whale with all the obscure, ineluctable evil of life, and his pursuit is a considered and purposeful defiance of a universe in which unexplained and uncontrollable evil exists.

The great theme of *Moby-Dick* is stated clearly in its ninth chapter, in Father Mapple's sermon on the blessedness of harmony with the will of God. Ahab's real adversary is within himself—his pride, and the selfishness with which he ruthlessly uses and destroys the lives of other men for his own purposes. He refuses to see that he could gain wholeness of mind and spirit by acceptance of his bodily mutilation, and mastery of life by submission to its conditions. The meaning of *Moby-Dick* is essentially religious. The novel is a mighty parable, of sinful pride and its self-imposed destruction. About this central theme Melville has projected the intricate and yet organic tissue of the novel, with no character unnecessary, no incident digressive or superfluous, no detail without meaning. And as he wrote he became one of the great masters of English prose. No other American novel of its century approaches *Moby-Dick* in variety and forcefulness of images, in sureness and resourcefulness of word choices, in subtleness and suppleness of rhythm.

VI

How far the general failure of his contemporaries to recognize the full merits of *Moby-Dick*—in spite of a few discerning comments—may have affected Melville's next novel can be only conjectured, what persuaded him to write *Pierre*—after the authentic and original beauties of *Moby-Dick*—in a style which often seems compounded from those of the traditional Gothic tale and the conventional sentimental romance it is impossible to guess. If he hoped to beguile the public by a superficial resemblance to such current best sellers as George Lippard's *The Quaker City* (1844) and Susan B. Warner's *The Wide, Wide World* (1850), he was self-defeated. For the material that he clothed in this largely conventional and artificial style was in the highest degree inflammable and explosive.

It was, in fact, the old ethical confusion first noted in *Typee* the relation between good and evil in a world of inconsistencies and contradictions. The central character, Pierre, does what he believes to be right, and believes that he does it unselfishly. His action has the ultimate effect of destroying the happiness and the lives of all he loves, and in the end he is not sure of his own first motives. In *Pierre* as in *Mardi*, an evil action for good ends is not thereby made good. In this novel as in all its predecessors, and more intensely, with more scorn and bitterness, Melville indicts false conventions and moral hypocrisies and all that was most odious in the society of Victorian America. In part *Pierre* continues and to some degree espouses Ahab's quarrel with the universe as it is. But there are deeper elements than all these in *Pierre*, personal elements of pain and protest, sometimes open and easily understood as in the sharply detailed account of Pierre's experiences as a writer, sometimes veiled beyond hope of assured interpretation. Surely the last of the major novels of Melville for the student to read, as it was the last in composition, *Pierre* will as surely prove first in ability to tease the mind with suppositions and surmises.

In *Israel Potter* (1855) Melville turned with almost obvious relief from the agonized inner questioning of *Pierre* to the outer world again. Only briefly in its pages is a window opened on the turmoil which still raged in his heart. The prevailing mood of its wonderfully simple and lucid prose is tenderness, a quiet compassion. Comparable objectiveness and restraint characterize most of Melville's prose after *Pierre*, though *The Confidence Man*, carelessly written and left incomplete—seemingly given up as a bad job—carries the theme of ethical confusions and contradictions as its whole reason for being.

The poetry to which Melville gave most of his creative strength in the last thirty years of his life makes few concessions to popular taste, shows little effort to gain or hold an audience. But to the reader to whom unmistakable sincerity is the first of literary virtues, *Clarel* and many of the shorter poems have positive value. In *Clarel* the ethical problems which still tortured Melville are stated in specifically religious terms, in the experiences of a pilgrim in the Holy Land and his conversations with widely differing acquaintances of the journey. Its atmosphere is one of outward calm, the travellers and the poem proceed at a sedate pace. But there is a desperate tension, a deep earnestness at the heart of the narrative. Its slender but genuine dramatic core is a tragedy as unrelieved as that of *Pierre*, the tortured yearning for understanding which it expresses is no less profound. *Clarel* is written in a poetic form no longer fashionable, with almost harsh classic simplicity, a rigorous rejection of all artifice and ornament. But it is a far greater book, of far deeper meaning both in its revelation of Melville's problems and in relation to those of the reader of today, than most commentators on Melville's work have realized. Like *Moby-Dick*, *Clarel* is a major document of the religious experience of the 19th Century, of the cleavage between fact and faith, the conflict between traditional

religion and widening knowledge of the world as it is. In *Clarel* the dilemma is resolved, in the epilogue, by an act of faith. In *Billy Budd*, written by Melville with death at his elbow, the understanding reader may find a restatement of that faith, not merely acquiescent but triumphant.

When Melville's life and work are viewed in their entirety, it is seen that he never ceased to be the adventurer. His journeyings turned inward in his later years, but the oceans of the mind he then explored were no less vast and perilous than those he sailed in the *Highlander* and the *Acushnet* and reported in *Redburn*, *Typee*, *Omoo* and *White-jacket*. In his humanitarianism, his outright criticism of social wrongs, his earnest searching after causes and relationships in the world about him, he was the true child of the 19th Century, a major spokesman of his time. But in the most significant expressions of his thought he was much more than a Victorian American. His search for truth was more courageous and more persistent, his record of it more candid and complete, than that of any of his contemporaries. He rejected the easy bypass offered by Transcendentalism, as he rejected the static Calvinism of his inheritance. In *Moby-Dick*, in *Pierre*, in *Clarel*, in *Billy Budd*, he faced the greatest of all the questions of men's thinking, faced them forthrightly, and embodied them in creative expressions unsurpassed in power, in depth, in lasting meaning, by any other writings of his place and time.

[The discussion of Melville's life and work during his lifetime has little but historical interest, but the student will find rewarding of examination the passages relating to Melville in Rose Hawthorne Lathrop's *Memories of Hawthorne* (Boston, 1897) and Julian Hawthorne's *Nathaniel Hawthorne and His Wife* (2 vols., Boston, 1884). A number of very interesting letters are included in *Family Correspondence of Herman Melville, 1830-1904* (New York, 1929), edited by V. H. Paltsits. Books about Melville since the revival of interest in him during the 1920's are, with few exceptions, both biographical and critical. The pioneer work is R. M. Weaver's *Herman Melville, Mariner and Mystic* (New York, 1921). It is markedly inadequate in treatment of Melville's later life and work. Lewis Mumford's *Herman Melville* (New York, 1929) is appreciative and admirably written, not always dependable in interpretation. John Freeman's *Herman Melville* (London, 1926), a briefer study, is incomplete in some respects but generally sound in judgments. Of more recent works, Charles Roberts Anderson's *Melville in the South Seas* (New York, 1939) offers the first definitive study of both the actual events of the period treated and the relevant literature. William Braswell's *Melville's Religious Thought* (Durham, 1943) is more valuable for the factual study of Melville's work which it contains than for critical analysis. William Ellery Sedgwick's *Herman Melville. The Tragedy of Mind* (Cambridge, 1944) gives the best discussion thus far presented of *Clarel* and the later work in general. A most penetrating and illuminating essay on Melville is that by F. O. Matthiessen in *American*

Renaissance (New York, 1941) Of brief discussions of Melville, this and that of Willard Thorp in *Herman Melville* (New York, 1938), in American Writers Series, are the most valuable

The texts used in the selections are those of *The Works of Herman Melville*, Standard edition (London, 1924), with slight alterations *Collected Poems of Herman Melville* (Chicago, 1947), edited by Howard P. Vincent, has appeared as Vol. XIV of *Complete Works of Herman Melville* A revised and corrected text of *Billy Budd*, edited by F. Barron Freeman, has been announced]

From

"HAWTHORNE AND HIS MOSSES"
[1922 (1850)]

BUT it is the least part of genius that attracts admiration Where Hawthorne is known, he seems to be deemed a pleasant writer, with a pleasant style—a sequestered, harmless man, from whom any deep and weighty thing would hardly be anticipated—a man who means no meanings But there is no man, in whom humor and love, like mountain peaks, soar to such a rapt height as to receive the irradiations of the upper skies,—there is no man in whom humor and love are developed in that high form called genius, no such man can exist without also possessing, as the indispensable complement of these, a great, deep intellect, which drops down into the universe like a plummet O! love and humor are only the eyes through which such an intellect views this world The great beauty in such a mind is but the product of its strength What, to all readers, can be more charming than the piece entitled *Monsieur du Miroir*, and to a reader at all capable of fully fathoming it, what, at the same time, can possess more mystical depth of meaning?—yes, there he sits and looks at me, this "shape of mystery," this "identical MONSIEUR DU MIROIR!" "Methinks I should tremble now were his wizard power of gliding through all impediments in search of me to place him suddenly before my eyes"

How profound, nay, appalling, is the moral evolved by the *Earth's Holocaust*,

where—beginning with the hollow follies and affectations of the world,—all vanities and empty theories and forms are, one after another, and by an admirably graduated, growing comprehensiveness, thrown into the allegorical fire, till, at length, nothing is left but the all-engendering heart of man, which remaining still unconsumed, the great conflagration is naught

Of a piece with this, is the *Intelligence Office*, a wondrous symbolizing of the secret workings in men's souls There are other sketches still more charged with ponderous import

The Christmas Banquet, and *The Bosom Serpent*, would be fine subjects for a curious and elaborate analysis, touching the conjectural parts of the mind that produced them For spite of all the Indian-summer sunlight on the hither side of Hawthorne's soul, the other side—like the dark half of the physical sphere—is shrouded in a blackness, ten times black But this darkness but gives more effect to the ever-moving dawn, that forever advances through it, and circumnavigates his world Whether Hawthorne has simply availed himself of this mystical blackness as a means to the wondrous effects he makes it to produce in his lights and shades, or whether there really lurks in him, perhaps unknown to himself, a touch of Puritanic gloom,—this, I cannot altogether tell Certain it is, however, that this great power of blackness in him derives its force from its appeals to that Calvinistic sense of Innate Depravity and Original Sin, from whose visitations, in

some shape or other, no deeply thinking mind is always and wholly free. For, in certain moods, no man can weigh this world without throwing in something, somehow like Original Sin, to strike the uneven balance. At all events, perhaps no writer has ever wielded this terrific thought with greater terror than this same harmless Hawthorne. Still more this black conceit pervades him through and through. You may be wretched by his sunlight, transported by the bright gildings in the skies he builds over you, but there is the blackness of darkness beyond, and even his bright gildings but fringe and play upon the edges of thunder-clouds. In one word, the world is mistaken in this Nathaniel Hawthorne. He himself must often have smiled at its absurd misconception of him. He is immeasurably deeper than the plummet of the mere critic. For it is not the brain that can test such a man, it is only the heart. You cannot come to know greatness by inspecting it, there is no glimpse to be caught of it, except by intuition, you need not ring it, you but touch it, and you find it is gold.

Now, it is that blackness in Hawthorne, of which I have spoken, that so fixes and fascinates me. It may be, nevertheless, that it is too largely developed in him. Perhaps he does not give us a ray of light for every shade of his dark. But however this may be, this blackness it is that furnishes the infinite obscure of his background—that background, against which Shakespeare plays his grandest conceits, the things that have made for Shakespeare his loftiest but most circumscribed renown, as the profoundest of thinkers. For by philosophers Shakespeare is not adored, as the great man of tragedy and comedy. "Off with his head, so much for Buckingham!" This sort of rant interlined by another hand, brings down the house—those mistaken souls, who dream of Shakespeare as a mere man of Richard the Third humps and Macbeth daggers. But it is those deep far-away things in him, those occasional flashings-forth of the intuitive Truth in him,

those short, quick probings at the very axis of reality, these are the things that make Shakespeare, Shakespeare. Through the mouths of the dark characters of Hamlet, Timon, Lear, and Iago, he craftily says, or sometimes insinuates the things which we feel to be so terrifically true, that it were all but madness for any good man, in his own proper character, to utter, or even hint of them. Tormented into desperation, Lear, the frantic king, tears off the mask and speaks the same madness of vital truth. But, as I before said, it is the least part of genius that attracts admiration. And so, much of the blind, unbridled admiration that has been heaped upon Shakespeare, has been lavished upon the least part of him. And few of his endless commentators and critics seem to have remembered, or even perceived, that the immediate products of a great mind are not so great as that undeveloped and sometimes undevelopable yet dimly-discernible greatness, to which those immediate products are but the infallible indices. In Shakespeare's tomb lies infinitely more than Shakespeare ever wrote. And if I magnify Shakespeare, it is not so much for what he did do as for what he did not do, or refrained from doing. For in this world of lies, Truth is forced to fly like a scared white doe in the woodlands, and only by cunning glimpses will she reveal herself, as in Shakespeare and other masters of the great Art of Telling the Truth,—even though it be covertly and by snatches.

But if this view of the all-popular Shakespeare be seldom taken by his readers, and if very few who extol him have ever read him deeply, or perhaps, only have seen him on the tricky stage (which alone made, and is still making him his mere mob renown)—if few men have time, or patience, or palate, for the spiritual truth as it is in that great genius—it is then no matter of surprise, that in a contemporaneous age, Nathaniel Hawthorne is a man as yet almost utterly mistaken among men. Here and there, in some quiet arm-chair in the noisy town, or some deep nook

among the noiseless mountains, he may be appreciated for something of what he is. But unlike Shakespeare, who was forced to the contrary course by circumstances, Hawthorne (either from simple disinclination, or else from inaptitude) refrains from all the popularizing noise and show of broad farce and blood-besmeared tragedy, content with the still, rich utterance of a great intellect in repose, and which sends few thoughts into circulation, except they be aërialized at his large warm lungs, and expanded in his honest heart.

Nor need you fix upon that blackness in him, if it suit you not. Nor, indeed, will all readers discern it, for it is, mostly, insinuated to those who may best understand it, and account for it, it is not obtruded upon every one alike.

Some may start to read of Shakespeare and Hawthorne on the same page. They may say, that if an illustration were needed, a lesser light might have sufficed to elucidate this Hawthorne, this small man of yesterday. But I am not willingly one of those who, as touching Shakespeare at least, exemplify the maxim of Rochefoucauld,¹ that “we exalt the reputation of some, in order to depress that of others”, who, to teach all noble-souled aspirants that there is no hope for them, pronounce Shakespeare absolutely unapproachable. But Shakespeare has been approached. There are minds that have gone as far as Shakespeare into the universe. And hardly a mortal man, who, at some time or other, has not felt as great thoughts in him as any you will find in Hamlet. We must not inferentially malign mankind for the sake of any one man, whoever he may be. This is too cheap a purchase of contentment for conscious mediocrity to make. Besides, this absolute and unconditional adoration of Shakespeare has grown to be a part of our Anglo-Saxon superstitions. The Thirty-Nine Articles are now Forty. Intolerance has come to exist in this matter. You must believe in Shakespeare’s unapproachability, or quit the country. But what sort of a belief is this for an American, a man who is

bound to carry republican progressiveness into Literature as well as into Life? Believe me, my friends, that men, not very much inferior to Shakespeare, are this day being born on the banks of the Ohio. And the day will come when you shall say, Who reads a book by an Englishman that is a modern? The great mistake seems to be, that even with those Americans who look forward to the coming of a great literary genius among us, they somehow fancy he will come in the costume of Queen Elizabeth’s day, be a writer of dramas founded upon old English history or the tales of Boccaccio. Whereas, great geniuses are parts of the times, they themselves are the times, and possess a corresponding coloring. It is of a piece with the Jews, who, while their Shiloh was meekly walking in their streets, were still praying for his magnificent coming, looking for him in a chariot, who was already among them on an ass. Nor must we forget that, in his own lifetime, Shakespeare was not Shakespeare, but only Master William Shakespeare of the shrewd, thriving, business firm of Condell,² Shakespeare and Co, proprietors of the Globe Theatre in London, and by a courtly author, of the name of Chettle, was looked at as an “upstart crow,” beautified “with other birds’ feathers.” For, mark it well, imitation is often the first charge brought against originality. Why this is so, there is not space to set forth here. You must have plenty of sea-room to tell the Truth in, especially when it seems to have an aspect of newness, as America did in 1492, though it was then just as old, and perhaps older than Asia, only those sagacious philosophers, the common sailors, had never seen it before, swearing it was all water and moonshine there.

Now I do not say that Nathaniel of Salem is a greater man than William of Avon, or as great. But the difference be-

¹ Duc François de La Rochefoucauld (1613-1680), French writer.

² Henry Condell or Cundell (d. 1627), English actor and editor, friend and associate of Shakespeare.

tween the two men is by no means immeasurable Not a very great deal more, and Nathaniel were verily William

This, too, I mean, that if Shakespeare has not been equalled, give the world time, and he is sure to be surpassed in one hemisphere or the other Nor will it at all do to say that the world is getting grey and grizzled now, and has lost that fresh charm which she wore of old, and by virtue of which the great poets of past times made themselves what we esteem them to be Not so The world is as young to-day as when it was created, and this Vermont morning dew is as wet to my feet, as Eden's dew to Adam's Nor has nature been all over ransacked by our progenitors, so that no new charms and mysteries remain for this latter generation to find Far from it The trilhonth part has not yet been said, and all that has been said, but multiplies the avenues to what remains to be said It is not so much paucity as superabundance of material that seems to incapacitate modern authors

Let America, then, prize and cherish her writers, yea, let her glorify them They are not so many in number as to exhaust her goodwill And while she has good kith and kin of her own, to take to her bosom, let her not lavish her embraces upon the household of an alien For believe it or not, England after all, is in many things an alien to us China has more bonds of real love for us than she But even were there no strong literary individualities among us, as there are some dozens at least, nevertheless, let America first praise mediocrity even, in her children, before she praises (for everywhere, merit demands acknowledgement from every one) the best excellence in the children of any other land Let her own authors, I say, have the priority of appreciation I was much pleased with a hot-headed Carolina cousin of mine, who once said,—“If there were no other American to stand by, in literature, why, then, I would stand by Pop Emmons³ and his *Freedomad*, and till a better epic came along, swear it was not very far

behind the *Iliad*” Take away the words, and in spirit he was sound

Not that American genius needs patronage in order to expand For that explosive sort of stuff will expand though screwed up in a vice, and burst it, though it were triple steel It is for the nation's sake, and not for her authors' sake, that I would have America be heedful of the increasing greatness among her writers For how great the shame, if other nations should be before her, in crowning her heroes of the pen! But this is almost the case now American authors have received more just and discriminating praise (however loftily and ridiculously given, in certain cases) even from some Englishmen, than from their own countrymen There are hardly five critics in America, and several of them are asleep As for patronage, it is the American author who now patronizes his country, and not his country him And if at times some among them appeal to the people for more recognition, it is not always with selfish motives, but patriotic ones

It is true, that but few of them as yet have evinced that decided originality which merits great praise But that graceful writer, who perhaps of all Americans has received the most plaudits from his own country for his productions,—that very popular and amiable writer, however good and self-reliant in many things, perhaps owes his chief reputation to the self-acknowledged imitation of a foreign model, and to the studied avoidance of all topics but smooth ones⁴ But it is better to fail in originality, than to succeed in imitation He who has never failed somewhere, that man cannot be great Failure is the true test of greatness And if it be said, that continual success is a proof that a man wisely knows his powers,—it is only to be added, that, in that case, he knows them to

³ See the first footnote to Poe's "The Literary Life of Thungum Bob, Esq.," p 532

⁴ Some critics have suggested that this sentence refers to Washington Irving

be small Let us believe, it, then, once for all, that there is no hope for us in these smooth, pleasing writers that know their powers Without malice, but to speak the plain fact, they but furnish an appendix to Goldsmith, and other English authors And we want no American Goldsmiths, nay, we want no American Miltons It were the vilest thing you could say of a true American author, that he were an American Tompkins Call him an American and have done, for you cannot say a nobler thing of him But it is not meant that all American writers should studiously cleave to nationality in their writings, only this, no American writer should write like an Englishman or a Frenchman, let him write like a man, for then he will be sure to write like an American Let us away with this leaven of literary flunkeyism towards England If either must play the flunkey in this thing, let England do it, not us While we are rapidly preparing for that political supremacy among the nations which prophetically awaits us at the close of the present century, in a literary point of view, we are deplorably unprepared for it, and we seem studious to remain so Hitherto, reasons might have existed why this should be, but no good reason exists now And all that is requisite to amendment in this matter, is simply this that while fully acknowledging all excellence everywhere, we should refrain from unduly lauding foreign writers, and, at the same time, duly recognize the meritorious writers that are our own, those writers who breathe that unshackled, democratic spirit of Christianity in all things, which now takes the practical lead in this world, though at the same time led by ourselves—us Americans Let us boldly condemn all imitation, though it comes to us graceful and fragrant as the morning, and foster all originality though at first it be crabbed and ugly as our own pine knots And if any of our authors fail, or seem to fail, then, in the words of my Carolina cousin, let us clap him on the shoulder and back him against all Europe for his

second round The truth is, that in one point of view this matter of a national literature has come to such a pass with us, that in some sense we must turn bullies, else the day is lost, or superiority so far beyond us, that we can hardly say it will ever be ours

And now, my countrymen, as an excellent author of your own flesh and blood—an unimitating, and, perhaps, in his way, an immutable man—whom better can I commend to you, in the first place, than Nathaniel Hawthorne He is one of the new, and far better generation of your writers The smell of young beeches and hemlocks is upon him, your own broad prairies are in his soul, and if you travel away inland into his deep and noble nature, you will hear the far roar of his Niagara Give not over to future generations the glad duty of acknowledging him for what he is Take that joy to yourself, in your own generation, and so shall he feel those grateful impulses on him, that may possibly prompt him to the full flower of some still greater achievement in your eyes And by confessing him you thereby confess others, you brace the whole brotherhood For genius, all over the world, stands hand in hand, and one shock of recognition runs the whole circle round

BENITO CERENO

[1856 (1855)]

IN the year 1799, Captain Amasa Delano, of Duxbury, in Massachusetts, commanding a large sealer and general trader, lay at anchor, with a valuable cargo, in the harbour of St Maria—a small, desert, uninhabited island towards the southern extremity of the long coast of Chili There he had touched for water

On the second day, not long after dawn, while lying in his berth, his mate came below, informing him that a strange sail was coming into the bay Ships were then not so plenty in those waters as now. He rose, dressed, and went on deck.

The morning was one peculiar to that coast. Everything was mute and calm, everything grey. The sea, though undulated into long roods of swells, seemed fixed, and was sleeked at the surface like waved lead that has cooled and set in the smelter's mould. The sky seemed a grey mantle. Flights of troubled grey fowl, kith and kin with flights of troubled grey vapours among which they were mixed, skimmed low and fitfully over the waters, as swallows over meadows before storms. Shadows present, foreshadowing deeper shadows to come.

To Captain Delano's surprise, the stranger, viewed through the glass, showed no colours, though to do so upon entering a haven, however uninhabited in its shores, where but a single other ship might be lying, was the custom among peaceful seamen of all nations. Considering the lawlessness and loneliness of the spot, and the sort of stories, at that day, associated with those seas, Captain Delano's surprise might have deepened into some uneasiness had he not been a person of a singularly distrustful good nature, not liable, except on extraordinary and repeated excitement, and hardly then, to indulge in personal alarms, any way involving the imputation of malign evil in man. Whether, in view of what humanity is capable, such a trait implies, along with a benevolent heart, more than ordinary quickness and accuracy of intellectual perception, may be left to the wise to determine.

But whatever misgivings might have obtruded on first seeing the stranger, would almost, in any seaman's mind, have been dissipated by observing that the ship, in navigating into the harbour, was drawing too near the land, for her own safety's sake, owing to a sunken reef making out off her bow. This seemed to prove her a stranger, indeed, not only to the sealer, but the island, consequently, she could be no wonted freebooter on that ocean. With no small interest, Captain Delano continued to watch her—a proceeding not much facilitated by the vapours partly mantling

the hull, through which the fair matin light from her cabin streamed equivocally enough, much like the sun—by this time crescented on the rim of the horizon, and apparently, in company with the strange ship, entering the harbour—which, wimpled by the same low, creeping clouds, showed not unlike a Lima intriguante's¹ one sinister eye peering across the Plaza from the Indian loop-hole of her dusk *saya-y-manta*.²

It might have been but a deception of the vapours, but, the longer the stranger was watched, the more singular appeared her manœuvres. Ere long it seemed hard to decide whether she meant to come in or no—what she wanted, or what she was about. The wind, which had breezed up a little during the night, was now extremely light and baffling, which the more increased the apparent uncertainty of her movements.

Surmising, at last, that it might be a ship in distress, Captain Delano ordered his whale-boat to be dropped, and, much to the wary opposition of his mate, prepared to board her, and, at the least, pilot her in. On the night previous, a fishing-party of the seamen had gone a long distance to some detached rocks out of sight from the sealer, and, an hour or two before day-break, had returned, having met with no small success. Presuming that the stranger might have been long off soundings, the good captain put several baskets of the fish, for presents, into his boat, and so pulled away. From her continuing too near the sunken reef, deeming her in danger, calling to his men, he made all haste to apprise those on board of their situation. But, some time ere the boat came up, the wind, light though it was, having shifted, had headed the vessel off, as well as partly broken the vapours from about her.

Upon gaining a less remote view, the ship, when made signally visible on the

¹ Flirt or siren.

² An enveloping type of cloak, or "skirt and shawl."

verge of the leaden-hued swells, with the shreds of fog here and there raggedly furling her, appeared like a white-washed monastery after a thunder-storm, seen perched upon some dun cliff among the Pyrenees. But it was no purely fanciful resemblance which now, for a moment, almost led Captain Delano to think that nothing less than a ship-load of monks was before him. Peering over the bulwarks were what really seemed, in the hazy distance, throngs of dark cowls, while, fitfully revealed through the open port-holes, other dark moving figures were dimly descried, as of Black Friars pacing the cloisters.

Upon a still nigher approach, this appearance was modified, and the true character of the vessel was plain—a Spanish merchantman of the first class, carrying negro slaves, amongst other valuable freight, from one colonial port to another. A very large, and, in its time, a very fine vessel, such as in those days were at intervals encountered along that main, sometimes superseded Acapulco³ treasure-ships, or retired frigates of the Spanish king's navy, which, like superannuated Italian palaces, still, under a decline of masters, preserved signs of former state.

As the whale-boat drew more and more nigh, the cause of the peculiar pipe-clayed aspect of the stranger was seen in the slovenly neglect pervading her. The spars, ropes, and great part of the bulwarks, looked woolly, from long unacquaintance with the scraper, tar, and the brush. Her keel seemed laid, her ribs put together, and she launched, from Ezekiel's Valley of Dry Bones.⁴

In the present business in which she was engaged, the ship's general model and rig appeared to have undergone no material change from their original warlike and Froissart⁵ pattern. However, no guns were seen.

The tops were large, and were railed about with what had once been octagonal net-work, all now in sad disrepair. These tops hung overhead like three rumous avianes, in one of which was seen perched,

on a ratlin, a white noddy, a strange fowl, so called from its lethargic somnambulistic character, being frequently caught by hand at sea. Battered and mouldy, the castellated fore-castle seemed some ancient turret, long ago taken by assault, and then left to decay. Towards the stern, two high-raised quarter galleries—the balustrades here and there covered with dry, tundry sea-moss—opening out from the unoccupied state-cabin, whose dead lights, for all the mild weather, were hermetically closed and caulked—these tenantless balconies hung over the sea as if it were the grand Venetian canal. But the principal relic of faded grandeur was the ample oval of the shield-like stern-piece, intricately carved with the arms of Castile and Leon,⁶ medal-honed about by groups of mythological or symbolical devices, uppermost and central of which was a dark satyr in a mask, holding his foot on the prostrate neck of a writhing figure, likewise masked.

Whether the ship had a figure-head, or only a plain beak, was not quite certain, owing to canvas wrapped about that part, either to protect it while undergoing a refurbishing, or else decently to hide its decay. Rudely painted or chalked, as in a sailor freak, along the forward side of a sort of pedestal below the canvas, was the sentence, "*Seguid vuestro jefe*," (follow your leader), while upon the tarnished head-boards, near by, appeared, in stately capitals, once gilt, the ship's name, "SAN DOMINICK," each letter streakingly corroded with tricklings of copper-spike rust, while, like mourning weeds, dark festoons of sea-grass shmily swept to and fro over

³ Mexico's chief Pacific port, long a leading port-of-call for Spanish ships plying between South America and the Spanish possessions in the Orient.

⁵ Jean Froissart (1333?-1400?), French chronicler of the age of chivalry in England.

⁶ Ancient kingdoms, later provinces, of Spain.

the name, with every hearse-like roll of the hull

As at last the boat was hooked from the bow along toward the gangway amidship, its keel, while yet some inches separated from the hull, harshly grated as on a sunken coral reef. It proved a huge bunch of conglobated barnacles adhering below the water to the side like a wen, a token of baffling airs and long calms passed somewhere in those seas

Climbing the side, the visitor was at once surrounded by a clamorous throng of whites and blacks, but the latter outnumbering the former more than could have been expected, negro transportation-ship as the stranger in port was. But, in one language, and as with one voice, all poured out a common tale of suffering, in which the negresses, of whom there were not a few, exceeded the others in their dolorous vehemence. The scurvy, together with a fever, had swept off a great part of their number, more especially the Spaniards. Off Cape Horn, they had narrowly escaped shipwreck, then, for days together, they had lain tranced without wind, their provisions were low, their water next to none, their lips that moment were baked

While Captain Delano was thus made the mark of all eager tongues, his one eager glance took in all the faces, with every other object about him

Always upon first boarding a large and populous ship at sea, especially a foreign one, with a nondescript crew such as Lascars or Manila men, the impression varies in a peculiar way from that produced by first entering a strange house with strange inmates in a strange land. Both house and ship, the one by its walls and blinds, the other by its high bulwarks like ramparts, hoard from view their interiors till the last moment, but in the case of the ship there is this addition that the living spectacle it contains, upon its sudden and complete disclosure, has, in contrast with the blank ocean which zones it, something of the effect of enchantment. The ship seems un-

real, these strange costumes, gestures, and faces, but a shadowy tableau just emerged from the deep, which directly must receive back what it gave

Perhaps it was some such influence as above is attempted to be described which, in Captain Delano's mind, heightened whatever, upon a staid scrutiny, might have seemed unusual, especially the conspicuous figures of four elderly grizzled negroes, their heads like black, doddered willow tops, who, in venerable contrast to the tumult below them, were couched sphynx-like, one on the starboard cat-head, another on the larboard, and the remaining pair face to face on the opposite bulwarks above the main-chains. They each had bits of unstranded old junk in their hands, and, with a sort of stoical self-content, were picking the junk into oakum, a small heap of which lay by their sides. They accompanied the task with a continuous, low, monotonous chant, droung and drooling away like so many grey-headed bag-pipers playing a funeral march

The quarter-deck rose into an ample elevated poop, upon the forward verge of which, lifted, like the oakum-pickers, some eight feet above the general throng, sat along in a row, separated by regular spaces, the cross-legged figures of six other blacks, each with a rusty hatchet in his hand, which, with a bit of brick and a rag, he was engaged like a scullion in scouring, while between each two was a small stack of hatchets, their rusted edges turned forward awaiting a like operation. Though occasionally the four oakum-pickers would briefly address some person or persons in the crowd below, yet the six hatchet-polishers neither spoke to others, nor breathed a whisper among themselves, but sat intent upon their task, except at intervals, when, with the peculiar love in negroes of uniting industry with pastime, two-and-two they sideways clashed their hatchets together, like cymbals, with a barbarous din. All six, unlike the generality, had the raw aspect of unsophisticated Africans

But that first comprehensive glance which

took in those ten figures, with scores less conspicuous, rested but an instant upon them, as, impatient of the hubbub of voices, the visitor turned in quest of whomsoever it might be that commanded the ship.

But as if not unwilling to let nature make known her own case among his suffering charge, or else in despair of restraining it for the time, the Spanish captain, a gentlemanly, reserved-looking, and rather young man to a stranger's eye, dressed with singular richness, but bearing plain traces of recent sleepless cares and disquietudes, stood passively by, leaning against the main-mast, at one moment casting a dreary, spiritless look upon his excited people, at the next an unhappy glance toward his visitor. By his side stood a black of small stature, in whose rude face, as occasionally, like a shepherd's dog, he mutely turned it up into the Spaniard's, sorrow and affection were equally blended.

Struggling through the throng, the American advanced to the Spaniard, assuring him of his sympathies, and offering to render whatever assistance might be in his power. To which the Spaniard returned, for the present, but grave and ceremonious acknowledgments, his national formality dusked by the saturnine mood of ill health.

But losing no time in mere compliments, Captain Delano returning to the gangway, had his baskets of fish brought up, and as the wind still continued light, so that some hours at least must elapse ere the ship could be brought to the anchorage, he bade his men return to the sealer, and fetch back as much water as the whale-boat could carry, with whatever soft bread the steward might have, all the remaining pumpkins on board, with a box of sugar, and a dozen of his private bottles of cider.

Not many minutes after the boat's pushing off, to the vexation of all, the wind entirely died away, and the tide turning, began drifting back the ship helplessly seaward. But trusting this would not long last, Captain Delano sought with good hopes to cheer up the strangers, feeling no

small satisfaction that, with persons in their condition he could—thanks to his frequent voyages along the Spanish main—converse with some freedom in their native tongue.

While left alone with them, he was not long in observing some things tending to heighten his first impressions, but surprise was lost in pity, both for the Spaniards and blacks, alike evidently reduced from scarcity of water and provisions, while long-continued suffering seemed to have brought out the less good-natured qualities of the negroes, besides, at the same time, impairing the Spaniard's authority over them. But, under the circumstances, precisely this condition of things was to have been anticipated. In armies, navies, cities, or families—in nature herself—nothing more relaxes good order than misery. Still, Captain Delano was not without the idea, that had Benito Cereno been a man of greater energy, misrule would hardly have come to the present pass. But the debility, constitutional or induced by the hardships, bodily and mental, of the Spanish captain, was too obvious to be overlooked. A prey to settled dejection, as if long mocked with hope he would not now indulge it, even when it had ceased to be a mock, the prospect of that day or evening at furthest, lying at anchor, with plenty of water for his people, and a brother captain to counsel and befriend, seemed in no perceptible degree to encourage him. His mind appeared unstrung, if not still more seriously affected. Shut up in these oaken walls, chained to one dull round of command, whose unconditionality cloyed him, like some hypochondriac abbot he moved slowly about, at times suddenly pausing, starting, or staring, biting his lip, biting his fingernail, flushing, paling, twitching his beard, with other symptoms of an absent or moody mind. This distempered spirit was lodged, as before hinted, in a distempered frame. He was rather tall, but seemed never to have been robust, and now with nervous suffering was almost worn to a skeleton. A tendency to some pulmonary

complaint appeared to have been lately confirmed. His voice was like that of one with lungs half gone, hoarsely suppressed, a husky whisper. No wonder that, as in this state he tottered about, his private servant apprehensively followed him. Sometimes the negro gave his master his arm, or took his handkerchief out of his pocket for him, performing these and similar offices with that affectionate zeal which transmutes into something filial or fraternal acts in themselves but menial, and which has gained for the negro the repute of making the most pleasing body servant in the world, one, too, whom a master need be on no stiffly superior terms with, but may treat with familiar trust, less a servant than a devoted companion.

Marking the noisy indolence of the blacks in general, as well as what seemed the sullen inefficiency of the whites, it was not without humane satisfaction that Captain Delano witnessed the steady good conduct of Babo.

But the good conduct of Babo, hardly more than the ill-behaviour of others, seemed to withdraw the half-lunatic Don Benito from his cloudy languor. Not that such precisely was the impression made by the Spaniard on the mind of his visitor. The Spaniard's individual unrest was, for the present, but noted as a conspicuous feature in the ship's general affliction. Still, Captain Delano was not a little concerned at what he could not help taking for the time to be Don Benito's unfriendly indifference toward himself. The Spaniard's manner, too, conveyed a sort of sour and gloomy disdain, which he seemed at no pains to disguise. But this the American in charity ascribed to the harassing effects of sickness, since, in former instances, he had noted that there are peculiar natures on whom prolonged physical suffering seems to cancel every social instinct of kindness, as if forced to black bread themselves, they deemed it but equity that each person coming nigh them should, indirectly, by some slight or affront, be made to partake of their fare.

But ere long Captain Delano bethought him that, indulgent as he was at the first, in judging the Spaniard, he might not, after all, have exercised charity enough. At bottom it was Don Benito's reserve which displeased him, but the same reserve was shown toward all but his personal attendant. Even the formal reports which, according to sea-usage, were at stated times made to him by some petty underling (either a white, mulatto or black), he hardly had patience enough to listen to, without betraying contemptuous aversion. His manner upon such occasions was, in its degree, not unlike that which might be supposed to have been his imperial countryman's, Charles V.,⁷ just previous to the anchoritic retirement of that monarch from the throne.

This splenetic dislike of his place was evinced in almost every function pertaining to it. Proud as he was moody, he condescended to no personal mandate. Whatever special orders were necessary, their delivery was delegated to his body-servant, who in turn transferred them to their ultimate destination, through runners, alert Spanish boys or slave boys, like pages or pilot-fish within easy call continually hovering round Don Benito. So that to have beheld this undemonstrative invalid gliding about, apathetic and mute, no landsman could have dreamed that in him was lodged a dictatorship beyond which, while at sea, there was no earthly appeal.

Thus, the Spaniard, regarded in his reserve, seemed as the involuntary victim of mental disorder. But, in fact, his reserve might, in some degree, have proceeded from design. If so, then in Don Benito was evinced the unhealthy climax of that icy though conscientious policy, more or less adopted by all commanders of large ships, which, except in signal emergencies, obliterates alike the manifestation of sway with every trace of sociality, transforming the

⁷ Holy Roman emperor and king of Spain as Charles I (1500-58), who retired to a monastery the year before his death.

man into a block, or rather into a loaded cannon, which, until there is call for thunder, has nothing to say

Viewing him in this light, it seemed but a natural token of the perverse habit induced by a long course of such hard self-restraint, that, notwithstanding the present condition of his ship, the Spaniard should still persist in a demeanour, which, however harmless—or it may be, appropriate—in a well-appointed vessel, such as the *San Dominick* might have been at the outset of the voyage, was anything but judicious now. But the Spaniard perhaps thought that it was with captains as with gods reserve, under all events, must still be their cue. But more probably this appearance of slumbering dominion might have been but an attempted disguise to conscious imbecility—not deep policy, but shallow device. But be all this as it might, whether Don Benito's manner was designed or not, the more Captain Delano noted its pervading reserve, the less he felt uneasiness at any particular manifestation of that reserve toward himself.

Neither were his thoughts taken up by the captain alone. Wanted to the quiet orderliness of the sealer's comfortable family of a crew, the noisy confusion of the *San Dominick's* suffering host repeatedly challenged his eye. Some prominent breaches not only of discipline but of decency were observed. These Captain Delano could not but ascribe, in the main, to the absence of those subordinate deck-officers to whom, along with higher duties, is entrusted what may be styled the police department of a populous ship. True, the old oakum-pickers appeared at times to act the part of monitorial constables to their countrymen, the blacks, but though occasionally succeeding in allaying trifling outbreaks now and then between man and man, they could do little or nothing toward establishing general quiet. The *San Dominick* was in the condition of a transatlantic emigrant ship, among whose multitude of living freight are some individuals, doubtless, as little troublesome as crates and

bales, but the friendly remonstrances of such with their ruder companions are of not so much avail as the unfriendly arm of the mate. What the *San Dominick* wanted was, what the emigrant ship has, stern superior officers. But on these decks not so much as a fourth mate was to be seen.

The visitor's curiosity was roused to learn the particulars of those mishaps which had brought about such absenteeism, with its consequences, because, though deriving some inkling of the voyage from the wails which at the first moment had greeted him, yet of the details no clear understanding had been had. The best account would, doubtless, be given by the captain. Yet at first the visitor was loth to ask it, unwilling to provoke some distant rebuff. But plucking up courage, he at last accosted Don Benito, renewing the expression of his benevolent interest, adding, that did he (Captain Delano) but know the particulars of the ship's misfortunes, he would, perhaps, be better able in the end to relieve them. Would Don Benito favour him with the whole story?

Don Benito faltered, then, like some somnambulist suddenly interfered with, vacantly stared at his visitor, and ended by looking down on the deck. He maintained this posture so long, that Captain Delano, almost equally disconcerted, and involuntarily almost as rude, turned suddenly from him, walking forward to accost one of the Spanish seamen for the desired information. But he had hardly gone five paces, when with a sort of eagerness Don Benito invited him back, regretting his momentary absence of mind, and professing readiness to gratify him.

While most part of the story was being given, the two captains stood on the after part of the main-deck, a privileged spot, no one being near but the servant.

"It is now a hundred and ninety days," began the Spaniard, in his husky whisper, "that this ship, well officered and well manned, with several cabin passengers—some fifty Spaniards in all—sailed from

Buenos Ayres bound to Lima, with a general cargo, Paraguay tea and the like—and," pointing forward, "that parcel of negroes, now not more than a hundred and fifty, as you see, but then numbering over three hundred souls Off Cape Horn we had heavy gales In one moment, by night, three of my best officers, with fifteen sailors, were lost, with the main-yard, the spar snapping under them in the slings, as they sought, with heavers, to beat down the icy sail To lighten the hull, the heavier sacks of mata^s were thrown into the sea, with most of the water-pipes lashed on deck at the time And this last necessity it was, combined with the prolonged detentions afterwards experienced, which eventually brought about our chief causes of suffering When—"

Here there was a sudden fainting attack of his cough, brought on, no doubt, by his mental distress His servant sustained him, and drawing a cordial from his pocket placed it to his lips He a little revived But unwilling to leave him unsupported while yet imperfectly restored, the black with one arm still encircled his master, at the same time keeping his eye fixed on his face, as if to watch for the first sign of complete restoration, or relapse, as the event might prove

The Spaniard proceeded, but brokenly and obscurely, as one in a dream.

—"Oh, my God! rather than pass through what I have, with joy I would have hailed the most terrible gales, but—"

His cough returned and with increased violence, this subsiding, with reddened lips and closed eyes he fell heavily against his supporter.

"His mind wanders He was thinking of the plague that followed the gales," plaintively sighed the servant, "my poor, poor master!" wringing one hand, and with the other wiping the mouth "But be patient, Señor," again turning to Captain Delano, "these fits do not last long, master will soon be himself"

Don Benito reviving, went on, but as this portion of the story was very brokenly

delivered, the substance only will here be set down

It appeared that after the ship had been many days tossed in storms off the Cape, the scurvy broke out, carrying off numbers of the whites and blacks When at last they had worked round into the Pacific, their spars and sails were so damaged, and so inadequately handled by the surviving mariners, most of whom were become invalids, that, unable to lay her northerly course by the wind, which was powerful, the unmanageable ship for successive days and nights was blown northwestward, where the breeze suddenly deserted her, in unknown waters, to sultry calms The absence of the water-pipes now proved as fatal to life as before their presence had menaced it Induced, or at least aggravated, by the more than scanty allowance of water, a malignant fever followed the scurvy, with the excessive heat of the lengthened calm, making such short work of it as to sweep away, as by billows, whole families of the Africans, and a yet larger number, proportionably, of the Spaniards, including, by a luckless fatality, every officer on board Consequently, in the smart west winds eventually following the calm, the already rent sails having to be simply dropped, not furled, at need, had been gradually reduced to the beggar's rags they were now To procure substitutes for his lost sailors, as well as supplies of water and sails, the captain at the earliest opportunity had made for Baldivia, the southernmost civilized port of Chili and South America, but upon nearing the coast the thick weather had prevented him from so much as sighting that harbour Since which period, almost without a crew, and almost without canvas and almost without water, and at intervals giving its added dead to the sea, the *San Dominick* had been battle-dored about by contrary winds, inveigled by currents, or grown weedy in calms Like

^s Mate or Paraguay tea, leaves of a South American plant used in preparing a beverage

a man lost in woods, more than once she had doubled upon her own track

"But throughout these calamities," huskily continued Don Benito, painfully turning in the half embrace of his servant, "I have to thank those negroes you see, who, though to your inexperienced eyes appearing unskilfully, have, indeed, conducted themselves with less of restlessness than even their owner could have thought possible under such circumstances"

Here he again fell faintly back. Again his mind wandered but he rallied, and less obscurely proceeded

"Yes, their owner was quite right in assuring me that no fetters would be needed with his blacks, so that while, as is wont in this transportation, those negroes have always remained upon deck—not thrust below, as in the Guineamen^a—they have, also, from the beginning, been freely permitted to range within given bounds at their pleasure"

Once more the faintness returned—his mind roved—but, recovering, he resumed

"But it is Babo here to whom, under God, I owe not only my own preservation, but likewise to him, chiefly, the merit is due, of pacifying his more ignorant brethren, when at intervals tempted to murmurings"

"Ah, master," sighed the black, bowing his face, "don't speak of me, Babo is nothing, what Babo has done was but duty"

"Faithful fellow!" cried Captain Delano "Don Benito, I envy you such a friend, slave I cannot call him"

As master and man stood before him, the black upholding the white, Captain Delano could not but bethink him of the beauty of that relationship which could present such a spectacle of fidelity on the one hand and confidence on the other. The scene was heightened by the contrast in dress, denoting their relative positions. The Spaniard wore a loose Chili jacket of dark velvet, white small clothes and stockings, with silver buckles at the knee and instep, a high-crowned sombrero, of fine grass, a

slender sword, silver mounted, hung from a knot in his sash, the last being an almost invariable adjunct, more for utility than ornament, of a South American gentleman's dress to this hour. Excepting when his occasional nervous contortions brought about disarray, there was a certain precision in his attire, curiously at variance with the unsightly disorder around, especially in the belittered Ghetto, forward of the main-mast, wholly occupied by the blacks

The servant wore nothing but wide trousers, apparently, from their coarseness and patches, made out of some old topsail, they were clean, and confined at the waist by a bit of unstranded rope, which, with his composed, deprecatory air at times, made him look something like a begging friar of St Francis

However unsuitable for the time and place, at least in the blunt-thinking American's eyes, and however strangely surviving in the midst of all his afflictions, the toilette of Don Benito might not, in fashion at least, have gone beyond the style of the day among South Americans of his class. Though on the present voyage sailing from Buenos Ayres, he had avowed himself a native and resident of Chili, whose inhabitants had not so generally adopted the plain coat and once plebeian pantaloons, but, with a becoming modification, adhered to their provincial costume, picturesque as any in the world. Still, relatively to the pale history of the voyage, and his own pale face, there seemed something so incongruous in the Spaniard's apparel, as almost to suggest the image of an invalid courtier tottering about London streets in the time of the plague.

The portion of the narrative which, perhaps, most excited interest, as well as some surprise, considering the latitudes in question, was the long calms spoken of, and more particularly the ship's so long drifting about. Without communicating the opinion,

^a Vessels engaged in the African slave trade

of course, the American could not but impute at least part of the detentions both to clumsy seamanship and faulty navigation. Eyeing Don Benito's small, yellow hands, he easily inferred that the young captain had not got into command at the hawse-hole but the cabin-window, and if so, why wonder at incompetence, in youth, sickness, and aristocracy united? Such was his democratic conclusion.

But drowning criticism in compassion, after a fresh repetition of his sympathies, Captain Delano having heard out his story, not only engaged, as in the first place, to see Don Benito and his people supplied in their immediate bodily needs, but, also, now further promised to assist him in procuring a large permanent supply of water, as well as some sails and rigging, and, though it would involve no small embarrassment to himself, yet he would spare three of his best seamen for temporary deck officers, so that without delay the ship might proceed to Concepción, there fully to refit for Lima, her destined port.

Such generosity was not without its effect, even upon the invalid. His face lighted up, eager and hectic, he met the honest glance of his visitor. With gratitude he seemed overcome.

"This excitement is bad for master," whispered the servant, taking his arm, and with soothing words gently drawing him aside.

When Don Benito returned, the American was pained to observe that his hopefulness, like the sudden kindling in his cheek, was but febrile and transient.

Ere long, with a joyless mien, looking up toward the poop, the host invited his guest to accompany him there, for the benefit of what little breath of wind might be stirring.

As during the telling of the story, Captain Delano had once or twice started at the occasional cymballing of the hatchet-polishers, wondering why such an interruption should be allowed, especially in that part of the ship, and in the ears of

an invalid, and, moreover, as the hatchets had anything but an attractive look, and the handlers of them still less so, it was, therefore, to tell the truth, not without some lurking reluctance, or even shrinking, it may be, that Captain Delano, with apparent complaisance, acquiesced in his host's invitation. The more so, since with an untimely caprice of punctilio, rendered distressing by his cadaverous aspect, Don Benito, with Castilian bows, solemnly insisted upon his guest's preceding him up the ladder leading to the elevation, where, one on each side of the last step, sat four armorial supporters and sentries, two of the ominous file. Gingerly enough stepped good Captain Delano between them, and in the instant of leaving them behind, like one running the gauntlet, he felt an apprehensive twitch in the calves of his legs.

But when, facing about, he saw the whole file, like so many organ-grinders, still stupidly intent on their work, unmindful of everything beside, he could not but smile at his late fidgeting panic.

Presently, while standing with Don Benito, looking forward upon the decks below, he was struck by one of those instances of insubordination previously alluded to. Three black boys, with two Spanish boys, were sitting together on the hatchets, scraping a rude wooden platter, in which some scanty mess had recently been cooked. Suddenly, one of the black boys, enraged at a word dropped by one of his white companions, seized a knife, and though called to forbear by one of the oakum-pickers, struck the lad over the head, inflicting a gash from which blood flowed.

In amazement, Captain Delano inquired what this meant. To which the pale Benito dully muttered, that it was merely the sport of the lad.

"Pretty serious sport, truly," rejoined Captain Delano. "Had such a thing happened on board the *Bachelor's Delight*, instant punishment would have followed."

At these words the Spaniard turned upon the American one of his sudden, staring,

half-lunatic looks, then, relapsing into his torpor, answered, "Doubtless, doubtless, Señor"

Is it, thought Captain Delano, that this helpless man is one of those paper captains I've known, who by policy wink at what by power they cannot put down? I know no sadder sight than a commander who has little of command but the name

"I should think, Don Benito," he now said, glancing toward the oakum-picker who had sought to interfere with the boys, "that you would find it advantageous to keep all your blacks employed, especially the younger ones, no matter at what useless task, and no matter what happens to the ship. Why, even with my little band, I find such a course indispensable. I once kept a crew on my quarter-deck thrumming mats for my cabin, when, for three days, I had given up my ship—mats, men, and all—for a speedy loss, owing to the violence of a gale in which we could do nothing but helplessly drive before it."

"Doubtless, doubtless," muttered Don Benito

"But," continued Captain Delano, again glancing upon the oakum-pickers and then at the hatchet-polishers, near by, "I see you keep some at least of your host employed"

"Yes," was again the vacant response

"Those old men there, shaking their paws from their pulpits," continued Captain Delano, pointing to the oakum-pickers, "seem to act the part of old dominies to the rest, little heeded as their admonitions are at times. Is this voluntary on their part, Don Benito, or have you appointed them shepherds to your flock of black sheep?"

"What posts they fill, I appointed them," rejoined the Spaniard in an acrid tone, as if resenting some supposed satiric reflection

"And these others, these Ashantee conjurers here," continued Captain Delano, rather uneasily eyeing the brandished steel of the hatchet-polishers, where in spots it

had been brought to a shine, "this seems a curious business they are at, Don Benito?"

"In the gales we met," answered the Spaniard, "what of our general cargo was not thrown overboard was much damaged by the breeze. Since coming into calm weather, I have had several cases of knives and hatchets daily brought up for overhauling and cleaning"

"A prudent idea, Don Benito. You are part owner of ship and cargo, I presume, but not of the slaves, perhaps?"

"I am owner of all you see," impatiently returned Don Benito, "except the main company of blacks, who belonged to my late friend, Alexandro Aranda"

As he mentioned this name, his air was heart-broken, his knees shook, his servant supported him

Thinking he divined the cause of such unusual emotion, to confirm his surmise, Captain Delano, after a pause, said, "And may I ask, Don Benito, whether—since awhile ago you spoke of some cabin passengers—the friend, whose loss so afflicts you, at the outset of the voyage accompanied his blacks?"

"Yes"

"But died of the fever?"

"Died of the fever—Oh, could I but—"

Again quivering, the Spaniard paused

"Pardon me," said Captain Delano slowly, "but I think that, by a sympathetic experience, I conjecture, Don Benito, what it is that gives the keener edge to your grief. It was once my hard fortune to lose at sea a dear friend, my own brother, then supercargo. Assured of the welfare of his spirit, its departure I could have borne like a man, but that honest eye, that honest hand—both of which had so often met mine—and that warm heart, all, all—like scraps to the dogs—to throw all to the sharks! It was then I vowed never to have for fellow-voyager a man I loved, unless, unbeknown to him, I had provided every requisite, in case of a fatality, for embalming his mortal part for interment on shore. Were your friend's remains now on

board this ship, Don Benito, not thus strangely would the mention of his name affect you "

"On board this ship?" echoed the Spaniard. Then, with horrified gestures, as directed against some spectre, he unconsciously fell into the ready arms of his attendant, who, with a silent appeal toward Captain Delano, seemed beseeching him not again to broach a theme so unspeakably distressing to his master.

This poor fellow now, thought the pained American, is the victim of that sad superstition which associates goblins with the deserted body of man, as ghosts with an abandoned house. How unlike are we made! What to me, in like case, would have been a solemn satisfaction, the bare suggestion, even, terrifies the Spaniard into this trance. Poor Alexandro Aranda! what would you say could you here see your friend—who, on former voyages, when you for months were left behind, has, I dare say, often longed, and longed, for one peep at you—now transported with terror at the least thought of having you anyway nigh him.

At this moment, with a dreary graveyard toll, betokening a flaw, the ship's fore-castle bell, smote by one of the grizzled oakum-pickers, proclaimed ten o'clock through the leaden calm, when Captain Delano's attention was caught by the moving figure of a gigantic black, emerging from the general crowd below, and slowly advancing toward the elevated poop. An iron collar was about his neck, from which depended a chain, thrice wound round his body, the terminating links padlocked together at a broad band of iron, his girdle.

"How like a mute Atufal moves," murmured the servant.

The black mounted the steps of the poop, and, like a brave prisoner, brought up to receive sentence, stood in unquailing muteness before Don Benito, now recovered from his attack.

At the first glimpse of his approach, Don Benito had started, a resentful shadow swept over his face, and, as with the

sudden memory of bootless rage, his white lips glued together.

This is some mulish mutineer, thought Captain Delano, surveying, not without a mixture of admiration, the colossal form of the negro.

"See, he waits your question, master," said the servant.

Thus reminded, Don Benito, nervously averting his glance, as if shunning, by anticipation, some rebellious response, in a disconcerted voice, thus spoke:

"Atufal, will you ask my pardon now?"

The black was silent.

"Again, master," murmured the servant, with bitter upbraiding eyeing his countryman, "Again, master, he will bend to master yet."

"Answer," said Don Benito, still averting his glance, "say but the one word *pardon*, and your chains shall be off."

Upon this, the black, slowly raising both arms, let them lifelessly fall, his links clanking, his head bowed, as much as to say, "No, I am content."

"Go," said Don Benito, with inkept and unknown emotion.

Deliberately as he had come, the black obeyed.

"Excuse me, Don Benito," said Captain Delano, "but this scene surprises me, what means it, pray?"

"It means that that negro alone, of all the band, has given me peculiar cause of offence. I have put him in chains, I—"

Here he paused, his hand to his head, as if there were a swimming there, or a sudden bewilderment of memory had come over him, but meeting his servant's kindly glance seemed reassured, and proceeded:

"I could not scourge such a form. But I told him he must ask my pardon. As yet he has not. At my command, every two hours he stands before me."

"And how long has this been?"

"Some sixty days."

"And obedient in all else? And respectful?"

"Yes."

"Upon my conscience, then," exclaimed

Captain Delano, impulsively, "he has a royal spirit in him, this fellow."

"He may have some right to it," bitterly returned Don Benito, "he says he was king in his own land."

"Yes," said the servant, entering a word, "those slits in Atufal's ears once held wedges of gold, but poor Babo here, in his own land, was only a poor slave, a black man's slave was Babo, who now is the white's."

Somewhat annoyed by these conversational familiarities, Captain Delano turned curiously upon the attendant, then glanced inquiringly at his master, but, as if long wonted to these little informalities, neither master nor man seemed to understand him.

"What, pray, was Atufal's offence, Don Benito?" asked Captain Delano, "if it was not something very serious, take a fool's advice, and, in view of his general docility, as well as in some natural respect for his spirit, remit his penalty."

"No, no, master never will do that," here murmured the servant to himself, "proud Atufal must first ask master's pardon. The slave there carries the padlock, but master here carries the key."

His attention thus directed, Captain Delano now noticed for the first time that, suspended by a slender silken cord, from Don Benito's neck hung a key. At once, from the servant's muttered syllables divining the key's purpose, he smiled and said, "So, Don Benito—padlock and key—significant symbols, truly."

Biting his lip, Don Benito faltered.

Though the remark of Captain Delano, a man of such native simplicity as to be incapable of satire or irony, had been dropped in playful allusion to the Spaniard's singularly evidenced lordship over the black, yet the hypochondriac seemed in some way to have taken it as a malicious reflection upon his confessed inability thus far to break down, at least, on a verbal summons, the entrenched will of the slave. Deploring this supposed misconception, yet despairing of correcting it, Captain

Delano shifted the subject, but finding his companion more than ever withdrawn, as if still slowly digesting the lees of the presumed affront above-mentioned, by-and-by Captain Delano likewise became less talkative, oppressed, against his own will, by what seemed the secret vindictiveness of the morbidly sensitive Spaniard. But the good sailor himself, of a quite contrary disposition, refrained, on his part, alike from the appearance as from the feeling of resentment, and if silent, was only so from contagion.

Presently the Spaniard, assisted by his servant, somewhat discourteously crossed over from Captain Delano, a procedure which, sensibly enough, might have been allowed to pass for idle caprice of ill-humour, had not master and man, lingering round the corner of the elevated skylight, begun whispering together in low voices. This was displeasing. And more the moody air of the Spaniard, which at times had not been without a sort of valetudinarian stateliness, now seemed anything but dignified, while the menial familiarity of the servant lost its original charm of simple-hearted attachment.

In his embarrassment, the visitor turned his face to the other side of the ship. By so doing, his glance accidentally fell on a young Spanish sailor, a coil of rope in his hand, just stepped from the deck to the first round of the mizzen-rigging. Perhaps the man would not have been particularly noticed, were it not that, during his ascent to one of the yards, he, with a sort of covert intentness, kept his eye fixed on Captain Delano, from whom, presently, it passed, as if by a natural sequence, to the two whisperers.

His own attention thus redirected to that quarter, Captain Delano gave a slight start. From something in Don Benito's manner just then, it seemed as if the visitor had, at least partly, been the subject of the withdrawn consultation going on—a conjecture as little agreeable to the guest as it was little flattering to the host.

The singular alternations of courtesy and

ill-breeding in the Spanish captain were unaccountable, except on one of two suppositions—innocent lunacy, or wicked imposture

But the first idea, though it might naturally have occurred to an indifferent observer, and, in some respects, had not hitherto been wholly a stranger to Captain Delano's mind, yet, now that, in an inappreciable way, he began to regard the stranger's conduct something in the light of an intentional affront, of course the idea of lunacy was virtually vacated. But if not a lunatic, what then? Under the circumstances, would a gentleman, nay, any honest boor, act the part now acted by his host? The man was an impostor. Some lowborn adventurer, masquerading as an oceanic grandee, yet so ignorant of the first requisites of mere gentlemanhood as to be betrayed into the present remarkable indecorum. That strange ceremoniousness, too, at other times evinced, seemed not uncharacteristic of one playing a part above his real level. Benito Cereno—Don Benito Cereno—a sounding name. One, too, at that period, not unknown, in the surname, to supercargoes and sea captains trading along the Spanish Main, as belonging to one of the most enterprising and extensive mercantile families in all those provinces, several members of it having titles, a sort of Castilian Rothschild,¹⁰ with a noble brother, or cousin, in every great trading town of South America. The alleged Don Benito was in early manhood, about twenty-nine or thirty. To assume a sort of roving cadetship in the maritime affairs of such a house, what more likely scheme for a young knave of talent and spirit? But the Spamard was a pale invalid. Never mind. For even to the degree of simulating mortal disease, the craft of some tricksters had been known to attain. To think that, under the aspect of infantile weakness, the most savage energies might be couched—those velvets of the Spamard but the velvet paw to his fangs.

From no train of thought did these fancies come, not from within, but from with-

out, suddenly, too, and in one throng, like hoar frost, yet as soon to vanish as the mild sun of Captain Delano's good-nature regained its meridian.

Glancing over once again toward Don Benito—whose side-face, revealed above the skylight, was now turned toward him—Captain Delano was struck by the profile, whose clearness of cut was refined by the thinness incident to ill-health, as well as ennobled about the chin by the beard. Away with suspicion. He was a true off-shoot of a true *hidalgo*. Cereno.

Relieved by these and other better thoughts, the visitor, lightly humming a tune, now began indifferently pacing the poop, so as not to betray to Don Benito that he had at all mistrusted civility, much less duplicity, for such mistrust would yet be proved illusory, and by the event, though, for the present, the circumstance which had provoked that distrust remained unexplained. But when that little mystery should have been cleared up, Captain Delano thought he might extremely regret it, did he allow Don Benito to become aware that he had indulged in ungenerous surmises. In short, to the Spamard's black-letter text, it was best, for a while, to leave open margin.

Presently, his pale face twitching and overcast, the Spamard, still supported by his attendant, moved over toward his guest, when, with even more than his usual embarrassment, and a strange sort of intriguing intonation in his husky whisper, the following conversation began.

"Señor, may I ask how long you have lain at this isle?"

"Oh, but a day or two, Don Benito."

"And from what port are you last?"

"Canton."

"And there, Señor, you exchanged your seal-skins for teas and silks, I think you said?"

¹⁰ Family of Jewish financiers powerful throughout Europe, founded late in the 18th Century by Meyer A. Rothschild, who trained his five sons as bankers.

"Yes Silks, mostly"

"And the balance you took in specie, perhaps?"

Captain Delano, fidgeting a little, answered—

"Yes, some silver, not a very great deal, though"

"Ah—well May I ask how many men have you on board, Señor?"

Captain Delano slightly started, but answered

"About five-and-twenty, all told"

"And at present, Señor, all on board, I suppose?"

"All on board, Don Benito," replied the captain now with satisfaction

"And will be to-night, Señor?"

At this last question, following so many pertinacious ones, for the soul of him Captain Delano could not but look very earnestly at the questioner, who, instead of meeting the glance, with every token of craven discomposure dropped his eyes to the deck, presenting an unworthy contrast to his servant, who, just then, was kneeling at his feet adjusting a loose shoe-buckle, his disengaged face meantime, with humble curiosity, turned openly up into his master's downcast one

The Spaniard, still with a guilty shuffle, repeated his question

"And—and will be to-night, Señor?"

"Yes, for aught I know," returned Captain Delano,—“but nay,” rallying himself into fearless truth, “some of them talked of going off on another fishing party about midnight”

"Your ships generally go—go more or less armed; I believe, Señor?"

"Oh, a six-pounder or two, in case of emergency," was the intrepidly indifferent reply, "with a small stock of muskets, sealing-spears, and cutlasses, you know"

As he thus responded, Captain Delano again glanced at Don Benito, but the latter's eyes were averted, while abruptly and awkwardly shifting the subject, he made some peevish allusion to the calm, and then, without apology, once more, with his attendant withdrew to the opposite

bulwarks, where the whispering was resumed

At this moment, and ere Captain Delano could cast a cool thought upon what had just passed, the young Spanish sailor before mentioned was seen descending from the rigging. In act of stooping over to spring inboard to the deck, his voluminous, unconfined frock, or shirt, of coarse woollen, much spotted with tar, opened out far down the chest, revealing a soiled under-garment of what seemed the finest linen, edged, about the neck, with a narrow blue ribbon, sadly faded and worn. At this moment the young sailor's eye was again fixed on the whisperers, and Captain Delano thought he observed a lurking significance in it, as if silent signs of some freemason sort had that instant been interchanged

This once more impelled his own glance in the direction of Don Benito, and, as before, he could not but infer that himself formed the subject of the conference. He paused. The sound of the hatchet-polishing fell on his ears. He cast another swift side-look at the two. They had the air of conspirators. In connection with the late questionings, and the incident of the young sailor, these things now begat such return of involuntary suspicion, that the singular guilelessness of the American could not endure it. Plucking up a gay and humorous expression, he crossed over to the two rapidly, saying "Ha, Don Benito, your black here seems high in your trust, a sort of privy-counsellor, in fact"

Upon this, the servant looked up with a good-natured grin, but the master started as from a venomous bite. It was a moment or two before the Spaniard sufficiently recovered himself to reply, which he did, at last, with cold constraint "Yes, Señor, I have trust in Babo"

Here Babo, changing his previous grin of mere animal humour into an intelligent smile, not ungratefully eyed his master

Finding that the Spaniard now stood silent and reserved, as if involuntarily, or purposely giving hint that his guest's proximity was inconvenient just then, Captain

Delano, unwilling to appear uncivil even to civility itself, made some trivial remark and moved off, again and again turning over in his mind the mysterious demeanour of Don Benito Cereno.

He had descended from the poop, and, wrapped in thought, was passing near a dark hatchway, leading down into the steerage, when, perceiving motion there, he looked to see what moved. The same instant there was a sparkle in the shadowy hatchway, and he saw one of the Spanish sailors, prowling there, hurriedly placing his hand in the bosom of his flock, as if hiding something. Before the man could have been certain who it was that was passing, he slunk below out of sight. But enough was seen of him to make it sure that he was the same young sailor before noticed in the rigging.

What was that which so sparkled? thought Captain Delano. It was no lamp—no match—no live coal. Could it have been a jewel? But how come sailors with jewels?—or with silk-trimmed under-shirts either? Has he been robbing the trunks of the dead cabin passengers? But if so, he would hardly wear one of the stolen articles on board ship here. Ah,—if now that was, indeed, a secret sign I saw passing between this suspicious fellow and his captain awhile since, if I could only be certain that in my uneasiness my senses did not deceive me, then—

Here, passing from one suspicious thing to another, his mind revolved the point of the strange questions put to him concerning his ship.

By a curious coincidence, as each point was recalled, the black wizards of Ashantee would strike up with their hatchets, as in ominous comment on the white stranger's thoughts. Pressed by such enigmas and portents, it would have been almost against nature, had not, even into the least distrustful heart, some ugly misgivings intruded.

Observing the ship now helplessly fallen into a current, with enchanted sails,

drifting with increased rapidity seaward, and noting that, from a lately intercepted projection of the land, the sealer was hidden, the stout mariner began to quake at thoughts which he barely durst confess to himself. Above all, he began to feel a ghostly dread of Don Benito. And yet when he roused himself, dilated his chest, felt himself strong on his legs, and coolly considered it—what did all these phantoms amount to?

Had the Spaniard any sinister scheme, it must have reference not so much to him (Captain Delano) as to his ship (the *Bachelor's Delight*). Hence the present drifting away of the one ship from the other, instead of favouring any such possible scheme, was, for the time at least, opposed to it. Clearly any suspicion, combining such contradictions, must need be delusive. Beside, was it not absurd to think of a vessel in distress—a vessel by sickness almost dismanned of her crew—a vessel whose inmates were parched for water—was it not a thousand times absurd that such a craft should, at present, be of a piratical character, or her commander, either for himself or those under him, cherish any desire but for speedy relief and refreshment? But then, might not general distress, and thirst in particular, be affected? And might not that same undiminished Spanish crew, alleged to have perished off to a remnant, be at that very moment lurking in the hold? On heart-broken pretence of entreating a cup of cold water, fiends in human form had got into lonely dwellings, nor retired until a dark deed had been done. And among the Malay pirates, it was no unusual thing to lure ships after them into their treacherous harbours, or entice boarders from a declared enemy at sea, by the spectacle of thinly manned or vacant decks, beneath which prowled a hundred spears with yellow arms ready to upthrust them through the mats. Not that Captain Delano had entirely credited such things. He had heard of them—and now, as stories, they recurred. The

present destination of the ship was the anchorage. There she would be near his own vessel. Upon gaining that vicinity, might not the *San Dominick*, like a slumbering volcano, suddenly let loose energies now hid?

He recalled the Spaniard's manner while telling his story. There was a gloomy hesitancy and subterfuge about it. It was just the manner of one making up his tale for evil purposes, as he goes. But if that story was not true, what was the truth? That the ship had unlawfully come into the Spaniard's possession? But in many of its details, especially in reference to the more calamitous parts, such as the fatalities among the seamen, the consequent prolonged beating about, the past sufferings from obstinate calms, and still continued suffering from thirst, in all these points, as well as others, Don Benito's story had corroborated not only the wailing ejaculations of the indiscriminate multitude, white and black, but likewise—what seemed impossible to be counterfeit—by the very expression and play of every human feature, which Captain Delano saw. If Don Benito's story was throughout an invention, then every soul on board, down to the youngest negress, was his carefully drilled recruit in the plot—an incredible inference. And yet, if there was ground for mistrusting the Spanish captain's veracity, that inference was a legitimate one.

In short, scarce an uneasiness entered the honest sailor's mind but, by a subsequent spontaneous act of good sense, it was ejected. At last he began to laugh at these forebodings, and laugh at the strange ship for, in its aspect, somehow siding with them, as it were, and laugh, too, at the odd-looking blacks, particularly those old scissois-grinders, the Ashantees, and those bed-ridden old knitting-women, the oakum-pickers, and, in a human way, he almost began to laugh at the dark Spaniard himself, the central hobgoblin of all.

For the rest, whatever in a serious way seemed enigmatical, was now good-natured-

ly explained away by the thought that, for the most part, the poor invalid scarcely knew what he was about, either sulking in black vapours, or putting random questions without sense or object. Evidently, for the present, the man was not fit to be entrusted with the ship. On some benevolent plea withdrawing the command from him, Captain Delano would yet have to send her to Concepción in charge of his second mate, a worthy person and good navigator—a plan which would prove no wiser for the *San Dominick* than for Don Benito, for—relieved from all anxiety, keeping wholly to his cabin—the sick man, under the good nursing of his servant, would probably, by the end of the passage, be in a measure restored to health and with that he should also be restored to authority.

Such were the American's thoughts. They were tranquilizing. There was a difference between the idea of Don Benito's darkly pre-ordaining Captain Delano's fate, and Captain Delano's lightly arranging Don Benito's. Nevertheless, it was not without something of relief that the good seaman presently perceived his whale-boat in the distance. Its absence had been prolonged by unexpected detention at the sealer's side, as well as its returning trip lengthened by the continual recession of the goal.

The advancing speck was observed by the blacks. Their shouts attracted the attention of Don Benito, who, with a return of courtesy, approaching Captain Delano, expressed satisfaction at the coming of some supplies, slight and temporary as they must necessarily prove.

Captain Delano responded, but while doing so, his attention was drawn to something passing on the deck below among the crowd climbing the landward bulwarks, anxiously watching the coming boat, two blacks, to all appearances accidentally incommoded by one of the sailors, flew out against him with horrible curses, which the sailor somehow resenting, the two blacks dashed him to the deck and jumped upon

him, despite the earnest cries of the oakum-pickers

"Don Benito," said Captain Delano quickly, "do you see what is going on there? Look!"

But, seized by his cough, the Spaniard staggered, with both hands to his face, on the point of falling. Captain Delano would have supported him, but the servant was more alert, who, with one hand sustaining his master, with the other applied the cordial. Don Benito restored, the black withdrew his support, slipping aside a little, but dutifully remaining within call of a whisper. Such discretion was here evinced as quite wiped away, in the visitor's eyes, any blemish of impropriety which might have attached to the attendant, from the indecorous conferences before mentioned, showing, too, that if the servant were to blame, it might be more the master's fault than his own, since when left to himself he could conduct thus well.

His glance thus called away from the spectacle of disorder to the more pleasing one before him, Captain Delano could not avoid again congratulating Don Benito upon possessing such a servant, who, though perhaps a little too forward now and then, must upon the whole be invaluable to one in the invalid's situation.

"Tell me, Don Benito," he added, with a smile—"I should like to have your man here myself—what will you take for him? Would fifty doubloons be any object?"

"Master wouldn't part with Babo for a thousand doubloons," murmured the black, overhearing the offer, and taking it in earnest, and, with the strange vanity of a faithful slave appreciated by his master, scorning to hear so paltry a valuation put upon him by a stranger. But Don Benito, apparently hardly yet completely restored, and again interrupted by his cough, made but some broken reply.

Soon his physical distress became so great, affecting his mind, too, apparently, that, as if to screen the sad spectacle, the servant gently conducted his master below.

Left to himself, the American, to while

away the time till his boat should arrive, would have pleasantly accosted some one of the few Spanish seamen he saw, but recalling something that Don Benito had said touching their ill conduct, he refrained, as a ship-master indisposed to countenance cowardice or unfaithfulness in seamen.

While, with these thoughts, standing with eye directed forward toward that handful of sailors—suddenly he thought that some of them returned the glance and with a sort of meaning. He rubbed his eyes, and looked again, but again seemed to see the same thing. Under a new form, but more obscure than any previous one, the old suspicions recurred, but, in the absence of Don Benito, with less of panic than before. Despite the bad account given of the sailors, Captain Delano resolved forthwith to accost one of them. Descending the poop, he made his way through the blacks, his movement drawing a queer cry from the oakum-pickers, prompted by whom the negroes, twitching each other aside, divided before him, but, as if curious to see what was the object of this deliberate visit to their Ghetto, closing in behind, in tolerable order, followed the white stranger up. His progress thus proclaimed as by mounted kings-at-arms, and escorted as by a Caffre¹¹ guard of honour, Captain Delano, assuming a good-humoured, off-hand air, continued to advance, now and then saying a blithe word to the negroes, and his eye curiously surveying the white faces, here and there sparsely mixed in with the blacks, like stray white pawns venturously involved in the ranks of the chessmen opposed.

While thinking which of them to select for his purpose, he chanced to observe a sailor seated on the deck engaged in tarring the strap of a large block, with a circle of blacks squatted round him inquisitively eying the process.

The mean employment of the man was in contrast with something superior in his

¹¹ South African tribe of the Bantu family, notable for fine physiques and warlike qualities, commonly spelled Kaffir.

figure His hand, black with continually thrusting it into the tar-pot held for him by a negro, seemed not naturally allied to his face, a face which would have been a very fine one but for its haggardness Whether this haggardness had aught to do with criminality, could not be determined, since, as intense heat and cold, though unlike, produce like sensations, so innocence and guilt, when, through casual association with mental pain, stamping any visible impress, use one seal—a hacked one

Not again that this reflection occurred to Captain Delano at the time, charitable man as he was Rather another idea Because observing so singular a haggardness to be combined with a dark eye, averted as in trouble and shame, and then, however illogically, uniting in his mind his own private suspicions of the crew with the confessed ill-opinion on the part of their captain, he was insensibly operated upon by certain general notions, which, while disconnecting pain and abashment from virtue, as invariably link them with vice

If, indeed, there be any wickedness on board this ship, thought Captain Delano, be sure that man there has fouled his hand in it, even as now he fouls it in the pitch I don't like to accost him I will speak to this other, this old Jack here on the windlass

He advanced to an old Barcelona tar, in ragged red breeches and dirty night-cap, cheeks trenched and bronzed, whiskers dense as thorn hedges Seated between two sleepy-looking Africans, this mariner, like his younger shipmate, was employed upon some rigging—splicing a cable—the sleepy-looking blacks performing the inferior function of holding the outer parts of the ropes for him

Upon Captain Delano's approach, the man at once hung his head below its previous level, the one necessary for business It appeared as if he desired to be thought absorbed, with more than common fidelity, in his task Being addressed, he glanced up, but with what seemed a furtive, diffident

air, which sat strangely enough on his weather-beaten visage, much as if a grizzly bear, instead of growling and biting, should simper and cast sheep's eyes He was asked several questions concerning the voyage—questions purposely referring to several particulars in Don Benito's narrative—not previously corroborated by those impulsive cries greeting the visitor on first coming on board The questions were briefly answered, confirming all that remained to be confirmed of the story The negroes about the windlass joined in with the old sailor, but, as they became talkative, he by degrees became mute, and at length quite glum, seemed morosely unwilling to answer more questions, and yet, all the while, this ursine air was somehow mixed with his sheepish one

Despairing of getting into unembarrassed talk with such a centaur, Captain Delano, after glancing round for a more promising countenance, but seeing none, spoke pleasantly to the blacks to make way for him, and so, amid various grins and grimaces, returned to the poop, feeling a little strange at first, he could hardly tell why, but upon the whole with regained confidence in Benito Cereno

How plainly, thought he, did that old whiskerando¹² yonder betray a consciousness of ill-desert No doubt, when he saw me coming, he dreaded lest I, apprised by his captain of the crew's general misbehaviour, came with sharp words for him, and so down with his head And yet—and yet, now that I think of it, that very old fellow, if I err not, was one of those who seemed so earnestly eyeing me here awhile since Ah, these currents spin one's head round almost as much as they do the ship Ha, there now's a pleasant sort of sunny sight, quite sociable, too

His attention had been drawn to a slumbering negress, partly disclosed through the lace-work of some rigging, lying, with youthful limbs carelessly disposed, under

¹² A heavily whiskered man—from the character Whiskerandos in Sheridan's play, *The Critic*

the lee of the bulwarks, like a doe in the shade of a woodland rock. Sprawling at her lapped breasts was her wide-awake fawn, stark naked, its black little body half lifted from the deck, crosswise with its dam's, its hands, like two paws, clambering upon her, its mouth and nose ineffectually rooting to get at the mark, and meantime giving a vexatious half-grunt, blending with the composed snore of the negress.

The uncommon vigour of the child at length roused the mother. She started up, at distance facing Captain Delano. But, as if not at all concerned at the attitude in which she had been caught, delightedly she caught the child up, with maternal transports, covering it with kisses.

There's naked nature, now, pure tenderness and love, thought Captain Delano, well pleased.

This incident prompted him to remark the other negresses more particularly than before. He was gratified with their manners, like most uncivilized women, they seemed at once tender of heart and tough of constitution, equally ready to die for their infants or fight for them. Unsophisticated as leopardestresses, loving as doves. Ah! thought Captain Delano, these perhaps are some of the very women whom Mungo Park¹⁴ saw in Africa, and gave such a noble account of.

These natural sights somehow insensibly deepened his confidence and ease. At last he looked to see how his boat was getting on, but it was still pretty remote. He turned to see if Don Benito had returned, but he had not.

To change the scene, as well as to please himself with a leisurely observation of the coming boat, stepping over into the mizzen-chains he clambered his way into the starboard quarter-gallery, one of those abandoned Venetian-looking water-balconies previously mentioned, retreats cut off from the deck. As his foot pressed the half-damp, half-dry sea-mosses matting the place, and a chance phantom cats-paw—an islet of breeze, unheralded, unfollowed—as this ghostly cats-paw came fanning his

cheek, as his glance fell upon the row of small, round dead-lights, all closed like coppered eyes of the cofined, and the state-cabin door, once connecting with the gallery, even as the dead-lights had once looked out upon it, but now caulked fast like a sarcophagus lid, to a purple-black, tanned-over panel, threshold, and post, and he bethought him of the time, when that state-cabin and this state-balcony had heard the voices of the Spanish king's officers, and the forms of the Lama viceroy's daughters had perhaps leaned where he stood—as these and other images flitted through his mind, as the cats-paw through the calm, gradually he felt rising a dreamy inquietude, like that of one who alone on the prairie feels unrest from the repose of the noon.

He leaned against the carved balustrade, again looking off toward his boat, but found his eye falling upon the ribboned grass, trailing along the ship's water-line, straight as a border of green box, and parterres of sea-weed, broad ovals and crescents, floating nigh and far, with what seemed long formal alleys between, crossing the terraces of swells, and sweeping round as if leading to the grottoes below. And overhanging all was the balustrade by his arm, which, partly stained with pitch and partly embossed with moss, seemed the charred ruin of some summer-house in a grand garden long running to waste.

Trying to break one charm, he was but becharmed anew. Though upon the wide sea, he seemed in some far inland country, prisoner in some deserted château, left to stare at empty grounds, and peer out at vague roads, where never wagon or way-farer passed.

But these enchantments were a little disenchanted as his eye fell on the corroded man-chains. Of an ancient style, massy and rusty in link, shackle and bolt, they seemed even more fit for the ship's present business than the one for which probably she had been built.

¹⁴ Scottish explorer of Africa (1771-1806)

Presently he thought something moved nigh the chains. He rubbed his eyes, and looked hard. Groves of rigging were about the chains, and there, peering from behind a great stay, like an Indian from behind a hemlock, a Spanish sailor, a marlingspike in his hand, was seen, who made what seemed an imperfect gesture toward the balcony—but immediately, as if alarmed by some advancing step along the deck within, vanished into the recesses of the hempen forest, like a poacher.

What meant this? Something the man had sought to communicate, unbeknown to any one, even to his captain. Did the secret involve aught unfavourable to his captain? Were those previous misgivings of Captain Delano's about to be verified? Or, in his haunted mood at the moment, had some random, unintentional motion of the man, while busy with the stay, as if repairing it, been mistaken for a significant beckoning?

Not unbewildered, again he gazed off for his boat. But it was temporarily hidden by a rocky spur of the isle. As with some eagerness he bent forward, watching for the first shooting view of its beak, the balustrade gave way before him like charcoal. Had he not clutched an outreaching rope he would have fallen into the sea. The crash, though feeble, and the fall, though hollow, of the rotten fragments, must have been overheard. He glanced up. With sober curiosity peering down upon him was one of the old oakum-pickers, slipped from his perch to an outside boom, while below the old negro—and, invisible to him, reconnoitring from a port-hole like a fox from the mouth of its den—crouched the Spanish sailor again. From something suddenly suggested by the man's air, the mad idea now darted into Captain Delano's mind; that Don Benito's plea of indisposition, in withdrawing below, was but a pretence that he was engaged there maturing some plot, of which the sailor, by some means gaining an inkling, had a mind to warn the stranger against, incited, it may be, by gratitude for a kind word on first boarding

the ship. Was it from foreseeing some possible interference like this, that Don Benito had, beforehand, given such a bad character of his sailors, while praising the negroes, though, indeed, the former seemed as docile as the latter the contrary? The whites, too, by nature, were the shrewder race. A man with some evil design, would not he be likely to speak well of that stupidity which was blind to his depravity, and malign that intelligence from which it might not be hidden? Not unlikely, perhaps. But if the whites had dark secrets concerning Don Benito, could then Don Benito be any way in complicity with the blacks? But they were too stupid. Besides, who ever heard of a white so far a renegade as to apostatize from his very species almost, by leaguering in against it with negroes? These difficulties recalled former ones. Lost in their mazes, Captain Delano, who had now regained the deck, was uneasily advancing along it, when he observed a new face—an aged sailor seated cross-legged near the main hatchway. His skin was shrunk up with wrinkles like a pelican's empty pouch, his hair frosted, his countenance grave and composed. His hands were full of ropes, which he was working into a large knot. Some blacks were about him obligingly dipping the strands for him, here and there, as the exigencies of the operation demanded.

Captain Delano crossed over to him, and stood in silence surveying the knot, his mind, by a not uncongenial transition, passing from its own entanglements to those of the hemp. For intricacy such a knot he had never seen in an American ship, or indeed any other. The old man looked like an Egyptian priest, making gordian knots for the temple of Ammon. The knot seemed a combination of double-bowline-knot, treble-crown-knot, back-handed-well-knot, knot-in-and-out-knot, and jamming-knot.

At last, puzzled to comprehend the meaning of such a knot, Captain Delano, addressed the knotter—

"What are you knotting there, my man?"

"The knot," was the brief reply, without looking up

"So it seems, but what is it for?"

"For some one else to undo," muttered back the old man, plying his fingers harder than ever, the knot being now nearly completed

While Captain Delano stood watching him, suddenly the old man threw the knot toward him, and said in broken English, —the first heard in the ship,—something to this effect—"Undo it, cut it, quick" It was said lowly, but with such condensation of rapidity, that the long, slow words in Spanish, which had preceded and followed, almost operated as covers to the brief English between

For a moment, knot in hand, and knot in head, Captain Delano stood mute, while, without further heeding him, the old man was now intent upon other ropes Presently there was a slight stir behind Captain Delano Turning, he saw the chained negro, Atufal, standing quietly there The next moment the old sailor rose, muttering, and, followed by his subordinate negroes, removed to the forward part of the ship, where in the crowd he disappeared

An elderly negro, in a clout like an infant's, and with a pepper and salt head, and a kind of attorney air, now approached Captain Delano In tolerable Spanish, and with a good-natured, knowing wink, he informed him that the old knotter was simple-witted, but harmless, often playing his old tricks The negro concluded by begging the knot, for of course the stranger would not care to be troubled with it Unconsciously, it was handed to him With a sort of congé, the negro received it, and turning his back ferreted into it like a detective Custom House officer after smuggled laces Soon, with some African word, equivalent to pshaw, he tossed the knot overboard

All this is very queer now, thought Captain Delano, with a qualmish sort of emotion; but as one feeling incipient seasickness, he strove, by ignoring the symptoms, to get rid of the malady Once more he

looked off for his boat To his delight, it was now again in view, leaving the rocky spur astern

The sensation here experienced, after at first relieving his uneasiness, with unforeseen efficiency, soon began to remove it The less distant sight of that well-known boat—showing it, not as before, half blended with the haze, but with outline defined, so that its individuality, like a man's, was manifest, that boat, *Rover* by name, which, though now in strange seas, had often pressed the beach of Captain Delano's home, and, brought to its threshold for repairs, had familiarly lain there, as a Newfoundland dog, the sight of that household boat evoked a thousand trustful associations, which, contrasted with previous suspicions, filled him not only with light-some confidence, but somehow with half humorous self-reproaches at his former lack of it

"What, I, Amasa Delano—Jack of the Beach, as they called me when a lad—I, Amasa, the same that, duck-satchel in hand, used to paddle along the waterside to the schoolhouse made from the old hulk,—I, little Jack of the Beach, that used to go berrying with cousin Nat and the rest, I to be murdered here at the ends of the earth, on board a haunted pirate-ship by a horrible Spaniard?—Too nonsensical to think of! Who would murder Amasa Delano? His conscience is clean There is some one above Fie, fie, Jack of the Beach! you are a child indeed, a child of the second childhood, old boy, you are beginning to dote and drule, I'm afraid"

Light of heart and foot, he stepped aft, and there was met by Don Benito's servant, who, with a pleasing expression, responsive to his own present feelings, informed him that his master had recovered from the effects of his coughing fit, and had just ordered him to go present his compliments to his good guest, Don Amasa, and say that he (Don Benito) would soon have the happiness to rejoin him

There now, do you mark that? again thought Captain Delano, walking the poop

What a donkey I was This kind gentleman who here sends me his kind compliments, he, but ten minutes ago, dark-lantern in hand, was dodging round some old grind-stone in the hold, sharpening a hatchet for me, I thought Well, well, these long calms have a morbid effect on the mind, I've often heard, though I never believed it before Ha! glancing toward the boat, there's *Rover*, a good dog, a white bone in her mouth A pretty big bone though, seems to me—What? Yes, she has fallen afoul of the bubbling tide-rip there It sets her the other way, too, for the time Patience

It was now about noon, though, from the grievousness of everything, it seemed to be getting toward dusk

The calm was confirmed In the far distance, away from the influence of land, the leaden ocean seemed laid out and leaded up, its course finished, soul gone, defunct But the current from landward, where the ship was, increased, silently sweeping her further and further toward the fringed waters beyond

Still, from his knowledge of those latitudes, cherishing hopes of a breeze, and a fan and fresh one, at any moment, Captain Delano, despite present prospects, buoyantly counted upon bringing the *San Dominick* safely to anchor ere night The distance swept over was nothing, since, with a good wind, ten minutes' sailing would retrace more than sixty minutes' drifting Meantime, one moment turning to mark *Rover* fighting the tide-rip, and the next to see Don Benito approaching, he continued walking the poop

Gradually he felt a vexation arising from the delay of his boat, this soon merged into uneasiness, and at last, his eye falling continually, as from a stage-box into the pit, upon the strange crowd before and below him, and by-and-by recognizing there the face—now composed to indifference—of the Spanish sailor who had seemed to beckon from the main chains, something of his old trepidations returned

Ah, thought he—gravely enough—this is like the ague because it went off, it follows not that it won't come back

Though ashamed of the relapse, he could not altogether subdue it, and so, exerting his good nature to the utmost, insensibly he came to a compromise

Yes, this is a strange craft, a strange history, too, and strange folks on board But—nothing more

By way of keeping his mind out of mischief till the boat should arrive, he tried to occupy it with turning over and over, in a purely speculative sort of way, some lesser peculiarities of the captain and crew Among others, four curious points recurred

First, the affair of the Spanish lad assailed with a knife by the slave boy, an act winked at by Don Benito Second, the tyranny in Don Benito's treatment of Atufal, the black, as if a child should lead a bull of the Nile by the ring in his nose Third, the trampling of the sailor by the two negroes, a piece of insolence passed over without so much as a reprimand Fourth, the cringing submission to their master of all the ship's underlings, mostly blacks, as if by the least inadvertance they feared to draw down his despotic displeasure

Coupling these points, they seemed somewhat contradictory But what then, thought Captain Delano, glancing toward his now nearing boat,—what then? Why, this Don Benito is a very capricious commander But he is not the first of the sort I have seen, though it's true he rather exceeds any other But as a nation—continued he in his reveries—these Spaniards are all an odd set, the very word Spaniard has a curious, conspirator, Guy-Fawkish ¹⁴ twang to it And yet, I dare say, Spaniards in the main are as good folks as any in Duxbury, Massachusetts Ah, good! At last "Rover" has come

As, with its welcome freight, the boat

¹⁴ Guy Fawkes (1570-1606) conspired to blow up the Houses of Parliament (1605)

touched the side, the oakum-pickers, with venerable gestures, sought to restrain the blacks, who, at the sight of three gurnied¹⁵ water-casks in its bottom, and a pile of wilted pumpkins in its bow, hung over the bulwarks in disorderly raptures

Don Benito with his servant now appeared, his coming, perhaps, hastened by hearing the noise. Of him Captain Delano sought permission to serve out the water, so that all might share alike, and none injure themselves by unfair excess. But sensible, and, on Don Benito's account, kind as this offer was, it was received with what seemed impatience, as if aware that he lacked energy as a commander, Don Benito, with the true jealousy of weakness, resented as an affront any interference. So, at least, Captain Delano inferred.

In another moment the casks were being hoisted in, when some of the eager negroes accidentally jostled Captain Delano, where he stood by the gangway, so that, unmindful of Don Benito, yielding to the impulse of the moment, with good-natured authority he bade the blacks stand back, to enforce his words making use of a half-mightful, half-menacing gesture. Instantly the blacks paused, just where they were, each negro and negress suspended in his or her posture, exactly as the word had found them—for a few seconds continuing so—while, as between the responsive posts of a telegraph, an unknown syllable ran from man to man among the perched oakum-pickers. While Captain Delano's attention was fixed by this scene, suddenly the hatchet-polishers half rose, and a rapid cry came from Don Benito.

Thinking that at the signal of the Spaniard he was about to be massacred, Captain Delano would have sprung for his boat, but paused, as the oakum-pickers, dropping down into the crowd with earnest exclamations, forced every white and every negro back, at the same moment, with gestures friendly and familiar, almost jocose, bidding him, in substance, not be a fool. Simultaneously the hatchet-polishers

resumed their seats, quietly as so many tailors, and at once, as if nothing had happened, the work of hoisting in the casks was resumed, whites and blacks singing at the tackle.

Captain Delano glanced toward Don Benito. As he saw his meagre form in the act of recovering itself from reclining in the servant's arms, into which the agitated invalid had fallen, he could not but marvel at the panic by which himself had been surprised on the darting supposition that such a commander, who upon a legitimate occasion, so trivial, too, as it now appeared, could lose all self-command, was, with energetic inquiry, going to bring about his murder.

The casks being on deck, Captain Delano was handed a number of jars and cups by one of the steward's aides, who, in the name of Don Benito, entreated him to do as he had proposed: dole out the water. He complied, with republican impartiality as to this republican element, which always seeks one level, serving the oldest white no better than the youngest black, excepting, indeed, poor Don Benito, whose condition, if not rank, demanded an extra allowance. To him, in the first place, Captain Delano presented a fair pitcher of the fluid, but, thirsting as he was for fresh water, Don Benito quaffed not a drop until after several grave bows and salutes—a reciprocation of courtesies which the sight-loving Africans hailed with clapping of hands.

Two of the less wilted pumpkins being reserved for the cabin table, the residue were minced up on the spot for the general regalement. But the soft bread, sugar, and bottled cider, Captain Delano would have given the Spaniards alone, and in chief Don Benito, but the latter objected, which disinterestedness, on his part, not a little pleased the American, and so mouthfuls all around were given alike to whites and blacks, excepting one bottle of cider, which

¹⁵ Soiled with the offal of fish or other animals.

Babo insisted upon setting aside for his master

Here it may be observed that as, on the first visit of the boat, the American had not permitted his men to board the ship, neither did he now, being unwilling to add to the confusion of the decks

Not uninfluenced by the peculiar good humour at present prevailing, and for the time oblivious of any but benevolent thoughts, Captain Delano, who from recent indications counted upon a breeze within an hour or two at furthest, despatched the boat back to the sealer with orders for all the hands that could be spared immediately to set about rafting casks to the watering-place and filling them Likewise he bade word be carried to his chief officer, that if against present expectation the ship was not brought to anchor by sunset, he need be under no concern, for as there was to be a full moon that night, he (Captain Delano) would remain on board ready to play the pilot, should the wind come soon or late

As the two captains stood together, observing the departing boat—the servant as it happened having just spied a spot on his master's velvet sleeve, and silently engaged rubbing it out—the American expressed his regrets that the *San Dominick* had no boats, none, at least, but the unseaworthy old hulk of the long-boat, which, warped as a camel's skeleton in the desert, and almost as bleached, lay pot-wise inverted amidships, one side a little tipped, furnishing a subterraneous sort of den for family groups of the blacks, mostly women and small children, who, squatting on old mats below, or perched above in the dark dome, on the elevated seats, were descried, some distance within, like a social circle of bats, sheltering in some friendly cave, at intervals, ebon flights of naked boys and girls, three or four years old, darting in and out of the den's mouth

"Had you three or four boats now, Don Benito," said Captain Delano, "I think that, by tugging at the oars, your negroes here might help along matters some—Did

you sail from port without boats, Don Benito?"

"They were stove in the gales, Señor"

"That was bad Many men, too, you lost then Boats and men—Those must have been hard gales, Don Benito"

"Past all speech," cringed the Spaniard

"Tell me, Don Benito," continued his companion with increased interest, "tell me, were these gales immediately off the pitch of Cape Horn?"

"Cape Horn?—who spoke of Cape Horn?"

"Yourself did, when giving me an account of your voyage," answered Captain Delano with almost equal astonishment at this eating of his own words, even as he ever seemed eating his own heart, on the part of the Spaniard "You yourself, Don Benito, spoke of Cape Horn," he emphatically repeated

The Spaniard turned, in a sort of stooping posture, pausing an instant, as one about to make a plunging exchange of elements, as from air to water

At this moment a messenger-boy, a white, hurried by, in the regular performance of his function carrying the last expired half-hour forward to the forecabin, from the cabin time-piece, to have it struck at the ship's large bell

"Master," said the servant, discontinuing his work on the coat sleeve, and addressing the rapt Spaniard with a sort of timid apprehensiveness, as one charged with a duty, the discharge of which, it was foreseen, would prove irksome to the very person who had imposed it, and for whose benefit it was intended, "master told me never mind where he was, or how engaged, always to remind him, to a minute, when shaving-time comes Miguel has gone to strike the half-hour afternoon It is now, master Will master go into the cuddy?"

"Ah—yes," answered the Spaniard, starting, somewhat as from dreams into realities, then turning upon Captain Delano, he said that ere long he would resume the conversation

"Then if master means to talk more to

Don Amasa," said the servant, "why not let Don Amasa sit by master in the cuddy, and master can talk, and Don Amasa can listen, while Babo here lathers and strops"

"Yes," said Captain Delano, not displeased with this sociable plan, "yes, Don Benito, unless you had rather not, I will go with you"

"Be it so, Señor"

As the three passed aft, the American could not but think it another strange instance of his host's capriciousness, this being shaved with such uncommon punctuality in the middle of the day. But he deemed it more than likely that the servant's anxious fidelity had something to do with the matter, inasmuch as the timely interruption served to rally his master from the mood which had evidently been coming upon him.

The place called the cuddy was a light deck-cabin formed by the poop, a sort of attic to the large cabin below. Part of it had formerly been the quarters of the officers, but since their death all the partitionings had been thrown down, and the whole interior converted into one spacious and airy marine hall, for absence of fine furniture and picturesque display, of odd appurtenances, somewhat answering to the wide, cluttered hall of some eccentric bachelor-squire in the country, who hangs his shooting-jacket and tobacco-pouch on deer antlers, and keeps his fishing-rod, tongs, and walking-stick in the same corner.

The similitude was heightened, if not originally suggested, by glimpses of the surrounding sea, since, in one aspect, the country and the ocean seem cousins-german.

The floor of the cuddy was matted. Overhead, four or five old muskets were stuck into horizontal holes along the beams. On one side was a claw-footed old table lashed to the deck, a thumb-mussel on it, and over it a small, meagre crucifix attached to the bulkhead. Under the table lay a dented cutlass or two, with a hacked harpoon, among some melancholy old rigging, like a heap of poor friar's girdles.

There were also two long, sharp-ribbed settees of malacca cane, black with age, and uncomfortable to look at as inquisitors' racks, with a large, misshapen arm-chair, which, furnished with a rude barber's crutch at the back, working with a screw, seemed some grotesque Middle Age engine of torment. A flag locker was in one corner, exposing various coloured bunting, some rolled up, others half unrolled, still others tumbled. Opposite was a cumbersome wash-stand, of black mahogany, all of one block, with a pedestal, like a font, and over it a railed shelf, containing combs, brushes, and other implements of the toilet. A torn hammock of stained grass swung near, the sheets tossed, and the pillow wrinkled up like a brow, as if whoever slept here slept but ill, with alternate visitations of sad thoughts and bad dreams.

The further extremity of the cuddy, overhanging the ship's stern, was pierced with three openings, windows or port holes, according as men or cannon might peer, socially or unsocially, out of them. At present neither men nor cannon were seen, though huge iron-bolts and other rusty iron fixtures of the wood-work hinted of twenty-four-pounders.

Glimping toward the hammock as he entered, Captain Delano said, "You sleep here, Don Benito?"

"Yes, Señor, since we got into mild weather."

"This seems a sort of dormitory, sitting-room, sail-loft, chapel, armoury, and private closet together, Don Benito," added Captain Delano, looking round.

"Yes, Señor, events have not been favourable to much order in my arrangements."

Here the servant, napkin on arm, made a motion as if waiting his master's good pleasure. Don Benito signified his readiness, when, seating him in the malacca arm-chair, and for the guest's convenience drawing opposite it one of the settees, the servant commenced operations by throwing back his master's collar and loosening his cravat.

There is something in the negro which, in a peculiar way, fits him for avocations about one's person. Most negroes are natural valets and hair-dressers, taking to the comb and brush congenially as to the castanets, and flourishing them apparently with almost equal satisfaction. There is, too, a smooth tact about them in this employment, with a marvellous, noiseless, gliding briskness, not ungraceful in its way, singularly pleasing to behold, and still more so to be the manipulated subject of. And above all is the great gift of good humour. Not the mere grin or laugh is here meant. Those were unsuitable. But a certain easy cheerfulness, harmonious in every glance and gesture, as though God had set the whole negro to some pleasant tune.

When to all this is added the docility arising from the unassuming contentment of a limited mind, and that susceptibility of blind attachment sometimes inhering in indisputable inferiors, one readily perceives why those hypochondriacs, Johnson and Byron—it may be something like the hypochondriac, Benito Cereno—took to their hearts, almost to the exclusion of the entire white race, their serving men, the negroes, Barber and Fletcher. But if there be that in the negro which exempts him from the inflicted sourness of the morbid or cynical mind, how, in his most prepossessing aspects, must he appear to a benevolent one? When at ease with respect to exterior things, Captain Delano's nature was not only benign, but familiarly and humorously so. At home, he had often taken rare satisfaction in sitting in his door, watching some free man of colour at his work or play. If on a voyage he chanced to have a black sailor, invariably he was on chatty, and half-gamesome terms with him. In fact, like most men of a good, blithe heart, Captain Delano took to negroes, not philanthropically, but gemally, just as other men to Newfoundland dogs.

Hitherto the circumstances in which he found the *San Dominick* had repressed the tendency. But in the cuddy, relieved from his former uneasiness, and, for various

reasons, more sociably inclined than at any previous period of the day, and seeing the coloured servant, napkin on arm, so debonair about his master, in a business so familiar as that of shaving, too, all his old weakness for negroes returned.

Among other things, he was amused with an odd instance of the African love of bright colours and fine shows, in the black's informally taking from the flag-locker a great piece of bunting of all hues, and lavishly tucking it under his master's chin for an apron.

The mode of shaving among the Spaniards is a little different from what it is with other nations. They have a basin, specially called a barber's basin, which on one side is scooped out, so as accurately to receive the chin, against which it is closely held in lathering, which is done, not with a brush, but with soap dipped in the water of the basin and rubbed on the face.

In the present instance salt-water was used for lack of better, and the parts lathered were only the upper lip, and low down under the throat, all the rest being cultivated beard.

These preliminaries being somewhat novel to Captain Delano he sat curiously eyeing them, so that no conversation took place, nor for the present did Don Benito appear disposed to renew any.

Setting down his basin, the negro searched among the razors, as for the sharpest, and having found it, gave it an additional edge by expertly stropping it on the firm, smooth, oily skin of his open palm, he then made a gesture as if to begin, but midway stood suspended for an instant, one hand elevating the razor, the other professionally dabbling among the bubbling suds on the Spaniard's lank neck. Not unaffected by the close sight of the gleaming steel, Don Benito nervously shuddered, his usual ghastliness was heightened by the lather, which lather, again, was intensified in its hue by the contrasting sootiness of the negro's body. Altogether the scene was somewhat peculiar, at least to Captain Delano, nor, as he saw the two

thus postured, could he resist the vagary, that in the black he saw a headsman, and in the white, a man at the block. But this was one of those antic conceits, appearing and vanishing in a breath, from which, perhaps, the best regulated mind is not free.

Meantime the agitation of the Spaniard had a little loosened the bunting from around him, so that one broad fold swept curtain-like over the chain-arm to the floor, revealing, amid a profusion of armorial bars and ground-colours—black, blue and yellow—a closed castle in a blood-red field diagonal with a lion rampant in a white.

"The castle and the lion," exclaimed Captain Delano—"why, Don Benito, this is the flag of Spain you use here. It's well it's only I, and not the King, that sees this," he added with a smile, "but"—turning toward the black,—"*it's all one, I suppose, so the colours be gay,*" which playful remark did not fail somewhat to tickle the negro.

"Now, master," he said, readjusting the flag, and pressing the head gently further back into the crotch of the chain, "now master," and the steel glanced nigh the throat.

Again Don Benito faintly shuddered.

"You must not shake so, master—See, Don Amasa, master always shakes when I shave him. And yet master knows I never yet have drawn blood, though it's true, if master will shake so, I may some of these times. Now, master," he continued "And now, Don Amasa, please go on with your talk about the gale, and all that, master can hear, and between times master can answer."

"Ah yes, these gales," said Captain Delano, "but the more I think of your voyage, Don Benito, the more I wonder, not at the gales, terrible as they must have been, but at the disastrous interval following them. For here, by your account, have you been these two months and more getting from Cape Horn to St. Maria, a distance which I myself, with a good wind, have sailed in a few days. True, you had calms, and long

ones, but to be becalmed for two months, that is, at least, unusual. Why, Don Benito, had almost any other gentleman told me such a story, I should have been half disposed to a little incredulity."

Here an involuntary expression came over the Spaniard, similar to that just before on the deck, and whether it was the start he gave, or a sudden gawky roll of the hull in the calm, or a momentary steadiness of the servant's hand, however it was, just then the razor drew blood, spots of which stained the creamy lather under the throat, immediately the black barber drew back his steel, and remaining in his professional attitude, back to Captain Delano, and face to Don Benito, held up the trickling razor, saying, with a sort of half humorous sorrow, "See, master,—you shook so—here's Babo's first blood."

No sword drawn before James the First of England, no assassination in that timid King's presence, could have produced a more terrified aspect than was now presented by Don Benito.

Poor fellow, thought Captain Delano, so nervous he can't even bear the sight of barber's blood, and this unstrung, sick man, is it credible that I should have imagined he meant to spill all my blood, who can't endure the sight of one little drop of his own? Surely, Amasa Delano, you have been beside yourself this day. Tell it not when you get home, sappy Amasa. Well, well, he looks like a murderer, doesn't he? More like as if himself were to be done for. Well, well, this day's experience shall be a good lesson.

Meantime, while these things were running through the honest seaman's mind, the servant had taken the napkin from his arm, and to Don Benito had said "But answer Don Amasa, please, master, while I wipe this ugly stuff off the razor, and strop it again."

As he said the words, his face was turned half round, so as to be alike visible to the Spaniard and the American, and seemed by its expression to hint, that he was desirous, by getting his master to go on with

the conversation, considerably to withdraw his attention from the recent annoying accident. As if glad to snatch the offered relief, Don Benito resumed, rehearsing to Captain Delano, that not only were the calms of unusual duration, but the ship had fallen in with obstinate currents, and other things he added, some of which were but repetitions of former statements, to explain how it came to pass that the passage from Cape Horn to St. Maria had been so exceedingly long, now and then mingling with his words, incidental praises, less qualified than before, to the blacks, for their general good conduct.

These particulars were not given consecutively, the servant now and then using his razor, and so, between the intervals of shaving, the story and panegyric went on with more than usual huskiness.

To Captain Delano's imagination, now again not wholly at rest, there was something so hollow in the Spaniard's manner, with apparently some reciprocal hollowness in the servant's dusky comment of silence, that the idea flashed across him, that possibly master and man, for some unknown purpose, were acting out, both in word and deed, nay, to the very tremor of Don Benito's limbs, some juggling play before him. Neither did the suspicion of collusion lack apparent support, from the fact of those whispered conferences before mentioned. But then, what could be the object of enacting this play of the barber before him? At last, regarding the notion as a whimsy, insensibly suggested, perhaps, by the theatrical aspect of Don Benito in his harlequin ensign, Captain Delano speedily banished it.

The shaving over, the servant bestirred himself with a small bottle of scented waters, pouring a few drops on the head, and then diligently rubbing, the vehemence of the exercise causing the muscles of his face to twitch rather strangely.

His next operation was with comb, scissors and brush, going round and round, smoothing a curl here, clipping an unruly whisker-hair there, giving a graceful sweep

to the temple-lock, with other impromptu touches evincing the hand of a master, while, like any resigned gentleman in barber's hands, Don Benito bore all, much less uneasily, at least, than he had done the razoring, indeed, he sat so pale and rigid now, that the negro seemed a Nubian sculptor finishing off a white statue-head.

All being over at last, the standard of Spain removed, tumbled up, and tossed back into the flag-locker, the negro's warm breath blowing away any stray hair which might have lodged down his master's neck, collar and cravat readjusted, a speck of lint whisked off the velvet lapel, all this being done, backing off a little space, and pausing with an expression of subdued self-complacency, the servant for a moment surveyed his master, as, in toilet at least, the creature of his own tasteful hands.

Captain Delano playfully complimented him upon his achievement, at the same time congratulating Don Benito.

But neither sweet waters, nor shampooing, nor fidelity, nor sociality, delighted the Spaniard. Seeing him relapsing into forbidding gloom, and still remaining seated, Captain Delano, thinking that his presence was undesired just then, withdrew, on pretence of seeing whether, as he had prophesied, any signs of a breeze were visible.

Walking forward to the mainmast, he stood awhile thinking over the scene, and not without some undefined misgivings, when he heard a noise near the cuddy, and turning, saw the negro, his hand to his cheek. Advancing, Captain Delano perceived that the cheek was bleeding. He was about to ask the cause, when the negro's wailing soliloquy enlightened him.

"Ah, when will master get better from his sickness, only the sour heart that sour sickness breeds made him serve Babo so, cutting Babo with the razor, because, only by accident, Babo had given master one little scratch, and for the first time in so many a day, too. Ah, ah, ah," holding his hand to his face.

Is it possible, thought Captain Delano, was it to wreak in private his Spanish spite against this poor friend of his, that Don Benito, by his sullen manner, impelled me to withdraw? Ah, this slavery breeds ugly passions in man! Poor fellow!

He was about to speak in sympathy to the negro, but with a timid reluctance he now re-entered the cuddy.

Presently master and man came forth, Don Benito leaning on his servant as if nothing had happened.

But a sort of love-quarrel, after all, thought Captain Delano.

He accosted Don Benito, and they slowly walked together. They had gone but a few paces, when the steward—a tall, rajah-looking mulatto, orientally set off with a pagoda turban formed by three or four Madras handkerchiefs wound about his head, tier on tier—approaching with a salaam, announced lunch in the cabin.

On their way thither, the two captains were preceded by the mulatto, who, turning round as he advanced, with continual smiles and bows, ushered them in, a display of elegance which quite completed the insignificance of the small bare-headed Babo, who, as if not unconscious of inferiority, eyed askance the graceful steward. But in part, Captain Delano imputed his jealous watchfulness to that peculiar feeling which the full-blooded African entertains for the adulterated one. As for the steward, his manner, if not bespeaking much dignity of self-respect, yet evidenced his extreme desire to please, which is doubly meritorious, as at once Christian and Chesterfieldian.¹⁶

Captain Delano observed with interest that while the complexion of the mulatto was hybrid, his physiognomy was European, classically so.

"Don Benito," whispered he, "I am glad to see this usher-of-the-golden-rod of yours, the sight refutes an ugly remark once made to me by a Barbados planter that when a mulatto has a regular European face, look out for him, he is a devil. But see, your steward here has features more

regular than King George's of England, and yet there he nods, and bows, and smiles, a king, indeed—the king of kind hearts and polite fellows. What a pleasant voice he has, too?"

"He has, Señor."

"But, tell me, has he not, so far as you have known him, always proved a good, worthy fellow?" said Captain Delano, pausing, while with a final genuflection the steward disappeared into the cabin, "come, for the reason just mentioned, I am curious to know."

"Francesco is a good man," rather sluggishly responded Don Benito, like a phlegmatic appreciator, who would neither find fault nor flatter.

"Ah, I thought so. For it were strange indeed, and not very creditable to us white-skins, if a little of our blood mixed with the African's, should, far from improving the latter's quality, have the sad effect of pouring vitriolic acid into black broth, improving the hue, perhaps, but not the wholesomeness."

"Doubtless, doubtless, Señor, but"—glancing at Babo—"not to speak of negroes, your planter's remark I have heard applied to the Spanish and Indian intermixtures in our provinces. But I know nothing about the matter," he listlessly added.

And here they entered the cabin.

The lunch was a frugal one. Some of Captain Delano's fresh fish and pumpkins, biscuit and salt beef, the reserved bottle of cider, and the *San Dominick's* last bottle of Canary.

As they entered, Francesco, with two or three coloured aids, was hovering over the table giving the last adjustments. Upon perceiving their master they withdrew, Francesco making a smiling conge, and the Spaniard, without condescending to notice it, fastidiously remarking to his compan-

¹⁶ The reference is to Philip Stanhope, 4th Earl of Chesterfield (1694-1773), British statesman and writer, famed for his *Letters to his Son* on matters of politic conduct and worldly wisdom.

ion that he relished not superfluous attendance

Without companions, host and guest sat down, like a childless married couple, at opposite ends of the table, Don Benito waving Captain Delano to his place, and, weak as he was, insisting upon that gentleman being seated before himself

The negro placed a rug under Don Benito's feet, and a cushion behind his back, and then stood behind, not his master's chair, but Captain Delano's. At first, this a little surprised the latter. But it was soon evident that, in taking his position, the black was still true to his master, since by facing him he could the more readily anticipate his slightest want

"This is an uncommonly intelligent fellow of yours, Don Benito," whispered Captain Delano across the table

"You say true, Señor "

During the repast, the guest again reverted to parts of Don Benito's story, begging further particulars here and there. He inquired how it was that the scum and fever should have committed such wholesale havoc upon the whites, while destroying less than half of the blacks. As if this question reproduced the whole scene of plague before the Spaniard's eyes, miserably reminding him of his solitude in a cabin where before he had had so many friends and officers round him, his hand shook, his face became hueless, broken words escaped, but directly the same memory of the past seemed replaced by insane terrors of the present. With starting eyes he stared before him at vacancy. For nothing was to be seen but the hand of his servant pushing the Canary over towards him. At length a few sips served partially to restore him. He made random reference to the different constitutions of races, enabling one to offer more resistance to certain maladies than another. The thought was new to his companion

Presently Captain Delano, intending to say something to his host concerning the pecuniary part of the business he had undertaken for him, especially—since he

was strictly accountable to his owners—with reference to the new suit of sails, and other things of that sort, and naturally preferring to conduct such affairs in private, was desirous that the servant should withdraw, imagining that Don Benito for a few minutes could dispense with his attendance. He, however, waited awhile, thinking that, as the conversation proceeded, Don Benito, without being prompted, would perceive the propriety of the step

But it was otherwise. At last catching his host's eye, Captain Delano, with a slight backward gesture of his thumb, whispered, "Don Benito, pardon me, but there is an interference with the full expression of what I have to say to you "

Upon this the Spaniard changed countenance, which was imputed to his resenting the hint, as in some way a reflection upon his servant. After a moment's pause, he assured his guest that the black's remaining with them could be of no disservice, because since losing his officers he had made Babo (whose original office, it now appeared, had been captain of the slaves) not only his constant attendant and companion, but in all things his confidant

After this, nothing more could be said, though, indeed, Captain Delano could hardly avoid some little tinge of irritation upon being left ungratified in so inconsiderable a wish, by one, too, for whom he intended such solid services. But it is only his querulousness, thought he, and so filling his glass he proceeded to business

The price of the sails and other matters was fixed upon. But while this was being done, the American observed that, though his original offer of assistance had been hailed with hectic animation, yet now when it was reduced to a business transaction, indifference and apathy were betrayed. Don Benito, in fact, appeared to submit to hearing the details more out of regard to common propriety, than from any impression that weighty benefit to himself and his voyage was involved

Soon, this manner became still more re-

served. The effort was vain to seek to draw him into social talk. Gnawed by his splenetic mood, he sat twitching his beard, while to little purpose the hand of his servant, mute as that on the wall, slowly pushed over the Canary.

Lunch being over, they sat down on the cushioned transom, the servant placing a pillow behind his master. The long continuance of the calm had now affected the atmosphere. Don Benito sighed heavily, as if for breath.

"Why not adjourn to the cuddy," said Captain Delano, "there is more air there." But the host sat silent and motionless.

Meantime his servant knelt before him, with a large fan of feathers. And Francesco, coming in on tiptoes, handed the negro a little cup of aromatic waters, with which at intervals he chafed his master's brow, smoothing the hair along the temples as a nurse does a child's. He spoke no word. He only rested his eye on his master's, as if, amid all Don Benito's distress, a little to refresh his spirit by the silent sight of fidelity.

Presently the ship's bell sounded two o'clock, and through the cabin-windows a slight rippling of the sea was discerned, and from the desired direction.

"There," exclaimed Captain Delano, "I told you so, Don Benito, look!"

He had risen to his feet, speaking in a very animated tone, with a view the more to rouse his companion. But though the crimson curtain of the stern-window near him that moment fluttered against his pale cheek, Don Benito seemed to have even less welcome for the breeze than the calm.

Poor fellow, thought Captain Delano, bitter experience has taught him that one ripple does not make a wind, any more than one swallow a summer. But he is mistaken for once. I will get his ship in for him, and prove it.

Briefly alluding to his weak condition, he urged his host to remain quietly where he was, since he (Captain Delano) would with pleasure take upon himself the re-

sponsibility of making the best use of the wind.

Upon gaining the deck, Captain Delano started at the unexpected figure of Atufal, monumentally fixed at the threshold, like one of those sculptured porters of black marble guarding the porches of Egyptian tombs.

But this time the start was, perhaps, purely physical. Atufal's presence, singularly attesting docility even in sullenness, was contrasted with that of the hatchet-polishers, who in patience evinced their industry, while both spectacles showed, that lax as Don Benito's general authority might be, still, whenever he chose to exert it, no man so savage or colossal but must, more or less, bow.

Snatching a trumpet which hung from the bulwarks, with a fice step Captain Delano advanced to the forward edge of the poop, issuing his orders in his best Spanish. The few sailors and many negroes, all equally pleased, obediently set about heading the ship toward the harbor.

While giving some directions about setting a lower stunn'-sail, suddenly Captain Delano heard a voice faithfully repeating his orders. Turning, he saw Babo, now for the time acting, under the pilot, his original part of captain of the slaves. This assistance proved valuable. Tattered sails and warped yards were soon brought into some trim. And no brace or halyard was pulled but to the blithe songs of the insouped negroes.

Good fellows, thought Captain Delano, a little training would make fine sailors of them. Why see, the very women pull and sing, too. These must be some of those Ashantee negresses that make such capital soldiers, I've heard. But who's at the helm? I must have a good hand there.

He went to see.

The *San Dominick* steered with a cumbersome tiller, with large horizontal pulleys attached. At each pulley-end stood a subordinate black, and between them, at the

tiller-head, the responsible post, a Spanish seaman, whose countenance evinced his due share in the general hopefulness and confidence at the coming of the breeze

He proved the same man who had behaved with so shamefaced an air on the windlass

"Ah,—it is you, my man," exclaimed Captain Delano—"well, no more sheep's-eyes now,—look straightforward and keep the ship so Good hand, I trust? And want to get into the harbour, don't you?"

"Sí Señor," assented the man with an inward chuckle, grasping the tiller-head firmly Upon this, unperceived by the American, the two black-eyed sailors asked

Finding all right at the helm, the pilot went forward to the fore-castle, to see how matters stood there

The ship now had way enough to breast the current With the approach of evening, the breeze would be sure to freshen

Having done all that was needed for the present, Captain Delano, giving his last orders to the sailors, turned aft to report affairs to Don Benito in the cabin, perhaps additionally incited to rejoin him by the hope of snatching a moment's private chat while his servant was engaged upon deck

From opposite sides, there were, beneath the poop, two approaches to the cabin, one further forward than the other, and consequently communicating with a longer passage Marking the servant still above, Captain Delano, taking the highest entrance—the one last named, and at whose porch Atufal still stood—hurried on his way, till, arrived at the cabin threshold, he paused an instant, a little to recover from his eagerness Then, with the words of his intended business upon his lips, he entered As he advanced toward the Spaniard, on the transom, he heard another footstep, keeping time with his From the opposite door, a salver in hand, the servant was likewise advancing

"Confound the faithful fellow," thought

Captain Delano, "what a vexatious coincidence"

Possibly, the vexation might have been something different, were it not for the buoyant confidence inspired by the breeze But even as it was, he felt a slight twinge, from a sudden involuntary association in his mind of Babo with Atufal

"Don Benito," said he, "I give you joy, the breeze will hold, and will increase By the way, your tall man and time-piece, Atufal, stands without By your order, of course?"

Don Benito recoiled, as if at some bland satirical touch, delivered with such adroit garnish of apparent good-breeding as to present no handle for retort

He is like one flayed alive, thought Captain Delano, where may one touch him without causing a shrink?

The servant moved before his master, adjusting a cushion, recalled to civility, the Spaniard stiffly replied "You are right The slave appears where you saw him, according to my command, which is, that if at the given hour I am below, he must take his stand and abide my coming"

"Ah now, pardon me, but that is treating the poor fellow like an ex-king denied Ah, Don Benito," smiling, "for all the license you permit in some things, I fear lest, at bottom, you are a bitter hard master"

Again Don Benito shrank, and this time, as the good sailor thought, from a genuine twinge of his conscience

Conversation now became constrained In vain Captain Delano called attention to the now perceptible motion of the keel gently cleaving the sea, with lack-lustre eye, Don Benito returned words few and reserved

By-and-by, the wind having steadily risen, and still blowing right into the harbour, bore the *San Dominick* swiftly on. Rounding a point of land, the sealer at distance came into open view

Meantime Captain Delano had again repaired to the deck, remaining there some

time Having at last altered the ship's course, so as to give the reef a wide berth, he returned for a few moments below

I will cheer up my poor friend, this time, thought he

"Better and better, Don Benito," he cried as he blithely re-entered, "there will soon be an end to your cares, at least for awhile For when, after a long, sad voyage, you know, the anchor drops into the haven, all its vast weight seems lifted from the captain's heart We are getting on famously, Don Benito My ship is in sight Look through this side-light here, there she is, all a-taunt-o' The *Bachelor's Delight*, my good friend Ah, how this wind braces one up Come, you must take a cup of coffee with me this evening My old steward will give you as fine a cup as ever any sultan tasted What say you, Don Benito, will you?"

At first, the Spaniard glanced feverishly up, casting a longing look toward the sealer, while with mute concern his servant gazed into his face Suddenly the old ague of coldness returned, and dropping back to his cushions he was silent

"You do not answer Come, all day you have been my host, would you have hospitality all on one side?"

"I cannot go," was the response

"What? it will not fatigue you The ships will lie together as near as they can, without swinging foul It will be little more than stepping from deck to deck, which is but as from room to room Come, come, you must not refuse me"

"I cannot go," decisively and repulsively repeated Don Benito

Renouncing all but the last appearance of courtesy, with a sort of cadaverous sullenness, and biting his thin nails to the quick, he glanced, almost glared, at his guest, as if impatient that a stranger's presence should interfere with the full indulgence of his morbid hour Meantime the sound of the parted waters came more and more gurglingly and merrily in at the windows, as reproaching him for his dark

spleen, as telling him that, sulk as he might, and go mad with it, nature cared not a jot, since, whose fault was it, pray?

But the foul mood was now at its depth as the fair wind at its height

There was something in the man so far beyond any mere unsociality or sourness previously evinced, that even the forbearing good-nature of his guest could no longer endure it Wholly at a loss to account for such demeanour, and deeming sickness with eccentricity, however extreme, no adequate excuse, well satisfied, too, that nothing in his own conduct could justify it, Captain Delano's pride began to be roused Himself became reserved But all seemed one to the Spaniard Quitting him, therefore, Captain Delano once more went to the deck

The ship was now within less than two miles of the sealer The whale-boat was seen darting over the interval

To be brief, the two vessels, thanks to the pilot's skill, ere long in neighbourly style lay anchored together

Before returning to his own vessel, Captain Delano had intended communicating to Don Benito the practical details of the proposed services to be rendered But, as it was, unwilling anew to subject himself to rebuffs, he resolved, now that he had seen the *San Dominick* safely moored, immediately to quit her, without further allusion to hospitality or business Indefinitely postponing his ulterior plans, he would regulate his future actions according to future circumstances His boat was ready to receive him, but his host still tarried below Well, thought Captain Delano, if he has little breeding, the more need to show mine He descended to the cabin to bid a ceremonious, and, it may be, tacitly rebukeful adieu But to his great satisfaction, Don Benito, as if he began to feel the weight of that treatment with which his slighted guest had, not indecorously, retaliated upon him, now supported by his servant, rose to his feet, and grasping Captain Delano's hand, stood tremulous,

too much agitated to speak. But the good augury hence drawn was suddenly dashed, by his resuming all his previous reserve, with augmented gloom, as, with half-averted eyes, he silently reseated himself on his cushions. With a corresponding return of his own chilled feelings, Captain Delano bowed and withdrew.

He was hardly midway in the narrow corridor, dim as a tunnel, leading from the cabin to the stairs, when a sound, as of the tolling for execution in some jail-yard, fell on his ears. It was the echo of the ships' flawed bell, striking the hour, drearily reverberated in this subterranean vault. Instantly, by a fatality not to be withstood, his mind, responsive to the portent, swarmed with superstitious suspicions. He paused. In images far swifter than these sentences, the minutest details of all his former distrusts swept through him.

Hitherto, credulous good-nature had been too ready to furnish excuses for reasonable fears. Why was the Spaniard, so superfluously punctilious at times, now heedless of common propriety in not accompanying to the side his departing guest? Did indisposition forbid? Indisposition had not forbidden more irksome exertion that day. His last equivocal demeanour recurred. He had risen to his feet, grasped his guest's hand, motioned toward his hat, then, in an instant, all was eclipsed in sinister muteness and gloom. Did this imply one brief, repentant relenting at the final moment, from some iniquitous plot, followed by remorseless return to it? His last glance seemed to express a calamitous, yet acquiescent farewell to Captain Delano for ever. Why decline the invitation to visit the sealer that evening? Or was the Spaniard less hardened than the Jew, who refrained not from supping at the board of him whom the same night he meant to betray? What imported all those day-long enigmas and contradictions, except they were intended to mystify, preliminary to some stealthy blow? Atufal, the pretended rebel, but punctual shadow, that moment lurked by the threshold without. He seemed a

sentry, and more. Who, by his own confession, had stationed him there? Was the negro now lying in wait?

The Spaniard behind—his creature before to rush from darkness to light was the involuntary choice.

The next moment, with clenched jaw and hand, he passed Atufal, and stood unharmed in the light. As he saw his trim ship lying peacefully at her anchor, and almost within ordinary call, as he saw his household boat, with familiar faces in it, patiently rising and falling on the short waves by the *San Dominick's* side, and then, glancing about the decks where he stood, saw the oakum-pickers still gravely plying their fingers, and heard the low, buzzing whistle and industrious hum of the hatchet-polishers, still bestirring themselves over their endless occupation, and more than all, as he saw the benign aspect of Nature, taking her innocent repose in the evening, the screened sun in the quiet camp of the west shining out like the mild light from Abraham's tent, as his charmed eye and ear took in all these, with the chained figure of the black, the clenched jaw and hand relaxed. Once again he smiled at the phantoms which had mocked him, and felt something like a tinge of remorse, that, by indulging them even for a moment, he should, by implication, have betrayed an almost atheist doubt of the ever-watchful Providence above.

There was a few minutes' delay, while, in obedience to his orders, the boat was being hooked along to the gangway. During this interval, a sort of saddened satisfaction stole over Captain Delano, at thinking of the kindly offices he had that day discharged for a stranger. Ah, thought he, after good actions one's conscience is never ungrateful, however much so the benefited party may be.

Presently, his foot, in the first act of descent into the boat, pressed the first round of the side-ladder, his face presented inward upon the deck. In the same moment, he heard his name courteously sounded, and, to his pleased surprise, saw Don

Benito advancing—an unwonted energy in his air, as if, at the last moment, intent upon making amends for his recent discourtesy. With instinctive good feeling, Captain Delano, revoking his foot, turned and reciprocally advanced. As he did so, the Spaniard's nervous eagerness increased, but his vital energy failed, so that, the better to support him, the servant, placing his master's hand on his naked shoulder, and gently holding it there, formed himself into a sort of crutch.

When the two captains met, the Spaniard again fervently took the hand of the American, at the same time casting an earnest glance into his eyes, but, as before, too much overcome to speak.

I have done him wrong, self-reproachfully thought Captain Delano, his apparent coldness has deceived me, in no instance has he meant to offend.

Meantime, as if fearful that the continuance of the scene might too much unstring his master, the servant seemed anxious to terminate it. And so, still presenting himself as a crutch, and walking between the two captains, he advanced with them toward the gangway, while still, as if full of kindly contrition, Don Benito would not let go the hand of Captain Delano, but retained it in his, across the black's body.

Soon they were standing by the side, looking over into the boat, whose crew turned up their curious eyes. Waiting a moment for the Spaniard to relinquish his hold, the now embarrassed Captain Delano lifted his foot, to overstep the threshold of the open gangway, but still Don Benito would not let go his hand. And yet, with an agitated tone, he said, "I can go no further, here I must bid you adieu. Adieu, my dear, dear Don Amasa. Go—go!" suddenly tearing his hand loose, "go, and God guard you better than me, my best friend."

Not unaffected, Captain Delano would now have lingered, but catching the weekly admonitory eye of the servant, with a hasty farewell he descended into his boat, followed by the continual adieus of

Don Benito, standing rooted in the gangway.

Seating himself in the stern, Captain Delano, making a last salute, ordered the boat shoved off. The crew had their oars on end. The bowsman pushed the boat a sufficient distance for the oars to be lengthwise dropped. The instant that was done, Don Benito sprang over the bulwarks, falling at the feet of Captain Delano, at the same time, calling towards his ship, but in tones so frenzied, that none in the boat could understand him. But, as if not equally obtuse, three Spanish sailors, from three different and distant parts of the ship, splashed into the sea, swimming after their captain, as if intent upon his rescue.

The dismayed officer of the boat eagerly asked what this meant. To which, Captain Delano, turning a disdainful smile upon the unaccountable Benito Cereno, answered that, for his part, he neither knew nor cared, but it seemed as if the Spaniard had taken it into his head to produce the impression among his people that the boat wanted to kidnap him. "Or else—give way for your lives," he wildly added, starting at a clattering hubbub in the ship, above which rang the tocsin of the hatchet-polishers, and seizing Don Benito by the throat he added, "thus plotting pirate means murder!" Here, in apparent verification of the words, the servant, a dagger in his hand, was seen on the rail overhead, poised, in the act of leaping, as if with desperate fidelity to befriend his master to the last, while, seemingly to aid the black, the three Spanish sailors were trying to clamber into the hampered bow. Meantime, the whole host of negroes, as if inflamed at the sight of their jeopardized captain, impended in one sooty avalanche over the bulwarks.

All this, with what preceded, and what followed, occurred with such involutions of rapidity, that past, present, and future seemed one.

Seeing the negro coming, Captain Delano

had flung the Spaniard aside, almost in the very act of clutching him, and, by the unconscious recoil, shifting his place, with arms thrown up, so promptly grappled the servant in his descent, that with dagger presented at Captain Delano's heart, the black seemed of purpose to have leaped there as to his mark. But the weapon was wrenched away, and the assailant dashed down into the bottom of the boat, which now, with disentangled oars, began to speed through the sea.

At this juncture, the left hand of Captain Delano, on one side, again clutched the half-reclined Don Benito, heedless that he was in a speechless faint, while his right foot, on the other side, ground the prostrate negro, and his right arm pressed for added speed on the after oar, his eye bent forward, encouraging his men to their utmost.

But here, the officer of the boat, who had at last succeeded in beating off the towing Spanish sailors, and was now, with face turned aft, assisting the bowsman at his oar, suddenly called to Captain Delano, to see what the black was about, while a Portuguese oarsman shouted to him to give heed to what the Spaniard was saying.

Glancing down at his feet, Captain Delano saw the freed hand of the servant aiming with a second dagger—a small one, before concealed in his wool—with this he was snakishly writhing up from the boat's bottom, at the heart of his master, his countenance lividly vindictive, expressing the centred purpose of his soul, while the Spaniard, half-choked, was vainly shrinking away, with husky words, incoherent to all but the Portuguese.

That moment, across the long benighted mind of Captain Delano, a flash of revelation swept, illuminating in unanticipated clearness Benito Cereno's whole mysterious demeanour, with every enigmatic event of the day, as well as the entire past voyage of the *San Dominick*. He smote Babo's hand down, but his own heart

smote him harder. With infinite pity he withdrew his hold from Don Benito. Not Captain Delano, but Don Benito, the black, in leaping into the boat, had intended to stab.

Both the black's hands were held, as, glancing up toward the *San Dominick*, Captain Delano, now with the scales dropped from his eyes, saw the negroes, not in misrule, not in tumult, not as if frantically concerned for Don Benito, but with mask torn away, flourishing hatchets and knives, in ferocious piratical revolt. Like delirious black dervishes, the six Ashantees danced on the poop. Prevented by their foes from springing into the water, the Spanish boys were hurrying up to the topmost spars, while such of the few Spanish sailors, not already in the sea, less alert, were descried, helplessly mixed in, on deck, with the blacks.

Meantime Captain Delano hailed his own vessel, ordering the ports up, and the guns run out. But by this time the cable of the *San Dominick* had been cut, and the fag-end, in lashing out, whipped away the canvas shroud about the beak, suddenly revealing, as the bleached hull swung round toward the open ocean, death for the figurehead, in a human skeleton, chalky comment on the chalked words below, "*Follow your leader*."

At the sight, Don Benito, covering his face, wailed out "'Tis he, Aranda! my murdered, unburied friend!"

Upon reaching the sealer, calling for ropes, Captain Delano bound the negro, who made no resistance, and had him hoisted to the deck. He would then have assisted the now almost helpless Don Benito up the side, but Don Benito, wan as he was, refused to move, or be moved, until the negro should have been first put below out of view. When, presently assured that it was done, he no more shrank from the ascent.

The boat was immediately despatched back to pick up the three swimming sailors. Meantime, the guns were in readiness, though, owing to the *San Dominick* hav-

ing glided somewhat astern of the sealer, only the aftermost one could be brought to bear. With this, they fired six times, thinking to cripple the fugitive ship by bringing down her spars. But only a few inconsiderable ropes were shot away. Soon the ship was beyond the guns' range, steering broad out of the bay, the blacks thickly clustering round the bowsprit, one moment with taunting cries toward the whites, the next with upthrown gestures hailing the now dusky expanse of ocean—cawing crows escaped from the hand of the fowler.

The first impulse was to slip the cables and give chase. But, upon second thought, to pursue with whale-boat and yawl seemed more promising.

Upon inquiring of Don Benito what firearms they had on board the *San Dominick*, Captain Delano was answered that they had none that could be used, because, in the earlier stages of the mutiny, a cabin-passenger, since dead, had secretly put out of order the locks of what few muskets there were. But with all his remaining strength, Don Benito entreated the American not to give chase, either with ship or boat, for the negroes had already proved themselves such desperadoes, that, in case of a present assault, nothing but a total massacre of the whites could be looked for. But, regarding this warning as coming from one whose spirit had been crushed by misery, the American did not give up his design.

The boats were got ready and armed. Captain Delano ordered twenty-five men into them. He was going himself when Don Benito grasped his arm.

"What! have you saved my life, Señor, and are you now going to throw away your own?"

The officers also, for reasons connected with their interests and those of the voyage, and a duty owing to the owners, strongly objected against their commander's going. Weighing their remonstrances a moment, Captain Delano felt bound to remain, appointing his chief mate—an

athletic and resolute man, who had been a privateer's man, and, as his enemies whispered, a pirate—to head the party. The more to encourage the sailors, they were told that the Spanish captain considered his ship as good as lost, that she and her cargo, including some gold and silver, were worth upwards of ten thousand doubloons. Take her, and no small part should be theirs. The sailors replied with a shout.

The fugitives had now almost gained an offing. It was nearly night, but the moon was rising. After hard, prolonged pulling, the boats came up on the ship's quarters, at a suitable distance laying upon their oars to discharge their muskets. Having no bullets to return, the negroes sent their yells. But, upon the second volley, Indian-like, they hurled their hatchets. One took off a sailor's fingers. Another struck the whale-boat's bow, cutting off the rope there, and remaining stuck in the gunwale, like a woodman's axe. Snatching it, quivering from its lodgment, the mate hurled it back. The returned gauntlet now stuck in the ship's broken quarter-gallery, and so remained.

The negroes giving too hot a reception, the whites kept a more respectful distance. Hovering now just out of reach of the hurtling hatchets, they, with a view to the close encounter which must soon come, sought to decoy the blacks into entirely disarming themselves of their most murderous weapons in a hand-to-hand fight, by foolishly flinging them, as missiles, short of the mark, into the sea. But ere long perceiving the stratagem, the negroes desisted, though not before many of them had to replace their lost hatchets with handspikes, an exchange which, as counted upon, proved in the end favourable to the assailants.

Meantime, with a strong wind, the ship still clove the water, the boats alternately falling behind, and pulling up, to discharge fresh volleys.

The fire was mostly directed toward the stern, since there, chiefly, the negroes, at

present, were clustering. But to kill or maim the negroes was not the object. To take them, with the ship, was the object. To do it, the ship must be boarded, which could not be done by boats while she was sailing so fast.

A thought now struck the mate. Observing the Spanish boys still aloft, high as they could get, he called to them to descend to the yards, and cut adrift the sails. It was done. About this time, owing to causes hereafter to be shown, two Spaniards, in the dress of sailors and conspicuously showing themselves, were killed, not by volleys, but by deliberate marksman's shots, while, as it afterwards appeared, during one of the general discharges, Atufal, the black, and the Spaniard at the helm likewise were killed. What now, with the loss of the sails, and loss of leaders, the ship became unmanageable to the negroes.

With creaking masts she came heavily round to the wind, the prow slowly swinging into view of the boats, its skeleton gleaming in the horizontal moonlight, and casting a gigantic ribbed shadow upon the water. One extended arm of the ghost seemed beckoning the whites to avenge it.

"Follow your leader!" cried the mate, and, one on each bow, the boats boarded. Scaling-spears and cutlasses crossed hatchets and handspikes. Huddled upon the long-boat amidships, the negresses raised a wailing chant, whose chorus was the clash of the steel.

For a time, the attack wavered, the negroes wedging themselves to beat it back, the half-repelled sailors, as yet unable to gain a footing, fighting as troopers in the saddle, one leg sideways flung over the bulwarks, and one without, plying their cutlasses like carters' whips. But in vain. They were almost overborne, when, rallying themselves into a squad as one man, with a huzza, they sprang inboard, where, entangled, they involuntarily separated again. For a few breaths' space there was a vague, muffled, inner sound as of submerged sword-fish rushing hither and

thither through shoals of black-fish. Soon, in a reunited band, and joined by the Spanish seamen, the whites came to the surface, irresistibly driving the negroes toward the stern. But a barricade of casks and sacks, from side to side, had been thrown up by the mainmast. Here the negroes faced about, and though scorning peace or truce, yet fain would have had a respite. But, without pause, overleaping the barrier, the unflagging sailors again closed. Exhausted, the blacks now fought in despair. Their red tongues lolled, wolf-like, from their black mouths. But the pale sailors' teeth were set, not a word was spoken, and, in five minutes more, the ship was won.

Nearly a score of the negroes were killed. Exclusive of those by the balls, many were mangled, their wounds—mostly inflicted by the long-edged scaling-spears—resembling those shaven ones of the English at Preston Pans,¹⁷ made by the poled scythes of the Highlanders. On the other side, none were killed, though several were wounded, some severely, including the mate. The surviving negroes were temporarily secured, and the ship, towed back into the harbour at midnight, once more lay anchored.

Omitting the incidents and arrangements ensuing, suffice it that, after two days spent in refitting, the two ships sailed in company for Concepcion in Chili, and thence for Lima in Peru, where, before the vice-legal courts, the whole affair, from the beginning, underwent investigation.

Though, midway on the passage, the ill-fated Spaniard, relaxed from constraint, showed some signs of regaining health with free-will, yet, agreeably to his own foreboding, shortly before arriving at Lima, he relapsed, finally becoming so reduced as to be carried ashore in arms. Hearing of his story and plight, one of

¹⁷ Town near Edinburgh, scene of defeat of British army on Sept. 21, 1745, by Highland Jacobites under Prince Charles Edward.

the many religious institutions of the City of Kings¹⁸ opened an hospitable refuge to him, where both physician and priest were his nurses, and a member of the order volunteered to be his one special guardian and consoler, by night and by day

The following extracts, translated from one of the official Spanish documents, will, it is hoped, shed light on the preceding narrative, as well as, in the first place, reveal the true port of departure and true history of the *San Dominick's* voyage, down to the time of her touching at the island of Santa Maria

But, ere the extracts come, it may be well to preface them with a remark

The document selected, from among many others, for partial translation, contains the deposition of Benito Cereno, the first taken in the case. Some disclosures therein were, at the time, held dubious for both learned and natural reasons. The tribunal inclined to the opinion that the deponent, not undisturbed in his mind by recent events, raved of some things which could never have happened. But subsequent depositions of the surviving sailors, bearing out the revelations of their captain in several of the strangest particulars, gave credence to the rest. So that the tribunal, in its final decision, rested its capital sentences upon statements which, had they lacked confirmation, it would have deemed it but duty to reject

I, DON JOSÉ DE ABOS AND PADILLA, His Majesty's Notary for the Royal Revenue, and Register of this Province, and Notary Public of the Holy Crusade of this Bishopric, etc

Do certify and declare, as much as is requisite in law, that, in the criminal cause commenced the twenty-fourth of the month of September, in the year seventeen hundred and ninety-nine, against the Senegal negroes of the ship *San Dominick*, the following declaration before me was made

Declaration of the first witness,
DON BENITO CERENO

The same day, and month, and year, His Honour, Doctor Juan Martinez de Dozas, Councillor of the Royal Audience of this Kingdom, and learned in the law of this Intendancy, ordered the captain of the ship *San Dominick*, Don Benito Cereno, to appear, which he did in his litter, attended by the monk Infelez, of whom he received, before Don José de Abos and Padilla, Notary Public of the Holy Crusade, the oath, which he took by God, our Lord, and a sign of the Cross, under which he promised to tell the truth of whatever he should know and should be asked.—and being interrogated agreeably to the tenor of the act commencing the process, he said, that on the twentieth of May last, he set sail with his ship from the port of Valparaiso, bound to that of Callao, loaded with the produce of the country and one hundred and sixty blacks, of both sexes, mostly belonging to Don Alexandro Aranda, gentleman, of the city of Mendoza, that the crew of the ship consisted of thirty-six men, beside the persons who went as passengers, that the negroes were in part as follows

[*Here, in the original, follows a list of some fifty names, descriptions, and ages, compiled from certain recovered documents of Aranda's, and also from recollections of the deponent, from which portions only are extracted*]

—One, from about eighteen to nineteen years, named José, and this was the man that waited upon his master, Don Alexandro, and who speaks well the Spanish, having served him four or five years, .
a mulatto, named Francesco, the cabin

¹⁸ So called because Lima was founded on January 6, the feast-day of the Wise Men, or the Three Kings. Pizarro was the founder, in 1535

steward, of a good person and voice, having sung in the Valparaiso churches, native of the province of Buenos Ayres, aged about thirty-five years. A smart negro, named Dago, who had been for many years a grave-digger among the Spaniards, aged forty-six years. Four old negroes, born in Africa, from sixty to seventy, but sound, caulkers by trade, whose names are as follows—the first was named Muñi, and he was killed (as was also his son named Diamelo), the second, Nacta, the third, Yola, likewise killed, the fourth, Ghofan, and six full-grown negroes, aged from thirty to forty-five, all raw, and born among the Ashantees—Martiqui, Yan, Lecbe, Mapenda, Yambaio, Akim, four of whom were killed, a powerful negro named Atufal, who, being supposed to have been a chief in Africa, his owners set great store by him. And a small negro of Senegal, but some years among the Spaniards, aged about thirty, which negro's name was Babo, that he does not remember the names of the others, but that still expecting the residue of Don Alexandro's papers will be found, will then take due account of them all, and remit to the court, and thirty-nine women and children of all ages

[After the catalogue, the deposition goes on as follows]

That all the negroes slept upon deck, as is customary in this navigation, and none wore fetters, because the owner, his friend Aranda, told him that they were all tractable, that on the seventh day after leaving port, at three o'clock in the morning, all the Spaniards being asleep except the two officers on the watch, who were the boatswain, Juan Robles, and the carpenter, Juan Bautista Gayete, and the helmsman and his boy, the negroes revolted suddenly, wounded dangerously the boatswain and the carpenter, and successively killed eighteen men of those who were sleeping upon deck, some with handspikes

and hatchets, and others by throwing them alive overboard, after tying them, that of the Spaniards upon deck, they left about seven, as he thinks, alive and tied, to manœuvre the ship and three or four more who hid themselves, remained also alive. Although in the act of revolt the negroes made themselves masters of the hatchway, six or seven wounded went through it to the cockpit, without any hindrance on their part, that in the act of revolt, the mate and another person, whose name he does not recollect, attempted to come up through the hatchway, but having been wounded at the onset, they were obliged to return to the cabin, that the deponent resolved at break of day to come up the companion-way, where the negro Babo was, being the ringleader, and Atufal, who assisted him, and having spoken to them, exhorted them to cease committing such atrocities, asking them, at the same time, what they wanted and intended to do, offering, himself, to obey their commands, that, notwithstanding this, they threw, in his presence, three men, alive and tied, overboard, that they told the deponent to come up, and that they would not kill him, which having done, the negro Babo asked him whether there were in those seas any negro countries where they might be carried, and he answered them, No, that the negro Babo afterwards told him to carry them to Senegal, or to the neighbouring islands of St Nicholas, and he answered, that this was impossible, on account of the great distance, the necessity involved of rounding Cape Horn, the bad condition of the vessel, the want of provisions, sails, and water, but that the negro Babo replied to him he must carry them in any way, that they would do and conform themselves to everything the deponent should require as to eating and drinking, that after a long conference, being absolutely compelled to please them, for they threatened him to kill all the whites if they were not, at all events, carried to Senegal, he told them that what was most wanting for the voy-

age was water, that they would go near the coast to take it, and hence they would proceed on their course, that the negro Babo agreed to it, and the deponent steered toward the intermediate ports, hoping to meet some Spanish or foreign vessel that would save them, that within ten or eleven days they saw the land, and continued their course by it in the vicinity of Nasca, that the deponent observed that the negroes were now restless and mutinous, because he did not effect the taking in of water, the negro Babo having required, with threats, that it should be done, without fail, the following day, he told him he saw plainly that the coast was steep, and the rivers designated in the maps were not to be found, with other reasons suitable to the circumstances, that the best way would be to go to the island of Santa Maria, where they might water and victual easily, it being a desert island, as the foreigners did, that the deponent did not go to Pisco, that was near, nor make any other port of the coast, because the negro Babo had intimated to him several times, that he would kill all the whites the very moment he should perceive any city, town, or settlement of any kind on the shores to which they should be carried that having determined to go to the island of Santa Maria, as the deponent had planned, for the purpose of trying whether, in the passage or in the island itself, they could find any vessel that should favour them, or whether he could escape from it in a boat to the neighbouring coast of Aruco, to adopt the necessary means he immediately changed his course, steering for the island, that the negroes Babo and Atufal held daily conferences, in which they discussed what was necessary for their design of returning to Senegal, whether they were to kill all the Spaniards, and particularly the deponent, that eight days after parting from the coast of Nasca, the deponent being on the watch a little after day-break, and soon after the negroes had their meeting, the negro Babo came to the

place where the deponent was, and told him that he had determined to kill his master, Don Alexandro Aranda, both because he and his companions could not otherwise be sure of their liberty, and that, to keep the seamen in subjection, he wanted to prepare a warning of what road they should be made to take did they or any of them oppose him, and that, by means of the death of Don Alexandro, that warning would best be given, but, that what this last meant, the deponent did not at the time comprehend, nor could not, further than that the death of Don Alexandro was intended, and moreover, the negro Babo proposed to the deponent to call the mate Raneds, who was sleeping in the cabin, before the thing was done, for fear, as the deponent understood it, that the mate, who was a good navigator, should be killed with Don Alexandro and the rest, that the deponent, who was the friend from youth of Don Alexandro, prayed and conjured, but all was useless, for the negro Babo answered him that the thing could not be prevented, and that all the Spaniards risked their death if they should attempt to frustrate his will in this matter, or any other, that, in this conflict, the deponent called the mate, Raneds, who was forced to go apart, and immediately the negro Babo commanded the Ashantee Martinqui and the Ashantee Leebe to go and commit the murder, that those two went down with hatchets to the berth of Don Alexandro, that, yet half alive and mangled, they dragged him on deck, that they were going to throw him overboard in that state, but the negro Babo stopped them, bidding the murder be completed on the deck before him, which was done, when, by his orders, the body was carried below, forward, that nothing more was seen of it by the deponent for three days, that Don Alonzo Sidoma, an old man, long resident at Valparaiso, and lately appointed to a civil office in Peru, whither he had taken passage, was at the time sleeping in the berth opposite Don Alexandro's, that,

awakening at his cries, surprised by them, and at the sight of the negroes with their bloody hatchets in their hands, he threw himself into the sea through a window which was near him, and was drowned, without it being in the power of the deponent to assist or take him up, that, a short time after killing Aranda, they brought upon deck his german-cousin, of middle-age, Don Francisco Masa, of Mendoza, and the young Don Joaquin, Marques de Arambolaza, then lately from Spain, with his Spanish servant Ponce, and the three young clerks of Aranda, José Mozam, Lorenzo Baigas, and Hermenegildo Gandix, all of Cadiz, that Don Joaquin and Hermenegildo Gandix, the negro Babo for purposes hereafter to appear, preserved alive, but Don Francisco Masa, José Mozam, and Lorenzo Baigas, with Ponce, the servant, beside the boatswain, Juan Robles, the boatswain's mates, Manuel Viscaya and Roderigo Hurta, and four of the sailors, the negro Babo ordered to be thrown alive into the sea, although they made no resistance, nor begged for anything else but mercy, that the boatswain, Juan Robles, who knew how to swim, kept the longest above water, making acts of contrition, and, in the last words he uttered, charged this deponent to cause mass to be said for his soul to our Lady of Suecour that, during the three days which followed, the deponent, uncertain what fate had befallen the remains of Don Alexandro, frequently asked the negro Babo where they were, and, if still on board, whether they were to be preserved for interment ashore, entreating him so to order it, that the negro Babo answered nothing till the fourth day, when at sunrise, the deponent coming on deck, the negro Babo showed him a skeleton, which had been substituted for the ship's proper figure-head, the image of Christopher Colon, the discoverer of the New World, that the negro Babo asked him whose skeleton that was, and whether, from its whiteness, he should not think it a

white's, that, upon his covering his face, the negro Babo, coming close, said words to this effect "Keep faith with the blacks from here to Senegal, or you shall in spirit, as now in body, follow your leader," pointing to the prow, that the same morning the negro Babo took by succession each Spaniard forward, and asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's, that each Spaniard covered his face, that then to each the negro Babo repeated the words in the first place said to the deponent, that they (the Spaniards), being then assembled aft, the negro Babo harangued them, saying that he had now done all, that the deponent (as navigator for the negroes) might pursue his course, warning him and all of them that they should, soul and body, go the way of Don Alexandro if he saw them (the Spaniards) speak or plot anything against them (the negroes)—a threat which was repeated every day, that, before the events last mentioned, they had tied the cook to throw him overboard, for it is not known what thing they heard him speak, but finally the negro Babo spared his life, at the request of the deponent, that a few days after, the deponent, endeavouring not to omit any means to preserve the lives of the remaining whites, spoke to the negroes peace and tranquillity, and agreed to draw up a paper, signed by the deponent and the sailors who could write, as also by the negro Babo, for himself and all the blacks, in which the deponent obliged himself to carry them to Senegal, and they not to kill any more, and he formally to make over to them the ship, with the cargo, with which they were for that time satisfied and quieted But the next day, the more surely to guard against the sailors' escape, the negro Babo commanded all the boats to be destroyed but the long-boat, which was unseaworthy, and another, a cutter in good condition, which, knowing it would yet be wanted for lowering the water casks, he had it lowered down into the hold

[Various particulars of the prolonged and perplexed navigation ensuing here follow, with incidents of a calamitous calm, from which portion one passage is extracted, to wit]

—That on the fifth day of the calm, all on board suffering much from the heat, and want of water, and five having died in fits, and mad, the negroes became intractable, and for a chance gesture, which they deemed suspicious—though it was harmless—made by the mate, Raneds, to the deponent, in the act of handing a quadrant, they killed him, but that for this they afterwards were sorry, the mate being the only remaining navigator on board, except the deponent

—That omitting other events, which daily happened, and which can only serve uselessly to recall past misfortunes and conflicts, after seventy-three days' navigation, reckoned from the time they sailed from Nasea, during which they navigated under a scanty allowance of water, and were afflicted with the calms before mentioned, they at last arrived at the island of Santa Maria, on the seventeenth of the month of August, at about six o'clock in the afternoon, at which hour they cast anchor very near the American ship, *Bachelor's Delight*, which lay in the same bay, commanded by the generous Captain Amasa Delano, but at six o'clock in the morning, they had already deserted the port, and the negroes became uneasy, as soon as at distance they saw the ship, not having expected to see one there, that the negro Babo pacified them, assuring them that no fear need be had, that straightway he ordered the figure on the bow to be covered with canvas, as for repairs, and had the decks a little set in order, that for a time the negro Babo and the negro Atufal conferred, that the negro Atufal was for sailing away, but the negro Babo would not, and, by himself, cast about what to do, that at last he came to the deponent, proposing to him to say and do all that the deponent

declares to have said and done to the American captain, that the negro Babo warned him that if he varied in the least, or uttered any word, or gave any look that should give the least intimation of the past events or present state, he would instantly kill him, with all his companions, showing a dagger, which he carried hid, saying something which, as he understood it, meant that that dagger would be alert as his eye, that the negro Babo then announced the plan to all his companions, which pleased them, that he then, the better to disguise the truth, devised many expedients, in some of them uniting deceit and defence, that of this sort was the device of the six Ashantees before named, who were his bravos, that them he stationed on the break of the poop, as if to clean certain hatchets (in cases, which were part of the cargo), but in reality to use them, and distribute them at need, and at a given word he told them, that, among other devices, was the device of presenting Atufal, his right-hand man, as chained, though in a moment the chains could be dropped, that in every particular he informed the deponent what part he was expected to enact in every device, and what story he was to tell on every occasion, always threatening him with instant death if he varied in the least that, conscious that many of the negroes would be turbulent, the negro Babo appointed the four aged negroes, who were caulkers, to keep what domestic order they could on the decks, that again and again he harangued the Spaniards and his companions, informing them of his intent, and of his devices, and of the invented story that this deponent was to tell, charging them lest any of them varied from that story, that these arrangements were made and matured during the interval of two or three hours, between their first sighting the ship and the arrival on board of Captain Amasa Delano, that this happened at about half-past seven in the morning, Captain Amasa Delano coming in his boat, and all gladly receiving him, that the deponent, as well

as he could force himself, acting then the part of principal owner, and a free captain of the ship, told Captain Amasa Delano, when called upon, that he came from Buenos Ayres, bound to Lima, with three hundred negroes, that off Cape Horn, and in a subsequent fever, many negroes had died, that also, by similar casualties, all the sea officers and the greatest part of the crew had died

[And so the deposition goes on, circumstantially recounting the fictitious story dictated to the deponent by Babo, and through the deponent imposed upon Captain Delano, and also recounting the friendly offers of Captain Delano, with other things, but all of which is here omitted After the fictitious, strange story, etc., the deposition proceeds]

—That the generous Captain Amasa Delano remained on board all the day, till he left the ship anchored at six o'clock in the evening, deponent speaking to him always of his pretended misfortunes, under the fore-mentioned principles, without having had it in his power to tell a single word, or give him the least hint, that he might know the truth and state of things, because the negro Babo, performing the office of an officious servant with all the appearance of submission of the humble slave, did not leave the deponent one moment, that this was in order to observe the deponent's actions and words, for the negro Babo understands well the Spanish, and besides, there were thereabout some others who were constantly on the watch, and likewise understood the Spanish, that upon one occasion, while deponent was standing on the deck conversing with Amasa Delano, by a secret sign the negro Babo drew him (the deponent) aside, the act appearing as if originating with the deponent, that then, he being drawn aside, the negro Babo proposed to him to gain from Amasa Delano full particulars about his ship, and crew, and arms, that the deponent asked "For what?" that the negro

Babo answered he might conceive, that, grieved at the prospect of what might overtake the generous Captain Amasa Delano, the deponent at first refused to ask the desired questions, and used every argument to induce the negro Babo to give up this new design, that the negro Babo showed the point of his dagger, that, after the information had been obtained, the negro Babo again drew him aside, telling him that that very night he (the deponent) would be captain of two ships instead of one, for that, great part of the American's ship's crew being to be absent fishing, the six Ashantees, without any one else, would easily take it, that at this time he said other things to the same purpose, that no entreaties availed, that before Amasa Delano's coming on board, no hint had been given touching the capture of the American ship that to prevent this project the deponent was powerless, —

that in some things his memory is confused, he cannot distinctly recall every event, —that as soon as they had cast anchor at six of the clock in the evening, as has before been stated, the American captain took leave to return to his vessel, that upon a sudden impulse, which the deponent believes to have come from God and his angels, he, after the farewell had been said, followed the generous Captain Amasa Delano as far as the gunwale, where he stayed, under the pretence of taking leave, until Amasa Delano should have been seated in his boat, that on shoving off, the deponent sprang from the gunwale, into the boat, and fell into it, he knows not how, God guarding him, that—

[Here, in the original, follows the account of what further happened at the escape, and how the "San Dominick" was retaken, and of the passage to the coast, including in the recital many expressions of "eternal gratitude" to the "generous Captain Amasa Delano" The deposition then proceeds with recapitulatory remarks, and a partial remuneration of the negroes, making record of their individual part in

the past events, with a view to furnishing, according to command of the court, the data whereon to found the criminal sentences to be pronounced From this portion is the following]

—That he believes that all the negroes, though not in the first place knowing to the design of revolt, when it was accomplished, approved it That the negro, José, eighteen years old, and in the personal service of Don Alexandro, was the one who communicated the information to the negro Babo, about the state of things in the cabin, before the revolt, that this is known, because, in the preceding midnight, he used to come from his berth, which was under his master's, in the cabin, to the deck where the ringleader and his associates were, and had secret conversations with the negro Babo, in which he was several times seen by the mate, that, one night, the mate drove him away twice, that this same negro José, was the one who, without being commanded to do so by the negro Babo, as Lecbe and Martinqui were, stabbed his master, Don Alexandro, after he had been dragged half-lifeless to the deck, that the mulatto steward, Francesco, was of the first band of revolters, that he was, in all things, the creature and tool of the negro Babo, that, to make his court, he, just before a repast in the cabin, proposed, to the negro Babo, poisoning a dish for the generous Captain Amasa Delano, this is known and believed, because the negroes have said it, but that the negro Babo, having another design, forbade Francesco, that the Ashantee Lecbe was one of the worst of them, for that, on the day the ship was retaken, he assisted in the defence of her, with a hatchet in each hand, with one of which he wounded, in the breast, the chief mate of Amasa Delano, in the first act of boarding, this all knew, that, in sight of the deponent, Lecbe struck, with a hatchet, Don Francisco Masa when, by the negro Babo's orders, he was carrying him to throw him overboard, alive, beside partici-

pating in the murder, before mentioned, of Don Alexandro Aranda, and others of the cabin-passengers, that, owing to the fury with which the Ashantees fought in the engagement with the boats, but this Lecbe and Yan survived, that Yan was bad as Lecbe, that Yan was the man who, by Babo's command, willingly prepared the skeleton of Don Alexandro, in a way the negroes afterwards told the deponent, but which he, so long as reason is left him, can never divulge, that Yan and Lecbe were the two who, in a calm by night, riveted the skeleton to the bow, this also the negroes told him, that the negro Babo was he who traced the inscription below it, that the negro Babo was the plotter from first to last, he ordered every murder, and was the helm and keel of the revolt, that Atufal was his lieutenant in all, but Atufal, with his own hand, committed no murder, nor did the negro Babo, that Atufal was shot, being killed in the fight with the boats, ere boarding, that the negresses, of age, were knowing to the revolt, and testified themselves satisfied at the death of their master, Don Alexandro, that, had the negroes not restrained them, they would have tortured to death, instead of simply killing, the Spaniards slain by command of the negro Babo, that the negresses used their utmost influence to have the deponent made away with, that, in the various acts of murder, they sang songs and danced—not gaily, but solemnly, and before the engagement with the boats, as well as during the action, they sang melancholy songs to the negroes, and that this melancholy tone was more inflaming than a different one would have been, and was so intended, that all this is believed, because the negroes have said it

—That of the thirty-six men of the crew—exclusive of the passengers (all of whom are now dead), which the deponent had knowledge of—six only remained alive, with four cabin-boys and ship-boys, not included with the crew, —that the negroes broke an arm of one of the cabin-boys and gave him strokes with hatchets

[Then follow various random disclosures referring to various periods of time The following are extracted]

—That during the presence of Captain Amasa Delano on board, some attempts were made by the sailors, and one by Hermenegildo Gandix, to convey hints to him of the true state of affairs, but that these attempts were ineffectual, owing to fear of incurring death, and furthermore owing to the devices which offered contradictions to the true state of affairs, as well as owing to the generosity and piety of Amasa Delano, incapable of sounding such wickedness, that Luys Galgo, a sailor about sixty years of age, and formerly of the king's navy, was one of those who sought to convey tokens to Captain Amasa Delano, but his intent, though undiscovered, being suspected, he was, on a pretence, made to retire out of sight, and at last into the hold, and there was made away with. Thus the negroes have since said, that one of the ship-boys feeling, from Captain Amasa Delano's presence, some hopes of release, and not having enough prudence, dropped some chance-word respecting his expectations, which being overheard and understood by a slave-boy with whom he was eating at the time, the latter struck him on the head with a knife, inflicting a bad wound, but of which the boy is now healing, that likewise, not long before the ship was brought to anchor, one of the seamen, steering at the time, endangered himself by letting the blacks remark a certain unconscious hopeful expression in his countenance, arising from some cause similar to the above, but this sailor, by his heedful after conduct, escaped, that these statements are made to show the court that from the beginning to the end of the revolt, it was impossible for the deponent and his men to act otherwise than they did, —that the third clerk, Hermenegildo Gandix, who before had been forced to live among the seamen, wearing a seaman's habit, and in all respects appearing to be one for the time;

he, Gandix, was killed by a musket-ball fired through a mistake from the American boats before boarding, having in his fright ran up the mizzen-rigging, calling to the boats—"don't board," lest upon their boarding the negroes should kill him, that thus inducing the Americans to believe he some way favoured the cause of the negroes, they fired two balls at him, so that he fell wounded from the rigging, and was drowned in the sea.

—that the young Don Joaquin, Marques de Aiambaolaza, like Hermenegildo Gandix, the third clerk, was degraded to the office and appearance of a common seaman, that upon one occasion, when Don Joaquin shrank, the negro Babo commanded the Ashantee Leche to take fat and heat it, and pour it upon Don Joaquin's hands,

—that Don Joaquin was killed owing to another mistake of the Americans, but one impossible to be avoided, as upon the approach of the boats, Don Joaquin, with a hatchet tied edge out and upright to his hand, was made by the negroes to appear on the bulwarks, whereupon, seen with arms in his hands and in a questionable attitude, he was shot for a renegade seaman, —that on the person of Don Joaquin was found secreted a jewel, which, by papers that were discovered, proved to have been meant for the shrine of our Lady of Mercy in Lima, a votive offering, beforehand prepared and guarded, to attest his gratitude, when he should have landed in Peru, his last destination, for the safe conclusion of his entire voyage from Spain,

—that the jewel, with the other effects of the late Don Joaquin, is in the custody of the brethren of the Hospital de Sacerdotes, awaiting the decision of the honourable court, —that, owing to the condition of the deponent, as well as the haste in which the boats departed for the attack, the Americans were not forewarned that there were, among the apparent crew, a passenger and one of the clerks disguised by the negro Babo, —that, beside the negroes killed in the action, some were killed after the

capture and re-anchoring at night, when shackled to the ring-bolts on deck, that these deaths were committed by the sailors, ere they could be prevented. That so soon as informed of it, Captain Amasa Delano used all his authority, and, in particular with his own hand, struck down Martinez Gola, who, having found a razor in the pocket of an old jacket of his, which one of the shackled negroes had on, was aiming it at the negro's throat, that the noble Captain Amasa Delano also wrenched from the hand of Bartholomew Barlo, a dagger secreted at the time of the massacre of the whites, with which he was in the act of stabbing a shackled negro, who, the same day, with another negro, had thrown him down and jumped upon him. —that, for all the events, befalling through so long a time, during which the ship was in the hands of the negro Babo, he cannot here give account, but that, what he has said is the most substantial of what occurs to him at present, and is the truth under the oath which he has taken, which declaration he affirmed and ratified, after hearing it read to him.

He said that he is twenty-nine years of age, and broken in body and mind, that when finally dismissed by the court, he shall not return home to Chili, but betake himself to the monastery on Mount Agonia without, and signed with his honour, and crossed himself, and, for the time, departed as he came, in his litter, with the monk Infelez, to the Hospital de Sacerdotes

BENITO CERENO

DOCTOR ROZAS

If the deposition of Benito Cereno has served as the key to fit into the lock of the complications which preceded it, then, as a vault whose door has been flung back, the *San Dominick's* hull lies open to-day.

Hitherto the nature of this narrative, besides rendering the intricacies in the beginning unavoidable, has more or less required that many things, instead of being set down in the order of occurrence, should be retrospectively, or irregularly

given, this last is the case with the following passages, which will conclude the account.

During the long, mild voyage to Lima, there was, as before hinted, a period during which Don Benito a little recovered his health, or, at least in some degree, his tranquillity. Ere the decided relapse which came, the two captains had many cordial conversations—their fraternal unreserve in singular contrast with former withdrawals.

Again and again, it was repeated, how hard it had been to enact the part forced on the Spaniard by Babo.

"Ah, my dear Don Amasa," Don Benito once said, "at those very times when you thought me so morose and ungrateful—nay when, as you now admit, you half thought me plotting your murder—at those very times my heart was frozen, I could not look at you, thinking of what, both on board this ship and your own, hung, from other hands, over my kind benefactor. And as God lives, Don Amasa, I know not whether desire for my own safety alone could have nerved me to that leap into your boat, had it not been for the thought that, did you, unenlightened, return to your ship, you, my best friend, with all who might be with you, stolen upon, that night, in your hammocks, would never in this world have wakened again. Do but think how you walked this deck, how you sat in this cabin, every inch of ground mined into honey-combs under you. Had I dropped the least hint, made the least advance toward an understanding between us, death, explosive death—yours as mine—would have ended the scene."

"True, true," cried Captain Delano, starting, "you saved my life, Don Benito, more than I yours, saved it, too, against my knowledge and will."

"Nay, my friend," rejoined the Spaniard, courteous even to the point of religion, "God charmed your life, but you saved mine. To think of some things you did—those smilings and chattings, rash pointings and gesturings. For less than

these, they slew my mate, Raneds, but you had the Prince of Heaven's safe conduct through all ambuscades "

"Yes, all is owing to Providence, I know, but the temper of my mind that morning was more than commonly pleasant, while the sight of so much suffering—more apparent than real—added to my good nature, compassion, and charity, happily interweaving the three Had it been otherwise, doubtless, as you hint, some of my interferences with the blacks might have ended unhappily enough Besides that, those feelings I spoke of enabled me to get the better of momentary distrust, at times when acuteness might have cost me my life, without saving another's Only at the end did my suspicions get the better of me, and you know how wide of the mark they then proved "

"Wide, indeed," said Don Benito, sadly, "you were with me all day, stood with me, sat with me, talked with me, looked at me, ate with me, drank with me, and yet, your last act was to clutch for a villain, not only an innocent man, but the most pitiable of all men To such degree may malign machinations and deceptions impose So far may even the best men err, in judging the conduct of one with the recesses of whose condition he is not acquainted But you were forced to it, and you were in time undeceived Would that, in both respects, it was so ever, and with all men "

"I think I understand you, you generalize, Don Benito, and mournfully enough But the past is passed, why moralize upon it? Forget it See, yon bright sun has forgotten it all, and the blue sea, and the blue sky, these have turned over new leaves "

"Because they have no memory," he dejectedly replied, "because they are not human "

"But these mild trades that now fan your cheek, Don Benito, do they not come with a human-like healing to you? Warm friends, steadfast friends are the trades "

"With then steadfastness they but waft

me to my tomb, Señor," was the foreboding response

"You are saved, Don Benito," cried Captain Delano, more and more astonished and pained, "you are saved, what has cast such a shadow upon you?"

"The negro "

There was silence, while the moody man sat, slowly and unconsciously gathering his mantle about him, as if it were a pall

There was no more conversation that day

But if the Spaniard's melancholy sometimes ended in muteness upon topics like the above, there were others upon which he never spoke at all, on which, indeed, all his old reserves were piled Pass over the worst and, only to elucidate, let an item or two of these be cited The dress so precise and costly, worn by him on the day whose events have been narrated, had not willingly been put on And that silver-mounted sword, apparent symbol of despotic command, was not, indeed, a sword, but the ghost of one The scabbard, artificially stiffened, was empty

As for the black—whose brain, not body, had schemed and led the revolt, with the plot—his slight frame, inadequate to that which it held, had at once yielded to the superior muscular strength of his captor, in the boat Seeing all was over, he uttered no sound, and could not be forced to His aspect seemed to say since I cannot do deeds, I will not speak words Put in irons in the hold, with the rest, he was carried to Lima During the passage Don Benito did not visit him Nor then, nor at any time after, would he look at him Before the tribunal he refused When pressed by the judges he fainted On the testimony of the sailors alone rested the legal identity of Babo And yet the Spaniard would, upon occasion, verbally refer to the negro, as has been shown, but look on him he would not, or could not

Some months after, dragged to the gibbet at the tail of a mule, the black met his voiceless end The body was burned to ashes, but for many days, the head,

that hive of subtlety, fixed on a pole in the Plaza, met, unabashed, the gaze of the whites, and across the Plaza looked toward St Bartholomew's church, in whose vaults slept then, as now, the recovered bones of Aranda, and across the Rimac bridge looked toward the monastery, on Mount Agoma without, where, three months after being dismissed by the court, Benito Cereno, borne on the bier, did, indeed, follow his leader

THE PORTENT
[1866]

Hanging from the beam,
Slowly swaying (such the law),
Gaunt the shadow on your green,
Shenandoah!¹
The cut is on the crown
(Lo, John Brown),
And the stabs shall heal no more

Hidden in the cap
Is the anguish none can draw,
So your future veils its face,
Shenandoah!
But the streaming beard is shown
(Wend John Brown),
The meteor of the war

MALVERN HILL
[1866]

Ye elms that wave on Malvern Hill
In prime of morn and May,
Recall ye how McClellan's men
Here stood at bay?
While deep within yon forest dim 5
Our rigid comrades lay—
Some with the cartridge in their mouth,
Others with fixed aims lifted South—
Invoking so
The cypress glades? Ah wilds of woe! 10

The spires of Richmond, late beheld
Through rifts in musket-haze,

Were closed from view in clouds of dust
On leaf-walled ways,
Where streamed our wagons in
caravan, 15

And the Seven Nights and Days
Of march and fast, retreat and fight,
Pinched our grimed faces to ghastly
plight—

Does the elm wood
Recall the haggard beards of blood? 20

The battle-smoked flag, with stars eclipsed,
We followed (it never fell!)—

In silence husbanded our strength—
Received their yell,
Till on this slope we patient turned 25
With cannon ordered well,
Reverse we proved was not defeat,
But ah, the sod what thousands meet!—
Does Malvern Wood
Bethink itself, and muse and brood? 30

*We elms of Malvern Hill
Remember everything,
But sap the twig will fill
Wag the world how it will,
Leaves must be green in Spring 35*

SHERIDAN AT CEDAR CREEK
[1866]

Shoe the steed with silver
That bore him to the fray,
When he heard the guns at dawning—
Miles away,
When he heard them calling, calling— 5
Mount! nor stay
Quick, or all is lost,
They've surprised and stormed the
post,
They push your routed host—
Gallop! retrieve the day 10

House the horse in emine—
For the foam-flake blew
White through the red October;
He thundered into view;

¹ Charles Town, W Va, where Brown was hanged, is in the Shenandoah Valley

They cheered him in the looming, 15
 Horseman and horse they knew
 The turn of the tide began,
 The rally of bugles ran,
 He swung his hat in the van,
 The electric hoof-spark, flew 20

Wreathed the steed and lead him—
 For the charge he led
 Touched and turned the cypress
 Into amarantths for the head
 Of Philip,² king of riders, 25
 Who raised them from the dead
 The camp (at dawning lost),
 By eve, recovered—forced,
 Rang with laughter of the host
 At belated Early³, fled 30

Shroud the horse in sable—
 For the mounds they heap!
 There is firing in the Valley,
 And yet no strife they keep,
 It is the parting volley,
 It is the pathos deep
 There is glory for the brave
 Who lead, and nobly save,
 But no knowledge in the grave
 Where the nameless followers sleep 40

THE COLLEGE COLONEL [1866]

He rides at their head,
 A crutch by his saddle just slants in
 view,
 One slung arm is in splints, you see,
 Yet he guides his strong steed—how
 coldly too

He brings his regiment home— 5
 Not as they filed two years before,
 But a remnant half-tattered, and battered,
 and worn,
 Like castaway sailors, who—stunned
 by the surf's loud roar,
 Their mates dragged back and seen no
 more— 10
 Again and again breast the surge,
 And at last crawl, spent, to shore

A still rigidity and pale—
 An Indian aloofness lones his brow,
 He has lived a thousand years 15
 Compressed in battle's pains and prayers,
 Marches and watches slow

There are welcoming shouts, and flags,
 Old men off hat to the Boy,
 Wreaths from gay balconies fall at his
 feet, 20
 But to *him*—there comes alloy

It is not that a leg is lost,
 It is not that an arm is maimed,
 It is not that the fever has racked—
 Self he has long disclaimed 25

But all through the Seven Days' Fight,
 And deep in the Wilderness gum,
 And in the field-hospital tent,
 And Petersburg crater, and dim
 Lean brooding in Libby, there came— 30
 Ah heaven!—what *truth* to him

SUPPLEMENT to "BATTLE PIECES" [1866]

WERE I fastidiously anxious for the
 symmetry of this book, it would close
 with the notes. But the times are such
 that patriotism—not free from solicitude—
 urges a claim overriding all literary
 scruples

It is more than a year since the memo-
 rable surrender, but events have not yet
 rounded themselves into completion. Not
 justly can we complain of this. There has
 been an upheaval affecting the basis of
 things, to altered circumstances compli-
 cated adaptations are to be made, there
 are difficulties great and novel. But is
 Reason still waiting for Passion to spend
 itself? We have sung of the soldiers and
 sailors, but who shall hymn the poli-
 ticians?

² Gen Philip Henry Sheridan (1831-
 88), hero of "Sheridan's Ride," Oct 19,
 1864

³ Gen Jubal A Early (1816-94), de-
 feated by Sheridan at Winchester

In view of the infinite desirableness of Re-establishment, and considering that, so far as feeling is concerned, it depends not mainly on the temper in which the South regards the North, but rather conversely, one who never was a blind adherent feels constrained to submit some thoughts, counting on the indulgence of his countrymen.

And, first, it may be said that, if among the feelings and opinions growing immediately out of a great civil convulsion, there are any which time shall modify or do away, they are presumably those of a less temperate and charitable cast.

There seems no reason why patriotism and narrowness should go together, or why intellectual impartiality should be confounded with political trimming, or why serviceable truth should keep cloistered because not partisan. Yet the work of Reconstruction, if admitted to be feasible at all, demands little but common sense and Christian charity. Little but these! These are much.

Some of us are concerned because as yet the South shows no penitence. But what exactly do we mean by this? Since down to the close of the war she never confessed any for braving it, the only penitence now left her is that which springs solely from the sense of discomfiture, and since this evidently would be a contrition hypocritical, it would be unworthy in us to demand it. Certain it is that penitence, in the sense of voluntary humiliation, will never be displayed. Nor does this afford just ground for unreserved condemnation. It is enough, for all practical purposes, if the South have been taught by the terrors of civil war to feel that Secession, like Slavery, is against Destiny, that both now lie buried in one grave, that her fate is linked with ours, and that together we comprise the Nation.

The clouds of heroes who battled for the Union it is needless to eulogize here. But how of the soldiers on the other side? And when of a free community we name the soldiers, we thereby name the people. It was in subserviency to the slave-interest

that Secession was plotted, but it was under the plea, plausibly urged, that certain inestimable rights guaranteed by the Constitution were directly menaced, that the people of the South were cajoled into revolution. Through the arts of the conspirators and the perversity of fortune, the most sensitive love of liberty was entrapped into the support of a war whose implied end was the erecting in our advanced century of an Anglo-American empire based upon the systematic degradation of man.

Spite this clinging reproach, however, signal military virtues and achievements have conferred upon the Confederate arms historic fame, and upon certain of the commanders a renown extending beyond the sea—a renown which we of the North could not suppress, even if we would. In personal character, also, not a few of the military leaders of the South enforce forbearance, the memory of others the North refrains from disparaging, and some, with more or less of reluctance, she can respect. Posterity, sympathizing with our convictions, but removed from our passions, may perhaps go farther here. If George IV could, out of the graceful instinct of a gentleman, raise an honorable monument in the great fane of Christendom over the remains of the enemy of his dynasty, Charles Edward,¹ the invader of England and victor in the rout of Prestonpans—upon whose head the king's ancestor but one reign removed had set a price—is it probable that the grandchildren of General Grant will pursue with rancor, or slur by sour neglect, the memory of Stonewall Jackson?

But the South herself is not wanting in recent histories and biographies which record the deeds of her chieftains—writings freely published at the North by loyal

¹ Charles Edward Stuart (1720-88), called "Bonnie Prince Charlie," leading the Scottish Jacobite uprising against England in the time of George II (1745), defeated the English at the Scottish town of Prestonpans. He was buried in St Peter's at Rome.

houses, widely read here, and with a deep though saddened interest. By students of the war such works are hailed as welcome accessories, and tending to the completeness of the record.

Supposing a happy issue out of present perplexities, then, in the generation next to come, Southerners there will be yielding allegiance to the Union, feeling all their interests bound up in it, and yet cherishing unrebuked that kind of feeling for the memory of the soldiers of the fallen Confederacy that Burns, Scott, and the Ettrick Shepherd² felt for the memory of the gallant clansmen ruined through their fidelity to the Stuarts—a feeling whose passion was tempered by the poetry imbuing it, and which in no wise affected their loyalty to the Georges, and which, it may be added, indirectly contributed excellent things to literature. But, setting this view aside, dishonorable would it be in the South were she willing to abandon to shame the memory of brave men who with signal personal disinterestedness warred in her behalf, though from motives, as we believe, so deplorably astray.

Patriotism is not baseness, neither is it inhumanity. The mourners who this summer bear flowers to the mounds of the Virginian and Georgian dead are, in their domestic bereavement and proud affection, as sacred in the eye of Heaven as are those who go with similar offerings of tender grief and love into the cemeteries of our Northern martyrs. And yet, in one aspect, how needless to point the contrast.

Cherishing such sentiments, it will hardly occasion surprise that, in looking over the battle-pieces in the foregoing collection, I have been tempted to withdraw or modify some of them, fearful lest in presenting, though but dramatically and by way of a poetic record, the passions and epithets of civil war, I might be contributing to a bitterness which every sensible American must wish at an end. So, too, with the emotion of victory as reproduced on some pages, and particularly toward the close. It should not be construed into an exultation

misapplied—an exultation as ungenerous as unwise, and made to minister, however indirectly, to that kind of censoriousness too apt to be produced in certain natures by success after trying reverses. Zeal is not of necessity religion, neither is it always of the same essence with poetry or patriotism.

There are excesses which marked the conflict, most of which are perhaps inseparable from a civil strife so intense and prolonged, and involving warfare in some border countries new and imperfectly civilized. Barbarities also there were, for which the Southern people collectively can hardly be held responsible, though perpetrated by ruffians in their name. But surely other qualities—exalted ones—courage and fortitude matchless, were likewise displayed, and largely, and justly may these be held the characteristic traits, and not the former.

In this view, what Northern writer, however patriotic, but must revolt from acting on paper a part any way akin to that of the live dog to the dead lion, and yet it is right to rejoice for our triumph, so far as it may justly imply an advance for our whole country and for humanity.

Let it be held no reproach to any one that he pleads for reasonable consideration for our late enemies, now stricken down and unavoidably debarred, for the time, from speaking through authorized agencies for themselves. Nothing has been urged here in the foolish hope of conciliating those men—few in number, we trust—who have resolved never to be reconciled to the Union. On such hearts everything is thrown away except it be religious commiseration, and the sincerest. Yet let them call to mind that unhappy Secessionist,³ not a military man, who with impious alacrity

² James Hogg (1770-1835), author who dealt with Scottish legend and history.

³ The reference is to Edmund Ruffin (1794-1865), planter and writer on agricultural subjects, prominent and irreconcilable Secessionist.

fired the first shot of the Civil War at Sumter, and a little more than four years afterward fired the last one into his own heart at Richmond

Noble was the gesture into which patriotic passion surprised the people in a utilitarian time and country, yet the glory of the war falls short of its pathos—a pathos which now at last ought to disarm all animosity

How many and earnest thoughts still rise, and how hard to repress them We feel what past years have been, and years, unretarded years, shall come May we all have moderation, may we all show candor Though, perhaps, nothing could ultimately have averted the strife, and though to treat of human actions is to deal wholly with second causes, nevertheless, let us not cover up or try to extenuate what, humanly speaking, is the truth—namely, that those unfraternal denunciations, continued through years, and which at last inflamed to deeds that ended in bloodshed, were reciprocal, and that, had the preponderating strength and the prospect of its unlimited increase lain on the other side, on ours might have lain those actions which now in our late opponents we stigmatize under the name of Rebellion As frankly let us own—what it would be unbecoming to parade were foreigners concerned—that our triumph was won not more by skill and bravery than by superior resources and crushing numbers, that it was a triumph, too, over a people for years politically misled by designing men, and also by some honestly-erring men, who from their position could not have been otherwise than broadly influential, a people who, though, indeed, they sought to perpetuate the curse of slavery, and even extend it, were not the authors of it, but (less fortunate, not less righteous than we) were the fated inheritors, a people who, having a like origin with ourselves, share essentially in whatever worthy qualities we may possess No one can add to the lasting reproach which hopeless defeat has now

cast upon Secession by withholding the recognition of these verities

Surely we ought to take it to heart that that kind of pacification, based upon principles operating equally all over the land, which lovers of their country yearn for, and which our arms, though signally triumphant, did not bring about, and which lawmaking, however anxious, or energetic, or repressive, never by itself can achieve, may yet be largely aided by generosity of sentiment public and private Some revisionary legislation and adaptive is indispensable, but with this should harmoniously work another kind of prudence, not unallied with entire magnanimity Benevolence and policy—Christianity and Machiavelli—dissuade from penal severities toward the subdued Abstinence here is as obligatory as considerate care for our unfortunate fellow-men late in bonds, and, if observed, would equally prove to be wise forecast The great qualities of the South, those attested in the War, we can perilously alienate, or we may make them nationally available at need

The blacks, in their infant pupilage to freedom, appeal to the sympathies of every humane mind The paternal guardianship which for the interval Government exercises over them was prompted equally by duty and benevolence Yet such kindness should not be allowed to exclude kindness to communities who stand nearer to us in nature For the future of the freed slaves we may well be concerned, but the future of the whole country, involving the future of the blacks, urges a paramount claim upon our anxiety Effective benignity, like the Nile, is not narrow in its bounty, and true policy is always broad To be sure, it is vain to seek to glide, with moulded words, over the difficulties of the situation And for them who are neither partisans, nor enthusiasts, nor theorists, nor cynics, there are some doubts not readily to be solved And there are fears Why is not the cessation of war now at length attended with the settled calm of peace? Wherefore

in a clear sky do we still turn our eyes toward the South as the Neapolitan, months after the eruption, turns his toward Vesuvius? Do we dread lest the repose may be deceptive? In the recent convulsion has the crater but shifted? Let us revere that sacred uncertainty which forever impends over men and nations. Those of us who always abhorred slavery as an atheistical iniquity, gladly we join in the exulting chorus of humanity over its downfall. But we should remember that emancipation was accomplished not by deliberate legislation, only through agonized violence could so mighty a result be effected. In our natural solicitude to confirm the benefit of liberty to the blacks, let us forbear from measures of dubious constitutional rightfulness toward our white countrymen—measures of a nature to provoke, among other of the last evils, exterminating hatred of race toward race. In imagination let us place ourselves in the unprecedented position of the Southerners—their position as regards the millions of ignorant manumitted slaves in their midst, for whom some of us now claim the suffrage. Let us be Christians toward our fellow-whites, as well as philanthropists toward the blacks, our fellow-men. In all things, and toward all, we are enjoined to do as we would be done by. Nor should we forget that benevolent desires, after passing a certain point, can not undertake their own fulfillment without incurring the risk of evils beyond those sought to be remedied. Something may well be left to the graduated care of future legislation, and to heaven. In one point of view the co-existence of the two races in the South—whether the negro be bond or free—seems (even as it did to Abraham Lincoln) a grave evil. Emancipation has ridded the country of the reproach, but not wholly of the calamity. Especially in the present transition period for both races in the South, more or less of trouble may not unreasonably be anticipated, but let us not hereafter be too swift to charge the blame exclusively in any one

quarter. With certain evils men must be more or less patient. Our institutions have a potent digestion, and may in time convert and assimilate to good all elements thrown in, however originally alien.

But, so far as immediate measures looking toward permanent Re-establishment are concerned, no consideration should tempt us to pervert the national victory into oppression for the vanquished. Should plausible promise of eventual good, or a deceptive or spurious sense of duty, lead us to essay this, count we must on serious consequences, not the least of which would be divisions among the Northern adherents of the Union. Assuredly, if any honest Catos⁴ there be who thus far have gone with us, no longer will they do so, but oppose us, and as resolutely as hitherto they have supported. But this path of thought leads toward those waters of bitterness from which one can only turn aside and be silent.

But supposing Re-establishment so far advanced that the Southern seats in Congress are occupied, and by men qualified in accordance with those cardinal principles of representative government which hitherto have prevailed in the land—what then? Why, the Congressmen elected by the people of the South will—represent the people of the South. This may seem a flat conclusion, but, in view of the last five years, may there not be latent significance in it? What will be the temper of those Southern members? And, confronted by them, what will be the mood of our own representatives? In private life true reconciliation seldom follows a violent quarrel, but, if subsequent intercourse be unavoidable, nice observances and mutual are indispensable to the prevention of a new rupture. Amity itself can only be maintained by reciprocal respect, and true friends are punctilious equals. On the floor

⁴ A reference to the honest and uncompromising character of Marcus Porcius Cato (96-46 B C), who stabbed himself rather than surrender to Caesar.

of Congress North and South are to come together after a passionate duel, in which the South, though proving her valor, has been made to bite the dust Upon differences in debate shall acrimonious recriminations be exchanged? Shall censorious superiority assumed by one section provoke defiant self-assertion on the other? Shall Manassas and Chickamauga be retorted for Chattanooga and Richmond?⁵ Under the supposition that the full Congress will be composed of gentlemen, all this is impossible Yet, if otherwise, it needs no prophet of Israel to foretell the end The maintenance of Congressional decency in the future will rest mainly with the North Rightly will more forbearance be required from the North than the South, for the North is victor

But some there are who may deem these latter thoughts inapplicable, and for this reason Since the test-oath operatively excludes from Congress all who in any way participated in Secession, therefore none but Southerners wholly in harmony with the North are eligible to seats This is true for the time being But the oath is alterable, and in the wonted fluctuations of parties not improbably it will undergo alteration, assuming such a form, perhaps, as not to bar the admission into the National Legislature of men who represent the populations lately in revolt Such a result would involve no violation of the principles of democratic government Not readily can one perceive how the political existence of the millions of late Secessionists can permanently be ignored by this Republic The years of the war tried our devotion to the Union, the time of peace may test the sincerity of our faith in democracy

In no spirit of opposition, not by way of challenge, is anything here thrown out These thoughts are sincere ones, they seem natural—inevitable. Here and there they must have suggested themselves to many thoughtful patriots And, if they be just thoughts, ere long they must have that

weight with the public which already they have had with individuals

For that heroic band—those children of the furnace who, in regions like Texas and Tennessee, maintained their fidelity through terrible trials—we of the North felt for them, and profoundly we honor them Yet passionate sympathy, with resentments so close as to be almost domestic in their bitterness, would hardly in the present juncture tend to discreet legislation Were the Unionists and Secessionists but as Guelphs and Ghibellines?⁶ If not, then far be it from a great nation now to act in the spirit that animated a triumphant town-faction in the Middle Ages But crowding thoughts must at last be checked, and, in times like the present, one who desires to be impartially just in the expression of his views, moves as among sword-points presented on every side

Let us pray that the terrible historic tragedy of our time may not have been enacted without instructing our whole beloved country through terror and pity, and may fulfillment verify in the end those expectations which kindle the bards of Progress and Humanity

EPILOGUE from "CLAREL"

[1876]

*If Luther's day expand to Darwin's year,
Shall that exclude the hope — foreclose the
fear?*

Unmoved by all the claims our times avow,
The ancient Sphinx still keeps the porch
of shade,
And comes Despair, whom not her calm
may cow,
And coldly on that adamant brow
Scrawls undeterred his bitter pasquinade

⁵ That is, Confederate for Union victories.

⁶ The struggle between these Italian factions throughout the Middle Ages constitutes much of the history of Italy and neighboring countries for over 500 years

But Faith (who from the scrawl indignant
turns) 6
With blood warm oozing from her wounded
trust,
Inscribes even on her shards of broken
urns
The sign o' the cross—the spirit above the
dust!

Yea, ape and angel, strife and old
debate—
The harps of heaven and dreary gongs of
hell, 10
Science the feud can only aggravate—
No umpire she betwixt the chimes and
knell
The running battle of the star and clod
Shall run forever—if there be no God

Degrees we know, unknown in days be-
fore, 15
The light is greater, hence the shadow
more,
And tantalized and apprehensive Man
Appealing—Wherefore ripen us to pain?
Seems there the spokesman of dumb Na-
ture's train

But through such strange illusions have
they passed 20
Who in life's pilgrimage have baffled
striven—
Even death may prove unequal at the last,
And stoics be astounded into heaven

Then keep thy heart, though yet but
ill-resigned—
Clarel, thy heart, the issues there but
mind, 25
That like the crocus budding through the
snow—
That like a swimmer rising from the
deep—
That like a burning secret which doth go
Even from the bosom that would hoard and
keep,
Emerge thou mayst from the last whelming
sea, 30
And prove that death but routs life into
victory

JOHN MARR
[1888]

Since as in night's deck-watch ye show,
Why, lads, so silent here to me,
Your watchmate of times long ago?

Once, for all the darkling sea,
You your voices raised how clearly, 5
Striking in when tempest sung,
Hoisting up the storm-sail cheerily,
Life is storm—let storm! you rung
Taking things as fated merely,
Child-like though the world ye spanned, 10
Not holding unto life too dearly,
Ye who held your lives in hand—
Skimmers, who on oceans four
Petrels were, and larks ashore

O, not from memory lightly flung, 15
Forgot, like strains no more availing,
The heart to music haughtier strung,
Nay, frequent near me, never staling,
Whose good feeling kept ye young
Like tides that enter creek or stream, 20
Ye come, ye visit me, or seem
Swimming out from seas of faces,
Alien myriads memory traces,
To enfold me in a dream!

I yearn as ye But rafts that strain, 25
Parted, shall they lock again?
Twined we were, entwined, then riven,
Ever to new embracements driven,
Shifting gulf-weed of the main!
And how if one here shift no more, 30
Lodged by the flinging surge ashore?
Not less, as now, in eve's decline,
Your shadowy fellowship is mine
Ye float around me, form and feature —
Tattooings, ear-rings, love-locks curled, 35
Barbarians of man's simpler nature,
Unworldly servers of the world
Yea, present all, and dear to me,
Though shades, or scouring China's sea

Whither, whither, merchant-sailors, 40
Whitherward now in roaring gales?
Competing still, ye huntsman-whalers,

In leviathan's wake what boat prevails?
 And man-of-war's men, whereaway?
 If now no dinned drum beat to quarters 45
 On the wilds of midnight waters—
 Foemen looming through the spray,
 Do yet your gangway lanterns, streaming,
 Vainly strive to pierce below,
 When, tilted from the slant plank gleam-
 ing, 50
 A brother you see to darkness go?

But, gunmates lashed in shotted canvas,
 If where long watch-below ye keep,
 Never the shrill "*All hands up hammocks*,"
 Breaks the spell that charms your sleep, 55
 And summoning trumps might vainly call,
 And booming guns implore—
 A beat, a heart-beat musters all,
 One heart-beat at heart-core
 It musters But to clasp, retain, 60
 To see you at the halyards main—
 To hear your chorus once again!

FAR OFF-SHORE

[1888]

Look, the raft, a signal flying,
 Thin—a shred,
 None upon the lashed spars lying,
 Quick or dead

Cries the sea-fowl, hovering over,
 "Crew, the crew?"
 And the billow, reckless rover,
 Sweeps anew!

TO NED

[1888]

Where is the world we roved, Ned Bunn?
 Hollows thereof lay rich in shade
 By voyagers old inviolate thrown
 Ere Paul Pry cruised with Pelf and
 Trade.
 To us old lads some thoughts come home 5
 Who roamed a world young lads no more
 shall roam

Nor less the satiate year impends
 When, wearying of routine-resorts,

The pleasure-hunter shall break loose,
 Ned, for our Pantheistic ports — 10
 Marquesas and glenned isles that be
 Authentic Edens in a Pagan sea

The charm of scenes untrod shall lure,
 And, Ned, a legend urge the flight—
 The Typee-truants under stars 15
 Unknown to Shakespeare's *Midsummer-*
 Night,

And man, if lost to Saturn's Age,¹
 Yet feeling life no Syrian pilgrimage²

But, tell, shall he, the tourist, find
 Our isles the same in violet-glow 20
 Enamoring us what years and years—
 Ah, Ned, what years and years ago!
 Well, Adam advances, smart in pace,
 But scarce by violets that advance you
 trace

But we, in anchor-watches calm, 25
 The Indian Psyche's languor won,
 And, musing, breathed primeval balm
 From Edens ere yet overrun,
 Marvelling mild if mortal twice,
 Here and hereafter, touch a Paradise 30

THE ENVIABLE ISLES

[1888]

Through storms you reach them and from
 storms are free
 Afar deserted, the foremost drear in hue,
 But, nearer, green, and, on the marge, the
 sea
 Makes thunder low and mist of rain-
 bowed dew

But, inland, where the sleep that folds the
 hills 5
 A dreamer sleep, the trance of God, in-
 stills—
 On uplands hazed, in wandering airs
 aswoon,
 Slow-swaying palms salute love's cypress
 tree

¹ Golden Age

² Desert pilgrimage

Adown in vale where pebbly runlets
 croon
 A song to lull all sorrow and all glee 10
 Sweet-fern and moss in many a glade are
 here,
 Where, strown in flocks, what cheek-
 flushed myriads lie
 Dimpling in dream—unconscious slumber-
 ers mere,
 While billows endless round the beaches
 die

THE RAVAGED VILLA
 [1891]

In shards the sylvan vases lie,
 Their links of dance undone,
 And brambles wither by thy brim,
 Choked fountain of the sun!
 The spider in the laurel spins, 5
 The weed exiles the flower,
 And, flung to kiln, Apollo's bust
 Makes lime for Mammon's tower

MONODY
 [1891]

To have known him, to have loved him
 After liveness long,
 And then to be estranged in life,
 And neither in the wrong,
 And now for death to set his seal— 5
 Ease me, a little ease, my song!

By wintry hills his hermit-mound
 The sheeted snow-drifts drape,
 And houseless there the snow-bird flits
 Beneath the fir-trees' crape 10
 Glazed now with ice the cloistral vine
 That hid the shyest grape

THE ENTHUSIAST
 [1891]

*"Though He slay me yet will I
 trust in Him"*

Shall hearts that beat no base retreat
 In youth's magnanimous years—
 Ignoble hold it, if discreet.

When interest tames to fears,
 Shall spirits that worship light 5
 Perfidious deem its sacred glow,
 Recant, and trudge where worldlings go,
 Conform and own them right?

Shall Time with creeping influence cold
 Unnerve and cow? the heart 10
 Pine for the heartless ones enrolled
 With palterers of the mart?
 Shall faith abjure her skies,
 Or pale probation blench her down
 To shrink from Truth so still, so lone 15
 Mid loud gregarious hes?

Each burning boat in Caesar's rear,
 Flames—No return through me!
 So put the torch to ties though dear,
 If ties but tempters be 20
 Nor cringe if come the night
 Walk through the cloud to meet the pall,
 Though light forsake thee, never fall
 From fealty to light

BILLY BUDD, FORETOPMAN

WHAT BEFELL HIM IN THE YEAR OF
 THE GREAT MUTINY

 "United States"

PREFACE

The year 1797, the year of this narra-
 tive, belongs to a period which, as every
 thinker now feels, involved a crisis for
 Christendom not exceeded in its undeter-
 mined momentousness at the time by any
 other era whereof there is record The

opening proposition made by the Spirit of that Age involved rectification of the Old World's hereditary wrongs. In France, to some extent, this was bloodily effected. But what then? Straightway the Revolution itself became a wrongdoer, one more oppressive than the kings. Under Napoleon it enthroned upstart kings, and initiated that prolonged agony of continual war whose final throe was Waterloo. During those years not the wisest could have foreseen that the outcome of all would be what to some thinkers apparently it has since turned out to be—a political advance along nearly the whole line for Europeans.

Now, as elsewhere hinted, it was something caught from the Revolutionary Spirit that at Spithead¹ emboldened the man-of-war's men to rise against ical abuses, long-standing ones, and afterwards at the Nore² to make inordinate and aggressive demands—successful resistance to which was confirmed only when the ringleaders were hung for an admonitory spectacle to the anchored fleet. Yet in a way analogous to the operation of the Revolution at large—the Great Mutiny, though by Englishmen naturally deemed monstrous at the time, doubtless gave the first latent prompting to most important reforms in the British navy.

CHAPTER I

(An Inside Narrative)

IN THE TIME before steamships, or then more frequently than now, a stroller along the docks of any considerable seaport would occasionally have his attention arrested by a group of bronzed marines, man-of-war's men or merchant-sailors in holiday attire ashore on liberty. In certain instances they would flank, or, like a body-guard, quite surround some superior figure of their own class, moving along with them like Aldebaran among the lesser lights of his constellation. That signal object was the "Handsome Sailor" of the less prosaic time, alike of the military and merchant

navies. With no perceptible trace of the vanaglorious about him, rather with the off-hand unaffectedness of natural regality, he seemed to accept the spontaneous homage of his shipmates. A somewhat remarkable instance recurs to me. In Liverpool, now half a century ago I saw under the shadow of the great dingy street-wall of Prince's Dock (an obstruction long since removed) a common sailor, so intensely black that he must needs have been a native African of the unadulterated blood of Ham. A symmetric figure, much above the average in height. The two ends of a gay silk handkerchief thrown loose about the neck danced upon the displayed ebony of his chest, in his ears were big hoops of gold, and a Scotch Highland bonnet with a tartan band set off his shapely head.

It was a hot noon in July, and his face, lustrous with perspiration, beamed with barbaric good-humour. In jovial sallies right and left, his white teeth flashing into view, he lollicked along, the centre of a company of his shipmates. These were made up of such an assortment of tribes and complexions as would have well fitted them to be marched up by Anacharsis Cloots³ before the bar of the first French Assembly as Representatives of the Human Race. At each spontaneous tribute rendered by the wayfarers to this black pagod of a fellow—the tribute of a pause and stare, and less frequent an exclamation—the motley retinue showed that they took that sort of pride in the evoker of it which the Assyrian priests doubtless showed for their grand sculptured Bull when the faithful prostrated themselves. To return—

If in some cases a bit of a nautical

¹ Roadstead in the English Channel between Portsmouth and the Isle of Wight.

² Sandbank at the mouth of the Thames, scene of the famous mutiny of 1797.

³ Jean Baptiste du Val, Baron von Cloots (1755-94), for his "Declaration of the Rights of Man" before the French Assembly called "the orator of the human race."

Murat⁴ in setting forth his person ashore, the Handsome Sailor of the period in question evinced nothing of the dandified Billy-be-Damn—an amusing character all but extinct now, but occasionally to be encountered, and in a form yet more amusing than the original, at the tiller of the boats on the tempestuous Erie Canal or, more likely, vapouring in the groggeries along the towpath. Invariably a proficient in his perilous calling, he was also more or less of a mighty boxer or wrestler. It was strength and beauty. Tales of his prowess were recited. Ashore he was the champion, afloat the spokesman, on every suitable occasion always foremost. Close-reefing topsails in a gale, there he was—astride the weather yard-arm-end, foot in “stirrups,” both hands tugging at the “ear-ring” as at a bridle, in very much the attitude of the young Alexander curbing the fiery Bucephalus. A superb figure, tossed up as by the horns of Taurus against the thunderous sky, cheerily hallooing to the strenuous file along the spar.

The moral nature was seldom out of keeping with the physical make. Indeed, except as toned by the former, the comeliness and power, always attractive in masculine perfection, hardly could have drawn the sort of homage the Handsome Sailor, in some examples, received from his less gifted associates.

Such a cynosure, at least in aspect, and something such too in nature, though with important variations made apparent as the story proceeds, was welkin-eyed Billy Budd, or Baby Budd—as more familiarly, under circumstances hereafter to be given, he at last came to be called—aged twenty-one, a foretopman of the fleet towards the close of the last decade of the eighteenth century. It was not very long prior to the time of the narration that follows, that he had entered the King’s Service, having been impressed on the Narrow Seas from a homeward-bound English merchantman into a seventy-four outward-bound, H.M.S. *Indomitable*, which ship, as was not unusual in those hurried days, had been

obliged to put to sea short of her proper complement of men. Plump upon Billy at first sight in the gangway the boarding officer, Lieutenant Ratcliffe, pounced, even before the merchantman’s crew formally was mustered on the quarter-deck for his deliberate inspection. And him only he elected. For whether it was because the other men when ranged before him showed to ill advantage after Billy, or whether he had some scruples in view of the merchantman being rather short-handed, however it might be, the officer contented himself with his first spontaneous choice. To the surprise of the ship’s company, though much to the Lieutenant’s satisfaction, Billy made no demur. But indeed any demur would have been as idle as the protest of a goldfinch popped into a cage.

Noting this uncomplaining acquiescence, all but cheerful one might say, the shipmates turned a surprised glance of silent reproach at the sailor. The shipmaster was one of those worthy mortals found in every vocation,—even the humbler ones,—the sort of person whom everybody agrees in calling “a respectable man.” And—nor so strange to report as it may appear to be—though a ploughman of the troubled waters, life-long contending with the intractable elements, there was nothing this honest soul at heart loved better than simple peace and quiet. For the rest, he was fifty or thereabouts, a little inclined to corpulence, a prepossessing face, unwhiskered, and of an agreeable colour—a rather full face, humanely intelligent in expression. On a fair day with a fair wind and all going well, a certain musical chime in his voice seemed to be the veritable unobstructed outcome of the innermost man. He had much prudence, much conscientiousness, and there were occasions when these virtues were the cause of overmuch disquietude in him. On a passage, so long as his craft was in any proximity to land, there was no sleep for Captain Graveling.

⁴ Joachim Murat (1767-1815), one of Napoleon’s leading generals, later king of Naples.

He took to heart those serious responsibilities not so heavily borne by some ship-masters.

Now, while Billy Budd was down in the fore-castle, getting his kit together, the *Indomitable's* Lieutenant—burly and bluff, nowise disconcerted by Captain Graveling's omitting to proffer the customary hospitalities on an occasion so unwelcome to him, an omission simply caused by preoccupation of thought—unceremoniously invited himself into the cabin, and also to a flask from the spirit locker, a receptacle which his experienced eye instantly discovered. In fact, he was one of those sea-dogs in whom all the hardship and peril of naval life in the great prolonged wars of his time never impaired the natural instinct for sensuous enjoyment. His duty he always faithfully did, but duty is sometimes a dry obligation, and he was for irrigating its aridity whensoever possible with a fertilizing decoction of strong waters. For the cabin's proprietor there was nothing left but to play the part of the enforced host with whatever grace and alacrity were practicable. As necessary adjuncts to the flask he silently placed tumbler and water-jug before the irrepressible guest. But excusing himself from partaking just then, he dismally watched the unembarrassed officer deliberately diluting his grog a little, then tossing it off in three swallows, pushing the empty tumbler away, yet not so far as to be beyond easy reach, at the same time settling himself in his seat and smacking his lips with high satisfaction, looking straight at the host.

These proceedings over, the Master broke the silence, and there lurked a rueful reproach in the tone of his voice. "Lieutenant, you are going to take my best man from me, the jewel of 'em."

"Yes, I know," rejoined the other, immediately drawing back the tumbler preliminary to a replenishing. "Yes, I know. Sorry."

"Beg pardon, but you don't understand, Lieutenant. See here now. Before I shipped that young fellow, my fore-castle was a rat-

put of quarrels. It was black times, I tell you, aboard the '*Rights*' here. I was worried to that degree my pipe had no comfort for me. But Billy came, and it was like a Catholic priest striking peace in an Irish shindy. Not that he preached to them or said or did anything in particular, but a virtue went out of him, sugaring the sour ones. They took to him like hornets to treacle, all but the bluffer of the gang, the big shaggy chap with the fire-red whiskers. He, indeed, out of envy perhaps of the newcomer, and thinking such a "sweet and pleasant fellow," as he mockingly designated him to the others, could hardly have the spirit of a game-cock, must needs bestir himself in trying to get up an ugly row with him. Billy forbore with him and reasoned with him in a pleasant way—he is something like myself, Lieutenant, to whom ought like a quarrel is hateful—but nothing served. So, in the second dog-watch one day the Red-Whiskers, in the presence of the others, under pretence of showing Billy just whence a sirloin steak was cut—for the fellow had once been a butcher—insultingly gave him a dig under the ribs. Quick as lightning Billy let fly his arm. I dare say he never meant to do quite as much as he did, but anyhow he gave the burly fool a terrible drubbing. It took about half a minute, I should think. And, Lord bless you, the lubber was astonished at the celerity. And will you believe it, Lieutenant, the Red-Whiskers now really loves Billy—loves him, or is the biggest hypocrite that ever I heard of. But they all love him. Some of 'em do his washing, darn old trousers for him, the carpenter is at odd times making a pretty little chest of drawers for him. Anybody will do anything for Billy Budd, and it's the happy family here. Now, Lieutenant, if that young fellow goes—I know how it will be aboard the '*Rights*'. Not again very soon shall I, coming up from dinner, lean over the capstan smoking a quiet pipe—no, not very soon again, I think. Ay, Lieutenant, you are going to take away the jewel of 'em, you are going

to take away my peacemaker" And with that the good soul had really some ado in checking a rising sob

"Well," answered the Lieutenant, who had listened with amused interest to all this, and now waxing merry with his tittle, "Well, blessed are the peacemakers, especially the fighting peacemakers! And such are the seventy-four beauties, some of which you see poking their noses out of the portholes of yonder warship lying-to there for me," pointing through the cabin window at the *Indomitable* "But courage! don't look so down-hearted, man Why, I pledge you in advance the royal approbation Rest assured that His Majesty will be delighted to know that in a time when his hard-tack is not sought for by sailors with such avidity as should be, a time also when some shipmasters privily resent the borrowing from them of a tar or two for the service, His Majesty, I say, will be delighted to learn that *one* shipmaster, at least, cheerfully surrenders to the King the flower of his flock a sailor who with equal loyalty makes no dissent—But where's my beauty? Ah," looking through the cabin's open door "Here he comes, and, by jove—lugging along his chest—Apollo with his portmanteau! My man," stepping out to him, "you can't take that big box on board a warship The boxes there are mostly shot-boxes Put up your duds in a bag, lad Boot and saddle for the cavalryman, bag and hammock for the man-of-war's man"

The transfer from chest to bag was made And, after seeing his man into the cutter, and then following him down, the Lieutenant pushed off from the *Rights-of-Man* That was the merchant ship's name, though by her master and crew abbreviated in sailor fashion into the "*Rights*" The hard-headed Dundee owner was a staunch admirer of Thomas Paine, whose book in rejoinder to Burke's arraignment of the French Revolution had then been published for some time and had gone everywhere In christening his vessel after the title of Paine's volume,⁵ the man of Dundee was

something like his contemporary ship-owner, Stephen Girard of Philadelphia, whose sympathies alike with his native land and its liberal philosophies he evinced by naming his ships after Voltaire, Diderot, and so forth

But now, when the boat swept under the merchantman's stern, and officer and oarsmen were noting,—some bitterly and others with a grin,—the name emblazoned there, just then it was that the new recruit jumped up from the bow where the coxswain had directed him to sit, waving his hat to his silent shipmates sorrowfully looking over at him from the taffrail, and bade the lads a genial good-bye Then making a salutation as to the ship herself, "And good-bye to you too, old *Rights-of-Man*!"

"Down, Sir," roared the Lieutenant, instantly assuming all the rigour of his rank, though with difficulty repressing a smile

To be sure, Billy's action was a terrible breach of naval decorum But in that decorum he had never been instructed, in consideration of which the Lieutenant would hardly have been so energetic in reproof but for the concluding farewell to the ship This he rather took as meant to convey a covert sally on the new recruit's part—a sly slur at impressment in general, and that of himself in especial And yet, more likely, if satire it was in effect, it was hardly so by intention, for Billy (though happily endowed with the gaiety of high health, youth and a free heart) was yet by no means of a satirical turn The will to it and the sinister dexterity were alike wanting To deal in double meaning and insinuations of any sort was quite foreign to his nature

As to his enforced enlistment—that he seemed to take pretty much as he was wont to take any vicissitude of weather Like the animals, though no philosopher, he was, without knowing it, practically a fatalist And, it may be, that he rather liked this adventurous turn in his affairs which

⁵ See pp 300-301, *supra*

promised an opening into novel scenes and martial excitements

Aboard the *Indomitable* our merchant-sailor was forthwith rated as an able seaman, and assigned to the starboard watch of the foretop. He was soon at home in the service, not at all disliked for his unpretentious good looks and his rather genial happy-go-lucky air. No merrier man in his mess, in marked contrast to certain other individuals included like himself among the impressed portions of the ship's company, for these when not actively employed were sometimes—and more particularly in the last dog-watch, when the drawing near of twilight induced reverie—apt to fall into a saddy mood which in some partook of sullenness. But they were not so young as our foretopman, and no few of them must have known a hearth of some sort, others may have had wives and children left, too probably, in uncertain circumstances, and hardly any but must have acknowledged kith and kin, while for Billy, as will shortly be seen, his entire family was practically invested in himself.

CHAPTER II

Though our new-made foretopman was well received in the top and on the gun-decks, hardly here was he that cynosure he had previously been among those minor ship's companies of the merchant marine, with which companies only had he hitherto consorted.

He was young, and despite his all but fully developed frame, in aspect looked even younger than he really was. This was owing to a lingering adolescent expression in the as yet smooth face, all but feminine in purity of natural complexion, but where, thanks to his seagoing, the lily was quite suppressed and the rose had some ado visibly to flush through the tan.

To one essentially such a novice in the complexities of factitious life, the abrupt transition from his former and simpler sphere to the ampler and more knowing world of a great war-ship—this might well

have abashed him had there been any conceit or vanity in his composition. Among her miscellaneous multitude, the *Indomitable* mustered several individuals who, however inferior in grade, were of no common natural stamp. Sailors more signally susceptible of that air which continuous martial discipline and repeated presence in battle can in some degree impart even to the average man. As the "Handsome Sailor" Billy Budd's position aboard the seventy-four was something analogous to that of a rustic beauty transplanted from the provinces and brought into competition with the high-born dames of the court. But this change of circumstances he scarcely noted. As little did he observe that something about him provoked an ambiguous smile in one or two harder faces among the blue-jackets. Nor less unaware was he of the peculiar favourable effect his person and demeanour had upon the more intelligent gentlemen of the quarter-deck. Nor could this well have been otherwise. Cast in a mould peculiar to the finest physical examples of those Englishmen in whom the Saxon strain would seem not at all to partake of any Norman or other admixture, he showed in face that humane look of reposeful good nature which the Greek sculptor in some instances gave to his heroic strong man, Hercules. But this again was subtly modified by another and pervasive quality. The ear, small and shapely, the arch of the foot, the curve in mouth and nostril, even the indurated hand dyed to the orange-tawny of the toucan's bill, a hand telling of the halyards and tar-buckets, but, above all, something in the mobile expression, and every chance attitude and movement, something suggestive of a mother eminently favoured by Love and the Graces, all this strangely indicated a lineage in direct contradiction to his lot. The mysteriousness here became less mysterious through a matter of fact elicited when Billy at the capstan was being formally mustered into the service. Asked by the officer, a small, brisk little gentleman as it chanced, among other questions, his

place of birth, he replied, "Please, Sir, I don't know."

"Don't know where you were born? Who was your father?"

"God knows, Sir."

Struck by the straightforward simplicity of these replies, the officer next asked, "Do you know anything about your beginning?"

"No, Sir. But I have heard that I was found in a pretty silk-lined basket hanging one morning from the knocker of a good man's door in Bristol."

"'Found,' say you? Well," throwing back his head and looking up and down the new recruit, "well, it turns out to have been a pretty good find. Hope they'll find some more like you, my man, the fleet sadly needs them."

Yes, Billy Budd was a foundling, a presumable by-blow, and, evidently, no ignoble one. Noble descent was as evident in him as in a blood horse.

For the rest, with little or no sharpness of faculty or any trace of the wisdom of the serpent, nor yet quite a dove, he possessed that kind and degree of intelligence which goes along with the unconventional rectitude of a sound human creature—one to whom not as yet had been proffered the questionable apple of knowledge. He was illiterate. He could not read, but he could sing, and like the illiterate nightingale was sometimes the composer of his own song.

Of self-consciousness he seemed to have little or none, or about as much as we may reasonably impute to a dog of St. Bernard's breed.

Habitually being with the elements, and knowing little more of the land than as a beach, or, rather, that portion of the terraqueous globe, providentially set apart for dance-houses, doxies and tapsters, in short what sailors call a "fiddlers' green," his simple nature remained unsophisticated by those moral obliquities which are not in every case incomparable with that manufactory thing known as respectability. But are sailors, frequenters of fiddlers' greens, without vices? No, but less often

than with landsmen do their vices, so called, partake of crookedness of heart, seeming less to proceed from viciousness than from exuberance of vitality after long restraint, frank manifestations in accordance with natural law. By his original constitution aided by the cooperating influences of his lot, Billy in many respects was little more than a sort of upright barbarian, much such perhaps as Adam presumably might have been ere the urbane Serpent wiggled himself into his company.

And here be it submitted that, apparently going to corroborate the doctrine of man's fall—a doctrine now popularly ignored—it is observable that where certain virtues pristine and unadulterate peculiarly characterize anybody in the external uniform of civilization, they will upon scrutiny seem not to be derived from custom or convention but rather to be out of keeping with these, as if indeed exceptionally transmitted from a period prior to Cain's City and civilized man. The character marked by such qualities has to an unvitiated taste an untampered-with flavour like that of berries, while the man thoroughly civilized, even in a fair specimen of the breed, has to the same moral palate a questionable smack as of a compounded wine. To any stray inheritor of these primitive qualities found, like Caspar Hauser,⁶ wandering dazed in any Christian capital of our time, the poet's famous invocation, near two thousand years ago, of the good rustic out of his latitude in the Rome of the Cæsars, still appropriately holds —

*"Faithful in word and thought,
What has Thee, Fabian, to the city
brought?"*⁷

Though our Handsome Sailor had as

⁶ A youth found in Nuremberg in 1828, dressed as a peasant but seemingly wholly unaccustomed to human society. He was befriended by Earl Stanhope, and later mysteriously assassinated. His story is the subject of a novel by the German writer, Jakob Wassermann, and of other works.

⁷ Martial, bk. IV, 5.

much of masculine beauty as one can expect anywhere to see, nevertheless, like the beautiful woman in one of Hawthorne's minor tales,⁸ there was just one thing amiss in him. No visible blemish, indeed, as with the lady, no, but an occasional liability to a vocal defect. Though in the hour of elemental uproar or peril, he was everything that a sailor should be, yet under sudden provocation of strong heart-feeling his voice, otherwise singularly musical, as if expressive of the harmony within, was apt to develop an organic hesitancy,—in fact more or less of a stutter or even worse. In this particular Billy was a striking instance that the arch interpreter, the envious marplot of Eden, still has more or less to do with every human consignment to this planet of earth. In every case, one way or another, he is sure to slip in his little card, as much as to remind us—I too have a hand here.

The avowal of such an imperfection in the Handsome Sailor should be evidence not alone that he is not presented as a conventional hero, but also that the story in which he is the main figure is no romance.

CHAPTER III

At the time of Billy Budd's arbitrary enlistment into the *Indomitable* that ship was on her way to join the Mediterranean fleet. No long time elapsed before the junction was effected. As one of that fleet the seventy-four participated in its movements though at times on account of her superior sailing qualities, in the absence of frigates, despatched on separate duty as a scout—and at times on less temporary service. But with all this the story has little concernment, restricted as it is to the inner life of one particular ship and the career of an individual sailor.

It was the summer of 1797. In April of that year had occurred the commotion at Spithead followed in May by a second and yet more serious outbreak in the fleet at the Nore. The latter is known, and without

exaggeration in the epithet, as the Great Mutiny. It was indeed a demonstration more menacing to England than the contemporary manifestoes and conquering and proselyting armies of the French Directory.

To the Empire, the Nore Mutiny was what a strike in the fire-brigade would be to London threatened by general arson. In a crisis when the Kingdom might well have anticipated the famous signal that some years later published along the naval line of battle what it was that upon occasion England expected of Englishmen, *that* was the time when at the mast-heads of the three-deckers and seventy-fours moored in our own roadstead—a fleet, the right arm of a Power then all but the sole free conservative one of the Old World, the blue-jackets, to be numbered by thousands, ran up with huzzas the British colours with the union and cross wiped out, by that cancellation transmuting the flag of founded law and freedom defined, into the enemy's red meteor of unbridled and unbounded revolt. Reasonable discontent growing out of practical grievances in the fleet had been ignited into irrational combustion as by live cinders blown across the Channel from France in flames.

The event converted into irony for a time those spirited strains of Dibdin⁹—as a song-writer no mean auxiliary to the English Government—at this European conjuncture, strains celebrating, among other things, the patriotic devotion of the British tar.

"And as for my life, 'tis the King's!"

Such an episode in the Island's grand naval story her naval historians naturally abridge, one of them (G. P. R. James¹⁰) candidly acknowledging that fair would

⁸ "The Birthmark."

⁹ Charles Dibdin (1745-1814), writer of plays and sea-songs.

¹⁰ Historical novelist and historian (1799-1860).

he pass it over did not "impartiality forbid fastidiousness" And yet his mention is less a narration than a reference, having to do hardly at all with details Nor are these readily to be found in the libraries Like some other events in every age befalling states everywhere, including America, the Great Mutiny was of such character that national pride along with views of policy would fain shade it off into the historical background Such events cannot be ignored, but there is a considerate way of historically treating them If a well-constituted individual refrains from blazoning aught amiss or calamitous in his family, a nation in the like circumstance may without reproach be equally discreet

Though after parleyings between Government and the ring-leaders, and concessions by the former as to some glaring abuses, the first uprising—that at Spithead—with difficulty was put down, or matters for a time pacified, yet at the Nore the unforeseen renewal of insurrection on a yet larger scale, and emphasized in the conferences that ensued by demands deemed by the authorities not only inadmissible but aggressively insolent, indicated, if the red flag did not sufficiently do so, what was the spirit animating the men Final suppression, however, there was, but only made possible perhaps by the unswerving loyalty of the marine corps, and a voluntary resumption of loyalty among influential sections of the crews To some extent the Nore Mutiny may be regarded as analogous to the distempering *eruption* of contagious fever in a frame constitutionally sound, and which anon throws it off

At all events, of these thousands of mutineers were some of the tars who not so very long afterwards—whether wholly prompted thereto by patriotism, or pugnacious instinct, or by both,—helped to win a coronet for Nelson at the Nile,¹¹ and the naval crown of crowns for him at Trafalgar To the mutineers those battles, and especially Trafalgar, were a plenary absolution, and a grand one, for all that goes to make up scenic naval display is heroic

magnificence in arms Those battles, especially Trafalgar, stand unmatched in human annals

CHAPTER IV

Concerning

"The greatest sailor since the world began"

—TENNYSON

In this matter of writing, resolve as one may to keep to the main road, some by-paths have an enticement not readily to be withstood Beckoned by the genius of Nelson, I am going to err into such a by-path If the reader will keep me company I shall be glad At the least we can promise ourselves that pleasure which is wickedly said to be in sinning, for a literary sin the divergence will be

Very likely it is no new remark that the inventions of our time have at last brought about a change in sea warfare in degree corresponding to the revolution in all warfare effected by the original introduction from China into Europe of gunpowder The first European firearm, a clumsy contrivance, was, as is well known, scouted by no few of the knights as a base implement, good enough peradventure for weavers too craven to stand up crossing steel with steel in frank fight But as ashore knightly valour, though shorn of its blazonry, did not cease with the knights, neither on the seas, though nowadays in encounters there a certain kind of displayed gallantry be fallen out of date as hardly applicable under changed circumstances, did the nobler qualities of such naval magnates as Don John of Austria, Donna, Van Tromp, Jean Bart, the long line of British admirals and the American Decatur of 1812 be-

¹¹ Horatio Nelson (1758-1805), leading British naval hero He defeated the French fleet at Aboukir Bay, Aug 1798, and was for that feat created Baron Nelson of the Nile, but his greatest victory was that over the allied fleets of France and Spain off Trafalgar in 1805, in which he was wounded and died on his own quarter-deck

come obsolete with their wooden walls¹²

Nevertheless, to anybody who can hold the Present at its worth without being inappreciative of the Past, it may be forgiven, if to such an one the solitary old hulk at Portsmouth, Nelson's *Victory*, seems to float there, not alone as the decaying monument of a fame incorruptible, but also as a poetic reproach, softened by its picturesqueness, to the *Monitors* and yet mightier hulls of the European mounds. And this not altogether because such craft are unsightly, unavoidably lacking the symmetry and grand lines of the old battle-ships, but equally for other reasons.

There are some, perhaps, who while not altogether inaccessible to that poetic reproach just alluded to, may yet on behalf of the new order be disposed to parry it, and this to the extent of iconoclasm, if need be. For example, prompted by the sight of the star inserted in the *Victory's* deck designating the spot where the Great Sailor fell, these martial utilitarians may suggest considerations implying that Nelson's ornate publication of his person in battle was not only unnecessary, but not military, nay, savoured of foolhardiness and vanity. They may add, too, that at Trafalgar it was in effect nothing less than a challenge to death and death came, and that but for his bravado the victorious admiral might possibly have survived the battle, and so, instead of having his sagacious dying injunction overruled by his immediate successor in command, he himself when the contest was decided might have brought his shattered fleet to anchor, a proceeding which might have averted the deplorable loss of life by shipwreck in the elemental tempest that followed the martial one.

Well, should we set aside the more disputable point whether for various reasons it was possible to anchor the fleet, then plausibly enough the Benthamites¹³ of war may urge the above.

But it might have been is but boggy ground to build on. And certainly in foresight as to the larger issue of an encounter,

and anxious preparation for it—buoying the deadly way and mapping it out, as at Copenhagen¹⁴—few commanders have been so painstakingly circumspect as this reckless declarer of his person in fight.

Personal prudence, even when dictated by quite other than selfish considerations, is surely no special virtue in a military man, while an excessive love of glory, exercising to the uttermost a heartfelt sense of duty, is the first. If the name of *Wellington* is not so much a trumpet to the blood as the simpler name of *Nelson*, the reason for this may be inferred from the above. Alfred in his funeral ode on the victor of Waterloo ventures not to call him the greatest soldier of all time, though in the same ode he invokes Nelson as "the greatest sailor since the world began"¹⁵.

At Trafalgar, Nelson, on the brink of opening the fight, sat down and wrote his last brief will and testament. If under the presentiment of the most magnificent of all victories, to be crowned by his own glorious death, a sort of priestly motive led him to dress his person in the jewelled vouchers of his own shining deeds, if thus

¹² John of Austria (1547-78), statesman and naval commander, Andrea Doria (1468?-1560), Genoese admiral, Maarten H. Tromp, (1597-1653), Dutch admiral, Jean Bart (1651?-1702), French admiral and naval hero, Stephen Decatur (1779-1820), American naval commander in the wars with the Algerine pirates and the War of 1812.

¹³ Followers of Jeremy Bentham (1748-1832), famous British jurist and philosopher, chief advocate of utilitarianism.

¹⁴ Reference to the naval battle of Copenhagen, 1801, in which Nelson was second in command to Sir Hyde Parker.

¹⁵ Melville is inaccurate in this reference to Alfred Tennyson's "Ode on the Death of the Duke of Wellington." Tennyson wrote

Mighty Seaman, this is he
Was great by land as thou by sea
Thine island loves thee well, thou famous
man,
The greatest sailor since our world began
Now, to the roll of muffled drums,
To thee the greatest soldier comes, .

to have adorned himself for the altar and the sacrifice were indeed vanguard, then affectation and fustian is each truly heroic line in the great epics and dramas, since in such lines the poet but embodies in verse those exaltations of sentiment that a nature like Nelson, the opportunity being given, vitalizes into acts

CHAPTER V

The outbreak at the Nore was put down. But not every grievance was redressed. If the contractors, for example, were no longer permitted to ply some practices peculiar to their trade everywhere, such as providing shoddy cloth, rations not sound, or false in the measure, not the less impression, for one thing, went on. By custom sanctioned for centuries, and judicially maintained by a Lord Chancellor as late as Mansfield,¹⁶ that mode of manning the fleet, a mode now fallen into a sort of abeyance but never formally renounced, it was not practicable to give up in those years. Its abrogation would have crippled the indispensable fleet, one wholly under canvas, no steam-power, its innumerable sails and thousands of cannon, everything, in short, worked by muscle alone, a fleet the more insatiable in demand for men, because then multiplying its ships of all grades against contingencies present and to come of the convulsed Continent.

Discontent foreran the Two Mutinies, and more or less it lurkily survived them. Hence it was not unreasonable to apprehend some return of trouble, sporadic or general. One instance of such apprehensions. In the same year with this story, Nelson, then Vice-Admiral Sir Horatio, being with the fleet off the Spanish coast, was directed by the Admiral in command to shift his pennant from the *Captain* to the *Theseus*, and for this reason that the latter ship having newly arrived in the station from home where it had taken part in the Great Mutiny, danger was apprehended from the temper of the men, and it was thought that an officer like Nelson was

the one, not indeed to terrorize the crew into base subjection, but to win them by force of his mere presence back to an allegiance, if not as enthusiastic as his own, yet as true. So it was that for a time on more than one quarter-deck anxiety did exist. At sea precautionary vigilance was strained against relapse. At short notice an engagement might come on. When it did, the lieutenants assigned to batteries felt it incumbent on them in some instances to stand with drawn swords behind the men working the guns.

But on board the seventy-four in which Billy now swung his hammock, very little in the manner of the men and nothing obvious in the demeanour of the officers would have suggested to an ordinary observer that the Great Mutiny was a recent event. In their general bearing and conduct the commissioned officers of a warship naturally take their tone from the commander, that is if he has that ascendancy of character that ought to be his.

Captain the Honourable Edward Fairfax Vere, to give his full title, was a bachelor of forty or thereabouts, a sailor of distinction, even in a time prolific of renowned seamen. Though allied to the higher nobility, his advancement had not been altogether owing to influences connected with that circumstance. He had seen much service, been in various engagements, always acquitting himself as an officer mindful of the welfare of his men, but never tolerating an infraction of discipline, thoroughly versed in the science of his profession, and intrepid to the verge of temerity, though never injudiciously so. For his gallantry in the West Indian waters as flag-lieutenant under Rodney¹⁷ in that Admiral's crowning victory, over De Grasse, he was made a post-captain.

¹⁶ William Murray, Earl of Mansfield (1705-1793)

¹⁷ George Brydges Rodney (1719-1792), defeated the combined French and Spanish squadrons under the French admiral De Grasse off Martinique.

Ashore in the garb of a civilian, scarce any one would have taken him for a sailor, more especially that he never garnished unprofessional talk with nautical terms, and grave in his bearing, evinced little appreciation of mere humour. It was not out of keeping with these traits that on a passage when nothing demanded his paramount action, he was the most undemonstrative of men. Any landsman observing this gentleman not conspicuous by his stature and wearing no pronounced insignia, emerging from his retreat to the open deck, and noting the silent deference of the officers retiring to leeward, might have taken him for the King's guest, a civilian aboard the King's ship, some highly honourable discreet envoy on his way to an important post. But, in fact, this unobtrusiveness of demeanour may have proceeded from a certain unaffected modesty of manhood sometimes accompanying a resolute nature, a modesty evinced at all times not calling for pronounced action, and which shown in any rank of life suggests a virtue aristocratic in kind.

As with some others engaged in various departments of the world's more heroic activities, Captain Vere, though practical enough upon occasion, would at times betray a certain dreaminess of mood. Standing alone on the weather-side of the greater deck, one hand holding by the rigging, he would absently gaze off at the black sea. At the presentation to him then of some minor matter interrupting the current of his thoughts, he would show more or less irascibility, but instantly he would control it.

In the navy he was popularly known by the appellation—Starry Vere. How such a designation happened to fall upon one who, whatever his sturdy qualities, was without any brilliant ones, was in this wise a favourite kinsman, Lord Denton, a free-handed fellow, had been the first to meet and congratulate him upon his return to England from the West Indian cruise, and but the day previous turning over a copy of Andrew Marvell's¹⁸ poems

had lighted, not for the first time, however, upon the lines entitled "Appleton House," the name of one of the seats of their common ancestor, a hero in the German wars of the seventeenth century, in which poem occur the lines,

*"This 'tis to have been from the first
In a domestic heaven nursed,
Under the discipline severe
Of Fairfax and the starry Vere"*

And so, upon embracing his cousin fresh from Rodney's victory, wherein he had played so gallant a part, brimming over with just family pride in the sailor of their house, he exuberantly exclaimed, "Give ye joy, Ed, give ye joy, my starry Vere!" This got currency, and the novel prefix serving in familiar parlance readily to distinguish the *Indomitable's* Captain from another Vere, his senior, a distant relative, an officer of like rank in the navy, it remained permanently attached to the surname.

CHAPTER VI

In view of the part that the commander of the *Indomitable* plays in scenes shortly to follow, it may be well to fill out that sketch of him outlined in the previous chapter. Aside from his qualities as a sea-officer Captain Vere was an exceptional character. Unlike no few of England's renowned sailors, long and arduous service with signal devotion to it, had not resulted in absorbing and *salt*ing the entire man. He had a marked leaning towards everything intellectual. He loved books, never going to sea without a newly replenished library, compact but of the best. The isolated leisure, in some cases so wearisome, falling at intervals to commanders even during a war-cruise, never was tedious to Captain Vere. With nothing of that literary taste which less heeds the

¹⁸ British poet, 1621-1678

thing conveyed than the vehicle, his bias was towards those books to which every serious mind of superior order occupying any active post of authority in the world, naturally inclines, books treating of actual men and events, no matter of what era—history, biography and unconventional writers, who, free from cant and convention, like Montaigne, honestly, and in the spirit of common sense, philosophize upon realities

In this love of reading he found confirmation of his own more reserved thoughts—confirmation which he had vainly sought in social converse, so that as touching most fundamental topics, there had got to be established in him some positive convictions which he forefelt would abide in him essentially unmodified so long as his intelligent part remained unimpaired. In view of the humbled position in which his lot was cast, this was well for him. His settled convictions were as a dyke against those invading waters of novel opinion, social, political, and otherwise, which carried away as in a torrent no few minds in those days, minds by nature not inferior to his own. While other members of that aristocracy to which by birth he belonged were incensed at the innovators mainly because their theories were inimical to the privileged classes, Captain Vere disinterestedly opposed them because they seemed to him incapable of embodiment in lasting institutions, but at war with the peace of the world and the good of mankind.

With minds less stored than his and less earnest, some officers of his rank, with whom at times he would necessarily consort, found him lacking in the companionable quality, a dry and bookish gentleman as they deemed. Upon any chance withdrawal from their company one would be apt to say to another something like this: "Vere is a noble fellow, Starry Vere. 'Spite the gazettes, Sir Horatio is at bottom scarce a better seaman or fighter. But between you and me now, don't you think there is a queer streak of the pedantic running

through him? Yes, like the King's yarn in a coil of navy-rope?"

Some apparent ground there was for this sort of confidential criticism; since not only did the Captain's discourse never fall into the jocosely familiar, but in illustrating any point touching the stirring personages and events of the time, he would cite some historic character or incident of antiquity with the same easy air that he would cite from the moderns. He seemed unmindful of the circumstance that to his bluff company such remote allusions, however pertinent they might really be, were altogether alien to men whose reading was mainly confined to the journals. But considerateness in such matters is not easy to natures constituted like Captain Vere's. Their honesty prescribes to them directness, sometimes far-reaching, like that of a migratory fowl that in its flight never heeds when it crosses a frontier.

CHAPTER VII

The lieutenants and other commissioned gentlemen forming Captain Vere's staff it is not necessary here to particularize nor needs it to make mention of any of the warrant-officers. But among the petty officers was one who, having much to do with the story, may as well be forthwith introduced. This portrait I essay, but shall never hit it.

This was John Claggart, the master-at-arms. But that sea-title may to landsmen seem somewhat equivocal. Originally, doubtless, that petty-officer's function was the instruction of the men in the use of arms, sword, or cutlass. But very long ago, owing to the advance in gunnery making hand-to-hand encounters less frequent—and giving to nitre and sulphur the pre-eminence over steel—that function ceased, the master-at-arms of a great war-ship becoming a sort of Chief of Police charged, among other matters, with the duty of preserving order on the populous lower gun-decks.

Claggart was a man of about five-and-

thirty, somewhat spare and tall yet of no ill figure upon the whole. His hand was too small and shapely to have been accustomed to hard toil. The face was a notable one, the features, all except the chin, cleanly cut as those on a Greek medallion, yet the chin, beardless as Tecumseh's,¹⁹ had something of the strange protuberant heaviness in its make that recalled the prints of the Rev. Dr. Titus Oates,²⁰ the historical deponent with the clerical drawl in the time of Charles II, and the fraud of the alleged Popish Plot. It served Claggart in his office that his eye could cast a tutoring glance. His brow was of the sort phrenologically associated with more than average intellect, silken jet curls partly clustering over it, making a foil to the pallor below, a pallor tinged with a faint shade of amber akin to the hue of time-tinted marbles of old.

This complexion singularly contrasting with the red or deeply bronzed visages of the sailors, and in part the result of his official seclusion from the sunlight, though it was not exactly displeasing, nevertheless seemed to hint of something defective or abnormal in the constitution and blood. But his general aspect and manner were so suggestive of an education and career incongruous with his naval function, that when not actively engaged in it he looked like a man of high quality, social and moral, who for reasons of his own was keeping meek. Nothing was known of his former life. It might be that he was an Englishman, and yet there lurked a bit of accent in his speech suggesting that possibly he was not such by birth, but through naturalization in early childhood. Among certain grizzled sea-gossips of the gun-decks and fore-castle went a rumour perdué that the master-at-arms was a chevalier who had volunteered into the King's navy by way of compounding for some mysterious swindle whereof he had been arraigned at the King's bench. The fact that nobody could substantiate this report was, of course, nothing against its

secret currency. Such a rumour once started on the gun-decks in reference to almost any one below the rank of a commissioned officer would, during the period assigned to this narrative, have seemed not altogether wanting in credibility to the tarry old wiseacres of a man-of-war crew. And indeed a man of Claggart's accomplishments, without prior nautical experience entering the navy at mature life, as he did, and necessarily allotted at the start to the lowest grade in it, a man, too, who never made allusion to his previous life ashore, these were circumstances which in the dearth of exact knowledge as to his true antecedents opened to the invidious a vague field for unfavourable surmise.

But the sailors' dog-watch gossip concerning him derived a vague plausibility from the fact that now, for some period, the British Navy could so little afford to be squeamish in the matter of keeping up the muster-rolls, that not only were press-gangs notoriously abroad both afloat and ashore, but there was little or no secret about another matter, namely, that the London police were at liberty to capture any able-bodied suspect, and any questionable fellow at large, and summarily ship him to the dock-yard or fleet. Furthermore, even among voluntary enlistments, there were instances where the motive thereto partook neither of patriotic impulse nor yet of a random desire to experience a bit of sea-life and martial adventure. Insolvent debtors of minor grade, together with the promiscuous lame ducks of morality, found in the navy a convenient and secure refuge. Secure, because once enlisted aboard a King's ship, they were as much in sanctuary, as the transgressor of the middle ages harbouring himself under the shadow of the altar. Such sanctioned irregularities, which for obvious reasons

¹⁹ Indian chief and leader of a confederation against the whites, 1768?-1813.

²⁰ Forger of the story of the plot to massacre the Protestants and burn London, in 1687 (1649-1795).

the Government would hardly think to parade at the time—and which consequently, and as affecting the least influential class of mankind, have all but dropped into oblivion—lend colour to something for the truth whereof I do not vouch, and hence have some scruple in stating, something I remember having seen in print, though the book I cannot recall, but the same thing was personally communicated to me now more than forty years ago by an old pensioner in a cocked hat, with whom I had a most interesting talk on the terrace at Greenwich, a Baltimore negro, a Trafalgar man. It was to this effect. In the case of a war-ship short of hands, whose speedy sailing was imperative, the deficient quota, in lack of any other way of making it good, would be eked out by drafts called direct from the jails. For reasons previously suggested it would not perhaps be very easy at the present day directly to prove or disprove the allegation. But allowed as a verity, how significant would it be of England's straits at the time, confronted by those wars which, like a flight of harpies, rose shrieking from the din and dust of the fallen Bastille. That era appears measurably clear to us who look back at it, and but read of it. But to the grandfathers of us greybeards, the thoughtful of them, the genius of it presented an aspect like that of Camoens' ²¹ "Spirit of the Cape," an eclipsing menace, mysterious and prodigious. Not America even was exempt from apprehension. At the height of Napoleon's unexampled conquests, there were Americans who had fought at Bunker Hill, who looked forward to the possibility that the Atlantic might prove no barrier against the ultimate schemes of this portentous upstart from the revolutionary chaos, who seemed in act of fulfilling the judgment prefigured in the Apocalypse.

But the less credence was to be given to the gun-deck talk touching Claggart, seeing that no man holding his office in a man-of-war can ever hope to be popular

with the crew. Besides, in derogatory comments upon any one against whom they have a grudge, or for any reason or no reason mislike, sailors are much like landmen—they are apt to exaggerate or romance.

About as much was really known to the *Indomitable's* tars of the Master-at-arms' career before entering the service as an astronomer knows about a comet's travels prior to its first observable appearance in the sky. The verdict of the sea *quidnuncs* has been cited only by way of showing what sort of moral impression the man made upon rude uncultivated natures whose conceptions of human wickedness were necessarily of the narrowest, limited to ideas of vulgar rascality,—a thief among the swinging hammocks during a night-watch, or the man-brokers and land-sharks of the seaports.

It was no gossip, however, but fact, that though, as before hinted, Claggart upon his entrance into the navy was, as a novice, assigned to the least honourable section of a man-of-war's crew, embracing the drudges, he did not long remain there.

The superior capacity he immediately evinced, his constitutional sobriety, his ingratiating deference to superiors, together with a peculiar ferreting genius manifested on a singular occasion, all this capped by a certain austere patriotism, abruptly advanced him to the position of Master-at-arms.

Of this maritime Chief of Police the ship's-corporals, so called, were the immediate subordinates, and compliant ones, and thus—as is to be noted in some business departments ashore—almost to a degree inconsistent with entire moral volition. His place put various converging wires of underground influence under the Chief's control, capable when astutely worked through his understrappers of operating to the mysterious discomfort, if nothing worse, of any of the sea-commonalty.

²¹ Luiz Vaz de Camões, English spelling Camoens (1524-80), Portuguese poet.

CHAPTER VIII

Life in the foretop well agreed with Billy Budd. There, when not actually engaged on the yards yet higher aloft, the topmen, who as such had been picked out for youth and activity, constituted an aerial club, lounging at ease against the smaller stunsails rolled up into cushions, spinning yarns like the lazy gods, and frequently amused with what was going on in the busy world of the decks below. No wonder then that a young fellow of Billy's disposition was well content in such society. Giving no cause of offence to anybody, he was always alert at a call. So in the merchant service it had been with him. But now such punctiliousness in duty was shown that his topmates would sometimes good-naturedly laugh at him for it. This heightened alacrity had its cause, namely, the impression made upon him by the first formal gangway-punishment he had ever witnessed, which befell the day following his impressment. It had been incurred by a little fellow, young, a novice, an afterguardsman absent from his assigned post when the ship was being put about, a dereliction resulting in a rather serious hitch to that manoeuvre, one demanding instantaneous promptitude in letting go and making fast. When Billy saw the culprit's naked back under the scourge gridironed with red welts, and worse, when he marked the dire expression in the liberated man's face, as with his woolen shirt flung over him by the executioner, he rushed forward from the spot to bury himself in the crowd, Billy was horrified. He resolved that never through remissness would he make himself liable to such a visitation, or do or omit aught that might merit even verbal reproof. What then was his surprise and concern when ultimately he found himself getting into petty trouble occasionally about such matters as the stowage of his bag, or something amiss in his hammock, matters under the police oversight of the ship's corporals of the lower decks, and which brought down on

him a vague threat from one of them.

So heedful in all things as he was, how could this be? He could not understand it, and it more than vexed him. When he spoke to his young topmates about it, they were either lightly incredulous, or found something comical in his unconcealed anxiety. "Is it your bag, Billy?" said one, "well, sew yourself up in it, Billy boy, and then you'll be sure to know if anybody meddles with it."

Now there was a veteran aboard who, because his years began to disqualify him for more active work, had been recently assigned duty as mainmast-man in his watch, looking to the gear belayed at the rail round about that great spar near the deck. At off-times the foretopman had picked up some acquaintance with him, and now in his trouble it occurred to him that he might be the sort of person to go to for wise counsel. He was an old Dansker long anglicized in the service, of few words, many wrinkles and some honourable scars. His wizened face, time-tinted and weather-stormed to the complexion of an antique parchment, was here and there peppered blue by the chance explosion of a gun-cartridge in action. He was an *Agamemnon*-man, some two years prior to the time of this story having served under Nelson, when but Sir Horatio, in that ship immortal in naval memory, and which, dismantled and in part broken up to her bare ribs, is seen a grand skeleton in Haydon's²² etching. As one of a boarding-party from the *Agamemnon* he had received a cut slantwise along one temple and cheek, leaving a long pale scar like a streak of dawn's light falling athwart the dark visage. It was on account of that scar and the affair in which it was known that he had received it, as well as from his blue-peppered complexion, that the Dansker went among the *Indomitable's* crew by the name of "Board-her-in-the-smoke."

Now the first time that his small weazel-

²² Benjamin Robert Haydon (1786-1846), British historical painter.

eyes happened to light on Billy Budd, a certain grim internal merriment set all his ancient wrinkles into antic play. Was it that his eccentric unsentimental old sapience, primitive in its kind, saw, or thought it saw, something which in contrast with the war-ship's environment looked oddly incongruous in the Handsome Sailor? But after slyly studying him at intervals, the old Merlin's equivocal merriment was modified. For now when the twain would meet, it would start in his face a quizzing sort of look, but it would be but momentary, and sometimes replaced by an expression of speculative query as to what might eventually befall a nature like that, dropped into a world not without some man-traps and against whose subtleties simple courage lacking experience and address and without any touch of defensive ugliness, is of little avail, and where such innocence as man is capable of does yet, in a moral emergency, not always sharpen the faculties or enlighten the will.

However it was, the Dansker in his ascetic way rather took to Billy. Nor was this only because of a certain philosophic interest in such a character. There was another cause. While the old man's eccentricities, sometimes bordering on the ursine, repelled the juniors, Billy, undeterred thereby, would make advances, never passing the old *Agamemnon*-man without a salutation marked by that respect which is seldom lost on the aged, however crabbed at times, or whatever their station in life. There was a vein of dry humour, or what not, in the mast-man, and whether in freak of patriarchal irony touching Billy's youth and athletic frame, or for some other and more recondite reason, from the first in addressing him he always substituted Baby for Billy. The Dansker, in fact, being the originator of the name by which the foretopman eventually became known aboard ship.

Well then, in his mysterious little difficulty going in quest of the wrinkled one, Billy found him off duty in a dog-watch ruminating by himself, seated on a shot-

box of the upper gun-deck, now and then surveying with a somewhat cynical regard certain of the more swaggering promenaders there. Billy recounted his trouble, again wondering how it all happened. The salt seer attentively listened, accompanying the foretopman's recitals with queer twitchings of his wrinkles and problematical little sparkles of his small ferret eyes. Making an end of his story, the foretopman asked, "And now, Dansker, do tell me what you think of it."

The old man, shoving up the front of his tarpaulin and deliberately rubbing the long slant scar at the point where it entered the thin hair, laconically said, "Baby Budd, *Jimmy Legs*" (meaning the master-at-arms) "is down on you."

"*Jimmy Legs*!" ejaculated Billy, his well-known eyes expanding, "what for? Why he calls me *the sweet and pleasant young fellow*, they tell me."

"Does he so?" grinned the grizzled one, then said, "Ay, Baby Lad, a sweet voice has *Jimmy Legs*."

"No, not always. But to me he has I seldom pass him but there comes a pleasant word."

"And that's because he's down upon you, Baby Budd."

Such reiteration, along with the manner of it (incomprehensible to a novice), disturbed Billy almost as much as the mystery for which he had sought explanation. Something less unpleasingly oracular he tried to extract. But the old sea-Chiron,²³ thinking perhaps that for the nonce he had sufficiently instructed his young Achilles, pursed his lips, gathered all his wrinkles together, and would commit himself to nothing further.

Years, and those experiences which befall certain shrewder men subordinated life-long to the will of superiors, all this had developed in the Dansker the pithy guarded cynicism that was his leading characteristic.

²³ One of the Centaurs, teacher of Achilles.

CHAPTER IX

The next day an incident served to confirm Billy Budd in his incredulity as to the Dansker's strange summing up of the case submitted.

The ship at noon going large before the wind was rolling on her course, and he, below at dinner and engaged in some sportful talk with the members of his mess, chanced in a sudden lurch to spill the entire contents of his soup-pan upon the new scrubbed deck. Claggart, the Master-at-arms, official rattan in hand, happened to be passing along the battery, in a bay of which the mess was lodged, and the greasy liquid streamed just across his path. Stepping over it, he was proceeding on his way without comment, since the matter was nothing to take notice of under the circumstances, when he happened to observe who it was that had done the spilling. His countenance changed. Pausing, he was about to ejaculate something hasty at the sailor, but checked himself, and pointing down to the streaming soup, playfully tapped him from behind with his rattan, saying, in a low musical voice, peculiar to him at times, "Handsomely done, my lad! And handsome is as handsome did it, too!" and with that passed on. Not noted by Billy as not coming within his view was the involuntary smile, or rather grimace, that accompanied Claggart's equivocal words. Aridly it drew down the thin corners of his shapely mouth. But everybody taking his remark as meant for humorous, and at which therefore as coming from a superior they were bound to laugh, "with counterfeited glee" acted accordingly, and Billy tickled, it may be, by the allusion to his being the handsome sailor, merrily joined in, then addressing his messmates exclaimed, "There now, who says that Jimmy Legs is down on me!"

"And who said he was, Beauty?" demanded one Donald with some surprise. Whereat the foretopman looked a little foolish, recalling that it was only one person, Board-her-in-the-smoke, who had sug-

gested what to him was the smoky idea that this master-at-arms was in any peculiar way hostile to him. Meantime that functionary resuming his path must have momentarily worn some expression less guarded than that of the bitter smile and, usurping the face from the heart, some distorting expression perhaps—for a drummer-boy, heedlessly frolicking along from the opposite direction, and chancing to come into light collision with his person was strangely disconcerted by his aspect. Nor was the impression lessened when the official, impulsively giving him a sharp cut with the rattan, vehemently exclaimed, "Look where you go!"

CHAPTER X

What was the matter with the Master-at-arms? And, be the matter what it might, how could it have direct relation to Billy Budd, with whom prior to the affair of the spilled soup he had never come into any special contact, official or otherwise? What indeed could the trouble have to do with one so little inclined to give offence as the merchantship's *peacemaker*, even him who in Claggart's own phrase was "The sweet and pleasant young fellow"? Yes, why should *Jimmy Legs*, to borrow the Dansker's expression, be *down* on the Handsome Sailor?

But at heart and not for nothing, as the late chance encounter may indicate to the discerning, down on him, secretly down on him, he assuredly was.

Now to invent something touching the more private career of Claggart—something involving Billy Budd, of which something the latter should be wholly ignorant, some romantic incident implying that Claggart's knowledge of the young blue-jacket began at some period anterior to catching sight of him on board the seventy-four—all this, not so difficult to do, might avail in a more or less interesting way to account for whatever enigma may appear to lurk in the case. But, in fact, there was nothing of the sort. And yet the cause, necessarily

to be assumed as the sole one assignable, is in its very realism as much charged with that prime element of Radcliffian²⁴ romance, *the mysterious*, as any that the ingenuity of the author of the "Mysteries of Udolpho" could devise. For what can more partake of the mysterious than an antipathy spontaneous and profound such as is evoked in certain exceptional mortals by the mere aspect of some other mortal, however harmless he may be?—if not called forth by that very harmlessness itself.

Now there can exist no imitating juxtaposition of dissimilar personalities comparable to that which is possible aboard a great war-ship fully manned and at sea. There, every day, among all ranks, almost every man comes into more or less of contact with almost every other man. Wholly there to avoid even the sight of an aggravating object one must needs give it Jonah's toss, or jump overboard himself. Imagine how all this might eventually operate on some peculiar human creature the direct reverse of a saint?

But for the adequate comprehending of Claggart by a normal nature, these hints are insufficient. To pass from a normal nature to him one must cross "The deadly space between," and this is best done by induction.

Long ago an honest scholar, my senior, said to me in reference to one who like himself is now no more, a man so unimpeachably respectable that against him nothing was ever openly said, though among the few something was whispered, "Yes, X—— is a nut not to be cracked by the tap of a lady's fan. You are aware that I am the adherent of no organized religion, much less of any philosophy built into a system. Well, for all that, I think that to try and get into X——, enter his labyrinth and get out again, without a clue derived from some source other than what is known as *knowledge of the world*—that were hardly possible, at least for me."

"Why," said I, "X——, however singular a study to some, is yet human, and knowledge of the world assuredly implies the

knowledge of human nature, and in most of its varieties."

"Yes, but a superficial knowledge of it, serving ordinary purposes. But for anything deeper, I am not certain whether to know the world and to know human nature be not two distinct branches of knowledge, which while they may co-exist in the same heart, yet either may exist with little or nothing of the other. Nay, in an average man of the world, his constant rubbing with it blunts that fine spiritual insight indispensable to the understanding of the essential in certain exceptional characters, whether evil ones or good. In a matter of some importance I have seen a girl wind an old lawyer about her little finger. Nor was it the dotage of senile love. Nothing of the sort. But he knew law better than he knew the girl's heart. Coke and Blackstone hardly shed so much light into obscure spiritual places as the Hebrew prophets. And who were they? Mostly recluses."

At the time my inexperience was such that I did not quite see the drift of all this. It may be that I see it now. And, indeed, if that lexicon which is based on Holy Writ were any longer popular, one might with less difficulty define and denominate certain phenomenal men. As it is, one must turn to some authority not liable to the charge of being tinctured with the Biblical element.

In a list of definitions included in the authentic translation of Plato, a list attributed to him, occurs this "Natural Depravity—a depravity according to nature." A definition which though savouring of Calvinism by no means involves Calvin's dogma as to total mankind. Evidently its intent makes it applicable but to individuals. Not many are the examples of this depravity which the gallows and jail supply. At any rate, for notable instances,—since these have no vulgar alloy of the brute in them, but invariably are dominated by intellectuality,—one must go elsewhere. Civilization,

²⁴ Ann Radcliffe (1764-1823) was a British author of Gothic romances, including *The Mysteries of Udolpho* (1794).

especially if of the austere sort, is auspicious to it. It folds itself in the mantle of respectability. It has its certain negative virtues serving as silent auxiliaries. It never allows wine to get within its guard. It is not going too far to say that it is without vices or small sins. There is a phenomenal pride in it that excludes them from anything. Never mercenary or avaricious. In short, the depravity here meant partakes nothing of the sordid or sensual. It is serious, but free from acerbity. Though no flatterer of mankind it never speaks ill of it.

But the thing which in eminent instances signalizes so exceptional a nature is this: though the man's even temper and discreet bearing would seem to intimate a mind peculiarly subject to the law of reason, not the less in his soul's recesses he would seem to riot in complete exemption from that law, having apparently little to do with reason further than to employ it as an ambidexter implement for effecting the irrational. That is to say: towards the accomplishment of an aim which in wantonness of malignity would seem to partake of the insane, he will direct a cool judgment sagacious and sound.

These men are true madmen, and of the most dangerous sort, for their lunacy is not continuous, but occasional, evoked by some special object, it is secretive and self-contained so that when most active it is, to the average mind, not distinguished from sanity, and for the reason above suggested that whatever its aims may be (and the aim is never disclosed) the method and the outward proceeding is always perfectly rational.

Now something such was Claggart, in whom was the mania of an evil nature, not engendered by vicious training or corrupting books or licentious living, but born with him and innate, in short, "a depravity according to nature."

Can it be this phenomenon, disowned or not acknowledged, that in some criminal cases puzzles the courts? For this cause have our juries at times not only to endure

the prolonged contentions of lawyers with their fees, but also the yet more perplexing strife of the medical experts with theirs? And why leave it to them? Why not subpoena as well the clerical proficient? Their vocation bringing them into peculiar contact with so many human beings, and sometimes in their least guarded hour, in interviews very much more confidential than those of physician and patient, this would seem to qualify them to know something about those intricacies involved in the question of moral responsibility, whether in a given case, say, the crime proceeded from mania in the brain or rabies of the heart. As to any differences among themselves which clerical proficient might develop on the stand, these could hardly be greater than the direct contradictions exchanged between the remunerated medical experts.

Dark sayings are these, some will say. But why? It is because they somewhat savour of Holy Writ in its phrase "mysteries of iniquity."

The point of the story turning on the hidden nature of the Master-at-arms has necessitated this chapter. With an added hint or two in connection with the incident at the mess, the resumed narrative must be left to vindicate as it may its own credibility.

CHAPTER XI

*Pale ire, envy and despair*²⁵

That Claggart's figure was not amiss, and his face, save the chin, well moulded, has already been said. Of these favourable points he seemed not insensible, for he was not only neat but careful in his dress. But the form of Billy Budd was heroic, and if his face was without the intellectual look of the pallid Claggart's, not the less was it lit, like his, from within, though from a different source. The bonfire in his heart

²⁵ The line is from Milton's *Paradise Lost*, Bk IV, l. 115, descriptive of Satan approaching Eden.

made luminous the rose-tan in his cheek

In view of the marked contrast between the persons of the twain, it is more than probable that when the Master-at-arms in the scene last given applied to the sailor the proverb *Handsome is as handsome does* he there let escape an ironic inkling, not caught by the young sailors who heard it, as to what it was that had first moved him against Billy, namely, his significant personal beauty

Now envy and antipathy, passions irreconcilable in reason, nevertheless in fact may spring conjoined like Chang and Eng²⁶ in one birth. Is Envy then such a monster? Well, though many an arraigned mortal has in hopes of mitigated penalty pleaded guilty to horrible actions, did ever anybody seriously confess to envy? Something there is in it universally felt to be more shameful than even felonious crime. And not only does everybody disown it, but the better sort are inclined to incredulity when it is in earnest imputed to an intelligent man. But since its lodgment is in the heart, not the brain, no degree of intellect supplies a guarantee against it. But Claggart's was no vulgar form of the passion. Nor, as directed toward Billy Budd, did it partake of that streak of apprehensive jealousy which marred Saul's visage perturbedly brooding on the comely young David. Claggart's envy struck deeper. If askance he eyed the good looks, cheery health and frank enjoyment of young life in Billy Budd, it was because these happened to go along with a nature that, as Claggart magnetically felt, had in its simplicity never willed malice or experienced the reactionary bite of that serpent. To him, the spirit lodged within Billy, and looking out from his welkin eyes as from windows—that ineffability it was which made the dimple in his dyed cheeks, supplied his joints, and dancing in his yellow curls made him pre-eminently the Handsome Sailor. One person excepted, the Master-at-arms was perhaps the only man in the ship intellectually capable of adequately appreciating the moral phe-

nomenon presented in Billy Budd, and the insight but intensified his passion, which, assuming various secret forms within him, at times assumed that of cynic disdain—disdain of innocence. To be nothing more than innocent! Yet in an æsthetic way he saw the charm of it, the courageous free-and-easy temper of it, and fain would have shared it, but he despaired of it.

With no power to annul the elemental evil in himself, though readily enough he could hide it, apprehending the good, but powerless to be it, a nature like Claggart's, surcharged with energy as such natures almost invariably are, what recourse is left to it but to recoil upon itself and like the scorpion for which the Creator alone is responsible, act out to the end the part allotted it.

Passion, and passion in its profoundest, is not a thing demanding a palatial stage whereon to play its part. Down among the groundlings, among the beggars and rakers of the garbage, profound passion is enacted. And the circumstances that provoke it, however trivial or mean, are no measure of its power. In the present instance the stage is a scrubbed gun-deck, and one of the external provocations a man-of-war's man's spiced soup.

Now when the Master-at-arms noticed whence came that greasy fluid streaming before his feet, he must have taken it—to some extent wilfully perhaps—not for the mere accident it assuredly was, but for the sly escape of a spontaneous feeling on Billy's part more or less answering to the antipathy on his own. In effect a foolish demonstration he must have thought, and very harmless, like the futile kick of a heifer, which yet were the heifer a shod stallion would not be so harmless. Even so was it that into the gall of envy Claggart infused the vitriol of his contempt. But the incident confirmed to him certain tell-tale reports purveyed to his ear by *Squeak*, one of his more cunning corporals, a grizzled little man, so nicknamed by the sailors on

²⁶ The famous Siamese twins (1811-74)

account of his squeaky voice and sharp visage ferreting about the dark corners of the lower decks after interlopers, satirically suggesting to them the idea of a rat in a cellar.

Now his chief's employing him as an implicit tool in laying little traps for the vorriment of the foretopman—for it was from the Master-at-arms that the petty persecutions heretofore adverted to had proceeded—the corporal, having naturally enough concluded that his master could have no love for the sailor, made it his business, faithful understripper that he was, to ferment the ill blood by perverting to his chief certain innocent frolics of the good-natured foretopman, besides inventing for his master sundry contumelious epithets he claimed to have overheard him let fall. The Master-at-arms never suspected the veracity of these reports, more especially as to the epithets, for he well knew how secretly unpopular may become a Master-at-arms—at least a Master-at-arms of those days, zealous in his function—how the blue-jackets shot at him in private their raillery and wit, the nickname by which he goes among them (*Jimmy Legs*) implying under the form of merriment their cherished disrespect and dislike.

But in view of the greediness of hate for provocation, it hardly needed a purveyor to feed Claggart's passion. An uncommon prudence is habitual with the subtler depravity, for it has everything to hide. And in case of any merely suspected injury its secretiveness voluntarily cuts it off from enlightenment or disillusion, and not unreluctantly, action is taken upon surmise as upon certainty. And the retaliation is apt to be in monstrous disproportion to the supposed offence, for when in anybody was revenge in its exactions aught else but an inordinate usurer? But how with Claggart's conscience? For though consciences are unlike as foreheads, every intelligence, not including the Scriptural devils who "believe and tremble," has one. But Claggart's conscience being but the lawyer to his will, made ogres of trifles,

probably arguing that the motive imputed to Billy in spilling the soup just when he did, together with the epithets alleged—these, if nothing more, made a strong case against him, nay, justified animosity into a sort of retributive righteousness. The Pharisee is the Guy Fawkes²⁷ plowing in the hid chambers underlying some natures like Claggart's. And they can really form no conception of an unreciprocated malice. Probably, the Master-at-arms' clandestine persecutions of Billy were started to try the temper of the man, but they had not developed any quality in him that enmity could make official use of, or ever pervert into even plausible self-justification, so that the occurrence at the mess, petty if it were, was a welcome one to that peculiar conscience assigned to be the private mentor of Claggart, and for the rest, not improbably it put him upon new experiments.

CHAPTER XII

Not many days after the last incident narrated, something befell Billy Budd that more grieved him than aught that had previously occurred.

It was a warm night for the latitude, and the foretopman, whose watch at the time was properly below, was dozing on the uppermost deck whither he had ascended from his hot hammock—one of hundreds suspended so closely wedged together over a lower gun-deck that there was little or no swing to them. He lay as in the shadow of a hull-side stretched under the lee of the *booms*, a piled ridge of spare spars, and among which the ship's largest boat, the launch, was stowed. Alongside of three other slumberers from below, he lay near one end of the booms which approached from the foremast, his station aloft on duty as a foretopman being just over the deck station of the forecastle-men entitling him according to usage to make himself more or less at home in that neighbourhood.

²⁷ See note 14 on "Benito Cereno."

Presently he was stirred into semi-consciousness by somebody, who must have previously sounded the sleep of the others, touching his shoulder, and then as the foretopman raised his head, breathing into his ear in a quick whisper, "Slip into the lee fore-chains, Billy, there is something in the wind—don't speak. Quick. I will meet you there," and disappeared.

Now Billy—like sundry other essentially good-natured ones—had some of the weakness inseparable from essential good nature, and among these was a reluctance, almost an incapacity of plumply saying *no* to an abrupt proposition not obviously absurd, on the face of it, nor obviously unfriendly, nor iniquitous. And being of warm blood he had not the phlegm to negative any proposition by unresponsive inaction. Like his sense of fear, his apprehension as to aught outside of the honest and natural was seldom very quick. Besides, upon the present occasion, the drowse from his sleep still hung upon him.

However it was, he mechanically rose and, sleepily wondering what could be *in the wind*, betook himself to the designated place, a narrow platform, one of six, outside of the high bulwarks and screened by the great dead-eyes and multiple columned lanyards of the shrouds and back-stays, and, in a great war-ship of that time, of dimensions commensurate to the ample hull's magnitude, a tarry balcony, in short, overhanging the sea, and so secluded that one mariner of the *Indomitable*, a non-conformist old tar of serious turn, made it even in daytime his private oratory.

In this retired nook the stranger soon joined Billy Budd. There was no moon as yet, a haze obscured the star-light. He could not distinctly see the stranger's face. Yet from something in the outline and carriage, Billy took him to be, and correctly, one of the afterguard.

"Hist, Billy!" said the man, in the same quick cautionary whisper as before, "You were impressed, weren't you? Well, so was I," and he paused as to mark the effect. But Billy, not knowing exactly what to

make of this, said nothing. Then the other: "We are not the only impressed ones, Billy. There's a gang of us. Couldn't you—help—at a pinch?"

"What do you mean?" demanded Billy, here shaking off his drowse.

"Hist, hist!" the hurried whisper now growing husky, "see here" and the man held up two small objects faintly twinkling in the night light, "See, they are yours, Bill, if you'll only——"

But Billy here broke in, and in his resentful eagerness to deliver himself his vocal infirmity somewhat intruded, "D-D-Damme, I don't know what you are d-driving at, or what you mean, but you had better g-g-go where you belong!" For the moment the fellow, as confounded, did not stir, and Billy, springing to his feet, said, "If you d-don't start, I'll t-t-toss you back over the r-r-rail!" There was no mistaking this, and the mysterious emissary decamped, disappearing in the direction of the mainmast in the shadow of the booms.

"Hallo, what's the matter?" here came growling from a forecandleman awakened from his deck-doze by Billy's raised voice. And as the foretopman reappeared and was recognized by him, "Ah, *Beauty*, is it you? Well, something must have been the matter for you st-st-stuttered."

"Oh," rejoined Billy, now mastering the impediment, "I found an afterguardsman in our part of the ship here and I bid him be off where he belongs."

"And is that all you did about it, foretopman?" gruffly demanded another, an irascible old fellow of brick-coloured visage and hair, and who was known to his associate forecandlemen as *Red Pepper*.

"Such sneaks I should like to marry to the gunner's daughter!" by that expression meaning that he would like to subject them to disciplinary castigation over a gun.

However, Billy's rendering of the matter satisfactorily accounted to these inquirers for the brief commotion, since of all the sections of a ship's company the forecandlemen, veterans for the most part, and bigoted in their sea-prejudices, are the

most jealous in resenting territorial encroachments, especially on the part of any of the after guard, of whom they have but a sorry opinion, chiefly landsmen, never going aloft except to reef or furl the mainsail, and in no wise competent to handle a mailingspike or turn in a *dead-eye*, say

CHAPTER XIII

This incident sorely puzzled Billy Budd. It was an entirely new experience—the first time in his life that he had ever been personally approached in underhanded intriguing fashion. Prior to this encounter he had known nothing of the afterguardsman, the two men being stationed wide apart, one forward and aloft during his watch, the other on deck and aft.

What could it mean? And could they really be guineas, those two glittering objects the interloper had held up to his (Billy's) eyes? Where could the fellow get guineas? Why, even buttons, spare buttons, are not so plentiful at sea. The more he turned the matter over, the more he was nonplussed, and made uneasy and discomfited. In his disgustful recoil from an overture which, though he but ill comprehended, he instinctively knew must involve evil of some sort—Billy Budd was like a young horse fresh from the pasture suddenly inhaling a vile whiff from some chemical factory and by repeated snortings trying to get it out of his nostrils and lungs. This frame of mind barred all desire of holding further parley with the fellow, even were it but for the purpose of gaining some enlightenment as to his design in approaching him. And yet he was not without natural curiosity to see how such a visitor in the dark would look in broad day.

He espied him the following afternoon in his first dog-watch below, one of the smokers on that forward part of the upper gun-deck allotted to the pipe. He recognized him by his general cut and build, more than by his round freckled face and

glassy eyes of pale blue, veiled with lashes all but white. And yet Billy was a bit uncertain whether indeed it were he—yonder chap about his own age, chatting and laughing in a free-hearted way, leaning against a gun,—a genial young fellow enough to look at, and something of a rattle-brain, to all appearance. Rather chubby, too, for a sailor, even an afterguardsman. In short the last man in the world—one would think—to be overburdened with thoughts, especially those perilous thoughts that must needs belong to a conspirator in any serious project, or even to the underling of such a conspirator.

Although Billy was not aware of it, the fellow, with one sidelong watchful glance had perceived Billy first, and then noting that Billy was looking at him, thereupon nodded a familiar sort of friendly recognition as to an old acquaintance, without interrupting the talk he was engaged in with the group of smokers. A day or two afterwards, chancing in the evening promenade on a gun-deck, to pass Billy, he offered a flying word of good-fellowship, as it were, which by its unexpectedness, and equivocalness under the circumstances, so embarrassed Billy that he knew not how to respond to it, and let it go unnoticed.

Billy was now left more at a loss than before. The ineffectual speculations into which he was led were so disturbingly alien to him that he did his best to smother them. It never entered his mind that here was a matter, which, from its extreme questionableness, it was his duty as a loyal blue-jacket to report in the proper quarter. And, probably, had such a step been suggested to him, he would have been deterred from taking it by the thought—one of novice-magnanimity—that it would savour overmuch of the dirty work of a tell-tale. He kept the thing to himself. Yet upon one occasion he could not forbear a little disburthening himself to the old Dansker, tempted thereto perhaps by the influence of a balmy night when the ship lay becalmed, the twain, silent for the most part, sitting together on deck, their heads

They cheered him in the looming, 15
 Horseman and horse they knew
 The turn of the tide began,
 The rally of bugles ran,
 He swung his hat in the van,
 The electric hoof-spark flew 20

Wreathe the steed and lead him—
 For the charge he led
 Touched and turned the cypress
 Into amaranths for the head
 Of Philip,² king of riders, 25
 Who raised them from the dead
 The camp (at dawning lost),
 By eve, recovered—forced,
 Rang with laughter of the host
 At belated Early³ fled 30

Shroud the horse in sable—
 For the mounds they heap!
 There is firing in the Valley,
 And yet no strife they keep,
 It is the parting volley,
 It is the pathos deep
 There is glory for the brave
 Who lead, and nobly save,
 But no knowledge in the grave
 Where the nameless followers sleep 40

THE COLLEGE COLONEL [1866]

He rides at their head,
 A crutch by his saddle just slants in
 view,
 One slung arm is in splints, you see,
 Yet he guides his strong steed—how
 coldly too

He brings his regiment home— 5
 Not as they filed two years before,
 But a remnant half-tattered, and battered,
 and worn,
 Like castaway sailors, who—stunned
 by the surf's loud roar,
 Their mates dragged back and seen no
 more— 10

Again and again breast the surge,
 And at last crawl, spent, to shore.

A still rigidity and pale—
 An Indian aloofness lones his brow,
 He has lived a thousand years 15
 Compressed in battle's pains and prayers,
 Marches and watches slow

There are welcoming shouts, and flags,
 Old men off hat to the Boy,
 Wreaths from gay balconies fall at his
 feet, 20
 But to *him*—there comes alloy

It is not that a leg is lost,
 It is not that an arm is maimed,
 It is not that the fever has racked—
 Self he has long disclaimed 25

But all through the Seven Days' Fight,
 And deep in the Wilderness grim,
 And in the field-hospital tent,
 And Petersburg crater, and dim
 Lean brooding in Libby, there came— 30
 Ah heaven!—what *truth* to him

SUPPLEMENT to "BATTLE PIECES" [1866]

WERE I fastidiously anxious for the
 symmetry of this book, it would close
 with the notes. But the times are such
 that patriotism—not free from solicitude—
 urges a claim overriding all literary
 scruples

It is more than a year since the memo-
 rable surrender, but events have not yet
 rounded themselves into completion. Not
 justly can we complain of this. There has
 been an upheaval affecting the basis of
 things, to altered circumstances compli-
 cated adaptations are to be made, there
 are difficulties great and novel. But is
 Reason still waiting for Passion to spend
 itself? We have sung of the soldiers and
 sailors, but who shall hymn the poli-
 ticians?

² Gen Philip Henry Sheridan (1831-
 88), hero of "Sheridan's Ride," Oct 19,
 1864

³ Gen Jubal A Early (1816-94), de-
 feated by Sheridan at Winchester

In view of the infinite desirableness of Re-establishment, and considering that, so far as feeling is concerned, it depends not mainly on the temper in which the South regards the North, but rather conversely, one who never was a blind adherent feels constrained to submit some thoughts, counting on the indulgence of his countrymen.

And, first, it may be said that, if among the feelings and opinions growing immediately out of a great civil convulsion, there are any which time shall modify or do away, they are presumably those of a less temperate and charitable cast.

There seems no reason why patriotism and narrowness should go together, or why intellectual impartiality should be confounded with political trumming, or why serviceable truth should keep cloistered because not partisan. Yet the work of Reconstruction, if admitted to be feasible at all, demands little but common sense and Christian charity. Little but these? These are much.

Some of us are concerned because as yet the South shows no penitence. But what exactly do we mean by this? Since down to the close of the war she never confessed any for braving it, the only penitence now left her is that which springs solely from the sense of discomfiture, and since this evidently would be a contrition hypocritical, it would be unworthy in us to demand it. Certain it is that penitence, in the sense of voluntary humiliation, will never be displayed. Nor does this afford just ground for unreserved condemnation. It is enough, for all practical purposes, if the South have been taught by the terrors of civil war to feel that Secession, like Slavery, is against Destiny, that both now lie buried in one grave, that her fate is linked with ours, and that together we comprise the Nation.

The clouds of heroes who battled for the Union it is needless to eulogize here. But how of the soldiers on the other side? And when of a free community we name the soldiers, we thereby name the people. It was in subserviency to the slave-interest

that Secession was plotted, but it was under the plea, plausibly urged, that certain inestimable rights guaranteed by the Constitution were directly menaced, that the people of the South were cajoled into revolution. Through the arts of the conspirators and the perversity of fortune, the most sensitive love of liberty was entrapped into the support of a war whose implied end was the erecting in our advanced century of an Anglo-American empire based upon the systematic degradation of man.

Spite this clinging reproach, however, signal military virtues and achievements have conferred upon the Confederate arms historic fame, and upon certain of the commanders a renown extending beyond the sea—a renown which we of the North could not suppress, even if we would. In personal character, also, not a few of the military leaders of the South enforce forbearance, the memory of others the North refrains from disparaging, and some, with more or less of reluctance, she can respect. Posterity, sympathizing with our convictions, but removed from our passions, may perhaps go farther here. If George IV could, out of the graceful instinct of a gentleman, raise an honorable monument in the great fa  e of Christendom over the remains of the enemy of his dynasty, Charles Edward,¹ the invader of England and victor in the rout of Prestonpans—upon whose head the king's ancestor but one reign removed had set a price—is it probable that the grandchildren of General Grant will pursue with rancor, or slur by sour neglect, the memory of Stonewall Jackson?

But the South herself is not wanting in recent histories and biographies which record the deeds of her chieftains—writings freely published at the North by loyal

¹ Charles Edward Stuart (1720-88), called "Bonnie Prince Charlie," leading the Scottish Jacobite uprising against England in the time of George II (1745), defeated the English at the Scottish town of Prestonpans. He was buried in St. Peter's at Rome.

houses, widely read here, and with a deep though saddened interest. By students of the war such works are hailed as welcome accessories, and tending to the completeness of the record.

Supposing a happy issue out of present perplexities, then, in the generation next to come, Southerners there will be yielding allegiance to the Union, feeling all their interests bound up in it, and yet cherishing unrebuked that kind of feeling for the memory of the soldiers of the fallen Confederacy that Burns, Scott, and the Ettrick Shepherd² felt for the memory of the gallant clansmen ruined through their fidelity to the Stuarts—a feeling whose passion was tempered by the poetry imbuing it, and which in no wise affected their loyalty to the Georges, and which, it may be added, indirectly contributed excellent things to literature. But, setting this view aside, dishonorable would it be in the South were she willing to abandon to shame the memory of brave men who with signal personal disinterestedness warred in her behalf, though from motives, as we believe, so deplorably astray.

Patriotism is not baseness, neither is it inhumanity. The mourners who this summer bear flowers to the mounds of the Virginian and Georgian dead are, in their domestic bereavement and proud affection, as sacred in the eye of Heaven as are those who go with similar offerings of tender grief and love into the cemeteries of our Northern martyrs. And yet, in one aspect, how needless to point the contrast.

Cherishing such sentiments, it will hardly occasion surprise that, in looking over the battle-pieces in the foregoing collection, I have been tempted to withdraw or modify some of them, fearful lest in presenting, though but dramatically and by way of a poetic record, the passions and epithets of civil war, I might be contributing to a bitterness which every sensible American must wish at an end. So, too, with the emotion of victory as reproduced on some pages, and particularly toward the close. It should not be construed into an exultation

misapplied—an exultation as ungenerous as unwise, and made to minister, however indirectly, to that kind of censoriousness too apt to be produced in certain natures by success after trying reverses. Zeal is not of necessity religion, neither is it always of the same essence with poetry or patriotism.

There are excesses which marked the conflict, most of which are perhaps inseparable from a civil strife so intense and prolonged, and involving warfare in some border countries new and imperfectly civilized. Barbarities also there were, for which the Southern people collectively can hardly be held responsible, though perpetrated by ruffians in their name. But surely other qualities—exalted ones—courage and fortitude matchless, were likewise displayed, and largely, and justly may these be held the characteristic traits, and not the former.

In this view, what Northern writer, however patriotic, but must revolt from acting on paper a part any way akin to that of the live dog to the dead lion, and yet it is right to rejoice for our triumph, so far as it may justly imply an advance for our whole country and for humanity.

Let it be held no reproach to any one that he pleads for reasonable consideration for our late enemies, now stricken down and unavoidably debarred, for the time, from speaking through authorized agencies for themselves. Nothing has been urged here in the foolish hope of conciliating those men—few in number, we trust—who have resolved never to be reconciled to the Union. On such hearts everything is thrown away except it be religious commiseration, and the sincerest. Yet let them call to mind that unhappy Secessionist,³ not a military man, who with impious alacrity

² James Hogg (1770-1835), author who dealt with Scottish legend and history.

³ The reference is to Edmund Ruffin (1794-1865), planter and writer on agricultural subjects, prominent and irreconcilable Secessionist.

fired the first shot of the Civil War at Sumter, and a little more than four years afterward fired the last one into his own heart at Richmond

Noble was the gesture into which patriotic passion surprised the people in a utilitarian time and country, yet the glory of the war falls short of its pathos—a pathos which now at last ought to disarm all animosity

How many and earnest thoughts still rise, and how hard to repress them We feel what past years have been, and years, unretarded years, shall come May we all have moderation, may we all show candor Though, perhaps, nothing could ultimately have averted the strife, and though to treat of human actions is to deal wholly with second causes, nevertheless, let us not cover up or try to extenuate what, humanly speaking, is the truth—namely, that those unfraternal denunciations, continued through years, and which at last inflamed to deeds that ended in bloodshed, were reciprocal, and that, had the preponderating strength and the prospect of its unlimited increase lain on the other side, on ours might have lain those actions which now in our late opponents we stigmatize under the name of Rebellion As frankly let us own—what it would be unbecoming to parade were foreigners concerned—that our triumph was won not more by skill and bravery than by superior resources and crushing numbers, that it was a triumph, too, over a people for years politically misled by designing men, and also by some honestly-erring men, who from their position could not have been otherwise than broadly influential, a people who, though, indeed, they sought to perpetuate the curse of slavery, and even extend it, were not the authors of it, but (less fortunate, not less righteous than we) were the fated inheritors, a people who, having a like origin with ourselves, share essentially in whatever worthy qualities we may possess No one can add to the lasting reproach which hopeless defeat has now

cast upon Secession by withholding the recognition of these verities

Surely we ought to take it to heart that that kind of pacification, based upon principles operating equally all over the land, which lovers of their country yearn for, and which our aims, though signally triumphant, did not bring about, and which lawmaking, however anxious, or energetic, or repressive, never by itself can achieve, may yet be largely aided by generosity of sentiment public and private Some revisionary legislation and adaptive is indispensable, but with this should harmoniously work another kind of prudence, not unallied with entire magnanimity Benevolence and poehey—Christianity and Machiavelli—dissuade from penal severities toward the subdued Abstinence here is as obligatory as considerate care for our unfortunate fellow-men late in bonds, and, if observed, would equally prove to be wise forecast The great qualities of the South, those attested in the War, we can perilously alienate, or we may make them nationally available at need

The blacks, in their infant pupillage to freedom, appeal to the sympathies of every humane mind The paternal guardianship which for the interval Government exercises over them was prompted equally by duty and benevolence Yet such kindness should not be allowed to exclude kindness to communities who stand nearer to us in nature For the future of the freed slaves we may well be concerned, but the future of the whole country, involving the future of the blacks, urges a paramount claim upon our anxiety Effective benignity, like the Nile, is not narrow in its bounty, and true policy is always broad To be sure, it is vain to seek to glide, with moulded words, over the difficulties of the situation And for them who are neither partisans, nor enthusiasts, nor theorists, nor cynics, there are some doubts not readily to be solved And there are fears Why is not the cessation of war now at length attended with the settled calm of peace? Wherefore

in a clear sky do we still turn our eyes toward the South as the Neopolitan, months after the eruption, turns his toward Vesuvius? Do we dread lest the repose may be deceptive? In the recent convulsion has the crater but shifted? Let us revere that sacred uncertainty which forever impends over men and nations. Those of us who always abhorred slavery as an atheistical iniquity, gladly we join in the exulting chorus of humanity over its downfall. But we should remember that emancipation was accomplished not by deliberate legislation, only through agonized violence could so mighty a result be effected. In our natural solicitude to confirm the benefit of liberty to the blacks, let us forbear from measures of dubious constitutional rightfulness toward our white countrymen—measures of a nature to provoke, among other of the last evils, exterminating hatred of race toward race. In imagination let us place ourselves in the unprecedented position of the Southerners—their position as regards the millions of ignorant uncommitted slaves in their midst, for whom some of us now claim the suffrage. Let us be Christians toward our fellow-whites, as well as philanthropists toward the blacks, our fellow-men. In all things, and toward all, we are enjoined to do as we would be done by. Nor should we forget that benevolent desires, after passing a certain point, can not undertake their own fulfillment without incurring the risk of evils beyond those sought to be remedied. Something may well be left to the graduated care of future legislation, and to heaven. In one point of view the co-existence of the two races in the South—whether the negro be bond or free—seems (even as it did to Abraham Lincoln) a grave evil. Emancipation has ridded the country of the reproach, but not wholly of the calamity. Especially in the present transition period for both races in the South, more or less of trouble may not unreasonably be anticipated, but let us not hereafter be too swift to charge the blame exclusively in any one

quarter. With certain evils men must be more or less patient. Our institutions have a potent digestion, and may in time convert and assimilate to good all elements thrown in, however originally alien.

But, so far as immediate measures looking toward permanent Re-establishment are concerned, no consideration should tempt us to pervert the national victory into oppression for the vanquished. Should plausible promise of eventual good, or a deceptive or spurious sense of duty, lead us to essay this, count we must on serious consequences, not the least of which would be divisions among the Northern adherents of the Union. Assuredly, if any honest Catos⁴ there be who thus far have gone with us, no longer will they do so, but oppose us, and as resolutely as hitherto they have supported. But this path of thought leads toward those waters of bitterness from which one can only turn aside and be silent.

But supposing Re-establishment so far advanced that the Southern seats in Congress are occupied, and by men qualified in accordance with those cardinal principles of representative government which hitherto have prevailed in the land—what then? Why, the Congressmen elected by the people of the South will—represent the people of the South. This may seem a flat conclusion, but, in view of the last five years, may there not be latent significance in it? What will be the temper of those Southern members? And, confronted by them, what will be the mood of our own representatives? In private life true reconciliation seldom follows a violent quarrel, but, if subsequent intercourse be unavoidable, nice observances and mutual are indispensable to the prevention of a new rupture. Amity itself can only be maintained by reciprocal respect, and true friends are punctilious equals. On the floor

⁴ A reference to the honest and uncompromising character of Marcus Porcius Cato (96-46 B.C.), who stabbed himself rather than surrender to Caesar.

of Congress North and South are to come together after a passionate duel, in which the South, though proving her valor, has been made to bite the dust Upon differences in debate shall acrimonious recriminations be exchanged? Shall censorious superiority assumed by one section provoke defiant self-assertion on the other? Shall Manassas and Chickamauga be retorted for Chattanooga and Richmond?⁵ Under the supposition that the full Congress will be composed of gentlemen, all this is impossible Yet, if otherwise, it needs no prophet of Israel to foretell the end The maintenance of Congressional decency in the future will rest mainly with the North Rightly will more forbearance be required from the North than the South, for the North is victor

But some there are who may deem these latter thoughts inapplicable, and for this reason Since the test-oath operatively excludes from Congress all who in any way participated in Secession, therefore none but Southerners wholly in harmony with the North are eligible to seats This is true for the time being But the oath is alterable, and in the wonted fluctuations of parties not improbably it will undergo alteration, assuming such a form, perhaps, as not to bar the admission into the National Legislature of men who represent the populations lately in revolt Such a result would involve no violation of the principles of democratic government Not readily can one perceive how the political existence of the millions of late Secessionists can permanently be ignored by this Republic The years of the war tried our devotion to the Union, the time of peace may test the sincerity of our faith in democracy

In no spirit of opposition, not by way of challenge, is anything here thrown out These thoughts are sincere ones, they seem natural—inevitable. Here and there they must have suggested themselves to many thoughtful patriots And, if they be just thoughts, ere long they must have that

weight with the public which already they have had with individuals

For that heroic band—those children of the furnace who, in regions like Texas and Tennessee, maintained their fidelity through terrible trials—we of the North felt for them, and profoundly we honor them Yet passionate sympathy, with resentments so close as to be almost domestic in their bitterness, would hardly in the present juncture tend to discreet legislation Were the Unionists and Secessionists but as Guelphs and Ghibellines?⁶ If not, then fail be it from a great nation now to act in the spirit that animated a triumphant town-faction in the Middle Ages But crowding thoughts must at last be checked, and, in times like the present, one who desires to be impartially just in the expression of his views, moves as among sword-points presented on every side

Let us pray that the terrible historic tragedy of our time may not have been enacted without instructing our whole beloved country through terror and pity, and may fulfillment verify in the end those expectations which kindle the bards of Progress and Humanity

EPILOGUE from "CLAREL"

[1876]

*If Luther's day expand to Darwin's year,
Shall that exclude the hope — foreclose the
fear?*

Unmoved by all the claims our times avow,
The ancient Sphinx still keeps the porch
of shade,
And comes Despair, whom not her calm
may cow,
And coldly on that adamant brow
Scowls undeterred his bitter pasquinade

⁵ That is, Confederate for Union victories

⁶ The struggle between these Italian factions throughout the Middle Ages constitutes much of the history of Italy and neighboring countries for over 500 years

But Faith (who from the scrawl indignant
turns) 6
With blood warm oozing from her wounded
trust,
Inscribes even on her shards of broken
urns
The sign o' the cross—the *spirit above the
dust!*

Yea, ape and angel, strife and old
debate—
The haps of heaven and dreary gongs of
hell, 10
Science the feud can only aggravate—
No umpire she betwixt the chimes and
knell
The running battle of the star and clod
Shall run forever—if there be no God

Degrees we know, unknown in days be-
fore, 15
The light is greater, hence the shadow
more,
And tantalized and apprehensive Man
Appealing—Wherefore ripen us to pain?
Seems there the spokesman of dumb Na-
ture's train

But through such strange illusions have
they passed 20
Who in life's pilgrimage have baffled
striven—
Even death may prove unreal at the last,
And stoics be astounded into heaven

Then keep thy heart, though yet but
ill-resigned—
Clarel, thy heart, the issues there but
mind, 25
That like the crocus budding through the
snow—
That like a swimmer rising from the
deep—
That like a burning secret which doth go
Even from the bosom that would hoard and
keep,
Emerge thou mayst from the last whelming
sea, 30
And prove that death but routs life into
victory

JOHN MARR
[1888]

Since as in night's deck-watch ye show,
Why, lads, so silent here to me,
Your watchmate of times long ago?

Once, for all the darkling sea,
You your voices raised how clearly, 5
Striking in when tempest sung,
Hoisting up the storm-sail cheerily,
Life is storm—let storm! you rung
Taking things as fated merely,
Child-like though the world ye spanned, 10
Nor holding unto life too dearly,
Ye who held your lives in hand—
Skimmers, who on oceans four
Petrels were, and larks ashore

O, not from memory lightly flung, 15
Forgot, like strains no more availing,
The heart to music haughtier strung,
Nay, frequent near me, never staling,
Whose good feeling kept ye young
Like tides that enter creek or stream, 20
Ye come, ye visit me, or seem
Swimming out from seas of faces,
Alien myriads memory traces,
To enfold me in a dream!

I yearn as ye But rafts that strain, 25
Parted, shall they lock again?
Twined we were, entwined, then riven,
Ever to new embracements driven,
Shifting gulf-weed of the main!
And how if one here shift no more, 30
Lodged by the flinging surge ashore?
Nor less, as now, in eve's decline,
Your shadowy fellowship is mine
Ye float around me, form and feature—
Tattoomings, ear-rings, love-locks curled, 35
Barbarians of man's simpler nature,
Unworldly servers of the world
Yea, present all, and dear to me,
Though shades, or scouring China's sea.

Whither, whither, merchant-sailors, 40
Whitherward now in roaring gales?
Competing still, ye huntsman-whalers,

In leviathan's wake what boat prevails?
And man-of-war's men, whereaway?
If now no din'd drum beat to quarters 45
On the wilds of midnight waters—
Foemen looming through the spray,
Do yet your gangway lanterns, streaming,
Vainly strive to pierce below,
When, tilted from the slant plank gleam-
ing, 50
A brother you see to darkness go?

But, gunmates lashed in shotted canvas,
 If where long watch-below we keep,
 Never the shrill "*All hands up hammocks!*"
 Breaks the spell that charms your sleep, 55
 And summoning trumps might vainly call,
 And booming guns implore—
 A beat, a heart-beat musters all,
 One heart-beat at heart-core
 It musters But to clasp, retain, 60
 To see you at the halcyons' man—
 To hear your chorus once again!

FAR OFF-SHORE

[1888]

Look, the raft, a signal flying,
Thin—a shred,
None upon the lashed spars lying,
Quick or dead

Cries the sea-fowl, hovering over,
 "Crew, the crew?"
 And the billow, reckless rover,
 Sweeps anew!

TO NED

[1888]

Where is the world we roved, Ned Bunn?
Hollows thereof lay rich in shade
By voyagers old inviolate thrown
Ere Paul Pry cruised with Pelf and
Trade
To us old lads some thoughts come home
Who roamed a world young lads no more
shall roam

Nor less the satiate-year impends
When, wearying of routine-resorts,

The pleasure-hunter shall break loose,
Ned, for our Pantheistic ports — 10
Marquesas and glenned isles that be
Authentic Edens in a Pagan sea

The charm of scenes untold shall lure,
And, Ned, a legend urge the flight—
The Typee-truants under stars 15
Unknown to Shakespeare's *Midsummer-*
Night.

And man, if lost to Saturn's Age,¹
Yet feeling life no Syrian pilgrimage²

But, tell, shall he, the tourist, find
Our isles the same in violet-glow 20
Enamoring us what years and years—
Ah, Ned, what years and years ago!
Well, Adam advances, smart in pace,
But scarce by violets that advance you
 trace

But we, in anchor-watches calm, 25
The Indian Psyche's languor won,
And, musing, breathed primeval balm
From Edens ere yet overrun,
Marvelling mild if mortal twice,
Here and hereafter, touch a Paradise 30

THE ENVIABLE ISLES

[1888]

Through storms you reach them and from
 storms are free
 Afar descried, the foremost dear in hue,
 But, nearer, green, and, on the marge, the
 sea
 Makes thunder low and mist of rain-
 bowed dew

But, inland, where the sleep that folds the
hills 5
A dreamer sleep, the trance of God, in-
stills—
On uplands hazed, in wandering airs
aswoon,
Slow-swaying palms salute love's cypress
tree

¹ Golden Age

² Desert pilgrimage

Adown in vale where pebbly runlets
 croon
 A song to lull all sorrow and all glee 10
 Sweet-fern and moss in many a glade are
 here,
 Where, strown in flocks, what cheek-
 flushed myriads lie
 Dimpling in dream—unconscious slumber-
 ers mere,
 While billows endless round the beaches
 die

THE RAVAGED VILLA

[1891]

In shards the sylvan vases lie,
 Their links of dance undone,
 And brambles wither by thy brim,
 Choked fountain of the sun!
 The spider in the laurel spins, 5
 The weed exiles the flower,
 And, flung to kiln, Apollo's bust
 Makes lime for Mammon's tower

MONODY

[1891]

To have known him, to have loved him
 After lonesome long,
 And then to be estranged in life,
 And neither in the wrong,
 And now for death to set his seal— 5
 Ease me, a little ease, my song!

By wintry hills his hermit-mound
 The sheeted snow-drifts drape,
 And houseless there the snow-bird flits
 Beneath the fir-trees' crape '10
 Glazed now with ice the cloistral vine
 That hid the shyest grape

THE ENTHUSIAST

[1891]

*"Though He slay me yet will I
 trust in Him"*

Shall hearts that beat no base retreat
 In youth's magnanimous years—
 Ignoble hold it, if discreet

When interest tames to fears,
 Shall spirits that worship light 5
 Perfidious deem its sacred glow,
 Recant, and trudge where worldlings go,
 Conform and own them right?

Shall Time with creeping influence cold
 Unnerve and cow? the heart 10
 Pine for the heartless ones enrolled
 With palterers of the mart?
 Shall faith abjure her skies,
 Or pale probation blench her down
 To shrink from Truth so still, so lone 15
 Mid loud gregarious lies?

Each burning boat in Caesar's rear,
 Flames—No return through me!
 So put the torch to ties though dear,
 If ties but tempters be 20
 Nor cringe if come the night
 Walk through the cloud to meet the pall,
 Though light forsake thee, never fall
 From fealty to light

BILLY BUDD, FORETOPMAN

WHAT BEFELL HIM IN THE YEAR OF
 THE GREAT MUTINY

PREFACE

The year 1797, the year of this narra-
 tive, belongs to a period which, as every
 thinker now feels, involved a crisis for
 Christendom not exceeded in its undeter-
 mined momentousness at the time by any
 other era whereof there is record The

opening proposition made by the Spirit of that Age involved rectification of the Old World's hereditary wrongs. In France, to some extent, this was bloodily effected. But what then? Straightway the Revolution itself became a wrongdoer, one more oppressive than the kings. Under Napoleon it enthroned upstart kings, and initiated that prolonged agony of continual war whose final throes was Waterloo. During those years not the wisest could have foreseen that the outcome of all would be what to some thinkers apparently it has since turned out to be—a political advance along nearly the whole line for Europeans.

Now, as elsewhere hinted, it was something caught from the Revolutionary Spirit that at Spithead¹ emboldened the man-of-war's men to rise against real abuses, long-standing ones, and afterwards at the Nore² to make inordinate and aggressive demands—successful resistance to which was confirmed only when the ringleaders were hung for an admonitory spectacle to the anchored fleet. Yet in a way analogous to the operation of the Revolution at large—the Great Mutiny, though by Englishmen naturally deemed monstrous at the time, doubtless gave the first latent prompting to most important reforms in the British navy.

CHAPTER I

(An Inside Narrative)

IN THE TIME before steamships, or then more frequently than now, a stroller along the docks of any considerable seaport would occasionally have his attention arrested by a group of bronzed marines, man-of-war's men or merchant-sailors in holiday attire ashore on liberty. In certain instances they would flank, or, like a body-guard, quite surround some superior figure of their own class, moving along with them like Aldebaran among the lesser lights of his constellation. That signal object was the "Handsome Sailor" of the less prosaic time, alike of the military and merchant

navies. With no perceptible trace of the vain-glorious about him, rather with the off-hand unaffectedness of natural regality, he seemed to accept the spontaneous homage of his shipmates. A somewhat remarkable instance occurs to me. In Liverpool, now half a century ago I saw under the shadow of the great dingy street-wall of Prince's Dock (an obstruction long since removed) a common sailor, so intensely black that he must needs have been a native African of the unadulterated blood of Ham. A symmetric figure, much above the average in height. The two ends of a gay silk handkerchief thrown loose about the neck danced upon the displayed ebony of his chest, in his ears were big hoops of gold, and a Scotch Highland bonnet with a tartan band set off his shapely head.

It was a hot noon in July, and his face, lustrous with perspiration, beamed with barbaric good-humour. In jovial sallies right and left, his white teeth flashing into view, he rollicked along, the centre of a company of his shipmates. These were made up of such an assortment of tribes and complexions as would have well fitted them to be marched up by Anacharsis Cloots³ before the bar of the first French Assembly as Representatives of the Human Race. At each spontaneous tribute rendered by the wayfarers to this black pagod of a fellow—the tribute of a pause and stare, and less frequent an exclamation—the motley retinue showed that they took that sort of pride in the evoker of it which the Assyrian priests doubtless showed for their grand sculptured Bull when the faithful prostrated themselves. To return—

If in some cases a bit of a nautical

¹ Roadstead in the English Channel between Portsmouth and the Isle of Wight.

² Sandbank at the mouth of the Thames, scene of the famous mutiny of 1797.

³ Jean Baptiste du Val, Baron von Cloots (1755-94), for his "Declaration of the Rights of Man" before the French Assembly called "the orator of the human race."

Murat⁴ in setting forth his person ashore, the Handsome Sailor of the period in question evinced nothing of the dandified Billy-be-Damn—an amusing character all but extinct now, but occasionally to be encountered, and in a form yet more amusing than the original, at the tiller of the boats on the tempestuous Erie Canal or, more likely, vapouring in the grogeries along the towpath. Invariably a proficient in his perilous calling, he was also more or less of a mighty boxer or wrestler. It was strength and beauty. Tales of his prowess were recited. Ashore he was the champion, afloat the spokesman, on every suitable occasion always foremost. Close-reefing topsails in a gale, there he was—astide the weather yard-arm-end, foot in “stirrups,” both hands tugging at the “earring” as at a bridle, in very much the attitude of the young Alexander curbing the fiery Bucephalus. A superb figure, tossed up as by the horns of Taurus against the thunderous sky, cheerily hallooing to the strenuous file along the spar.

The moral nature was seldom out of keeping with the physical make. Indeed, except as toned by the former, the comeliness and power, always attractive in masculine perfection, hardly could have drawn the sort of homage the Handsome Sailor, in some examples, received from his less gifted associates.

Such a cynosure, at least in aspect, and something such too in nature, though with important variations made apparent as the story proceeds, was welkin-eyed Billy Budd, or Baby Budd—as more familiarly, under circumstances hereafter to be given, he at last came to be called—aged twenty-one, a foretopman of the fleet towards the close of the last decade of the eighteenth century. It was not very long prior to the time of the narration that follows, that he had entered the King’s Service, having been impressed on the Narrow Seas from a homeward-bound English merchantman into a seventy-four outward-bound, *HMS Indomitable*, which ship, as was not unusual in those hurried days, had been

obliged to put to sea short of her proper complement of men. Plump upon Billy at first sight in the gangway the boarding officer, Lieutenant Ratcliffe, pounced, even before the merchantman’s crew formally was mustered on the quarter-deck for his deliberate inspection. And him only he elected. For whether it was because the other men when ranged before him showed to ill advantage after Billy, or whether he had some scruples in view of the merchantman being rather short-handed, however it might be, the officer contented himself with his first spontaneous choice. To the surprise of the ship’s company, though much to the Lieutenant’s satisfaction, Billy made no demur. But indeed any demur would have been as idle as the protest of a goldfinch popped into a cage.

Noting this uncomplaining acquiescence, all but cheerful one might say, the shipmates turned a surprised glance of silent reproach at the sailor. The shipmaster was one of those worthy mortals found in every vocation,—even the humbler ones,—the sort of person whom everybody agrees in calling “a respectable man.” And—nor so strange to report as it may appear to be—though a ploughman of the troubled waters, life-long contending with the intractable elements, there was nothing this honest soul at heart loved better than simple peace and quiet. For the rest, he was fifty or thereabouts, a little inclined to corpulence, a prepossessing face, unwhiskered, and of an agreeable colour—a rather full face, humanely intelligent in expression. On a fair day with a fair wind and all going well, a certain musical chime in his voice seemed to be the veritable unobstructed outcome of the innermost man. He had much prudence, much conscientiousness, and there were occasions when these virtues were the cause of overmuch disquietude in him. On a passage, so long as his craft was in any proximity to land, there was no sleep for Captain Graveling.

⁴ Joachim Murat (1767-1815), one of Napoleon’s leading generals, later king of Naples.

He took to heart those serious responsibilities not so heavily borne by some ship-masters

Now, while Billy Budd was down in the fore-castle, getting his kit together, the *Indomitable's* Lieutenant—burly and bluff, nowise disconcerted by Captain Graveling's omitting to proffer the customary hospitalities on an occasion so unwelcome to him, an omission simply caused by preoccupation of thought—unceremoniously invited himself into the cabin, and also to a flask from the spirit locker, a receptacle which his experienced eye instantly discovered. In fact, he was one of those sea-dogs in whom all the hardship and peril of naval life in the great prolonged wars of his time never impaired the natural instinct for sensuous enjoyment. His duty he always faithfully did, but duty is sometimes a dry obligation, and he was for mitigating its aridity whensoever possible with a fertilizing decoction of strong waters. For the cabin's proprietor there was nothing left but to play the part of the enforced host with whatever grace and alacrity were practicable. As necessary adjuncts to the flask he silently placed tumbler and water-jug before the irrepressible guest. But excusing himself from partaking just then, he dismally watched the unembarrassed officer deliberately diluting his grog a little, then tossing it off in three swallows, pushing the empty tumbler away, yet not so far as to be beyond easy reach, at the same time settling himself in his seat and smacking his lips with high satisfaction, looking straight at the host.

These proceedings over, the Master broke the silence, and there lurked a rueful reproach in the tone of his voice. "Lieutenant, you are going to take my best man from me, the jewel of 'em."

"Yes, I know," rejoined the other, immediately drawing back the tumbler preliminary to a replenishing. "Yes, I know. Sorry."

"Beg pardon, but you don't understand, Lieutenant. See here now. Before I shipped that young fellow, my fore-castle was a rat-

pit of quarrels. It was black times, I tell you, aboard the *'Rights'* here. I was worried to that degree my pipe had no comfort for me. But Billy came, and it was like a Catholic priest striking peace in an Irish shindy. Not that he preached to them or said or did anything in particular, but a virtue went out of him, sugaring the sour ones. They took to him like hornets to treacle, all but the bluffer of the gang, the big shaggy chap with the fire-red whiskers. He, indeed, out of envy perhaps of the newcomer, and thinking such a "sweet and pleasant fellow," as he mockingly designated him to the others, could hardly have the spirit of a game-cock, must needs bestir himself in trying to get up an ugly row with him. Billy forbore with him and reasoned with him in a pleasant way—he is something like myself, Lieutenant, to whom aught like a quarrel is hateful—but nothing served. So, in the second dog-watch one day the Red-Whiskers, in the presence of the others, under pretence of showing Billy just whence a sirloin steak was cut—for the fellow had once been a butcher—insultingly gave him a dig under the ribs. Quick as lightning Billy let fly his arm. I dare say he never meant to do quite as much as he did, but anyhow he gave the burly fool a terrible drubbing. It took about half a minute, I should think. And, Lord bless you, the lubber was astonished at the celerity. And will you believe it, Lieutenant, the Red-Whiskers now really loves Billy—loves him, or is the biggest hypocrite that ever I heard of. But they all love him. Some of 'em do his washing, darn old trousers for him, the carpenter is at odd times making a pretty little chest of drawers for him. Anybody will do anything for Billy Budd, and it's the happy family here. Now, Lieutenant, if that young fellow goes—I know how it will be aboard the *'Rights'*. Not again very soon shall I, coming up from dinner, lean over the capstan smoking a quiet pipe—no, not very soon again, I think. Ay, Lieutenant, you are going to take away the jewel of 'em, you are going

to take away my peacemaker" And with that the good soul had really some ado in checking a rising sob

"Well," answered the Lieutenant, who had listened with amused interest to all this, and now waxing merry with his tipple, "Well, blessed are the peacemakers, especially the fighting peacemakers! And such are the seventy-four beauties, some of which you see poking their noses out of the portholes of yonder warship lying-to there for me," pointing through the cabin window at the *Indomitable* "But courage! don't look so down-hearted, man! Why, I pledge you in advance the royal approbation! Rest assured that His Majesty will be delighted to know that in a time when his hard-tack is not sought for by sailors with such avidity as should be, a time also when some shipmasters privily resent the borrowing from them of a tar or two for the service, His Majesty, I say, will be delighted to learn that *one* shipmaster, at least, cheerfully surrenders to the King the flower of his flock—a sailor who with equal loyalty makes no dissent—But where's my beauty? Ah," looking through the cabin's open door "Here he comes, and, by jove—lugging along his chest—Apollo with his portmanteau! My man," stepping out to him, "you can't take that big box on board a warship! The boxes there are mostly shot-boxes! Put up your duds in a bag, lad! Boot and saddle for the cavalryman, bag and hammock for the man-of-war's man!"

The transfer from chest to bag was made. And, after seeing his man into the cutter, and then following him down, the Lieutenant pushed off from the *Rights-of-Man*. That was the merchant ship's name, though by her master and crew abbreviated in sailor fashion into the "*Rights*." The hard-headed Dundee owner was a staunch admirer of Thomas Paine, whose book in rejoinder to Burke's arraignment of the French Revolution had then been published for some time and had gone everywhere. In christening his vessel after the title of Paine's volume,⁵ the man of Dundee was

something like his contemporary shipowner, Stephen Girard of Philadelphia, whose sympathies alike with his native land and its liberal philosophies he evinced by naming his ships after Voltaire, Diderot, and so forth.

But now, when the boat swept under the merchantman's stern, and officer and oarsmen were noting,—some bitterly and others with a grin,—the name emblazoned there, just then it was that the new recruit jumped up from the bow where the coxswain had directed him to sit, waving his hat to his silent shipmates sorrowfully looking over at him from the taffrail, and bade the lads a genial good-bye. Then making a salutation as to the ship herself, "And good-bye to you too, old *Rights-of-Man*!"

"Down, Sir," roared the Lieutenant, instantly assuming all the rigour of his rank, though with difficulty repressing a smile.

To be sure, Billy's action was a terrible breach of naval decorum. But in that decorum he had never been instructed, in consideration of which the Lieutenant would hardly have been so energetic in reproof but for the concluding farewell to the ship. This he rather took as meant to convey a covert sally on the new recruit's part—a sly slur at impressment in general, and that of himself in especial. And yet, more likely, if satire it was in effect, it was hardly so by intention, for Billy (though happily endowed with the gaiety of high health, youth and a free heart) was yet by no means of a satirical turn. The will to it and the sinister dexterity were alike wanting. To deal in double meaning and insinuations of any sort was quite foreign to his nature.

As to his enforced enlistment—that he seemed to take pretty much as he was wont to take any vicissitude of weather. Like the animals, though no philosopher, he was, without knowing it, practically a fatalist. And, it may be, that he rather liked this adventurous turn in his affairs which

⁵ See pp. 300-301, *supra*.

promised an opening into novel scenes and martial exertments

Aboard the *Indomitable* our merchant-sailor was forthwith rated as an able seaman, and assigned to the starboard watch of the foretop. He was soon at home in the service, not at all disliked for his unpretentious good looks and his rather genial happy-go-lucky air. No merrier man in his mess, in marked contrast to certain other individuals included like himself among the impressed portions of the ship's company, for these when not actively employed were sometimes—and more particularly in the last dog-watch, when the drawing near of twilight induced reverie—apt to fall into a sabbish mood which in some partook of sullenness. But they were not so young as our foretopman, and no few of them must have known a hearth of some sort, others may have had wives and children left, too probably, in uncertain circumstances, and hardly any but must have acknowledged kith and kin, while for Billy, as will shortly be seen, his entire family was practically invested in himself.

CHAPTER II

Though our new-made foretopman was well received in the top and on the gun-decks, hardly here was he that cynosure he had previously been among those minor ship's companies of the merchant marine, with which companies only had he hitherto consorted.

He was young, and despite his all but fully developed frame, in aspect looked even younger than he really was. This was owing to a lingering adolescent expression in the as yet smooth face, all but feminine in purity of natural complexion, but where, thanks to his seagoing, the lily was quite suppressed and the rose had some ado visibly to flush through the tan.

To one essentially such a novice in the complexities of factitious life, the abrupt transition from his former and simpler sphere to the ampler and more knowing world of a great war-ship—this might well

have abashed him had there been any conceit or vanity in his composition. Among her miscellaneous multitude, the *Indomitable* mustered several individuals who, however inferior in grade, were of no common natural stamp: sailors more signally susceptible of that air which continuous martial discipline and repeated presence in battle can in some degree impart even to the average man. As the "Handsome Sailor" Billy Budd's position aboard the seventy-four was something analogous to that of a rustic beauty transplanted from the provinces and brought into competition with the high-born dames of the court. But this change of circumstances he scarce noted. As little did he observe that something about him provoked an ambiguous smile in one or two harder faces among the blue-jackets. Nor less unaware was he of the peculiar favourable effect his person and demeanour had upon the more intelligent gentlemen of the quarter-deck. Nor could this well have been otherwise. Cast in a mould peculiar to the finest physical examples of those Englishmen in whom the Saxon strain would seem not at all to partake of any Norman or other admixture, he showed in face that humane look of reposeful good nature which the Greek sculptor in some instances gave to his heroic strong man, Hercules. But this again was subtly modified by another and pervasive quality. The ear, small and shapely, the arch of the foot, the curve in mouth and nostril, even the indurated hand dyed to the orange-tawny of the toucan's bill, a hand telling of the halyards and tar-buckets, but, above all, something in the mobile expression, and every chance attitude and movement, something suggestive of a mother eminently favoured by Love and the Graces, all this strangely indicated a lineage in direct contradiction to his lot. The mysteriousness here became less mysterious through a matter of fact elicited when Billy at the capstan was being formally mustered into the service. Asked by the officer, a small, brisk little gentleman as it chanced, among other questions, his

place of birth, he replied, "Please, Sir, I don't know."

"Don't know where you were born? Who was your father?"

"God knows, Sir."

Struck by the straightforward simplicity of these replies, the officer next asked, "Do you know anything about your beginning?"

"No, Sir. But I have heard that I was found in a pretty silk-lined basket hanging one morning from the knocker of a good man's door in Bristol."

"'Found,' say you? Well," throwing back his head and looking up and down the new recruit, "well, it turns out to have been a pretty good find. Hope they'll find some more like you, my man, the fleet sadly needs them."

Yes, Billy Budd was a foundling, a presumable by-blow, and, evidently, no ignoble one. Noble descent was as evident in him as in a blood horse.

For the rest, with little or no sharpness of faculty or any trace of the wisdom of the serpent, nor yet quite a dove, he possessed that kind and degree of intelligence which goes along with the unconventional rectitude of a sound human creature—one to whom not as yet had been proffered the questionable apple of knowledge. He was illiterate. He could not read, but he could sing, and like the illiterate nightingale was sometimes the composer of his own song.

Of self-consciousness he seemed to have little or none, or about as much as we may reasonably impute to a dog of St. Bernard's breed.

Habitually being with the elements, and knowing little more of the land than as a beach, or, rather, that portion of the terraqueous globe, providentially set apart for dance-houses, doxies and tapsters, in short what sailors call a "fiddlers' green," his simple nature remained unsophisticated by those moral obliquities which are not in every case incomparable with that unmanufactured thing known as respectability. But are sailors, frequenters of fiddlers' greens, without vices? No, but less often

than with landsmen do their vices, so called, partake of crookedness of heart, seeming less to proceed from viciousness than from exuberance of vitality after long restraint, frank manifestations in accordance with natural law. By his original constitution aided by the cooperating influences of his lot, Billy in many respects was little more than a sort of upright barbarian, much such perhaps as Adam presumably might have been ere the urbane Serpent wiggled himself into his company.

And here be it submitted that, apparently going to corroborate the doctrine of man's fall—a doctrine now popularly ignored—it is observable that where certain virtues pristine and unadulterate peculiarly characterize anybody in the external uniform of civilization, they will upon scrutiny seem not to be derived from custom or convention but rather to be out of keeping with these, as if indeed exceptionally transmitted from a period prior to Cain's City and civilized man. The character marked by such qualities has to an unvitiated taste an untampered-with flavour like that of berries, while the man thoroughly civilized, even in a fair specimen of the breed, has to the same moral palate a questionable smack as of a compounded wine. To any stray inheritor of these primitive qualities found, like Caspar Hauser,⁶ wandering dazed in any Christian capital of our time, the poet's famous invocation, near two thousand years ago, of the good rustic out of his latitude in the Rome of the Cæsars, still appropriately holds —

*"Faithful in word and thought,
What has Thee, Fabian, to the city
brought?"*⁷

Though our Handsome Sailor had as

⁶ A youth found in Nuremberg in 1828, dressed as a peasant but seemingly wholly unaccustomed to human society. He was befriended by Earl Stanhope, and later mysteriously assassinated. His story is the subject of a novel by the German writer, Jakob Wassermann, and of other works.

⁷ *Martial*, bk IV, 5.

much of masculine beauty as one can expect anywhere to see, nevertheless, like the beautiful woman in one of Hawthorne's minor tales,⁸ there was just one thing amiss in him. No visible blemish, indeed, as with the lady, no, but an occasional liability to a vocal defect. Though in the hour of elemental uproar or peril, he was everything that a sailor should be, yet under sudden provocation of strong heart-feeling his voice, otherwise singularly musical, as if expressive of the harmony within, was apt to develop an organic hesitancy,—in fact more or less of a stutter or even worse. In this particular Billy was a striking instance that the arch interpreter, the envious marplot of Eden, still has more or less to do with every human consignment to this planet of earth. In every case, one way or another, he is sure to slip in his little card, as much as to remind us—I too have a hand here.

The avowal of such an imperfection in the Handsome Sailor should be evidence not alone that he is not presented as a conventional hero, but also that the story in which he is the main figure is no romance.

CHAPTER III

At the time of Billy Budd's arbitrary enlistment into the *Indomitable* that ship was on her way to join the Mediterranean fleet. No long time elapsed before the junction was effected. As one of that fleet the seventy-four participated in its movements though at times on account of her superior sailing qualities, in the absence of frigates, despatched on separate duty as a scout—and at times on less temporary service. But with all this the story has little concernment, restricted as it is to the inner life of one particular ship and the career of an individual sailor.

It was the summer of 1797. In April of that year had occurred the commotion at Spithead followed in May by a second and yet more serious outbreak in the fleet at the Nore. The latter is known, and without

exaggeration in the epithet, as the Great Mutiny. It was indeed a demonstration more menacing to England than the contemporary manifestoes and conquering and proselyting armies of the French Directory.

To the Empire, the Nore Mutiny was what a strike in the fire-brigade would be to London threatened by general arson. In a crisis when the Kingdom might well have anticipated the famous signal that some years later published along the naval line of battle what it was that upon occasion England expected of Englishmen, *that* was the time when at the mast-heads of the three-deckers and seventy-fours moored in our own roadstead—a fleet, the right arm of a Power then all but the sole free conservative one of the Old World, the blue-jackets, to be numbered by thousands, ran up with hurrahs the British colours with the union and cross wiped out, by that cancellation transmuting the flag of founded law and freedom defined, into the enemy's red meteor of unbridled and unbounded revolt. Reasonable discontent growing out of practical grievances in the fleet had been ignited into irrational combustion as by live cinders blown across the Channel from France in flames.

The event converted into irony for a time those spirited strains of Dibdin⁹—as a song-writer no mean auxiliary to the English Government—at this European conjuncture, strains celebrating, among other things, the patriotic devotion of the British tar.

"And as for my life, 'tis the King's!"

Such an episode in the Island's grand naval story her naval historians naturally abridge, one of them (G. P. R. James¹⁰) candidly acknowledging that fair would

⁸ "The Birthmark."

⁹ Charles Dibdin (1745-1814), writer of plays and sea-songs.

¹⁰ Historical novelist and historian (1799-1860).

he pass it over did not "impartiality forbid fastidiousness" And yet his mention is less a variation than a reference, having to do hardly at all with details Nor are these readily to be found in the libraries Like some other events in every age befalling states everywhere, including America, the Great Mutiny was of such character that national pride along with views of policy would fain shade it off into the historical background Such events cannot be ignored, but there is a considerate way of historically treating them If a well-constituted individual refrains from blazoning aught amiss or calamitous in his family, a nation in the like circumstance may without reproach be equally discreet

Though after parleyings between Government and the ring-leaders, and concessions by the former as to some glaring abuses, the first uprising—that at Spithead—with difficulty was put down, or matters for a time pacified, yet at the Nore the unforeseen renewal of insurrection on a yet larger scale, and emphasized in the conferences that ensued by demands deemed by the authorities not only inadmissible but aggressively insolent, indicated, if the red flag did not sufficiently do so, what was the spirit animating the men Final suppression, however, there was, but only made possible perhaps by the unswerving loyalty of the marine corps, and a voluntary resumption of loyalty among influential sections of the crews To some extent the Nore Mutiny may be regarded as analogous to the distemporing *irruption* of contagious fever in a frame constitutionally sound, and which anon throws it off

At all events, of these thousands of mutineers were some of the tars who not so very long afterwards—whether wholly prompted thereto by patriotism, or pugnacious instinct, or by both,—helped to win a coronet for Nelson at the Nile,¹¹ and the naval crown of crowns for him at Trafalgar To the mutineers those battles, and especially Trafalgar, were a plenary absolution, and a grand one, for all that goes to make up scenic naval display is heroic

magnificence in aims Those battles, especially Trafalgar, stand unmatched in human annals

CHAPTER IV

Concerning
"The greatest sailor since the world began"
 —TENNYSON

In this matter of writing, resolve as one may to keep to the main road, some by-paths have an enticement not readily to be withstood Beckoned by the genius of Nelson, I am going to err into such a by-path If the reader will keep me company I shall be glad At the least we can promise ourselves that pleasure which is wickedly said to be in sinning, for a literary sin the divergence will be

Very likely it is no new remark that the inventions of our time have at last brought about a change in sea warfare in degree corresponding to the revolution in all warfare effected by the original introduction from China into Europe of gunpowder The first European firearm, a clumsy contrivance, was, as is well known, scouted by no few of the knights as a base implement, good enough peradventure for weavers too craven to stand up crossing steel with steel in flank fight But as ashore knightly valour, though shorn of its blazonry, did not cease with the knights, neither on the seas, though nowadays in encounters there a certain kind of displayed gallantry be fallen out of date as hardly applicable under changed circumstances, did the nobler qualities of such naval magnates as Don John of Austria, Doria, Van Tromp, Jean Bart, the long line of British admirals and the American Decatur of 1812 be-

¹¹ Horatio Nelson (1758-1805), leading British naval hero He defeated the French fleet at Aboukir Bay, Aug 1798, and was for that feat created Baron Nelson of the Nile, but his greatest victory was that over the allied fleets of France and Spain off Trafalgar in 1805, in which he was wounded and died on his own quarter-deck

come obsolete with their wooden walls¹²

Nevertheless, to anybody who can hold the Present at its worth without being inappreciative of the Past, it may be forgiven, if to such an one the solitary old hulk at Portsmouth, Nelson's *Victory*, seems to float there, not alone as the decaying monument of a fame incorruptible, but also as a poetic reproach, softened by its picturesqueness, to the *Monitors* and yet mightier hulls of the European ironclads. And this not altogether because such craft are unsightly, unavoidably lacking the symmetry and grand lines of the old battle-ships, but equally for other reasons.

There are some, perhaps, who while not altogether inaccessible to that poetic reproach just alluded to, may yet on behalf of the new order be disposed to parry it, and this to the extent of iconoclasm, if need be. For example, prompted by the sight of the star inscribed in the *Victory's* deck designating the spot where the Great Sailor fell, these martial utilitarians may suggest considerations implying that Nelson's ornate publication of his person in battle was not only unnecessary, but not military, nay, savoured of foolhardiness and vanity. They may add, too, that at Trafalgar it was in effect nothing less than a challenge to death—and death came, and that but for his bravado the victorious admiral might possibly have survived the battle, and so, instead of having his sagacious dying injunction overruled by his immediate successor in command, he himself when the contest was decided might have brought his shattered fleet to anchor, a proceeding which might have averted the deplorable loss of life by shipwreck in the elemental tempest that followed the martial one.

Well, should we set aside the more disputable point whether for various reasons it was possible to anchor the fleet, then plausibly enough the Benthamites¹³ of war may urge the above.

But it *might have been* is but boggy ground to build on. And certainly in foresight as to the larger issue of an encounter,

and anxious preparation for it—buoys the deadly way and mapping it out, as at Copenhagen¹⁴—few commanders have been so painstakingly circumspect as this reckless declarer of his person in fight.

Personal prudence, even when dictated by quite other than selfish considerations, is surely no special virtue in a military man, while an excessive love of glory, exercising to the uttermost a heartfelt sense of duty, is the first. If the name of *Wellington* is not so much a trumpet to the blood as the simpler name of *Nelson*, the reason for this may be inferred from the above. Alfred in his funeral ode on the victor of Waterloo ventures not to call him the greatest soldier of all time, though in the same ode he invokes Nelson as "the greatest sailor since the world began"¹⁵.

At Trafalgar, Nelson, on the brink of opening the fight, sat down and wrote his last brief will and testament. If under the presentment of the most magnificent of all victories, to be crowned by his own glorious death, a sort of priestly motive led him to dress his person in the jewelled vouchers of his own shining deeds, if thus

¹² John of Austria (1547-78), statesman and naval commander, Andrea Doria (1468?-1560), Genoese admiral, Maarten H. Tromp, (1597-1653), Dutch admiral, Jean Bart (1651?-1702), French admiral and naval hero, Stephen Decatur (1779-1820), American naval commander in the wars with the Algerine pirates and the War of 1812.

¹³ Followers of Jeremy Bentham (1748-1832), famous British jurist and philosopher, chief advocate of utilitarianism.

¹⁴ Reference to the naval battle of Copenhagen, 1801, in which Nelson was second in command to Sir Hyde Parker.

¹⁵ Melville is inaccurate in this reference to Alfred Tennyson's "Ode on the Death of the Duke of Wellington." Tennyson wrote

Mighty Seaman, this is he
Was great by land as thou by sea
Thine island loves thee well, thou famous man,
The greatest sailor since our world began
Now, to the roll of muffled drums,
To thee the greatest soldier comes, . . .

to have adorned himself for the altar and the sacrifice were indeed vainglory, then affectation and fustian is each truly heroic line in the great epics and dramas, since in such lines the poet but embodies in verse those exaltations of sentiment that a nature like Nelson, the opportunity being given, vitalizes into acts

CHAPTER V

The outbreak at the Nore was put down. But not every grievance was redressed. If the contractors, for example, were no longer permitted to ply some practices peculiar to their trade everywhere, such as providing shoddy cloth, rations not sound, or false in the measure, not the less impressment, for one thing, went on. By custom sanctioned for centuries, and judicially maintained by a Lord Chancellor as late as Mansfield,¹⁶ that mode of manning the fleet, a mode now fallen into a sort of abeyance but never formally renounced, it was not practicable to give up in those years. Its abrogation would have crippled the indispensable fleet, one wholly under canvas, no steam-power, its innumerable sails and thousands of cannon, everything, in short, worked by muscle alone, a fleet the more insatiate in demand for men, because then multiplying its ships of all grades against contingencies present and to come of the convulsed Continent.

Discontent foreran the Two Mutinies, and more or less it lurkily survived them. Hence it was not unreasonable to apprehend some return of trouble, sporadic or general. One instance of such apprehensions. In the same year with this story, Nelson, then Vice-Admiral Sir Horatio, being with the fleet off the Spanish coast, was directed by the Admiral in command to shift his pennant from the *Captain* to the *Theseus*, and for this reason that the latter ship having newly arrived in the station from home where it had taken part in the Great Mutiny, danger was apprehended from the temper of the men, and it was thought that an officer like Nelson was

the one, not indeed to terrorize the crew into base subjection, but to win them by force of his mere presence back to an allegiance, if not as enthusiastic as his own, yet as true. So it was that for a time on more than one quarter-deck anxiety did exist. At sea precautionary vigilance was strained against relapse. At short notice an engagement might come on. When it did, the lieutenants assigned to batteries felt it incumbent on them in some instances to stand with drawn swords behind the men working the guns.

But on board the seventy-four in which Billy now swung his hammock, very little in the manner of the men and nothing obvious in the demeanour of the officers would have suggested to an ordinary observer that the Great Mutiny was a recent event. In their general bearing and conduct the commissioned officers of a warship naturally take their tone from the commander, that is if he has that ascendancy of character that ought to be his.

Captain the Honourable Edward Fairfax Vere, to give his full title, was a bachelor of forty or thereabouts, a sailor of distinction, even in a time prolific of renowned seamen. Though allied to the higher nobility, his advancement had not been altogether owing to influences connected with that circumstance. He had seen much service, been in various engagements, always acquitting himself as an officer mindful of the welfare of his men, but never tolerating an infraction of discipline, thoroughly versed in the science of his profession, and intrepid to the verge of temerity, though never injudiciously so. For his gallantry in the West Indian waters as flag-lieutenant under Rodney¹⁷ in that Admiral's crowning victory, over De Grasse, he was made a post-captain.

¹⁶ William Murray, Earl of Mansfield (1705-1793)

¹⁷ George Brydges Rodney (1719-1792), defeated the combined French and Spanish squadrons under the French admiral De Grasse off Martinique.

Ashore in the garb of a civilian, scarce any one would have taken him for a sailor, more especially that he never garnished unprofessional talk with nautical terms, and grave in his bearing, evinced little appreciation of mere humour. It was not out of keeping with these traits that on a passage when nothing demanded his paramount action, he was the most undemonstrative of men. Any landsman observing this gentleman not conspicuous by his stature and wearing no pronounced insignia, emerging from his retreat to the open deck, and noting the silent deference of the officers retreating to leeward, might have taken him for the King's guest, a civilian aboard the King's ship, some highly honourable discreet envoy on his way to an important post. But, in fact, this unobtrusiveness of demeanour may have proceeded from a certain unaffected modesty of manhood sometimes accompanying a resolute nature, a modesty evinced at all times not calling for pronounced action, and which shown in any rank of life suggests a virtue aristocratic in kind.

As with some others engaged in various departments of the world's more heroic activities, Captain Vere, though practical enough upon occasion, would at times betray a certain dreaminess of mood. Standing alone on the weather-side of the greater deck, one hand holding by the rigging, he would absently gaze off at the black sea. At the presentation to him then of some minor matter interrupting the current of his thoughts, he would show more or less irascibility, but instantly he would control it.

In the navy he was popularly known by the appellation—Starry Vere. How such a designation happened to fall upon one who, whatever his sturdy qualities, was without any brilliant ones, was in this wise a favourite knismen, Lord Denton, a free-handed fellow, had been the first to meet and congratulate him upon his return to England from the West Indian cruise, and but the day previous turning over a copy of Andrew Marvell's¹⁸ poems

had lighted, not for the first time, however, upon the lines entitled "Appleton House," the name of one of the seats of their common ancestor, a hero in the German wars of the seventeenth century, in which poem occur the lines,

*"Thus 'tis to have been from the first
In a domestic heaven nursed,
Under the discipline severe
Of Fairfax and the starry Vere"*

And so, upon embracing his cousin fresh from Rodney's victory, wherein he had played so gallant a part, brimming over with just family pride in the sailor of their house, he exuberantly exclaimed, "Give ye joy, Ed, give ye joy, my starry Vere!" This got currency, and the novel prefix serving in familiar parlance readily to distinguish the *Indomitable's* Captain from another Vere, his senior, a distant relative, an officer of like rank in the navy, it remained permanently attached to the surname.

CHAPTER VI

In view of the part that the commander of the *Indomitable* plays in scenes shortly to follow, it may be well to fill out that sketch of him outlined in the previous chapter. Aside from his qualities as a sea-officer Captain Vere was an exceptional character. Unlike no few of England's renowned sailors, long and arduous service with signal devotion to it, had not resulted in absorbing and *salt*ing the entire man. He had a marked leaning towards everything intellectual. He loved books, never going to sea without a newly replenished library, compact but of the best. The isolated leisure, in some cases so wearisome, falling at intervals to commanders even during a war-cruise, never was tedious to Captain Vere. With nothing of that literary taste which less heeds the

¹⁸ British poet, 1621-1678

thing conveyed than the vehicle, his bias was towards those books to which every serious mind of superior order occupying any active post of authority in the world, naturally inclines, books treating of actual men and events, no matter of what era—history, biography and unconventional writers, who, free from cant and convention, like Montaigne, honestly, and in the spirit of common sense, philosophize upon realities

In this love of reading he found confirmation of his own more reserved thoughts—confirmation which he had vainly sought in social converse, so that as touching most fundamental topics, there had got to be established in him some positive convictions which he forefelt would abide in him essentially unmodified so long as his intelligent part remained unimpaired. In view of the humbled position in which his lot was cast, this was well for him. His settled convictions were as a dyke against those invading waters of novel opinion, social, political, and otherwise, which carried away as in a torrent no few minds in those days, minds by nature not inferior to his own. While other members of that aristocracy to which by birth he belonged were incensed at the innovators mainly because their theories were inimical to the privileged classes, Captain Vere disinterestedly opposed them because they seemed to him incapable of embodiment in lasting institutions, but at war with the peace of the world and the good of mankind.

With minds less stored than his and less earnest, some officers of his rank, with whom at times he would necessarily consort, found him lacking in the companionable quality, a dry and bookish gentleman as they deemed. Upon any chance withdrawal from their company one would be apt to say to another something like this: "Vere is a noble fellow, Starry Vere. 'Spite the gazettes, Sir Hoiatio is at bottom scarce a better seaman or fighter. But between you and me now, don't you think there is a queer streak of the pedantic running

through him? Yes, like the King's yarn in a coil of navy-rope?"

Some apparent ground there was for this sort of confidential criticism, since not only did the Captain's discourse never fall into the jocosely familiar, but in illustrating any point touching the stirring personages and events of the time, he would cite some historic character or incident of antiquity with the same easy air that he would cite from the moderns. He seemed unmindful of the circumstance that to his bluff company such remote allusions, however pertinent they might really be, were altogether alien to men whose reading was mainly confined to the journals. But consideration in such matters is not easy to natures constituted like Captain Vere's. Then honesty prescribes to them directness, sometimes far-reaching, like that of a migratory fowl that in its flight never heeds when it crosses a frontier.

CHAPTER VII

The lieutenants and other commissioned gentlemen forming Captain Vere's staff it is not necessary here to particularize nor needs it to make mention of any of the warrant-officers. But among the petty officers was one who, having much to do with the story, may as well be forthwith introduced. This portrait I essay, but shall never hit it.

This was John Claggart, the master-at-arms. But that sea-title may to landsmen seem somewhat equivocal. Originally, doubtless, that petty-officer's function was the instruction of the men in the use of arms, sword, or cutlass. But very long ago, owing to the advance in gunnery making hand-to-hand encounters less frequent—and giving to nitre and sulphur the pre-eminence over steel—that function ceased, the master-at-arms of a great war-ship becoming a sort of Chief of Police charged, among other matters, with the duty of preserving order on the populous lower gun-decks.

Claggart was a man of about five-and-

thirty, somewhat spare and tall yet of no ill figure upon the whole. His hand was too small and shapely to have been accustomed to hard toil. The face was a notable one, the features, all except the chin, cleanly cut as those on a Greek medallion, yet the chin, beardless as Tecumseh's,¹⁹ had something of the strange protuberant heaviness in its make that recalled the prints of the Rev. Dr. Titus Oates,²⁰ the historical deponent with the clerical drawl in the time of Charles II, and the fraud of the alleged Popish Plot. It served Claggart in his office that his eye could cast a tutoring glance. His brow was of the sort phrenologically associated with more than average intellect, silken jet curls partly clustering over it, making a foil to the pallor below, a pallor tinged with a faint shade of amber akin to the hue of time-tinted marbles of old.

This complexion singularly contrasting with the red or deeply bronzed visages of the sailors, and in part the result of his official seclusion from the sunlight, though it was not exactly displeasing, nevertheless seemed to hint of something defective or abnormal in the constitution and blood. But his general aspect and manner were so suggestive of an education and career incongruous with his naval function, that when not actively engaged in it he looked like a man of high quality, social and moral, who for reasons of his own was keeping meek. Nothing was known of his former life. It might be that he was an Englishman, and yet there lurked a bit of accent in his speech suggesting that possibly he was not such by birth, but through naturalization in early childhood. Among certain grizzled sea-gossips of the gun-decks and fore-castle went a rumour perdue that the master-at-arms was a chevalier who had volunteered into the King's navy by way of compounding for some mysterious swindle whereof he had been arraigned at the King's bench. The fact that nobody could substantiate this report was, of course, nothing against its

secret currency. Such a rumour once started on the gun-decks in reference to almost any one below the rank of a commissioned officer would, during the period assigned to this narrative, have seemed not altogether wanting in credibility to the tarry old wiseacres of a man-of-war crew. And indeed a man of Claggart's accomplishments, without prior nautical experience entering the navy at mature life, as he did, and necessarily allotted at the start to the lowest grade in it, a man, too, who never made allusion to his previous life ashore, these were circumstances which in the dearth of exact knowledge as to his true antecedents opened to the invidious a vague field for unfavourable surmise.

But the sailors' dog-watch gossip concerning him derived a vague plausibility from the fact that now, for some period, the British Navy could so little afford to be squeamish in the matter of keeping up the muster-rolls, that not only were press-gangs notoriously abroad both afloat and ashore, but there was little or no secret about another matter, namely, that the London police were at liberty to capture any able-bodied suspect, and any questionable fellow at large, and summarily ship him to the dock-yard or fleet. Furthermore, even among voluntary enlistments, there were instances where the motive thereto partook neither of patriotic impulse nor yet of a random desire to experience a bit of sea-life and martial adventure. Insolvent debtors of minor grade, together with the promiscuous lame ducks of morality, found in the navy a convenient and secure refuge. Secure, because once enlisted aboard a King's ship, they were as much in sanctuary, as the transgressor of the middle ages harbouring himself under the shadow of the altar. Such sanctioned irregularities, which for obvious reasons

¹⁹ Indian chief and leader of a confederation against the whites, 1768²-1813

²⁰ Forger of the story of the plot to massacre the Protestants and burn London, in 1687 (1649-1795)

the Government would hardly think to parade at the time—and which consequently, and as affecting the least influential class of mankind, have all but dropped into oblivion—lend colour to something for the truth whereof I do not vouch, and hence have some scruple in stating, something I remember having seen in print, though the book I cannot recall, but the same thing was personally communicated to me now more than forty years ago by an old pensioner in a cocked hat, with whom I had a most interesting talk on the terrace at Greenwich, a Baltimore negro, a Trafalgar man. It was to this effect. In the case of a war-ship short of hands, whose speedy sailing was imperative, the deficient quota, in lack of any other way of making it good, would be eked out by drafts called direct from the jails. For reasons previously suggested it would not perhaps be very easy at the present day directly to prove or disprove the allegation. But allowed as a verity, how significant would it be of England's straits at the time, confronted by those wars which, like a flight of harpies, rose shrieking from the din and dust of the fallen Bastille. That era appears measurably clear to us who look back at it, and but read of it. But to the grandfathers of us greybeards, the thoughtful of them, the genius of it presented an aspect like that of Camoens' ²¹ "Spirit of the Cape," an eclipsing menace, mysterious and prodigious. Not America even was exempt from apprehension. At the height of Napoleon's unexampled conquests, there were Americans who had fought at Bunker Hill, who looked forward to the possibility that the Atlantic might prove no barrier against the ultimate schemes of this portentous upstart from the revolutionary chaos, who seemed in act of fulfilling the judgment prefigured in the Apocalypse.

But the less credence was to be given to the gun-deck talk touching Claggart, seeing that no man holding his office in a man-of-war can ever hope to be popular

with the crew. Besides, in derogatory comments upon any one against whom they have a grudge, or for any reason or no reason mislike, sailors are much like land-men: they are apt to exaggerate or romance.

About as much was really known to the *Indomitable's* tars of the Master-at-arms' career before entering the service as an astronomer knows about a comet's travels prior to its first observable appearance in the sky. The verdict of the sea *quadruncs* has been cited only by way of showing what sort of moral impression the man made upon rude uncultivated natures whose conceptions of human wickedness were necessarily of the narrowest, limited to ideas of vulgar rascality,—a thief among the swinging hammocks during a night-watch, or the man-brokers and land-sharks of the seaports.

It was no gossip, however, but fact, that though, as before hinted, Claggart upon his entrance into the navy was, as a novice, assigned to the least honourable section of a man-of-war's crew, embracing the drudges, he did not long remain there.

The superior capacity he immediately evinced, his constitutional sobriety, his ingratiating deference to superiors, together with a peculiar ferreting genius manifested on a singular occasion, all thus capped by a certain austere patriotism, abruptly advanced him to the position of Master-at-arms.

Of this maritime Chief of Police the ship's-corporals, so called, were the immediate subordinates, and compliant ones, and thus—as is to be noted in some business departments ashore—almost to a degree inconsistent with entire moral volition. His place put various converging wires of underground influence under the Chief's control, capable when astutely worked through his understrappers of operating to the mysterious discomfort, if nothing worse, of any of the sea-commonalty.

²¹ Luiz Vaz de Camões, English spelling Camoens (1524-80), Portuguese poet.

CHAPTER VIII

Life in the foretop well agreed with Billy Budd. There, when not actually engaged on the yards yet higher aloft, the topmen, who as such had been picked out for youth and activity, constituted an aerial club, lounging at ease against the smaller stunsails rolled up into cushions, spinning yarns like the lazy gods, and frequently amused with what was going on in the busy world of the decks below. No wonder then that a young fellow of Billy's disposition was well content in such society. Giving no cause of offence to anybody, he was always alert at a call. So in the merchant service it had been with him. But now such punctiliousness in duty was shown that his topmates would sometimes good-naturedly laugh at him for it. This heightened alacrity had its cause, namely, the impression made upon him by the first formal gangway-punishment he had ever witnessed, which befell the day following his impressment. It had been incurred by a little fellow, young, a novice, an afterguardsman absent from his assigned post when the ship was being put about, a dereliction resulting in a rather serious hitch to that manœuvre, one demanding instantaneous promptitude in letting go and making fast. When Billy saw the culprit's naked back under the scourge gridironed with red welts, and worse, when he marked the dire expression in the liberated man's face, as with his woolen shirt flung over him by the executioner, he rushed forward from the spot to bury himself in the crowd, Billy was horrified. He resolved that never through remissness would he make himself liable to such a visitation, or do or omit aught that might merit even verbal reproof. What then was his surprise and concern when ultimately he found himself getting into petty trouble occasionally about such matters as the stowage of his bag, or something amiss in his hammock, matters under the police oversight of the ship's-corpoals of the lower decks, and which brought down on

him a vague threat from one of them.

So heedful in all things as he was, how could this be? He could not understand it, and it more than vexed him. When he spoke to his young topmates about it, they were either lightly incredulous, or found something comical in his unconcealed anxiety. "Is it your bag, Billy?" said one, "well, sew yourself up in it, Billy boy, and then you'll be sure to know if anybody meddles with it."

Now there was a veteran aboard who, because his years began to disqualify him for more active work, had been recently assigned duty as mainmast-man in his watch, looking to the gear belayed at the rail round about that great spar near the deck. At off-times the foretopman had picked up some acquaintance with him, and now in his trouble it occurred to him that he might be the sort of person to go to for wise counsel. He was an old Dansker long anglicized in the service, of few words, many wrinkles and some honourable scars. His wizened face, time-tinted and weather-stormed to the complexion of an antique parchment, was here and there peppered blue by the chance explosion of a gun-cartridge in action. He was an *Agamemnon*-man, some two years prior to the time of this story having served under Nelson, when but Sir Horatio, in that ship immortal in naval memory, and which, dismantled and in part broken up to her bare ribs, is seen a grand skeleton in Haydon's²² etching. As one of a boarding-party from the *Agamemnon* he had received a cut slantwise along one temple and cheek, leaving a long pale scar like a streak of dawn's light falling athwart the dark visage. It was on account of that scar and the affair in which it was known that he had received it, as well as from his blue-peppered complexion, that the Dansker went among the *Indomitable's* crew by the name of "Board-her-in-the-smoke."

Now the first time that his small weazel-

²² Benjamin Robert Haydon (1786-1846), British historical painter.

eyes happened to light on Billy Budd, a certain grim internal meriment set all his ancient wrinkles into antic play. Was it that his eccentric unsentimental old sapience, primitive in its kind, saw, or thought it saw, something which in contrast with the war-ship's environment looked oddly incongruous in the Handsome Sailor? But after slyly studying him at intervals, the old Merlin's equivocal meriment was modified. For now when the twain would meet, it would start in his face a quizzing sort of look, but it would be but momentary, and sometimes replaced by an expression of speculative query as to what might eventually befall a nature like that, dropped into a world not without some man-traps and against whose subtleties simple courage lacking experience and address and without any touch of defensive ugliness, is of little avail, and where such innocence as man is capable of does yet, in a moral emergency, not always sharpen the faculties or enlighten the will.

However it was, the Dansker in his ascetic way rather took to Billy. Nor was this only because of a certain philosophic interest in such a character. There was another cause. While the old man's eccentricities, sometimes bordering on the ursine, repelled the juniors, Billy, undeterred thereby, would make advances, never passing the old *Agamemnon*-man without a salutation marked by that respect which is seldom lost on the aged, however crabbed at times, or whatever their station in life. There was a vein of dry humour, or what not, in the mast-man, and whether in freak of patriarchal irony touching Billy's youth and athletic frame, or for some other and more recondite reason, from the first in addressing him he always substituted Baby for Billy. The Dansker, in fact, being the originator of the name by which the foretopman eventually became known aboard ship.

Well then, in his mysterious little difficulty going in quest of the wrinkled one, Billy found him off duty in a dog-watch ruminating by himself, seated on a shot-

box of the upper gun-deck, now and then surveying with a somewhat cynical regard certain of the more swaggering promenaders there. Billy recounted his trouble, again wondering how it all happened. The salt seer attentively listened, accompanying the foretopman's recitals with queer twitchings of his wrinkles and problematical little sparkles of his small ferret eyes. Making an end of his story, the foretopman asked, "And now, Dansker, do tell me what you think of it."

The old man, shoving up the front of his tarpaulin and deliberately rubbing the long slant scar at the point where it entered the thin hair, laconically said, "Baby Budd, *Jimmy Legs*" (meaning the master-at-arms) "is down on you."

"*Jimmy Legs*!" ejaculated Billy, his welkin eyes expanding, "what for? Why he calls me *the sweet and pleasant young fellow*, they tell me."

"Does he so?" grinned the grizzled one, then said, "Ay, Baby Lad, a sweet voice has *Jimmy Legs*."

"No, not always. But to me he has I seldom pass him but there comes a pleasant word."

"And that's because he's down upon you, Baby Budd."

Such reiteration, along with the manner of it (incomprehensible to a novice), disturbed Billy almost as much as the mystery for which he had sought explanation. Something less unpleasingly oracular he tried to extract. But the old sea-Chiron,²³ thinking perhaps that for the nonce he had sufficiently instructed his young Achilles, pursed his lips, gathered all his wrinkles together, and would commit himself to nothing further.

Years, and those experiences which befall certain shrewder men subordinated lifelong to the will of superiors, all this had developed in the Dansker the pithy guarded cynicism that was his leading characteristic.

²³ One of the Centaurs, teacher of Achilles.

CHAPTER IX

The next day an incident served to confirm Billy Budd in his incredulity as to the Dansker's strange summing up of the case submitted.

The ship at noon going large before the wind was rolling on her course, and he, below at dinner and engaged in some sportful talk with the members of his mess, chanced in a sudden lurch to spill the entire contents of his soup-pan upon the new scrubbed deck. Claggart, the Master-at-arms, official rattan in hand, happened to be passing along the battery, in a bay of which the mess was lodged, and the greasy liquid streamed just across his path. Stepping over it, he was proceeding on his way without comment, since the matter was nothing to take notice of under the circumstances, when he happened to observe who it was that had done the spilling. His countenance changed. Pausing, he was about to ejaculate something hasty at the sailor, but checked himself, and pointing down to the streaming soup, playfully tapped him from behind with his rattan, saying, in a low musical voice, peculiar to him at times, "Handsomely done, my lad! And handsome is as handsome did it, too!" and with that passed on. Not noted by Billy as not coming within his view was the involuntary smile, or rather grimace, that accompanied Claggart's equivocal words. Aridly it drew down the thin corners of his shapely mouth. But everybody taking his remark as meant for humorous, and at which therefore as coming from a superior they were bound to laugh, "with counterfeited glee" acted accordingly, and Billy tickled, it may be, by the allusion to his being the handsome sailor, merrily joined in, then addressing his messmates exclaimed, "There now, who says that Jimmy Legs is down on me!"

"And who said he was, Beauty?" demanded one Donald with some surprise. Whereat the foretopman looked a little foolish, recalling that it was only one person, Board-her-in-the-smoke, who had sug-

gested what to him was the smoky idea that this master-at-arms was in any peculiar way hostile to him. Meantime that functionary, resuming his path, must have momentarily worn some expression less guarded than that of the bitter smile and, usurping the face from the heart, some distorting expression perhaps—for a drummer-boy, heedlessly frolicking along from the opposite direction, and chancing to come into light collision with his person, was strangely disconcerted by his aspect. Nor was the impression lessened when the official, impulsively giving him a sharp cut with the rattan, vehemently exclaimed, "Look where you go!"

CHAPTER X

What was the matter with the Master-at-arms? And, be the matter what it might, how could it have direct relation to Billy Budd, with whom prior to the affair of the spilled soup he had never come into any special contact, official or otherwise? What indeed could the trouble have to do with one so little inclined to give offence as the merchantship's *peacemaker*, even him who in Claggart's own phrase was "The sweet and pleasant young fellow"? Yes, why should *Jimmy Legs*, to borrow the Dansker's expression, be *down* on the Handsome Sailor?

But at heart and not for nothing, as the late chance encounter may indicate to the discerning, down on him, secretly down on him, he assuredly was.

Now to invent something touching the more private career of Claggart—something involving Billy Budd, of which something the latter should be wholly ignorant, some romantic incident implying that Claggart's knowledge of the young blue-jacket began at some period anterior to catching sight of him on board the seventy-four—all this, not so difficult to do, might avail in a more or less interesting way to account for whatever enigma may appear to lurk in the case. But, in fact, there was nothing of the sort. And yet the cause, necessarily

to be assumed as the sole one assignable, is in its very realism as much charged with that prime element of Radcliffian²⁴ romance, *the mysterious*, as any that the ingenuity of the author of the "Mysteries of Udolpho" could devise. For what can more partake of the mysterious than an antipathetically spontaneous and profound such as is evoked in certain exceptional mortals by the mere aspect of some other mortal, however harmless he may be?—if not called forth by that very harmlessness itself.

Now there can exist no irritating juxtaposition of dissimilar personalities comparable to that which is possible aboard a great war-ship fully manned and at sea. There, every day, among all ranks, almost every man comes into more or less of contact with almost every other man. Wholly there to avoid even the sight of an aggravating object one must needs give it Jonah's toss, or jump overboard himself. Imagine how all this might eventually operate on some peculiar human creature the direct reverse of a saint?

But for the adequate comprehending of Claggart by a normal nature, these hints are insufficient. To pass from a normal nature to him one must cross "The deadly space between," and this is best done by induction.

Long ago an honest scholar, my senior, said to me in reference to one who like himself is now no more, a man so unimpeachably respectable that against him nothing was ever openly said, though among the few something was whispered, "Yes, X—— is a nut not to be cracked by the tap of a lady's fan. You are aware that I am the adherent of no organized religion, much less of any philosophy built into a system. Well, for all that, I think that to try and get into X——, enter his labyrinth and get out again, without a clue derived from some source other than what is known as *knowledge of the world*—that were hardly possible, at least for me."

"Why," said I, "X——, however singular a study to some, is yet human, and knowledge of the world assuredly implies the

knowledge of human nature, and in most of its varieties."

"Yes, but a superficial knowledge of it, serving ordinary purposes. But for anything deeper, I am not certain whether to know the world and to know human nature be not two distinct branches of knowledge, which while they may co-exist in the same heart, yet either may exist with little or nothing of the other. Nay, in an average man of the world, his constant rubbing with it blunts that fine spiritual insight indispensable to the understanding of the essential in certain exceptional characters, whether evil ones or good. In a matter of some importance I have seen a girl wind an old lawyer about her little finger. Nor was it the dotage of senile love. Nothing of the sort. But he knew law better than he knew the girl's heart. Coke and Blackstone hardly shed so much light into obscure spiritual places as the Hebrew prophets. And who were they? Mostly recluses."

At the time my inexperience was such that I did not quite see the drift of all this. It may be that I see it now. And, indeed, if that lexicon which is based on Holy Writ were any longer popular, one might with less difficulty define and denominate certain phenomenal men. As it is, one must turn to some authority not liable to the charge of being tinctured with the Biblical element.

In a list of definitions included in the authentic translation of Plato, a list attributed to him, occurs this: "Natural Depravity—a depravity according to nature." A definition which though savouring of Calvinism by no means involves Calvin's dogma as to total mankind. Evidently its intent makes it applicable but to individuals. Not many are the examples of this depravity which the gallows and jail supply. At any rate, for notable instances,—since these have no vulgar alloy of the brute in them, but invariably are dominated by intellectuality,—one must go elsewhere. Civilization,

²⁴ Ann Radcliffe (1764-1823) was a British author of Gothic romances, including *The Mysteries of Udolpho* (1794).

especially if of the austere sort, is auspicious to it. It folds itself in the mantle of respectability. It has its certain negative virtues serving as silent auxiliaries. It never allows wine to get within its guard. It is not going too far to say that it is without vices or small sins. There is a phenomenal pride in it that excludes them from anything. Never mercenary or ambitious. In short, the depravity here meant partakes nothing of the sordid or sensual. It is serious, but free from acerbity. Though no flatterer of mankind it never speaks ill of it.

But the thing which in eminent instances signalizes so exceptional a nature is this: though the man's even temper and discreet bearing would seem to intimate a mind peculiarly subject to the law of reason, not the less in his soul's recesses he would seem to riot in complete exemption from that law, having apparently little to do with reason further than to employ it as an ambidexter implement for effecting the irrational. That is to say: towards the accomplishment of an aim which in wantonness of malignity would seem to partake of the insane, he will direct a cool judgment sagacious and sound.

These men are true madmen, and of the most dangerous sort, for their lunacy is not continuous, but occasional, evoked by some special object, it is secretive and self-contained: so that when most active it is, to the average mind, not distinguished from sanity, and for the reason above suggested that whatever its aims may be (and the aim is never disclosed) the method and the outward proceeding is always perfectly rational.

Now something such was Claggart, in whom was the mania of an evil nature, not engendered by vicious training or corrupting books or licentious living, but born with him and innate, in short, "a depravity according to nature."

Can it be this phenomenon, disowned or not acknowledged, that in some criminal cases puzzles the courts? For this cause have our juries at times not only to endure

the prolonged contentions of lawyers with their fees, but also the yet more perplexing strife of the medical experts with theirs? And why leave it to them? Why not subpoena as well the clerical proficient? Their vocation bringing them into peculiar contact with so many human beings, and sometimes in their least guarded hour, in interviews very much more confidential than those of physician and patient, this would seem to qualify them to know something about those intricacies involved in the question of moral responsibility, whether in a given case, say, the crime proceeded from mania in the brain or rabies of the heart. As to any differences among themselves which clerical proficient might develop on the stand, these could hardly be greater than the direct contradictions exchanged between the remunerated medical experts.

Dark sayings are these, some will say. But why? It is because they somewhat savour of Holy Writ in its phrase "mysteries of iniquity."

The point of the story turning on the hidden nature of the Master-at-arms has necessitated this chapter. With an added hint or two in connection with the incident at the mess, the resumed narrative must be left to vindicate as it may its own credibility.

CHAPTER XI

Pale ire, envy and despair ²⁵

That Claggart's figure was not amiss, and his face, save the chin, well moulded, has already been said. Of these favourable points he seemed not insensible, for he was not only neat but careful in his dress. But the form of Billy Budd was heroic, and if his face was without the intellectual look of the pallid Claggart's, not the less was it lit, like his, from within, though from a different source. The bonfire in his heart

²⁵ The line is from Milton's *Paradise Lost*, Bk IV, l 115, descriptive of Satan approaching Eden.

made luminous the rose-tan in his cheek

In view of the marked contrast between the persons of the twain, it is more than probable that when the Master-at-arms in the scene last given applied to the sailor the proverb *Handsome is as handsome does* he there let escape an ironic inkling, not caught by the young sailors who heard it, as to what it was that had first moved him against Billy, namely, his significant personal beauty

Now envy and antipathy, passions irreconcilable in reason, nevertheless in fact may spring conjoined like Chang and Eng²⁶ in one birth Is Envy then such a monster? Well, though many an arraigned mortal has in hopes of mitigated penalty pleaded guilty to horrible actions, did ever anybody seriously confess to envy? Something there is in it universally felt to be more shameful than even felonious crime And not only does everybody disown it, but the better sort are inclined to incredulity when it is in earnest imputed to an intelligent man But since its lodgment is in the heart, not the brain, no degree of intellect supplies a guarantee against it But Claggart's was no vulgar form of the passion Nor, as directed toward Billy Budd, did it partake of that streak of apprehensive jealousy which marred Saul's visage perturbedly brooding on the comely young David Claggart's envy struck deeper If askance he eyed the good looks, cheery health and frank enjoyment of young life in Billy Budd, it was because these happened to go along with a nature that, as Claggart magnetically felt, had in its simplicity never willed malice or experienced the reactionary bite of that serpent To him, the spirit lodged within Billy, and looking out from his welkin eyes as from windows—that ineffability it was which made the dimple in his dyed cheeks, supplied his joints, and dancing in his yellow curls made him pre-eminently the Handsome Sailor One person excepted, the Master-at-arms was perhaps the only man in the ship intellectually capable of adequately appreciating the moral phe-

nomenon presented in Billy Budd, and the insight but intensified his passion, which, assuming various secret forms within him, at times assumed that of cynic disdain—disdain of innocence To be nothing more than innocent! Yet in an æsthetic way he saw the charm of it, the courageous free-and-easy temper of it, and fain would have shared it, but he despaired of it

With no power to annul the elemental evil in himself, though readily enough he could hide it, apprehending the good, but powerless to be it, a nature like Claggart's, surcharged with energy as such natures almost invariably are, what recourse is left to it but to recoil upon itself and like the scorpion for which the Creator alone is responsible, act out to the end the part allotted it

Passion, and passion in its profoundest, is not a thing demanding a palatial stage whereon to play its part Down among the groundlings, among the beggars and rakers of the garbage, profound passion is enacted And the circumstances that provoke it, however trivial or mean, are no measure of its power In the present instance the stage is a scrubbed gun-deck, and one of the external provocations a man-of-war's man's spilt soup

Now when the Master-at-arms noticed whence came that greasy fluid streaming before his feet, he must have taken it—to some extent wilfully perhaps—not for the mere accident it assuredly was, but for the sly escape of a spontaneous feeling on Billy's part more or less answering to the antipathy on his own In effect a foolish demonstration he must have thought, and very harmless, like the futile kick of a heifer, which yet were the heifer a shod stallion would not be so harmless Even so was it that into the gall of envy Claggart infused the vitriol of his contempt But the incident confirmed to him certain tell-tale reports purveyed to his ear by *Squeak*, one of his more cunning corporals, a grizzled little man, so nicknamed by the sailors on

²⁶ The famous Siamese twins (1811-74)

account of his squeaky voice and sharp visage ferreting about the dark corners of the lower decks after interlopeers, satirically suggesting to them the idea of a rat in a cellar

Now his chief's employing him as an implicit tool in laying little traps for the worryment of the foretopman—for it was from the Master-at-arms that the petty persecutions heretofore adverted to had proceeded—the corporal, having naturally enough concluded that his master could have no love for the sailor, made it his business, faithful understripper that he was, to ferment the ill blood by perverting to his chief certain innocent frolics of the good-natured foretopman, besides inventing for his master sundry contumelious epithets he claimed to have overheard him let fall. The Master-at-arms never suspected the veracity of these reports, more especially as to the epithets, for he well knew how secretly unpopular may become a Master-at-arms—at least a Master-at-arms of those days, zealous in his function—how the blue-jackets shot at him in private their railery and wit, the nickname by which he goes among them (*Jimmy Legs*) implying under the form of merriment their cherished disrespect and dislike.

But in view of the greediness of hate for provocation, it hardly needed a purveyor to feed Claggart's passion. An uncommon prudence is habitual with the subtler depravity, for it has everything to hide. And in case of any merely suspected injury its secretiveness voluntarily cuts it off from enlightenment or disillusion, and not unreluctantly, action is taken upon surmise as upon certainty. And the retaliation is apt to be in monstrous disproportion to the supposed offence, for when in anybody was revenge in its exactions aught else but an inordinate usurer? But how with Claggart's conscience? For though consciences are unlike as foreheads, every intelligence, not including the Scriptural devils who "believe and tremble," has one. But Claggart's conscience being but the lawyer to his will, made ogres of trifles,

probably arguing that the motive imputed to Billy in spilling the soup just when he did, together with the epithets alleged—these, if nothing more, made a strong case against him, nay, justified animosity into a sort of retributive righteousness. The Pharisee is the Guy Fawkes²⁷ prowling in the hid chambers underlying some natures like Claggart's. And they can really form no conception of an unreciprocated malice. Probably, the Master-at-arms' clandestine persecutions of Billy were started to try the temper of the man, but they had not developed any quality in him that enmity could make official use of, or ever pervert into even plausible self-justification, so that the occurrence at the mess, petty if it were, was a welcome one to that peculiar conscience assigned to be the private mentor of Claggart, and for the rest, not improbably it put him upon new experiments.

CHAPTER XII

Not many days after the last incident narrated, something befell Billy Budd that more gravelled him than aught that had previously occurred.

It was a warm night for the latitude, and the foretopman, whose watch at the time was properly below, was dozing on the uppermost deck whither he had ascended from his hot hammock—one of hundreds suspended so closely wedged together over a lower gun-deck that there was little or no swing to them. He lay as in the shadow of a hill-side stretched under the lee of the *booms*, a piled ridge of spare spars, and among which the ship's largest boat, the launch, was stowed. Alongside of three other slumberers from below, he lay near one end of the booms which approached from the foremast, his station aloft on duty as a foretopman being just over the deck station of the forecastlemen entitling him according to usage to make himself more or less at home in that neighbourhood.

²⁷ See note 14 on "Benito Cereno."

Presently he was stirred into semi-consciousness by somebody, who must have previously sounded the sleep of the others, touching his shoulder, and then as the foretopman raised his head, breathing into his ear in a quick whisper, "Slip into the lee fore-chains, Billy, there is something in the wind—don't speak Quick I will meet you there," and disappeared

Now Billy—like sundry other essentially good-natured ones—had some of the weakness inseparable from essential good nature, and among these was a reluctance, almost an incapacity of plumply saying *no* to an abrupt proposition not obviously absurd, on the face of it, nor obviously unfriendly, nor iniquitous. And being of warm blood he had not the phlegm to negative any proposition by unresponsive inaction. Like his sense of fear, his apprehension as to aught outside of the honest and natural was seldom very quick. Besides, upon the present occasion, the drowse from his sleep still hung upon him.

However it was, he mechanically rose and, sleepily wondering what could be *in the wind*, betook himself to the designated place, a narrow platform, one of six, outside of the high bulwarks and screened by the great dead-eyes and multiple columned lanyards of the shrouds and back-stays, and, in a great war-ship of that time, of dimensions commensurate to the ample hull's magnitude, a tarry balcony, in short, overhanging the sea, and so secluded that one manner of the *Indomitable*, a non-conformist old tar of serious turn, made it even in daytime his private oratory.

In this retired nook the stranger soon joined Billy Budd. There was no moon as yet, a haze obscured the star-light. He could not distinctly see the stranger's face. Yet from something in the outline and carriage, Billy took him to be, and correctly, one of the afterguard.

"Hist Billy!" said the man, in the same quick cautionary whisper as before, "You were impressed, weren't you? Well, so was I," and he paused as to mark the effect. But Billy, not knowing exactly what to

make of this, said nothing. Then the other: "We are not the only impressed ones, Billy. There's a gang of us. Couldn't you—help—at a pinch?"

"What do you mean?" demanded Billy, here shaking off his drowse.

"Hist, hist!" the hurried whisper now growing husky, "see here," and the man held up two small objects faintly twinkling in the night light, "See, they are yours, Bill, if you'll only——"

But Billy here broke in, and in his resentful eagerness to deliver himself his vocal infirmity somewhat intruded, "D-D-Damme, I don't know what you are d-driving at, or what you mean, but you had better g-g-go where you belong!" For the moment the fellow, as confounded, did not stir, and Billy, springing to his feet, said, "If you d-don't start, I'll t-t-toss you back over the i-rail!" There was no mistaking this, and the mysterious emissary decamped, disappearing in the direction of the mainmast in the shadow of the booms.

"Hallo, what's the matter?" here came growling from a forecastleman awakened from his deck-doze by Billy's raised voice. And as the foretopman reappeared and was recognized by him, "Ah, *Beauty*, is it you? Well, something must have been the matter for you st-st-stuttered."

"Oh," rejoined Billy, now mastering the impediment, "I found an afterguardsman in our part of the ship here and I bid him be off where he belongs."

"And is that all you did about it, foretopman?" gruffly demanded another, an irascible old fellow of brick-coloured visage and hair, and who was known to his associate forecastlemen as *Red Pepper*.

"Such sneaks I should like to marry to the gunner's daughter!" by that expression meaning that he would like to subject them to disciplinary castigation over a gun.

However, Billy's rendering of the matter satisfactorily accounted to these inquirers for the brief commotion, since of all the sections of a ship's company the forecastlemen, veterans for the most part, and bigoted in their sea-prejudices, are the

most jealous in resenting territorial encroachments, especially on the part of any of the after guard, of whom they have but a sorry opinion, chiefly landsmen, never going aloft except to reef or furl the mainsail, and in no wise competent to handle a marlingspike or turn in a *dead-eye*, say

CHAPTER XIII

This incident sorely puzzled Billy Budd. It was an entirely new experience—the first time in his life that he had ever been personally approached in underhanded intriguing fashion. Prior to this encounter he had known nothing of the afterguardsman, the two men being stationed wide apart, one forward and aloft during his watch, the other on deck and aft.

What could it mean? And could they really be guineas, those two glittering objects the interloper had held up to his (Billy's) eyes? Where could the fellow get guineas? Why, even buttons, spare buttons, are not so plentiful at sea. The more he turned the matter over, the more he was nonplussed, and made uneasy and discomfited. In his disgustful recoil from an overture which, though he but ill comprehended, he instinctively knew must involve evil of some sort—Billy Budd was like a young horse fresh from the pasture suddenly inhaling a vile whiff from some chemical factory and by repeated snortings trying to get it out of his nostrils and lungs. This frame of mind barred all desire of holding further parley with the fellow, even were it but for the purpose of gaining some enlightenment as to his design in approaching him. And yet he was not without natural curiosity to see how such a visitor in the dark would look in broad day.

He espied him the following afternoon in his first dog-watch below, one of the smokers on that forward part of the upper gun-deck allotted to the pipe. He recognized him by his general cut and build, more than by his round freckled face and

glassy eyes of pale blue, veiled with lashes all but white. And yet Billy was a bit uncertain whether indeed it were he—yonder chap about his own age, chatting and laughing in a free-hearted way, leaning against a gun,—a genial young fellow enough to look at, and something of a rattle-brain, to all appearance. Rather chubby, too, for a sailor, even an afterguardsman. In short the last man in the world—one would think—to be overburthened with thoughts, especially those perilous thoughts that must needs belong to a conspirator in any serious project, or even to the underling of such a conspirator.

Although Billy was not aware of it, the fellow, with one sidelong watchful glance had perceived Billy first, and then noting that Billy was looking at him, thereupon nodded a familiar sort of friendly recognition as to an old acquaintance, without interrupting the talk he was engaged in with the group of smokers. A day or two afterwards, chancing in the evening promenade on a gun-deck, to pass Billy, he offered a flying word of good-fellowship, as it were, which by its unexpectedness, and equivocalness under the circumstances, so embarrassed Billy that he knew not how to respond to it, and let it go unnoticed.

Billy was now left more at a loss than before. The ineffectual speculations into which he was led were so disturbingly alien to him that he did his best to smother them. It never entered his mind that here was a matter, which, from its extreme questionableness, it was his duty as a loyal blue-jacket to report in the proper quarter. And, probably, had such a step been suggested to him, he would have been deterred from taking it by the thought—one of novice-magnanimity—that it would savour overmuch of the dirty work of a tell-tale. He kept the thing to himself. Yet upon one occasion he could not forbear a little disburthening himself to the old Dansker, tempted thereto perhaps by the influence of a balmy night when the ship lay becalmed, the twain, silent for the most part, sitting together on deck, their heads

propped against the bulwarks. But it was only a partial and anonymous account that Billy gave—the unfounded scruples above referred to preventing full disclosure to anybody. Upon hearing Billy's version, the sage Dansker seemed to divine more than he was told, and after a little meditation, during which his wrinkles were pursed as into a point—quite effacing for the time that quizzing expression his face sometimes wore—answered "Didn't I say so, Baby Budd?"

"Say what?" demanded Billy.

"Why, *Jimmy Legs* is down on you."

"And what," rejoined Billy in amazement, "has *Jimmy Legs* to do with that cracked afterguardsman?"

"Ho, it was an afterguardsman, then a cat's-paw, only a cat's-paw!" And with that exclamation, which, whether it had reference to a light puff of air just then coming over the calm sea, or subtler relation to the afterguardsman, there is no telling. The old Merlin gave a twisting wrench with his black teeth at his plug of tobacco—vouchsafing no reply to Billy's impetuous question, though now repeated, for it was his wont to relapse into grim silence when interrogated in sceptical sort as to any of his sententious oracles, not always very clear ones, but rather partaking of that obscurity which invests most Delphic deliverances from any quarter.

CHAPTER XIV

Long experience had very likely brought this old man to that bitter prudence which never interferes in aught, and never gives advice.

Yes, despite the Dansker's pithy insistence as to the Master-at-arms being at the bottom of these strange experiences of Billy on board the *Indomitable*, the young sailor was ready to ascribe them to almost anybody but the man who, to use Billy's own expression, "always had a pleasant word for him." This is to be wondered at. Yet not so much to be wondered at. In certain matters, some sailors even in ma-

ture life, remain unsophisticated enough. But a young seafarer of the disposition of our athletic foretopman is yet very much of a child-man. And yet a child's utter innocence is but its blank ignorance, and the innocence more or less wanes as intelligence waxes. But in Billy Budd intelligence, such as it was, had advanced, while yet his simple-mindedness remained for the most part unaffected. Experience is a teacher indeed, yet did Billy's years make his experience small. Besides, he had none of that intuitive knowledge of the bad which in natures not good or incompletely so, foreruns experience, and therefore may pertain, as in some instances it too clearly does pertain, even to youth.

And what could Billy know of man except of man as a mere sailor? And the old-fashioned sailor, the veritable man-before-the-mast—the sailor from boyhood up—he, though indeed of the same species as a landsman, is in some respects singularly distinct from him. The sailor is frankness, the landsman is finesse. Life is not a game with the sailor, demanding the long head, no intricate game of chess where few moves are made in straightforwardness, and ends are attained by indirection, an oblique, tedious, barren game hardly worth that poor candle burnt out in playing it.

Yes, as a class, sailors are in character a juvenile race. Even their deviations are marked by juvenility. And this more especially holding true with the sailors of Billy's time. Then, too, certain things which apply to all sailors, do more pointedly operate here and there upon the junior one. Every sailor, too, is accustomed to obey orders without debating them, his life afloat is externally ruled for him, he is not brought into that promiscuous commerce with mankind where unobstructed free agency on equal terms—equal superficially, at least—soon teaches one that unless upon occasion he exercises a distrust keen in proportion to the fairness of the appearance, some foul turn may be served him. A ruled, undemonstrative distrustfulness is so habitual, not with business-men

so much, as with men who know their kind in less shallow relations than business, namely certain men-of-the-world, that they come at last to employ it all but unconsciously, and some of them would very likely feel real surprise at being charged with it as one of their general characteristics

CHAPTER XV

But after the little matter at the mess Billy Budd no more found himself in strange trouble at times about his hammock or his clothes-bag, or what not. While, as to that smile that occasionally sunned him, and the pleasant passing word these were, if not more frequent, yet if anything more pronounced than before.

But for all that, there were certain other demonstrations now. When Claggart's unobserved glance happened to light on belted Billy rolling along the upper gun-deck in the leisure of the second dog-watch, exchanging passing broadsides of fun with other young promenaders in the crowd, that glance would follow the cheerful *Sea Hyperion*²⁸ with a settled meditative and melancholy expression—his eyes strangely suffused with incipient feverish tears. Then would Claggart look like the man of sorrows. Yes, and sometimes the melancholy expression would have in it a touch of soft yearning, as if Claggart could even have loved Billy but for fate and ban. But this was an evanescence, and quickly repented of, as it were, by an inmitigable look, pinching and shrivelling the visage into the momentary semblance of a wrinkled walnut. But sometimes, catching sight in advance of the foretopman coming in his direction, he would, upon their nearing, step aside a little to let him pass, dwelling upon Billy for the moment with the glittering dental satire of a *Guise*²⁹. Yet, upon an abrupt unforeseen encounter, a red light would flash forth from his eye, like a spark from an anvil in a dusky smithy. That quick fierce light was a strange one, darted

from orbs which in repose were of a colour nearest approaching a deeper violet, the softest of shades.

Though some of these caprices of the pit could not but be observed by their object, yet were they beyond the construing of such a nature. And the thews of Billy were hardly comparable with that sort of sensitive spiritual organization which in some cases instinctively conveys to ignorant innocence an admonition of the proximity of the malign. He thought the Master-at-arms acted in a manner rather queer at times. That was all. But the occasional frank air and pleasant word went for what they purported to be—the young sailor never having heard as yet of the “too fair-spoken man.”

Had the foretopman been conscious of having done or said anything to provoke the ill will of the official, it would have been different with him, and his sight might have been purged if not sharpened.

So was it with him in yet another matter. Two minor officers, the Armourer, and Captain of the Hold, with whom he had never exchanged a word, his position on the ship not bringing him into contact with them, these men now for the first began to cast upon Billy—when they chanced to encounter him—that peculiar glance which evidences that the man from whom it comes has been some way tampered with, and to the prejudice of him upon whom the glance lights. Never did it occur to Billy as a thing to be noted, or a thing suspicious—though he well knew the fact that the Armourer and Captain of the Hold, with the ship's yeoman, apothecary, and others of that grade, were by naval usage, messmates of the Master-at-arms, men with ears convenient to his confidential tongue.

²⁸ Name applied by poets to Apollo, god of manly youth and beauty.

²⁹ French family of Lorraine, 16th and 17th Centuries, notable for sardonic attitudes, and for activity in plots and conspiracies. One of the *Guises* was portrayed as a “grinning villain” by Dumas.

CHAPTER XVI

But the general popularity of our Handsome Sailor's manly forwardness upon occasion, and irresistible good nature, indicating no mental superiority tending to excite an invidious feeling, this good will on the part of most of his ship-mates made him the less to concern himself about such mute aspects toward him as those whereto allusion has just been made

As to the afterguardsman, though Billy for reasons already given, necessarily saw little of him, yet when the two did happen to meet, invariably came the fellow's off-hand cheerful recognition, sometimes accompanied by a passing pleasant word or two. Whatever that equivocal young person's original design may really have been, or the design of which he might have been the deputy, certain it was from his manner upon these occasions, that he had wholly dropped it

It was as if his precocity of crookedness (and every vulgar villain is precocious) had for once deceived him, and the man he had sought to entrap as a simpleton had, through his very simplicity, baffled him

But shrewd ones may opine that it was hardly possible for Billy to refrain from going up to the afterguardsman and bluntly demanding to know his purpose in the initial interview, so abruptly closed in the fore-chains. Shrewd ones may also think it but natural in Billy to set about sounding some of the other impressed men of the ship in order to discover what basis, if any, there was for the emissary's obscure suggestions as to plotting disaffection aboard. The shrewd may so think. But something more, or rather, something else than mere shrewdness is perhaps needful for the due understanding of such a character as Billy Budd's

As to Claggart, the monomaniac in the man—if that indeed it were—as involuntarily disclosed by starts in the manifestations detailed, yet in general covered over by his self-contained and rational demeanour, this, like a subterranean fire was eating its way deeper and deeper in him. Something decisive must come of it.

After the mysterious interview in the fore-chains—the one so abruptly ended there by Billy—nothing especially germane to the story occurred until the events now about to be narrated

Elsewhere it has been said that owing to the lack of frigates (of course better sailors than line-of-battle ships) in the English squadron up the Straits at that period, the *Indomitable* was occasionally employed not only as an available substitute for a scout, but at times on detached service of more important kind. This was not alone because of her sailing qualities, not common in a ship of her rate, but quite as much, probably, that the character of her commander—it was thought—specially adapted him for any duty where, under unforeseen difficulties, a prompt initiative might have to be taken in some matter demanding knowledge and ability in addition to those qualities employed in good seamanship. It was on an expedition of the latter sort, a somewhat distant one, and when the *Indomitable* was almost at her furthest remove from the fleet, that in the latter part of an afternoon-watch she unexpectedly came in sight of a ship of the enemy. It proved to be a frigate. The latter—perceiving through the glass that the weight of men and metal would be heavily against her—invoking her light heels, crowded on sail to get away. After a chase waged almost against hope—and lasting until about the middle of the first dog-watch—she signally succeeded in effecting her escape

Not long after the pursuit had been given up, and ere the excitement incident thereto had altogether waned away, the Master-at-arms, ascending from his cavernous sphere, made his appearance (cap in hand) by the mainmast respectfully awaiting the notice of Captain Vere—then solitary walking the weather-side of the quarter-deck—doubtless somewhat chafed at the failure of the pursuit. The spot where Claggart stood was the place allotted to the men of lesser grades when seeking some more particular

interview either with the officer-of-the-deck or the Captain himself. But from the latter it was not often that a sailor or petty-officer of those days would seek a hearing, only some exceptional cause, would, according to established custom, have warranted that.

Presently, just as the Commander, absorbed in his reflections, was on the point of turning aft in his promenade, he became sensible of Claggart's presence, and saw the doffed cap held in deferential expectancy. Here he it said that Captain Vere's personal knowledge of this petty-officer had only begun at the time of the ship's last sailing from home, Claggart then for the first, in transfer from a ship detained for repairs, supplying on board the *Indomitable* the place of a previous Master-at-arms disabled and ashore.

No sooner did the Commander observe who it was that now so deferentially stood awaiting his notice, than a peculiar expression came over him. It was not unlike that which uncontrollably will flit across the countenance of one at unawares encountering a person, who, though known to him, indeed, has hardly been long enough known for thorough knowledge, but something in whose aspect nevertheless now, for the first time, provokes a vaguely repellent distaste. Coming to a stand and resuming much of his wonted official manner, save that a sort of impatience lurked in the intonation of the opening word, he said, "Well? what is it, Master-at-arms?"

With the air of a subordinate grieved at the necessity of being a messenger of ill tidings, and while conscientiously determined to be frank, yet equally resolved upon shunning overstatement, Claggart at this invitation, or rather summons to disburthen, spoke up. What he said, conveyed in the language of no uneducated man, was to the effect following if not altogether in these words, namely, that during the chase and preparations for the possible encounter he had seen enough to convince him that at least one sailor aboard was a dangerous character in a ship mustering some who

not only had taken a guilty part in the late serious trouble, but others also who, like the man in question, had entered His Majesty's service under another form than enlistment.

At this point Captain Vere, with some impatience, interrupted him.

"Be direct, man, say impressed men."

Claggart made a gesture of subservience and proceeded. Quite lately he (Claggart) had begun to suspect that some sort of movement prompted by the sailor in question was covertly going on, but he had not thought himself warranted in reporting the suspicion so long as it remained indistinct. But from what he had that afternoon observed in the man referred to, the suspicion of something clandestine going on had advanced to a point less removed from certainty. He deeply felt—he added—the serious responsibility assumed in making a report involving such possible consequences to the individual mainly concerned, besides tending to augment those natural anxieties which every naval commander must feel in view of the extraordinary outbreak so recent as those which, he sorrowfully said it, it needed not to name.

Now at the first broaching of the matter Captain Vere, taken by surprise, could not wholly dissemble his disquietude, but as Claggart went on, the former's aspect changed into restiveness under something in the testifier's manner in giving his testimony. However, he refrained from interrupting him. And Claggart, continuing, concluded with this:

"God forbid, your honour, that the *Indomitable's* should be the experience of the—"

"Never mind that!" here peremptorily broke in the superior, his face altering with anger instantly, divining the ship that the other was about to name, one in which the Nore Mutiny had assumed a singularly tragical character that for a time jeopardized the life of its Commander. Under the circumstances he was indignant at the purposed allusion. When the com-

missioned officers themselves were on all occasions very heedful how they referred to the recent events,—for a petty-officer unnecessarily to allude to them in the presence of his Captain, thus struck him as a most immodest presumption. Besides, to his quick sense of self-respect, it even looked under the circumstances something like an attempt to alarm him. Nor at that was he without some surprise that one who, so far as he had hitherto come under his notice, had shown considerable tact in his function, should in this particular evince such lack of it.

But these thoughts and kindred dubious ones flitting across his mind were suddenly replaced by an intuitional surmise, which though as yet obscure in form, served practically to affect his reception of the ill tidings. Certain it is that, long versed in everything pertaining to the complicated gun-deck life (which like every other form of life has its secret mines and dubious side, the side popularly disclaimed), Captain Vere did not permit himself to be unduly disturbed by the general tenor of his subordinate's report. Furthermore, if in view of recent events prompt action should be taken at the first palpable sign of recurring insubordination—for all that, not judicious would it be, he thought, to keep the idea of lingering disaffection alive by undue forwardness in crediting an informer, even if his own subordinate, and charged with police surveillance of the crew. This feeling would not perhaps have so prevailed with him were it not that upon a prior occasion the patriotic zeal officially evinced by Claggart had somewhat irritated him as appearing rather supersensible and strained. Furthermore, something even in the official's self-possessed and somewhat ostentatious manner in making his specifications strangely reminded him of a bandman, a perjured witness in a capital case before a court-martial ashore of which when a lieutenant he, Captain Vere, had been a member.

Now the peremptory check given to Claggart in the matter of the arrested allusion

was quickly followed up by this "You say that there is at least one dangerous man aboard. Name him."

"William Budd, a foretopman, your honour—"

"William Budd," repeated Captain Vere with unfeigned astonishment, "and mean you the man our Lieutenant Ratchiffe took from the merchantman not very long ago—the young fellow who seems to be so popular with the men—Billy, the Handsome Sailor, as they call him?"

"The same, your honour, but for all his youth and good looks, a deep one. Not for nothing does he insinuate himself into the good will of his shipmates, since at the least they will at a pinch say a good word for him at all hazards. Did Lieutenant Ratchiffe happen to tell your honour of that adroit fling of Budd's jumping up in the Cutter's bow under the merchantman's stern when he was being taken off? It is even masqued by that sort of good-humoured air that at heart he resents his impressment. You have but noted his fair cheek. A man-trap may be under his fine ruddy-tipped daisies."

Now the *Handsome Sailor*, as a signal figure among the crew, had naturally enough attracted the Captain's attention from the first. Though in general not very demonstrative to his officers, he had congratulated Lieutenant Ratchiffe upon his good fortune in lighting on such a fine specimen of the *genus homo* who, in the nude, might have posed for a statue of young Adam before the fall.

As to Billy's adieu to the ship *Rights-of-Man*, which the boarding lieutenant had indeed reported to him, but in a deferential way—more as a good story than aught else, though mistakenly understanding it as a satiric sally—Captain Vere had but thought so much the better of the impressed man for it, as a military sailor, admiring the spirit that could take an arbitrary enlistment so merrily and sensibly. The foretopman's conduct, too, so far as it had fallen under the Captain's notice had confirmed the first happy augury,

while the new recruit's qualities as a *sailor-man* seemed to be such that he had thought of recommending him to the executive officer for promotion to a place that would more frequently bring him under his own observation, namely, the captaincy of the mizzen-top, replacing there in the star-board watch a man not so young whom partly for that reason he deemed less fitted for the post. Be it parenthesized here that since the mizzen-top-men have not to handle such breadths of heavy canvas as the lower sailors on the main-mast and fore-mast, a young man if of the right stuff not only seems best adapted to duty there, but, in fact, is generally selected for the captaincy of that top, and the company under him are light hands, and often but striplings. In sum, Captain Vere had from the beginning deemed Billy Budd to be what in the naval parlance of the times was called a "*King's bargain*," that is to say, for His Britannic Majesty's navy a capital investment at small outlay or none at all.

After a brief pause—during which the reminiscences above mentioned passed vividly through his mind—he weighed the import of Claggart's last suggestion, conveyed in the phrase, "pitfall under the clover," and the more he weighed it the less reliance he felt in the informer's good faith. Suddenly he turned upon him. "Do you come to me, Master-at-arms, with so foggy a tale? As to Budd, cite me an act or spoken word of his confirmatory of what you here in general charge against him. Stay," drawing nearer to him, "heed what you speak. Just now and in a case like this, there is a yard-arm-end for the false-witness."

"Ah, your honour!" sighed Claggart mildly shaking his shapely head as in sad deprecation of such unmerited severity of tone. Then bridling—erecting himself as in virtuous self-assertion, he circumstantially alleged certain words and acts, which collectively if credited, led to presumptions mortally inculcating Budd, and for

some of these averments, he added, substantiating proof was not far

With grey eyes now impatient and distrustful, essaying to fathom to the bottom Claggart's calm violet ones, Captain Vere again heard him out, then for the moment stood ruminating. The mood he evinced, Claggart—himself for the time liberated from the other's scrutiny—steadily regarded with a look difficult to render—a look curious of the operation of his tactics, a look such as might have been that of the spokesman of the envious children of Jacob deceptively imposing upon the troubled patriarch the blood-dyed coat of young Joseph.

Though something exceptional in the moral quality of Captain Vere made him, in earnest encounter with a fellow-man, a veritable touchstone of that man's essential nature, yet now as to Claggart and what was really going on in him his feeling partook less of intuitional conviction than of strong suspicion clogged by strange dubieties. The perplexity he evinced proceeded less from aught touching the man informed against—as Claggart doubtless opined—than from considerations how best to act in regard to the informer. At first, indeed, he was naturally for summoning that substantiation of his allegations which Claggart said was at hand. But such a proceeding would result in the matter at once getting abroad—which—in the present stage of it, he thought, might undesirably affect the ship's company. If Claggart was a false witness,—that closed the affair. And therefore, before trying the accusation, he would first practically test the accuser, and he thought this could be done in a quiet undemonstrative way.

The measure he determined upon involved a shifting of the scene—a transfer to a place less exposed to observation than the broad quarter-deck. For although the few gun-room officers there at the time had, in due observance of naval etiquette, withdrawn to leeward the moment Captain Vere had begun his promenade on the

deck's weather-side, and though during the colloquy with Claggart they of course ventured not to diminish the distance, and though throughout the interview Captain Vere's voice was far from high, and Claggart's silvery and low, and the wind in the cordage and the wash of the sea helped the more to put them beyond ear-shot, nevertheless, the interview's continuance already had attracted observation from some topmen aloft, and other sailors in the waist or further forward

Having now determined upon his measures, Captain Vere forthwith took action. Abruptly turning to Claggart he asked, "Master-at-arms, is it now Budd's watch aloft?"

"No, your honour" Whereupon—"Mr Wilkes," summoning the nearest midshipman, "tell Albert to come to me" Albert was the Captain's hammock-boy, a sort of sea-valet in whose discretion and fidelity his master had much confidence. The lad appeared "You know Budd the foretopman?"

"I do, Sir"

"Go find him. It is his watch off. Manage to tell him out of ear-shot that he is wanted aft. Contrive it that he speaks to nobody. Keep him in talk yourself. And not till you get well aft here, not till then, let him know that the place where he is wanted is my cabin. You understand. Go.—Master-at-arms, show yourself on the decks below, and when you think it time for Albert to be coming with his man, stand by quietly to follow the sailor in."

CHAPTER XVII

Now when the foretopman found himself closeted, as it were, in the cabin with the Captain and Claggart, he was surprised enough. But it was a surprise unaccompanied by apprehension or distrust. To an immature nature, essentially honest and humane, forewarning intimations of subtler danger from one's kind come tardily, if at all. The only thing that took shape in the

young sailor's mind was this "Yes, the Captain, I have always thought, looks kindly upon me. I wonder if he's going to make me his coxswain. I should like that. And maybe now he is going to ask the Master-at-arms about me."

"Shut the door there, sentry," said the commander. "Stand without and let nobody come in.—Now, Master-at-arms, tell this man to his face what you told of him to me," and stood prepared to scrutinize the mutually confronting visages.

With the measured step and calm collected air of an asylum physician approaching in the public hall some patient beginning to show indications of a coming paroxysm, Claggart deliberately advanced within short range of Billy, and mesmerically looking him in the eye, briefly recapitulated the accusation.

Not at first did Billy take it in. When he did the rose-tan of his cheek looked struck as by white leprosy. He stood like one impaled and gagged. Meanwhile the accuser's eyes, removing not as yet from the blue, dilated ones, underwent a phenomenal change, their wonted rich violet colour blurring into a muddy purple. Those lights of human intelligence losing human expression, gelidly protruding like the alien eyes of certain uncatalogued creatures of the deep.

The first mesmeric glance was one of surprised fascination, the last was the hungry lurch of the torpedo-fish.

"Speak, man!" said Captain Vere to the transfixed one, struck by his aspect even more than by Claggart's, "Speak! defend yourself." Which appeal caused but a strange, dumb gesturing and gurgling in Billy, amazement at such an accusation so suddenly sprung on inexperienced nonage, this, and it may be horror at the accuser, serving to bring out his lurking defect, and in this instance for the time intensifying it into a convulsed tongue-tie; while the intent head and entire form straining forward in an agony of ineffectual eagerness to obey the injunction to

speak and defend himself, gave an expression to the face like that of a condemned vestal priestess in the moment of her being buried alive, and in the first struggle against suffocation

Though at the time Captain Vere was quite ignorant of Billy's liability to vocal impediment, he now immediately divined it, since vividly Billy's aspect recalled to him that of a bright young schoolmate of his whom he had seen struck by much the same startling impotence in the act of eagerly rising in the class to be foremost in response to a testing question put to it by the master. Going close up to the young sailor, and laying a soothing hand on his shoulder, he said, "There is no hurry, my boy. Take your time, take your time." Contrary to the effect intended, these words, so fatherly in tone, doubtless touching Billy's heart to the quick, prompted yet more violent efforts at utterance—efforts soon ending for the time in confirming the paralysis, and bringing to the face an expression which was as a crucifixion to behold. The next instant, quick as the flame from a discharged cannon at night—his right arm shot out and Claggart dropped to the deck. Whether intentionally, or but owing to the young athlete's superior height, the blow had taken effect full upon the forehead, so shapely and intellectual-looking a feature in the Master-at-arms, so that the body fell over lengthwise, like a heavy plank tilted from erectness. A gasp or two and he lay motionless.

"Fated boy," breathed Captain Vere in a tone so low as to be almost a whisper, "what have you done! But here, help me."

The twain raised the felled one from the loins up into a sitting position. The spare form flexibly acquiesced, but merrily. It was like handling a dead snake. They lowered it back. Regaining erectness, Captain Vere with one hand covering his face stood to all appearance as impassive as to the object at his feet. Was he absorbed in taking in all the bearings of the event, and what was best not only now at once to be done, but also in the sequel? Slowly he

uncovered his face, forthwith the effect was as if the moon, emerging from eclipse, should reappear with quite another aspect than that which had gone into hiding. The father in him, manifested towards Billy thus far in the scene, was replaced by the military disciplinarian. In his official tone he bade the foretopman retire to a state-room aft, (pointing it out), and there remain till thence summoned. This order Billy in silence mechanically obeyed. Then, going to the cabin door where it opened on the quarter-deck, Captain Vere said to the sentry without, "Tell somebody to send Albert here." When the lad appeared his master so contrived it that he should not catch sight of the prone one. "Albert," he said to him, "tell the surgeon I wish to see him. You need not come back till called."

When the surgeon entered—a self-poised character of that grave sense and experience that hardly anything could take him aback—Captain Vere advanced to meet him, thus unconsciously interrupting his view of Claggart and, interrupting the other's wonted ceremonious salutation, said, "Nay, tell me how it is with yonder man," directing his attention to the prostrate one.

The surgeon looked, and for all his self-command, somewhat started at the abrupt revelation. On Claggart's always pallid complexion, thick black blood was now oozing from mouth and ear. To the gazer's professional eyes it was unmistakably no living man that he saw.

"Is it so, then?" said Captain Vere intently watching him. "I thought it. But verify it." Whereupon the customary tests confirmed the surgeon's first glance, who now looking up in unfeigned concern, cast a look of intense inquisitiveness upon his superior. But Captain Vere, with one hand to his brow, was standing motionless. Suddenly, catching the surgeon's arm convulsively, he exclaimed, pointing down to the body,—"*It is the divine judgment of Ananias!*"³⁰ Look!"

Disturbed by the excited manner he had

³⁰ Acts 5 5.

never before observed in the *Indomitable's* Captain, and as yet wholly ignorant of the affair, the prudent surgeon nevertheless held his peace, only again looking an earnest interrogation as to what it was that had resulted in such a tragedy

But Captain Vere was now again motionless, standing absorbed in thought. Once again starting, he vehemently exclaimed—"Struck dead by an angel of God! Yet the angel must hang!"

At these interjections, incoherences to the listener as yet unapprised of the antecedent events, the surgeon was profoundly discomfited. But now, as recollecting himself, Captain Vere in less harsh tone briefly related the circumstances leading up to the event.

"But come, we must despatch," he added, "help me to remove him (meaning the body) to yonder compartment"—designating one opposite where the foretopman remained immured. Anew disturbed by a request that, as implying a desire for secrecy, seemed unaccountably strange to him, there was nothing for the subordinate to do but comply.

"Go now," said Captain Vere, with something of his wonted manner, "Go now I shall presently call a drum-head court. Tell the lieutenants what has happened, and tell Mr. Morton"—meaning the captain of marines. "And charge them to keep the matter to themselves."

Full of disquietude and misgivings, the surgeon left the cabin. Was Captain Vere suddenly affected in his mind, or was it but a transient excitement brought about by so strange and extraordinary a happening? As to the drum-head court, it struck the surgeon as impolitic, if nothing more. The thing to do, he thought, was to place Billy Budd in confinement, and in a way dictated by usage, and postpone further action in so extraordinary a case to such time as they should again join the squadron, and then transfer it to the Admiral. He recalled the unwonted agitation of Captain Vere and his exciting exclamations so at variance with his normal

manner. Was he unhinged? But assuming that he was, it were not so susceptible of proof. What then could he do? No worse trying situation is conceivable than that of an officer subordinated under a Captain whom he suspects to be, not mad indeed, but yet not quite unaffected in his intellect. To argue his order to him would be insolence. To resist him would be mutiny. In obedience to Captain Vere he communicated to the lieutenants and captain of marines what had happened, saying nothing as to the Captain's state. They stared at him in surprise and concern. Like him they seemed to think that such a matter should be reported to the Admiral.

Who in the rainbow can draw the line where the violet tint ends and the orange tint begins? Distinctly we see the difference of the colour, but where exactly does the first one visibly enter into the other? So with sanity and insanity. In pronounced cases there is no question about them. But in some cases, in various degrees supposedly less pronounced, to draw the line of demarkation few will undertake, though for a fee some professional experts will. There is nothing namable but that some men will undertake to do for pay. In other words, there are instances where it is next to impossible to determine whether a man is sane or beginning to be otherwise.

Whether Captain Vere, as the surgeon professionally surmised, was really the sudden victim of any degree of aberration, one must determine for himself by such light as this narrative may afford.

CHAPTER XVIII

The unhappy event which has been narrated could not have happened at a worse juncture. For it was close on the heel of the suppressed insurrections, an after-time very critical to naval authority, demanding from every English sea-commander two qualities not readily interfusable—prudence and rigour. Moreover, there was something crucial in the case.

In the jugglery of circumstances pre-

ceeding and attending the event on board the *Indomitable* and in the light of that martial code whereby it was formally to be judged, innocence and guilt, personified in Claggart and Budd, in effect changed places

In the legal view the apparent victim of the tragedy was he who had sought to victimize a man blameless, and the indisputable deed of the latter, navally regarded, constituted the most heinous of military crimes. Yet more. The essential right and wrong involved in the matter, the clearer that might be, so much the worse for the responsibility of a loyal sea-commander, inasmuch as he was authorized to determine the matter on that primitive legal basis.

Small wonder then that the *Indomitable's* Captain, though in general a man of rigid decision, felt that circumspectness not less than promptitude was necessary. Until he could decide upon his course, and in each detail, and not only so, but until the concluding measure was upon the point of being enacted he deemed it advisable, in view of all the circumstances, to guard as much as possible against publicity. Here he may or may not have erred. Certain it is, however, that subsequently in the confidential talk of more than one or two gun-rooms and cabins he was not a little criticized by some officers, a fact imputed by his friends, and vehemently by his cousin Jack Denton, to professional jealousy of Starry Vere. Some imaginative ground for invidious comment there was. The maintenance of secrecy in the matter, the confining all knowledge of it for a time to the place where the homicide occurred—the quarter-deck cabin, in these particulars lurked some resemblance to the policy adopted in those tragedies of the palace which have occurred more than once in the capital founded by Peter³¹ the barbarian, great chiefly by his crimes.

The case was such that fain would the *Indomitable's* Captain have deferred taking any action whatever respecting it further than to keep the foretopman a close pris-

oner till the ship rejoined the squadron, and then submitting the matter to the judgment of his Admiral.

But a true military officer is, in one particular, like a true monk. Not with more of self-abnegation will the latter keep his vows of monastic obedience than the former his vows of allegiance to martial duty.

Feeling that unless quick action were taken on it, the deed of the foretopman, as soon as it should be known on the gun-decks, would tend to awaken any slumbering embers of the Nore among the crews—a sense of the urgency of the case overruled in Captain Vere all other considerations. But though a conscientious disciplinarian, he was no lover of authority for mere authority's sake. Very far was he from embracing opportunities for monopolizing to himself the perils of moral responsibility, none at least that could properly be referred to an official superior, or shared with him by his official equals or even subordinates. So thinking, he was glad it would not be at variance with usage to turn the matter over to a summary court of his own officers, reserving to himself, as the one on whom the ultimate accountability would rest, the right of maintaining a supervision of it, or formally or informally interposing at need. Accordingly a drum-head court was summarily convened, he electing the individuals composing it, the First Lieutenant, the Captain of Marines, and the Sailing Master.

In associating an officer of marines with the sea-lieutenants in a case having to do with a sailor, the Commander perhaps deviated from general custom. He was prompted thereto by the circumstances that he took that soldier to be a judicious person, thoughtful and not altogether incapable of grappling with a difficult case unprecedented in his prior experience. Yet even as to him he was not without some

³¹ Peter I of Russia (1672-1725), called Peter the Great, founder of St Petersburg (now Leningrad).

latent misgiving, for withal he was an extremely good-natured man, an enjoyer of his dinner, a sound sleeper, and inclined to obesity. The sort of man who, though he would always maintain his manhood in battle, might not prove altogether reliable in a moral dilemma involving aught of the tragic. As to the First Lieutenant and the Sailing Master, Captain Vere could not but be aware that though honest natures, of approved gallantry upon occasion, their intelligence was mostly confined to the matter of active seamanship, and the fighting demands of their profession. The court was held in the same cabin where the unfortunate affair had taken place. This cabin, the Commander's, embraced the entire area under the poop-deck. Aft, and on either side, was a small state-room—the one room temporarily a jail, and the other a dead-house—and a yet smaller compartment leaving a space between, expanding forward into a goodly oblong of length coinciding with the ship's beam. A sky-light of moderate dimension was overhead, and at each end of the oblong space were two sashed port-hole windows, easily convertible back into embrasures for short cannonades.

All being quickly in readiness, Billy Budd was arraigned, Captain Vere necessarily appearing as the sole witness in the case, and as such temporarily sinking his rank, though singularly maintaining it in a matter apparently trivial, namely, that he testified from the ship's weather-side, with that object having caused the court to sit on the lee-side. Concisely he narrated all that had led up to the catastrophe, omitting nothing in Claggart's accusation and deposing as to the manner in which the prisoner had received it. At this testimony the three officers glanced with no little surprise at Billy Budd, the last man they would have suspected, either of mutinous design alleged by Claggart, or of the undeniable deed he himself had done. The First Lieutenant, taking judicial primacy and turning towards the prisoner, said, "Captain Vere has spoken. Is it or is it

not as Captain Vere says?" In response came syllables not so much impeded in the utterance as might have been anticipated. They were these:

"Captain Vere tells the truth. It is just as Captain Vere says, but it is not as the Master-at-arms said. I have eaten the King's bread and I am true to the King."

"I believe you, my man," said the witness, his voice indicating a suppressed emotion not otherwise betrayed.

"God will bless you for that, your honour!" not without stammering said Billy, and all but broke down. But immediately was recalled to self-control by another question, with which the same emotional difficulty of utterance came. "No, there was no malice between us. I never bore malice against the Master-at-arms. I am sorry that he is dead. I did not mean to kill him. Could I have used my tongue I would not have struck him. But he fouly lied to my face, and in the presence of my Captain, and I had to say something, and I could only say it with a blow. God help me!"

In the impulsive above-board manner of the frank one the court saw confirmed all that was implied in words which just previously had perplexed them, coming as they did from the testifier to the tragedy, and promptly following Billy's impassioned disclaimer of mutinous intent—Captain Vere's words, "I believe you, my man."

Next it was asked of him whether he knew of or suspected aught savouring of incipient trouble (meaning a mutiny, though the explicit term was avoided) going on in any section of the ship's company.

The reply lingered. This was naturally imputed by the court to the same vocal embarrassment which had retarded or obstructed previous answers. But in main it was otherwise here, the question immediately recalling to Billy's mind the interview with the afterguardsman in the fore-chains. But an innate repugnance to playing a part at all approaching that of an informer against one's own shipmates—

the same eering sense of un instructed honour which had stood in the way of his reporting the matter at the time, though as a loyal man-of-war's man it was incumbent on him, and failure so to do, charged against him and proven, would have subjected him to the heaviest of penalties; this, with the blind feeling now his, that nothing really was being hatched, prevailed with him. When the answer came it was a negative.

"One question more," said the officer of marines now first speaking and with a troubled earnestness. "You tell us that what the Master-at-arms said against you was a lie. Now why should he have so lied, so maliciously lied, since you declare there was no malice between you?"

At that question unintentionally touching on a spiritual sphere wholly obscure to Billy's thoughts, he was nonplussed, evincing a confusion indeed that some observers, such as can be imagined, would have construed into involuntary evidence of hidden guilt. Nevertheless he strove some way to answer, but all at once relinquished the vain endeavour, at the same time turning an appealing glance towards Captain Vere as deeming him his best helper and friend. Captain Vere, who had been seated for a time, rose to his feet, addressing the interrogator. "The question you put to him comes naturally enough. But can he rightly answer it?—or anybody else? unless indeed it be he who lies within there," designating the compartment where lay the corpse. "But the prone one there will not rise to our summons. In effect though, as it seems to me, the point you make is hardly material. Quite aside from any conceivable motive actuating the Master-at-arms, and irrespective of the provocation of the blow, a martial court must needs in the present case confine its attention to the blow's consequence, which consequence is to be deemed not otherwise than as the striker's deed!"

This utterance, the full significance of which it was not at all likely that Billy took in, nevertheless caused him to turn a

wistful, interrogative look towards the speaker, a look in its dumb expressiveness not unlike that which a dog of generous breed might turn upon his master, seeking in his face some elucidation of a previous gesture ambiguous to the canine intelligence. Nor was the same utterance without marked effect upon the three officers, more especially the soldier. Couched in it seemed to them a meaning unanticipated, involving a prejudgment on the speaker's part. It served to augment a mental disturbance previously evident enough.

The soldier once more spoke, in a tone of suggestive dubiety addressing at once his associates and Captain Vere. "Nobody is present—none of the ship's company, I mean, who might shed lateral light, if any is to be had, upon what remains mysterious in this matter."

"That is thoughtfully put," said Captain Vere, "I see your drift. Ay, there is a mystery, but to use a Scriptural phrase, it is 'a mystery of iniquity,' a matter for only psychologic theologians to discuss. But what has a military court to do with it? Not to add that for us any possible investigation of it is cut off by the lasting tongue-tie of him in yonder," again designating the mortuary state-room. "The prisoner's deed. With that alone we have to do."

To this, and particularly the closing reiteration, the marine soldier, knowing not how aptly to reply, sadly abstained from saying aught. The First Lieutenant, who at the outset had not unnaturally assumed primacy in the court, now overrulingly instructed by a glance from Captain Vere (a glance more effective than words), resumed that primacy. Turning to the prisoner. "Budd," he said, and scarce in equal tones, "Budd, if you have aught further to say for yourself, say it now."

Upon this the young sailor turned another quick glance towards Captain Vere, then, as taking a hint from that aspect, a hint confirming his own instinct that silence was now best, replied to the Lieutenant, "I have said all, Sir."

The marine—the same who had been the sentinel without the cabin-door at the time that the foretopman, followed by the Master-at-arms, entered it—he, standing by the sailor throughout their judicial proceedings, was now directed to take him back to the after compartment originally assigned to the prisoner and his custodian. As the twain disappeared from view, the three officers, as partially liberated from some inward constraint associated with Billy's mere presence—simultaneously stirred in their seats. They exchanged looks of troubled indecision, yet feeling that decide they must, and without long delay, for Captain Vere was for the time sitting unconsciously with his back towards them, apparently in one of his absent fits, gazing out from a sashed port-hole to windward upon the monotonous blank of the twilight sea. But the court's silence continuing, broken only at moments by brief consultations in low earnest tones, this seemed to assure him and encourage him. Turning, he to-and-fro paced the cabin athwart, in the returning ascent to windward, climbing the slant deck in the ship's lee roll, without knowing it symbolizing thus in his action a mind resolute to surmount difficulties even if against primitive instincts strong as the wind and the sea. Presently he came to a stand before the three. After scanning their faces he stood less as mustering his thoughts for expression, than as one in deliberating how best to put them to well-meaning men not intellectually mature—men with whom it was necessary to demonstrate certain principles that were axioms to himself. Similar impatience as to talking is perhaps one reason that deters some minds from addressing any popular assemblies, under which head is to be classed most legislatures in a Democracy.

When speak he did, something both in the substance of what he said and his manner of saying it, showed the influence of unshared studies, modifying and tempering the practical training of an active career. This, along with his phraseology now and then, was suggestive of the

grounds whereon rested that imputation of a certain pedantry socially alleged against him by certain naval men of wholly practical cast, captains who nevertheless would frankly concede that His Majesty's Navy mustered no more efficient officers of their grade than "Starry Vere."

What he said was to this effect: "Hitherto I have been but the witness, little more, and I should hardly think now to take another tone, that of your coadjutor, for the time, did I not perceive in you—at the crisis too—a troubled hesitancy, proceeding, I doubt not, from the clashing of military duty with moral scruple—scruple vitalized by compassion. For the compassion, how can I otherwise but share it? But, mindful of paramount obligation, I strive against scruples that may tend to enervate decision. Not, gentlemen, that I hide from myself that the case is an exceptional one. Speculatively regarded, it well might be referred to a jury of casuists. But for us here, acting not as casuists or moralists, it is a case practical and under martial law practically to be dealt with."

"But your scruples! Do they move as in a dusk? Challenge them. Make them advance and declare themselves. Come now—do they import something like this: If, mindless of palliating circumstances, we are bound to regard the death of the Master-at-arms as the prisoner's deed, then does that deed constitute a capital crime whereof the penalty is a mortal one? But in natural justice is nothing but the prisoner's overt act to be considered? How can we adjudge to summary and shameful death a fellow-creature innocent before God, and whom we feel to be so?—Does that state it aright? You sign sad assent. Well, I, too, feel that, the full force of that. It is Nature. But do these buttons that we wear attest that our allegiance is to Nature? No, to the King. Though the ocean, which is inviolate Nature primeval, though this be the element where we move and have our being as sailors, yet as the King's officers lies our duty in a sphere

correspondingly natural? So little is that true, that in receiving our commissions we in the most important regards ceased to be natural free-agents. When war is declared, are we, the commissioned fighters, previously consulted? We fight at command. If our judgments approve the war, that is but coincidence. So in other particulars. So now, would it be so much we ourselves that would condemn as it would be martial law operating through us? For that law and the rigour of it, we are not responsible. Our vowed responsibility is in this. That however pitilessly that law may operate, we nevertheless adhere to it and administer it.

"But the exceptional in the matter moves the heart within you. Even so, too, is mine moved. But let not warm hearts betray heads that should be cool. Ashore in a criminal case will an upright judge allow himself when off the bench to be waylaid by some tender kinswoman of the accused seeking to touch him with her tearful plea? Well, the heart here is as that piteous woman. The heart is the feminine in man, and hard though it be, she must here be ruled out."

He paused, earnestly studying them for a moment, then resumed.

"But something in your aspect seems to urge that it is not solely that heart that moves in you, but also the conscience, the private conscience. Then, tell me whether or not, occupying the position we do, private conscience should not yield to that imperial one formulated in the code under which alone we officially proceed?"

Here the three men moved in their seats, less convinced than agitated by the course of an argument troubling but the more the spontaneous conflict within. Perceiving which, the speaker paused for a moment; then abruptly changing his tone, went on:

"To steady us a bit, let us recur to the facts.—In war-time at sea a man-of-war's man strikes his superior in grade, and the blow kills. Apart from its effect, the blow

itself is, according to the Articles of War, a capital crime. Furthermore—"

"Ay, Sir," emotionally broke in the officer of marines, "in one sense it was. But surely Budd purposed neither mutiny nor homicide."

"Surely not, my good man. And before a court less arbitrary and more merciful than a martial one that plea would largely extenuate. At the Last Assizes it shall acquit. But how here? We proceed under the law of the Mutiny Act. In feature no child can resemble his father more than that Act resembles in spirit the thing from which it derives—War. In His Majesty's service—in this ship indeed—there are Englishmen forced to fight for the King against their will. Against their conscience, for aught we know. Though as then fellow-creatures some of us may appreciate their position, yet as Navy officers, what reck we of it? Still less recks the enemy. Our impressed men he would fain cut down in the same swath with our volunteers. As regards the enemy's naval conscripts, some of whom may even share our own abhorrence of the regicidal French Directory,³² it is the same on our side. War looks but to the frontage, the appearance. And the Mutiny Act, War's child, takes after the father. Budd's intent or non-intent is nothing to the purpose."

"But while, put to it by those anxieties in you which I cannot but respect, I only repeat myself—while thus strangely we prolong proceedings that should be summary, the enemy may be sighted and an engagement result. We must do, and one of two things must we do—condemn or let go."

"Can we not convict and yet mitigate the penalty?" asked the junior Lieutenant here speaking, and falteringly, for the first time.

"Lieutenant, were that clearly lawful for us under the circumstances, consider the

³² The French government, regarded as responsible for the execution of Louis XVI.

consequences of such clemency The people" (meaning the ship's company) "have native sense, most of them are familiar with our naval usage and tradition, and how would they take it? Even could you explain to them—which our official position forbids—they, long moulded by arbitrary discipline, have not that kind of intelligent responsiveness that might qualify them to comprehend and discriminate No, to the people the foretopman's deed, however it be worded in the announcement, will be plain homicide committed in a flagrant act of mutiny What penalty for that should follow, they know But it does not follow *Why?* they will ruminate You know what sailors are Will they not revert to the recent outbreak at the *Noie*? Ay, they know the well-founded alarm—the panic it struck throughout England Your element sentence they would account pusillanimous They would think that we flinch, that we are afraid of them—afraid of practising a lawful rigour singularly demanded at this juncture lest it should provoke new troubles What shame to us such a conjecture on their part, and how deadly to discipline You see then whither, prompted by duty and the law, I steadfastly drive But I beseech you, my friends, do not take me amiss I feel as you do for this unfortunate boy But did he know our hearts, I take him to be of that generous nature that he would feel even for us on whom in this military necessity so heavy a compulsion is laid "

With that, crossing the deck, he resumed his place by the sashed port-hole, tacitly leaving the three to come to a decision On the cabin's opposite side the troubled court sat silent Loyal lieges, plain and practical, though at bottom they dissented from some points Captain Vere had put to them, they were without the faculty, hardly had the inclination to gainsay one whom they felt to be an earnest man—one, too, not less their superior in mind than in naval rank But it is not improbable that even such of his words as

were not without influence over them, less came home to them than his closing appeal to their instinct as sea-officers, in the forethought he threw out as to the practical consequences to discipline (considering the unconfirmed tone of the fleet at the time)—should a man-of-war's man's violent killing at sea of a superior in grade be allowed to pass for aught else than a capital crime, demanding prompt infliction of the penalty?

Not unlikely they were brought to something more or less akin to that harassed frame of mind which in the year 1842 actuated the commander of the U S brig-of-war *Somers* to resolve (under the so-called Articles of War—Articles modelled upon the English Mutiny Act) to resolve upon the execution at sea of a midshipman and two petty-officers as mutineers designing the seizure of the brig Which resolution was carried out, though in a time of peace and within not many days' sail of home An act vindicated by a naval court of inquiry subsequently convened ashore—history, and here cited without comment True, the circumstances on board the *Somers* were different from those on board the *Indomitable* But the urgency felt, well-warranted or otherwise, was much the same

Says a writer whom few know, "Forty years after a battle it is easy for a non-combatant to reason about how it ought to have been fought It is another thing personally and under fire to direct the fighting while involved in the obscuring smoke of it Much so with respect to other emergencies involving considerations both practical and moral, and when it is imperative promptly to act The greater the fog, the more it imperils the steamer, and speed is put on though at the hazard of running somebody down Little ween the snug card-players in the cabin of the responsibilities of the sleepless man on the bridge."

In brief, Billy Budd was formally convicted and sentenced to be hung at the yard-arm in the early morning-watch, it

being now night Otherwise, as is customary in such cases, the sentence would forthwith have been carried out In war-time on the field or in the fleet, a mortal punishment decreed by a drum-head court—on the field sometimes decreed by but a nod from the General—follows without a delay on the heel of conviction without appeal

CHAPTER XIX

It was Captain Vere himself who, of his own motion, communicated the finding of the court to the prisoner, for that purpose going to the compartment where he was in custody, and bidding the marine there to withdraw for the time

Beyond the communication of the sentence, what took place at this interview was never known But, in view of the character of the twain briefly closeted in that state-room, each radically sharing in the rarer qualities of one nature—so rare, indeed, as to be all but incredible to average minds however much cultivated—some conjectures may be ventured

It would have been in consonance with the spirit of our Captain Vere should he on this occasion have concealed nothing from the condemned one—should he indeed have frankly disclosed to him the part he himself had played in bringing about the decision, at the same time revealing his actuating motives On Billy's side it is not improbable that such a confession would have been received in much the same spirit that prompted it Not without a sort of joy indeed he might have appreciated the brave opinion of him implied in his Captain making such a confidant of him Nor as to the sentence itself could he have been insensible that it was imparted to him as to one not afraid to die Even more may have been Captain Vere in the end may have developed the passion sometimes latent under an exterior stoical or indifferent He was old enough to have been Billy's father The austere devotee of military duty, letting himself melt back into what remains primeval in our formal-

ized humanity, may in the end have caught Billy to heart, even as Abrahams may have caught young Isaac on the brink of resolutely offering him up in obedience to the exacting behest But there is no telling the sacrament—seldom if in any case revealed to the gadding world—wherever under circumstances at all akin to those here attempted to be set forth, two of great Nature's nobler order embrace There is privacy at the time, inviolable to the survivor, and holy oblivion (the sequel to each diviner magnanimity) providentially covers all at last

The first to encounter Captain Vere in the act of leaving the compartment was the senior Lieutenant The face he beheld, for the moment one expressive of the agony of the strong, was to that officer, though a man of fifty, a startling revelation That the condemned one suffered less than he who mainly had effected the condemnation, was apparently indicated by the former's exclamation in the scene soon perforce to be touched upon

Of a series of incidents within a brief term rapidly following each other, the adequate narration may take up a term less brief, especially if explanation or comment here and there seem requisite to the better understanding of such incidents Between the entrance into the cabin of him who never left it alive, and him who when he did leave it left it as one condemned to die, between this and the closeted interview just given, less than an hour and a half had elapsed It was an interval long enough, however, to awaken speculations among no few of the ship's company as to what it was that could be detaining in the cabin the Master-at-arms and the sailor, for it was rumoured that both of them had been seen to enter it and neither of them had been seen to emerge This rumour had got abroad upon the gun-decks and in the tops, the people of a great war-ship being in one respect like villagers, taking microscopic note of every untoward movement or non-movement going on When therefore in weather not at

all tempestuous all hands were called in the second dog-watch, a summons under such circumstances not usual in those hours, the crew were not wholly unprepared for some announcement extraordinary, one having connection, too, with the continued absence of the two men from their wonted haunts

There was a moderate sea at the time, and the moon, newly risen and near to being at its full, silvered the white spar-deck wherever not blotted by the clear-cut shadows horizontally thrown of fixtures and moving men. On either side of the quarter-deck the marine guard under arms was drawn up, and Captain Vere, standing up in his place surrounded by all the ward-room officers, addressed his men. In so doing his manner showed neither more nor less than that properly pertaining to his supreme position aboard his own ship. In clear terms and concise he told them what had taken place in the cabin, that the Master-at-arms was dead, that he who had killed him had been already tried by a summary court and condemned to death, and that the execution would take place in the early morning watch. The word *mutiny* was not named in what he said. He refrained, too, from making the occasion an opportunity for any preachment as to the maintenance of discipline, thinking, perhaps, that under existing circumstances in the navy the consequence of violating discipline should be made to speak for itself.

Their Captain's announcement was listened to by the throng of standing sailors in a dumbness like that of a seated congregation of believers in Hell listening to the clergyman's announcement of his Calvinistic text.

At the close, however, a confused murmur went up. It began to wax all but instantly, then, at a sign, was pierced and suppressed by shrill whistles of the Boat-swain and his mates piping "Down one watch."

To be prepared for burial Claggart's body was delivered to certain petty-officers

of his mess. And here, not to clog the sequel with lateral matters, it may be added that at a suitable hour, the Master-at-arms was committed to the sea with every funeral honour properly belonging to his naval grade.

In this proceeding, as in every public one growing out of the tragedy, strict adherence to usage was observed. Nor in any point could it have been at all deviated from, either with respect to Claggart or Billy Budd, without begetting undesirable speculations in the ship's company, the sailors, and more particularly the men-of-war's men, being of all men the greatest sticklers for usage.

For similar cause all communication between Captain Vere and the condemned one ended with the closeted interview already given, the latter being now surrendered to the ordinary routine preliminary to the end. This transfer under guard from the Captain's quarters was effected without unusual precautions—at least no visible ones.

If possible, not to let the men so much as surmise that their officers anticipate aught amiss from them, is the tacit rule in a military ship. And the more that some sort of trouble should really be apprehended, the more do the officers keep that apprehension to themselves, though not the less unostentatious vigilance may be augmented.

In the present instance the sentry placed over the prisoner had strict orders to let no one have communication with him but the Chaplain. And certain unobtrusive measures were taken absolutely to insure this point.

CHAPTER XX

In a seventy-four of the old order the deck known as the upper gun-deck was the one covered over by the spar-deck, which last, though not without its armament, was for the most part exposed to the weather. In general it was at all hours free from hammocks, those of the crew

swinging on the lower gun-deck and berth-deck, the latter being not only a dormitory but also the place for the stowing of the sailors' bags, and on both sides lined with the large chests or movable pantries of the many messes of the men

On the starboard side of the *Indomitable's* upper gun-deck, behold Billy Budd under sentry lying prone in irons in one of the bays formed by the regular spacing of the guns comprising the batteries on either side. All these pieces were of the heavier calibre of that period. Mounted on lumbering wooden carriages, they were hampered with cumbersome harness of breeching and strong side-tackles for running them out. Guns and carriages, together with the long rammers and shorter lintstocks lodged in loops overhead—all these, as customary, were painted black, and the heavy hempen breechings, tarred to the same tint, wore the like livery of the undertakers. In contrast with the funereal tone of these surroundings the prone sailor's exterior apparel, white *jumper* and white duck trousers, each more or less soiled, dimly glimmered in the obscure light of the bay like a patch of discoloured snow in early April lingering at some upland cave's black mouth. In effect he is already in his shroud or the garments that shall serve him in lieu of one. Over him, but scarce illuminating him, two battle-lanterns swing from two massive beams of the deck above. Fed with the oil supplied by the war-contractors (whose gains, honest or otherwise, are in every land an anticipated portion of the harvest of death), with flickering splashes of dirty yellow light they pollute the pale moonshine all but ineffectually struggling in obstructed flecks through the open ports from which the tompioned cannon protrude. Other lanterns at intervals serve but to bring out somewhat the obscurer bays which, like small confessionals or side-chapels in a cathedral, branch from the long, dim-vast, broad aisle between the two batteries of that covered tier.

Such was the deck where now lay the

Handsome Sailor. Through the rose-tan of his complexion, no pallor could have shown. It would have taken days of sequestration from the winds and the sun to have brought about the effacement of that young sea-bloom. But the skeleton in the cheek-bone at the point of its angle was just beginning delicately to be defined under the warm-tinted skin. In fervid hearts self-contained some brief experiences devour our human tissue as secret fire in a ship's hold consumes cotton in the bale.

But now, lying between the two guns, as nipped in the vice of fate, Billy's agony, mainly proceeding from a generous young heart's virgin experience of the diabolical incarnate and effective in some men—the tension of that agony was over now. It survived not the something healing in the closeted interview with Captain Vere. Without movement, he lay as in a trance, that adolescent expression previously noted as his taking on something akin to the look of a slumbering child in the cradle when the warm hearth-glow of the still chamber of night plays on the dimples that at whiles mysteriously form in the cheek, silently coming and going there. For now and then in the gyved one's trance, a serene happy light born of some wandering reminiscence or dream would diffuse itself over his face, and then wane away only anew to return.

The Chaplain coming to see him and finding him thus, and perceiving no sign that he was conscious of his presence, attentively regarded him for a space, then slipping aside, withdrew for the time, per-adventure feeling that even he, the minister of Christ, though receiving his stipend from wars, had no consolation to proffer which could result in a peace transcending that which he beheld. But in the small hours he came again. And the prisoner, now awake to his surroundings, noticed his approach, and civilly, all but cheerfully, welcomed him. But it was to little purpose that in the interview following the good man sought to bring Billy Budd to some Godly understanding that he must die, and

at dawn True, Billy himself freely referred to his death as a thing close at hand, but it was something in the way that children will refer to death in general, who yet among their other sports will play a funeral with hearse and mourners Not that like children Billy was incapable of conceiving what death really is No, but he was wholly without irrational fear of it, a fear more prevalent in highly civilized communities than those so-called barbarous ones which in all respects stand nearer to unadulterate Nature And, as elsewhere said, a barbarian Billy radically was, as much so, for all the costume, as his countrymen the British captives, living trophies made to march in the Roman triumph of Germanicus³³ Quite as much so as those later barbarians, young men probably, and picked specimens among the earlier British converts to Christianity, at least nominally such, and taken to Rome (as to-day converts from lesser isles of the sea may be taken to London), of whom the Pope of that time, admiring the strangeness of their personal beauty—so unlike the Italian stamp, their clear, ruddy complexions and curled flaxen locks, exclaimed, “Angles” (meaning *English*, the modern derivative) —“Angles do you call them? And is it because they look so like *Angels*?” Had it been later in time one would think that the Pope had in mind Fra Angelico’s³⁴ seraphs, some of whom, plucking apples in gardens of Hesperides, have the faint rose-bud complexion of the more beautiful English girls

CHAPTER XXI

If in vain the kind Chaplain sought to impress the young barbarian with ideas of death akin to those conveyed in the skull, dial and cross-bones on old tombstones, equally futile to all appearances were his efforts to bring home to him the thought of salvation and a Saviour Billy listened, but less out of awe or reverence, perhaps, than from a certain natural politeness, doubtless at bottom regarding all that in

much the same way which most mariners of his class take any discourse abstract or out of the common tone of the workaday world And this sailor way of taking clerical discourse is not wholly unlike the way in which the pioneer of Christianity—full of transcendent miracles—was received long ago on tropic isles by any superior *savage* so called a Tahitian say of Captain Cook’s³⁵ time or shortly after that time Out of natural courtesy he received but did not appreciate It was like a gift placed in the palm of an out-stretched hand upon which the fingers do not close

But the *Indomitable’s* Chaplain was a discreet man possessing the good sense of a good heart So he insisted not in his vocation here At the instance of Captain Vere, a lieutenant had apprised him of pretty much of everything as to Billy, and since he felt that innocence was even a better thing than religion wherewith to go to judgment, he reluctantly withdrew, but in his emotion not without performing an act strange enough in an Englishman, and under the circumstances yet more so in any regular priest Stooping over, he kissed on the fair cheek his fellow man, a felon in martial law, one who, though in the confines of death, he felt he could never convert to a dogma, nor for all that he did fear for his future

Marvel not that, having been made acquainted with the young sailor’s essential innocence, the worthy man lifted not a finger to avert the doom of such a martyr to martial discipline So to do would not only have been as idle as invoking the desert, but would also have been an audacious transgression of the bounds of his function—one as exactly prescribed to him

³³ Roman general, whose victory over the Germans was celebrated at Rome in a formal triumph, 17 A.D.

³⁴ Italian painter of religious subjects, 1387-1455

³⁵ Captain James Cook, British explorer and mariner (1728-79) He visited Tahiti in the course of his famous exploring voyage around the earth, 1772-75

by military law as that of any other naval officer. Bluntly put, a chaplain is the minister of the Prince of Peace serving in the host of the God of War—Mars. As such, he is as incongruous as a musket would be on the altar at Christmas. Why then is he there? Because he indirectly subserves the purpose attested by the cannon, because, too, he lends the sanction of the religion of the meek to that which practically is the abrogation of everything but force.³⁸

CHAPTER XXII

The night so luminous on the spar-deck, but otherwise on the cavernous ones below—levels so very like the tiered galleries in a coal-mine—the luminous night passed away. Like the prophet in the chariot disappearing in heaven and dropping his mantle to Elisha, the withdrawing night transferred its pale robe to the peeping day. A meek shy light appeared in the East, where stretched a diaphanous fleece of white furrowed vapour. That light slowly waxed. Suddenly eight bells was struck aft, responded to by eight louder metallic strokes from forward. It was four o'clock in the morning. Instantly the silver whistles were heard summoning all hands to witness punishment. Up through the great hatchway rimmed with racks of heavy shot, the watch below came pouring, overspreading with the watch already on deck the space between the mainmast and foremast, including that occupied by the capacious *launch* and the black booms tiered on either side of it—boat and booms making a summit of observation for the powder boys and younger tars. A different group comprising one watch of topmen leaned over the side of the rail of that sea-balcony, no small one in a seventy-four, looking down on the crowd below. Man or boy, none spake but in whisper, and few spake at all. Captain Vere—as before, the central figure among the assembled commissioned officers—stood nigh the break of the poop-deck, facing forward. Just below

him on the quarter-deck the marines in full equipment were drawn up much as at the scene of the promulgated sentence.

At sea in the old time, the execution by halter of a military sailor was generally from the fore-yard. In the present instance—for special reasons—the main-yard was assigned. Under an arm of that yard the prisoner was presently brought up, the Chaplain attending him. It was noted at the time, and remarked upon afterwards, that in this final scene the good man evinced little or nothing of the perfunctory. Brief speech indeed he had with the condemned one, but the genuine gospel was less on his tongue than in his aspect and manner towards him. The final preparations personal to the latter being speedily brought to an end by two boatswain's-mates, the consummation impended. Billy stood facing aft. At the penultimate moment, his words, his only ones, words wholly unobstructed in the utterance, were these—"God bless Captain Vere!" Syllables so unanticipated coming from one with the ignominious hemp about his neck—a conventional felon's benediction directed aft towards the quarters of honour, syllables, too, delivered in the clear melody of a singing-bird on the point of launching from the twig, had a phenomenal effect, not unenhanced by the rare personal beauty of the young sailor, spiritualized now through late experiences so poignantly profound.

Without volition, as it were, as if indeed the ship's populace were the vehicles of some vocal electric current, with one voice, from aloft and aloft, came a resonant echo—"God bless Captain Vere!" And yet, at that instant, Billy alone must have been in their hearts, even as he was in their eyes.

At the pronounced words and the spontaneous echo that voluminously rebounded them, Captain Vere, either through store self-control or a sort of momentary paralysis induced by emotional shock, stood

³⁸ An irruption of heretic thought hard to suppress—Melville's note.

erectly rigid as a musket in the ship-armour's rack

The hull, deliberately recovering from the periodic roll to leeward, was just regaining an even keel—when the last signal, the preconcerted dumb one, was given. At the same moment it chanced that the vapoury fleece hanging low in the East, was shot through with a soft glory as of the fleece of the Lamb of God seen in mystical vision, and simultaneously therewith, watched by the wedged mass of upturned faces, Billy ascended, and ascending, took the full rose of the dawn.

In the pinioned figure, arrived at the yard-end, to the wonder of all no motion was apparent save that created by the slow roll of the hull, in moderate weather so majestic in a great ship heavy-cannoned

A DIGRESSION

When, some days afterwards, in reference to the singularity just mentioned, the Purser (a rather ruddy, rotund person, more accurate as an accountant than profound as a philosopher) said at mess to the Surgeon, "What testimony to the force lodged in will-power," the latter, spare and tall, one in whom a discreet causticity went along with a manner less genial than polite, replied, "Your pardon, Mr Purser. In a hanging so scientifically conducted—and, under special orders, I myself directed how Budd's was to be effected—any movement following the completed suspension and originating in the body suspended, such movement indicates mechanical spasm in the muscular system. Hence the absence of that is no more attributable to will-power, as you call it, than to horse-power—begging your pardon."

"But this muscular spasm you speak of—is not that, in a degree, more or less invariable in these cases?"

"Assuredly so, Mr Purser."

"How then, my good sir, do you account for its absence in this instance?"

"Mr Purser, it is clear that your sense of the singularity in this matter equals not

mine. You account for it by what you call will-power, a term not yet included in the lexicon of science. As for me, I do not with my present knowledge pretend to account for it at all. Even should one assume the hypothesis that, at the first touch of the halyards, the action of Budd's heart, intensified by extraordinary emotion at its climax, abruptly stopped—much like a watch when in carelessly winding it up you strain at the finish, thus snapping the spring—even under that hypothesis, how account for the phenomenon that followed?"

"You admit, then, that the absence of spasmodic movement was phenomenal?"

"It was phenomenal, Mr Purser, in the sense that it was an appearance, the cause of which is not immediately to be assigned."

"But tell me, my dear Sir," pertinaciously continued the other, "was the man's death effected by the halter, or was it a species of euthanasia?"

"*Euthanasia*, Mr Purser, is something like your will-power, I doubt its authenticity as a scientific term—begging your pardon again. It is at once imaginative and metaphysical, in short, Greek. But," abruptly changing his tone, "there is a case in the sick-bay which I do not care to leave to my assistants. Begging your pardon, but excuse me." And rising from the mess he formally withdrew.

CHAPTER XXIII

The silence at the moment of execution, and for a moment or two continuing thereafter (but emphasized by the regular wash of the sea against the hull, or the flutter of a sail caused by the helmsman's eyes being tempted astray), this emphasized silence was gradually disturbed by a sound not easily to be here verbally rendered. Whoever has heard the freshest-wave of a torrent suddenly swelled by pouring showers in tropical mountains, showers not shared by the plain, whoever has heard the first muffled murmur of its sloping advance through precipitous woods, may form

some conception of the sound now heard. The seeming remoteness of its source was because of its murmurous indistinctness, since it came from close by, even from the men massed on the ship's open deck. Being inarticulate, it was dubious in significance further in that it seemed to indicate some capricious revulsion of thought or feeling such as mobs ashore are liable to—in the present instance possibly implying a sullen revocation on the men's part of their involuntary echoing of Billy's benediction. But ere the murmur had time to wax into clamour it was met by a strategic command, the more telling that it came with abrupt unexpectedness.

"Pipe down the starboard watch, Boatswain, and see that they go."

Still as the shriek of the sea-hawk the whistles of the Boatswain and his Mates pierced that ominous low sound, dissipating it, and yielding to the mechanism of discipline the throng was thinned by one half. For the remainder most of them were set to temporary employments connected with trimming the yards and so forth, business readily to be found upon occasion by any officer-of-the-deck.

Now each proceeding that follows a mortal sentence pronounced at sea by a drum-head court is characterized by a promptitude not perceptibly merging into hurry, though bordering that. The hammock—the one which had been Billy's bed when alive, having already been ballasted with shot and otherwise prepared to serve for his canvas coffin—the last offices of the sea-undertakers, the Sail-maker's Mates, were now speedily completed. When everything was in readiness, a second call for all hands, made necessary by the strategic movement before mentioned, was sounded and now to witness burial.

The details of this closing formality it needs not to give. But when the tilted plank let slide its freight into the sea, a second strange human murmur was heard—blended now with another inarticulate sound proceeding from certain larger sea-fowl, whose attention having been attracted

by the peculiar commotion in the water resulting from the heavy sloped dive of the shotted hammock into the sea, flew screaming to the spot. So near the hull did they come, that the stridor or bony creak of their gaunt double-jointed pinions was audible. As the ship under light airs passed on, leaving the burial spot astern, they still kept circling it low down with the moving shadow of their outstretched wings and the cracked requiem of their cries.

Upon sailors as superstitious as those of the age preceding ours—all men-of-war's men, too, who had just beheld the prodigy of repose in the form suspended in air and now foundering in the deeps, to such mariners the action of the sea-fowl, though dictated by a mere animal greed for prey, was big with no prosaic significance. An uncertain movement began among them, in which some encroachment was made. It was tolerated but for a moment. For suddenly the drum beat to quarters—which familiar sound, happening at least twice every day, had upon the present occasion some signal peremptoriness in it. True martial discipline long continued superinduces in an average man a sort of impulse of docility, whose operation at the official tone of command much resembles in its promptitude the effect of an instinct.

The drum-beat dissolved the multitude, distributing most of them along the batteries of the two covered gun-decks. There, as wont, the gun crews stood by their respective cannon erect and silent. In due course the First officer, sword under arm and standing in his place on the quarter-deck, formally received the successive reports of the sworded Lieutenants commanding the sections of batteries below; the last of which reports being made, the summed report he delivered with the customary salute to the Commander. All of this occupied time, which, in the present case, was the object of beating to quarters at an hour prior to the customary one. That such variance from usage was authorized by an officer like Captain Vere (a

martinet as some deemed him), was evidence of the necessity for unusual action implied in what he deemed to be temporarily the mood of his men "With mankind," he would say, "forms, measured forms, are everything, and that is the import couched in the story of Orpheus, with his lyre, spell-binding the wild demizens of the woods" And this he once applied to the disruption of forms going on across the Channel and the consequence thereof

At this unwonted muster at quarters, all proceeded as at the regular hour The band on the quarter-deck played a sacred air After which the Chaplain went through with the customary morning service That done, the drum beat the retreat, and toned by music and religious rites subserving the discipline and purpose of war, the men in their wonted, orderly manner dispersed to the places allotted them when not at the guns

And now it was full day The fleece of low-hanging vapour had vanished, licked up by the sun that late had so glorified it And the circumambient air in the clearness of its serenity was like smooth white marble in the polished block not yet removed from the marble-dealer's yard

CHAPTER XXIV

The symmetry of form attainable in pure fiction cannot so readily be achieved in a narration essentially having less to do with fable than with fact Truth uncompromisingly told will always have its ragged edges, hence the conclusion of such a narration is apt to be less finished than an architectural finial

How it fared with the Handsome Sailor during the year of the great mutiny has been faithfully given But though properly the story ends with his life, something in way of a sequel will not be amiss Three brief chapters will suffice.

In the general re-christening under the Directory of the craft originally forming the navy of the French Monarchy, the *St Louis* line-of-battle ship was named

the *Athéiste* Such a name, like some other substituted ones in the Revolutionary fleet, while proclaiming the infidel audacity of the ruling power, was yet (though not so intended to be) the aptest name, if one consider it, ever given to a war-ship, far more so, indeed, than the *Devastation* or the *Erebus* (the Hell) and similar names bestowed upon fighting ships

On the return passage to the full English fleet from the detached cruise during which occurred the events already recorded, the *Indomitable* fell in with the *Athéiste* An engagement ensued, during which Captain Vere, in the act of putting his ship alongside the enemy with a view of throwing his boarders across the bulwarks, was hit by a musket-ball from a port-hole of the enemy's main cabin More than disabled, he dropped to the deck and was carried below to the same cock-pit where some of his men already lay The senior Lieutenant took command Under him the enemy was finally captured, and though much crippled, was by rare good fortune successfully taken into Gibraltar, an English fort not very distant from the scene of the fight There Captain Vere with the rest of the wounded was put ashore He lingered for some days, but the end came Unhappily he was cut off too early for the Nile and Trafalgar The spirit that, in spite of its philosophic austerity, may yet have indulged in the most secret of all passions—ambition—never attained to the fulness of fame

Not long before death, while lying under the influence of that magical drug which, in soothing the physical frame, mysteriously operates on the subtler element in man, he was heard to murmur words inexplicable to his attendant—"Billy Budd, Billy Budd" That these were not the accents of remorse, would seem clear from what the attendant said to the *Indomitable's* senior officer of marines, who, as the most reluctant to condemn of the members of the drum-head court, too well knew (though here he kept the knowledge to himself) who Billy Budd was

CHAPTER XXV

Some few weeks after the execution, among other matters under the main head of *News from the Mediterranean*, there appeared in one naval chronicle of the time, an authorized weekly publication, an account of the affair. It was doubtless for the most part written in good faith, though the medium, partly rumour, through which the facts must have reached the writer, served to deflect and in part to falsify them. The account was as follows —

"On the tenth of the last month a deplorable occurrence took place on board *HMS Indomitable*. John Claggart, the ship's Master-at-arms, discovering that some sort of plot was incipient among an inferior section of the ship's company, and that the ringleader was one William Budd, he, Claggart, in the act of arraigning the man before the Captain was vindictively stabbed to the heart by the suddenly drawn sheath-knife of Budd.

"The deed and the implement employed sufficiently suggest that, though mustered into the service under an English name, the assassin was no Englishman but one of those aliens adopting English cognomen whom the present extraordinary necessities of the Service have caused to be admitted into it in considerable numbers.

"The enormity of the crime and the extreme depravity of the criminal, appear the greater in view of the character of the victim—a middle-aged man, respectable and discreet, belonging to that minor official grade, the petty-officers, upon whom, as none know better than the commissioned gentlemen, the efficiency of His Majesty's navy so largely depends. His function was a responsible one—at once onerous and thankless—and his fidelity in it the greater because of his strong patriotic impulse. In this instance, as in so many other instances in these days, the character of the unfortunate man signally refutes, if refutation were needed, that peevish saying attributed to the late Dr Johnson, that patriotism is the last refuge of a scoundrel.

"The criminal paid the penalty of his crime. The promptitude of the punishment has proved salutary. Nothing amiss is now apprehended aboard the *HMS Indomitable*."

The above item, appearing in a publication now long ago superannuated and forgotten, is all that hitherto has stood in human record, to attest what manner of men respectively were John Claggart and Billy Budd.

CHAPTER XXVI

Everything is for a season remarkable in navies. Any tangible object associated with some striking incident of the service is converted into a monument. The spar from which the foretopman was suspended was for some few years kept trace of by the blue-jackets. Then knowledge followed it from ship to dock-yard, and again from dock-yard to ship, still pursuing it even when at last reduced to a mere dock-yard boom. To them a chip of it was as a piece of the Cross. Ignorant though they were of the real facts of the happening, and not thinking but that the penalty was unavoidably inflicted from the naval point of view, for all that they instinctively felt that Billy was a sort of man as incapable of mutiny as of wilful murder. They recalled the fresh young image of the Handsome Sailor, that face never deformed by a sneer or subtler vile freak of the heart within! This impression of him was doubtless deepened by the fact that he was gone, and in a measure mysteriously gone. On the gun-decks of the *Indomitable* the general estimate of his nature and its unconscious simplicity eventually found rude utterance from another foretopman, one of his own watch, gifted as some sailors are with an artless poetic temperament. Those tarry hands made some lines which, after circulating among the ship-board crew for a while, finally were rudely printed at Portsmouth as a ballad. The title given to it was the sailor's own.

BILLY IN THE DARBIES ³⁷

*Good of the Chaplain to enter Lone Bay
 And down on his marrow-bones here and
 pray
 For the likes just o' me, Billy Budd—But
 look
 Through the port comes the moon-shine
 astray!
 It tips the guard's cutlass and silvers this
 nook,
 But 'twill die in the dawning of Billy's
 last day
 A jewel-block they'll make of me to-mor-
 row,
 Pendant pearl from the yard-arm-end
 Like the ear-drop I gave to Bristol Molly—
 O, 'tis me, not the sentence, they'll suspend
 Ay, Ay, all is up, and I must up too
 Early in the morning, aloft from alow
 On an empty stomach, now, never it would
 do
 They'll give me a nibble—but o' biscuit ere
 I go
 Sure, a messmate will reach me the last
 parting cup,
 But, turning heads away from the hoist
 and the belay,
 Heaven knows who will have the running
 of me up!*

*No pipe to those halyards—but aren't it
 all sham?
 A blur's in my eyes, it is dreaming that
 I am
 A hatchet to my hawser? all adrift to
 go?
 The drum roll to grog, and Billy never
 know?
 But Donald he has promised to stand by
 the plank,
 So I'll shake a friendly hand ere I sink
 But—no! It is dead then I'll be, come to
 think—
 I remember Taff the Welshman when he
 sank
 And his cheek it was like the budding pink
 But me, they'll lash me in hammock, drop
 me deep
 Fathoms down, fathoms down, how I'll
 dream fast asleep
 I feel it stealing now Sentry, are you
 there?
 Just ease these darbies at the wrist
 And roll me over fair
 I am sleepy, and the oozy weeds about me
 twist*

³⁷ Handcuffs, also, fetters

INDEX OF AUTHORS AND TITLES

[A]

Adams, John, 277, 336
 "Adams, John, Letter to," Samuel Adams, 339
 Adams, Samuel, 337
 "Adams, Samuel, Letter to," John Adams, 337
Abbé Raynal, Letter to the, Thomas Paine, 298
 "Abolition of Slavery, Address on," Benjamin Franklin, 335
Advertisements, Captain John Smith, 42
Age of Reason, The, Thomas Paine, 226
Agrarian Justice, Thomas Paine, 301
 Allen, Ethan, 219
American Democrat, The, James Fenimore Cooper, 425
American Notebooks, The, Nathaniel Hawthorne, 975
 "American Poetry, An Essay on," William Cullen Bryant, 412
American Scholar, The, Ralph Waldo Emerson, 726
Anarchiad, The, 322
 Andros Administration, Documents of the, 262
 "Annabel Lee," Edgar Allan Poe, 456
 "Apology, The," Ralph Waldo Emerson, 724
 "Arsenal at Springfield, The," Henry Wadsworth Longfellow, 578
 "Articles of Belief and Acts of Religion," Benjamin Franklin, 203
 Audubon, John James, 609
Autobiography, Benjamin Franklin, 204
Autobiography, Horace Greeley, 631
 "Autumn Within," Henry Wadsworth Longfellow, 585

[B]

Bacon's Rebellion, Documents of, 257
 Bartram, William, 138
 "Battle-Field, The," William Cullen Bryant, 411
Battle Pieces and Aspects of the War, "Prose Supplement" to, Herman Melville, 1057
 "Bean-Field, The," Henry David Thoreau, 842
 "Benito Cereno," Herman Melville, 1007

"Big Bear of Arkansas, The," Thomas Bangs Thorpe, 620
Biglow Papers, The, First Series, James Russell Lowell, 673
Biglow Papers, The, Second Series, James Russell Lowell, 678
Billy Budd, Foretopman, Herman Melville, 1065
Bloody Tenent yet More Bloody, The, Roger Williams, 254
Bloudy Tenent of Persecution, for Cause of Conscience, The, Roger Williams, 253
 "Boston Hymn," Ralph Waldo Emerson, 725
 Boucher, Jonathan, 282
 Brackenridge, Hugh Henry, 345
 Bradford, William, 49
 Bradstreet, Anne, 162
 "Brahma," Ralph Waldo Emerson, 724
 Brattle, Thomas, 104, 109
Brief Récit, Jacques Cartier, 31
Briefe and True Report, Thomas Hariot, 33
 Brown, Charles Bioekden, 231
 Brown, William Hill, 340
 Brownson, Orestes A., 635
 Bryant, William Cullen, 406
 Byrd, William, 120

[C]

Cabeza de Vaca, Alvar Nuñez, 25
 "Cambridge Thirty Years Ago," James Russell Lowell, 694
Captivity and Restoration, The, Mrs. Mary Rowlandson, 88
 Cartier, Jacques, 30
 Carver, Jonathan, 124
 "Cask of Amontillado, The," Edgar Allan Poe, 517
 "Celestial Railroad, The," Nathaniel Hawthorne, 932
 "Challenge of Thor, The," Henry Wadsworth Longfellow, 600
 Chauncy, Charles, 208
Christian Philosopher, The, Cotton Mather, 186
 "City in the Sea, The," Edgar Allan Poe, 449
 "Civil Disobedience," Henry David Thoreau, 855

Clarel, "Epilogue" from, Herman Melville, 1062
 "Coliseum, The," Edgar Allan Poe, 451
 "College Colonel, The," Herman Melville, 1057
 Columbus, Christopher, 18
Common Sense, Thomas Paine, 294
 "Comparison of the Conduct of the Ancient Jews and the Anti-Federalists, A," Benjamin Franklin, 333
Concerning the End for which God Created the World, Jonathan Edwards, 199
 "Conclusion" to *Walden*, Henry David Thoreau, 848
 "Concord Hymn," Ralph Waldo Emerson, 712
Conflict with Slavery, The, John Greenleaf Whittier, 667
 "Contemplations," Anne Bradstreet, 165
 Cooper, James Fenimore, 415
 "Cooper, James Fenimore," William Gilmore Simms, 570
Cosmographiae Introductio, Martin Waldseemüller, 23
 Cotton, John, 157, 246
 "Courtin', The," James Russell Lowell, 678
 Crèvecoeur, Michel-Guillaume Jean de, 128
Crisis, The, Thomas Paine, 297
 Crockett, David, 612
 "Cross of Snow, The," Henry Wadsworth Longfellow, 585
